

W11: VOICES OF EXPERIENCE WOMEN IN SENIOR MANAGEMENT

Time: 1.5 hours

Chair: Heather Bruce-Veitch
Iron Ore Company Canada

Women in management influence the work of many other people. Their leadership can produce a workplace which encourages women to pursue careers in science and engineering. These career paths, in turn, may lead to management positions. The purpose of the panel is to highlight the strengths which women bring to senior management positions, and to give audience members information on how to handle some of the challenges that this career path presents. The panel members are senior women managers in a variety of organizations. Each panelist in turn will speak for ten minutes on topics which frame the discussion, and then the audience will have an opportunity to ask questions. Total time: 90 minutes.

Framework topics: What are factors which contribute to success for women in management? What are challenges and how do you deal with them? What advice would you give to other women about a career in management?
