2 MSc Projects Available for Spring 2014

1) **OIL AND GAS** - Microbial sulfur reducing bacteria inhibition for offshore reservoir souring control in Newfoundland. This project is collaboration between Suncor, Penny Morrill (MUN Earth Sci), and Helen Zhang (MUN Engineering).

2) **Remediation of AMD** - Laboratory evaluations of the use of biochar on sulfidic mine tailings. This project is in collaboration with Joinal Abedin (Labrador Institute), and Tao Cheng and Penny Morrill (MUN Earth Sci).

If interested please contact Dr. Penny Morrill (pmorrill@mun.ca). These are competitive positions, and I would need to hear from you soon, as our SGS Baseline applications are due Feb. 10th.
