SCHOOL OF HUMAN KINETICS AND RECREATION

VISION
To be leaders in physical activity, leisure, and wellness with the purpose of advancing knowledge and benefiting people, communities, and society.

MISSION
The School inspires knowledgeable and reflective life-long learners who care about and are committed to promoting health and wellness in people, communities, and society. Through teaching, research and community partnerships, together we contribute to knowledge generation and translation that has impacts provincially, nationally, and internationally.

VALUES
- Excellence, innovation, integrity: in our teaching, research and administration
- Diversity and inclusion: for students, colleagues and community
- Collaboration and engagement: within HKR, the university and beyond

GOALS:

TEACHING AND LEARNING
- To graduate students who think analytically, critically and creatively and who make decisions on the basis of evidence, ethics, and values.
- To prepare graduates to be experts in health and wellness and its promotion in a variety of professional settings.
- To create rich learning experiences for our diverse student populations.
- To facilitate relevant, engaged and active learning through experiential and cooperative education.

RESEARCH AND SCHOLARSHIP
- To conduct innovative and quality research.
- To collaborate with researchers, professionals, and organizations both locally and globally.
- To engage in knowledge translation within Academia and to share research knowledge in the broader community for the purpose of transforming and enriching lives.

PUBLIC ENGAGEMENT
- To create opportunities that engage the public and communities in health and wellness.
- To intersect public engagement with teaching and research.
- To build capacity for public awareness and collaboration.
