Windows 10 – How to Forget Wireless Network
Memorial University

Follow these steps to forget a wireless network

1. Click the Start button and choose Settings.

2. From the list of Settings, click on Network & Internet.

3. Scroll down on the Wi-Fi tab and click on Manage Wi-Fi settings.

4. Scroll down to the list of saved wireless networks. Click on the one you want to forget and click Forget.

Troubleshooting
