5.12 Report of the Senate Committee on Undergraduate Studies
Sub-Committee to Review Recommendations 4. And 7. Of the Report of the Senate ad hoc Committee on the Teaching of Writing

A memorandum dated July 7, 1998, was received from the Senate Committee on Undergraduate Studies advising that in response to a recommendation from Senate that appropriate action be taken with regard to Recommendations 4. and 7. of the Report of the Senate ad hoc Committee on the Teaching of Writing, a Sub-Committee was appointed to undertake a review of these recommendations.

In its Report to the Senate Committee on Undergraduate Studies, the Sub-Committee endorsed Recommendations 4. and 7. which read as follows:

"Recommendation 4.

The Senate should establish a set of writing expectations for students throughout the University. These should be promulgated in the University Calendar. (A proposed statement of expectations is attached as Appendix V. of the Report).

Recommendation 7.

Students should be informed that good writing is expected in their courses and is a legitimate object of grading in all disciplines. This should be emphasized in the Calendar, in brochures from the Writing Centre, and in the course descriptions and grading proposals given to students at the beginning of each course."
It was moved by Dr. Treslan, seconded by Mr. Collins and carried, that the following calendar changes to General Regulation S., REGULATIONS FOR EXAMINATIONS AND EVALUATIONS, be approved:

Page 56, 1998–99 Calendar, following the heading S. Regulations for Examinations and Evaluations, delete the current clause 3. and replace with the following:

"Students at all university levels should have reasonably sophisticated and effective communication skills and are expected to demonstrate proficiency in logical organization, clarity of expression and grammatical correctness. Hence good writing is expected of students in all courses, not only in those designated "Writing and Research courses." Upon graduation students should be capable of expressing complicated ideas clearly and concisely and should be able to develop arguments in a logical manner.

Good student writing is characterized by the following qualities:

Content – Critical insight and freshness of thought
Clear and penetrating ideas
Perceptive, pure grasp of subject
Intelligent use of primary and secondary sources
A sense of completeness about the handling of the topic
Organization – Effective introduction and conclusion
Main idea is clear and logical development follows
Smooth transitions
Good use of details
Style – Appropriate, accurate, precise and idiomatic diction
Sentences varied in kind, length and effect
Mechanics – Consistently correct spelling

Accurate use of punctuation

Grammatically correct sentences

Well organized paragraphing

When, in the judgement of the instructor, a student persistently fails to display a reasonable standard of literacy, the instructor may consider this as detracting from the quality of the student's work in the course when assigning a final mark or grade."

Insert new clause S.2.b) as follows:

"Good writing skills are required for effective communication. Students are, therefore, expected to demonstrate proficiency in logical organization, clarity of expression and grammatical correctness."

Re-letter the current clause S.2.b) as S.2.c).

Note: Subsequent to the meeting, a memorandum dated September 14, 1998, was received from the Secretary Senate Committee on Undergraduate Studies advising that the University Librarian had pointed out a flaw in the proposed S.3 as forwarded to Senate in that it includes a sentence which is redundant. This was addressed as an editorial change and the above clause S.3 has been amended accordingly.

It is essential that the university take a coordinated approach to curriculum development in support of information technology needs. The moribund Computer Science/Engineering Joint Committee on Academic Issues should be subsumed into this committee."
