Memorial University of Newfoundland is the perfect place to inspire ingenious 21st-century explorers. Nestled in the free and awe-inspiring landscapes of Newfoundland & Labrador, this University offers unusual and compelling opportunities to learn, to explore and to achieve. With over 18,800 students working together across four campuses, Memorial University of Newfoundland is more than just a university, it is a community of learning.

The 2012-2013 University Calendar is on-line at www.mun.ca/regoff/calendar.php.

IN MEMORIAM

Three hundred and ten former students of the Memorial University College offered themselves for active service in the Second Great War, 1939-1945. The University holds in special honour the past students who have been reported dead or missing and whose names are here given.

DAVID MONROE BAIRD

1 Note

The contents of this calendar set forth the intentions of the University at the time of publication, with respect to the matters contained therein. THE UNIVERSITY EXPRESSLY RESERVES THE RIGHT TO DEVIATE FROM WHAT APPEARS IN THE CALENDAR, including both the content and scheduling therein, in whole or in part, and including, without limiting the generality of the foregoing, the right to revise the content of, and to cancel, defer, reschedule or suspend, in whole or in part, the scheduling of particular periods of instruction, courses, or programs, and the academic program of the University, and to alter, accelerate or defer fees and charges, and to do any or all of the above either in order to serve what the University considers to be the best interests of the academic or student community or of the University itself, or because of any circumstance or occurrence, whether occurring by or through the wilful act or negligence of the University, its agents, servants and employees, or otherwise and whether or not beyond the reasonable or other control of the University, and without limiting the generality of the foregoing, as a result of circumstances or occurrences including financial resources, natural catastrophe or disaster, the health, safety and well-being of the employees or students of the University, labour disagreements or disputes, slow-downs, work-stoppages, and strikes. THE UNIVERSITY DOES NOT ACCEPT, AND HEREBY EXPRESSLY DISCLAIMS, ANY OR ALL RESPONSIBILITY OR LIABILITY to any person, persons or group, for any loss, injury, damages or adverse effect, either direct or indirect, consequential or otherwise, arising out of any one or more of such deviations. The University hereby disclaims liability to any person who may suffer loss as a result of reliance upon any information contained in this calendar.

The rights and obligations of parties subject to the Calendar and the rules and regulations of Memorial University of Newfoundland shall be governed by the laws of the Province of Newfoundland and Labrador. Any action or proceeding against Memorial University of Newfoundland shall be brought in the Province of Newfoundland and Labrador.

Each and every of the subsequent provisions contained in this Calendar, and the relationship, both legal and otherwise, between the University, and its students, is expressly subject to and governed by the above provisions.

The Office of the Registrar will assist students with any questions or problems which might arise concerning the interpretation of academic regulations. It is, however, the responsibility of students to see that their academic programs meet the University's regulations in all respects.

2 The Memorial University of Newfoundland Code

All members of the Memorial University of Newfoundland Community, which includes students, faculty, and staff, shall treat others with respect and fairness, be responsible and honest, and uphold the highest standards of academic integrity.

3 Glossary of Terms Used in This Calendar

In this calendar "Grenfell Campus" or "Grenfell" refers to Grenfell Campus, Memorial University of Newfoundland and "Marine Institute" refers to the Fisheries and Marine Institute of Memorial University of Newfoundland. "University", when capitalized, refers to Memorial University of Newfoundland.

Academic standing:

is an enrolment status normally determined each semester by a regular evaluation procedure used to assess whether or not students are meeting the standards prescribed for continuing in the University and/or their programs.

Academic unit:

refers to a centre, department, division, faculty, program or school, other than an administrative unit, as the context requires.

Academic year:

runs from September 1 to August 31.

Accelerated course:

is a course that is offered in a shorter time frame than a semester or session.

Administrative unit:

refers to an office, division or centre, other than an academic unit, as listed in the **Offices of the University** section of the Calendar.

Appeal:

is the challenge of, or the request for review of, a judgment regarding the application of regulations.

Assignment:

is an evaluative exercise including but not limited to assigned work, term papers and projects.

Certificate:

is an academic designation awarded for the completion of a specified program of study which is of shorter duration than a degree or diploma.

Challenge for credit:

is the request for consideration of academic credit resulting from experience or knowledge gained elsewhere for which transfer credit cannot be awarded.

Co-requisite course:

is a course which may be taken concurrently with or successfully completed prior to the course for which it is required.

Course:

is a unit of work in a particular subject normally extending through one semester or session, the completion of which normally carries credit toward the fulfilment of the requirements of certain degrees, diplomas or certificates.

Course number:

courses are designated by four characters. The first character signifies the level of the course. Where all four characters are numeric, the last three are used by academic units to indicate various information such as course sequence and area of study. Where the last character is alphabetic, the letter:

A or **B** identifies a linked course. No credits or points are given until the "B" part is completed.

C identifies an English course that does not carry credit towards a degree, diploma or certificate.

F identifies a foundation course that is intended to remedy a specific academic weakness and does not carry credit towards a degree, diploma or certificate.

T identifies an undergraduate teaching internship offered by the Faculty of Education.

W identifies a course in either a work term in a co-operative program or a special project in certain of the professional schools and faculties and may or may not be assigned credit hours.

X identifies a course which represents an entire semester's work and carries 15 credit hours.

Courses offered outside of the normal time frame:

are those with different start and/or end dates than those of the semester or session.

Credit hour:

is the measure used to reflect the relative weight of a given course toward the fulfilment of appropriate degree, diploma, certificate, major, minor, or other program requirements. A weight of 1 credit hour normally means that the course meets for lectures one hour per week for the duration of a semester or two hours per week for the duration of a session. Unless otherwise indicated, a course normally has a credit value of 3 credit hours.

Credit-restricted courses:

are courses which are closely related but not equivalent. Credit is limited to one of the credit-restricted courses. Normally, credit-restricted courses cannot be substituted, one for the other, to satisfy program requirements.

Cross-listed courses:

are courses which are listed under two or more academic units and which can be taken for credit from one unit only. Cross-listed courses can be substituted, one for the other, to satisfy program requirements.

Degree:

is an academic designation awarded for the completion of a specified program of study which is of longer duration than a diploma or certificate.

Diploma:

is an academic designation awarded for the completion of a specified program of study which is of shorter duration than a degree and longer duration than a certificate.

Distance education course:

is a university course designed for people who wish to study outside a traditional university setting. Instructors and students are separated by time and/or space. Distance education courses include correspondence, teleconference and world wide web courses.

Equivalent courses:

are those which are determined to be equal for credit determination, although the subject area or course number will differ. These are normally identified with the phrase "Same as".

Examination:

is an evaluative exercise including but not limited to tests, quizzes or mid-terms, final or supplementary examinations.

Foundation course:

is a course intended to remedy a specific academic weakness and is identified by the letter "F" as the last character of the course number. A foundation course does not carry credit towards a degree, diploma or certificate.

GPA:

is the abbreviation for grade point average.

Head of academic unit:

includes but is not limited to co-ordinator, dean, department head, division head, associate vice-president academic, vice-president, or equivalent.

Inactive courses:

are courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year.

Lecturing period:

is a designated period of lectures within a semester or session as defined by the University Diary.

Linked course:

is a course comprising two components and is normally identified by the letter "A" or "B" as the last character of the course number. No credits or points are given until the "B" part is completed.

Major:

is a subject or field of study which a student normally specializes in during the course of degree studies.

Minor:

is a subject or field of study which a student normally pursues secondary to a major during the course of degree studies.

Prerequisite course:

is a course which must be successfully completed prior to commencing the course for which it is required.

Program:

is a series of courses, the successful completion of which, if all requirements are met, qualifies the candidate for a degree, diploma or certificate.

Registration:

is the process of selecting, enrolling in, and being assessed fees for courses.

Registration period:

is, in any semester, the period extending from the first day of registration to two weeks following the first day of lectures, as stated in the University Diary. In any session, it is the period extending from the first day of registration to one week following the first day of lectures, as stated in the University Diary.

Repeatable course:

is a course that may be taken for credit in several semesters to a maximum number of credit hours. All such courses shall have specified both the number of credit hours assigned per semester and the maximum number of credit hours to be awarded.

Semester:

is a period of approximately fourteen consecutive weeks during which there are at least twelve weeks of lecture. Normally the Fall semester commences in early September, the Winter semester in early January, and the Spring semester in early May.

Session:

is a period of approximately seven consecutive weeks in the Spring semester during which there are at least six weeks of lecture. The first half of Spring semester is designated as Intersession; the second half of Spring semester is designated as Summer session.

Student-Web/Student Self-Service:

is a suite of e-business student services including registration and the provision of personalized student information.

Transcript:

is the complete and unabridged report of a student's academic record.

Transfer credit:

is academic credit granted for work completed at an institution other than Memorial University of Newfoundland.

Waiver:

is the permission granted by the appropriate authority for exemption from a particular program requirement and/or a particular university regulation.

4 University Diary for the Academic Year 2012-2013

June 1, 2012, Friday	Registration begins for residents and for undergraduate Medical students
July 1, 2012, Sunday	Academic year begins for residents
July 16, 2012, Monday	Registration begins for eligible students registering in undergraduate courses, Fall semester 2012
August 6, 2012, Monday	Deadline for registration and fees payment for interns/residents Registration begins for graduate students, Fall semester, 2012
August 20, 2012, Monday	Fall Work Term begins for Co-operative Education students
August 20 to 24, 2012, Monday to Friday	Orientation for new first year Medical students
August 24, 2012, Friday	Deadline for registration for undergraduate Medical students
September 1, 2012, Saturday	Final date for filing applications for admission to graduate programs commencing in Winter semester 2013. Applications received after this date will be processed as time and resources permit. Applicants should note that most graduate academic units have earlier deadlines and should be contacted directly for further information
September 3, 2012, Monday	Labour Day. No lectures
September 3 & 4, 2012 Monday & Tuesday	Orientation for all new first semester undergraduate students
September 4, 2012, Tuesday	Fall internship begins for Education students (Primary/Elementary, Music Education, Native and Northern) Sessions begin for pre-clerkship medical students
September 5, 2012, Wednesday	Lectures begin, Fall semester Deadline for fees payment, Fall semester Deadline for fees payment, undergraduate Medical students, Fall semester
September 11, 2012, Tuesday	Regular meeting of the Senate
September 12, 2012, Wednesday	Final date for receipt, by the Registrar, of replacement grades for "INCOMPLETE" grades in undergraduate and graduate courses, Spring semester (Intersession, Summer Session and 14-week) 2012
September 19, 2012, Wednesday	End of Regular Registration Period and last day for undergraduate and graduate students to add courses, Fall semester Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, Fall semester
September 24, 2012, Monday	Fall internship begins for Education students (Intermediate/Secondary)
September 26, 2012, Wednesday	Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, Fall semester Final date for graduate students to withdraw from programs without incurring liability for tuition fees, Fall semester Final date for Departments to submit Recommendation for Award of Degree in order for graduate students to be deregistered from graduate Registration 9000/Medicine 9900 without incurring any liability for continuance fees, Fall semester
October 1, 2012, Monday	Final date for filing applications for undergraduate admission/re-admission to Winter semester 2013. Applications received after this date will be processed as time and resources permit
October 3, 2012, Wednesday	Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, Fall semester. No tuition fees are refunded for courses dropped after this date
October 5, 2012, Friday	Annual Fall Convocation, Grenfell Campus session, Corner Brook Fall internship ends for Education students (Intermediate/Secondary)
October 8, 2012, Monday	Thanksgiving Day. No lectures. Fall Semester Break begins at St. John's and Grenfell Campuses
October 9, 2012, Tuesday	Regular meeting of the Senate
October 10, 2012, Wednesday	Lectures resume at St. John's and Grenfell Campuses. Lectures will follow the Monday schedule on this day only
October 11, 2012, Thursday	Lectures will follow the Tuesday schedule on this day only

8 General Information 2012-2013

October 18 to 23, 2012 Thursday to Tuesday	MUNdays: Join in this annual festival of events at both Grenfell and St. John's campuses - celebrating creativity, diversity, service and leadership at Memorial University of Newfoundland

July 1, 2013, Monday	Memorial Day holiday. No lectures End of Regular Registration Period and last day for undergraduate and graduate students to add courses, Summer Session Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, Summer Session
July 4, 2013, Thursday	Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, Summer Session
July 8, 2013, Monday	Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, Summer Session. No tuition fees will be refunded for Summer Session courses dropped after this date
July 15, 2013, Monday	Final date for filing, with the Registrar, applications for Degrees and Diplomas for the Fall Convocation 2013. Applications received after this date will be processed as time and resources permit
July 18, 2013, Thursday	Final date for undergraduate and graduate students to drop courses without academic prejudice, Summer Session
July 22, 2013, Monday	Final date for Departments to submit Recommendation for Award of Degree in order for graduate students to receive a 25% refund of continuance fees, Spring semester
August 2, 2013, Friday	Lectures end, 14-week Spring semester, including for Engineering academic term students
August 3, 2013, Saturday	Lectures end, Summer Session Lectures will follow the Monday schedule for Summer Session courses
August 5, 2013, Monday	Examinations begin, 14-week Spring semester and Summer Session Final date for submission of Work Reports by Co-operative Education students

August 7, 2013, Wednesday

Examinations end, Summer Session

August 10, 2013, Saturday

Examinations end, 14-week Spring semester

August 16, 2013, Friday

Spring Work Term ends for Co-operative Education students

5 Governing Bodies and Staff

5.1 The Board of Regents 2012-2013

www.mun.ca/regents/

Officers of the Board

Robert E. Simmonds, QC, St. John's, Chair of the Board
Tina Scott, Secretary to the Board

Ex-Officio Members

The Chancellor
The President and Vice-Chancellor
The Provost and Vice-President (Academic)

Members Appointed by the Lieutenant-Governor in Council

Sheila Ashton, Corner Brook
Steve Belanger, St. John's
Gilbert Bennett, St. John's
Jerry Byrne, St. John's
Pat Coish-Snow, Clarenville
Mary Cormier, Corner Brook
Brian Dalton, St. John's
Michelle Daye, Grand Falls
Noreen Greene-Fraize, St. John's
Jim Keating, St. John's
Bill Matthews, St. John's
Vinod Patel, St. John's
Tony Roche, St. John's
Kathleen Roul, Lawn
Donna Stone, St. John's
Eleanor Swanson, St. John's

Members Elected by the Memorial University of Newfoundland Alumni Association

Margaret Earle, St. John's
Rex Gibbons, St. John's
James Hickey, St. John's
Kim Keating, St. John's
Luke Pike, St. John's
George Tucker, St. John's

Student Members Appointed by the Lieutenant-Governor in Council

Roger Bill, Graduate Students' Union
Richard Chislett, Marine Institute Students' Union
Sarah-Ann King, Grenfell Campus Students' Union
Michael Walsh, Memorial University of Newfoundland Students' Union

5.2 The Senate 2011-2012

www.mun.ca/senate/

Ex-officio Members

Dr. Gary Kachanoski: President and Chairman
General Rick Hillier: Chancellor
Dr. David Wardlaw: Provost/Vice-President (Academic)/Pro Vice-Chancellor
Dr. Christopher Loomis: Vice-President (Research)
Dr. Mary Bluehardt: Vice-President (Grenfell Campus)
Dr. Glenn Blackwood: Vice-President (Marine Institute)
Dr. Robert Shea: Deputy Provost (Students) and Associate Vice-President (Academic) (Undergraduate Studies) *pro tempore*
Dr. Mark Abrahams: Dean, Faculty of Science
Dr. Alean Al-Krenawi: Dean, School of Social Work
Dr. Kirk Anderson: Dean, Faculty of Education
Mr. Bruce Belbin: Assistant Deputy Minister of Advanced Studies (for Deputy Minister), Department of Education
Ms. Lorraine Busby: University Librarian
Dr. Antony Card: Dean, School of Human Kinetics and Recreation to July 1, 2012
Mr. Glenn Collins: University Registrar and Secretary of the Senate
Dr. Noreen Golfman: Dean, School of Graduate Studies
Dr. Linda Hensman: Dean, School of Pharmacy

Ms. Karen Kennedy: Director, Division of Lifelong Learning
Dr. Judith McFetridge-Durdle: Dean, School of Nursing
Dr. Greg Naterer: Dean, Faculty of Engineering and Applied Science, as of August 1, 2012
Dr. Lynne Phillips: Dean, Faculty of Arts, as of July 1, 2012
Dr. Lisa Rankin: Acting Dean, Faculty of Arts, June 1, 2011 - June 30, 2012
Dr. James Rourke: Dean, Faculty of Medicine
Dr. Ramachandran Venkatesan: Dean, *pro tempore*, Faculty of Engineering and Applied Science, July 1, 2011 - July 31, 2012
Dr. Ellen Waterman: Dean, School of Music
Dr. Wilfred Zerbe: Dean, Faculty of Business Administration

Elected Members

Dr. Faith Balisch: Faculty of Arts, Humanities
Dr. Peter Trnka: Faculty of Arts, Humanities
Professor Donna Walsh: Faculty of Arts, Humanities
Dr. Erwin Warkentin: Faculty of Arts, Humanities
Dr. Gary Riser: Faculty of Arts, Social Sciences
Dr. Christopher Sharpe: Faculty of Arts, Social Sciences
Dr. Michael Wernerheim: Faculty of Arts, Social Sciences
Dr. Dale Foster: Faculty of Business Administration
Dr. Katherine Gallagher: Faculty of Business Administration
Dr. Walter Okshevsky: Faculty of Education
Dr. Andrea Rose: Faculty of Education
Dr. Glyn George: Faculty of Engineering & Applied Science
Dr. Dennis Peters: Faculty of Engineering & Applied Science
Mr. Bert Riggs: Library
Dr. Jennifer Connor: Faculty of Medicine
Dr. Jim Connor: Faculty of Medicine
Dr. Gerard Farrell: Faculty of Medicine
Professor Diana Gustafson: Faculty of Medicine
Dr. Don McKay: Faculty of Medicine
Dr. Amin Ali Muhammad: Faculty of Medicine
Dr. Shree Mulya: Faculty of Medicine
Dr. Janet Brunton: Faculty of Science
Dr. Adrian Fiech: Faculty of Science
Dr. Sue Ghazala: Faculty of Science
Dr. Robert Helleur: Faculty of Science
Dr. George Jenner: Faculty of Science
Dr. Serpil Kocabiyik: Faculty of Science
Dr. Paul Marino: Faculty of Science
Mr. Paul Brett: Fisheries and Marine Institute
Mr. Carl Clarke: Fisheries and Marine Institute
Mr. Cyr Couturier: Fisheries and Marine Institute
Mr. Donald Haynes: Fisheries and Marine Institute
Dr. James Parsons: Fisheries and Marine Institute
Mr. Ray Roche: Fisheries and Marine Institute
Dr. Fabien Basset: School of Human Kinetics and Recreation
Dr. Paul Bendzsa: School of Music
Dr. Sandra LeFort: School of Nursing
Dr. Debbie Kelly: School of Pharmacy
Dr. Dennis Kimberley: School of Social Work
Dr. Sonya Corbin-Dwyer: Grenfell Campus
Dr. Paul Wilson: Grenfell Campus

Graduate Students

Mr. Sebastien Despres
Ms. Kim Keats
Mr. Jason Robinson

Undergraduate Students

Ms. Amber Highway
Ms. Amy Hannaford
Ms. Alison Howley
Mr. John Jeddore
Mr. Mitchell Kehoe
Ms. Sarah-Ann King
Mr. Robert Leamon
Mr. Ryan Murphy
Ms. Candace Simms
Mr. Michael Walsh

L. McGillis, Associate University Librarian (Grenfell Campus)

6 Offices of the University

Fisheries and Marine Institute, Grenfell Campus, Special Divisions and members of Faculties and Schools are listed in the appropriate sections of the University Calendar.

6.1 Alumni Affairs and Development, Office of

www.munalum.ca

Director

Blackwood, P., B.Sc.(Hons.) *Memorial*, M.Sc., Ph.D. *Western Ontario*

Associate Director - Development

O'Neill, J.M., B.Mus. *Memorial*, M.Mus. *University of Calgary*

Assistant Director - Alumni Affairs

Cadigan, L., B.A., B.Comm. *Memorial*

Manager, Advancement Services and Operations

Williams, E.R., B.Ed., M.Ed. *Memorial*

Communications Co-ordinator, Managing Editor Luminus Magazine

Penney, D., B.A., B.Ed. *Memorial*, M.A. *Ryerson/York University*

The Office of Alumni Affairs and Development exists to foster connections between alumni and the University. In addition, the Office offers opportunities for alumni to connect with each other. The Office develops services and benefits, manages events, communicates University and alumni-related news and works with alumni and friends who are interested in giving to the University.

6.2 Computing and Communications, Department of

www.mun.ca/cc/

Director

Mowbray, G., B.Sc. *Memorial*

Associate Director, Client Relationships

Dawson, B., B.Sc.(Hons.), B.Ed., M.A.S. *Memorial*

Associate Director, Enterprise Application Services

Fillier-Skinner, P., B.Ed., M.Ed. *Memorial*

Associate Director, Operations

Campbell, R., B.Sc., M.Sc. *Memorial*

Associate Director, Research, Policy and Planning

Power, B.

Manager, Administration and Finance

Earles, D.

Manager, Communications

Farrell, T., B.Sc. *Memorial*

Manager, IT Security

Forward, K., B.Sc. *Memorial*

Manager, Personal Computing

Shaw, M., B.Sc., B.Ed. *Memorial*

Acting Manager, Technical Support

Stirling, A., B.Sc. *Memorial*

Assistant Manager, Mail and Print Services

Maloney, R., B.A. *Memorial*

Central Mail Room Supervisor

Predham, R.

The mandate of Computing and Communications (C&C) is to lead the Planning, Design, Building and Support of the Core Information and Communications Technologies required to meet the strategic objectives of Memorial University of Newfoundland. In consultation with the Campus community and under the guidance of the Information Management Committee, C&C is responsible to foster and support best practices in information technology infrastructure, security, data, software and processes to create an effective and integrated environment.

Core Information and Communications Technologies are those systems and services available to the entire campus or which are pan-university operational systems. Included are:

- Central mail services and logistics
- Landline and mobile telephony
- Technology (internal, external, public networks and data centres)
- Development, management and operation of enterprise applications
- Centralized email, web services, and collaborative tools
- Information Technology security management
- IT project management and consulting
- Service desk, IT purchasing and desktop support services
- Student computing (Portal, Information Commons, D2L, Labnet)

6.3 Co-operative Education, Division of

www.mun.ca/coop/home

Director

Rans, P., B.A.(Hons.) *East Anglia*, M.A. *Sheffield*, Ph.D., M.P.A. *Dalhousie*

Associate Director

Raheja, A., B.Eng. *Bangalore*, M.B.A. *Memorial*

Business Co-ordinators

Murphy, L.J., B.Admin. *RMC*, M.B.A. *Memorial*, CHRP
 Noseworthy, S., B.A., B.Ed., M.B.A. *Memorial*
 Raheja, V., B.Comm. *Madras*, M.B.A. *Memorial*, A.C.A.
 Skanes, H., B.Comm. *Memorial*, M.B.A. *York*

Arts/Science Co-ordinator

Newhook, R., B.A. *Memorial*

Engineering and Applied Science Co-ordinators

Hudson, J.F., B.Eng. *McGill*, P.Eng.
 Jin, G., B.Eng. *Memorial*

 Oldford, D.B., B.Sc. *Memorial*, B.Eng. *Dalhousie*
 Raheja, A., B.Eng. *Bangalore*, M.B.A. *Memorial*; Associate Director
 Smith, G., B.Eng., M.B.A. *Memorial*, P.Eng.
 Sullivan, P., M.B.A. *Ottawa*
 Tam, S., B.Eng., *Memorial*, M.B.A. *Queen's*
 Wadden, N., B.Eng. *Memorial*

Human Kinetics and Recreation Co-ordinators

Downey, J.A., B.Sc., M.Sc. *Memorial*
 Innes, G., B.A.(Hons.) *York*, M.A.L.S. *Wesleyan*

The Division of Co-operative Education is responsible for combining classroom education with practical work experience. The Division links the paid work terms the students experience with their chosen program of studies. A number of Memorial University of Newfoundland's co-op programs are accredited by the Canadian Association for Co-operative Education, the national body and accrediting agency for co-operative education in Canada. The accredited institution affirms that: (i) each work situation is developed and/or approved by the co-operative educational institution as a suitable learning situation; (ii) the co-operative student is engaged in productive full time work rather than merely observing; (iii) the co-operative student receives remuneration for the work performed; (iv) the co-operative student's progress on the job is monitored by the co-operative educational institution; (v) the co-operative student's performance on the job is supervised and evaluated by the student's co-operative employer; and (vi) the total co-operative work experience is at least thirty percent of the time spent in academic study. Co-operative education programs at this University are offered in a variety of degree programs organized through a centralized division. The goal of the Division of Co-operative Education is to fuse academic knowledge with practical experience, creating highly qualified and knowledgeable professionals prepared to meet the demands of today's workforce.

6.4 Engagement, Office of

www.mun.ca/engagement

Executive Director

Greenwood, R., B.A. (Hons.) *Memorial*, M.A. *York*, Ph.D. *Warwick*

Engagement Framework Development Coordinator

Reid-Shute, K., B.A. *Dalhousie*, L.L.B. *New Brunswick*

The Office of Engagement reports to the President, and is tasked with supporting Memorial University of Newfoundland's engagement activities both inside the Province, and globally. 'Engagement' can be broadly understood as mutually beneficial partnerships between people in the University and people outside the University that bring together the expertise and capacity of all contributing parties to address opportunities and needs. The Office is overseeing the development and implementation of *The Engagement Framework*, a document that will guide the University's engagement activities. *The Engagement Framework*, will be based on input gathered from university and community stakeholders alike, and will complement the existing *Research* and *The Teaching & Learning Frameworks*. There are many diverse approaches to engagement, which will be discussed throughout the development of the Engagement Framework to ensure that Memorial University of Newfoundland adopts an approach to engagement that will best serve the University and its partners.

Further information can be obtained by contacting the Office of Engagement by telephone at (709) 864-8405, or by email at engagement@mun.ca, or through the website at www.mun.ca/engagement.

6.5 Enterprise Risk Management

www.mun.ca/erm/home/

Director

Head, D., B.Comm. (Co-op), M.B.A. *Memorial*

Risk Analyst

Tucker, R.

Internal Audit Project Manager

Royle, D., B.Comm. *Memorial*, CMA, CFP

Internal Auditor

Howlett, B., B.Comm. *Memorial*, CA

The function of Enterprise Risk Management is to take a leading role working with all areas of the University, including the Marine Institute, Grenfell Campus, Harlow campus and the Separately Incorporated Entities to identify, assess and develop risk response strategies with respect to the University's ability to achieve its strategic and operational goals. Enterprise Risk Management's role is wide-ranging, encompassing the internal audit function, insurance and liability in addition to an extensive array of risk issues.

6.6 Facilities Management, Department of

www.mun.ca/facman/about/

Director

Miles, D., P.Eng.

Assistant Director (Capital Projects)

Hiscock, K., P.Eng.

Assistant Director (Development and Renewal)

vacant

Assistant Director (Operations and Maintenance)

Whelan, C.

Manager of Administrative Services

vacant

Manager, Building Services and Grounds

Walsh, R.

Manager of Campus Enforcement and Patrol

Browne, J.

Manager, Central Utilities

Sheehan, J.

Manager of Custodial Services

Budden, K.

Manager, Energy Systems and Controls

Peach, D.

Manager, Engineering & Development

Daniels, J., P. Eng., M.A.Sc., P.M.P.

Manager, Space Planning & Administration

Michalak, M.

Manager, Work Control Center

Marshall, T.

The founders of Memorial University of Newfoundland dedicated the University itself as a living memorial to those who served in the two world wars. Guided by this heritage and mission, the Department of Facilities Management embraces its responsibility to maintain,

protect, and further develop the University's major infrastructure. The Department's team is committed to the pursuit of excellence in all of its operations including facilities engineering and development, central utilities, energy systems and controls, custodial services, building services and grounds, campus enforcement and patrol, sustainability, administrative services and space planning and administration.

6.7 Faculty Relations, Office of

www.mun.ca/facultyrelations/index.php

Director of Faculty Relations

Cooper, M., B.Comm.(Hons.) *Memorial*, M.I.R. *University of Toronto*, LL.B. *Dalhousie*

Associate Director of Faculty Relations

Wyse, A., B.A.(Hons.), M.A. *Memorial*, M.P.A. *University of Western Ontario*

Assistant Director of Faculty Relations

McKinnon, I., B.Comm.(Co-op), *MER Memorial*

Manager of Academic Recruitment & Support

Pittman, T., B.A., M.B.A. *Memorial*

Faculty Relations Analyst

Kielly, T., B.A. *Memorial*

The Office of Faculty Relations is responsible for the negotiation and administration of the following collective agreements for faculty, per course instructors, and teaching assistants:

1. Memorial University of Newfoundland and Memorial University of Newfoundland Faculty Association (MUNFA), February 26, 2010 - August 31, 2013.
2. Memorial University of Newfoundland and Lecturers' Union of Memorial University of Newfoundland (LUMUN), February 5, 2009 - August 31, 2012.
3. Memorial University of Newfoundland and Teaching Assistants' Union of Memorial University of Newfoundland (TAUMUN), July 8, 2010 - August 31, 2013.

As well, the Office of Faculty Relations addresses labour relations matters arising out of the collective bargaining relationships with MUNFA, LUMUN, and TAUMUN, including grievance and arbitration proceedings and Labour Relations Board matters. In addition, the Office of Faculty Relations:

1. is involved in all aspects of the employment of academic staff. The Office makes per course, extra teaching, and contractual academic appointments less than one year;
2. sets the starting salaries of all academic personnel, and determines eligibility for leaves;
3. provides advice, assistance, and education in all matters involving faculty, including the recruitment process, promotion and tenure, discipline, sabbatical, and administrative leave eligibility, and all collective agreement matters;
4. provides immigration assistance and advice for arriving faculty and staff, orientation opportunities for new faculty, and provides educational opportunities for academic administrators; and
5. is involved in policy development, implementation and administration.

6.8 Financial and Administrative Services, Department of

www.mun.ca/finance/Welcome/

Director

Collis, D., B.Comm. *Memorial*, C.A.

Associate Director

Pike, G., B.Comm.(Hons.) *Memorial*, CMA

Associate Director, Budgets

Pike, L., B.Comm., M.B.A. *Memorial*

Manager, Financial Systems

Woods, D., B.Sc. *Mississippi State*, NFPA 472-Specialist

The Department of Health and Safety provides leadership for the planning, directing and management of Memorial University of Newfoundland's Health and Safety Program. In meeting the University's goal of providing a safe and healthy environment which supports teaching, research and University life, the Department provides expert advice to the University community on health and safety matters. The Department monitors the University's health and safety performance to identify opportunities for continued improvement. It oversees the delivery of training programs which meet regulatory requirements and which provide members of the University with the information and skills needed to carry out their work and studies safely.

6.11 Human Resources, Department ofwww.mun.ca/humanres/about/**Director**Dodge, S., B.Comm. *Memorial***Associate Directors**Barron, M., B.Comm. *Memorial*, M.I.R. *Toronto*
Butler, V., B.S.W. *Memorial*, M.P.A. *Queen's***Acting Manager - Advisory Services**Norman, J., B.B.A. *St. Francis Xavier*, CHRP**Manager - Administration and Systems Integration**

Barker, R., B.Comm. *Memorial*, M.B.A. *Virginia Polytechnic Institute & State University*, CHRP

Manager - Recruitment

vacant

Communications Co-ordinator

O'Dea Dawson, S., B.A., B.Comm. B.Ed. *Memorial*

The Department of Human Resources is more than payroll, pensions and benefits. The Department of Human Resources provides the foundation to advance and maintain a strong institutional culture that values the contributions of all within the organization. This culture is based on clear values that are accepted and put into practice by all: the principles of respect, recognition, support, equity and fairness, effective leadership, recruitment and retention, learning and development, work-life balance (including health and wellness) and career opportunity. Human Resources works to provide optimal service delivery to clients and ensure best practices in internal processes through measurement. Through a long-term strategy in Human Resources, Memorial University of Newfoundland continues to implement the people development strategy (mentoring, succession, coaching, leadership and career development), transfer knowledge to new employees, meet employment equity targets, improve employee satisfaction, and enhance connections prior to and into retirement. Complete details and contact information is available at www.mun.ca/humanres/about.

6.12 Information Access and Privacy Protection Office (IAPP)

www.mun.ca/iapp/home/

Co-ordinator

Thorne, R., CIPP/C

Privacy Analyst

Keough, T.M., M.Sc. *Memorial*

ATIPP Analyst

Whelan, J., B.A. *Memorial*, LL.B. *University of New Brunswick*

The Information Access and Privacy Protection Office (IAPP) was created in November 2005 to assist the University in complying with the provincial Access to Information and Protection of Privacy Act (ATIPPA) and other applicable privacy legislation, as well as developing best practices in information access and privacy protection matters.

The IAPP Office benefits from the guidance of the IAPP Advisory Committee. The IAPP Advisory Committee provides strategic direction and general guidance to the IAPP Office. Using guidelines, policy, procedures and standards approved by the IAPP Advisory Committee, the IAPP Office implements best practices in information access and privacy protection in compliance with the ATIPPA Act and other pertinent privacy protection legislation.

6.13 Institutional Analysis and Planning, Centre for (CIAP)

www.mun.ca/ciap/

Director

Hulan, J., B.A. *Memorial*

The Division of Marketing and Communications is Memorial University of Newfoundland's public relations and communications centre. The Division is dedicated to serving the University's internal and external communications needs, as well as to responding to the community's needs for information about Memorial University of Newfoundland. The Division provides general information about Memorial University of Newfoundland, communications counsel and planning, news services including the *Gazette*, *today.mun.ca* and *Studio 1024*, the University's weekly news podcast, as well as media relations and issues management (including crisis communications coordination). The Division also has expertise in institutional marketing, university event management (including Convocation), photography (including a university photo bank), graphic design, co-ordination of promotional projects, institutional web management and web content development. The Division can provide advice on protocol, government relations, issues management, special event planning, and marketing planning.

Walsh, L., B.A., B.Ed.(Secondary) *Memorial*

The Office of the Registrar provides academic support services and systems to prospective and current students - from initial contact, to application, academic advising, registration, and graduation - and strives to implement continuous improvements to these services and systems. Together with offices at Grenfell Campus and the Marine Institute, the Office of the Registrar serves the University community, including those involved in distance learning.

The Office of the Registrar's current mission and vision is to: encourage and facilitate the transition from potential applicant to registered student to graduate; develop and implement strategies designed to enhance student success; serve as a catalyst in formulating and implementing academic regulations, policies and procedures and provide accurate and timely information and advice about these to the academic community and the general public; provide innovative and technologically advanced information systems to facilitate the most effective and efficient delivery of services; and respond to change and commit to improving the quality of our services within the context of the themes outlined in the *University's Strategic Framework*. In carrying out this mission, the Office strives to be sensitive to the needs of students, faculty, staff, co-workers, and the general public, and to treat each individual with fairness, respect and understanding. Responsibility for the Secretariat for Senate and for several major Senate and Faculty Committees also rests with this Office.

6.18.1 Academic Advising Centre

www.mun.ca/advice/aac/

ICEHR Office

Mercer, S.

Grants Facilitator

Heath, T.

The Office of Research Services is responsible for the administration, facilitation, and recording of scholarly research carried out by individual researchers as well as teams of researchers at Memorial University of Newfoundland. It is the institutional approval point for research funding applications as well as for grant funding agreements, research contracts and other formal agreements required in the conduct of research throughout the institution, the value of which currently amounts to approximately \$97 million annually. The Office carries out a facilitative role with a wide range of research funding agencies and organizations locally, nationally and internationally with particular focus on Canada's three national granting councils – the Canadian Institutes of Health Research, the Natural Sciences and Engineering Research Council of Canada, and the Social Sciences and Humanities Research Council of Canada.

6.20 Sexual Harassment Officewww.mun.ca/sexualharassment/home/**Sexual Harassment Advisor**Morris, C., B.Ed., B.S.W. *Memorial*, R.S.W.

The Sexual Harassment Office implements the *University-Wide Procedures for Sexual Harassment Concerns and Complaints* aimed at providing a method for the resolution of sexual harassment concerns and complaints which may arise at Memorial University of Newfoundland. The Sexual Harassment Policy prohibits sexual harassment by any member of the University community. Any member may address a concern or make a complaint of sexual harassment against another member of the University community. Memorial University of Newfoundland is committed to providing an environment that is respectful and inclusive – thus free of sexual harassment. The services of the Sexual Harassment Office are available to all campuses of Memorial University of Newfoundland. A copy of the *University-Wide Procedures for Sexual Harassment Concerns and Complaints* is available at www.mun.ca/policy/site/category.php.

The Department of Technical Services offers a wide range of biomedical, electronics and mechanical services to our users within Memorial University of Newfoundland and the health care community. These services range from electronics, biomedical, machining, glassblowing, welding, sheet metal, computer repairs, refrigeration, instrument repairs and scale model making. The Department provides expert advice and service to faculty, students, and researchers. It assists with the development of custom research apparatus and provides ongoing service for state-of-the-art devices, as well as repairs to older research equipment.

Associate Vice-President (Research), Collaborations and Partnerships

Gosine, R.G., B.Eng. *Memorial*, Ph.D. *Cambridge*, FEC, P.Eng.

The Office of the Vice-President (Research) is responsible for promoting and enhancing the university's broad range of research activities. Specific priorities for the Vice-President (Research) include: Providing leadership in the development and execution of the University's Strategic Research Framework; supporting researchers across all academic disciplines; encouraging the full range of research at Memorial University of Newfoundland, including fundamental and applied research and creative scholarly activities; building partnerships with other universities, research organizations, government and the private sector, locally, nationally and internationally; increasing research funding to Memorial University of Newfoundland and other research organizations in the province; and enhancing the dissemination, application and commercialization of research results generated at Memorial University of Newfoundland.

7 General Information

Memorial University of Newfoundland is the only university in Newfoundland and Labrador. It has campuses in St. John's and in Corner Brook, as well as Harlow, England.

7.1 The Beginning

Memorial University College was established as a memorial to the Newfoundlanders who had lost their lives on active service during the First World War; it was later rededicated to also encompass the province's war dead of the Second World War. The College opened its doors on the old Parade grounds in St. John's to a total student body of 55 on September 15, 1925.

7.2 University Status

The elevation of the College to the full status of a university was one of the priorities of the first post-Confederation Government. At the initial session of our Provincial House of Assembly, July 13, 1949, the intention of the Government of the day was conveyed by the then Lieutenant-Governor, the Honourable Sir Albert Walsh, in these words from the Speech from the Throne:

"It is considered that Newfoundland should have her own degree-conferring University and you will be invited to consider legislation which would confer upon the Memorial University College the status of a university. It is planned to widen and improve the functions, and thus increase the public usefulness of this institution created originally in honour of our illustrious dead of the First World War."

Royal assent was given the Bill creating The Memorial University of Newfoundland on August 13, 1949, exactly one month to the day from the opening of the House. The Board of Regents and the Senate were inaugurated in May 1950, and the first Convocation of the University was held on June 3, 1950, when the first degrees were awarded.

7.3 A Period of Expansion

With university status, Memorial University of Newfoundland entered a period of rapid growth that was to continue into the 70s. In 1949-1950, there was a student body of 307 in the new University; in the academic year 1961-1962, when the University moved to its present campus, the student enrolment had reached 1745 full-time and 152 part-time. Ten years later, 1971-1972, the student population, including full- and part-time students on degree programs, was 10,980.

Meanwhile, there were equally dramatic changes in the variety and extent of available academic programs. In the early years of the University, there were two Faculties (Arts and Science, and Education). While the academic structure was quite similar in 1961, when the University moved to a new campus on Elizabeth Avenue in St. John's, areas of instruction, course offerings and degrees awarded had all increased.

Today, the University offers more than 100 undergraduate and graduate degree programs through six Faculties -- Arts, Science, Education, Medicine, Engineering and Business Administration; and six Schools -- Graduate Studies, Nursing, Human Kinetics and Recreation, Social Work, Music and Pharmacy; and also offers degree programs in Fine Arts and Resource Management. Information

regarding enrolment statistics can be found in the Fact Book at www.mun.ca/ciap/Analysis/fact_book.php.

In 1975, the University established a campus in Corner Brook. The College was re-named the Sir Wilfred Grenfell College in 1979 honouring the memory of the medical missionary who pioneered medicine in Northern Newfoundland and along the coast of Labrador. In 2010 the campus in Corner Brook was renamed Grenfell Campus, Memorial University of Newfoundland. Since its opening, Grenfell has progressed from a junior college offering first- and second-year courses to providing entire degrees in the areas of arts, fine arts, science, business administration, resource management and nursing. The first degrees, in the disciplines of theatre and visual arts, were introduced in 1988. Most recently, Grenfell has introduced degree programs in tourism studies and sustainable resource management and in collaboration with the Faculty of Education now offers a Bachelor of Education Program (Primary/Elementary) fast-track option. Grenfell Campus currently offers 16 degree programs. For more information see www.swgc.mun.ca.

In 1992 the Marine Institute joined the University, becoming the Fisheries and Marine Institute of Memorial University of Newfoundland. Founded in 1964, the Marine Institute offers a range of certificate, diploma and degree programs in fisheries and marine technology and is involved in research and technology transfer. For more information see www.mi.mun.ca.

Memorial University of Newfoundland's faculty and students actively participate in research and development. This University is one of the most important research facilities in Atlantic Canada and has developed numerous research programs and facilities that are among the most advanced in the world. For a complete listing of research facilities see www.mun.ca/research/units.

7.4 The Campuses

7.4.1 St. John's

The St. John's campus covers a total area of approximately 220 acres. It is divided by Prince Philip Drive, a four-lane arterial road that runs east to west across the campus. To the south, the boundary is Elizabeth Avenue; to the north, Long Pond and Kelly's Farm. The western boundary follows Westerland Road, west along Prince Philip Drive and north along Wicklow Street; on the east, the campus is bounded by Higgin's Line and adjoins the St. John's Arts & Culture Centre property on Allandale Road.

On the campus to the south of Prince Philip Drive are the Arts and Administration, Science, Chemistry-Physics, Education (G.A. Hickman), Mathematics (Henrietta Harvey), Physical Education, Biotechnology, Facilities Management and Music (M.O. Morgan) buildings; as well as the Queen Elizabeth II Library, Inco Innovation Centre, Paton College residence complex, Burton's Pond Apartments, Campus Childcare Inc., and a number of smaller buildings. The Works recreation complex was opened in 2002, comprising the Aquarena, Field House and other sports and recreation facilities on campus. Spanning Prince Philip Drive is the Smallwood Centre, containing student services and student union operations, as well as recreation and dining facilities.

North of Prince Philip Drive are the Health Sciences Centre incorporating the Faculty of Medicine, the School of Nursing, the School of Pharmacy, and the General Hospital Corporation; the Engineering (S.J. Carew), the Alexander Murray, the Faculty of Business Administration, and the C-CORE (Captain Robert A. Bartlett) buildings, St. John's College, Coughlan College, Queen's College, and Spencer Hall. The National Research Council's Institute for Ocean Technology is also located on the north side of the campus. Slightly further north is the Memorial University of Newfoundland Botanical Garden. The Ocean Sciences Centre is located to the west at Logy Bay.

7.4.2 Fisheries and Marine Institute

The Fisheries and Marine Institute is headquartered on Ridge Road in St. John's, and is Canada's leading centre of education, training, applied research and technology transfer for the ocean industries. As part of Memorial University of Newfoundland, Marine Institute offers degrees, advanced diplomas, diplomas of technology, certificates in such fields as marine transportation, food and water quality, naval architecture, aquaculture, coastal zone management and marine environmental.

The institute has a number of state-of-the-art centres and units, including the Offshore Safety and Survival Centre (OSSC), the Safety Emergency and Response Training Centre (SERT), the Centre of Marine Simulation (CMS), the Centre for Aquaculture and Seafood Development (C-ASD), MI International and the Centre for Sustainable and Aquatic Resources (C-SAR). These areas lead to the institute in applied research and technology transfer and also provide training to a variety of industry clients.

7.4.3 Corner Brook

Memorial University of Newfoundland's Grenfell Campus stands on a magnificent 185-acre site with a spectacular view of the city of Corner Brook and the Bay of Islands.

The campus was established in 1975, and in 1979 was named in honour of Sir Wilfred Grenfell, a medical missionary who pioneered medicine in northern Newfoundland and along the coast of Labrador. It was renamed Grenfell Campus in 2010. Located on University Drive, Grenfell's campus features four academic buildings. The Arts and Science building houses administrative offices, academic classrooms and labs, recreational facilities, a bookstore and a student residence. Student housing has since been expanded to include eight chalet-style apartment buildings, and ground was recently broken to construct another major residence complex on campus. The Fine Arts building features state-of-the-art facilities for theatre and visual arts programs. The Library and Computing building contains the Ferriss Hodgett Library, a computer lab and lecture hall facilities. The Student Centre, an annex to the Arts and Science building, provides dining and recreational space for the student population, as well as office space for the Grenfell Campus Student Union. The Forest Centre houses classroom, lab and lecture space, as well as the offices of the Canadian Forest Service and other partners. Through a partnership with the city of Corner Brook, Memorial University of Newfoundland assumed operation of the city's civic centre (the Pepsi Centre), which houses two ice surfaces, a fitness centre, and meeting, conference and concert venues.

Grenfell's programs are a testament to the beauty that surrounds the campus. Artists find their inspiration in the landscape and culture of the area. Scientists and researchers strive to protect the natural wonder of the place. Historians research our varied history, and literary enthusiasts write about their sense of where we are. This small, spectacular campus offers a personalized undergraduate education in a wide variety of interdisciplinary experiences: students may choose from degrees in arts, business administration, fine arts, education, nursing, science or resource management. Grenfell's low student-instructor ratio ensures that individual attention is the norm and there is ample opportunity to get to know the faculty. Further information may be obtained from the website at www.swgc.mun.ca.

7.4.4 Harlow

Directors of MUN (UK) LTD

Dr. Gary Kachanoski, Chair
 Dr. David Wardlaw
 Mr. Jim Andrews
 Mr. Derek Linfield
 Mr. Harvey Short

General Manager

Ms. Sandra Wright

Finance Manager

Mr. Simon Hatchett

In 1966 the Board of Regents approved the establishment of a small residential campus at Harlow, Essex approximately midway between London and Cambridge. The Campus went through extensive modernisation in 2002 and the refurbished campus was designed to meet the needs of today's students - those from Memorial University of Newfoundland wishing to study in Europe and those in Europe interested in pursuing studies at Harlow Campus. The Campus provides technologically equipped meeting facilities and residence accommodations for up to 51, as well as excellent food service capacity.

Up until March 2007, the Campus was operated by the Harlow Campus Trust, but in April 2007 the trust was replaced by a new company entitled MUN (UK), a company limited by guarantee and incorporated under English Law, to direct the operations of the Campus.

The main campus building is a converted 19th century Maltings (formerly used for drying barley for brewing) - accommodating 40 students in twin ensuite accommodation, which can be converted to single accommodation when required. In addition there is a purpose designed single bedroom for a disabled guest. A further 10 students can be accommodated in Cabot House, a self-contained residence house in a 17th century cottage with four twin rooms and two single rooms all with shared facilities.

Each bedroom in both the Maltings and Cabot House has a direct dial inward telephone and computer point with internet access (for use with personal lap-top computers). Wireless access is also available.

The Campus has three fully self-contained faculty properties each with one double and one twin room. These are two apartments at 44 and 46 Market Street and St. John's Cottage.

Conference/training space is available in St. John's House, which is the main lecture hall situated in a converted Victorian Schoolhouse. The lecture hall is fully networked and has audio visual connectivity. Flexible seating arrangements means the facility can comfortably accommodate up to 30 delegates. Additional conference/training space is available in the Lord Taylor Room situated in the Maltings. This conference room is fully networked and has flexible seating arrangements accommodating up to 20 delegates.

The Resources Room in the Maltings accommodates the library and small computer suite (which is set up to be additional teaching space when required). An area of the room is designed to be quiet space with study cubicles and comfortable seating.

There are a number of scholarships, bursaries and awards available to students wishing to attend Harlow. For further information refer to the Scholarships, Bursaries and Awards section.

Specific enquires about academic programs offered at Harlow should be directed to the appropriate Dean/Director/Division Head or Dr. D. Neville, Associate Vice President (Academic), Memorial University of Newfoundland, St. John's, NL, A1C 5S7, or by telephone at (709) 864-3971, or by fax at (709) 864-2074.

General enquiries about the Harlow Campus should be directed in writing to Ms. Sandra Wright, General Manager, Memorial University of Newfoundland, Harlow Campus, The Maltings, St. John's Walk, Market Street, Harlow, Essex CM17 OAJ, UK., or by telephone at 011 44 1279 455902, or by fax at 011 44 1279 455921, or by e-mail at wright@hcampus.inty.net.

Up to date information on the Harlow Campus and academic programs is available at www.mun.ca/harlow.

7.5 Objectives of the University

The objectives of Memorial University of Newfoundland are: to develop in the province an institution of higher learning deserving of respect for the quality of its academic standards and of its research; to establish new programs to meet the expanding needs of the province; and to provide the means whereby the University may reach out to all the people.

In 1994 the University adopted a mission statement:

Memorial University is committed to excellence in teaching, research and scholarship, and service to the general public.

Memorial University recognizes a special obligation to educate the citizens of Newfoundland and Labrador, to undertake research on the challenges this province faces and to share its expertise with the community.

This mission is at the core of this University's plans for its programs, campuses and activities at home and abroad. To learn more about the University's evolving plans and priorities, see www.mun.ca/strategicplanning/.

7.6 Presidents of Memorial University College

1925 - 1933 Mr. John Lewis Paton

1933 - 1949 Dr. Albert G. Hatcher

7.7 Presidents of the University

1949 - 1952 Dr. Albert G. Hatcher

1952 - 1966 Dr. Raymond Gushue

1966 - 1967 Mr. M.O. Morgan (*pro tempore*)

1967 - 1973 The Rt. Hon. the Lord Taylor of Harlow

1973 - 1981 Dr. M.O. Morgan

1981 - 1990 Dr. Leslie Harris

1990 - 1999 Dr. Arthur W. May

1999 - 2007 Dr. Axel Meisen

2007 - 2009 Dr. H.E.A. (Eddy) Campbell (Acting)

2009 - 2010 Dr. C. Loomis (*pro tempore*)

2010 - Present Dr. G. Kachanoski

7.8 Chancellors of the University

1952 - 1961 The Rt. Hon. Viscount Rothermere of Hemsted

1961 - 1968 The Rt. Hon. Lord Thomson of Fleet

1971 - 1979 Dr. G. Alain Frecker

1979 - 1988 Dr. Paul G. Desmarais

1994 - 2008 Hon. Dr. John C. Crosbie

2008 - Present General Rick J. Hillier (Retired)

7.9 Chairs of the Board of Regents (Established May, 1950)

1950 - 1954 Hon. Sir Albert Walsh
 1954 - 1968 Dr. Edmund J. Phelan
 1968 - 1974 Hon. Dr. Gordon A. Winter
 1974 - 1982 Hon. Dr. Frederick Russell
 1982 - 1991 Dr. Charles White
 1991 - 1997 Dr. Janet Gardiner
 1997 - 2002 Dr. Edward Roberts
 2002 - 2003 Chris Decker
 2003 - 2004 Dr. Georgina Hedges (*pro tempore*)
 2004 - 2006 Lorne Wheeler
 2005 - 2007 Dr. Georgina Hedges (*pro tempore*)
 2007 - 2008 Gilbert Dalton
 2008 - Present Robert Simmonds

7.10 University Constitution

The Constitution of the University is embodied in an Act of the House of Assembly of Newfoundland entitled *An Act Respecting the Memorial University of Newfoundland*, Chap. 231, Revised Statutes of Newfoundland (as amended). The Act delineates the authority and the functions of the University and its parts, as follows:

There shall be a university which shall be called the Memorial University of Newfoundland, consisting of a Chancellor, Convocation, Board of Regents, Senate, Faculty Councils and the Faculties and which shall be a body politic and corporate. No other university having corporate powers capable of being exercised within Newfoundland shall be known by the same name, nor shall any other university have power to grant degrees.

The University shall have full power and authority from time to time and at all times to establish and maintain such faculties, colleges, schools, institutions, departments, chairs and courses as to the Board of Regents may seem meet, and to give instructions and training; to grant degrees, including honorary degrees, diplomas and certificates of proficiency; to provide facilities for the prosecution of original research in every branch of knowledge and learning and to conduct and carry on such research work; and generally, to promote and carry on the work of a university in all its branches.

7.10.1 The Board of Regents

The management, administration and control of the property, revenue, business and affairs of the University are vested in a Board of Regents, consisting of:

1. three ex-officio members
 - a. the Chancellor of the University
 - b. the President of the University
 - c. the Vice-President of the University who is the Pro Vice-Chancellor;
2. six members elected by the Alumni Association of the University;
3. seventeen members appointed by the Lieutenant-Governor-in-Council; and
4. four members appointed by the Lieutenant-Governor-in-Council being full-time students of the University who
 - a. meet the requirements set out in the regulations, and
 - b. are recommended to the Lieutenant-Governor-in-Council by the board following the recommendation to the board of one candidate each from the following student unions:
 - i. the Memorial University of Newfoundland Students' Union,
 - ii. the Graduate Students' Union,
 - iii. the Marine Institute Students' Union, and
 - iv. the Grenfell Campus Student Union.

7.10.2 The Senate

Matters of an academic character are in general charge of the Senate of the University, consisting of the following:

1. The Chancellor of the University;
2. ex-officio members who shall be
 - a. the President of the University, who shall be the chairman thereof,
 - b. the Vice-President (Academic) of the University, who shall be the deputy chairman thereof,
 - c. the Deputy Minister of Education or a representative of the Deputy Minister,
 - d. the Vice-President of the Grenfell Campus,
 - e. the Deans of the Faculties of the University,
 - f. the Dean of Graduate Studies,
 - g. the University Librarian,
 - h. the University Registrar, and
 - i. such other persons holding office within the University or in any of the campuses or institutions affiliated with the University chosen in such number and manner as may be approved by the Board;
3. such members from the academic staff of the Faculties and Professional Schools of the University, exclusive of any person who is a member by virtue of paragraph 2., elected in such number and manner as may be approved by the Board, but the number elected under this paragraph shall be not less than twice the number of members named or chosen under paragraph 2.; and
4. thirteen members from the students in attendance at the University, including at least one student from the Marine Institute, one graduate student and one student from Grenfell Campus with all members to be chosen in a manner approved by the Board.

7.10.3 Convocation

Convocation of the University, as provided in the *Act*, is composed of the Chancellor, the President, the Senate, the Board of Regents, all persons who are graduates of the Memorial University College, all persons holding academic appointments with the University whose names are added to the roll of the Convocation by the Registrar of the University from time to time upon instructions from the President, and all persons who have become graduates of the University. The functions of Convocation are chiefly elective, but it may also consider all questions affecting the well-being and prosperity of the University and make representations from time to time on such questions to the Senate, which shall consider the same and return to the Convocation its conclusions thereon.

7.10.4 Affiliation

The *Act* provides that, subject to the approval of the Lieutenant-Governor-in-Council, the University may affiliate with any college or institution established in the province for the promotion of Arts and Science, or for instruction in Law, Medicine, Nursing, Education, Engineering, Agriculture or in any other useful branch of learning, and to dissolve any such affiliation. The institution which has become affiliated with the University under this provision is Queen's College, St. John's.

7.11 Queen's College

7.11.1 Faculty of Theology

Queen's College, founded in 1841, is an Associate Member of The Association of Theological Schools in the United States and Canada and is affiliated with Memorial University of Newfoundland. It has a Faculty of Theology which offers courses in theology and in professional training for ministry. Under Legislative authority it confers the degrees of Master of Divinity, Master of Theological Studies, and Bachelor of Theology and grants a Diploma in Theology and Ministry and an Associate in Theology.

Further information may be obtained by contacting the College in writing to The Registrar, Queen's College, St. John's, NL, A1B 3R6, or by telephone to (709) 753-0116, (877) 753-0116 (toll free), by fax to (709) 753-1214, by e-mail to queens@mun.ca or through the website at www.mun.ca/queens.

7.12 Academic Dress

The academic dress for matriculated undergraduates of the University shall be similar to the Scholar's gown of the University of Oxford. It shall be worn whenever the President so directs.

The gowns of the Bachelors shall be of black stuff. The gowns of the Masters shall be of black stuff or silk. The gowns of the Doctors shall be of fine scarlet cloth or silk, or of black stuff or silk.

The pattern of the Bachelor's gown shall be similar to that of the Oxford Bachelor's gown. The pattern of the Master's gown and the Doctor's black gown shall be similar to that of the Oxford Master's gown, except that the Doctor's gown shall have an edging of black silk braid at the opening of the sleeve. The Doctor's scarlet gown shall be similar to that of the Oxford Doctor of Divinity's gown.

The hoods of the Bachelors shall be made of black stuff, the hoods of the Masters of black silk, and the hoods of the Doctors of scarlet silk. They shall be full in shape and lined with the University colours of claret and white. The hoods of the Bachelors shall be trimmed with white fur, the tippets with velvet in the colours distinctive of the Faculty or Degree. The hoods and tippets of the Masters shall be edged with velvet in the colours distinctive of the Faculty or Degree. The hoods and tippets of the Doctors shall be edged with silk in the colours distinctive of the Faculty or Degree; however, the hood of the Doctor of Philosophy shall be of claret silk, lined and edged with claret silk.

The University hood, worn by official representatives of Memorial University of Newfoundland participating in ceremonies, shall be made of black stuff, and lined and edged with claret and white silk.

The distinctive colours for the degrees shall be:

B.A., B.A. (Police Studies), M.A. - White
 B.B.A., B.Comm., B.Comm.(Co-op.), i.B.B.A., M.B.A., M.O.G.S. - Tan
 B.Ed., B.Ed.(Elementary), B.Ed.(Intermediate/Secondary), B.Ed.(Native and Northern), B.Ed.(Primary), B.Ed.(Post-Secondary), B.Ed.(Primary/Elementary), B.Mus.Ed., B.Sp.Ed., B.Voc.Ed., M.Ed - Light Blue
 B.Eng., M.Eng. - Orange
 B.F.A.(Theatre), B.F.A.(Visual Arts) - Amethyst
 B.Kin., B.Kin.(Co-op.), B.P.E., B.P.E.(Co-op.), B.Rec., B.Rec.(Co-op.), M.P.E., M.Sc.(Kinesiology) - Sage Green
 B.M.S., B. Tech, M.M.S.(Fisheries Resource Management) - Navy Blue
 B.Mus., M.Mus. - Pink
 B.N., M.N. - Coral
 B.R.M. - Citron
 B.Sc., M.A.S., M.A.Sc., M.A.S.P.(Co-op), M.Env.Sc., M.Sc. - Gold
 B.Sc.(Pharmacy), M.Sc.(Pharmacy) - Clover
 B.S.W., M.S.W. - Ruby Gem
 M.D., M.P.H., M.Sc.(Medicine) - Green
 M.E.R. - Chocolate Brown
 M.Phil., Ph.D. - Claret
 M.W.S. - Purple

The caps of Bachelors and Masters shall be black and of the square shape, with black tassel. The caps of the Doctors shall be similar to the Oxford Doctor's bonnet.

The academic dress for the Officers of the University shall be as follows:

Chancellor - a silk gown heavily embroidered with gold braid

Vice-chancellor - a silk gown embroidered with gold braid

Pro vice-chancellor - a silk gown embroidered with gold braid

Registrar and other Officers of the University - gowns of a pattern approved by Senate

7.13 The University Library

www.library.mun.ca/

The University Library consists of the Queen Elizabeth II Library, the Health Sciences Library, and the Dr. C.R. Barrett Library, Fisheries and Marine Institute, all in St. John's, and the Ferriss Hodgett Library in Corner Brook. These four units together have a collection

equivalent to 2.5 million volumes and more than 26,000 current journal subscriptions. This collection serves as the major information resource for the University as well as the province. All units of the library system may be used by all students, faculty and staff, as well as the community at large.

7.13.1 Queen Elizabeth II Library

The Queen Elizabeth II Library was opened for service in January 1982. It is an impressive structure of 200,000 square feet on five levels. It has a seating capacity of 2,000 and can hold 2.6 million physical volumes. The Information Services Division, located on the main floor (second level), provides assistance to people wishing to make use of the library's resources and services. This division provides reference and computer-assisted bibliographic search services. Library tours and individual or group instruction in the use of the library and its resources may be arranged for students through this division. The Commons part of Information Services is located on the Library's main floor. The Commons is a partnership between Computing and Communications, the Queen Elizabeth II Library, and the Writing Centre. The Commons provides access to print, electronic, and technology resources with the support and expertise needed to help users in the use of these resources. The wall space in the Commons is called First Space and is used to highlight the work of the fine arts students of Memorial University of Newfoundland. The Government Documents Section contains a depository collection of Canadian government documents together with an extensive collection of material from the United States and other countries and international organizations. Document Delivery provides interlibrary loan and services to off-campus students. The Library's Centre for Newfoundland Studies collects all published material pertaining to Newfoundland and Labrador, as well as manuscript materials. The Music Resource Centre, located in the School of Music, contains scores, sound recordings, and listening equipment.

7.13.2 Health Sciences Library

The Health Sciences Library is located on the ground floor of the Health Sciences Centre on the north campus of the University. It is a designated Canadian MEDLINE Centre which provides access to computer-assisted searches of the world's biomedical literature on demand in support of clinical, teaching, and research interests.

The Health Sciences Library has a collection of over 40,000 books on medicine, nursing, dentistry, pharmacy and allied health subjects and subscribes to more than 1700 paper and electronic journals. It maintains an audio-visual collection of over 1500 titles, which includes videotapes, slides, microfiche/film and audio cassettes.

7.13.3 Dr. C.R. Barrett Library

The Dr. C.R. Barrett Library is located on the main floor of the Fisheries and Marine Institute. It offers a comprehensive range of library and audio-visual services to students, faculty, and staff at the Fisheries and Marine Institute, the College of North Atlantic Engineering Technology Centre and to the Newfoundland and Labrador marine industries.

The library collection supports study and research in fisheries and aquaculture, marine engineering, nautical science, and the aquatic environment. The collection also includes significant holdings in engineering.

Library holdings include 50,000 books and technical reports, 400 current magazine and newspaper subscriptions, print and electronic reference sources, 1,400 films and videos, maps and pamphlets. The collection includes 4,500 ship drawings.

7.13.4 Ferriss Hodgett Library

The Ferriss Hodgett Library is located on levels 2 and 3 of the Library & Computing Building, Grenfell Campus, with seating for 203 users and includes group study rooms, audio-visual and computer carrels.

The Library holds over 100,000 books and 450 current subscriptions, along with collections of audio-visual materials, government documents, microforms, periodicals, and access to many e-journals.

A full range of public services is available including reference assistance, orientation tours and interlibrary loans, as well as access to electronic information resources, Internet, spreadsheet, word processing, and presentation software.

8 Student Affairs and Services

www.mun.ca/student/home/

The Deputy Provost (Students) and Associate Vice-President (Academic) Undergraduate Studies provides leadership and co-ordination in improving the student academic learning experience and student success. In partnership with the entire university community the position provides leadership to create and maintain integrated and effective pan-university academic and non-academic support services for students and ensures that interests of students are represented in the University's decision-making processes and committee activities. The Deputy Provost fosters synergistic interactions between academic units and non-academic support and Memorial University of Newfoundland's undergraduate and graduate student organizations units en route to a more integrated provision of services to support students inside and outside the classroom.

The following departments are included in the portfolio of the Deputy Provost (Students): Aboriginal Resource Centre; Blundon Centre; Career Development and Experiential Learning; Co-operative Education; Housing, Conference, and Food Services; International Centre; Office of the Registrar; Office of Student Recruitment; Scholarships and Awards; Service Learning; Student Health Services; Student Success; Student Volunteer Bureau; and the University Bookstore.

8.1 Canadian Forces University Training Plans

Selected students may qualify for financial assistance through these Canadian Forces University Training Plans: the Regular Officer Training Plan (ROTP), the Regular Officer Training Plan (ROTP-Coop), the Dental Officer Training Plan (DOTP), the Medical Officer Training Plan (MOTP), and the Reserve Entry Scheme Officer (RESO). Full details may be obtained in writing to the Canadian Forces Recruiting Centre Detachment St. John's, Sir Humphrey Gilbert Building, 165 Duckworth Street, St. John's, NL or the Canadian Forces Recruiting Centre Detachment Corner Brook, CIBC Building, 9 Main Street, Suite 203, Corner Brook, NL.

8.2 Career Development and Experiential Learning (CDEL)

Career Development and Experiential Learning (CDEL) encompasses a broad range of programs designed to assist undergraduate, graduate students, and alumni of the University explore their career options and gain learning based work or volunteer experience. The Department includes the Centre for Career Development, Experiential Learning, and the Student Volunteer Bureau.

8.2.1 Centre for Career Development

The Centre for Career Development assists students and alumni explore their career options. The Centre provides labour market information, employability skills workshops, individual consultations, and employment counselling, and enables students to gain practical

career-related experiences.

The Centre helps students gather information relevant to educational and career goals and assists students and alumni develop both short and long-term career plans. Workshops are offered to enhance the job search process for students and alumni.

The Centre currently markets Memorial University of Newfoundland students to local, national, and international employer groups as well as assists employers with their on-campus recruitment needs. The Career and Graduate School Fair along with information sessions are provided to assist students in their transition to the world of work.

Postings for summer, part-time, and graduate employment are advertised throughout the year at MyMunLife. Students are encouraged to check the Centre's postings on a regular basis. The Centre for Career Development is located on the fourth floor of the Smallwood Centre in UC4002 and is open from 9:00 a.m. to 5:00 p.m. The website for the Centre can be viewed at www.mun.ca/cdel.

8.2.2 Experiential Learning

Experiential Learning provides support to the Division of Co-operative Education around marketing, employment program administration, interview facilitation and information technology; delivers on-campus employment programs for students such as SWASP and MUCEP; supports and promotes opportunities for students to "go abroad" through academic exchange, work and/or volunteer experience; offers experiential learning opportunities to students, particularly service learning through curricular and co-curricular programs and; works with academic programs on the administration of experiential learning based programs. Experiential Learning is located on the fourth floor of the Smallwood Centre, UC4000 and is open from 9:00 a.m. to 5:00 p.m. The website for Experiential Learning can be viewed at www.mun.ca/cdel.

8.2.3 Student Volunteer Bureau (SVB)

The Student Volunteer Bureau (SVB) is a resource centre and referral service for students interested in getting involved with volunteer work. It is a partnership between CDEL and MUNSU. Founded in 1983, the SVB is a by students, for students operation that aims to foster and enhance the quality of student life at Memorial University of Newfoundland. The Office is staffed by trained student employees and volunteers to assist individuals in finding volunteer placements both on-campus and in the community. The SVB coordinates the Volunteer Incentive Program (VIP), a program of three ascending award levels that was created to encourage and recognize student involvement in volunteer activities on and off campus. VIP is designed to promote career development and self-awareness, as each participant progresses through their university careers. The SVB also promotes and recognizes volunteerism by hosting the annual Get Involved and Volunteer Fair with MUNSU each Fall, as well as coordinating the annual MUN Volunteer Day Awards Ceremony each Spring. The SVB is located on the fourth floor of the Smallwood Centre, UC4001. The website for the SVB is www.mun.ca/cdel/volunteer/.

8.3 Counselling Centre

The primary function of the Counselling Centre is to help students develop their personal capabilities. Through individualized personal counselling and a wide range of programs, students are encouraged and helped to develop their own unique resources and thereby promote personal growth and intellectual development. The Centre also serves as a training centre for advanced students in a number of helping professions.

8.3.1 Chaplaincy

The Chaplaincy is currently comprised of chaplains representing the United, Salvation Army, Pentecostal and Roman Catholic denominations. The Chaplaincy attempts to provide resources, guidance and support for members of the university community. The Chaplaincy also seeks to bring a faith dimension to contemporary issues such as peace, justice, technology and science. The chaplains offer individual pastoral counselling as well as joint programs including weekly workshops, discussion groups, social activities and worship opportunities. Schedules of events are available from the chaplains or through the website at www.mun.ca/ministries/. The Chaplaincy is located at UC 5001B.

8.3.2 Glenn Roy Blundon Centre for Students with Disabilities

The Glenn Roy Blundon Centre for Students with Disabilities coordinates services for students with disabilities and those with short-term illnesses and injuries attending Memorial University of Newfoundland's St. John's campus. Services and accommodations include: assistance arranging academic accommodations for tests and exams (medical or psycho-educational documentation is required), access to adaptive technology and software, orientation of new students, note-taking assistance, card access to wheelchair elevators and lifts on campus, in-servicing of faculty and staff regarding disability issues and accommodations, and a liaising network between students, faculty, staff, and community groups. A copy of the University's Policy on Academic Accommodations for Students with Disabilities is available at www.mun.ca/policy/site/index.php. For further information contact the Centre by visiting the University Centre, room UC4007, or by telephone to (709) 864-2156 (Voice), (709) 864-4763 (TTY), or by e-mail to blundon@mun.ca, or through the website at www.mun.ca/blundon.

For information about the services available at Grenfell Campus, contact the Student Services Learning Centre in person to AS235, or by telephone to (709) 637-6268, or through the website at www.swgc.mun.ca/lcentre/Pages/default.aspx.

For information about the services available at the Fisheries and Marine Institute, contact the Student Services Guidance Office in person to W3013C, or by telephone to (709) 778-0310, or by email to guidance@mi.mun.ca, or through the website at www.mi.mun.ca/guidance/.

8.3.3 Individual and Group Counselling for Other Personal Concerns

In addition to individualized personal counselling, the Centre offers specialized group and/or training programs. For many students the fear of testing, fear of asserting one's self and continued mental and physical stress can lead to poor academic performance or personal problems. These, and other such difficulties, can be dealt with on either an individual or group basis, depending upon the student's needs. The Counselling Centre routinely offers a variety of groups: Assertiveness Training, Developing Healthy Relationships, Mood Management, Test Anxiety, and others on demand.

8.3.4 Learning Enhancement Programs

Through a number of short groups and structured activities, students may actively enhance their learning capabilities. Most of the learning programs offered train participants to employ a number of organizational techniques to comprehend and, later, to recall important concepts. Specific programs offered through the Centre apply these ideas to the areas of Speed Reading and Comprehension, Organizing Ideas for Term Papers and Essays, and Oral Communication.

8.3.5 Psycho-Educational Testing

A psycho-educational assessment program is offered on a fee-for-service basis for students seeking academic accommodations.

The Counselling Centre is located in the Smallwood Centre, and is open 9:00 a.m. to 1:00 p.m. and 2:00 p.m. to 5:00 p.m. (4:30 p.m. in the summer), Monday through Friday. All services are free of charge to students and appointments can be made in person at UC5000, or by telephone to (709) 864-8874, or email at counselc@mun.ca, or by visiting the website at www.mun.ca/counselling/home/psychoed.php.

8.3.6 UCC 2020: Applied Cognitive and Affective Learning Strategies for Undergraduate Students

This 3 credit hour course is an introduction to cognitive and affective learning strategies and techniques with an emphasis on the application of these techniques in the students' own learning repertoires together with an overview of relevant research from cognitive psychology and related fields. Topics covered will include information processing, memory, forgetting, problem solving, metacognition, general and specific learning strategies, learning styles, and affective strategies. Students can receive credit for only one of UCC 2020 or University 2020.

8.3.7 Wellness Programs

Wellness Programs co-ordinate a broad range of health and wellness services for the student community. Our main mission is to raise awareness to the many self-care skills needed for all. Our programs consist of the peer helper program and the many other outreach events organized by this office. Located in the Counselling Centre, wellness education works in collaboration with various campus and community organizations to help facilitate wellness promotion at the University.

Inquiries may be made in-person at UC5002A, by telephone to (709) 864-2659, or through the website at www.mun.ca/student/healthy/.

8.4 Firearms On Campus

Students are reminded that firearms (including air-rifles, air-guns and sling shots) may not be brought into, or used in, any part of the University except the rifle range.

8.5 Housing, Food and Conference Services

Housing, Food and Conference Services provides on-campus housing for students registered at Memorial University of Newfoundland and the Fisheries and Marine Institute, off-campus housing services, and food services for the St. John's campus. A student is responsible for locating his/her own accommodations on or off the campus. Information about services and applications for on campus housing is available through the website at: www.mun.ca/hfcs, or by e-mail at housing@mun.ca, or by telephone to (709) 864-7590/91/92, or in writing to Housing, Food and Conference Services, Room 309 Hatcher House, Memorial University of Newfoundland, St. John's, NL A1B 3P7.

8.5.1 On-Campus Housing

Memorial University of Newfoundland provides two styles of on-campus housing; traditional residence halls of Paton College and apartment style accommodations in Burton's Pond. The ten Paton College "Houses" are co-educational and provide accommodations, mostly in double rooms, for approximately 1000 students. Within each House there is a kitchen, TV room, laundry room, study room, and computer room. Accommodations in Paton College consist of room and board and all residents must purchase a meal plan out outlined under the **Food Services** section of this Calendar. Burton's Pond Apartments provides housing for approximately 500 students in four apartment buildings (Cabot Court, Cartier Court, Gilbert Court, and Guy Court). Each apartment consists of four single bedrooms and shared kitchen, living room, and bathroom. A services building, Corte Real, which is accessible to residents 24 hours a day, includes a computer room, a laundry centre, a study room, a common room, and the residents' mail boxes. On-Campus Housing is also available for students with families in 12 two bedroom apartments in Baltimore Court. All residents of on-campus housing, and their guests, must abide by the Housing Regulations as set out in the *Code of Student Conduct*. For information regarding the *Code of Student Conduct* contact the Office of Student Affairs and Services.

Admission or readmission to on-campus housing is based on several factors, including scholarship, the applicant's potential to contribute to the quality of student life, suitability, and prior behaviour. The University reserves the right to refuse admission or readmission to on-campus housing to any applicant. A processing fee is required for each application and is non-refundable and non-creditable in all instances. An offer of accommodation for on-campus housing is conditional on the applicant being accepted to Memorial University of Newfoundland or the Fisheries and Marine Institute. A student who is not accepted to the University must notify the Housing Office of his/her intention to cancel accommodations immediately upon notification from the University. All residents entering in the Fall semester will be required to sign a two-semester occupancy agreement for the Fall and Winter semesters. Occupancy is normally from the day before the first day of classes until 12:00 noon on the day after the last regularly scheduled undergraduate examination. Residence fees cover the period of a particular semester only. Residents who require accommodations between semesters, for academic reasons, may be provided accommodations, upon approval, if space is available. There is an additional charge for accommodations between the regular semesters, which will be applied to the student's account. Housing, Food, and Conference Services reserves the right to deny accommodation outside the regular semesters.

8.5.2 Off-Campus Housing

Housing, Food and Conference Services, through Off-Campus Housing (OCH), provides information, enhanced web resources and programming to students of Memorial University of Newfoundland who wish to secure off-campus housing through its website. Housing, Food and Conference Services personnel will conduct site visits, review the rental properties using the Off-Campus Housing Amenity Checklist, and update the web site information. These listings are provided for information only and are not endorsed in any way by Memorial University of Newfoundland or Housing, Food and Conference Services. The University does not take any responsibility for these accommodations. Information about our Office Campus Office can be obtained through the website at: www.housing.mun.ca/och, or by email at och@mun.ca, or by telephone to (709) 864-3765.

8.5.3 Food Services

Food Services at Memorial University of Newfoundland's St. John's campus are provided by Chartwells Educational Dining Services. All residents of Paton College are required to purchase a 10, 14 or 19 meal plan. Meal plan tickets are valid from the breakfast meal on the day following the first day of Housing registration. The meal plan ticket expires with the evening meal on the day of University's last regularly scheduled undergraduate examination. Refunds will not be issued to residents for accommodations and/or meal tickets. All residents of Burton's Pond Apartments and Baltimore are eligible to purchase meal plan tickets from the food service provider.

8.6 International Student Advising

The International Student Advising Office is located in Corte Real, Burton's Pond Complex, Room 1000 C. Settlement and integration of foreign students are two major functions of the advisors. New students must meet with the International Student Advisors upon arrival for advice concerning their stay at the University and their compulsory health insurance program. Further information may be obtained by telephone to (709) 864-8895 or through the website at www.mun.ca/isa/main.

8.7 Student Financial Services

Information regarding the Canada - Newfoundland and Labrador Student Loans Program is available from Student Financial Services, Department of Education, located in Coughlan College. Student Financial Services can be reached by telephone to (709) 729-4244/5849, email at www.studentaid@gov.nl.ca or through the website at www.ed.gov.nl.ca/studentaid/.

8.8 Student Health Service

The staff at Student Health Service are available to provide comprehensive health care and to assist students in taking responsibility for their own health. Primary functions of the Service are the diagnosis and treatment of illness, the activation and maintenance of wellness and the promotion of health education programs.

The Student Health Service is located in room UC4023 on the fourth floor of the Smallwood Centre, and is open Monday through Friday, 8:30 a.m. to 4:00 p.m. by appointment only, except for emergencies. Walk in clinics are scheduled throughout the week. Further information may be obtained by telephone to (709) 864-7597 or through the website at www.mun.ca/health.

8.8.1 International Students

International students are automatically enrolled, upon registration, in the mandatory emergency medical insurance plan. International students may opt in their dependents. A personal medical card will be issued by the International Student Advising (ISA) Office and must be presented by the student each time medical or hospital services are required. The student must also sign a claim form for each medical or hospital service rendered. MCP cards are required for international students that are MCP eligible and should be presented first in the event of medical care. Further information may be obtained by contacting the International Student Advising Office.

Graduate international students eligible for provincial health coverage (MCP) should bring proof to the ISA office and opt out of the emergency plan and into the Graduate Students' Union (GSU) health plan.

Undergraduate international students eligible for provincial health coverage (MCP) should bring proof to the ISA office and opt out of the emergency plan and into the Memorial University of Newfoundland Students' Union (MUNSU) health plan.

8.8.2 Medical Records

All students' medical records are strictly confidential. No information is released without the request and written consent of the student.

8.8.3 Medical Services

Services provided include:

1. diagnosis and treatment of: physical illness, emotional problems, sexually transmitted diseases, injuries;
2. individual counselling on various aspects of health and wellness: smoking, fitness, weight control, nutrition, alcohol and drug abuse;
3. referral to: specialists, physiotherapists, hospital diagnostic services, other health care agencies;
4. reproductive health: pap smears, contraception, pregnancy - testing, referral services;
5. Injury rehabilitation programs;
6. AIDS (HIV antibody) testing: confidential blood tests, pre-test counselling, post-test counselling;
7. "Medicals" (non-insured service): pre-employment, pre-admission to professional schools, SCUBA diving, driver's license, TB skin test;
8. Educational materials on health issues;
9. MCP information and application forms; and
10. Vaccinations.

8.8.4 Medicals

"Medicals" (pre-employment, SCUBA, driver's licence, life insurance, etc.) are not covered by insurance plans and must be paid for by the student.

8.8.5 New Students

Students are encouraged to bring a copy of their medical records to the Student Health Centre. This is especially important for students who:

1. have chronic or recurrent illness, e.g. asthma, diabetes, inflammatory bowel disease, seizure disorders;
2. require refills of prescription drugs;
3. have a physical disability, e.g. cerebral palsy, spina bifida, visual or hearing impairment; or
4. have a history of mental illness.

8.8.6 Newfoundland and Labrador Students

MCP cards are required.

8.8.7 Payment

The University will bill the appropriate paying agency for the eligible medical services received at the Student Health Service.

8.8.8 Students From Other Canadian Provinces

Students from other Canadian provinces are required to bring their provincial medicare cards.

8.9 Student Success Programs

Student Success Programs is responsible for the development and administration of programs and activities for students, the identification and assessment of emerging campus trends, long range and strategic planning, fostering and supporting campus leadership as it relates to student governments, campus societies and campus policy development for students.

Student Success Programs works closely with students, staff and faculty and the community at large to maximize the quality of student and academic life for students. Student Success Programs is comprised of the following speciality areas:

8.9.1 Answers

Answers is a front line service centre for a variety of programs and services for students. Answers coordinates leadership programs such as Orientation for students and parents, Leadership, Education and Preparation (LEAP!), Leader Forum, Horizons and Memorial Ambassador. It also offers distribution of the Canada-Newfoundland Student Loans Program, Campus Card and locker rentals. For further information contact Answers by telephone to (709) 864-7461, by email to answers@mun.ca, or through the website at www.mun.ca/answers/about, or by visiting the centre at UC 3005.

8.9.2 Aboriginal Resource Office

All Aboriginal students are provided a range of services to assist with the university experience. Inquiries may be made in-person at UC4003 or by telephone to (709) 864-3495, or through the website at www.mun.ca/aro/about/.

8.9.3 Scholarships, Bursaries and Awards

Student Affairs and Services administers the Scholarships, Bursaries and Awards Program for the University, distributes out of Province Financial Aid, and emergency financial aid. Inquiries may be made in-person at UC4018, by telephone to (709) 864-3956, or through the website at www.mun.ca/scholarships/home.

8.10 Student Unions

8.10.1 Memorial University of Newfoundland Students' Union (MUNSU)

The Memorial University of Newfoundland Students' Union Act (1968) incorporated the Students' Union (MUNSU) as the official students' union representing undergraduate students at the University's St. John's campus.

The Students' Union provides a range of advocacy work to improve the lives of its members and increase accessibility of post-secondary education. It lobbies all levels of government and other decision-making bodies and organizes campaigns around these and other issues which are important to the membership. It also provides services to improve the quality of student life: the Copy Centre and Postal Service, Health and Dental Insurance, SafeDrive / WalkSafe, the Student Handbook/Dayplanner, Breezeway Bar, CHMR-FM radio, and others. The cost of services are partially funded by Students' Union fees paid by each undergraduate student upon registration. MUNSU assists students on an individual basis to resolve student aid as well as academic-based problems and appeals. Through the offices of the Director of Advocacy, problems with appeals, assessments, repayment, and general complaints in these areas are addressed.

The Students' Union offers free legal services to students and a legal aid supervisor is available for appointment. These sessions are not considered extended legal counsel. Students who have more serious issues may be referred to the MUNSU lawyer, for one free consultation, per issue, per semester.

MUNSU has established and provides funding for a number of Resource Centres on campus: Women's Resource Centre (WRC), International Students' Centre (ISC), Lesbian-Bisexual-Gay-Transgendered Resource Centre (LBGT-MUN), MUN DISC (Disability Information and Support Centre), Students Older than Average (SOTA), Student Parents Resource Centre, and the Aboriginal Students' Centre. The Students' Union also operates over 100 student clubs organized around a wide range of academic and extracurricular activities.

The Students' Union is a member of the Canadian Federation of Students (CFS) representing over half a million students across Canada. Further information may be obtained from the website at www.munsu.ca.

8.10.2 Students' Union Fee

All full-time and part-time undergraduate and graduate students of the University pay compulsory fees to their respective students' unions (MUNSU or GSU) and all students, upon registration, automatically become members of either MUNSU, the undergraduate students' union, or GSU, the graduate students' union.

8.10.3 The Graduate Students' Union (GSU)

The Graduate Students' Union (GSU) at Memorial University of Newfoundland is an organization run for graduate students by graduate students. Founded in 1967, the GSU is one of Canada's oldest independently incorporated graduate student governments. Every graduate student at the University becomes a member of the GSU upon registration. Presently, the graduate student body consists of over 3000 full and part-time students, thereby comprising more than 10% of the total student population at Memorial University of Newfoundland.

The Graduate Students' Union has two main functions: 1) to represent and protect the interests of the graduate students at all levels of university governance, and 2) to help enhance the quality of graduate student life at Memorial University of Newfoundland. Graduate student fees, presently \$20 per semester per student, provide the GSU with an annual operating budget. These fees are used to run the GSU office, help finance social and academic events for graduate students, provide conference aid for students presenting at conferences, and to cover other operating expenses.

The Graduate Students' Union is run by a Board of Directors consisting of the five GSU Executive officers and one student representative from each academic unit with a graduate program. Additionally, graduate students who sit on various university committees regularly attend. The Board meets once a month to assist the Executive in guiding the development and direction of the organization. The Board meetings also give students a chance to raise concerns from their individual departments and in return, to receive advice or suggestions on problem solving. These meetings are the main line of communication between the Executive officers and the graduate student population at the University. It is for this reason, that the GSU needs an active and interested Board of Directors. Graduate students who are interested in getting involved are always welcome, and should speak to their department representative, or contact the GSU office.

The Graduate Students' Union is located in Feild Hall on the north side of campus. Operated by the GSU, Feild Hall is comprised of four floors: the top two floors for a graduate student residence, one floor for departmental graduate student offices and GSU offices, and the ground floor for Bitters - Restaurant and Lounge, the pub owned and operated by the GSU.

The Graduate Students' Union general office is located on the second floor of Feild Hall in room GH 2007. Office hours are posted outside the office door, on the answering service, and the website. You can reach the GSU by phone to (709) 864-4395, by fax at (709) 864-3395, by email to gsu@gsumun.ca, or by writing to Graduate Students' Union, Feild Hall, GH2007, 216 Prince Philip Drive, St. John's, NL, A1B 3R5. Further information about the GSU can be obtained from the website at www.gsumun.ca.

8.11 University Bookstore

The University Bookstore is the on-campus site for text, reference and general reading. The Bookstore carries stationery, school supplies, crested clothing, backpacks and memorabilia. Distance Education students are to order textbooks through Bookstore website. The University Bookstore is located at UC2006, telephone to (709) 864-7440, or website at www.bookstore.mun.ca.

9 Dentistry, Physiotherapy, and Occupational Therapy

9.1 General Information

Because admission requirements vary significantly in different institutions and from one health science to another (e.g., Dentistry, Dental Hygiene, Physiotherapy, Occupational Therapy), interested students are advised to plan carefully and early.

The Career Planning Centre, located in the University Centre in room UC4002, can provide advice or, in some instances, arrange for students to contact other sources of more detailed information. The Centre maintains considerable information on careers in the various health fields, including guides and university calendars outlining where the programs of study are available and their entrance requirements. Interested students should consult these materials as early as possible, preferably before the Orientation Week interview and first-year registration.

9.2 Dentistry

After having consulted the Career Planning Centre, students who require further advice about dentistry prerequisites should consult Dr. Faye Murrin, Department of Biology in room S4109, who has agreed to act as the faculty advisor for pre-dental students.

9.3 Occupational Therapy

Students interested in pursuing a career in Occupational Therapy may arrange an appointment with Brenda Head, who has been designated by Memorial University of Newfoundland as a liaison person for the School of Occupational Therapy at Dalhousie University. Further information may be obtained by writing Ms. Brenda Head, Memorial University of Newfoundland, Room 2765, Health Science Centre, St. John's, NL A1B 3V6, or by telephone to (709) 777-7105.

9.4 Physiotherapy

Physiotherapy career information is available at the Career Planning Centre. Students requiring additional assistance or advice may arrange an appointment with Janet O'Dea.

Ms. O'Dea has been designated by Memorial University of Newfoundland as a liaison person with Dalhousie University, School of Physiotherapy and as a source of advice concerning other Physiotherapy Programs in Canada. Further information may be obtained by writing Janet O'Dea, Memorial University of Newfoundland, Room 2765, Health Sciences Centre, St. John's, NL A1B 3V6, or by telephone to (709) 777-7080, or through the website at www.med.mun.ca/OTPT/.

10 Distance Education, Learning and Teaching Support (DELTS)

Acting Director

Wells, R., B.Sc.(Hons.), M.Ed. *Memorial*

Administrative Staff

Mahon, P., Secretary

Distance Education, Learning and Teaching Support (DELTS) is responsible for the design, development and delivery of credit courses and degree programs via distance; advancement and support of e-learning throughout the University; and support for students and faculty in the use and application of technologies for effective teaching and learning. Through its activities DELTS connects students across the province, the country and the world that have limited educational opportunities due to time and location. It also works to enhance, promote and support an e-learning vision throughout the institution. DELTS strives to provide faculties and departments with the e-learning expertise and knowledge needed to progress the University's mandate in expanding and improving its online education delivery. A Memorandum of Understanding with the Department of Education's Centre for Distance Learning and Innovation (CDLI), who deliver distance education to K-12 students, allows DELTS to share knowledge and information and prepare for the incoming university student.

10.1 Distance Education

Distance Education, Learning and Teaching Support (DELTS) offers over 400 courses - all of which are web-based - to over 18,000 course registrants annually. Courses are available in various disciplines in ten faculties and schools with complete undergraduate and graduate degrees available by distance including bachelors' degrees in arts (Bachelor of Arts (Police Studies)), maritime studies (Bachelor of Maritime Studies), nursing (Bachelor of Nursing (Post-RN)), and technology (Bachelor of Technology); masters' degrees are offered in education (Master of Education (Information Technology), Master of Education (Post-Secondary)), human kinetics and recreation (Master of Physical Education), nursing (Master of Nursing), maritime management (Master of Maritime Management), technology management (Master of Technology Management (Engineering/Applied Science Technology), Master of Technology Management (Aquaculture)), and marine studies (Master of Marine Studies (Fisheries Resource Management)). Courses are delivered via the Internet, however, some courses include print materials (Le. manual, readings, textbooks), CD/video/DVD programs and web conferencing. For a comprehensive listing of all programs offered completely or partially online visit www.delts.mun.ca.

10.2 Student Service and Delivery

DELTS' Student Service and Delivery model utilizes a 1-1-1 approach; one response to one inquiry by one staff representative. This model incorporates a hands-on approach with a self-service website which provides the self-directed distance student with access to relevant and important information during off-peak hours. This system effectively places specific information, such as course materials, in the hands of students thereby reducing wait times and allowing for effective communication with students on specific matters.

Further information on distance education programs may be obtained by telephone to (709) 864-8700, or toll free to (866) 435-1396, or

by fax to (709) 864-6783, or through the website at www.delts.mun.ca.

10.3 Course Development

As an academic support unit, DELTS works in coordination with Memorial University of Newfoundland's faculties and schools to identify and develop new distance courses and programs. Design and development professionals are paired with content experts in the respective faculties and schools to develop, manage and deliver the University's distance education programs.

In all its functions, DELTS encourages and supports innovative teaching practices through the application of instructional technologies in both on-campus teaching and distance education. A wide range of professional services in video production, multimedia development and classroom technology aim to provide faculty with pedagogical enhancements and ultimately increase student engagement.

For course development inquiries telephone (709) 864-8700; for media services inquiries telephone (709) 864-4061; for classroom technology inquiries telephone (709) 864-7574.

10.4 Instructional Development Office

DELTS Instructional Development provides support to the University's faculty members and graduate students in the enhancement of their teaching knowledge and skills. The team espouses a collaborative, responsive, and pragmatic approach to developing services and programs related to teaching and learning.

Among the services provided are professional development workshops and seminars, programs for the teaching development of graduate students, and individual and small group consultations. Support is given for awards applications and other activities and initiatives that recognize the importance of university teaching. A resource centre offers a collection of books, journals, newsletters, and video programs about instruction.

Further information on instructional development services may be obtained by telephone to (709) 864-3028, or by fax to (709) 864-4635, or by email to instrdev@mun.ca.

11 Special Divisions and Separately Incorporated Entities

11.1 Atlantic Canada Venture Gateway

www.busi.mun.ca/gateway

Director

Genge, D.

Associate Director, Client Services

Greene, B.

Manager, Business Relations

Manning, E.

Coordinator, Finance and Administration

Paul, K.

The Atlantic Canada Venture Gateway (Gateway) is an outreach initiative of the Faculty of Business Administration. Gateway was officially launched in October 2009 and offers two main programs, an investment readiness program and an investor partnering program.

The investment readiness program prepares Atlantic Canadian technology firms to attract private equity or venture capital. Eligible clients work with Gateway management as well as a network of university, government and industry partners on issues such as corporate strategy, the preparation of investment proposals, and due diligence readiness.

The investor partnering program supports clients seeking strategic investment from international business partners. Gateway and the Higher Colleges of Technology's Dubai Men's College (DMC) in the United Arab Emirates jointly offer this program. Clients gain insight and guidance from DMC's senior advisors who provide strategic guidance and match clients with prospective investors and business partners in the Middle East region.

Specialized training programs and ongoing advisory support are also provided.

Gateway is located on the fourth floor of the Faculty of Business Administration alongside the Gardiner Centre. Further information can be obtained by contacting the Atlantic Canada Venture Gateway by telephone at (709) 864-4088 or through the website at www.busi.mun.ca/gateway.

11.2 Canadian Centre for Fisheries Innovation (CCFI)

www.ccfi.ca/

Board of Directors

Gregory, G. (Chair), Fisheries Consultant, St. John's, NL
 Abrahams, Dr. M., Faculty of Science, Memorial University of Newfoundland
 Bonnell, C., School of Fisheries, Marine Institute
 Butler, R., Cooke Aquaculture, St. George, NB
 Chidley, G., Harvester, Renewals, NL
 Lewis, D., Government of Newfoundland and Labrador, St. John's, NL
 Linstead, G., Labrador Fishermen's Union Shrimp Co. Ltd., Lance au Loup, NL
 McGuinness, P., Fisheries Council of Canada, Ottawa, ON
 Miller, A., Open Ocean Systems, Saint John, NB
 Penney, C., Clearwater Seafood Ltd., Bedford, NS
 Pryor M., Newfoundland Aquaculture Industry Association, St. John's, NL
 Stewart, S., Confederation Cove Mussell Co., Borden-Carlton, PE
 Sullivan, B., Ocean Choice PEI, Souris, PE
 Thompson, G., Fundy North Fishermen's Association, Dipper Harbour, NB
 Verge, R., Canadian Centre for Fisheries Innovation, St. John's, NL
 Whyatt, S., Harvester, St. John's, NL

Management and Administrative Staff**Managing Director**

Verge, R., B.Eng. *NSTC*, M.B.A. *York*, P.Eng., CA, CMC

Executive Assistant

Horan, C., B.A. *Memorial*

Industrial Liaison Officer

MacNeil, S., B.Sc. *Memorial*, Adv. Dip *Marine Institute*

Industrial Liaison Officer

Chapman, A., B.Comm., *Memorial*

Secretarial Officer

Brophy, A.

Located at the Fisheries and Marine Institute, the Canadian Centre for Fisheries Innovation is owned by Memorial University of Newfoundland. The Centre provides scientific research and technology services to the fishing industry. Working closely with the faculty and staff of the region's universities and technical institutes, the Centre provides expert assistance in the areas of aquaculture, harvesting and processing, with the aim of enhancing the industry's productivity and profitability. CCFI's activities also include resource conservation research, equipment development and marine biotechnology. The Centre's services are available to anyone in the fishery or aquaculture industry who wishes to overcome obstacles or meet opportunities through science and technology.

CCFI is an organization structured to meet the needs of the industry quickly and efficiently. The Industrial Liaison Officers collaborate directly with clients to develop and execute industrially relevant research and development projects.

Mandate

The organization works with industry clients to identify needs. It then collaborates with scientific and technical faculty and staff to devise solutions to meet those needs. CCFI works to ensure that the initiatives are organized, on time and directed to address the specific needs of the industry clients. The Centre also funds these projects, when required.

The Centre's research and development undertakings cover all areas of importance to the fishery and aquaculture industry:

1. Environmentally Sustainable Harvesting
2. Energy Efficiency
3. Utilization of Fish Wastes
4. Resource Assessment and Surveys
5. Improved and More Efficient Fishing Platforms
6. Human Resource/Technology Applications
7. Alternative Fish and Shellfish Species for Aquaculture
8. Efficiency and Profitability in Aquaculture
9. Resolving Environmental Issues in Aquaculture

With strong representation from industry, the Board of Directors oversees the direction and mandate of the Centre to ensure that its work is always relevant to the needs of the fishery.

11.3 C-CORE

www.c-core.ca/

Board of Directors

Oake, D., (Chair), President, Invenio Consulting Inc.

MacLeod, M., (Vice-Chair), Vice-President, Atlantic Canada, Chevron Canada Ltd.

Alcock, D., President, Dispute Resolutions

Burke, G., East Coast Commercial & Business Development Manager, Suncor Energy Inc.

Burse, T., Executive Director, Corporate Services, Council of Canadian Academies

Eidsnes, J., Engineering Director, Norway, Subsea 7 Forus

Gosine, Dr. R., Associate Vice-President (Research), Collaborations and Partnerships, Memorial University of Newfoundland

Keating, J., Vice-President, Oil & Gas, Nalcor Energy

McClosky, P., Vice-President, Atlantic Region, Husky Energy

McDonald, P., Executive Vice-President & CFO, Stratos Global Corporation

Quaicoe, Dr. J., Professor, Faculty of Engineering and Applied Science, Memorial University of Newfoundland

Randell, Dr. C., President & CEO, C-CORE

Sacuta, P., Operations Manager, Exxon Mobil Canada East

Wilson, S., Director, Commercial Affiliated Pipelines, TransCanada Pipelines VP, Commercial Operations, TC Pipelines LP GM, TransQuebec and Maritime Pipelines Inc.

Officers of the Corporation

Randell, C.J., B.Eng. *Lakehead*, M.A.Sc., Ph.D. *Victoria*, P.Eng.; President and Chief Executive Officer

Kennedy, S.C., B.Comm., C.M.A. *Memorial*, Vice-President, Corporate Services

Phillips, R., B.Sc. *Bristol*, M.Phil., Ph.D. *Cambridge*, P.Eng.; Cross appointment with Faculty of Engineering and Applied Science

Power, D., M.Eng., P.Eng; Vice-President, Remote Sensing

Healey, R., Corporate Secretary

Management Team

Adlakha, P., B.Sc.Eng. *Nova Scotia Technical College*, P.Eng.

Brown, M., M.Sc. Eng. *University of Alberta*, P.Eng.

Kennedy, S., B.Comm. *Memorial*, CMA

Murrin, D., Ph.D. Eng. *Memorial*, P.Eng.

Power, D., B.Eng., M.Eng. *Memorial*, P.Eng.

C-CORE is a separately incorporated research and development corporation of Memorial University of Newfoundland that creates value in the private and public sectors by undertaking applied research and development, generating knowledge, developing technology solutions and driving innovation.

Established in 1975 as the Centre for Cold Ocean Resource Engineering to address challenges facing oil & gas development offshore Newfoundland & Labrador and other ice-prone regions, C-CORE is now a multi-disciplinary R&D organization with world-leading capability in:

1. Remote Sensing
2. Ice Engineering
3. Geotechnical Engineering

With unparalleled harsh environment expertise, C-CORE is active on every continent, providing research-based advisory services and technology solutions to national and international clients in the natural resource, energy, security and transportation sectors.

As a not-for-profit entity, C-CORE has the ability to focus on long-term value by re-investing revenues from contract projects into new research, equipment and competence development, continuously growing capacity and capability. Throughout the past generation, C-CORE has supported over 1000 undergraduate, graduate and post-doctoral students on their path to become the highly qualified personnel needed to drive global innovation, and has served as an incubator for 18 new technology companies.

Headquartered in St John's, NL, with offices in Ottawa, ON; Halifax, NS and Calgary, AB, C-CORE maintains a close collaborative relationship with Memorial University of Newfoundland, sharing and augmenting its extensive facilities, diverse academic expertise and \$100 million research portfolio.

From a staff of more than 80 scientists, engineers and other professionals, project teams are assembled based on client need, drawing on internal expertise across disciplines, as well as national/international academic, institutional and corporate partnerships, in order to support increasingly safe and sustainable operations in challenging environments around the globe.

C-CORE's in-house facilities include mechanical, electrical and soils laboratories; high-security high-capacity computing facilities; and a 5.5m-radius, 200G payload capacity Actidyn centrifuge (the largest in Canada and the only one in North America designed to model cold region phenomena), with adjoining model preparation laboratory and earthquake simulator; mechanical, electrical and soils laboratories. C-CORE also holds an NSERC Major Facilities Access (MFA) to support Canadian academic research.

C-CORE hosts two major research centres:

1. CARD (Centre for Arctic Resource Development) is a centre for medium to long term research and development aimed at advancing safe, responsible and cost-effective development of hydrocarbon resources in Arctic and other ice-prone regions.
2. LOOKNorth (Leading Operational Observations and Knowledge for the North) is a federally designated Centre of Excellence for Commercialization and Research (CECR) dedicated to validating and commercializing monitoring technologies that support safe and sustainable development of Northern natural resources.

11.4 Centre for Collaborative Health Professional Education

www.med.mun.ca/cchpe/home.aspx

Director

Heath, O., B.A. *McGill*, M.Sc., Ph.D. *Memorial*; Associate Professor; Joint appointment University Counselling Centre and Community Health and Humanities, Faculty of Medicine; Cross appointment Department of Psychology

Academic Staff

Curran, V.R., B.A. *Memorial*, Dip.Ad.Ed. *St. Francis Xavier*, M.Ed. *Dalhousie*, Post Grad Cert. *British Columbia*, Ph.D. *Guelph*; Professor of Medical Education, Faculty of Medicine, Cross appointment with Faculty of Education

Sharpe, D.B., Cert.Ed. *Loughborough College*, B.Ed., M.Ed. *Alberta*, Ph.D. *Texas A and M*; Professor, Faculty of Education

Faculty Scholars

Callanan, T., B.Sc., M.D. *Memorial*, Dip.Psych. *McGill*, FRCPC; Member, Canadian Psychoanalytic Society; Associate Professor and Chair of Psychiatry, Faculty of Medicine; Cross Appointed to Counselling Centre

Hardy Cox, D., B.S.W. *Memorial*, M.S.W. *Carleton*, Ed.D. *Maine*; Associate Professor, School of Social Work; Cross appointment with Faculty of Education

Heath, O., B.A. *McGill*, M.Sc., Ph.D. *Memorial*; Associate Professor; Joint appointment University Counselling Centre and Community Health and Humanities, Faculty of Medicine; Director

Kearney, A., B.N., Ph.D. *Memorial*, M.H.Sc. *Toronto*, R.N.; Adjunct Professor, Dalhousie University 2007-2012; Associate Professor, Joint Appointment School of Nursing and Community Health and Humanities, Faculty of Medicine

Sclater, A., B.Sc. *Waterloo*, M.Sc., B.Med.Sc., M.D. *Memorial*, FRCPC; Professor and Chair of Medicine, Faculty of Medicine

Snow, N., B.N., M.N. *Memorial*, C.P.M.H.N.©; Faculty, Centre for Nursing Studies

Sullivan, M., B.A. *York*, M.S.W. *Carleton*, Ph.D. *Toronto*; Associate Professor, School of Social Work

Staff

Kirby, B., Interprofessional Education Project Manager

Silver, S., Administrative Assistant

The Centre was established in September 1999 in response to a growing emphasis on interprofessional health care. Centre oversight is provided through a Governing Council comprising: the Deans of the Faculties of Education and Medicine and the Schools of Human Kinetics and Recreation, Nursing, Pharmacy and Social Work; the Director of the Counselling Centre; or their representatives.

The Centre's mission is to enhance education in the health and social care professions through research and development in collaborative, interprofessional educational programming. Key activities of the Centre include:

1. promoting, developing, facilitating and coordinating collaborative, interprofessional educational programs;
2. providing expertise for enhancing the design, delivery, and evaluation of educational programs;
3. promoting education-related training through the organization of educational development opportunities for faculty members;
4. developing research projects and supporting collaborative research in health professional education and interprofessional practice; and
5. promoting health professional education as an academic pursuit.

All members of the University community including faculty, staff, and students are invited and encouraged to be engaged in the activities of the Centre. Academic Staff Members may hold an appointment as either a Faculty Scholar or Faculty Associate of the Centre. Faculty Scholars are appointed by the Governing Council on the recommendation of the respective Dean or Director based on their active engagement in academic development and scholarly activity related to the field of interprofessional collaboration and education. Faculty Associates actively participate in curriculum development or instruction of interprofessional education programs coordinated by the Centre. They are reviewed and approved by the Governing Council on an annual basis.

Further information may be obtained by contacting the Centre in writing to the Centre for Collaborative Health Professional Education,

Memorial University of Newfoundland, Health Sciences Centre H2901, St. John's, NL Canada, A1B 3V6, or by telephone at (709) 777-6912, or by fax at (709) 777-6576, or through the website at www.med.mun.ca/cchpe/home.aspx.

11.5 Centre for Earth Resources Research (CERR)

Director

Hanchar, J.M., B.S. *Memphis*, M.S. *Vanderbilt*, Ph.D. *Rensselaer Polytechnic Institute*

Research Group

The Centre draws on the research expertise of faculty and research staff members in the Department of Earth Sciences as well as other specialists inside and external to the University. For a complete listing of faculty, see **Earth Sciences** entry.

Scope and Objectives

The CERR was established in 1983 to provide for the co-ordination and promotion of earth resources research and associated work related to the origin, discovery, development, exploitation, and environmental aspects of earth resources. The Centre promotes, initiates, and co-ordinates research within the earth resources disciplines on the national and international scenes. Researchers interact, when appropriate, with the industrial and government sectors and introduce other organizations to the potential benefits of further research and development in earth resources. The special facilities of the Centre complement the development of graduate and undergraduate programs in earth sciences and related disciplines at Memorial University of Newfoundland. A further function of the Centre is to contribute to the training of people competent in solving earth resources problems and to encourage personnel exchanges with industry and government. The Alexander Murray Building houses the Centre, and has laboratories for teaching and basic and applied research.

Organization

The Centre is an integral part of the Department of Earth Sciences. The active research of faculty members contributes to programs in the Centre. Increasing collaboration is under way with government and industry in research projects that emphasize earth resources. The work of the Centre addresses problems and opportunities related to mineral resources, petroleum resources, exploration technology, environmental geoscience, and generic research. The Centre works closely with other local, national, and international research institutes. CERR hosts the geoscience component of the University's Oil and Gas Development Partnership.

11.6 Centre for Material Culture Studies

Advisory Committee

Dean of Arts, Chair

Dick, J., Government of Newfoundland and Labrador

Ferguson, M., The Rooms Provincial Museum

Jarvis, D., Heritage Foundation of Newfoundland and Labrador

Lovelace, Dr. M., Folklore

Director

Pocius, Dr. G.L., Folklore

The Centre for Material Culture Studies was established in 1988 to initiate, promote, and sponsor research on material culture within both the University and the general community. The Centre acts as a multidisciplinary forum for Memorial University of Newfoundland faculty members as well as visiting researchers from other institutions, including government agencies. The Centre houses a wide range of visual and documentary resources relating to material culture. Since 2008, the Centre has also been involved with the Province of Newfoundland and Labrador's work on Intangible Cultural Heritage, facilitating the provincial ICH Inventory.

11.7 Office of Collaborations and Partnerships (OCP)

www.mun.ca/research/ocp/

Tubrett, M., B.Sc.(Hons) *Memorial*

Manager, Operations, Major Research Partnerships

Kielley, M., B.A., B.Comm., M.E.R. *Memorial*

The Office of Collaborations and Partnerships (OCP) stems from a consolidation of units reporting to the Office of the Vice-President (Research). The Core Research Equipment and Instrument Training Network (CREAIT) and Major Research Partnerships (MRP) are divisions of the Office of Collaborations and Partnerships.

Institutional applications and reports to programs offered through the Canada Foundation for Innovation (CFI), the Canada Research Chairs (CRC), the Atlantic Innovation Fund (AIF), and the Research & Development Corporation (RDC) of Newfoundland and Labrador are administered through the Office of Collaborations and Partnerships; which serves as the institutional point of contact with CFI, the CRC secretariat and RDC.

MRP is responsible for financial and administrative support for Memorial University of Newfoundland's existing major, AIF-funded research projects and other new collaborative research projects.

The pan-university Core Research Equipment and Instrument Training Network (CREAIT) is designed to maximize the impact of Memorial University of Newfoundland's institutional investments in research through enhanced access to and utilization of major research equipment. CREAT consists of eight interconnected satellites across the St. John's campus and is responsible for maintaining and operating thematic clusters of multi-user equipment.

Individuals seeking more information about Office of Collaborations and Partnerships, should contact the Director by emailing ocp@mun.ca, by telephone at (709) 864-4791, by fax (709) 864-6193 or in-person at the Inco Innovation Centre, room IIC1001, or through the website at www.mun.ca/research/ocp/.

Memorial University of Newfoundland Folklore and Language Archive (MUNFLA) is Canada's foremost repository for recorded and collected items of Newfoundland and Labrador folklore, folklife, language, oral history and popular culture. Established in 1968, it is one of the oldest archives at Memorial University of Newfoundland. The Archive is an integral part of the teaching and research activities of the Department of Folklore at the graduate and undergraduate levels. It is a member of the Association of Newfoundland and Labrador Archives and the Canadian Council of Archives.

The Archive contains diverse materials, donated by more than 11,000 contributors, covering topics such as custom and belief, childlore, material culture and work techniques, song, music, dance, tale, legend, personal experience narrative, poetry, riddles and conundrums, proverbs and foodways. Special holdings include the field notebooks of Maud Karpeles who compiled *Folk Songs from Newfoundland* (1971); E. R. Seary's collection of research materials on family names; the folklore collections of Herbert Halpert and John Widdowson; the extensive Newfoundland and Labrador song collections of Kenneth S. Goldstein and MacEdward Leach; Lawrence R. Smith's linguistic materials on Labrador Inuktitut and Southern Avalon dialect; 12,000 Canadian Broadcast Corporation recordings; the Lorne Russwurm international collection of country music; and Franco-NL materials from the Centre d'Études Franco-Terreneuviennes. Overall, the collection contains 40,000 audio tape recordings, 4,000 commercial recordings, 20,000 photographs, 2,000 printed documents, 16,000 manuscripts, and 800 video tape recordings.

Further information can be obtained by writing Memorial University of Newfoundland Folklore and Language Archive, Department of Folklore, ED-4038, G. A. Hickman Building, St. John's, NL Canada A1B 3X8, or by e-mail at munfla@mun.ca, or by telephone at (709) 864-8401, or by fax at (709) 864-4718, or through the website at www.mun.ca/folklore/munfla.

Collins, J., Cert. Business *Memorial*

The Gardiner Centre was formed in August 2008 by the amalgamation of the Centre for Management Development and the P.J. Gardiner Institute, both of which have served Newfoundland and Labrador individuals and organizations for close to 30 years.

As the outreach unit of Memorial University of Newfoundland's Faculty of Business Administration, the Gardiner Centre is focused on developing management and leadership skills, expanding business knowledge and facilitating organizational growth. Whether clients are existing or aspiring supervisors, managers, executives or entrepreneurs, the Gardiner Centre has programs to advance their business and leadership knowledge and skills. Through training, events or solutions, the Gardiner Centre connects clients with the expertise and experience of the Faculty's instructors and other business leaders and educators.

The Gardiner Centre's facilities, located on the fourth floor of the Faculty of Business Administration building, provide an interactive adult learning environment which is designed to provide clients with everything they need to ensure a relaxing, retreat-like atmosphere, conducive to learning.

Further information may be obtained by contacting the Gardiner Centre by telephone at (709) 864-7977 or through the website at www.mun.ca/gardinercentre.

11.10 GENESIS Group Inc.

www.genesis.mun.ca/

President and CEO

King, D.J., B. Comm. *Memorial*, M.B.A. *McMaster*, CA

GENESIS Group Inc. is a separately incorporated entity of Memorial University of Newfoundland and is governed by a board of directors representing industry, academia, and government. It serves the whole university community and facilitates the linkage to the business community. The Genesis Group is located on the third floor of the Inco Innovation Centre. The Genesis Research division, as its primary goal, identifies and commercializes promising technologies arising from research at the University. Areas of expertise include Biotechnology and Medicine, Physical Sciences and Engineering and Information Technology and Communications. Key industrial sectors include ocean technology mining and oil and gas. In addition to its central role of transferring technology to the private sector, the research group assists the province's small and medium-size businesses to access the vast physical and human resources of the University. Genesis Research focuses on new technologies, processes, and services and seeks to enhance, improve, and/or diversify the capacity of existing industry. The Genesis Centre division is a support network to help knowledge-based businesses/entrepreneurs create high-growth enterprises. The Centre mobilizes the province's business community and a network of world class mentors to help the entrepreneurs develop comprehensive business plans, raise equity capital and secure global market access. Genesis Bio-labs, located on Mt. Scio Road, is a wet lab facility to support start-ups in the biotechnology sector.

Further information may be obtained by contacting the GENESIS Group Inc. by telephone at (709) 864-4527 or through the website at www.genesis.mun.ca/.

Duff, J., B. Comm. *Memorial*

The Leslie Harris Centre of Regional Policy and Development is tasked with coordinating and facilitating the University's educational, research and outreach activities in the areas of regional policy and development. The Centre works with all faculties and departments within the University and serves as a reliable point of access for all stakeholders seeking to work with the University in activities related to regional policy and development. The Harris Centre interprets regional as all communities and regions in Newfoundland and Labrador and policy and development includes all issues that affect the ability of communities and regions to be prosperous and sustainable. The Harris Centre seeks to connect faculty, staff and students with opportunity for practical application in Newfoundland and Labrador while representing the integrity and independence of University research, teaching and outreach.

Further information may be obtained by contacting The Harris Centre by telephone at (709) 864-3143, by e-mail at harriscentre@mun.ca, or through the website at www.mun.ca/harriscentre/.

The Harris Centre is home to Memorial University of Newfoundland's online connecting tool, Yaffle. Further information may be obtained at www.yaffle.ca.

The Health Research Unit was established in 1991 as a unit of the Faculty of Medicine within the Division of Community Health. It makes available the professional skills, expertise and information resources of the Division to other faculty, government departments, non-government agencies and organizations, and the community.

The purpose of the Health Research Unit is to improve the health of the Newfoundland and Labrador community-at-large through research focussed on the prevention of disease and the protection and promotion of health.

Research Themes

1. Measurement of health status in community/workforce populations;
2. Assessment of the health care system;
3. Development and management of health information systems;
4. Design and analysis of health surveys and audits; and
5. Evaluation of health and social programs

The Health Research Unit may be contacted by telephone at (709) 777-8385 or through the website at www.med.mun.ca/hru/.

11.13 Institute of Social and Economic Research (ISER)

www.mun.ca/iser/

Board of Directors

Byrne, Dr. P., Departments of English and Folklore, Director
 Cullum, Dr. L., Department of Sociology
 Dunn, Dr. C., Department of Political Science
 Jamieson, Dr. S., Department of French and Spanish
 Lockett, Dr. C., Department of English
 Vice-President (Academic)
 Rankin, Dr. L., Department of Archaeology
 Riggs, Mr. B., QEII Library
 Simms, Dr. A., Department of Geography
 Dean of Arts - *virtute officii*
 Whitaker, Dr. R., Department of Anthropology

Administrative Staff

Harding, M., Administrative Staff Specialist
 Browne, S., Secretary

Purpose And Mandate

The purpose of the Institute shall be to undertake, sponsor, and publish research within such disciplines and in such parts of the world as are deemed of relevance to Newfoundland and Labrador. Without limiting the generality of the above, research pertaining directly to social and economic development in Newfoundland and Labrador shall be of special importance.

Organization

The Institute is an integral part of, and not an autonomous appendage, of the University. It is so organized that all its officers serve the University in other capacities and it is ultimately responsible to the President and Board of Regents of the University. The management of its affairs is vested in an Executive Committee, while the day-to-day responsibilities are in the hands of the Director. Since September 2006, the Executive Committee has also served as the Board of Directors of the J.R. Smallwood Foundation for Newfoundland and Labrador Studies.

Fellowships

In general, ISER fellowships function to supplement and stimulate research interests of faculty and graduate students working within the research mandate of ISER. Terms and conditions of ISER fellowships may be obtained in writing to ISER, Institute of Social and Economic Research, Memorial University of Newfoundland, St. John's, Newfoundland and Labrador, A1C 5S7, or by telephone at (709) 864-8156, or by email at iser@mun.ca, or through the website at www.mun.ca/iser/.

ISER Books

The Institute publishes research falling within the ISER mandate - more than 90 titles to date. Many of the books originate in research undertaken by ISER itself. Some notable ISER books, however, have originated outside the Institute. Authors are invited to submit completed manuscripts that fall within ISER's mandate. Further information may be obtained in writing to ISER Books, Memorial University of Newfoundland, St. John's, Newfoundland and Labrador, A1C 5S7, or by telephone at (709) 864-3453, or my email at iser-books@mun.ca, or through the website at www.mun.ca/iser/.

11.14 International Centre

www.mun.ca/international/

Director/International Liaison Officer

Knutson, S., B.Ed. *Concordia*, M.Ed. *Memorial*

Purpose And Mandate

The International Centre is in general concerned with:

1. coordinating and promoting the University's international activities, including international exchanges and programs;

2. developing and managing international activities and investigating funding sources, with particular reference to exchange programs;
3. providing program information and advice to faculty and staff and act as the central contact with the Association of Universities and Colleges in Canada (AUCC) and other similar bodies; and
4. pursuing new opportunities to develop partnerships with the private sector and other educational institutions.

Further information may be obtained by contacting the International Centre by telephone at (709) 864-4053 or through the website at www.mun.ca/international/.

11.15 International Programs Office (IPO)

www.business.mun.ca/international/

Director

Burns, M.E., B.A.(Hons.), M.A. *University of Essex*

International Program Officer (Study Abroad)

Young, M., B.Comm.(Co-op) *Memorial*

International Support Officer

Wang L., M.B.A. *Memorial*

The International Programs Office (IPO) was established in October 2008 and brings together all the international activities of the Faculty of Business Administration other than outreach or research activities under the responsibility of the Associate Dean (Academic Programs) of the Faculty. The activities previously undertaken by the Centre for International Business Studies and by the Fellow in International Business are continued in this new Office under a dedicated support unit headed by a Director of International Programs.

The IPO has direct responsibility for the development and enhancement of academic programs and curriculum including but not limited to the International Bachelor of Business Administration (i.B.B.A.), the International Business Minor, the International Business Concentration, professional accreditation (CITP) and future internationally focussed initiatives at the graduate level. The IPO also has responsibility for development and management of a global range of international mobility opportunities in the Faculty, including student exchange, the Harlow Program and other international summer schools and short programs. In addition the IPO plays a major role in recruiting international students to the Faculty and providing support to these students. These activities involve the development and management of strategic partnerships with leading international universities whereby international students may study for part of their degree in their home country.

The activities of the IPO as a whole, which also include continued facilitation of internships for recent international business graduates as well as the maintenance of close working relationships with regional government and business organisations, play a key role in building the regional and national skilled worker capacity essential for global competitiveness.

Further information may be obtained by contacting the International Programs Office by telephone at (709) 864-7659 or through the website at www.business.mun.ca/international/.

11.16 The J.R. Smallwood Foundation for Newfoundland and Labrador Studies

www.mun.ca/smallwood/

Board of Directors

Dean of Arts - Virtute Officii

Loomis, Dr. C., Vice-President (Research)

Byrne, Dr. P., Director

Cullum, Dr. L., Department of Sociology

Dunn, Dr. C., Department of Political Science

Gordon, Dr. K., Department of Anthropology

Lockett, Dr. C., Department of English

Riggs, Mr. B., QEII Library

Simms, Dr. A., Department of Geography

Webb, Dr. J., Department of History

Purpose And Mandate

The Smallwood Foundation was established with funds transferred in trust from the J.R. Smallwood Heritage Foundation. The Foundation administers the income from such funds for the promotion and support of research focussing on Newfoundland and Labrador. The board supports research proposals in the humanities and social sciences from both inside and outside the university community.

Organization

Effective September 1, 2006, the Executive Committee of ISER also serves as the Board of Directors of the J.R. Smallwood Foundation. In accordance with its mandate, the board awards grants to individual scholars and organizations which have clearly defined objectives and which serve to develop the academic understanding and general appreciation of the province's society, history and culture. Full details of grant categories and application procedures are available on the Foundation's web site at www.mun.ca/smallwood/.

Further information may be obtained by telephone at (709) 864-8156 or in writing to The Director, J.R. Smallwood Foundation for Newfoundland and Labrador Studies, Memorial University of Newfoundland, St. John's, NL, A1C 5S7.

11.17 Labrador Institute

www.mun.ca/labradorinstitute/

Director

Chaulk, Dr. K

Associate Director

MacDonald, M.

Administrative Staff Specialist

Dickers, B.

Labrador Associate

Sparkes, Dr. R.

Program Coordinators

Pottle-Fewer, K.
Wright, J.

Purpose and Mandate

The Labrador Institute of Memorial University of Newfoundland was established by the University to stimulate, coordinate, and support major University projects and programs designed to promote the well-being of the people of Labrador and to expand the Labrador knowledge base. Its location in Happy Valley-Goose Bay affords it a perspective on regional and aboriginal needs and issues that direct the operations of the Institute. The Institute identifies opportunities in research where the capabilities of the University may enhance our knowledge of Labrador and address concerns of the community, and puts forward educational needs for continuing human resource and cultural development.

The Institute is the main contact point for the University in Labrador and maintains communications with aboriginal and community groups and the Faculties and Schools of the University to ensure that there is a timely response to research and educational opportunities.

The Institute facilitates and coordinates the activity of personnel at the University as they undertake cultural, research, and educational activities. It partners with Faculties and Schools to solicit funds for research and the delivery of educational programs, and with other social, cultural and educational institutions in Labrador. A Labrador based archive provides a reference collection of publications on Labrador and other northern regions for public use.

The Labrador Institute works with the Office of Research which acts as the agent within the University to receive and disburse Northern Scientific Training Program grants received from the Department of Indian Affairs and Northern Development. The Institute also serves as the University's representative on the Association of Canadian Universities of Northern Studies and supports the University's membership in the University of the Arctic.

The Institute is not a regulatory body but it is available to advise on the normal process of grant applications by individuals. The Institute recommends that notice or copies of such applications be filed with the Institute to obviate duplication of effort within the University. It also maintains and administers an invaluable archival collection of Labrador materials. It is the Institute's intent to collect and disseminate all pertinent copies of research conducted by or through the University.

Organization

The Director of the Labrador Institute reports to the Vice-President (Academic).

The Advisory Board, comprised of Labrador residents, has both geographic and aboriginal representation appointed by the Vice-President (Academic). The Board provides direct input from the community and offers advice on how the University can serve the needs of Labrador.

Further information may be obtained by contacting the Institute in writing to the Labrador Institute, P.O. Box 490, Station B, Happy Valley-Goose Bay, NL, A0P 1E0, or by telephone at (709) 896-6210, or by fax at (709) 896-2970.

11.18 Maritime History Archive

www.mun.ca/mha/

Chair, Board of Directors

Handcock, Dr. W.G. [Retired]

Board Members

Burton, Dr. V., Department of History
Fischer, Prof. L., Department of History
Hart, A. [Retired]
Staveley, Dr. M., Department of Geography [Retired]
Wareham, H., Archivist

In 1986 the Maritime History Archive was established as a separate unit within the Faculty of Arts as a result of reorganization of the Maritime History Group. Its functions include the acquisition, organization, and preservation of materials relating to the history of sea-based activities and societies, with a special emphasis on the North Atlantic Basin.

Since the mid-1970's the Public Record Office, London, England has transferred 22,000 ft. of original documentation in the series "Agreements on Account of Crew" for the period of 1863-1938, 1951-1976 to the Maritime History Archive. These documents represent an incomparable source for the study of the movements and manning of British Empire vessels throughout the world. Combined with collections relating to fisheries, commerce, and other sea-based activities, the crew agreements have made the Maritime History Archive an internationally known resource centre for the study of maritime history.

The Archive is housed in the Mathematics Building and is open to the public Monday through Friday, 9 a.m. to 1 p.m. and 2 p.m. to 4:00 p.m. A research service (for a fee) to undertake small research projects and answer queries pertaining to its subject area is also available.

11.19 The Maritime Studies Research Unit (MSRU)

www.mun.ca/msru/about/

Wareham, H., Maritime History Archive

The Maritime Studies Research Unit (MSRU) is a research unit within the Faculty of Arts, whose purpose is to foster interdisciplinary research on maritime studies, understood as the interpretation of human behaviour in marine and coastal environments, in the past and to the present day. The Unit furthers this objective with workshops, colloquia, publications, and research projects and by providing advice and support to other units within the University. Membership in the MSRU is open to faculty and staff of Memorial University of Newfoundland with research interests in maritime studies. Other scholars with parallel interests, including graduate students in the University's Faculty of Arts, are eligible for associate membership. Currently, the MSRU has associate members in Canada, England, Nigeria, Scotland and the United States.

11.20 Memorial University of Newfoundland Botanical Garden

www.mun.ca/botgarden/

Staff

vacant, Director
Bishop, M.A., Acting Manager, Research Liaison
Boland, J.T., Research Horticulturist
Cooper, J., Gift Shop Manager/Membership Co-ordinator
Madden, A.M., Interpretation Co-ordinator
Owens, P.R., Grounds Maintenance Worker
Smith, S., Special Projects Co-ordinator/Board Liaison
Walsh, T.G., Nursery Manager
White, C.P., Head Gardener
Williams, L.J., Grounds Maintenance Foreman

Memorial University of Newfoundland Botanical Garden, Mount Scio Road, comprises ten acres of cultivated gardens and 100 acres of natural habitat that includes the 14-acre Oxen Pond. The main objectives are to undertake and provide opportunities for biological, ecological, and horticultural education and research for the University, the general public, school children and other organized groups while stimulating public interest and enjoyment of the Newfoundland and Labrador flora, fauna and environment.

An interpretative program is designed to provide information on native plants, animals, and horticulture to community groups and the general public, including a curriculum based school program. A field centre houses indoor displays, a library, a tea room, and a lecture room. Numerous interpreted nature trails are maintained through a variety of natural habitats. Cultivated areas include the rock garden, peat beds, woodland beds, cottage garden, heritage garden, wildlife garden, shade garden, vegetable garden, and herbaceous border.

Research activities include rare plant conservation, site restoration, invasive species, non-timber forest products, medicinal and ornamental plant research and development.

The Memorial University of Newfoundland Botanical Garden is available for university classes and research year-round. It is open to the public daily from May through November. Further information may be obtained through the website at www.mun.ca/botgarden/.

11.21 Newfoundland and Labrador Centre for Applied Health Research (NLCAHR)

www.nlcahr.mun.ca

Director

Bornstein, Dr. S., B.A. *Toronto*, M.A., Ph.D. *Harvard*

The Newfoundland and Labrador Centre for Applied Health Research (NLCAHR) was established in September 1999 as a joint venture of the Department of Health and Community Services, the Health Care Corporation of St. John's and Memorial University of Newfoundland. Since its inception, the Centre has provided support for applied health research in the province through its grant and awards programs, its knowledge transfer activities and its capacity development services.

NLCAHR's mission is to contribute to the effectiveness and efficiency of the health and community service system of Newfoundland and Labrador and to the physical, social, psychological health and well-being of the province's population by supporting the development and the use of applied health research in this province

The Centre's work revolves around three principal goals:

1. to help build human capacity and organizational resources for undertaking and supporting high-quality applied health research in the province;
2. to increase the amount and impact of high-quality applied health research undertaken on the priority research themes of Newfoundland and Labrador; and
3. to help increase the effective use of research evidence in the province's health and community services system.

NLCAHR fosters and supports inter-disciplinary collaboration and serves as a bridge between researchers and decision-makers in government, the provincial healthcare system and community organizations. The Centre funds health research through annual peer-reviewed research grant competitions; supports research training by awarding fellowships at the master's, doctoral, and postdoctoral levels; and runs a number of other programs to encourage and support applied health researchers in Newfoundland and Labrador. The Centre's flagship knowledge exchange program, the Contextualized Health Research Synthesis Program (CHRSP), is a collaborative effort of researchers and health system leaders that seeks to identify urgent issues involving health services and health technologies that are of pressing interest to Newfoundland and Labrador. CHRSP teams work to identify the highest quality research on these issues and to interpret it in light of the unique geographic, economic, demographic and other characteristics of this province.

The research supported by the Centre is broad in scope and includes research in the areas of health services delivery and evaluation, health economics and policy, healthcare utilization and systems, community and population health, health-related social sciences, and applied clinical research focussing on the process of delivering care rather than therapeutics or diagnostics.

Further information may be obtained by contacting the Centre in writing to the Newfoundland and Labrador Centre for Applied Health Research, Suite 300, 95 Bonaventure Avenue, St. John's, NL, A1B 2X5, or telephone at (709) 777-6993, or fax at (709) 777-6734, or e-mail at nlcahr@mun.ca, or through the website at www.nlcahr.mun.ca.

The *Newfoundland Quarterly*, a journal established in 1901, focuses on the arts, culture, history, industry and people of Newfoundland and Labrador. This journal is published by the *Newfoundland Quarterly* Foundation Board, a not-for-profit charitable foundation. Owned by Memorial University of Newfoundland, the *Newfoundland Quarterly* features contributions from the province's top writers and visual artists as well as writings by our most prominent people. Many contributors have a presence on the national and international stage. The *Newfoundland Quarterly* can be contacted by telephone at (709) 864-2426, or by email at nfq@mun.ca, or through the website at www.newfoundlandquarterly.ca.

11.23 Ocean Engineering Research Centre (OERC)

www.engr.mun.ca/oerc/index.php

Administration

Qiu, W., B.Eng., M.A.Sc. *Dalian University of Technology*, Ph.D. *Dalhousie*, P.Eng., Associate Professor, Ocean and Naval Architectural Engineering; Acting Director

Engineering Technologist

Clarke, T.

Scope And Objectives

The Ocean Engineering Research Centre (OERC) is an integral part of the Faculty of Engineering and Applied Science at Memorial University of Newfoundland and has contributed to the success of the Faculty's research and academic programs.

The overall goal of the OERC is to generate research activity that has high potential for impact. The OERC draws upon faculty expertise and its relationships with industry, other research institutes, and branches of government to create networks of people who share common goals. The scope of applied research and consulting activities carried out by members of the OERC is broad, including ocean engineering related to the offshore, marine transportation, and fishing industries. In addition to faculty experience, the OERC operates a 58 metre long towing tank with wave generation capabilities.

Organization

The St. John's marine research community is vibrant and collaborative. Within the University the Centre maintains ties with C-CORE (by joint appointments of faculty and collaborative projects), with the Ocean Science Centre and the Fisheries and Marine Institute. Similar ties are maintained with the Institute for Ocean Technology (IOT) of the National Research Council (NRC), which is located adjacent to the Faculty of Engineering and Applied Science on the University campus. The Centre collaborates with and serves various small and large private sector firms with ocean engineering interests. The Centre works with Oceanic Consulting Corporation to provide marine performance evaluation services to the world's oceans industries. An alliance between the University, NRC and Marineering Limited of St. John's, Oceanic uses the ocean engineering capabilities and facilities of the University and NRC to support clients and projects around the world.

11.24 Ocean Sciences Centre (OSC)

www.mun.ca/osc/Home/

Director

Fletcher, G.L., B.Sc. *British Columbia*, Ph.D. *California*; Professor Emeritus; Head, Department of Ocean Sciences

Facilities and Business Manager, Dr. Joe Brown Aquatic Research Building (JBARB)

Boyce D., B.A., M.Sc. *Memorial*

The Ocean Sciences Centre (OSC) is a major facility for marine research on the Atlantic coast, and is one of Canada's largest marine laboratories. It houses the Department of Ocean Sciences, the Joe Brown Aquatic Research Building and the soon to be completed Cold-ocean Deep-sea Research Facility. The OSC provides Canadian and international scientists and students access to the flora and fauna of the northwest Atlantic Ocean and is uniquely suited for shore-based studies of cold-ocean processes and subarctic, Arctic and deep-sea organisms. The facility provides all the necessary elements to conduct first-rate marine science, including high quality seawater, equipment to collect and maintain aquatic organisms, boats and vehicles to access field sites, laboratory space with running seawater, cutting-edge analytical and molecular biological instruments, and support staff. A strategic goal of the OSC is to carry out world-class research that focuses on organisms and processes in cold oceans, and to provide high quality educational and training opportunities, particularly at the graduate level.

Located at Logy Bay, 10 km from the St. John's campus, the OSC has an excellent unpolluted sea water supply that is the lifeline of the centre. There are 38 laboratories of varying size, 24 of which have flowing seawater and 14 of which are dry and house instruments for analytical chemistry, biochemistry, physiology, histology, molecular biology (genetics and genomics) and microscopy. There are eight cold rooms for controlled physiological experiments and common-use rooms for fish sampling, microscopy/ image analysis, high-speed centrifugation, radioisotope analyses, histological preparation and histochemistry, and molecular biology. Field Services maintains a variety of Scuba gear for coldwater year-round diving, benthic trawls and drags, seines, plankton nets, Niskin bottles, CTD, underwater

video camera and a portable air compressor and generator. The unit operates a 4 m zodiac, 7 m Boston Whaler and 5 ton multi-purpose vehicle with aeration and recirculating seawater holding tanks (2500 L) suitable for transporting live specimens long distances.

The common use Image and Data Analysis Facility provides for image acquisition/analysis using analogue and digital media, microscopy, data backup and video production. There are also well equipped machining, woodworking, plumbing, and electronics workshops with dedicated personnel.

The Dr. Joe Brown Aquatic Research Building (JBARB) provides state-of-the-art facilities and world class staff with expertise to support research, training, pre-commercial production, and small-scale commercial trials in marine aquaculture. A critical component of the 1400 square meters facility is a seawater system designed to deliver high quality, temperature controlled, flow through water. Separate tanks and rooms are available for broodstock conditioning, paired mating, hatchery rearing, first feeding/nursery operations, grow-out and physiological investigations on marine finfish. The JBARB carries out research in collaboration with Memorial University of Newfoundland, and government and industry partners. The aquaculture potential of various finfish species (Atlantic cod, Atlantic salmon, Arctic char, Steelhead trout, cunners, and smaller flounder species) is being evaluated through the study of broodstock biology, physiology and genomics, and the development of larval rearing techniques.

Research Themes

physiology, biochemistry and molecular biology
marine biotechnology
biological and chemical oceanography
behavioural and population ecology
aquaculture and fisheries

11.25 The Works/Memorial University Recreation Complex Incorporated (MURC)

www.theworksonline.ca

Board of Directors

Thistle, B., Chairperson
Donovan, M., Vice Chair

Other members of the volunteer Board include representatives from the student body, the University, and the community at large.

Staff

Richardson, A., Director/General Manager
Beson, M., Manager of Finance
Coffey, K., Manager of Maintenance - Aquarena
Kearsey, J., Manager of Maintenance - Field House
Neil, C., Manager of Fitness and Student Services
O'Connor, J., Manager of Aquatics/Recreation

The Works

The Works is a separately incorporated entity with a volunteer Board of Directors. The Works operates the Field House, Aquarena and other recreation facilities on the St. John's campus. The facilities offer a variety of fitness, aquatics and recreation programs for all ages. The Works offers services for members of the University, including students, faculty and staff and also the community at large.

Further information may be obtained by contacting The Works by telephone at the Field House (709) 864-4422, or the Aquarena at (709) 864-3798, or through the website at www.theworksonline.ca.

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Fees and Charges

The fees and charges indicated herein are as of the date of printing. The University reserves the right to make changes to the regulations, fees and charges listed below. Any questions concerning fees and charges for the Cashier's Office in St. John's should be directed in writing to the Cashier's Office, Memorial University of Newfoundland, Arts and Administration Building, A1023, St. John's, NL, A1C 5S7, or by e-mail at cashiers@mun.ca, or by telephone at (709) 864-8228, or through the website at www.mun.ca/finance/Welcome/. Any questions concerning fees and charges for the Bursar's Office in Corner Brook should be directed in writing to the Bursar's Office, Grenfell Campus, University Drive, Corner Brook, NL, A2H 6P9, or by telephone at (709) 637-6286, or through the website at www.swgc.mun.ca/bursar/Pages/default.aspx.

2.1 Information Governing Payment of Fees and Charges

2.1.1 General Regulations

1. Tuition fees, residence fees, student union fees and health/dental insurance are due once a student registers regardless of the method of registration, and must be paid by the fee deadline to avoid a late payment penalty.
2. Students who are using a scholarship, bursary, Canada Student Loan, or other award for the payment of fees may be permitted to have their tuition fees outstanding until they have received the award or Canada Student Loan.

2.1.2 Methods of Payment

1. Cash/Debit card: must be paid in person at the Cashier's Office in St. John's or the Bursar's Office in Corner Brook.
2. Cheque: may be mailed, or delivered in person, to the Cashier's Office in St. John's or Bursar's Office in Corner Brook, or placed in the night deposit slot at the Cashier's Office in St. John's. A dishonoured charge will be made for each cheque tendered to the University and not honoured by the bank. A student with a dishonoured cheque record must pay fees by cash, certified cheque or money order.
 - Dishonoured cheque charge: \$25
3. Credit card: Visa and MasterCard are the only accepted cards. Payment using this method should be done via the web at www.mun.ca.
4. Payroll deductions: graduate students receiving funding through the University payroll system may elect to pay their tuition and other charges by payroll deduction. The policy and form for payroll deductions are available at the School of Graduate Studies, the Cashier's Office, and at www.mun.ca.
5. Student Aid: students paying fees from a Canada Student Loan will have the amount owing signed out automatically from their loans.
6. Telephone and on-line banking: information on the use of telephone or on-line banking systems can be obtained from local branches of banks.
7. Tuition voucher: students receiving a tuition voucher must present the tuition voucher and pay the balance of their fees to the Cashier's Office by the published deadlines to avoid being assessed a late payment fee.

2.1.3 Penalties for Noncompliance with Payment of Fees and Charges

1. Students who, without approval, pay their fees later than the deadlines specified in the **University Diary** will be assessed a late payment fee.
 - Late payment fee (assessed by the Director of Financial and Administrative Services): Maximum of \$75
2. Students who have not paid all fees or arranged for fee payment with the Director of Financial and Administrative Services prior to the first day of lectures, as stated in the **University Diary**, may have their registration cancelled at the discretion of the University. Such students will then be required to reregister after all fees are paid and after the first day of lectures, as stated in the **University Diary**, but no later than the end of the regular registration period.
3. Outstanding accounts, including accounts outstanding pending the receipt of a scholarship, bursary, or similar award, must be paid in full by cash, money order, or certified cheque. Students with outstanding accounts will:
 - be ineligible to register for courses for a subsequent semester;
 - not be permitted into residence;
 - not be issued an academic transcript;
 - not be awarded a degree, diploma or certificate.
4. Accounts outstanding on the last day of examinations in a semester/session will be charged interest at the prime interest rate less 1.8% per annum. Such interest will apply effective the first day of lectures in that semester.

2.2 Application and Admission Fees

Unless otherwise noted, these application and admission fees are non-refundable.

2.2.1 Undergraduate Students

1. University Calendar fee: a University Calendar will be supplied free to undergraduate students newly admitted to the University.
 - University Calendar fee for others: \$5
2. General Application Processing Fee: this fee is payable with each application for admission or readmission to the University.
 - Undergraduate students who have never attended a post-secondary institution or who have previously attended Memorial, excluding medical students: \$50
 - Undergraduate students who have attended a post-secondary institution outside of Newfoundland or who are non-Canadian

applicants, excluding medical students: \$100

- Medical students: \$75
3. Fees in addition to General Application Processing Fee
 - Challenge for credit is charged at one half of the fee associated with the credit hour value of each course
 4. Admission Fees in addition to General Application Processing Fee
 - Bachelor of Technology: \$300
 - Bachelor of Maritime Studies: \$300
 5. Application Fee in addition to General Application Processing Fee
 - School of Pharmacy: \$75
 6. Penalties for Noncompliance with Payment of Application and Admission Fees
 - Late fees: all late fees are payable when assessed.
 - **Late application fee**
Up to one week after deadline: \$30
Each subsequent week to final date for receipt of applications: \$10

2.2.2 Graduate Students

1. Application Processing Fee: payable with each application for admission to the University.
 - Application Processing Fee for Canadian Applicants: \$50
 - Application Processing Fee for non-Canadian Applicants: \$100

2.3 Tuition and Related Fees

2.3.1 Undergraduate Students (other than Medical Students)

1. Unless otherwise specified, tuition fees are charged according to the credit hour value associated with the registered course(s). Courses are 3 credit hours unless otherwise indicated.
2. For the purposes of calculating tuition:
 - the credit hour value of each of the A and B components of a linked course shall be equivalent to one half of the credit hour value of the B component (see **Glossary of Terms Used in the Calendar**);
 - the credit hour value of F courses and non-degree courses (i.e. certificate programs) shall be three; and
 - the credit hour value of courses with "W" in the final position of the course number, excluding co-operative education work terms, shall be three.
3. Fees for citizens of Canada and permanent residents
 - Fee per credit hour: \$85
 - Co-operative education work terms: \$323
 - Maritime Studies/Technology Management 4100 and Maritime Studies/Technology Management 4200: \$1,154
 - Computer Science 3700 (per semester): \$154
4. Fees for international students
 - Fee per credit hour: \$293.33
 - Co-operative education work terms
Students entering September 2003: \$1,020
Students entering prior to September 2003: \$840
 - Maritime Studies/Technology Management 4100 and Maritime Studies/Technology Management 4200: \$1,779
 - Computer Science 3700 (per semester): \$533.32
5. Tuition refunds based on withdrawal from course(s)
 - Students dropping courses within two weeks following the first day of lectures in any semester will not be liable for tuition fees for those courses. Students dropping courses after that time will receive tuition fee refunds on a prorated basis. Any student who drops a course from two weeks to three weeks following the first day of lectures in any semester shall have 50% of the tuition refunded. Any student who drops a course from three weeks to four weeks following the first day of lectures in any semester shall have 25% of the tuition refunded. No tuition will be refunded for courses dropped after four weeks following the first day of lectures in any semester. For the actual dates relating to these refunds, see the **University Diary**.
 - In the case of sessions, accelerated courses and courses offered outside of the normal time frame of a semester or session, the tuition refund drop periods will be prorated accordingly.

2.3.2 Undergraduate Students (Medical Students)

1. Fees for citizens of Canada and permanent residents
 - Annual tuition fee (September 1 - \$3,125, January 1 - \$3,125): \$6,250
2. Fees for international students
 - Annual tuition fee: \$30,000

2.3.3 Graduate Students

1. Fees are payable at the time of registration. All graduate students must be registered in each semester of the three-semester academic year throughout the period of their program until all academic requirements for the degree have been met and they have been deemed eligible to graduate by the School of Graduate Studies. Final dates in each semester for notification of completion of academic requirements, in order to be deregistered from Graduate Registration 9000/Medicine 9900 without incurring liability for continuance fees, are included in the **University Diary**.
2. There is a minimum fee for all graduate degrees. The amount of this fee for both Canadian and international students will depend on

the semester fees in effect during his or her period of registration. Semester fees are subject to review at least annually. They are:

Program	Fee Per Semester for Citizens of Canada and Permanent Residents	Fee Per Semester for International Students	# of Semesters Fee Must Be Paid
Masters candidate:			
Plan A	\$733	\$953	6
Plan B	\$486	\$632	9
Plan C	\$1,010	\$1,312	3
Master of Science in Medicine (Applied Health Services Research)	\$2,000	\$2,000	6
Graduate Diploma Candidate	\$323	\$420	9
Doctoral program candidate (for students admitted prior to September 1, 2004)	\$911	\$1,183	9
Doctoral program candidate (for students admitted after September 1, 2004)	\$683	\$887	12

3. M.D.-Ph.D program:
 - M.D. component - standard M.D. fees for four years
 - Ph.D. component - standard Ph.D. fees plus continuance fees, if required, during the active Ph.D. component
4. At the time of first registration, each masters's candidate must select a payment plan. The fee payable in the first and subsequent semesters will depend upon the payment plan selected. Once selected, the payment plan will remain in effect for the duration of the student's period of registration, and cannot be changed. Payment Plan C is available for selected programs only.
5. A student who completes his or her program in a period of time shorter than that covered by the selected payment plan will, in his or her final semester be required to pay the difference between the product of the semester fee in effect in that final semester and the number of times which a fee should have been paid in accordance with the payment plan selected, and the actual amount paid.
6. A student whose program extends beyond the period covered by the selected payment plan will be assessed the appropriate program continuance fee for each additional semester of registration. Continuance fees will be charged until the program is complete.
7. The program continuance fees per semester for citizens of Canada and permanent residents entering prior to September 2004 are:
 - Masters candidate: \$334
 - Graduate Diploma candidate: \$162
 - Doctoral candidate: \$570
8. The program continuance fees per semester for citizens of Canada and permanent residents, and international students entering September 2004 are:
 - Masters candidate: 8.15% of the total program fee for Plan A
 - Graduate Diploma candidate: 8.15% of the total program fee
 - Doctoral candidate: 8.15% of the total program fee
9. The program continuance fees per semester for international students entering prior to September 1, 2004 are:
 - Masters candidate: \$434
 - Graduate Diploma candidate: \$210
 - Doctoral candidate: \$741
10. Any doctoral student engaged in a double degree program through a cotutelle agreement will be required to register at both Memorial University of Newfoundland and the cooperating institution for the duration of his/her program. Tuition fees are payable at only the 'home institution' i.e. the institution to which the doctoral student was initially admitted, as specified in the cotutelle agreement.
11. The semester fees listed above cover only the courses (if any) prescribed for the program by the academic unit and approved by the Dean of Graduate Studies. A student taking courses which are not part of the approved program must pay for them separately in accordance with the fee schedule for undergraduate courses.
12. A graduate student who is permitted by the Dean of Graduate Studies to transfer from a diploma program to an allied master's program or from a master's program to a doctoral program before the former is completed will be required to pay the difference between the fees for the two programs, based on the semester fee in effect during each semester of the new program. This additional payment shall be made over the duration of the remaining semesters for which program fees are owed, or over three semesters, whichever is greater.
13. A graduate student who wishes to withdraw from his or her graduate program must inform the Dean of Graduate Studies, in writing, within three weeks after the first day of lectures in the semester. Failure to do so will result in the student being held responsible for the fees due to the end of that semester. Administrative fee for approved retroactive requests for leave of absence or withdrawal from program: \$25
14. Where a thesis is required by a particular degree or program, a fee will be charged to cover the cost of binding two copies of the thesis.
 - Thesis binding fee: \$20
15. Special Fees: In addition to the semester fees, the following programs charge a special fee:
 - Doctor of Philosophy in Management
\$12,000: \$1,000 to be paid in each of twelve consecutive semesters
 - Master of Applied Science in Computer Engineering (Plan A)
Canadian: \$15,302 - charged \$9,951 in semester 1 and \$5,321 in semester 2
International: \$20,282 - charged \$12,969 in semester 1 and \$7,313 in semester 2

- Master of Applied Science in Environmental Systems Engineering and Management (Plan A)
Canadian: \$11,602 - charged \$7,761 in semester 1 and \$3,841 in semester 2
International: \$16,282 - charged \$10,569 in semester 1 and \$5,713 in semester 2
- Master of Applied Science in Oil and Gas Engineering (Plan A)
Canadian: \$11,602 - charged \$7,761 in semester 1 and \$3,841 in semester 2
International: \$16,282 - charged \$10,569 in semester 1 and \$5,713 in semester 2
- Master of Education (Information Technology)
\$2,550: \$1,275 charged in semester 1 and \$1,275 charged in semester 4
- Master of Engineering Management (Plan A)
Canadian: \$11,602 - charged \$7,761 in semester 1 and \$3,841 in semester 2
International: \$16,282 - charged \$10,569 in semester 1 and \$5,713 in semester 2
- Master of Nursing (Nurse Practitioner Option)
\$12,813: charged in semester 4 for students on Plan A and semester 7 for students on Plan B
- Master of Public Health
\$1,460: charged \$730 in semester 1 and \$730.00 charged in semester 2
- Master of Technology Management
\$4,602: \$2,301 charged in semester 1 and \$2,301 charged in semester 2
- Post-Master of Nursing (Nurse Practitioner) Diploma
\$12,813: charged in semester 1

2.3.4 Post-Graduate Residents and Interns

- Registration fee per annum: \$500

2.3.5 Lifelong Learning

1. Diploma in Information and Communication Technology Students
 - Option 1: Full-time and includes a work term (payable over three consecutive semesters): \$15,000
 - Option 2: Full-time without a work term (payable over three consecutive semesters) \$5,000, \$5,000, and \$3,000: \$13,000
 - Option 2: Part-time without a work term (payable over seven consecutive semesters): \$10,000
 - Repeat Course fee: \$295 per credit hour
 - Program Continuance Fee for full-time students who do not complete the program in the normal program period: \$352

2.3.6 Distance Education, Learning and Teaching Support (DELTS)

1. For distance education courses, there are administrative fees which are charged in addition to the tuition fees for these courses. These fees cover the cost of course materials (excluding textbooks), rental of video and audio tapes and management of web courses.
 - Administrative fees (per credit hour for Newfoundland and Labrador addresses): \$17
 - Administrative fees (per credit hour for out of province addresses): \$34
 - Change of examination location fee: \$50
 - Deferred examination fee: \$65

2.4 Residence (Housing) and Meals Fees and Charges

2.4.1 St. John's Campus

For additional information on residences see the section of the Calendar dealing with Student Housing.

1. General Residence Fees: this fee will not be refunded and will not be credited to the student's account.
 - Residence application fee: \$20 per semester
2. Residence deposit: \$500
3. Residence fees during semesters: the fees and charges below are per semester, per person, unless otherwise noted. For further information, contact Student Housing and Food Services.
 - Paton College
 - Double: \$1,087
 - Single: \$1,328
 - Meal Plans
 - 19 meals per week: \$2,171
 - 14 meals per week: \$2,081
 - 10 meals per week: \$1,926
 - Burton's Pond Apartments
 - Single: \$1,522
 - Family Unit (per month, per apartment): \$795
4. Residence fees between semesters: students who request to stay in residence between semesters may be accommodated providing space is available and notice is given in writing to Student Housing and Food Services. Students are required to pay the full charge on receipt of notification of acceptance.
 - Room rates (per night, per person)

- Paton College and Burton's Pond Apartments: \$11
5. Penalties for noncompliance with payment of fees and charges
 - Students with outstanding fees will not be permitted into residence without approval from the Director of Financial and Administrative Services.
 - Students not returning to residence must cancel a room assignment by the established deadline date. Failure to do so will result in a cancellation charge.
Cancellation charge: \$500

2.4.2 Grenfell Campus

The fees and charges below are per semester, per person, unless otherwise noted.

1. General residence fees: this fee will not be refunded and will not be credited to the student's account.
 - Residence application fee: \$20
2. Residence deposit: charged only to students who are applying to live in residence for the first time (due May 31 for Fall semester; November 15 for Winter semester). The deposit is creditable and may be refunded when all conditions pertaining to it are met.
 - Residence deposit: \$500
 - Cancellation fee for returning students who fail to cancel residence/chalet rooms for Fall and Winter semester: \$500.00
3. Residence fees during semesters
 - Room: \$1,264
 - Apartments
Single: \$1,472
Family Apartment (per month): \$595.00
Bachelor Unit (per semester): \$1,385
4. Residence fees between semesters: students who need to stay in residence between semesters may be accommodated providing space is available and reasonable notice is given in writing to Student Housing. Students are required to pay the full charge on receipt of notification of acceptance.
Room rates (per night, per person)
 - Apartment: \$12
 - Residence: \$10

2.5 Student Organization Fees

Student organization fees are collected by the University as a service to the student body. They are payable prior to, or at the time of, registration.

2.5.1 St. John's Campus

All fees are per semester and are compulsory unless otherwise noted.

1. Undergraduate students (full-time)
 - General fees
Student Union fee: \$41.36
Canadian Federation of Students' fee (not collected Spring semester): \$4.20
Canadian Federation of Students - Newfoundland and Labrador fee (not collected Spring semester): \$4.20
Media Fee: \$4
 - Health/Dental Plans
Students who have alternative health and dental coverage may opt out of the plan(s) by completing a Waiver of Participation form at www.munsu.ca. The deadline to opt out of the health and dental plans for any given academic year is two weeks after the first day of lectures in September. Only students who were not full time, not enrolled, or a work-term student in the Fall semester, may opt out in the Winter semester. The deadline will be two weeks after the first day of classes.
Student Health Plan: \$81
Dental Plan: \$65
2. Undergraduate students (part-time)
 - Student Union fee: \$17.73
 - Canadian Federation of Students - Provincial (not collected Spring semester): \$4.20
 - Canadian Federation of Students - Federal (not collected Spring semester): \$4.20
 - Media fee: \$4
3. Graduate students
 - Union fee: \$20
 - Canadian Federation of Students - Provincial (not collected Spring semester): \$4.20
 - Canadian Federation of Students - Federal (not collected Spring semester): \$4.20
 - Health/Dental Plans
Students who have alternative health and dental coverage may opt out of the plan(s). The deadline to opt out of the health and dental plans is three weeks after the start of class.
Drug and Health Insurance Plan fee (per annum): \$553.95
Dental Insurance Plan fee (per annum): \$196.68
4. Post-graduate residents and interns
 - Union fee (per annum): \$5

5. Nursing students (fee collected in the Fall semester)
 - Canadian Nursing Students' Association fee (full-time students, per annum): \$10
 - Canadian Nursing Students' Association fee (part-time students, per annum): \$5

2.5.2 Grenfell Campus

1. Undergraduate Students (full-time)
 - Health Plan: \$84.30
 - Dental Plan: \$55.50
 - Student Union fee: \$65
 - SUB. Fund: \$5
 - Canadian Federation of Students - Newfoundland and Labrador fee (not collected Spring semester): \$4.08
 - Canadian Federation of Students' fee (not collected Spring semester): \$4.08
2. Undergraduates (part-time)
 - Union fees: \$32.50
 - Canadian Federation of Students - Newfoundland and Labrador fee (not collected Spring semester): \$4.08
 - Canadian Federation of Students' fee (not collected Spring semester): \$4.08

2.5.3 International Student Health Insurance (varies from year to year)

1. All students (undergraduate and graduate) studying on a student visa at Memorial University of Newfoundland will be required, as a condition of registration, to purchase health insurance. Such students should check with the International Student Advisor for the current rate.

2.6 Fees and Charges Pertaining to Appeals

2.6.1 Challenge for Credit Fee

- Fee: one half of the fee associated with the credit hour value of the course

2.6.2 Supplementary Examination Fee

- Fee: \$50

2.6.3 Reread of Final Examination Fee

- Fee: \$50

2.7 Miscellaneous Fees and Charges

2.7.1 Recreation Fee (The Works)

Students must pay a recreation fee which will be adjusted according to the Consumer Price Index (CPI) on September 1 of each year.

- Fee (St. John's Campus and Fisheries and Marine Institute)
- Per semester: \$54.80
- Per session: \$27.40

2.7.2 Student Parking Fees

Students may purchase permits on a semester or per annum basis.

- Per semester: \$13.80
- Per annum: \$41.40

2.7.3 Books and Supplies

1. Students should be prepared to meet an expenditure to cover the cost of textbooks and supplies each semester. Students should consult their professors before purchasing any new or used textbooks or laboratory manuals.

2.7.4 Damages or Destruction to University Property

1. Unwarranted damages or destruction to University property will be charged to the responsible party or parties, and are payable when assessed.

2.8 Appeal of Fees and Charges Regulations

Appeal of Fees and Charges Regulations apply to **Undergraduate Students (other than Medical Students), 5. only**. It is intended to recognize and be sensitive to students who experience devastating, unforeseen and/or catastrophic events during the semester and therefore withdraw from a course or courses. Students are permitted to appeal for refund of tuition associated with dropped course(s) only, not for refund of incidental fees including, but not limited to, medical/dental coverage, MUNSU fees, recreation fees, etc.

2.8.1 Responsibilities in the Tuition Refund Appeals Process

The University has established financial regulations, procedures and deadlines through its governing bodies for the guidance of students. Students are expected to take into account their personal and academic circumstances, in order to meet university financial regulations, procedures, and to satisfy financial requirements and deadlines.

2.8.1.1 Students' Responsibilities in the Tuition Refund Appeals Process

It is incumbent upon students to:

- be aware of and adhere to all financial regulations, requirements and published deadlines, especially the refund schedule published in the University Diary;
- familiarize themselves with published tuition refund appeals procedures;
- submit tuition refund appeals and all supporting documentation no later than one month after the official release of grades for the semester of the dropped course(s); and
- provide appropriate authenticating materials.

2.8.1.2 The University's Responsibilities in the Tuition Refund Appeals Process

It is incumbent upon the University to:

- make available to students advice and guidance regarding options, deadlines, required documentation, and tuition refund appeal route by way of written notification, the University website, personal appointment or other forms of communication;
- direct students to the appropriate office for information on tuition refund appeals;
- attend to tuition refund appeals efficiently and ensure parties receive fair, consistent and ethical treatment;
- supply students with reasons for decisions to deny a tuition refund appeal; and
- maintain parties' right to confidentiality.

2.8.2 Guidelines for the Tuition Refund Appeals Process

1. Transparency should guide all steps of the tuition refund appeal process. In the case of an appeal, the parties should have access to all documents submitted.
2. The principles of fairness should be applied in appeal procedures and decisions.
3. Information submitted in support of an appeal will be kept confidential.

2.8.3 General Information and Procedures for Tuition Refund Appeals

1. A tuition refund appeal must be filed no later than one month after the official release of grades for the semester of the dropped course(s).
2. Any tuition refund appeal should be made in writing, by the student, clearly stating the basis for the appeal and should be directed to the Committee Coordinator, Tuition Refund Appeals Committee, c/o The Cashier's Office, Memorial University of Newfoundland, St. John's, NL A1C 5S7.
3. Successfully dropping a course academically does not guarantee that a tuition refund appeal will be successful. Academic difficulty in a course and/or missing a published refund deadline is not sufficient grounds for an appeal.
4. For assistance in the tuition refund appeals process, students are advised to consult with the Committee Coordinator.
5. In preparing an appeal a student may consult advisors or facilitators. Such advisors or facilitators may include a faculty advisor, staff advisor, a counselor, a representative from the Memorial University of Newfoundland Students' Union (MUNSU) or other individual who is willing to undertake the role of student advisor or facilitator.
6. The Tuition Refund Appeals Committee may decide to deny or uphold an appeal. If it upholds an appeal, the Committee may prorate the tuition refund depending upon the student's length of participation in the course(s) and other factors.
7. The decision of the Tuition Refund Appeals Committee is final.

2.8.4 Information Required for Medical Certificates

Please refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Information Required for Medical Certificates from Health Professionals.**

3 Admission/Readmission to the University (Undergraduate)

3.1 Admission/Readmission Information

This section applies to all undergraduate applicants except those applying to the Faculty of Medicine.

Applicants seeking admission to the Faculty of Medicine should refer to the **Faculty of Medicine** regulations for information.

Applicants seeking admission to a particular faculty or school may be required to submit a supplementary faculty or school application in addition to the application for admission/readmission and should refer to appropriate faculty or school regulations for procedures, deadlines, admission requirements and further information.

1. Applications for admission/readmission should be submitted by the deadline dates listed in the **University Diary**. Applications received later or post-marked later than the stated deadline dates will be processed as time and resources permit. Application forms and other information may be obtained by contacting the University in writing to the Admissions Office, Office of the Registrar, Memorial University of Newfoundland, St. John's, NL, A1C 5S7, or by e-mail at admissions@mun.ca or through the website at www.mun.ca/regoff/home/.
2. Each application must be accompanied by a \$40.00 application processing fee. An additional application processing fee of \$40.00 is required from non-Canadian applicants or applicants transferring from post-secondary institutions outside of Newfoundland and Labrador. Neither fee is refundable nor will it be credited to the applicant's financial account under any circumstances. Information regarding other fees and charges is specified under **Fees and Charges**.
3. Applicants who have previously attended Memorial University of Newfoundland and have not registered for courses for the past two consecutive semesters (Fall, Winter, Spring) are required to submit a new Application for Admission/Readmission together with the \$40.00 application processing fee.
4. The admission criteria required of each category of applicant is specified under **Categories of Applicants, Admission Criteria And Required Documentation**.
5. Admission to some courses, programs and/or the University may be limited by the University when it deems the facilities and resources available to it are not adequate to provide for additional students. Consequently possession of the minimum requirements does not guarantee that an applicant will be granted admission to a course, a program and/or the University.

6. The University may set its own matriculation examinations either in separate subjects or in all those required for matriculation, and may refuse admission to any applicant failing to attain a satisfactory standard in these examinations.
7. The University reserves the right to refuse admission to any applicant.
8. Applicants may be required to provide medical evidence of their fitness to pursue university studies.

3.2 English Language Proficiency Requirements

Since English is the primary language of instruction at this University, all applicants seeking admission to Memorial University of Newfoundland must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to provide proof of proficiency in the English language based on one of the following forms.

3.2.1 English Language Secondary Institution

Applicants are required to have successfully completed the equivalent of three years of full-time instruction in an English language secondary institution as recognized by Memorial University of Newfoundland including successful completion of appropriate course(s) in English at the Grade XII or equivalent level. English as a Second Language (ESL) courses are not acceptable for meeting this requirement.

3.2.2 English Language Post-Secondary Institution

Applicants who have attended a recognized post-secondary institution where English is the language of instruction must have successfully completed the equivalent of 30 credit hours. These 30 credit hours must include 6 transferable credit hours in English courses. For information on transfer credit refer to **Transfer Credit**.

3.2.3 Test of English as a Foreign Language (TOEFL)

A minimum score of 550 is required on the paper-based test or 213 on the computer-based test of the Test of English as a Foreign Language (TOEFL). A minimum score of 79 with at least 20 in each of Reading and Writing, and no less than 17 in Listening and Speaking is required on the internet-based TOEFL. The official results of the TOEFL must be forwarded to Memorial University of Newfoundland directly from the Educational Testing Service.

Information regarding the TOEFL program is available from the Educational Testing Service (E'S), TOEFL/TSE Services, P.O. Box 6151, Princeton, New Jersey, U.S.A., 08541-6151, from U.S. embassies or consulates, or from offices of the U.S. Information Services. The Division of Lifelong Learning at Memorial University of Newfoundland is an official E'S testing centre and may be contacted at (709) 864-7979 or online at www.mun.ca/lifelonglearning.

Applicants will be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to **English Language And Mathematics Placement Tests**.

3.2.4 Michigan English Language Assessment Battery (MELAB)

A minimum score of 85 is required on the Michigan English Language Assessment Battery (MELAB). The official results of the MELAB must be forwarded to Memorial University of Newfoundland directly from the appropriate testing authority.

Information on the Michigan English Language Assessment Battery (MELAB) testing program may be obtained from the Testing and Certificate Division, University of Michigan, 2001 North University Building, Ann Arbor, Michigan, U.S.A., 48109-1057.

Applicants will be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to **English Language and Mathematics Placement Tests**.

3.2.5 Canadian Academic English Language (CAEL) Assessment

Minimum band scores between 50 and 60 in each of the four skills tested (Reading, Writing, Listening, Speaking), with at least two band scores of 60 are required on the Canadian Academic English Language (CAEL) Assessment. The official results of the CAEL must be forwarded to Memorial University of Newfoundland directly from the appropriate testing authority.

Information regarding the Canadian Academic English Language (CAEL) Assessment may be obtained from the Ottawa Test Centre, School of Linguistics and Applied Language Studies, Carleton University, 215 Paterson Hall, 1125 Colonel By Drive, Ottawa, Ontario, K1S 5B6.

Applicants will be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to **English Language and Mathematics Placement Tests**.

3.2.6 Canadian Test of English for Scholars and Trainees (CanTEST)

Minimum band scores of 4.5 in the listening comprehension and reading comprehension sub-tests and a score of 4 in writing are required on the Canadian Test of English for Scholars and Trainees (CanTEST).

The official results of the CanTEST must be forwarded to Memorial University of Newfoundland directly from the appropriate testing authority.

Applicants will be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information contact the Department of English Language and Literature.

3.2.7 Memorial University of Newfoundland's Intensive English Program

Applicants are required to have successfully completed Memorial University of Newfoundland's Intensive English Program together with an acceptable score, as noted above, on the CAEL administered by the Department of English Language and Literature at the University.

Applicants may be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information, refer to the section of this Calendar describing the **Faculty of Arts' English as a Second Language programs**.

3.2.8 International English Language Testing System (IELTS)

A minimum overall band score of 6.5, with at least band 6 in each of Writing and Reading. The official results of the IELTS must be forwarded to Memorial University of Newfoundland directly from the appropriate testing authority.

Information regarding the IELTS may be obtained from the IELTS Subject Officer, University of Cambridge Local Examinations Syndicate, 1 Hills Road, Cambridge, CB1 2EU, U.K. or via www.ielts.org/.

Applicants will be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to **English Language and Mathematics Placement Tests**.

3.2.9 Other

Other forms of proof of English language proficiency, acceptable to the University Committee on Admissions, may be considered.

Applicants will be required to write a placement test in English language prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to **English Language and Mathematics Placement Tests**.

3.3 Categories of Applicants, Admission Criteria and Other Information

The categories of applicants applying for admission/readmission as well as the admission criteria and other related information are listed below. Before a final admissions decision can be reached all required documents must be received. All documents must be official and be forwarded directly to the Admissions Office, Office of the Registrar from the appropriate institution(s) or source(s). Photocopied documents are not acceptable unless duly certified.

3.3.1 Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador

3.3.1.1 Admission Criteria

The courses below are courses designed for students who intend to seek post-secondary education at the University or other institutions whose programs demand levels of proficiency equivalent to those required by the University. Applicants shall have completed Graduation Requirements for high school as set down by the Department of Education and obtained credits in the following subjects with an overall average of not less than 70% compiled from the grades received in those courses at the 3000 level.

- **English:** English 3201 (2 credits); or the former combination of Language 3101 (1 credit) and one of Thematic Literature 3201(2 credits) or Literary Heritage 3202 (2 credits).
- **Academic or Advanced Mathematics:** One of Mathematics 2200, 2201, 2204, or 2205 and one of Mathematics 3200, 3201, 3204, or 3205 (valued at 2 credits each).
- **Laboratory Science:** Four credits in Laboratory Science (i.e. Biology, Chemistry, Earth Systems, Physics), including at least two credits at the 3000 level chosen from one of Biology 3201, Chemistry 3202, Earth Systems 3209, or Physics 3204 (valued at two credits each). The remaining two credits may be selected from 2000-level courses in the above-noted subject areas or from Science 1206.
- **Social Science/Modern or Classical Language:** Two credits at the 3000 level in a Social Science area or in a Modern or Classical Language.
- **Electives:** Two credits at the 3000 level in elective courses chosen from the subjects above or from additional courses approved by the Department of Education for offering at the 3000 level for certificate purposes.

3.3.1.2 Other Information

- **Early Acceptance:** Applicants in their final year of high school who have completed or who are completing a slate of courses which meets the course requirements specified in **Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador**, may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are released by the appropriate authorities, that the applicant has successfully met the requirements for admission as specified above in **Admission Criteria**. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.
- **Advanced Placement:** Applicants completing Advanced Placement courses through the Advanced Placement Program offered by the College board should also refer to **Transfer Credit Advanced Placement (AP)**.
- **English Language Proficiency Requirements** will apply to all applicants.

3.3.2 Applicants Who Have Followed the High School Curricula of Other Provinces of Canada

3.3.2.1 Admission Criteria

- Applicants from other provinces of Canada are required to have successfully completed Grade XII in the University Preparatory Program (in the case of Quebec students, Secondary V Certificate) with a passing mark in each of the following Grade XII academic or advanced-level subjects and an overall average of not less than 70% compiled from the grades received in the courses selected:
 - English
 - Mathematics
 - Laboratory Science (1 of Biology, Chemistry, Earth Science, Geology or Physics)
 - Social Science/Modern Classical Language
 - Elective
- For further information concerning specific provinces, applicants may contact the University by writing to the Admissions Office, Office of the Registrar, Memorial University of Newfoundland, St. John's, NL, A1C 5S7, or by e-mail at admissions@mun.ca or through the website at www.mun.ca.

3.3.2.2 Other Information

- **Early Acceptance:** Applicants in their final year of high school who have completed or who are completing, a slate of courses which meets the course requirements in **Applicants Who Have Followed the High School Curricula of Other Provinces of Canada** may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the appropriate authorities, that the applicant has successfully met the minimum requirements for admission as specified above in **Admission Criteria**. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.
- **Advanced Placement:** Applicants completing Advanced Placement courses through the Advanced Placement Program offered by the College Board should refer to **Transfer Credit Advanced Placement (AP)**.
- Applicants seeking credit for enriched High School Grade XII courses or Ontario Grade XIII/OAJ courses should refer to **Transfer Credit Enriched Courses and Ontario Grade XIII/OAJ**.
- **English Language Proficiency Requirements** will apply to all applicants.

3.3.3 Applicants Who Have Followed the College of the North Atlantic Comprehensive Arts and Science Transition Program

3.3.3.1 Admission Criteria

Students who do not meet the requirements for admission to Memorial University of Newfoundland under one of the two categories above but who do hold a high school diploma may be eligible for admission under this category. Students applying under this category must successfully complete all qualification requirements for the award of the Comprehensive Arts and Science (CAS) Transition Year Certificate from the College of the North Atlantic. A full outline of this program is available in the College of the North Atlantic Calendar which is available online at www.cna.nl.ca.

This does not preclude the application of selective admission criteria for particular faculty/school programs. Students may wish to consider the course requirements for their intended program of study at Memorial University of Newfoundland when selecting CAS Transition Year courses for completion of the Transition Year Certificate program.

3.3.3.2 Early Acceptance

Applicants who have completed, or who are completing, a slate of courses which meets the **Admission Criteria** as described above for applicants completing the College of the North Atlantic CAS Transition Year program may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the College of the North Atlantic, that the applicant has successfully met the minimum requirements for admission as specified above in **Admission Criteria**. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked.

3.3.3.3 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

3.3.4 Applicants For Concurrent Studies

3.3.4.1 Admission Criteria

- Applicants in or about to enter their final year of high school with a superior academic record (i.e. normally an overall average of 85% or above) may apply to enrol in university courses (excluding distance education courses). The applicant for concurrent studies must be enrolled in a high school and completing a slate of courses that meets the course requirements for admission to the University as specified in **Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador**.
- Applicants will be required to submit a letter requesting enrolment in a specific course; an official high school transcript; and a letter from the high school principal or guidance counsellor clearly recommending admission for concurrent studies.
- Applicants must submit a completed application for admission/readmission together with the appropriate fee. For further information refer to **Fees and Charges**.
- An applicant for concurrent studies wishing to enrol in courses at the St. John's campus will be permitted to do so based on the recommendation of the University Committee on Admissions. Applicants wishing to enrol in courses at the Corner Brook campus will be permitted to do so based on the recommendation of the Special Admissions Committee at Grenfell Campus. Eligibility to enrol is limited to one semester but may be renewed on the recommendation of the relevant committee.
- Enrolment for concurrent studies students will normally be limited to three credit hours in a given semester. Fees and deadlines are the same as for regularly admitted students. University credit will be awarded after successful completion of the course(s) and successful completion of the requirements for admission to the University.

3.3.4.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

3.3.5 Applicants Who Have Followed the Adult Basic Education Program (ABE)

3.3.5.1 Admission Criteria

Applicants shall have completed the Level III Adult Basic Education Certificate (ABE) with the approved combination of thirty-six credits set down by the Department of Education and successfully completed, with an overall average of not less than 70%, the following courses as outlined below:

- **Communication Skills:** IC 3112 and IC 3321 **OR** English 3101A, 3101B, and 3101C
- **Mathematics:** One of the following groups:
 - Mathematics: IM 3115, 3211, 3212, 3213, and 3216 **OR**
 - Mathematics: IM 3218, 3219, and 3221 **OR**
 - Mathematics: 2104A, 2104B, 2104C, 3104A, 3104B, and 3104C
- **Science:** One of the following patterns:

- Biology: IBT 3113, 3115, 3211, 3212A/B, 3214, and 3316 **OR**
- Biology: 2101A, 2101B, 2101C, 3101A, 3101B, and 3101C
- Chemistry: ICH 3111, 3112, 3113, 3114, 3116, 3117, 3118, and 3215 **OR**
- Chemistry: 2102A, 2102B, 2102C, 3102A, 3102B, and 3102C
- Geology: IS 3212
- Physics: IP 3111, 3112, 3213, 3215, and 3216 **OR**
- Physics: 2104A, 2104B, 2104C, 3104A, 3104B, and 3104C

3.3.5.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

3.3.6 Applicants For Mature Student Status

3.3.6.1 Admission Criteria

- An applicant, 21 years of age or older within one month after the beginning of the semester or the session to which admission is being sought, who has not fulfilled the admission criteria outlined in any of the above categories may be admitted to the University with the approval of the University Committee on Admissions.
- Applicants for mature student status will be required to submit proof of age; two letters of reference from persons competent to assess the candidate's ability to proceed with university studies; a letter from the applicant outlining the grounds for requesting special consideration; and high school marks and marks from post-secondary institutions, if applicable.
- Applicants will be required to submit a completed application for admission/readmission together with the appropriate fee. For further information refer to **Fees and Charges**.
- Applicants for mature student status may be required to show through an interview that they possess the potential to proceed with university studies.
- Since admission as a mature student is not on the grounds of age alone, the University Committee on Admissions reserves the right to refuse admission to any applicant.

3.3.6.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

3.3.7 Applicants Who Are Senior Citizens

3.3.7.1 Admission Criteria

- An applicant, 60 years of age or older within one month after the beginning of the semester/session to which admission is being sought, may be admitted to the University as a senior citizen, upon submission of a birth certificate or other proof of age.

3.3.8 Applicants From Other Countries

Applicants from other countries not listed below may contact the University by writing to the Admissions Office, Office of the Registrar, Memorial University of Newfoundland, St. John's, NL, A1C 5S7, or by e-mail at admissions@mun.ca or through the website at www.mun.ca for further information.

3.3.8.1 United Kingdom - Admission Criteria

- Applicants from the United Kingdom are required to have the General Certificate of Education or the Scottish Leaving Certificate of Education with a minimum of "Ordinary" or "Lower-Level" passes in five subjects acceptable to the University Committee on Admissions.
- Applicants completing the "Higher Level" subjects of the Scottish Leaving Certificate and applicants completing the "Advanced Level" subjects of the General Certificate of Education should refer to **Transfer Credit**.
- Also refer to 2.3.7.4, **Other Information**.

3.3.8.2 Hong Kong, Malaysia, West Indies and West Africa - Admission Criteria

- Applicants from Hong Kong, Malaysia, West Indies and West Africa are required to have the General Certificate of Education with passes in five academic subjects at the "Ordinary Level" acceptable to the University Committee on Admissions.
- Applicants completing the "Advanced Level" subjects of the General Certificate of Education should refer to **Transfer Credit**.
- Also refer to 2.3.7.4, **Other Information**.

3.3.8.3 United States - Admission Criteria

- Applicants from the United States must have completed a High School University Preparatory Program (Grade XII) with a passing mark in the appropriate Grade XII course in each of the five areas listed below with an overall average of not less than 70% in the courses selected.
 - English
 - Mathematics
 - Laboratory Science (1 of Biology, Chemistry, Earth Science, Geology or Physics)
 - Social Science/Modern Classical Language
 - Elective
- Also refer to 2.3.7.4, **Other Information**.

3.3.8.4 Other Information

- **Early Acceptance:** Applicants in their final year of high school who have completed, or who are completing, a slate of courses which meets the course requirements as specified under **Applicants From Other Countries** may be granted early acceptance prior

to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the appropriate authorities, that the applicant has met the minimum requirements for admission as specified under **Applicants From Other Countries**. Applicants who fail to meet all requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.

- Applicants from other countries should submit official matriculation certificates at least two months prior to the commencement of the semester to which they are seeking admission. Certificates in a language other than English or French should be accompanied by notarized English translations.
- Applicants from other countries may be required to submit with their application, a statement of satisfactory financial resources.
- **English Language Proficiency Requirements** will apply to all applicants.

3.3.9 Applicants Transferring From Other Recognized Universities or Colleges

3.3.9.1 Admission Criteria

- The admission of applicants from other recognized universities or colleges will be subject to the regulations for **Admission/Readmission to the University** in addition to **General Academic Regulations, Regulations for Continuance and Readmission**. In order to allow sufficient time for assessment of possible transfer credit, applicants should refer to **Transfer Credit** for information on the transfer credit application and evaluation process and requirements.

3.3.9.2 Other Information

- In addition to the \$40.00 non-refundable application processing fee, a fee of \$40.00 is required of all applicants who apply for admission from post-secondary institutions outside of Newfoundland and Labrador and/or non-Canadian applicants. Neither fee is refundable nor will it be credited to the applicant's financial account in any circumstances. For further information refer to **Fees and Charges**.
- Students applying for transfer from other recognized universities or colleges shall submit their High School Diploma and official transcript(s) from all universities and colleges attended. All documents must be forwarded directly to the Admissions Office, Office of the Registrar from the appropriate institution(s). These documents must be certified and official and received in the Office of the Registrar not later than two months prior to the first day of lectures in any semester, as stated in the **University Diary**. An application is not considered complete until these documents have been received.
- Applicants transferring from other universities or colleges should also see **Transfer Credit**.
- **English Language Proficiency Requirements** will apply to all applicants.

3.3.10 Applicants Who Are Requesting Special Admission

Where circumstances warrant, applicants not meeting the regulations for **Admission/Readmission to the University** may be admitted to Memorial University of Newfoundland with the approval of the University Committee on Admissions.

3.3.10.1 Admission Criteria

- Applicants must submit a completed application for admission/readmission together with the appropriate fee. For further information refer to **Fees and Charges**.
- Applicants must submit a letter to the Committee outlining the grounds for requesting special consideration and provide a letter from a school principal, guidance counsellor, employer or other responsible person substantiating those grounds.
- In order to allow sufficient time for reasonable and consistent consideration of special cases, supporting letters must be received at least one week prior to the beginning of the semester to which admission is being sought.

3.3.10.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

3.4 English Language and Mathematics Placement Tests

In addition to the following, more detailed information regarding the English language and Mathematics placement tests is available from the Department of English Language and Literature and the Department of Mathematics and Statistics respectively.

3.4.1 English Language Placement Test

1. With the exception of applicants who demonstrate English language proficiency under the regulations, **English Language Proficiency Requirements, English Language Secondary Institution and English Language Post-Secondary Institution**, all other applicants will be required to write a placement test in English language. This test must be taken prior to the commencement of classes to determine the appropriate English course for which an applicant should register. For further information concerning English language proficiency requirements refer to **English Language Proficiency Requirements**.
2. Students whose performance in the placement test in English language indicates that appropriate placement is in English 102F will be required to register in, and successfully complete English 102F before registering in higher level courses in English.

3.4.2 Mathematics Placement Test

1. Applicants intending to register for the first time in any 1000 level mathematics course must submit a score for either an Advanced Placement Calculus Examination or other standardized tests acceptable to the Department of Mathematics and Statistics.
2. Students whose score in the Advanced Placement Calculus examination or other standardized test is not acceptable to the Department of Mathematics and Statistics will be required to register in a mathematics course determined by the Department of Mathematics and Statistics.

3.5 Transfer Credit

Applicants wishing to be considered for advanced standing or transfer credit must submit, in addition to the Application for Admission/Readmission, an Application for Transfer Credit Evaluation which can be obtained from the Office of the Registrar.

Official transcript(s) and calendar descriptions and/or outlines of courses claimed for credit are also required and should be sent directly to Memorial University of Newfoundland from the institution attended.

In order to allow sufficient time for evaluation, these documents should be received at least two months prior to the commencement of the registration period for the semester to which the applicant is seeking admission. It is the student's responsibility to provide the pertinent documents, and until they are received, the Office of the Registrar is unable to commence an evaluation or to advise students of their standing at this University.

When transfer credit is awarded for work completed at another institution, only equivalent Memorial University of Newfoundland course(s) and credit(s) are recorded on the Memorial University of Newfoundland transcript. Grades received from other institutions are not recorded nor included in averages.

Applicants who have not received the results of a transfer credit evaluation prior to the assigned registration time for the semester in which they propose to begin studies should contact the Admissions Office for further assistance.

Outlined below are the various categories for which transfer credit may be considered.

3.5.1 Advanced Placement (AP)

- Memorial University of Newfoundland may recognize for transfer credit certain courses completed through the Advanced Placement Program offered by the College Board. Award of credit for AP courses will be subject to the achievement of a minimum grade of 3 in each subject claimed for credit (in certain subjects a minimum grade of 4 may be required).
- Award of credit for AP courses will be subject to evaluation and recommendation by the appropriate University academic unit and University Regulations.
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.5.2 Enriched Courses And Ontario Grade XIII/OAJ

- Certain Grade XII enriched courses and certain Ontario Grade XIII/OAJ subjects may be recognized for introductory (normally first year) credits, where applicable, provided that the subjects claimed for credit are recommended as equivalent to Memorial University of Newfoundland courses by the relevant University academic unit(s). In addition, the applicant must have obtained an overall average in these courses of not less than 65% with a passing grade in each subject claimed for credit. Applicants who have not obtained the overall average requirement of 65% in these courses will be required to have obtained a mark of not less than 65% in individual subjects claimed for credit.
- Award of credit for Grade XII enriched and Ontario Grade XIII/OAJ courses will be subject to evaluation and recommendation by the appropriate University academic unit(s) and University Regulations.
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.5.3 Advanced Or Higher Levels

- The "Advanced Level" subjects of the General Certificate of Education will generally be accepted for credit to a maximum of 12 credit hours in each subject provided that a minimum grade of 'D' in each subject claimed for credit has been obtained.
- The "Higher Level" subjects of the Scottish Leaving Certificate will generally be accepted for credit at the first year level.
- Award of credit will be subject to evaluation and recommendation by the appropriate academic unit(s) and University Regulations.
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.5.4 International Baccalaureate Diploma

- Memorial University of Newfoundland will consider for transfer credit the "Higher Level" subjects and certain "Standard" or "Subsidiary" level subjects, provided that the subjects claimed for credit are recommended as equivalent to Memorial University of Newfoundland courses by the relevant University academic unit(s), and the candidate has achieved a minimum grade of 4 in individual subjects claimed for credit. In certain subjects a minimum grade of 5 may be required.
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.5.5 Member Institutions of the Association of Universities and Colleges of Canada (AUCC)

- All university-level course work completed by transfer students during the first two years of university study taken at universities/colleges that are ordinary members of the Association of Universities and Colleges of Canada (AUCC) will be recognized for transfer credit. In the first instance, the evaluation of such course work for appropriate credit will be conducted by University academic units. In instances where appropriate credit cannot be granted by academic units or where no University academic unit exists at this University for the evaluation of particular transfer credits, the Office of the Registrar will award the appropriate unspecified credits in an unspecified discipline.
- Applicants who have completed course work beyond the first two years of university study may be considered for further transfer credit subject to evaluation and recommendation by the appropriate academic unit(s) and University Regulations.
- The applicability of all transfer credits, whether specified, unspecified or in an unspecified discipline, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.5.6 Other Universities, Colleges and Institutes

- Memorial University of Newfoundland may recognize for transfer credit certain courses offered by the College of the North Atlantic, the Fisheries and Marine Institute of Memorial University of Newfoundland, and certain other community colleges, technical colleges, institutes and CEGEPs.
- Memorial University of Newfoundland may recognize for transfer credit certain courses offered by other recognized universities or university colleges.
- Award of credit will be subject to evaluation and recommendation by the appropriate academic unit(s) and University Regulations.
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.5.7 Caribbean Advanced Proficiency Exams

- Memorial University of Newfoundland may recognize for transfer credit certain courses completed through the Caribbean Advanced Proficiency Examinations. These examinations will generally be accepted for credit to a maximum of 12 credit hours for each 2 unit course and 6 credit hours for each 1 unit course.
- Credit will be considered on an individual basis and award of credit will be subject to evaluation and recommendation by the appropriate University academic unit(s) and University Regulations.
- The applicability of all transfer credits, whether specified, unspecified or in an unspecified discipline, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

3.6 Challenge for Credit

Memorial University of Newfoundland recognizes that some students may have achieved competence in certain subject areas through experience gained elsewhere. This experience, which may warrant consideration for academic credit at the undergraduate level, may consist of courses taken at "non-university" institutions or skills acquired from work or learning outside the university. It should be noted that challenge for credit is not offered for Work Terms or Internships.

Since course challenge is not offered by all academic units nor for all courses within a unit, students are advised to consult with the appropriate academic unit to determine whether or not a particular course is offered for challenge.

Where challenge for credit is offered, it is available under the following conditions:

1. Challenge for credit is available only to those students who have applied for admission or who are currently registered at the University.
2. Applications to challenge for credit are available at the Office of the Registrar. Completed applications must be submitted to the Office of the Registrar and must receive approval from the head of the academic unit offering the course(s). The academic unit may require documentary material from the student and/or an interview before making its decision whether or not to accept the challenge. The academic unit involved will be responsible for deciding the scheduling and appropriate method of evaluation, which may consist of a variety of possible modes of evaluation including written, practical and oral.
3. A student who has applied for transfer credit evaluation may not apply to challenge for credit until the transfer credit evaluation has been completed.
4. Memorial University of Newfoundland will consider for credit courses that have been granted credit through a challenge for credit process by another recognized university or college. Award of credit will be subject to University Regulations and evaluation and recommendation by the appropriate academic unit(s).
5. For the purpose of satisfying the regulations residence requirements for a first degree and residence requirements for a second degree under **General Academic Regulations (Undergraduate)**, a successful challenge for credit shall be considered the equivalent of a transfer credit and shall be recorded on the transcript as a pass (PAS). Challenge grades are not included in averages. For further information refer to **Residence Requirements for a First Degree** and **Residence Requirements for a Second Degree**.
6. The appropriate fee must be paid at the time of application. For further information refer to **Fees and Charges**. If the application is accepted for consideration, the fee is not refundable nor is the student permitted to withdraw the challenge.

4 Academic Advising

During their period of study at the University, students are expected to make some very important academic decisions, the consequences of which can significantly affect the course of their academic careers. While the responsibility for making these decisions rests with students individually, they are not expected to make such decisions without access to sound academic advice.

Students should seek advice on matters such as course selection, registration, dropping/adding course registrations, selecting/changing an academic program, entrance requirements for degree programs and interpretation of university regulations. It is especially true that students in the early stages of their degree program should seek academic advice.

Students who are considering enrolling at the University or who are in their first year of study at the University or who have not declared an academic program can obtain academic advice from the following sources: those students attending the St. John's Campus should contact the Academic Advising Centre, Office of the Registrar, located in the Science Building room SN 4053, at (709) 864-8801; those students attending the Grenfell Campus should contact the Manager, Academic Advising at the Office of the Registrar, located in the Arts and Science Building in room AS 270, at (709) 637-6298.

Students beyond their first year who have declared their major or have been accepted to a School or Faculty can obtain academic advice from a faculty adviser assigned by their School/Faculty/Department. Students should contact the head of the relevant academic unit to be assigned a faculty adviser.

Students are also encouraged to approach their professors for academic advice or for referral to the appropriate source of advice.

While it is the responsibility of students to see that their academic programs meet regulations in all respects, academic advice is provided as a service of the University.

5 General Academic Regulations (Undergraduate)

Memorial University of Newfoundland is governed by the principles of fairness, academic integrity and the timely provision of information and by regulations whose purpose is to ensure fair and equitable treatment for the entire University community. Some regulations deal with the normal workings of the University (continuance, registration deadlines, etc.) and pertain to all undergraduate students. Other regulations, however, especially those concerned with classification of degrees and academic conduct, apply to certain students in certain specific situations.

The Office of the Registrar will assist students with any questions or problems which arise concerning the interpretation of regulations. It is, however, the responsibility of the student to see that his or her program meets University regulations in all respects. Every student has the right to request waiver of **General Academic Regulations (Undergraduate)**. In addition, every student has the right to appeal decisions resulting from a request for waiver of **General Academic Regulations (Undergraduate)**. For further information refer to **Waiver of Regulations** and **Appeal of Regulations**.

Descriptions and regulations for individual programs can be found in the appropriate academic-unit section of this Calendar. The terminology is explained in the **Glossary of Terms Used in This Calendar**.

5.1 Classification of Students

1. Full-time students:

- a. Students who have been admitted to this University and who are registered for the duration of any semester in at least 9 credit hours or at least 5 credit hours in a session are deemed full-time students.
 - b. Notwithstanding the above and the regulations governing the Marine Institute technology diploma programs, students who have been declared as pre-Bachelor of Technology or pre-Bachelor of Maritime Studies are deemed full-time students if they are registered for either: three non-degree courses and a minimum of 3 degree credit hours, or two non-degree courses and a minimum of 6 degree credit hours.
 - c. Students who are registered for the duration of any semester in a co-operative education work term, the internship required of the Computer Industry Internship Option (CIIO), or the Structured Practice Experience required of the School of Pharmacy will be deemed full-time students.
 - d. Provided they had been admitted to the University, the members of the Executive of the Memorial University of Newfoundland Students' Union (MUNSU), the Grenfell Campus Student Union (GCSU) and the Marine Institute Student Union (MISU) shall be deemed, for the purpose of membership on University committees, the Senate and the Board of Regents, to be full-time students during their tenure.
2. **Part-time students** are students who have been admitted to the University and who are registered for fewer than 9 credit hours in any semester or fewer than 5 credit hours in any session.
 3. **First-year students** are students who have earned fewer than 18 credit hours.
 4. **Second-year students** are students who have earned from 18 to 47 credit hours inclusive.
 5. **Third-Year Students** are students who have earned from 48 to 77 credit hours inclusive.
 6. **Fourth-Year Students** are students who have earned from 78 to 107 credit hours inclusive.
 7. **Fifth-Year Students** are students who have earned not fewer than 108 credit hours.

5.2 Degree and Departmental Regulations

Every student seeking a bachelor's degree shall comply with all the course requirements governing the award of that degree.

5.2.1 Year of Degree and Departmental Regulations - Faculty of Arts and Faculty of Science

1. A student completing a degree program in the Faculty of Arts or in the Faculty of Science will normally follow the degree regulations in effect in the academic year in which the student first completes a course(s) at Memorial University of Newfoundland. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.
2. In the case of departmental regulations for a major or minor, a student will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000 level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.

5.2.2 Year of Degree and Departmental Regulations - All Other Faculties and Schools

1. A student registered in any program, other than programs in the Faculty of Arts, programs in the Faculty of Science or in the Bachelor of Business Administration program offered by the Faculty of Business Administration, will normally follow regulations in effect in the academic year in which the student first completes a course(s) in the faculty or school following formal admission to that program. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.
2. A student completing a Bachelor of Business Administration will normally follow the degree regulations in effect in the academic year in which the student first earns a total of 12 credit hours in Business courses at the 1000-level. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.
3. A student in the Bachelor of Commerce (Co-operative) program, the International Bachelor of Business Administration program, or in the Faculty of Education, Faculty of Engineering and Applied Science, School of Nursing, Faculty of Medicine, School of Pharmacy, or School of Social Work, who fails to obtain promotion or is not registered for full-time studies for more than one semester and is readmitted to full-time studies in the faculty or school will normally follow regulations in effect at the time of readmission.
4. A student in the School of Music who is required to withdraw from the Bachelor of Music degree program for academic reasons, or who has withdrawn from the principal applied study course will normally follow regulations in effect at the time the student is readmitted to the School. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.

5.2.3 Further Credentials

1. Students may obtain more than one undergraduate degree at this University but not in the same major subject. Students are also encouraged to consider proceeding to more advanced studies at the honours or graduate level.
2. A student will not be awarded the same bachelor's degree more than once by this University (e.g., if a student has been awarded a Bachelor of Arts degree from this University the student will not be awarded a second Bachelor of Arts degree from this University).
3. A student who has completed a Bachelor's degree from this University may complete the requirements for another major or minor. A notation indicating the completion of the requirements for the additional major or minor will be included on the student's academic record.
4. For further information refer to **Residence Requirements - Second Degree**.

5.2.4 Time Limits

1. Notwithstanding these regulations, the University may place limits on the time permitted to complete a program under any given set of regulations. In addition, detailed scheduling of courses and/or practical experience, e.g., work terms, internships, field placements, may be changed as the University deems appropriate or necessary.

5.3 Residence Requirements

5.3.1 General Information

1. Residence requirements are met by attendance at classes on a campus and/or by the number of credit hours completed at this University.

5.3.2 First Degree

1. For a first bachelor's degree students shall have completed a minimum of 24 credit hours through attendance at classes on the campus of a recognized university or university college. Distance education courses may be used to satisfy the requirements of this clause only for the degrees of Bachelor of Business Administration, Bachelor of Business Administration (Honours), Bachelor of Maritime Studies, Bachelor of Nursing (Post-RN) and Bachelor of Technology.
2. Students shall complete at this University the last 30 credit hours required for the degree. There are exceptions to this requirement as follows:
 - Where special circumstances warrant, and only if at least half the courses required for the degree are completed at this University, the appropriate committee on undergraduate studies may permit students to complete, at another recognized institution, not more than 15 of the last 30 credit hours or equivalent required for the degree. The courses which comprise those credit hours must be approved by the appropriate academic unit.
 - Courses taken at universities and/or colleges which are included in formal institutional exchange agreements with this University are not subject to the requirements of this clause.
 - Courses taken at Francophone universities, as required under specific degree program regulations, are not subject to the requirements of this clause.
3. Students who have taken courses in the subject of their major at another university are required to complete at least 12 credit hours in that subject at this University.

5.3.3 Second Degree

A student who has already completed a bachelor's degree may undertake a second bachelor's degree, but not in the same major, subject to the condition outlined below:

1. Every student for a second bachelor's degree, with the exception of students completing the Bachelor of Technology or Bachelor of Maritime Studies degrees, shall complete at least 30 credit hours at this University beyond those required for the first degree. These credit hours must be applicable to the degree sought. Students who have completed a first degree at this University may be permitted to take at another university up to 6 of the 30 credit hours required in this clause.
2. Students completing the Bachelor of Technology or Bachelor of Maritime Studies as a second degree must complete at least an additional 9 credit hours beyond their first degree and the work completed as required for admission to the Bachelor of Technology/ Bachelor of Maritime Studies degree. These credit hours must be applicable to the degree sought.

5.4 Registration

5.4.1 General Information

1. Students register using the Student Web/Self-Service at www.mun.ca/regoff/.
2. No student may register after the end of the registration period. In the case of accelerated courses and courses offered outside the normal time frame of a semester or session the registration period will be prorated with respect to all associated deadlines.
3. The University reserves the right to require a student to withdraw without academic prejudice from a course, courses, or program in which the student is improperly registered.

5.4.2 Student Responsibility

1. Students are strongly encouraged to seek academic advice before registering.
2. The responsibility for taking all steps necessary for registering and ensuring that a student's registration is appropriate, correct, and proper rests solely with the student. The University will make every effort, through its various academic counselling and advising services, to ensure that students are informed of the suitability and accuracy of their registrations.
3. Students must register for courses at or after the assigned registration time and before the end of the registration period as defined in the **University Diary**.

5.4.3 Registration Priority

1. The University uses a registration priority system that assigns the date and time that students register. Priority for registration is determined by a combination of three factors: closeness to graduation (i.e., number of credit hours completed); a student's academic achievement (i.e., GPA), and a student's program of study (i.e., degree, major, minor).
2. Academic units may reserve spaces in course sections for students in a particular degree, major, minor, or the like.
3. For further information on registration priority consult the publication *Undergraduate Registration Procedures*.

5.4.4 Adding Courses

5.4.4.1 General Information

- Specific deadlines for adding courses in any semester or session are stated in the **University Diary**. In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for adding courses will be prorated accordingly.
- No course will be considered to have been added until the Registrar has received official notification and certified the add.
- Attending classes or informing an instructor of the intent to add a course does not constitute an official adding of a course.
- Only under special circumstances may a course(s) be added after the end of the registration period. For information contact the Office of the Registrar.

- Before the end of the registration period a student may, upon formal notification to the Registrar, change the course(s) for which he or she was originally registered by adding and/or dropping a course(s).

5.4.5 Course Weight/Course Load

Course load is the sum of course weights. In a session the course load is double. For the purposes of determining course load, each course is weighted with the credit hour value associated with that course, unless otherwise specified as follows:

- The course weight of each of the A and B components of a linked course shall be equivalent to one half of the credit hour value of the B component.
 - The course weight of courses with C or F as the last character shall be three.
 - The course weight of courses with W as the last character will vary according to individual program requirements.
1. **Semester Course Load:** The normal course load in a semester shall be 15 credit hours, except where academic regulations require more than that number. No student shall register for more than 15 credit hours or more credit hours than required by degree regulations in a semester except with the written permission of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus.
 2. **Session Course Load:** The normal course load in a session shall be 6 credit hours. No student shall register for more than 6 credit hours in a session except with the written permission of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus.

5.4.6 Dropping Courses

5.4.6.1 General Information

- Specific deadlines for dropping courses in any semester or session are stated in the **University Diary**. In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for dropping courses without academic prejudice will be prorated accordingly.
- No course will be considered to have been dropped until the Registrar has received official notification and certified the drop.
- Ceasing to attend classes, or informing an instructor of the intent to drop a course, does not constitute an official dropping of a course.
- A student who drops all courses in any given semester will be considered to have withdrawn from the University for that semester. A student who has withdrawn from the University, before the start of classes in any semester, is deemed to be not registered for that semester. For information regarding applying for readmission to the University refer to **Admission/Readmission to the University (Undergraduate)**.
- In the event that a student drops a co-requisite course, the student will be required to drop the course for which that course is a co-requisite.
- Before the end of the registration period a student may, upon formal notification to the Registrar, change the course(s) for which he or she was originally registered by adding and/or dropping a course(s).

5.4.6.2 Dropping Courses Without Academic Prejudice

- Until the end of the second week following the first day of lectures in any semester, a student may, upon formal notification to the Registrar, drop a course without academic prejudice. A course dropped under these circumstances will not be entered on the student's record.
- From the beginning of the third week to the end of the seventh week following the first day of lectures in any semester, a student may, upon formal notification to the Registrar, drop a course without academic prejudice. A grade of DR will be assigned in these circumstances and will be entered on the student's record.
- From the beginning of the eighth week following the first day of lectures in any semester to the last day to add courses in the following semester, a student who is prevented from completing the requirements of a course by illness, bereavement, or other acceptable cause, duly authenticated in writing, may drop a course without academic prejudice. This may occur only with the approval of both the course instructor and the head of the academic unit of the student's program or in the case of students who have not declared a program, the head of the academic unit of the course in question. A grade of DR will be assigned in these circumstances and will be entered on the student's record.

5.4.6.3 Dropping Courses With Academic Prejudice

Students dropping courses except under the provisions outlined under **Dropping Courses Without Academic Prejudice** will have the letter grade of DRF and a numeric grade of 0% entered on his or her record for each course dropped.

5.4.6.4 Work Terms

Students registered for a co-operative education work term should refer to the appropriate academic-unit section of this calendar with respect to regulations regarding work terms.

5.4.6.5 Tuition Fee Implications

- A student who drops a course within two weeks following the first day of lecture in any semester will not be liable for tuition fees for that course. Tuition fee refunds for dropping courses after that period will be prorated in accordance with **Fees and Charges - Tuition Refunds Based on Withdrawal from Course(s)**.
- In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for dropping courses without financial liability will be prorated accordingly.

5.4.7 Withdrawing from the University

5.4.7.1 General Information

- A student who drops all courses in any given semester will be considered to have withdrawn from the University for that semester. A student who has withdrawn from the University, before the start of classes in any semester, is deemed to be not registered for that semester. For information regarding applying for readmission to the University refer to **Admission/Readmission to the University (Undergraduate)**.

- A withdrawal is not official until the Registrar has received official notification and certified the changes.
- Ceasing to attend classes, or informing an instructor of the intent to drop a course, does not constitute an official withdrawal.

5.4.7.2 Withdrawing from the University Without Academic Prejudice

- Until the end of the second week following the first day of lectures in any semester as stated in the **University Diary**, a student may, upon formal notification to the Registrar, withdraw from the University without academic prejudice. Courses dropped under these circumstances will not be entered on the student's record.
- From the beginning of the third week to the end of the seventh week following the first day of lectures in any semester as stated in the **University Diary**, a student may, upon formal notification to the Registrar, withdraw from the University without academic prejudice. The letter grade DR will be assigned to all courses in these circumstances.
- From the beginning of the eighth week following the first day of lectures in any semester to the last day to add courses in the following semester as stated in the **University Diary**, a student who is prevented from completing the semester by illness, bereavement, or other acceptable cause, duly authenticated in writing, may withdraw from the University without academic prejudice. This may occur only with the approval of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus and upon formal notification to the Registrar. The letter grade DR will be assigned to all courses in these circumstances.
- In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for withdrawing from the University will be prorated accordingly.
- Students who withdraw from the University for medical reasons for one or more semesters may not be permitted to re-enter unless they can provide medical evidence, satisfactory to the Director of Student Health Service, of fitness to pursue studies.

5.4.7.3 Withdrawing from the University With Academic Prejudice

Any student withdrawing from the University except under the provisions outlined under **Withdrawing from the University Without Academic Prejudice** will have the letter grade DRF and a numeric grade of 0% entered on his or her record for each course withdrawal.

5.4.7.4 Work Terms

Students registered for a co-operative education work term should refer to the appropriate academic-unit section of this calendar with respect to regulations governing withdrawing from work terms.

5.4.8 Auditing of Courses

1. Individuals auditing courses must have met the University's admission or readmission requirements as stated in **Admission/Readmission to the University (Undergraduate)**.
2. In order to audit any course, an individual must receive permission from the instructor in that course and the head of the academic unit in which the course is offered. Permission cannot be given until the number of registrations is known. Factors to be considered shall include class size, impact on students registered for credit, and other matters judged relevant by the academic unit.
3. Individuals auditing courses shall limit their participation to that deemed appropriate by the instructor.
4. Auditors are not permitted to write formal examinations or have their work formally assessed.
5. Audited courses will not be considered as meeting prerequisites, admission, or course requirements for any undergraduate programs, nor will audited courses be listed on the individual's transcript of University studies.

5.5 Attendance

1. Attendance regulations must be approved by the Senate and will be allowed only in cases where the academic unit has demonstrated that attendance is necessary for safety reasons, for teaching practical skills, or for attaining other clearly specified objectives. This may include an attendance regulation that may, by itself, cause a student who contravenes the regulation to fail or be dropped from a course.
2. The course where an attendance regulation is to be enforced must have the statement "attendance required" included in the calendar description.

5.6 Evaluation

5.6.1 Method of Evaluation

1. The method of evaluation in any course shall be determined by the academic unit subject to all University regulations.

5.6.2 Informing Students of the Method of Evaluation

1. The method of evaluation and required prerequisites or co-requisites shall be made known to students before the end of the first week of lectures in any semester or session.
2. This information shall be in typewritten or computer-generated format and shall be provided in paper form to the students present in each class during the first week of lectures. In the case of Web-based courses, this information may be provided electronically.
3. The following shall be included in the explanation of the method of evaluation:
 - the allocation of marks for all parts of the evaluation, e.g., assignments, laboratory projects, presentations, tests, mid-term examinations, final examinations;
 - the approximate dates of all parts of the method of evaluation that will take place in class, e.g., tests, mid-term examinations, presentations, and assignments;
 - the dates on which all parts of the evaluation to be completed out of class are due; and
 - whether deferred tests or mid-term examinations or extensions of deadlines for out-of-class work are permitted.
4. A student who is prevented from writing a test or mid-term examination or completing assigned work by the deadline, by illness or bereavement or other acceptable cause, duly authenticated in writing, may apply, in writing and with supporting documents, for an alternate evaluation. Normally, this application must be made within one week of the original date of the examination or deadline to the course instructor.
5. Methods used for notification of grades earned in all parts of the method of evaluation and for the return of graded evaluative

instruments will be in keeping with the Access to Information and Protection of Privacy Act.

- When it is determined that there will be a common final examination for day and evening sections of a course, students must be so informed in the explanation of the method of evaluation for the course and prior to the end of the registration period.

5.6.3 Changing the Method of Evaluation

- The explanation of the method of evaluation, as made available to the class in the first week of lectures, shall be changed only if:
 - exceptional circumstances warrant the change; and
 - the head of the academic unit approves the proposed change; and
 - accommodation is made for students who demonstrate to the faculty member that they are disadvantaged by the change.

5.6.4 Good Writing Skills

- Regardless of the method of evaluation, good writing skills are required for effective communication. Students are, therefore, expected to demonstrate proficiency in logical organization, clarity of expression and grammatical correctness in their writing. For further information refer to **Grading - Good Writing**.

5.6.5 Completing a Course

- When it is prescribed that students, once registered, must complete a particular course, it is understood that they shall, when required, attend lectures given in the course, perform laboratory projects, and exercises that may be assigned and any other written or oral exercises prescribed, write or otherwise answer tests and examinations given in the course throughout the semester or session, including any final examinations, and shall obtain an overall passing grade in the course in accordance with the prescribed evaluation procedures.

5.6.6 Correction and Return of Student Work

- Provided that students submit work by the due date outlined in the method of evaluation, instructors shall mark and return work that is worth a total of 20% of the final grade before the last day to drop courses without academic prejudice. This excludes practicums, placements, internships, theses, and courses where a single piece of work is used to determine the entire mark for the course.
- In courses where evaluation includes a final examination, provided that students submit work by the due date outlined in the method of evaluation, instructors shall make all reasonable efforts to mark and return all work before the beginning of the examination period.

5.7 Examinations

5.7.1 Scheduling of Examinations

- No laboratory examinations totalling more than one laboratory period in length shall be given in any laboratory course in any week during a lecturing period in any semester or session. Such examinations shall be administered in the laboratory time period assigned for that course section. The application of this clause in the Faculty of Engineering and Applied Science and the Faculty of Medicine is subject to interpretation by the appropriate committee on undergraduate studies. The Senate Committee on Undergraduate Studies may grant a waiver of this clause for laboratory examinations in individual courses in a given term upon recommendation of the appropriate committee on undergraduate studies. Such waivers will be considered only if it can be shown that such laboratory examinations do not conflict with regularly scheduled sessions of another course for any student involved.
- Any other examinations shall not extend beyond the class period assigned to that course section in any week during a lecturing period in any semester or session. The application of this clause in the Faculty of Engineering and Applied Science and the Faculty of Medicine is subject to interpretation by the appropriate committee on undergraduate studies. The Senate Committee on Undergraduate Studies may grant a waiver of this clause for examinations in individual courses in a given term upon recommendation of the appropriate committee on undergraduate studies. Such waivers will be considered only if it can be shown that such examinations do not conflict with regularly scheduled sessions of another course for any student involved.
- During the last two weeks of the lecturing period in any semester or the last week of the lecturing period in any session, no examinations or assignments, whether in-class or take home, shall be administered or assigned. However, assignments of which students have been notified under **Evaluation** may be submitted and oral and laboratory examinations may be administered. Courses taught outside the regular time-frame are exempt from the application of this regulation. The appropriate faculty or school undergraduate studies committee may, upon the recommendation of the head of an academic unit, grant a waiver of this clause with the proviso that the total value of all examinations or assignments thereby permitted in a course shall not exceed 20% of the final mark in that course. Such waivers will be considered only in exceptional circumstances or in the case of particular courses where it can be shown that the nature of the course determines the need for evaluation during the normally prohibited period. In the latter case, students must be notified of the method of evaluation in accordance with **Evaluation**. At the end of each semester, the Senate Committee on Undergraduate Studies must be notified of waivers granted.
- No examinations of any nature shall be held between the last day of lectures and the start of the formal examination period in any semester or session. The application of this clause to the Faculty of Education (with respect to accelerated courses), the Faculty of Medicine, the School of Human Kinetics and Recreation (with respect to accelerated courses and courses offered outside the normal time frame during the Spring semester) and the School of Nursing is subject to interpretation by the appropriate committee on undergraduate studies.
- In the event of an officially declared emergency which results in the cancellation or interruption of in-class examinations or tests previously scheduled and notified to be held in the final class period of the third last week of lectures of a semester or the second last week of lectures of a session, teaching units may reschedule such examinations or tests in the next regularly scheduled class or as early as possible in the second last week of lectures of a semester or the last week of lectures of a session. In no circumstances can the rescheduled examinations or tests be held in the last week of lectures of a semester.

5.7.2 Scheduling of Final Examinations

- Final examinations, if any, whether of the normal two-hour duration or longer, shall be held in each course at the end of the semester during which it was given in accordance with the schedule of examinations published by the Office of the Registrar. The application of this clause to the Bachelor of Education (Intermediate/Secondary) and all degree programs offered by the School of Human Kinetics and Recreation is subject to interpretation by the appropriate committee on undergraduate studies.
- Normally, course sections offered during the day will have their final examinations, if any, scheduled in the day, and course sections

offered in the evening will have their final examinations, if any, scheduled in the evening. When a student is unable for good reason to write a final examination scheduled outside the provisions of this clause, the student will be entitled to write a deferred examination. For further information refer to **Exemptions From Final Examinations and Procedures for Applying to Write Deferred Examinations**.

3. When an academic unit determines that there will be a common final examination for day and evening sections of a course, students must be so informed in the explanation of the method of evaluation for the course and prior to the end of the registration period.
4. Where possible, academic units should inform the Office of the Registrar when they submit their class schedules if it is anticipated that a common final examination will be required for day and evening sections of a course, so that this information can be publicized in the class schedule for the appropriate semester. Academic units should indicate whether the examination is to be held during the day or the evening.

5.7.3 Exemptions From Final Examinations and Procedures for Applying to Write Deferred Examinations

1. A student who is prevented from writing a final examination by illness or bereavement or other acceptable cause, duly authenticated in writing, may apply, with supporting documents, to have the course graded or have the final examination deferred. This application must be made within one week of the original date of the examination to the head of the appropriate academic unit.
2. The decision regarding the request of the student to have a course graded or have the final examination deferred, including information on the appeals route open to the student in the case of a negative decision, must be communicated in writing to the student and to the Registrar within one week of the receipt of the student's complete application. For further information refer to **Appeal of Regulations**.
3. In those cases where the academic unit accepts the extenuating circumstances the student may be permitted to write a deferred examination or, with the consent of both the academic unit and the student, the grade submitted may be based on term work alone. An interim grade of ABS will be assigned by the academic unit in the case of a student granted a deferred examination. This grade will be replaced by the final grade which must be received by the Registrar within one week following the start of classes in the next academic semester or session.
4. A student who is prevented from writing a deferred examination by illness, bereavement, or other acceptable cause, duly authenticated in writing, may apply, with supporting documents, to the head of the appropriate academic unit to have the deferred examination further deferred. This application must be submitted within one week of the scheduled date of the deferred examination. The examination will be postponed to a time not later than the last date for examinations in the semester following that in which the student was enrolled in the course.

5.7.4 Access to Final Examination Scripts

1. A student has a right to see his or her final examination script. However, the script is the property of the University and the University retains full possession and control of the script at all times. This regulation upholds the authority and judgement of the examiner in evaluation.
2. To access a final examination script, a student must make a written request to the head of the academic unit in which a course is offered. This request is subject to the following conditions:
 - Any such request must be made following release of examination results for the semester in which the course was taken and within one month of the official release of grades by the University.
 - The final examination script must be viewed in the presence of the course instructor or other person delegated by the head of the academic unit. Both the instructor and the student have the right to be accompanied by a registered student or a member of the faculty or staff of the University.
 - The final examination script must not be taken away or tampered with in any way.

5.7.5 Rereading of Final Examination Scripts

1. A student may apply to have a final examination script reread whether or not he or she has obtained a passing grade in that course.
2. A student who wishes to have a final examination script reread must make application in writing to the Office of the Registrar within one month of the official release of grades by the University. When a rereading is requested, the University will make every reasonable attempt to have the rereading conducted by a faculty member(s) other than the original marker(s). Students are advised to refer to relevant academic units for policies and procedures governing re-reads of examinations.
3. An appropriate fee per course must be paid at the time of application. For further information refer to **Fees and Charges - Reread of Final Examination Fee**. If the final numeric grade is raised after rereading, the fee is refunded. If the final numeric grade is unchanged or lowered, the fee is forfeited.

5.8 Grading

5.8.1 Letter Grades, Numeric Grades and Points Per Credit Hour

The academic standing of each student will be based upon the course(s) for which he or she was registered as of seven weeks following the first day of lectures in any semester. The final evaluation submitted to the Registrar shall consist of one of the following letter grades with the appropriate numeric grade and points awarded for each credit hour as follows:

Letter Grades	Numeric Grades	Points Per Credit Hour
A	80-100%	4
B	65-79%	3
C	55-64%	2
D	50-54%	1
F	below 50%	0
PWD (pass with distinction) - indicates excellent performance	no numeric grade	not applicable
PAS (pass) - indicates performance meets expectations	no numeric grade	not applicable
FAL (fail) - indicates failing performance	no numeric grade	not applicable
DR (drop) - drop without academic prejudice	no numeric grade	not applicable
DRF (drop fail) - drop with academic prejudice	0%	0
ABS (absent) - absent for acceptable cause	no numeric grade	not applicable
INC (incomplete) - incomplete pending final grade	no numeric grade	not applicable
AEG (aegrotat)	no numeric grade	not applicable

5.8.2 Descriptions of Letter Grades

- "A" indicates excellent performance with clear evidence of:
comprehensive knowledge of the subject matter and principles treated in the course,
a high degree of originality and independence of thought,
a superior ability to organize and analyse ideas, and
an outstanding ability to communicate.
- "B" indicates good performance with evidence of:
substantial knowledge of the subject matter,
a moderate degree of originality and independence of thought,
a good ability to organize and analyse ideas, and
an ability to communicate clearly and fluently.
- "C" indicates satisfactory performance with evidence of:
an acceptable grasp of the subject matter,
some ability to organize and analyse ideas, and
an ability to communicate adequately.
- "D" indicates minimally acceptable performance with evidence of:
rudimentary knowledge of the subject matter,
some evidence that organizational and analytical skills have been developed, but with significant weaknesses in some areas, and
a significant weakness in the ability to communicate.
- "F" indicates failing performance with evidence of:
an inadequate knowledge of the subject matter,
failure to complete required work,
an inability to organize and analyse ideas, and
an inability to communicate.

5.8.3 Good Writing

- Students at all university levels should have reasonably sophisticated and effective communication skills and are expected to demonstrate proficiency in logical organization, clarity of expression and grammatical correctness. Good writing is expected of students in all courses. Upon graduation students should be capable of expressing complicated ideas clearly and concisely and should be able to develop arguments in a logical manner. When, in the judgement of the instructor, a student persistently fails to display a reasonable standard of writing, the instructor may consider this when assigning a final grade.
- Good writing is characterized by the following qualities:
 - Content**
critical insight and freshness of thought,
clear and penetrating ideas,
perceptive, pure grasp of subject,
intelligent use of primary and secondary sources, and
a sense of completeness about the handling of the topic.
 - Organization**
effective introduction and conclusion,
main idea is clear and logical development follows,
smooth transitions, and

good use of details.

- **Style**

appropriate, accurate, precise and idiomatic diction, and sentences varied in kind, length and effect.

- **Mechanics**

consistently correct spelling, accurate use of punctuation, grammatically correct sentences, and well organized paragraphing.

5.8.4 Linked Course

1. A linked course is a course comprising two components and is normally identified by the letter "A" or "B" as the last character of the course number. No credits or points are assigned to the "A" part of a linked course. No credits or points are given until the "B" part is completed. Credits and points will be awarded upon successful completion of the B part and will be attributed to the B part only.

5.8.5 Incomplete Grades

1. A student who, for extenuating circumstances, is unable to complete the requirements of a course may, with the approval of the appropriate academic unit, be granted a letter grade of incomplete (INC) in the course. This grade shall be valid for only one week following the start of classes in the next academic semester or session as stated in the **University Diary**. In the event that a numeric grade has not been received by the Registrar by this deadline the INC shall be changed to the letter grade F with a numeric grade 0%.
2. Students unable to complete the requirements of a course by the end of one week following the start of classes in the next academic semester or session as stated in the **University Diary**, may be permitted an extension of time not exceeding the end of the semester following that in which the INC was given. Such an extension may be granted by the appropriate committee on undergraduate studies, on the recommendation of the academic unit. In special circumstances, students registered for a Social Work Internship may be given an extension not exceeding two semesters. Students registered in one of HKR 2210, 2220, 3210, 3220, 4210 or 4220 may be given an extension not exceeding three semesters, by the Academic Council of the School of Human Kinetics and Recreation.

5.8.6 Calculation of Averages

Only courses evaluated using final grades with associated numeric grades and points are included in the calculation of all averages. In calculating current averages the grades obtained in the A part of linked courses shall be included, while the grades obtained in foundation courses and work terms shall be excluded. Credit received as a result of transfer credit and challenge for credit are not included in the calculation. These calculations may be expressed as averages or grade point averages.

1. Current average: is a method of expressing a student's performance for the semester. The current average is based on final grades. The current average is calculated by computing the sum of the numeric grade in each course multiplied by the course weight and dividing that sum by the total of the course weights.
2. Cumulative average: is a method of expressing a student's performance over his or her academic career recorded since the beginning of the 1980-81 academic year. Where any given course, or an equivalent or cross-listed course, is attempted two or more times and is not repeatable, only the best attempt is included in the average. The cumulative average is calculated by computing the sum of the numeric grade in each course multiplied by the credit hour value and dividing that sum by the total number of credit hours attempted.
3. Current grade point average: is a method of expressing a student's performance for the semester. The points associated with each letter grade are multiplied by the course weight. The current grade point average is calculated by dividing the total number of grade points earned by the total of the course weights.
4. Cumulative grade point average: is a method of expressing a student's performance over his or her academic career recorded since the beginning of the 1980-81 academic year. Where any given course, or an equivalent or cross-listed course, is attempted two or more times and is not repeatable, only the best attempt is included in the average. For each course used in the calculation, the points associated with each letter grade are multiplied by the course credit hour value. The cumulative grade point average is calculated by dividing the total number of points earned by the total number of credit hours attempted.

5.8.7 Aegrotat Status

1. Students in their final semester or session before graduation, who have been absent from a final examination where one has been scheduled or who have been prevented from completing the semester's or session's work, for reasons which qualify them to write a deferred examination, may, in exceptional circumstances, be given credit for the course on the recommendation of the Senate Committee on Undergraduate Studies.
2. Application for aegrotat status, with full details duly authenticated, must be made to the Registrar, indicating each course for which the application is being made, within one week after the last day of final examinations.

5.9 Dean's and Vice-President's List

5.9.1 General Information

Memorial University of Newfoundland acknowledges the academic success of its students in various ways. One of these is by naming students to the appropriate dean's or vice-president's list. Annually, every academic unit will name to its list a maximum of 10% of its students, selected on the basis of academic performance in the nominating period.

5.9.2 Procedure and Criteria

1. At the end of the Winter semester, academic units will nominate students to the appropriate list based on academic performance in the three preceding semesters, Spring, Fall, and Winter.
2. Students on the dean's and vice-president's list will be selected based on the following minimum criteria:
 - The student must have obtained a grade point average of at least 3.5 in the credit hours completed in the preceding Spring, Fall, and Winter semesters.

- The student must have attended full-time in at least two of the three preceding semesters.
 - The student must have successfully completed at least 27 credit hours over the preceding Spring, Fall, and Winter semesters, although an academic unit may require that the 27 credit hours be completed in any two of the three preceding semesters.
 - In consideration of specific program requirements, individual academic units may include students who have successfully completed, over the three preceding semesters, a course load other than 27 credit hours, but which is consistent with the course load defined by the program.
3. A notation will be placed on the student's transcript indicating that the student has been named to the dean's or vice-president's list.

5.10 Continuance and Readmission

These regulations will be applied at the end of each semester to any student who is registered in a course load of at least 9 credit hours on the last day for adding courses in a semester or session, including a student who later drops courses and changes status to that of a part-time student.

5.10.1 Eligibility for Continuance

5.10.1.1 Academic Criteria for Continuance in the University

At the end of each semester, in order to be eligible for continuance in the University, a student is required either:

- to obtain a current average of 50% in the courses for which he or she is registered on the last day for dropping courses without academic prejudice, or
- to have obtained a cumulative average of at least 55%.

5.10.1.2 Academic Criteria for Continuance in Programs of Study

- Most academic units have separate promotion or advancement criteria for continuation of students in specific programs of study. Students are advised to check the regulations of the appropriate academic unit for details. The appropriate committee on undergraduate studies may, at any time, require a student to withdraw for academic reasons.

5.10.1.3 Other

- Students who meet the academic criteria for continuance in the University but who have not registered for courses for two or more consecutive semesters are required to apply for readmission to the University in accordance with the **Admission/Readmission to the University (Undergraduate)** regulations.
- These regulations notwithstanding, the continuance of any student at this University is subject to all University regulations.

5.10.2 Academic Warning

1. Any student who, for the first time, fails to meet the requirements outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University** will be given an academic warning.
2. Certain conditions may be set for students who have been given an academic warning. Any conditions will be set by the head of the appropriate academic unit and will be administered in conjunction with the Registrar. These conditions may include, but are not limited to the following:
 - restrictions on course load,
 - enrollment in courses designed to improve academic competence,
 - involvement with programs designed to enhance success in university studies, such as those which teach time management, study, or similar skills,
 - regular meetings with a faculty advisor.

5.10.3 Ineligibility for Readmission

1. Any student who has previously been given an academic warning and who again fails to meet the requirements, as outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University**, at this or another recognized university or college, will not be eligible for readmission to the following two semesters.
2. Any student who has previously been given an academic warning and who fails, for the second time, to meet the requirements, as outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University**, at this or another recognized university or college, will not be eligible for readmission to the following three semesters. To be considered for readmission after this period, the student will need the recommendation of the head of the appropriate academic unit, or, in the case of a student with an undeclared program of study, a senior faculty advisor.
3. Any student who fails, for the third time, to meet the requirements, as outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University**, at this or another recognized university or college, will be considered for readmission only on appeal following a period of withdrawal of at least six semesters. This appeal will be considered by the Senate Committee on Undergraduate Studies only on the recommendation of the head of the appropriate academic unit, or in the case of a student with an undeclared program of study, a senior faculty advisor.
4. Certain conditions may be set for students who are readmitted after a period of ineligibility. These conditions are outlined under **Academic Warning**.
5. Academic units reserve the right to deny readmission where a student has been determined to have engaged in unprofessional conduct. The code of ethics of the appropriate profession will serve as the guidelines when making this determination. However, should there not be an appropriate code of ethics, the following standard will apply: unprofessional conduct is that conduct which involves a breach of the duties required by professional ethics.
6. The University reserves the right to deny a student readmission where, in the opinion of the Senate Committee on Undergraduate Studies, following appropriate professional consultation, there is a reasonable likelihood that the student's health or behaviour could endanger the lives, health, or safety of other persons on-campus or off-campus where such a location pertains to University studies. If the University denies a student readmission, the student must be advised of the nature of the case, must be provided with an opportunity to answer the case, and must be advised of the right to appeal before the penalty imposed takes effect. For information regarding the appeal procedure refer to **Appeal of Regulations**.
7. These regulations notwithstanding, the readmission of any student at this University is subject to all University regulations.

5.11 Academic Misconduct

5.11.1 Principles

Within the University community there is a collective responsibility to maintain a high level of scholarly integrity. Students are expected to adhere to those principles which constitute proper academic conduct. Academic misconduct cannot be condoned or even appear to be condoned. Students have the responsibility to know which actions, as described under **Academic Offences**, could be construed as dishonest or improper. Students are reminded that for further guidance on proper scholarly behaviour they should seek advice from their instructors and faculty advisors.

5.11.2 General Information

1. These procedures shall apply to all academic offences relating to undergraduate studies involving, but not limited to, those students who either have been or who are enrolled at Memorial University of Newfoundland. Notification of an allegation of academic misconduct will be forwarded to the last known mailing address of the student as noted on the files at the Office of the Registrar, and to the official University email address of the student. The University reserves the right to implement action under these procedures where an allegation has been made against a student but where reasonable efforts to contact the student are unsuccessful.
2. Meetings and interviews stipulated in this regulation will be held in person, or at a distance using telephone or other interactive technologies.
3. A student who wishes to attend classes, laboratories or other educational activities while an investigation under these procedures is being carried out, can do so only with the written permission of the academic unit concerned. Permission to do so will only be granted with the understanding that if the allegation of academic misconduct is proven and the penalty involves either suspension or expulsion, credit will not be granted for work completed prior to a finding of guilt. This provision excludes students charged with an offence under the *Code of Student Conduct*. For information regarding the *Code of Student Conduct* contact the **Office of Student Affairs and Services**.
4. Although a student can continue in a program of studies, if eligible, while an investigation under these procedures is being carried out, the University does not accept liability for any consequences to the student's progress. However, the University may take these consequences into account, as appropriate and to the extent feasible, in cases where charges are dropped or the student is not found guilty. The consequences arising from an investigation and any negative decision rendered may include retroactive effects on grades or promotion within a program.
5. A student accused of academic misconduct may consult advisors or facilitators. Such advisors may include a representative from a Memorial University of Newfoundland student union, an international student advisor, a faculty advisor, a University counselor or a faculty member who is familiar with these Regulations and who is willing to undertake the role of advisor whether resolution is sought through **Procedures for Resolution of Alleged Academic Offences at the Unit Level** or **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**.

5.11.3 General Procedure

1. When a member of the University community (faculty, staff, student) has grounds for belief that an academic offence has been committed there should be an attempt between the parties concerned to resolve allegations of minor offences. If the alleged offence is not deemed to be minor by the accuser, or resolution proves impossible, or one party is dissatisfied with the resolution, the matter shall be reported, without delay, to the head of the appropriate academic or administrative unit. If resolution is achieved and it is agreed that an academic offence has been committed, then the offence, together with the penalty applied, shall be reported to the head of the academic or administrative unit.
2. Where resolution is not achieved, and if in the judgment of the head of the academic or administrative unit, the alleged offence warrants resolution at the unit level, the individuals involved will be advised to attempt to resolve the matter through **Procedures for Resolution of Alleged Academic Offences at the Unit Level**. In the event that no resolution is possible through these procedures between the individual parties, the head of the academic or administrative unit will institute proceedings through the Senate Committee on Undergraduate Studies.
3. If, in the judgment of the head of the academic or administrative unit, the alleged offence against University regulations is such as to warrant resolution through the Senate Committee on Undergraduate Studies, the head of the academic or administrative unit will refer the matter to the Secretary of the Senate Committee on Undergraduate Studies, and **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will be implemented.
4. In all cases, it is the responsibility of the academic or administrative unit to ensure that fairness and impartiality are achieved in the treatment of students.

5.11.4 Academic Offences

1. In the following section the plural shall be deemed to include the singular.
2. Academic offences shall be deemed to include, but shall not be limited to, the following:
 - Cheating on examinations or any other tests, theses, assignments, work term reports, projects or internship reports: includes copying from another student's work or allowing another student to copy from one's own work; consulting with any unauthorized person during an examination or test; using unauthorized aids; or knowingly recording or reporting false empirical or statistical data. The work referred to includes examinations, theses, assignments, work term reports, projects, internship reports, or any other tests which are to be used in judging the student's performance in a course or program of study, or on any special tests which the University may offer.
 - Impersonating another student or allowing oneself to be impersonated: includes the imitation of a student or the entrance into an arrangement with another person to be impersonated for the purposes of taking examinations or tests or carrying out laboratory or other assignments.
 - Plagiarism: is the act of presenting the ideas or works of another as one's own. This applies to all material such as essays, laboratory reports, work term reports, design projects, seminar presentations, statistical data, computer programs, research results and theses. The properly acknowledged use of sources is an accepted and important part of scholarship. Use of such material without acknowledgment is contrary to accepted norms of academic behaviour. Information regarding acceptable writing or by email practices is available through the Writing Centre at www.mun.ca/writingcentre/about/.
 - Theft of examination papers or other material: includes obtaining by any improper means examination papers, tests, or any other such material.
 - Use and/or distribution of stolen material: includes the use of material which the student knows to have been improperly obtained and/or the distribution of such material.

- Submitting false information: includes falsifying academic forms or records, submitting false credentials, medical or other certificates, or making a false, misleading or incomplete declaration to the University.
- Submitting work for one course or work term which has been or is being submitted for another course or work term at this or any other institution without express permission to do so: includes the presentation of an essay, report or assignment to satisfy some or all of the requirements of a course when that essay, report, or assignment has been previously submitted or is concurrently being submitted for another course without the express permission of the professor(s) involved.
- Failure to follow relevant University/Faculty/School guidelines on ethics.

5.11.5 Procedures for Resolution of Alleged Academic Offences at the Unit Level

5.11.5.1 General Information

These procedures will not be applied to cases involving alleged offences on final examinations, any other evaluative instruments worth 40% or more of the final grade, allegations of impersonation or allegations of submission of forged documents. Such alleged offences are governed by the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**.

5.11.5.2 Explanation of Procedures

If, upon receiving a report of an alleged academic offence, the head of the academic or administrative unit decides that an attempt should be made to resolve the matter at the unit level the following procedures shall apply:

- Normally within one week of notification, the head of the appropriate academic or administrative unit shall request a meeting with the accuser and the accused and at the meeting the head shall state the allegation, review the **Procedures for Resolution of Alleged Academic Offences at the Unit Level** including the range of applicable penalties, and arrange a second meeting between the accuser and the accused only.
- At the second meeting the accuser and accused shall endeavour to obtain a mutually satisfactory resolution of the matter.
- The accuser and accused shall report jointly to the head of the academic or administrative unit on the result of their second meeting.
- If the report is of a resolution which the head of the academic or administrative unit considers to be fair and equitable the matter shall be considered closed. If the head of the academic or administrative unit considers the reported resolution to be unfair and/or inequitable he or she will endeavour to obtain an alternative satisfactory resolution directly with the parties.
- Should all reasonable efforts to obtain a resolution at the unit level fail, the head of the academic or administrative unit will refer the case to the Secretary of the Senate Committee on Undergraduate Studies and shall inform the accuser and the accused accordingly. From this stage onward **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will apply.
- At any stage of the Procedures for Resolution of Alleged Academic Offences at the Unit Level, the student may ask that his or her case be referred to the Secretary of the Senate Committee on Undergraduate Studies, and thereafter the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will apply.
- Should the accused be found guilty, a brief description of the offence and the penalty(ies) applied shall be forwarded by the head of the academic or administrative unit to the Office of the Registrar.

5.11.5.3 Failure to Appear or Respond

- If at any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.
- If at any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the accuser fails to appear at a scheduled meeting to defend an allegation, without reasonable cause, the action will be dismissed.

5.11.5.4 Penalties in the Case of Resolution at the Unit level

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining the severity of penalties. The range of penalties and their determination are:

- Resubmission of work with appropriate reduction in grade: will allow a student to complete and submit the work a second time.
- Reprimand: will be in the nature of a warning by the head of the academic or administrative unit to the student that the student's behaviour has been unacceptable to the University.
- Reduction of grade: will apply to an examination, test, or assignment to which an offence is relevant, and will be decided by the head of the academic or administrative unit.

5.11.6 Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies

5.11.6.1 General Information

If the matter cannot be resolved following the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, or if, in the opinion of the head of the academic or administrative unit, the allegation involves a major breach of University regulations, or in cases involving alleged offences on final examinations, evaluative instruments worth 40% or more of the final grade, allegations of impersonation or allegations of submission of forged documents, the following **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** shall apply. In the application of these procedures, in the case of students attending Grenfell Campus, the Grenfell Campus Sub-committee of the Senate Committee on Undergraduate Studies shall assume the role and authority defined below for the Senate Committee on Undergraduate Studies.

5.11.6.2 Explanation of Procedures

- If the head of the academic or administrative unit (in the case of departmentalized faculties, the head in consultation with the dean) is satisfied that the student has a serious allegation to answer, that person shall inform the student in writing or at the official University email address of the student, normally within one week, of the nature of the allegation against him or her. In addition, the head of the academic or administrative unit shall report to the Secretary, Senate Committee on Undergraduate Studies, c/o Office of the Registrar, who will, normally within one week, appoint as an investigator a Chair of a Faculty/School Committee on

Undergraduate Studies other than the Chair of that Faculty/School's Committee. The investigator will interview separately the accuser, the accused and relevant witnesses. At these interviews the investigator, the accuser, the accused and relevant witnesses all have the right to be accompanied by a registered student or a member of the faculty or staff of the University.

- Upon completion of these interviews, the investigator shall submit a written report of all findings to the Secretary, Senate Committee on Undergraduate Studies, c/o Office of the Registrar. Normally, the report will be submitted within four weeks of appointment as an investigator.
- The Secretary of the Senate Committee on Undergraduate Studies shall present this report to both the accuser and accused for perusal and comment. Once in receipt of this report, the accuser and accused shall have two weeks in which to submit to the Secretary, Senate Committee on Undergraduate Studies any additional comments on the report that the person wishes to be considered in the deliberations of the Senate Committee on Undergraduate Studies.
- The Secretary of the Senate Committee on Undergraduate Studies shall present to the Senate Committee on Undergraduate Studies for decision all information received from the investigator as well as comments from the accuser and accused. The investigator shall attend the meeting held to consider the case to answer questions raised by the Senate Committee on Undergraduate Studies and to provide information pertinent to the case, but shall be absent from the voting process.
- Once a vote is taken, should the accused be found guilty, the Senate Committee on Undergraduate Studies shall take appropriate action in accordance with **Penalties in the Case of Resolution by the Senate Committee on Undergraduate Studies**.

5.11.6.3 Failure to Appear or Respond

- If at any stage of the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.
- If at any stage of the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**, the accuser fails to appear at a scheduled interview to defend an allegation, without reasonable cause, the action will be dismissed.

5.11.6.4 Penalties in the Case of Resolution by the Senate Committee on Undergraduate Studies

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining severity of penalties. Enforcement of penalties resulting from **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will be overseen by the Registrar. In addition to a Reprimand, which shall be in the nature of a warning by the Senate Committee on Undergraduate Studies to the student that the student's behavior has been unacceptable to the University, the range of penalties and their determination is:

- Reduction of grade: will apply to an examination, test, or assignment to which an offence is relevant, or to the entire course, and will be decided by the Senate Committee on Undergraduate Studies.
- Rescinding of scholarships, bursaries or other awards: the recommendation for rescinding of scholarships, bursaries or other awards will be made by the Senate Committee on Undergraduate Studies to the Senate Committee on Scholarships and Awards for a final decision. The Senate Committee on Undergraduate Studies will notify the accused, in writing or by email, of the recommendation.
- Probation: the period of probation will be determined by the Senate Committee on Undergraduate Studies and shall not exceed six consecutive semesters. The impact of being placed on probation is that the commission of any further academic offence during the period of probation may lead to suspension or expulsion.
- Suspension: will apply to a course, department, faculty, school, or the University. The period of suspension will be determined by the Senate Committee on Undergraduate Studies and shall not exceed six consecutive semesters.
- Expulsion: the recommendation for expulsion from the University will be made by the Senate Committee on Undergraduate Studies to the President of the University for a final decision. Prior to the President's decision, the Senate Committee on Undergraduate Studies will notify the accused, in writing or by email, of the recommendation for expulsion from the University. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the President's final decision concerning expulsion from the University. Any such appeal should be made in writing or by email to the Executive Committee of Senate, c/o the Office of the Registrar.
- Rescinding of degree: the recommendation for the rescinding of a degree previously awarded by the University will be made by the Senate Committee on Undergraduate Studies to Senate for a final decision. Prior to Senate's decision, the Senate Committee on Undergraduate Studies will notify the accused, in writing, of the recommendation for rescinding of the degree. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the Senate's final decision concerning the rescinding of the degree. Any such appeal should be made in writing to the Executive Committee of Senate, c/o the Office of the Registrar.

5.11.7 Transcript Entries Related to Penalties

1. Transcript entries shall relate to the penalty(ies) imposed as follows:

Penalty	Transcript Entry
Reprimand	No transcript entry
Reduction of Grade	Entry of final grade for course
Probation	"On probation at the University for academic misconduct until [Day, Month, Year]"
Suspension	"Suspended from the University/Faculty/School/Program/Course for academic misconduct until [Day, Month, Year]"
Expulsion	"Expelled from the University for academic misconduct effective [Day, Month, Year]"

2. The transcript entries for "probation" or "suspension" will be removed entirely upon the expiration of the penalty.

5.11.8 Disposition of Documentation

- The disposition of documents relating to allegations under these procedures shall be as follows:
 - In cases where the accused was not found guilty, none of the documentation shall be retained.
 - In the case of a resolution effected through **Academic Misconduct - General Procedure** or **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, a brief description of the offence and the penalty(ies) applied shall be forwarded by the head of the academic or administrative unit to and retained by the Office of the Registrar, separate from the student files.
 - In the case of a resolution effected through the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**, all documentation shall be forwarded to and retained in the Office of the Registrar, separate from the student files.

5.12 Graduation

5.12.1 Application for Graduation - Degrees, Diplomas and Certificates

Students in their graduating year must apply to the Registrar to be admitted to a degree or to be awarded a diploma or certificate. Application must be made on the prescribed form which is available from the Office of the Registrar at www.mun.ca/regoff/forms.php and on Student Web/Self-Service at www.mun.ca/regoff/. The deadlines for application are listed in the **University Diary** for the Spring and Fall convocations.

- No student can be awarded a degree, diploma or certificate unless and until an average of at least 2 points has been obtained on the total number of credit hours required for such degree, diploma or certificate. The degree of Doctor of Medicine is not included in this requirement since all courses comprising the degree are graded on a PAS or FAL basis.
- It is the duty of the Registrar to certify to the Senate, where appropriate, that students for degrees, diplomas and certificates have met all the regulations and requirements of the University.

5.12.2 Classification of General Degrees

- General degrees are awarded as "Classified", "Unclassified" or are not classified, in compliance with such regulations as may be required by the academic unit(s) offering the program(s). Refer to the degree regulations of the academic units for further information.
- General degrees are awarded in three classes based on the system for granting points set forth in **Grading - Letter Grades, Numeric Grades and Points per Credit Hour**, and determined as follows:
 - A student who obtains an average of 3.5 points or better on the total number of credit hours required for the degree shall be awarded the degree with First-Class Standing and provided that all other degree requirements are met.
 - A student who fails to obtain First-Class Standing but who obtains an average of 2.75 points or better on the total number of credit hours required for the degree shall be awarded the degree with Second-Class Standing provided that all other degree requirements are met.
 - All other students will be awarded the degree with Third-Class Standing, provided that they obtain an average of 2 points or better on the total number of credit hours required for the degree and provided that all other degree requirements are met.
- When a student obtains credit for more credit hours than are required for the degree, his or her total degree points shall include only those received for the credit hours required. In eliminating from the total points those received for credit hours beyond the requirements of the degree, the credit hour(s) for which the student receives the fewest points shall be disregarded, provided that no credit hour is disregarded that is a requisite for the degree.
- Where a student receives more than one classified bachelor's degree, the class of each degree will be determined independently by applying the scheme set forth in **Classification of General Degrees** and provided that in determining the points total for each degree only those credit hours may be counted which are applicable towards the degree concerned.
- A student who has been granted credit for courses completed at Memorial University of Newfoundland before the introduction of the point system, and/or one who has been given credit for courses completed at another university, will have the class of his or her degree determined by applying the scheme set forth in **Classification of General Degrees** in proportion to the total of required credit hours completed at Memorial University of Newfoundland since the introduction of the point system.
- An Unclassified degree will be awarded a student who has completed at Memorial University of Newfoundland, fewer than one-half of the credit hours required for the degree, or fewer than one-half of the required credit hours since the introduction of the point system. All students shall, however, obtain an average of 2 points or better on the total number of the credit hours required for the degree taken at this University since the introduction of the point system.
- The following degrees are not classified: Bachelor of Education (Intermediate/Secondary), Bachelor of Engineering, Bachelor of Maritime Studies, Bachelor of Music Education, Bachelor of Post-Secondary Education (as a second degree), Bachelor of Science (Pharmacy), Bachelor of Special Education, Bachelor of Technology, Doctor of Medicine, and all degrees offered by the School of Human Kinetics and Recreation.

5.12.3 Classification of Honours Degrees

- Honours degrees may be classified or not classified in compliance with such regulations as may be required by the academic unit offering the program. Refer to the appropriate degree regulations of the academic units for further information.
- A student who has been granted credit for courses completed at Memorial University of Newfoundland before the introduction of the point system, and/or one who has been given credit for courses completed at another university, will have the class of his or her honours degree determined in proportion to the total number of required credit hours completed at Memorial University of Newfoundland since the introduction of the point system.
- An honours degree awarded a student who has completed at Memorial University of Newfoundland, fewer than one half of the credit hours required for the degree, or fewer than one half of the required credit hours since the introduction of the point system, may be Unclassified or not classified.

5.12.4 Diplomas and Certificates

- Diplomas and certificates are not classified.

5.13 Waiver of Regulations

1. All undergraduate regulations notwithstanding, the University reserves the right, in special circumstances, to modify, alter or waive any regulation in its application to individual students where, in the judgment of the head of the appropriate academic unit or the appropriate committee, merit and equity so warrant. In keeping with the principle that decisions to waive regulations should be made as close as possible to the University officer or committee with responsibility for the regulations, requests for waivers, which normally must be made in writing, must be directed as follows:
 - Course Prerequisites or Co-requisites: the head of the academic unit of the course(s) in question.
 - Departmental Regulations: the appropriate committee on undergraduate studies upon the recommendation of the head of the appropriate department.
 - Faculty or School Regulations: the appropriate committee on undergraduate studies. Such waivers shall not reduce the total number of credit hours required for a minor, major, certificate, diploma, or degree program.
 - General Academic Regulations (Undergraduate): the Senate Committee on Undergraduate Studies on the recommendation of the appropriate committee on undergraduate studies. Such waivers shall not reduce the total number of credit hours required for a minor, major, certificate, diploma, or degree program.
 - Scholarships, Bursaries, Awards, Medals and Prizes Regulations: the Committee on Undergraduate Scholarships, Bursaries and Awards on the recommendation or request of the head of the appropriate academic unit.
2. Any student whose request for waiver of regulations has been denied has the right to appeal. With the exception of verbal requests for waiver of Course Prerequisites or Co-requisites, the student will be advised in writing of the reasons for the decision and of the avenue of appeal that may be taken. For information regarding the appeal procedure refer to **Appeal of Regulations - Appeal Procedures**.

5.14 Appeal of Regulations

5.14.1 General Information

1. Every student has the right to appeal decisions resulting from the application of University regulations.
2. Appeals will be considered in the case of health issues, bereavement and/or other acceptable cause, duly authenticated.
3. For assistance in the appeals process, students are advised to consult with the Office of the Registrar.
4. In preparing an appeal a student may consult advisors or facilitators. Such advisors or facilitators may include a representative from a Memorial University of Newfoundland student union, an international student advisor, a faculty advisor, a counsellor or a faculty member who is familiar with the appeals process and who is willing to undertake the role of student advisor or facilitator.
5. Appeals are made before specific committees that exist at the University to provide an objective review of cases. The appeals process is designed to assist students at critical points in their university career, and to provide an accessible and transparent process for students. Refer also to **Appeal Procedures** for information concerning where appeals should be directed.
6. The principle of fairness should be applied to all parties in appeals processes and decisions. Fairness includes, but is not limited to, such practices as all parties to the appeal receiving timely and adequate notice, all parties to the appeal having the opportunity to be heard, all parties to the appeal being made aware of the evidence considered by the committee and no individual sitting in judgment on an appeal at a higher level who has already been a party to the decision at a lower level. Any member of a committee hearing an appeal, who was previously involved in a decision making process at a lower level of process, will abstain from voting.
7. While the University makes provision for students to appeal regulations, the academic, financial or other consequences of the appeals process rests with the student.
8. When an appeal is denied, the student will be advised in writing of the reasons for the decision and of further steps that can be taken in the appeals process. A student whose appeal is denied by the Executive Committee of Senate may appeal to the Senate. Appeals to the Senate will be heard in the first instance by the Senate Committee on Academic Appeals and that committee will investigate the appeal and submit a report to the Senate with its findings and recommendations as expeditiously as possible. Students have the right to appear in person before the Senate Committee on Academic Appeals, and have the right to be accompanied by another person to assist them with their presentation. Normally, however, the presentation of the student's case rests with the student. Advance notice of the student's intention to appear and the identity of the accompanying individual, if any, must be provided to the Secretary of the Senate Committee on Academic Appeals. Should the student's appeal be denied by the Senate, the student will be advised that within the University no further appeal is possible.
9. Student appeals are heard anonymously. However, this provision does not apply to a student who elects to appear in person before the Senate Committee on Academic Appeals as outlined in Clause 8 above.

5.14.2 Appeal Procedures

1. Normally, the responsibility for making an appeal before the appropriate committee of the University rests with the student.
2. A student who is ineligible to officially register for courses but who wishes to attend classes, laboratories or other educational activities while an appeal is in progress can do so only with the written permission of the academic unit offering the courses. Such permission will not be unnecessarily withheld.
3. Any student whose request for waiver of regulations has been denied has the right to appeal. Normally, any such appeal must be made in writing, clearly stating the basis for the appeal, and must be directed as follows:
 - Course prerequisites or co-requisites: to the appropriate committee on undergraduate studies.
 - Departmental Regulations: to the appropriate committee on undergraduate studies where the department refuses to recommend the waiver, or to the Senate Committee on Undergraduate Studies, c/o The Office of the Registrar, where the appropriate committee on undergraduate studies denies the request for waiver.
 - Faculty and School Regulations: to the Senate Committee on Undergraduate Studies, c/o The Office of the Registrar.
 - General Academic Regulations (Undergraduate): to the Executive Committee of Senate, c/o The Office of the Registrar.
 - Scholarships, Bursaries, Awards, Medals and Prizes Regulations: to the Executive Committee of Senate, c/o The Office of the Registrar.
4. Appeals cannot be made on the basis of the grades awarded in individual courses, as the student will normally have had the opportunity to contest grades immediately after the release of examination results (see **Access to Final Examination Scripts and Rereading of Final Examination Scripts**). Dissatisfaction with grades is not sufficient grounds for an appeal. Notwithstanding the above, and recognizing that the awarding of grades is an academic matter within the purview of experts in a

discipline or subject area, students who wish to question the grades awarded in individual courses may consult with the following in the order given:

- the course instructor
- the head of the appropriate academic unit
- the Dean, Vice-President or Associate Vice-President of the appropriate Faculty, School, or Campus.

5.14.3 Information Required in Letters of Appeal

1. Appeals must be made in writing, clearly stating the basis for the appeal, and must be directed to the secretary of the appropriate University committee.
2. In the letter of appeal, the student must clearly and fully provide: name, current address, telephone number, Memorial University of Newfoundland e-mail address, student ID number, the decision being appealed and the remedy being sought. The grounds for the appeal, including health issues, bereavement and/or other acceptable cause, must be stated in the letter of appeal. Students must present independent evidence to corroborate statements made in the letter of appeal. Preferably, this evidence will come from a professional, such as a health professional, a counsellor, or a professor. However, letters from other knowledgeable parties may be acceptable.
3. In cases where an appeal is based on health issues, the student must produce a certificate from a health professional in the form of a note or letter. Such a note must be sufficiently specific to allow appropriate consideration of the student's case. The note must also clearly state that, in the opinion of the health professional, the problem was serious enough to have interfered with the student's work. Students should refer to **Information Required in Certificates from Health Professionals** for more complete information.
4. Students claiming bereavement as grounds must provide proof of death and evidence of a close personal relationship between themselves and the deceased.
5. **Confidentiality:** The committees to which appeals are made do require substantial information about the reasons for the appeals in order to make their decisions. However, the committees also recognize the students' rights to confidentiality. With this in mind, a student may discuss the reasons for his or her appeal with a University or Campus counsellor, who, with the student's permission and provided sufficient reasons exist, may then write a letter to the appropriate committee confirming that there were sufficient grounds for an appeal, without disclosing the special personal and confidential details of the case.

5.14.4 Information Required in Certificates from Health Professionals

1. Students who request permission to drop courses, to withdraw from University studies, to have examinations deferred or to obtain other waivers of University, departmental or course regulations based on health issues are required by the University to provide, in support of the request, a certificate from a health professional in the form of a note or letter. Such notes must be sufficiently specific to allow a proper consideration of students' cases. The University requires that all such notes must be on letterhead, must be signed by the health professional, must confirm the specific dates on which the student visited the health professional and should include details on the following:
 - the degree to which the health issue (or treatment, in the case of medication, for example) is likely to have affected the student's ability to study, attend classes, or sit examinations.
 - the length of time over which the student's abilities were likely hampered by the condition (e.g., recurring and severe back pain over a two-month period would likely have a more adverse effect on studies than a single episode of back pain requiring bed rest for a week)
 - the fitness of the student to resume studies (it is in the student's best interest not to return to studies prematurely).
2. **Confidentiality:** The University respects the confidentiality of all material contained in such notes. Students should request that their health professional retain a copy of such a note in case the note needs to be verified or reissued at a later date.

6 Non-Academic Regulations

6.1 Discipline

The President may use all means deemed necessary for maintaining discipline. Students found guilty of misbehaviour may be suspended or fined on the authority of the President, or expelled from the University by the President on the authority of the Board of Regents. (See the **Code of Student Conduct**)

6.1.1 Traffic and Parking Regulations On Campus

Students, employees, service personnel, and other persons having a direct association with the University, Health Sciences Centre, or the Fisheries and Marine Institute wishing to park a vehicle in a designated area on campus must obtain a parking permit. Traffic and parking regulations on campus are enforced by Campus Enforcement and Patrol assisted by the Royal Newfoundland Constabulary.

Application forms for vehicle parking permits, copies of the Traffic and Parking Rules and Regulations, and other information pertaining to traffic and parking on campus, are available at the Campus Enforcement and Patrol Office, Facilities Management Building, Room FM1018, or the Health Sciences Centre, Room H2720, or the Fisheries and Marine Institute, Room C2210. Additional Information regarding the Traffic and Parking Rules and Regulations is also available at www.mun.ca/facman/parking_roads/.

Dean

Rankin, L., B.A. *British Columbia*, M.A. *Trent*, Ph.D. *McMaster*;
Associate Professor of Archaeology; Acting Dean, June 1, 2011
- June 30, 2012

Phillips, L., B.A. *British Columbia*, M.A., Ph.D. *Toronto*; Professor
of Anthropology; Dean, as of July 1, 2012

Associate Dean (Research and Graduate)

Dyck, C., B.A.(Hons.) *Saskatchewan*, M.A., Ph.D. *Toronto*;
Associate Professor of Linguistics

Associate Dean (Undergraduate)

to be announced

Senior Administrative Officer

Corbett, L., B.B.A. *Memorial*

Department of Anthropology

www.mun.ca/anthro/

Head

Tate, M., B.A. *York*, M.Sc. *London*, Ph.D. *London School of
Economics*; Associate Professor

Professores Emeriti

Briggs, J.L., M.A. *Boston*, Ph.D. *Harvard*, F.R.S.C.; University
Research Professor, Awarded 1986, Henrietta Harvey
Professor, 1994-1997

Leyton, E.H., B.A., M.A. *British Columbia*, Ph.D. *Toronto*

Honorary Research Professors

Andersen, R.R., B.A. *Knox*, M.A. *Emory*, Ph.D. *Missouri*

Nemec, T.F., B.A., M.A., Ph.D. *Michigan*

Tanner, A., B.A., M.A. *British Columbia*, Ph.D. *Toronto*

Professors

Fife, W., B.A.(Hons.) *Winnipeg*, M.A. *Western Ontario*, Ph.D.
McMaster

Roseman, S.R., B.A.(Hons.) *Toronto*, M.A., Ph.D. *McMaster*;
Winner of the President's Award for Outstanding Research
2002-2003

Associate Professors

Carbonella, A., B.A., M.A., Ph.D. *City University of New York*

Clark, J.R., B.A. *Memorial*

Gordon, K.E., B.A.A. *Ryerson*, M.A. *Windor*, Ph.D. *York*

Whitaker, R., B.A.(Hons.) *Memorial*, M.A. *York*, Ph.D. *California*

Assistant Professor

Davis, R., B.A.(Hons.) *Queen's*, M.A., Ph.D. *Memorial*

Adjunct Professors

Natcher, D., B.A. *Mercyhurst*, M.A. *Alaska (Fairbanks)*, Ph.D.
Alberta

Sider, G., B.A. *Pennsylvania*, M.A. *Toronto*, Ph.D. *New School for
Social Research*

Department of Archaeology

www.mun.ca/archaeology/about/

Head

Brown, S.C., B.A. *Melbourne*, Ph.D. *Toronto*; Professor

Professor Emeritus

Tuck, J.A., A.B., Ph.D. *Syracuse*, F.R.S.C.; University Research
Professor, Awarded 1984; Henrietta Harvey Professor, 1999-
2005

Honorary Research Professor

Jerkic, S.M., B.A. *Beloit College*, M.A., Ph.D. *Toronto*

Professors

Deal, M., B.A. *Dalhousie*, Ph.D. *Simon Fraser*

Pope, P.E., B.A. *Princeton*, M.Litt. *Oxford*, M.A., Ph.D. *Memorial*;
F.S.A.; Winner of the President's Award for Outstanding
Research, 2001-2002; University Research Professor, Awarded
2008

Renouf, M.A.P., B.A., M.A. *Memorial*, Ph.D. *Cantab*; Winner of the
President's Award for Outstanding Research 1992-1993;
Canada Research Chair in North Atlantic Archaeology; Fellow
of the Royal Society of Canada

Associate Professors

Blaser, M.E., Lic. *Buenos Aires*, M.A. *Carleton*, Ph.D. *McMaster*;
Canada Research Chair in Aboriginal Studies

Rankin, L., B.A. *British Columbia*, M.A. *Trent*, Ph.D. *McMaster*

Whitridge, P.J., B.A. *Toronto*, M.A. *McGill*, Ph.D. *Arizona State*

Assistant Professors

Gaulton, B., B.A., M.A., Ph.D. *Memorial*

Grimes, V.H., B.A. *Memorial*, M.Sc., Ph.D. *Bradford*

Moro Abadia, O., B.A.(Hons.), D.E.A., Ph.D. *Cantabria*

Adjunct Professors

Stopp, M., B.A. *Wilfrid Laurier*, M.A. *Memorial*, M. Phil, Ph.D.
Cantab

Sutherland, P.D., B.A.(Hons.) *Toronto*, Ph.D. *Alberta*

Department of Classics

www.mun.ca/classics/home/

Head

Allen, T.J., B.A. *Amherst*, M.A. *Texas at Austin*, Ph.D. *Alberta*;
Associate Professor

Associate Professors

Levett, B., B.A. *Trent*, M.A. *Calgary*, Ph.D. *Washington*

Roman, L., B.A. *Harvard*, Ph.D. *Stanford*

Simonsen, K., B.A. *British Columbia*, M.A., Ph.D. *Toronto*

Assistant Professors

Maynes, C., B.A. *Alberta*, M.A., Ph.D. *Toronto*

Nikolic, M., M.A. *Calgary*, Ph.D. *Victoria*

Adjunct Professor

Rossiter, J.J., M.A. *Edinburgh*, Ph.D. *Alberta*

Department of Economics

www.mun.ca/econ/home/

Interim Head

Tsoa, E.Y., B.A. *Taiwan*, M.A., Ph.D. *Notre Dame*; Professor

Professor Emeritus

Schrank, W.E., B.Mech.Eng. *Cooper Union*, M.Indl.Eng. *New York*,
M.S., Ph.D. *Wisconsin*

Professors

Feehan, J.P., B.A. *Memorial*, M.Sc. *London School of Economics*,
Ph.D. *Carleton*; Director, J.R. Smallwood Foundation

Locke, L.W., B.Sc., B.A. *Memorial*, M.A., Ph.D. *McMaster*

May, J.D., B.Comm. *Queen's*, D.Phil. *York (England)*; Cross
appointments to the Faculty of Business Administration and the
Division of Community Health and Humanities

Roy, N., B.A. *McGill*, Ph.D. *Johns Hopkins*

Wernerheim, C.M., B.A. *Simon Fraser*, Ph.D. *Uppsala*

Associate Professors

Chu, K.H., B.Soc.Sc. *Hong Kong*, M.Phil. *Chinese University of
Hong Kong*, Ph.D. *Toronto*

Lynch, S.J., B.A. *Wilfrid Laurier*, M.A. *McMaster*

Martinez-Espinoza, R., Licenciatura *Santiago de Compostela*,
M.Sc., D. Phil. *York, England*

Riser, G.E., B.S. *Utah*

Waples, M.J., B.Ec.(Hons.) *Sydney*, M.A. *Waterloo*, Ph.D.
McMaster, C.A. *Australia*

Assistant Professor

Lyssenko, N., M.A. *St. Petersburg State University*, Ph.D. *Carleton*

Department of English Language and Literature

www.mun.ca/english/home/

Head

Walsh, D., B.A., M.A. *Wyoming*; Associate Professor

Professores Emeriti

Buchanan, R., B.A. *Keele*, Ph.D. *Birmingham*

Gardner, P.G., M.A. *Cantab.*, Ph.D. *Liverpool*, F.R.S.L.; University
Research Professor, Awarded 1988

Kirwin, W.J., B.A. *Bowdoin*, M.A., Ph.D. *Chicago*, D.Litt. *Memorial*

Miller, E., B.A., B.A.(Ed.), M.A., Ph.D. *Memorial*; Winner of the
President's Award for Distinguished Teaching, 1991-92

O'Dea, S., O.N.L., B.A., M.A. *Memorial*, Winner of the President's
Award for Distinguished Teaching, 1988-1989; Public Orator

O'Flaherty, P.A., M.A. *Memorial*, Ph.D. *London*
 Pitt, D.G., B.A. *Mount Allison*, M.A., Ph.D. *Toronto*, LL.D. *Mount Allison*; D. Litt. (Honorary), *Memorial*

Honorary Research Professor

Gardner, P.G., M.A. *Cantab.*, Ph.D. *Liverpool*, F.R.S.L.; University Research Professor, Awarded 1988

Professors

Cumming, M.D., B.A.(Hons.) *Wilfrid Laurier*, B.Ed. *Lakehead*, M.A., Ph.D. *Western Ontario*, Winner of the President's Award for Outstanding Research, 1989-1990
 Dalton, M., B.A.(Hons.) *Toronto*, M.A. *Memorial*
 Golfman, N., B.A. *Alberta*, M.A., Ph.D. *Western Ontario*
 Legge, V.E., B.A., B.Ed., M.A., Ph.D. *Memorial*; Winner of the President's Award for Distinguished Teaching, 2007-2008
 Lynde, D.C., B.A.(Hons.) *Queen's*, M.A., Ph.D. *Toronto*
 Mathews, L.M., B.A.(Hons.), M.A. *Carleton*, Ph.D. *British Columbia*; Coordinator, Diploma in Professional Writing
 Nichol, D.W., B.A.(Hons.), M.A. *Carleton*, Ph.D. *Edinburgh*; Winner of the President's Award for Outstanding Research, 1993-1994; Graduate Co-ordinator
 O'Dwyer, B.T., B.A. *Saint Mary's*, M.A. *Memorial*, P.G.Dip. *The Hague*, Ph.D. *Edinburgh*
 Rompkey, R.G., O.C., C.D., ChNM (France), M.A., B.Ed. *Memorial*, Ph.D. *London*, F.R.S.C., F.R.Hist.S.; University Research Professor, Awarded 2001
 Schipper, W., B.A., M.A. *Windsor*, Ph.D. *Queen's*
 Schrank, B., B.A. *Brooklyn*, M.A., Ph.D. *Wisconsin*
 Shorrocks, G., B.A.(Hons.), P.G.C.E. *Birmingham*, M.A., Ph.D. *Sheffield*
 Staveley, A., B.A.(Hons.), Post.grad. Dip.Ed. *Reading*, M.A., Ph.D. *Memorial*; Winner of the President's Award for Distinguished Teaching, 1994-1995; Deputy Public Orator

Associate Professors

Ayers, P.K., B.A.(Hons.), M.A., Ph.D. *Toronto*
 Balisch, L.F., B.A. *King's College*, B.Ed. *Dalhousie*, M.A., Ph.D. *Memorial*
 Clissold, B., B.A.(Hons.) *York*, M.A., Ph.D. *McGill*
 Farquharson, D., B.A. *Alberta*, M.A., Ph.D. *Memorial*
 Finley, R., B.A. *Dalhousie*, M.A., Ph.D. *Toronto*
 Ingersoll, S., B.A. *Mount Allison*, M.A. *Memorial*
 Lockett, C., B.A. *York*, M.A. *Toronto*, Ph.D. *Western Ontario*
 Lokash, J., B.A.(Hons.), M.A., Ph.D. *McGill*
 Pedri, N., B.A. *Windsor*, M.A., Ph.D. *Toronto*
 Skidmore, J., B.A.(Hons.) *Queen's*, M.A., Ph.D. *Toronto*; Coordinator, Diploma in Performance and Communications Media

Assistant Professors

Juhasz-Ormsby, A., B.A.(Hons), B. Ed., Ph.D. *Eötvös Loránd, Budapest*, M.A. *Central European University*, Budapest
 Loman, A., B.A. *Victoria*, M.A., Ph.D. *Queen's*
 Ormsby, R., B.A. *Toronto*, M.A. *Birmingham*, Ph.D. *Toronto*
 Polack, F., B.A., M.A., Ph.D. *Tasmania*, Australia

Director of E.S.L. Programs

Benger, J., B.A. *McGill*, M.A. *Toronto*

Manager of Academic Program

Bobby, N., B.A., M.A. *Madras*

 appointment with Department of Biology; Cross appointment
 with Department of Earth Sciences

Lepawsky, J., B.A. *British Columbia*, M.A. *Queen's*, Ph.D.
Kentucky

Simms, A., B.A. *Memorial*, M.Sc., Ph.D. *Calgary*; Cross
 appointment with Faculty of Medicine

Simms, É.L., B.Sc. *Montréal*, M.Sc. *Sherbrooke*, Ph.D. *Montréal*

Assistant Professors

Finnis, J., B.Sc.(Env) *Guelph*, Ph.D. *Colorado*

Keeling, A., B.A.(Hons.) *Carleton*, M.A., Ph.D. *British Columbia*
 Vodden, K.M., B.A.(Hons.) *Western Ontario*, M.A., Ph.D. *Simon
 Fraser*

Adjunct Professors

Batterson, M., B.A.(Hons.) *Wales*, M.Sc., Ph.D. *Memorial*

Brown, C., B.Sc.(Hons.) *University of Reading*, Ph.D. *University of
 Portsmouth*

Dyke, A.S., B.Sc.(Hons.) *Memorial*, M.A., Ph.D. *Colorado*

Forbes, D.L., B.A. *Carleton*, M.A. *Toronto*, Ph.D. *British Columbia*

Freshwater, D., B.A. *Brock*, M.A. *McMaster*, Ph.D. *Michigan State*

Larouque, C.P., B.Sc.(Hons.) *Saskatchewan*, M.Sc., Ph.D. *Victoria*

Liverman, D.G.E., B.Sc.(Hons) *Edinburgh*, M.Sc., Ph.D. *Alberta*

Smith, I.R., B.Sc.(Hons.), M.Sc. *Western Ontario*, Ph.D. *Alberta*

Department of German and Russian

www.mun.ca/german/about/

Head

Warkentin, E.J., B.A.(Hons.) *Winnipeg*, M.A., Ph.D. *Alberta*;
 Associate Professor; Program Coordinator European Studies.
 Program Coordinator Communication Studies

Professors

Durrant, J.S., B.A. *Western Ontario*, M.A. *Toronto*, Ph.D. *London*
 Snook, J.M., B.A.(Hons.) *Toronto*, M.A. *Queen's*, Ph.D. *Waterloo*,
 A.R.C.T. *Toronto*

Associate Professor

Buffinga, J.O., B.A., M.A. *Western Ontario*, Ph.D. *British Columbia*;
 Program Co-ordinator, Film Studies

Assistant Professors

Brookes, A., B.A. *Toronto*, M. Phil. *Yale*

Dyer, J., B.A. (Hons) *Trent University*, M.A. *Western Ontario*,
 Ph.D. *Amsterdam*

Mayr, M., M.A., Ph.D. *Western Ontario*

Department of History

www.mun.ca/history/home/

Head

Cadigan, S.T., B.A.(Hons.) *Memorial*, M.A. *Queen's*, Ph.D.
Memorial; Professor

Professores Emeriti

Bassler, G.P. Cand. Phil. *Munich*, Ph.D. *Kansas*
 den Otter, A.A., B.A. *Dordt*, M.A., Ph.D. *Alberta*
 Hiller, J.K., B.A. *Oxon*, M.A. *Memorial*, Ph.D. *Cantab*; University
 Research Professor

Honorary Research Professors

English, C.J.B., B.A. *Toronto*, B.Ed. *Memorial*, M.A., Ph.D.
Toronto, LL.B. *Dalhousie*

Hiller, J.K., B.A. *Oxon*, M.A. *Memorial*, Ph.D. *Cantab*; University
 Research Professor

Ryan, S.P., B.A.(Ed.), B.A., M.A. *Memorial*, Ph.D. *London*,

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic

integrity.

2 Faculty Description

The Faculty of Arts offers a wide range of undergraduate and graduate programs in the social sciences and the humanities, offering excellence in both teaching and research. These degree programs examine culture, thought, prehistory and history, human interactions and the social and natural forces that constantly transform our society. An Arts education can provide incomparable advantages. Students gain the critical-thinking, analytical and communication skills needed to succeed and adapt in a changing world. This can lead to exciting, productive careers. One of Memorial University of Newfoundland's largest and most diverse units, the Faculty of Arts is a place where you can study what fascinates you, and pursue a program that suits your aspirations for learning and career. At the graduate level, students find unique programs and the freedom to develop their knowledge and expertise. Our faculty conduct research in a wide variety of areas, making discoveries that foster our understanding of the past, present and future. Our alumni work in a wide variety of fields not only in Newfoundland and Labrador, but also in Canada and the rest of the world. Their services are in demand because they have learned to define and analyse problems, to think creatively, and to communicate to others. Members of the faculty are also actively engaged in the community, whether helping to understand complex problems, working with groups to preserve culture, hosting public lectures and readings, or helping raise awareness of significant issues relevant to the well-being of people and communities.

Additional information regarding the Faculty of Arts is available at www.mun.ca/arts/about/.

3 Admission to the Bachelor of Arts General Degree Programs

These regulations shall also apply to multidisciplinary and interdepartmental programs. In such cases, the student should contact the Program Co-ordinator or supervisor.

1. Declaration of the Bachelor of Arts as a degree program may be made at the time of application to the University or by means of the **DECLARATION/CHANGE OF ACADEMIC PROGRAM** form following admission to the University. This form may be obtained at www.mun.ca/regoff/registration/Declare_Change_Acad_Prog_AS_0212.pdf or in-person at the Office of the Registrar.
2. A student who intends to complete a degree in the Faculty of Arts must also declare a Major and Minor (or second Major) chosen according to the **Major Program** and the **Minor Program** below. In most cases, this declaration may be made at the time of application to the University or, following admission to the University, by means of the **DECLARATION/CHANGE OF ACADEMIC PROGRAM** form, which must be submitted to the Office of the Registrar.
3. A student is encouraged to declare a Major and Minor (or second Major) no later than the semester in which they next attend the University following completion of 18 credit hours in courses applicable to their program(s).
4. A student is strongly advised to consult with departments or program coordinators or supervisors before making a declaration to the department or program of his/her intended Major or Minor.
5. In the case of programs with authorized admission requirements which go beyond the general admission requirements of the University, a student should make formal application to the department, coordinator or supervisor after completion of the program's admission requirements.

4 Program Regulations - General and Honours Degrees

In these regulations, all references to Heads of Departments and Program Supervisors are to be read as "Head of Department or delegate" and "Program Supervisor or delegate".

A student completing a degree program in the Faculty of Arts will normally follow the degree regulations in effect in the academic year in which he/she first successfully complete courses at Memorial University of Newfoundland. However, a student may elect to follow subsequent regulations introduced during his/her tenure in the program.

4.1 Bachelor of Arts General Degree Components

1. A student for the General Degree of Bachelor of Arts must complete a minimum of 120 credit hours in courses subject to the following regulations.
2. The Bachelor of Arts General Degree consists of the following components:
 - a. courses from a set of **Core Requirements**, some of which may also satisfy requirements of the Major and Minor programs
 - b. an approved concentration of courses known as the **Major Program**
 - c. an approved concentration of courses known as the **Minor Program**
 - d. **Electives**

4.1.1 Core Requirements

A student must complete the following Core Requirements. A student is strongly advised to complete the **Core Requirements** within the first 60 credit hours of their undergraduate program. Courses satisfying Core Requirements may also be used to satisfy requirements of Major and Minor programs, subject to the requirements outlined below:

1. To satisfy the minimum **Core Requirements**, a student shall take no more than 9 credit hours in courses from any one discipline.
2. A student may apply up to 9 credit hours of the **Core Requirements** towards the **Major Program** and up to 9 credit hours of the **Core Requirements** towards the **Minor Program**.
3. Specific Core Requirements may also be satisfied by the demonstration of equivalent competency in accordance with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**, e.g., Advanced Standing, Challenge for Credit, etc.
4. A student who is concurrently completing the **Bachelor of Commerce (Co-operative)** degree should refer to the entry **Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** immediately following these regulations.
5. A History course may be used to meet the **Humanities** or the **Social Sciences** Core Requirements, but not both.

4.1.1.1 English Requirement

A student must complete 6 credit hours in courses in English at the first-year level.

4.1.1.2 Second Language Requirement

A student must complete 6 credit hours in courses in a single language other than English, or demonstration of equivalent competency

in a second language. This requirement may be met by the completion of two courses in languages such as French, German, Greek, Hebrew, Innu-aimun, Inuktitut, Italian, Irish Gaelic, Japanese, Latin, Mandarin Chinese, Russian, Sanskrit, or Spanish, or other languages that may be offered from time to time. Prior to registration a list of courses which may be used to fulfill this requirement will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

4.1.1.3 Numeracy/Science Requirement

A student must complete 6 credit hours in courses chosen from the following: Biochemistry, Biology, Chemistry, Computer Science, Earth Sciences, Economics 2010, Economics 2020, Engineering, Environmental Science, Geography (laboratory courses only), Mathematics and Statistics, Physics, Psychology, Science 1000, 1150, 1151, 3000, 3001.

4.1.1.4 Humanities Requirement

A student must complete 12 credit hours in courses in at least two disciplines chosen from the following: Classics, Communications Studies, English, French, Gender Studies, German, History, Italian, Linguistics 2025, 2026, 2030, 2031, 2700, 2701, 2702, 2703, 2704, 2705, 2706, Medieval Studies, Philosophy, Religious Studies, Russian, Spanish.

These courses are exclusive of the minimum requirements for English and a second language as stated in **English Requirement** and **Second Language Requirement** above.

4.1.1.5 Social Sciences Requirement

A student must complete 12 credit hours in courses in at least two disciplines chosen from the following: Anthropology, Archaeology, Economics, Environmental Studies 1000, Environmental Studies 2000, Folklore, Geography (non-laboratory courses only), History, Law and Society, Linguistics, Police Studies, Political Science, Sociology.

4.1.1.6 Research/Writing Requirement

A student must complete a Research/Writing requirement. A student may complete 6 credit hours in courses in Social Sciences or Humanities which are designated research/writing courses to satisfy this Clause and may concurrently satisfy 6 credit hours from the **Humanities Requirement** and/or the **Social Sciences Requirement** above. Prior to registration a list of courses which may be used to fulfill this requirement will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

4.1.2 The Major Program

A student shall complete an approved concentration of courses to be known as the Major program, consisting of not fewer than 36 nor more than 45 credit hours taken in a subject listed in **Departmental Major Programs** or **Interdepartmental Major Programs** as described below.

4.1.2.1 Departmental Major Programs

1. Departmental Major Programs are available in the following subjects and are administered by departments: Anthropology, Archaeology, Classics, Computer Science, Economics, English Language and Literature, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Mathematics and Statistics, Philosophy, Political Science, Psychology, Religious Studies, Russian, Sociology, Spanish.
2. A student who has completed courses in the area of the Major at another university is required to complete at least 12 credit hours in that subject at this University.
3. A student must follow the regulations for the Major programs as set forth in the appropriate section of the Calendar.
4. The Head of the Department or Departmental Undergraduate Academic Advisor of the Major program will advise the student on the selection of courses in the Major.
5. In Departments which offer programs leading to both a degree of Bachelor of Arts and a degree of Bachelor of Science, a student is free to choose the degree program he/she wishes to follow and may change from one to the other; however, he/she may not obtain both degrees in the same Major subject.

4.1.2.2 Interdepartmental Major Programs

1. Interdepartmental Major Programs are available in the following subjects which, because of their interdepartmental character, will each be administered jointly by the participating departments through a Program Coordinator: Canadian Studies, Communications Studies, Drama and Music, Law and Society, Medieval Studies, Police Studies. These programs shall require not fewer than 36 nor more than 54 credit hours for the Major.
2. A student completing an interdisciplinary Major program must choose a Minor (or a second Major) in a single discipline.
3. A student who has completed courses in the area of the Major at another university is required to complete at least 12 credit hours in that subject or in courses applicable to the program at this University.
4. A student must follow the regulations for the Major programs as set forth in the appropriate section of the Calendar.
5. The Head of the Department or Program Coordinator of the Major program will advise the student on the selection of courses in the Major.
6. In Departments which offer programs leading to both a degree of Bachelor of Arts and a degree of Bachelor of Science, a student is free to choose the degree program he/she wishes to follow and may change from one to the other; however, he/she may not obtain both degrees in the same Major subject.

4.1.3 The Minor Program

A student shall complete an approved concentration of courses to be known as the Minor program taken in a subject other than that of the Major and chosen from the **Departmental Minor** or **Interdisciplinary Minor** Programs as described below.

4.1.3.1 Departmental Minor Programs

A Departmental Minor Program shall consist of at least 24 credit hours taken in a subject other than that of the Major and chosen from the subjects listed above under **Departmental Major Programs**.

1. A student must follow the regulations for the Minor program as set forth in the appropriate section of the Calendar.
2. The Head of the Department or Departmental Undergraduate Academic Advisor of the Minor program will advise the student on the selection of courses in the Minor.

3. A student who has completed courses in the area of the Minor at another university is required to complete at least 6 credit hours in that subject at this University.
4. Up to 12 credit hours in courses offered by a single department as part of an interdisciplinary program may be used to satisfy the requirements for the Minor, provided they are in accordance with the regulations governing that Minor.
5. In addition to the Departmental Minor Program in Arts disciplines and those detailed under the **Interdisciplinary Minor Programs** below, Minors are available through the Faculty of Business Administration, the School of Music, and departments in the Faculty of Science. These programs are governed by regulations which are detailed in the Calendar entries for the Faculty of Business Administration, the School of Music, and departments in the Faculty of Science.
6. As an alternative to a Minor, a student may complete a second Major program. They must follow all General and Departmental or Program Regulations for this Major program.
7. Departmental regulations are not intended to prevent a student from completing more than the minimum required credit hours in the subjects of their Major and Minor.

4.1.3.2 Interdisciplinary Minor Programs

An Interdisciplinary Minor Program shall consist of at least 24 credit hours taken in subjects other than that of the Major and chosen from the **Interdisciplinary Minor** Programs listed below.

1. Interdisciplinary Minor programs are available in Aboriginal Studies, European Studies, Film Studies, Law and Society, Medieval Studies, Newfoundland and Labrador Studies, and Russian Studies. These programs are governed by regulations which are detailed under the Calendar entries for Aboriginal Studies, European Studies, Film Studies, Law and Society, Medieval Studies, Newfoundland and Labrador Studies, and Russian Studies.
2. A student completing an interdisciplinary Minor program must choose a Major in a single discipline.
3. A student must follow the regulations for the Minor program as set forth in the appropriate section of the Calendar.
4. The Program Supervisor of the Minor program will advise the student on the selection of courses in the Minor.
5. A student who has completed courses in the area of the Minor at another university is required to complete at least 6 credit hours in that subject or in courses applicable to the program at this University.
6. Up to 12 credit hours in courses offered by a single department as part of an Interdisciplinary Minor Program may be used to satisfy the requirements for the Minor, provided they are in accordance with the regulations governing that Minor.
7. In addition to the Minors in Arts disciplines and those detailed under the **Interdisciplinary Minor Programs**, Minors are available through the Faculty of Business Administration, the School of Music, and departments in the Faculty of Science. These programs are governed by regulations which are detailed in the Calendar entries for the Faculty of Business Administration, the School of Music, and departments in the Faculty of Science.
8. As an alternative to a Minor, a student may complete a second Major program. They must follow all General and Departmental or Program Regulations for this Major program.
9. Departmental regulations are not intended to prevent a student from completing more than the minimum required credit hours in the subjects of their Major and Minor.

4.1.4 Electives

1. In accordance with Regulations outlined under **Core Requirements, The Major Program** and **The Minor Program** above, a student must complete a minimum of 78 credit hours in courses offered by departments within the Faculty of Arts. Courses in Computer Science, Mathematics and Statistics, and Psychology may be applied to this requirement.
2. The remaining 42 credit hours (for a total of 120 credit hours required for the degree) will be electives; these may be chosen from offerings in Arts, Science, Business and Music (Musicologies and Music Theory and Composition only). A student may include as open electives up to 15 of these 42 credit hours in any subject area, with the exception of courses which are clearly practical or professional:
 - a. Outdoor Pursuits or Expeditions in Environmental Studies
 - b. Internships, Student Teaching or Practicum in Education
 - c. Activity and Coaching courses in Human Kinetics and Recreation
 - d. Applied Music or Ensemble Techniques in Music
 - e. Nursing Practice or Clinical Practicum in Nursing
 - f. Structural Practice Experience (SPE) in Pharmacy
 - g. Field Placements in Social Work
 - h. Master Classes in Fine Arts (Theatre)
 - i. Studio Courses in Fine Arts (Visual)

4.2 Graduation Requirements for the Bachelor of Arts General Degree

1. In the context of this regulation, any student attaining a grade of 55% or less in any course beyond the 1000-level in the Major or Minor is required to seek the advice of the appropriate department(s) at the beginning of the next semester to ensure that adequate progress is being maintained.
2. The minimum number of courses prescribed shall be understood to include any specific courses prescribed in the regulations of any department but excluding any 1000-level courses listed.
3. In order to graduate with the **General Degree of Bachelor of Arts**, a student shall obtain:
 - a. an average of 60% or higher on the minimum number of courses prescribed for the **Major Program**, excluding 1000-level courses, and
 - b. an average of 60% or higher on the minimum number of courses prescribed for the **Minor Program**, excluding 1000-level courses, and
 - c. an average of 2.0 points or higher per credit hour on the courses in Arts disciplines as indicated in the **Major Programs** above.

4.3 Bachelor of Arts (Honours) Degree Regulations

1. A program is offered leading to the Honours Degree of Bachelor of Arts. An Honours degree requires, over and above the

requirements of the **General Degree**, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program.

2. A student completing a degree program in the Faculty of Arts will normally follow the degree regulations in effect in the academic year in which he/she first entered Memorial University of Newfoundland. This is determined by the year of the student number. However, a student may elect to follow subsequent regulations introduced during his/her tenure in the program.

4.3.1 Admission and Registration

1. Admission to Honours programs is competitive and limited, depending upon available resources. A student should consult the criteria established for the program in question. To be considered for admission to an Honours program, a student shall submit an "Application for Admission to the Honours Program" form to the Registrar. The application must be approved by the Head of the Department or Program Supervisor of the Subject of Specialization before the student can be admitted to the program.
2. A student who wishes to enter an Honours program is strongly advised to consult the Head of the Department or Program Supervisor at the earliest possible date, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.
3. A student who has been awarded the General Degree of Bachelor of Arts may convert it to an Honours Degree of Bachelor of Arts by applying to the department of specialization and the Registrar and, upon approval of such application by the Department, completing the requirements for the Honours degree as set forth in the regulations.
4. Upon entering the program, the student shall be assigned a Faculty Advisor by the Head of the Department or Program Supervisor. The Faculty Advisor will be responsible for advising the student and the Head of the Department or Program Supervisor with respect to the student's program of studies.

4.3.2 Subjects of Specialization

Subjects which may be chosen as Subjects of Specialization for the Honours Degree of Bachelor of Arts are the following:

1. Those administered by Departments through the Head of the Department: Anthropology, Archaeology, Classics, Computer Science, Economics, English Language and Literature, Folklore, French, Geography, German, History, Linguistics, Mathematics, Philosophy, Political Science, Psychology, Religious Studies, Sociology.
2. Joint Honours Programs: A student may undertake a program of Joint Honours in two Subjects of Specialization (see **Course Requirements**, 3.c. and d.).

4.3.3 Course Requirements

A student for the Honours Degree of Bachelor of Arts shall complete a program of studies which shall consist of not fewer than 120 credit hours subject to the following regulations:

1. A student is required to complete the **Core Requirements** as detailed in the **Regulations for the General Degree of Bachelor of Arts**. These include:
 - a. English Requirement
 - b. Second Language Requirement
 - c. Numeracy/Science Requirement
 - d. Humanities Requirement
 - e. Social Science Requirement
 - f. Research/Writing Requirement

2. A student must also:

- a. Pass a general comprehensive examination in a Subject of Specialization. This examination may be written, or oral, or a combination of both. The comprehensive examination shall count as 3 credit hours in the Subject of Specialization; and/or
- b. Submit an Honours essay on an approved topic which, at the discretion of the Head of the Department or the Program Supervisor, may be followed by an oral examination thereon. Normally, the Honours essay will count as 3 credit hours in the Subject of Specialization, or as 6 credit hours in the case of linked (A/B) honours essays (please consult departmental regulations).

The semester in which the student sits for the comprehensive examination, and/or the semester in which the Honours essay is to be submitted, may be decided by the student after consultation with the Head of the Department or Program Supervisor.

A copy of the Honours essay must be submitted to the University Library upon completion. All Honours essays in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances which must be approved by the Committee on Undergraduate Studies. Copyright remains with the author. A signed release form must accompany an essay or dissertation when it is submitted to the University Library.

3. Further courses shall be chosen either

- a. In consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the **Subject of Specialization**, but in such a way that the student's program shall include not fewer than 60 credit hours in courses applicable to the Subject of Specialization, including the comprehensive examination and/or the Honours essay, at least 36 of which must be at the 3000 level or above, and not fewer than 24 credit hours in a Minor subject or program according to the Departmental or Program Regulations covering that Minor, and the total number of credit hours which may be applied to the degree is not fewer than 120; or
- b. In consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the **Subject of Specialization**, but in such a way that the student's program shall include not fewer than 60 credit hours in courses applicable to the Subject of Specialization, including the comprehensive examination and/or the Honours essay, at least 36 of which must be at the 3000 level or above, and not fewer than 36 credit hours in a Major subject or program according to the Departmental or Program Regulations governing that Major, and the total number of credit hours which may be applied to the degree is not fewer than 120.
- c. In consultation with the Faculty Advisors and with the approval of the Heads of the Departments or Program Supervisors of two Subjects of Specialization (Joint Honours), but in such a way that the student's program shall include not fewer than 42 and not more than 51 credit hours in courses approved for each of the Subjects of Specialization, including the comprehensive

examination and/or the Honours essay, of which at least 27 shall be at the 3000 level or above in each of the Subjects of Specialization, and the total number of credit hours which may be applied to the degree is not fewer than 120.

- d. In the case of Joint Honours, the student may choose the **Subject of Specialization** for the Honours essay and/or comprehensive examination.
- e. Other courses to make up the total of 120 credit hours may be chosen from any subjects listed under 2.a. with Canadian, Gender, Medieval, and Russian Studies added to the list of subjects and from courses listed under and in accordance with **Regulations for the General Degree of Bachelor of Arts, Electives**.

4.3.4 Departmental Regulations

A student for Honours degrees shall also comply with such additional requirements of the appropriate Department(s) as are approved by the Senate and printed in the Calendar.

4.3.5 Academic Standing

In order to graduate with an Honours degree, a student shall obtain:

1. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in the Honours subject(s) prescribed by the Department or, in the case of Joint Honours, Departments concerned), excluding 1000-level courses. A grade of 70% or better must be obtained in the Honours essay and/or comprehensive examinations; and
2. an average of at least 2.75 points on the total number of credit hours in the courses required for the degree. (See **General Academic Regulations (Undergraduate), Classification of General Degrees**.)

Note: A student who wishes to fulfil the requirements of 4.3.5., 1. above using repeated or substituted courses must obtain approval of the Head of the Department and the Committee on Undergraduate Studies. The Honours essay and/or comprehensive examinations may not be repeated or substituted.

4.3.6 Classification of Degrees

1. If a student's general average is 3.25 points or better per credit hour in required courses and his/her average is 3.5 points or better per credit hour in the courses in the Honours subject (excluding 1000-level courses), the student shall be awarded an Honours degree with First Class standing.
2. If a student fulfils the conditions of **Academic Standing** above but not of Regulation 1. under **Classification of Degrees**, the student shall be awarded an Honours degree with Second Class standing.
3. No classification will be given to the degree awarded a student who has completed (i) fewer than one half of the courses required for the degree at this University, or (ii) who has completed fewer than one half of the courses required for the degree at this University since 1959. All students for such degrees shall, however, fulfil the condition of **Academic Standing** above on the courses taken at this University since September 1959 in order to qualify for the degree.
4. A declared student for an Honours degree who fails to attain the academic standing specified in **Academic Standing** above but fulfils the academic requirements for a General degree shall be awarded a General degree, the classification of which shall be determined in accordance with **General Academic Regulations (Undergraduate), Classification of General Degrees**.

4.4 Regulations Governing Co-operative Education Program

See **Department of Economics**

4.5 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)

Any student who is admitted into the Bachelor of Commerce (Co-operative) program may simultaneously complete the requirements for a Bachelor of Arts program. Under those circumstances, regulations for the Bachelor of Commerce (Co-operative) program will be relaxed as follows. Notwithstanding clauses 4. c and 4.d of **The Curriculum** under the **Regulations for the General Degree of Bachelor of Commerce (Co-operative)**, students in the Bachelor of Commerce (Co-operative) program who are concurrently completing the Bachelor of Arts degree will be permitted to make the following adjustments to those clauses:

1. clause 4.c. - no fewer than 15 credit hours, but no more than 36 credit hours, in Business electives which must be chosen from **Table 4 Business Electives**.
2. clause 4.d. - no fewer than 12 credit hours, but no more than 33 credit hours, in elective courses chosen from the Faculty of Arts.

These adjustments to the normal curriculum will only be permitted for students who are graduating with the Bachelor of Commerce (Co-operative) degree and the Bachelor of Arts degree at the same convocation. In order to meet all of the requirements of both degree Programs at the same time, students who are completing the joint degrees are strongly advised to follow the Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts) Table below.

Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts)

Terms A/B	6 credit hours in English courses which must include English 1110 or 1021 Mathematics 1000 Economics 2010 and 2020 Business 1000 12 additional credit hours in non-Business electives [see Note 1. below]
Fall Academic Term 1	Business 1101 Business 1210 Statistics 2500 6 credit hours chosen from: Business 1600, Business 2010, Business 2400, Business 2710, and 3 credit hours in Major, Core or elective courses (see Note 1. below)
Winter Academic Term 2	Business 2101 Business 2210 Remaining 9 credit hours chosen from: Business 1600, Business 2010, Business 2400, Business 2710, and 3 credit hours in Major, Core or elective courses [see Note 1. below]
Spring	[see Note 2. below]
Fall Academic Term 3	Business 3310 Business 3401 Business 3700 At least 6 credit hours in Major, Core or elective courses [see Note 3 below]
Winter	Business 399W [see Note 2. below]
Spring Academic Term 4	Business 4000 Business 4050 Business 4320 Business 4330 Business 4500
Fall	Business 499W [see Note 2. below]
Winter Academic Term 5	Business 5301 At least 12 credit hours in Major, Core or elective courses [see Note 3. below]
Spring	Business 599W [see Note 2 below]
Fall Academic Term 6	Business 7000 At least 12 credit hours in Major, Core or elective courses [see Note 3. below]
Winter Academic Term 7	At least 15 credit hours in Major, Core or elective courses [see Note 3. below]

- Notes: 1. The Bachelor of Arts requires completion of a **Major Program**, a **Minor Program**, a set of **Core Requirements**, and **Elective** courses, totalling at least 78 credit hours in courses offered by departments within the Faculty of Arts (or Computer Science, Mathematics and Statistics, and Psychology). When the Bachelor of Arts is completed jointly with the Bachelor of Commerce (Co-operative):
- Minor program requirements are satisfied by Business courses specified in the **Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly With The Degree of Bachelor of Arts)** Table above.
 - Core requirements for English and Numeracy/Science are satisfied by courses completed in Terms A/B or during Terms 1 or 2 of the Bachelor of Commerce (Co-operative) degree.
 - It is recommended that the Core Requirement for 6 credit hours in courses in a second language be completed in Terms A/B of the Bachelor of Commerce (Co-operative) degree program.
 - Core requirements for 6 credit hours in research/writing courses may be satisfied by including two such courses within the 78 credit hours in courses offered by departments within the Faculty of Arts. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.
 - Major requirements for the Bachelor of Arts may be satisfied in 36 to 45 credit hours, depending on the department or program chosen. Students are strongly recommended to seek advice from the department or program of their Major to ensure that their proposed degree program is possible within the constraints of course scheduling and prerequisites.
2. Students are advised that, in order to complete the joint degrees within the minimum 150 credit hours, they must complete at least five of the courses required for the Bachelor of Arts as opportunities arise and as courses are offered. These courses may be completed during the Spring semesters between Terms A/B and Term 1, between Terms 2 and 3, or during any of the three Work Terms (for example, in the evening or by distance), or as sixth courses during any of the academic terms (following submission of a course load waiver).
3. To meet the requirements for the Bachelor of Commerce (Co-operative), not fewer than 15 and not more than 36 credit hours in Business electives must be chosen from **Table 4 Business Electives**. Students intending to complete the joint degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Arts (or Psychology, Mathematics and Statistics, and Computer Science). Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the joint degrees.

5 Limited Enrolment Courses

Certain course offerings in the Faculty of Arts will be identified as being Limited Enrolment Courses and will be clearly identified as such in the University Timetable. Students who have registered for a Limited Enrolment Course must confirm their registration either (1) by attending at least one of the first three hours of lectures in the course (and the first meeting of any laboratory section of the course, if appropriate); or (2) by notifying the department in writing within the first five university working days of the semester. Students who do not confirm their registration may be dropped from the course on the recommendation of the Head of Department.

6 Diploma Programs Offered in the Faculty of Arts

6.1 Objectives

Diploma programs are of distinct advantage to students who wish to complement their studies in one or more fields of specialization with a program that will help them relate their knowledge to growing sectors of the economy and to areas of increasing social concern. These programs assume and build upon the theoretical knowledge acquired in the completion of an undergraduate degree and will assist in easing the transition of graduates to the workplace.

6.2 Components

Courses satisfying the Honours, Major, Minor and elective components of an undergraduate degree may also be used to satisfy the requirements of a diploma program.

Diploma programs consist of between 24 and 36 credit hours in courses as specified in individual programs, including a field component of 6 credit hours in an approved instructional field placement and/or instructional field courses.

The purpose of the field component of the program is to provide students with an opportunity for practical and instructional field-oriented experiences as a means of broadening and reinforcing the other courses taken in the diploma program. The instructional field component may take a number of forms, depending on the nature of individual programs. Without limiting the generality of the definition, the instructional field component typically includes observation of and instruction in practical techniques and methods and their application, as well as the maintenance and submission of documentation and reports appropriate to the area of study.

Instructional field placements and instructional field courses may not normally be repeated.

6.3 Admission to Diploma Programs

Students seeking information about specific diploma programs should contact the diploma program coordinator, the Office of the Dean of Arts, or the Office of the Registrar.

1. Admission to all diploma programs is competitive and limited, depending upon available resources. For additional requirements stipulated by individual diploma programs, see the appropriate Calendar entry below.
2. All applications for admission or readmission must be submitted to the Office of the Registrar. A complete application package includes an application to the University (for those who have not attended Memorial University of Newfoundland in the two preceding semesters), an application to the Diploma Program and any other required documentation.
3. Applicants for admission to diploma programs must apply by completing the appropriate form available from the Office of the Registrar.

6.4 Graduation Requirements

1. To be eligible for the award of a diploma, a student must have obtained an overall average of 60% or higher in the courses prescribed for that program.
2. A minimum of 9 credit hours in courses prescribed for the diploma program must be completed at this University.

6.5 Diploma in Applied Ethics

Program Co-ordinator: Dr. P. Trnka, Department of Philosophy.

The Diploma helps to prepare students for the ethical challenges of various professions and for work as ethical consultants and analysts in government and private institutions (e.g., hospitals, businesses, environmental agencies).

6.5.1 Admission Requirements

Admission to the Diploma program is limited and competitive. Applicants with a B.A. or B.Sc. in hand and senior undergraduates will be preferred. Experience working in the health care or environmental sectors is an asset. Students interested in applying to the program should contact the Program Co-ordinator. Formal application is made through the Office of the Registrar.

6.5.2 Program of Study

The Diploma consists of 24 credit hours, including an Instructional Field Placement. A concentration in either bioethics, mental health ethics, or environmental ethics is required: courses toward a concentration must be chosen with the approval of the Program Co-ordinator.

6.5.3 Course List

Philosophy 2230

One of Philosophy 2551 or 2552 or 2561

One advanced (3000 or 4000 level) course in ethics or philosophy of law, approved by the Co-ordinator

Philosophy 4900 or 4300-4310

Philosophy 5000

Two additional, elective courses, approved by the Co-ordinator.

6.6 Diploma in Creative Writing

Program Co-ordinator: Dr. L. Mathews, Department of English Language and Literature

6.6.1 Program Description

The Diploma aims to develop students' skills in writing in a variety of genres conventionally described as "creative," such as fiction, poetry, drama, and creative non-fiction. It will also offer students the opportunity to take, as options, courses that provide a background in contemporary literature in these genres.

The eight course, 24 credit hour program will comprise at least five and as many as eight creative writing courses in at least three and as many as four genres. The overall aim of the program is to help students produce work that merits publication. To this end, the focus of the creative writing courses will be on the composition, critiquing, and editing of the students' own work, and, in both the creative writing and contemporary literature courses, on analysing examples of excellent contemporary writing.

6.6.2 Admission Requirements

As has traditionally been the case, students will compete for admission to individual Creative Writing courses via the portfolio system. The Diploma will be earned by accretion.

6.6.3 Program of Study

Students are required to complete a minimum of 24 credit hours of course work, including at least 15 credit hours from the following:

English 3900, English 3901, English 3902, English 3903, English 4910, English 4911, English 4912, and English 4913

The remaining courses must be taken from:

1. additional courses from the above list
2. one or more special topics courses in Creative Writing (English 4920-4930)
3. one or more of English 3100, 3155, 3156, 3158, 3160, 3161, 3171, 3172, 3173, 4080, 4270, 4302, 4822
4. one or more courses from the Diploma in Professional Writing

6.7 Diploma in English as a Second Language

Program Co-ordinator: J. Benger, Department of English Language and Literature

This program prepares students for positions in private language schools and community colleges in Canada and overseas, working primarily with adults whose first language is not English. The Diploma combines expertise from the Department of English Language and Literature, the Department of Linguistics, and the Faculty of Education. The required courses provide a solid understanding of the characteristics and needs of adult ESL learners.

6.7.1 Admission Requirements

Admission to the Diploma Program in English as a Second Language (ESL) is limited and competitive. A high level of English language proficiency is required. Students are advised to notify the program coordinator of their intention to apply for admission into this program. Formal application is made through the Office of the Registrar, normally in the second semester of the student's second year of study.

6.7.2 Program of Study

Students are required to complete a minimum of 27 credit hours of course work, including: 15 credit hours in language courses in English and/or Linguistics, 6 credit hours of Education studies, 6 credit hours of instructional field placement (Practicum). This practicum will acquaint students through observation and practice with Teaching English as a Second Language to adult learners.

6.7.3 Course List

Education 2222
Education 4950
English 2390
English 3650
English 5100
English/Linguistics 3105
Linguistics 2104
Linguistics 3155

6.8 Diploma in Geographic Information Sciences

Program Co-ordinator: Dr. É. Simms, Department of Geography

The Diploma in Geographic Information Sciences is of interest to students from a broad range of backgrounds. It is a valuable complement to social and natural sciences programs such as anthropology, biology, computer sciences, earth sciences, history, economics, engineering, health and medicine, physical oceanography, environmental sciences and environmental studies. The fields of remote sensing, geographic information systems (GIS) and cartography provide the most effective methods of gathering, managing, analysing and representing geographic information. Remote sensing images provide a resourceful information to observe and study the cultural and physical landscapes. Examples of remote sensing applications include the monitoring of spatial changes, environmental quality evaluation, natural resources exploration, assessment and monitoring, and archaeological site assessment. Geographic information systems enable the compilation, organization and processing of spatial (maps) and non-spatial (text, statistics, graphs) data. Socio-economic, political and environmental management decision-making is supported by the results of GIS analyses and modelling. Cartography involves the compilation, organization and visual representation of spatial information. A variety of geographical information can effectively be communicated through cartography.

6.8.1 Admission Requirements

Admission to the Diploma in Geographical Information Sciences is limited and competitive. Students are advised to notify the program coordinator of their intention to apply for admission into this program. Students who wish to enter this program must apply through the Office of the Registrar by April 1 for Fall semester registration and by October 15 for Winter semester registration.

To be considered for admission to the Diploma in Geographic Information Sciences, students will normally have completed 24 credit hours, including the courses listed in 1., 2., and 3., with an overall average of at least 65%.

1. Geography 1050 or one 1000-level course in applicant's Bachelor's Major program.
2. Mathematics 1000 or equivalent.
3. Two 1000- or 2000-level core courses in student's Bachelor's Major program, excluding the courses listed in 1. and 2. above.

Students who fulfill the eligibility requirements compete for a limited number of available spaces. Selection is based on academic performance.

6.8.2 Continuation Requirements

To be considered for the field placement courses Geography 4290 and 4919, the students for the Diploma in Geographic Information Sciences will normally have completed at least seven courses required for the program, with an overall average of 65%.

6.8.3 Program of Study

Students are required to complete a minimum of 30 credit hours of courses as listed below.

Note: The course Mathematics 2050 is a prerequisite to some of the fourth year courses required for the diploma.

6.8.4 Course List

Computer Science 1710
 Geography 2195
 Geography 3202
 Geography 3250
 Geography 3260
 Geography 4202
 Geography 4250
 Geography 4261
 Geography 4290
 Geography 4919

6.9 Diploma in Heritage Resources

Acting Program Co-ordinator: Associate Dean of Arts (Undergraduate)

Building on the student's academic grounding in anthropology/archaeology, folklore, history, geography, and other relevant disciplines, the program offers training in object documentation, identification, conservation, and display. Required courses give students both an awareness of the broad range of heritage resources - including objects, sites, landscapes, documents - and specific skills to deal with public perceptions of objects and artifacts. The program also includes a course in tourism management. Elective courses enable students to pursue their particular disciplinary interests.

The Diploma in Heritage Resources helps prepare students to work in the expanding heritage sector in Newfoundland or elsewhere. Students with this diploma will be better able to compete for positions in museums and historic sites and for employment with heritage consultants, and to participate in contracts involving heritage policy and planning, all part of the increasing regional and global importance of cultural tourism. The diploma in Heritage Resources will also be an advantage to students wishing to study heritage or cultural resources management at the graduate level.

This diploma program draws on the expertise of faculty members in various departments and faculties.

6.9.1 Admission Requirements

Admission to the Diploma in Heritage Resources program is limited and competitive. Students are advised to notify the Program Co-ordinator of their intention to apply for admission into this diploma program. Formal application is made through the Office of the Registrar, normally in the second semester of the student's second year of study.

6.9.2 Program of Study

Students are required to complete a minimum of 30 credit hours of course work, including 6 credit hours in instructional field courses, from the lists of required and elective courses below, with:

1. at least 15 credit hours from the **Required Courses** listed below, which must include 3 credit hours in a field course in Cultural Resources Management and at least 12 credit hours chosen from Material Culture, Archaeological Conservation, Collections Management, Introduction to Museums & Historic Sites and Tourism Management.
2. at least 12 credit hours from the **Elective Courses** listed below, chosen to include at least 3 credit hours in a course designated as an instructional field course. Instructional field-oriented courses will deal with a wide array of artifact-related research in historic sites/museums. These instructional field courses will be advertised by the Program Co-ordinator.

6.9.3 Course List

6.9.3.1 Required Courses

Archaeology 3587
 Archaeology/Folklore 3591
 Archaeology 3710/Folklore 3700
 Archaeology 3850/Folklore
 Archaeology/Folklore/Geography 4015*
 Business 6020

6.10 Diploma in Performance and Communications Media

Program Co-ordinator: J. Skidmore, Department of English Language and Literature

Memorial University of Newfoundland offers a specialized Diploma Program in Performance and Communications Media. This Diploma draws on the expertise of the Drama Specialization, Department of English, Distance Education, Learning and Teaching Support (DELTS), and CBC Television. Students receive an introduction to multi-media in the area of dramatic arts and video techniques. Students will be introduced to the wide applications of stage and video craft through a program of project-oriented courses. Required courses give students specific skills in stage and video craft and enable students to specialize in their own particular practical area of interest.

The Diploma in Performance and Communications Media prepares students to work in the cultural industries in Newfoundland (or other parts of North America). Students with this unique training are better able to work across existing media.

6.10.1 Admissions

Academic Requirements: Applicants for the Diploma program must satisfy the general admission requirements of the University.

Interviews: In addition to meeting the general requirements of the University for admission to diploma programs, applicants for the Diploma in Performance and Communications Media must undergo an audition/interview to the satisfaction of the Program Co-ordinator. Enrolment in the Diploma in Performance and Communications Media is limited and competitive. Students are advised to notify the Program Co-ordinator in their first year if they intend to apply for this Diploma. Formal application normally takes place in the second semester of second year.

6.10.2 Program of Study

1. Students must complete a minimum 18 credit hours of course work in the following required courses with an overall average in these courses of at least 65%: English 3350, English 3351, English 3816, English 4400, English 4401, and English 4402.
2. Students must also complete 6 credit hours in English 5000 - Instructional Field Placement. Admission to this instructional field placement course is by application to the Program Co-ordinator, normally at least three months before the beginning of the placement, and is limited to students who at the time of admission have completed the six courses listed above with an overall average of at least 65% and who already hold a first degree or are in their final year of a degree program as confirmed by the Office of the Registrar.

6.11 Diploma in Police Studies

Program Co-ordinator: A. Morris, Department of Sociology

The Diploma Program in Police Studies is offered to students who are recruit cadets of the Royal Newfoundland Constabulary. The program provides recruit cadets with academic and experiential learning components of a degree program relevant to their future work as police officers.

Police Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Police Studies**.

6.11.1 Admission Requirements

Admission to the Diploma program is limited and competitive. Applicants to the Diploma program must be recruit cadets of the Royal Newfoundland Constabulary who satisfy the **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)**, and at the time of admission must have completed either a university degree in any discipline from a recognized university, or have completed at a post-secondary institution, the equivalent of 15 credit hours, which should normally include 6 credit hours in English, 6 credit hours in Psychology, and 3 credit hours in Sociology.

6.11.2 Continuation Requirements

Students dismissed as recruit cadets by the Royal Newfoundland Constabulary will be required to withdraw from the Diploma in Police Studies.

6.11.3 Program of Study

Following admission to the Diploma program and until completion of all Diploma program requirements, students must normally carry a course load of 15 credit hours in each of the Fall and Winter semesters. Students must complete a total of 36 credit hours in the following required courses:

6.11.3.1 Required Courses

Police Studies 2000
 Police Studies 3500
 Police Studies 5000
 Political Science 3620 or the former Political Science 3521
 Political Science 3820 or the former Political Science 3720
 Psychology 2150
 Psychology 3640
 Sociology 3290
 Sociology 3306
 Sociology 3395
 Sociology 4212

6.11.3.2 Alternate Courses

Anthropology 2260
 Anthropology 2414
 Anthropology 3240
 Archaeology 2492
 English 2160
 Gender Studies 1000
 Gender Studies 2005
 Geography 2495

 Religious Studies 1000
 Religious Studies 2610
 Religious Studies 3650
 Sociology 2270
 Sociology 3130
 Sociology 4095
 Sociology 4210

6.12 Diploma in Professional Writing

Program Co-ordinator: Dr. J. Lokash, Department of English Language and Literature

6.12.1 Program Description

The Diploma in Professional Writing (DPW) aims to develop students' skills in a variety of genres such as the report, feature article, satirical commentary, speech, song lyric and review. Students complete 24 credit hours in which they are introduced to professional writing as a process: they draft, revise and edit their work in preparation for publication in various media.

The 6 credit hour instructional field placement is completed in a professional situation, e.g., a division of the University, an arts organization, government or the media. Students also attend seminars on professional writing and submit journals about their work experience.

6.12.2 Admission Requirements

Applicants to the Diploma in Professional Writing should include a letter of application, a transcript (if the applicant is a student or a graduate of a university program), and a portfolio of work. Admission to the diploma is limited. The following are eligible to apply:

1. students taking a Bachelor of Arts or another degree program;
2. graduates of a Bachelor of Arts or another degree program; and
3. individuals without a degree who wish to develop skills in writing and editing. Such applicants must meet the prerequisite requirements for the Diploma in Professional Writing courses.

6.12.3 Program of Study

Students are required to complete a minimum of 24 credit hours of course work, including:

1. English 2010
2. English 3910, English 3920, and English 4914
3. One of English 3817, English 3911, English 3912, English 3913 and English 3914.
4. One of English 3900, 3901, 3902, 3903, 4910, 4911, 4912, 4913.
5. English 5200 (6 credit hours).

Further information regarding the Diploma in Professional Writing may be obtained at www.mun.ca/english/diplomas/professional.php.

7 Waiver of Regulations for Undergraduate Students

Regulations involving course prerequisites or co-requisites, departmental regulations, and faculty regulations may be waived where circumstances so warrant. The routing of requests for such waivers and the procedure for appealing unfavourable decisions are outlined in the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.

8 Harlow Campus Semester

This is an integrated interdisciplinary Arts program offered each Fall semester at the Harlow Campus, England. The content of the program changes each Fall, depending upon the departments involved. Credits for the program equal 15 credit hours, with the allocation of credits to departments changing each Fall. Students wishing to enrol in a Harlow semester must have completed at least 48 credit hours at the university level, and satisfy any prerequisites which may be required. Enrolment is competitive. The relevant admission criteria, as well as other information, may be obtained from the Office of the Dean of Arts.

9 Programs and Regulations

9.1 Aboriginal Studies

www.mun.ca/interdisciplinary/aboriginal/index.php

Program Co-ordinator: Dr. D. Wharram, Department of Linguistics

The Minor in Aboriginal Studies is an interdisciplinary program. It is an alternative to a Minor offered by a single department and satisfies the degree requirement for a Minor. Students completing this Minor must choose a Major in a single discipline.

9.1.1 Regulations

Students who minor in Aboriginal Studies shall complete a minimum of 24 credit hours including Anthropology 2414 (3 credit hours) plus

one course in any three of the following disciplines: Education, English, Geography, History, Law and Society, Linguistics, Social Work, and Sociology (9 credit hours). The remaining 12 credit hours can be chosen from any of the courses in the program. Students enrolled in the Bachelor of Education (Native and Northern) Degree Programs must contact the Native and Northern Teacher Education Office for information on which Education courses may be used for the Aboriginal Studies Minor.

9.1.2 Course List

Anthropology

Anthropology 2414

Anthropology 3240

Anthropology 4070

Archaeology

Archaeology 2481, 3290, 3291, 3510

Education

Education 2023, 2361, 3573, 4020

English

English 2160

Geography

Geography 2495

History/Anthropology

History/Anthropology 3515, 3520, 3525

History

History 2200, 4222

Law and Society

Law and Society 3012

Linguistics

Linguistics 1030, 1031, *2020, *2021, *2025, *2026, *2030, *2031, *2040, *2041, 2060, 4050-4054

Social Work

Social Work *3230, *3511, *3530, the former 5522, the former 5614

Sociology/Anthropology

the former Sociology/Anthropology 2220

* Courses marked with an asterisk * are infrequently offered or offered only in Labrador.

Note: *The normal departmental prerequisites are applicable, but Department Heads may waive course prerequisites in cases where alternate preparation can be demonstrated.*

9.2 Anthropology

www.mun.ca/anthro/

All students who major in Anthropology will be assisted by a faculty advisor who will help them in planning their academic programs. For this purpose, it is essential that students declare their major at an early stage of their studies.

Anthropology course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Anthropology**.

9.2.1 General Degree

9.2.1.1 Major

The student majoring in Anthropology must meet the requirements listed under **Program Regulations - General and Honours Degrees**. A minimum of 39 credit hours in Anthropology is required including:

1. Anthropology 1031;
2. 9 credit hours at the 2000-level chosen from any of the Anthropology courses between 2410 and 2416;
3. Anthropology 3300 and 3410;
4. 9 credit hours from Anthropology offerings at the 4000-level, of which one must be Anthropology 4412; and
5. the remaining 12 credit hours are to be chosen from any of the Anthropology 3000-or 4000-level offerings.

9.2.1.2 Minor

A minor in Anthropology requires the completion of 24 credit hours including:

1. Anthropology 1031;
2. 6 credit hours at the 2000 level chosen from any of the Anthropology courses between 2410 and 2416;
3. Anthropology 3410;
4. 6 credit hours from the 4000 level including Anthropology 4412; and
5. 6 credit hours chosen from Anthropology offerings at the 3000 level or above

9.2.2 Honours Degree

1. Admission: see **Bachelor of Arts (Honours) Degree Regulations**.
2. Students intending an Honours program are required to complete 60 credit hours in Anthropology following the requirements in Major above, but in addition must include either Anthropology 4994 and 4995, or 4996. Thirty-six of the 60 credit hours must be at the 3000 or 4000 level. Students must also meet the requirements of the **Program Regulations - General and Honours Degrees**.

9.2.3 Regulations for Joint Honours, Anthropology and Another Major Subject

1. Students must fulfil the requirements of the **Bachelor of Arts (Honours) Degree Regulations**.

2. Students must complete:
 - a. Anthropology 1031;
 - b. 9 credit hours at the 2000 level chosen from any of the Anthropology courses between 2410 and 2416;
 - c. Anthropology 3300 and 3410;
 - d. 9 credit hours in Anthropology courses at the 4000 level including Anthropology 4412; and
 - e. 15 credit hours to be chosen from any of the 3000 or 4000 level Anthropology offerings.

9.3 Archaeology

www.mun.ca/archaeology/about/

The Undergraduate Coordinator assists all Archaeology majors and minors in planning their academic programs. For this purpose students should register with the Department at an early stage of their studies.

Archaeology course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Archaeology**.

9.3.1 General Degree

9.3.1.1 First Courses

The Student majoring in Archaeology must meet the requirements listed under **Regulations for the General Degree of Bachelor of Arts**. Under these Regulations, a minimum of 36 credit hours in Archaeology is required. Students wishing to concentrate in this option must take 15 credit hours from **Group 1 (Core Courses)** which must include 1030, 2480, 4182 and 4411; 9 credit hours from **Group 2 (Field and Laboratory Courses)**; 3 credit hours from **Group 3 (Regional Courses)**; 6 credit hours from **Group 4 (Topical Courses)**. The remaining 3 credit hours may be in any other Archaeology course, except 2491, 2492 or 2493.

Course Groupings for the Archaeology Program:

Group 1 (Core Courses): 1030, 2430, 2450, 2480, 2582, 2590, 4182, 4411.

Group 2 (Field and Laboratory Courses): 3583, 3585, 3586, 3587, 3591, 3650, 3710, 3800, 3850, 3900, 4041, 4151, 4152, 4153, 4171, 4191.

Group 3 (Regional Courses): 2481, 3290, 3291, 3500, 3505, 3510, 3515, 3520, 3525, 3580, 3588, 3592, 3651.

Group 4 (Topical Courses): 3001, 3020, 3040, 3561, 3584, 3590, 3593, 3750, 3860, 4015, 4043, 4150, 4170, 4172, 4173, 4500, 4994.

9.3.1.2 Minor

A minor in Archaeology may be achieved by completing the following courses: Archaeology 1030 and 2480; 6 credit hours in Archaeology courses at the 3000-level; 3 credit hours in Archaeology courses at the 4000-level, 9 credit hours chosen from Archaeology courses at any level, except Archaeology 2491, 2492 or 2493.

9.3.2 Honours Degree

1. Students intending an Honours program are required to be majors and must complete 60 credit hours in Archaeology, including Archaeology 4994 and Archaeology 4995 (or Archaeology 4996). Students must also meet the **Regulations for the General Degree of Bachelor of Arts**, and **Regulations for the Honours Degree of Bachelor of Arts**.

9.3.3 Regulations for Joint Honours, Archaeology and Another Major Subject

1. Students must fulfill the **Regulations for the Honours Degree of Bachelor of Arts**.
2. Students must complete
 - a. Archaeology 1030;
 - b. Archaeology 2480 and 3 other credit hours in Archaeology at the 2000 level;
 - c. Fifteen credit hours in Archaeology courses at the 3000 level, chosen in consultation with a supervisor; and
 - d. Archaeology 4182 and 4411 and 9 other Archaeology credit hours at the 4000 level, with a grade of "B" or better.

9.4 Canadian Studies

www.mun.ca/interdisciplinary/canadian/

Acting Program Supervisor: Associate Dean of Arts (Undergraduate)

9.4.1 Program and Regulations

Canadian Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Canadian Studies**.

1.
 - a. This is a multidisciplinary Major program in Canadian Studies offered to students for the Bachelor of Arts degree; and it is offered only as a second Major in conjunction with a disciplinary Major.
 - b. Since the program draws upon courses in several departments, it is administered by an interdepartmental committee (The Canadian Studies Co-ordinating Committee). The Program Supervisor will advise students upon the selection of courses in the Major.
2. To qualify as a Major in Canadian Studies, students must complete a minimum of 36 credit hours in courses exclusive of their disciplinary Major, including,
 - a. A core of at least 12 credit hours from the following courses: English 2150, Geography 3405, History 2210, Political Science 2800, Sociology 2240
 - b. Canadian Studies 4000.
 - c. The remaining credit hours shall be chosen from the courses listed below, from at least four different departments, and exclusive of any courses applied towards the first Major (* indicates cross-listed courses). In the event that a course from the above core is part of the disciplinary Major, a student will be required to complete the additional credit hours from the courses listed below.
 Anthropology 3240
 Economics 3030, 3150, 3620*, 3711*, 4025, 4026

English 2151, 3152, 3153, 3156, 3157, 3158, 4821, 4822
 Folklore 3950, 4300, 4420*
 French 3651, 3653, 4310*, 4420*, 4500, 4501, 4502
 Geography 2105, 3701, 4640
 History 1013, 2200, 3130, 3140, 3150, 3620*, 3630*, 3650, 3821, 4240, 4241, 4242, 4245, 4249, 4250, 4251
 Law and Society 2000, 3011, 3015
 Linguistics 2025, 2026, 2030, 2031, 2060, 4310*
 Music 3016
 Political Science 1000, 1010, 3280, 3600, 3610, 3650, 3800, 3810, 3820, 3830, 3860, 3870, 3890, 4630, 4860, 4870.
 Religious Studies 3902, 3903
 Sociology 3306, 3395
 And any special topics courses approved for inclusion in this list by the Committee on Undergraduate Studies, Faculty of Arts.

3. In addition, a demonstration of adequate knowledge in both written and oral French is required. A student is deemed to have demonstrated adequate knowledge upon either passing an examination set by the French Department or by completing French 2100 with a "B" standing.
4. The normal departmental prerequisites are applicable, but Department Heads may waive course prerequisites in the Canadian Studies area for Canadian Studies Majors when alternate preparation can be demonstrated.

9.5 Classics

www.mun.ca/classics/home/

9.5.1 Programs and Regulations

Programs of the Department of Classics are designed to acquaint students with the ancient Greek and Roman cultures from which Western Civilization has developed. The Department endeavours to instruct with and utilize the full range of evidence available, including texts in Greek and Latin as well as material culture. Furthermore, it is understood that a degree of access can often be achieved by studying antiquity through translated sources. The Department therefore is committed to offering a wide range of courses and programs designed to explore the many aspects of the discipline.

Classics course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Classics**.

9.5.2 General Degree

9.5.2.1 Major in Classics

Candidates for a Major in Classics are advised to choose their program in consultation with the Department.

The major program consists of a minimum of 39 credit hours in Classics courses in accordance with the following:

1. Either Classics 1120 and 1121 or Classics 1130 and 1131;
2. at least 3 credit hours at the 4000 level;
3. an additional 12 credit hours at the 3000 level or above; and
4. an additional 18 credit hours at any level. With the exception of first year language courses, no more than six 1000-level credit hours may be counted towards the major.

9.5.2.2 Minor in Classics

The Minor program in Classics consists of a minimum of 24 credit hours in Classics courses in accordance with the following:

1. At least 3 credit hours at the 3000 level or above.
2. With the exception of first-year language courses, no more than six 1000-level credit hours may be counted towards the minor.

9.5.3 Honours Degree

9.5.3.1 Honours Degree in Classics

Students for Honours in Classics shall consult the Department before finalizing their program.

1. Classics 1120 and 1121 and Classics 1130 and 1131;
2. At least 9 credit hours selected from Classics 2200, 2300, 3200, and 3300;
3. Classics 4999;
4. At least 36 additional credit hours in Classics at the 3000 level or above, of which 18 must be in Latin or Greek. Classics 2302 may be substituted for a course at the 3000 level.

9.5.3.2 Joint Honours in Classics

Classics may be combined with another subject to form a Joint Honours program. The Joint Honours Program in Classics shall include at least 51 credit hours in Classics, including the following.

1. Classics 1120 and 1121 or Classics 1130 and 1131;
2. At least 6 credit hours selected from Classics 2200, 2300, 3200, and 3300;
3. At least 30 additional credit hours in Classics at the 3000 level or above, of which at least 15 must be in Greek or Latin. Classics 2302 may be substituted for courses at the 3000 level.

9.5.3.3 Honours in Greek and Roman Studies

Students for Honours in Greek and Roman Studies shall consult the Department before finalizing their program.

1. One of following: Classics 1050, 1051, 1052, 1100 or 1200;
2. Either a. or b.:
 - a. Classics 1120 and 1121
 - b. Classics 1130 and 1131

3. 15 credit hours in courses at the 2000 level;
4. 36 credit hours in courses at the 3000 level or above, including 4999.

9.5.3.4 Joint Honours in Greek and Roman Studies

Greek and Roman Studies may be combined with another subject to form a Joint Honours program. The Joint Honours Program in Greek and Roman Studies shall include at least 51 credit hours in Classics.

1. One of following: Classics 1050, 1051, 1052, 1100 or 1200;
2. Either a. or b.:
 - a. Classics 1120 and 1121
 - b. Classics 1130 and 1131
3. 15 credit hours in courses at the 2000 level;
4. 27 credit hours in courses at the 3000 level or above.

9.6 Communication Studies

www.mun.ca/interdisciplinary/communications/

Program Co-ordinator: Dr. E. Warkentin, Head, Department of German and Russian

This inter-disciplinary Major program is offered to students for the Degree of Bachelor of Arts. It is offered in conjunction with a major or a minor in a single discipline.

The Communication Studies program aims to provide explanatory frameworks and critical methodologies, drawn from a variety of disciplines, for understanding how communication and media are integral to the changing relationships between a variety of agents and agencies, from the individual to the nation-state and from personal interactions to international relations.

Communication Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Communication Studies**.

9.6.1 Program and Regulations

Students who major in Communication Studies shall complete a minimum of 36 credit hours in courses which shall include 9 credit hours in Core Courses and 27 credit hours in at least 3 different disciplines as outlined below.

9.6.1.1 Core Courses

Students who major in Communication Studies shall complete a minimum of 36 credit hours in courses which shall include the following:

1. Communication Studies 2000
2. Communication Studies 2001
3. Communication Studies 4000

9.6.1.2 Additional Credit Hours

Students are required to complete an additional 27 credit hours in at least 3 different disciplines and chosen from the lists below including:

1. a maximum of 12 credit hours from **List B**;
2. a maximum of 12 credit hours at the 2000 level in addition to Communication Studies 2000 and Communication Studies 2001;
3. a minimum of 9 credit hours at the 3000 level; and
4. a minimum of 3 credit hours at the 4000 level in addition to Communication Studies 4000.

9.6.1.3 Elective Courses

Courses may be selected from the following two lists and/or as approved by the Program Coordinator.

List A

Anthropology 3630 or Sociology 3630: New Media Methods in Social Research
 Computer Science 2000: Collective and Emergent Behaviour
 English 2700: Writing and Gender I
 Folklore 1060: Folklore and Culture
 Folklore 3850: Material Culture
 Folklore 3930: Folklore and Popular Culture
 Gender Studies 2005: Identities and Difference
 Gender Studies 3005: Feminist Texts, Theories and Histories
 Linguistics 2100: Language and Communication
 Philosophy 2571: Technology
 Philosophy 3600: Philosophy of the Humanities
 Philosophy 3620: Philosophy of Art
 Philosophy 4250: Seminar in Metaphysics and Epistemology
 Philosophy 4300: Seminar in Ethics
 Political Science 3350: Public Opinion and Voting
 Political Science 3860: Media and Politics in Canada
 Religious Studies 2812: Religion and Popular Culture
 Sociology 2120: Technology and Society
 Sociology 2210: Communication and Culture
 Sociology 4107: Women and Technological Change
 Any Special Topics courses approved for inclusion in this list by the Committee on Undergraduate Studies, Faculty of Arts, upon the recommendation of the Program Co-ordinator.

List B

English 2850: What is Film?
 English 2851: Introduction to Film Form and Film Theory
 English 3813: Theories of National Cinema

German 3000: German Film I
 German 3001: German Film II
 German 3002: Post-Wall Cinema
 German 3003: DEFA, The Cinema of East Germany
 History 3748: History of Film: The American Cinema
 History 3790: Reel American History: US History through its Films, 1895-1945
 History 3795: Reel American History: US History through its Films since WWII
 History 4695: The Middle Ages on Film
 Philosophy 2581: Philosophy of Film
 Religious Studies 1022: Jesus in Film
 Russian 3023: Post-Soviet Russia: Media and Film

Any Special Topics courses approved for inclusion in this list by the Committee on Undergraduate Studies, Faculty of Arts, upon the recommendation of the Program Co-ordinator.

The normal departmental prerequisites are applicable, but Department Heads may waive course prerequisites in cases where alternate preparation can be demonstrated.

9.7 Computer Science

For Departmental Regulations and Course Descriptions, see **Faculty of Science** section of the Calendar.

The following undergraduate programs are available in the Department of Computer Science:

1. Applied Mathematics and Computer Science Joint Major (B.Sc. only)
2. Computer Internship Option (CIIO) (B.Sc. and B.Sc. Honours only)
3. Computer Science and Economics Joint Major (B.Sc. Only)
4. Computer Science and Geography Joint Honours (B.Sc. only)
5. Computer Science/ and Geography Joint Major (B.Sc. only)
6. Computer Science and Physics Joint Honours
7. Computer Science and Physics Joint Major
8. Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
9. Computer Science and Pure Mathematics Joint Major (B.Sc. only)
10. Computer Science and Statistics Joint Honours
11. Computer Science and Statistics Joint Major (B.Sc. only)
12. Honours in Computer Science (B.A., B.Sc.)
13. Honours in Computer Science (Software Engineering) (B.Sc. only)
14. Major in Computer Science (B.A., B.Sc.)
15. Minor in Computer Science (B.A., B.Sc.)

9.8 Drama and Music

www.mun.ca/interdisciplinary/dramamusic/

Note: The Major program in Drama and Music is currently under review and will not be available for admission for the 2012-2013 year. For further information please contact the Department of English Language and Literature.

1. a. This is an Interdisciplinary Major Program in Drama and Music offered to students for the Bachelor of Arts degree, under paragraph 3. b. of the **Regulations for the General Degree of Bachelor of Arts**.
 b. Since the program is interdisciplinary, it is administered by an interdepartmental committee (The Drama and Music Co-ordinating Committee). The Program Supervisor will advise students upon the selection of courses in the Major.
2. To qualify as a Major in Drama and Music, students must complete a minimum of 54 credit hours as follows:
 - a. **Department of English - Drama Courses**
 Students must complete at least 27 credit hours in English, as follows:
 - i. Six credit hours in English at the 1000 level, preferably including 1102
 - ii. 2002, 3350, 3351, 4400, 4401
 - iii. Three additional credit hours in English at the 2000 level
 - iv. Three credit hours in courses chosen from 3021, 3022, 3156, 3171, 3181, 3200, 3201, 3260, 3302, 4302.
 - b. **School of Music - Music Courses**
 - i. Students must complete at least 27 credit hours in Music, as follows:
 - Two of Music 2011, 2012, 2014
 - Music 1107, 1108, 1117, 1118, 1127 or 1137, and 1128 or 1138
 - Music 2107 and 2117
 - Music 2311
 - Music 2013 or Music 3007
 - Two credit hours of conducted ensemble.
 - ii. Further courses in music theory and/or music history may be chosen as Arts electives.
 - iii. Course prerequisites stipulated in the course descriptions must be met. In particular, note the prerequisites for Music 1107 and 1127.
 - iv. Most music courses are not offered every semester, and some are offered only in alternate years.

9.9 Economics

www.mun.ca/econ/home/

The following programs are available in the Department:

1. Major in Economics (B.A. or B.Sc.)

2. Honours in Economics (B.A. or B.Sc.)
3. Honours in Economics (Co-operative), (B.A. or B.Sc.)
4. Minor in Economics
5. Joint Programs (B.Sc. Only)
6. Joint Program (Co-operative) (B.Sc. Only)
7. Major in Economics (Co-operative) (B.A. or B.Sc.)

Economics course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Economics**.

9.9.1 Admission Regulations (B.Sc.)

Students are normally admitted to the B.Sc. Program upon successful completion of 30 credit hours which must include:

1. Six credit hours in English courses
2. Six credit hours in Mathematics courses

9.9.2 Major in Economics (B.A. or B.Sc.)

1. Students may Major in Economics as part of either a B.A. or a B.Sc program. See the **Regulations for the General Degree of Bachelor of Arts** and B.Sc. Degrees as appropriate.
2. Economics 2010 and 2020 are prerequisites for all other Economics courses except Economics 2070.
3. Economics 2550, 3000 and 3010 are prerequisites for all 4000-level courses.
4. Students shall consult with the Head of the Department or delegate when choosing courses for a Major in Economics.
5. Mathematics 1000 or its equivalent is the prerequisite for Economics 3000, 3010, and 3550.
6. B.A. students who undertake a Major in Economics shall complete Statistics 2500 and at least 39 credit hours in courses in Economics of which:
 - a. 2010, 2020, 2550, 3000, 3001, 3010 and 3550 are obligatory.
 - b. Eighteen credit hours shall be chosen from among the various Economics courses in consultation with the Head of the Department or delegate, and will include at least 9 credit hours in courses at the 4000-level.
 - c. Students may, with the approval of the Head of the Department or delegate, substitute Statistics 2510 for Statistics 2500.
7. B.A. students majoring in Economics shall complete a minor of 24 credit hours in one other approved subject, or a second Major in accordance with **Regulations for the General Degree of Bachelor of Arts**. It is recommended that the Minor or second Major be chosen from the following subjects: Business, Mathematics, Political Science, Statistics, Computer Science, History, Geography, Philosophy, Sociology, or Anthropology.
8. B.Sc. students who undertake a Major in Economics shall complete at least 42 credit hours in courses in Economics of which:
 - a. 2010, 2020, 2550, 3000, 3001, and 3010 are obligatory
 - b. Six credit hours shall be chosen from either 3550 and 3551, OR 4550 and 4551
 - c. Eighteen credit hours shall be chosen from among the various Economics courses in consultation with the Head of the Department or delegate, and will include at least 9 credit hours in courses at the 4000-level.
9. B.Sc. students must complete credits from other Science disciplines as follows:
 - a. Mathematics 1000, 1001, and 2050
 - b. Statistics 2510, or its equivalent, and an additional 3 credit hours of Statistics
 - c. Computer Science 1700, and an additional 3 credit hours of Computer Science. With the approval of the Head of the Department or delegate, students may substitute another 1000-level Computer Science course for Computer Science 1700. Minors in Computer Science should enroll in Computer Science 1710.
 - d. At least 3 credit hours in an additional science subject other than Mathematics/Statistics, Economics, and Computer Science

9.9.3 Honours in Economics (B.A. or B.Sc.)

1. See the General Regulations for the B.A. and B.Sc. (Honours) Degrees.
2. All students shall consult with the Head of the Department or delegate when choosing courses for an Honours program.
3. All students shall complete all non-Economics courses required of B.A. or B.Sc. Majors, and at least 60 credit hours in courses in Economics, of which 2010, 2020, 2550, 3000, 3001, 3010, 3011, 3550, 3551, 4550 and 4551 shall be chosen.
4. Twenty-four credit hours in electives in Economics shall be chosen in consultation with the Head of the Department or delegate, including at least 9 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.

9.9.4 Minor in Economics

1. Economics 2010, 2020, 3000, and 3010 are obligatory.
2. Mathematics 1000 or its equivalent is the prerequisite for Economics 3000, 3010 and 3550.
3. Twelve credit hours in Economics electives shall be chosen in consultation with the Head of the Department or Delegate.
4. Course prerequisites stipulated in the General Degree regulations and in the course descriptions shall apply to a Minor in Economics.

9.9.5 Joint Programs

Programs for Joint Majors in Economics and Computer Science, Pure Mathematics, Applied Mathematics or Statistics, and a Joint Major in Statistics and Economics (Co-operative) are found under the heading **Joint Programs** in the entry for the Faculty of Science.

Students who wish to take a Joint Major in Economics and Computer Science, Mathematics or Statistics must arrange their program in consultation with the heads of the respective departments and comply with the General Regulations for the Majors Degrees.

9.9.6 Major in Economics (Co-operative) (B.A. or B.Sc.)

9.9.6.1 Economics Co-operative Education Option (ECEO)

This Economics Program is available to full-time Economics majors (B.A. and B.Sc.) only.

The ECEO provides an excellent mutual opportunity for students and employers. Qualified students will obtain rewarding employment experience in fields related to Economics for several months of continuous duration. Students will learn valuable practical skills in an employment situation during their course of study. Furthermore, paid employment will help to defray the cost of their education. The timing of the Work Terms and the structure of the ECEO generally are such that employers stand to gain from the acquired employable skills of economists in training. The objectives of the Work Term component of the ECEO are embodied in the Work Term descriptions below. The descriptions serve to guide the student and the employer toward achieving these objectives.

1. Admission Requirements

- Admission is competitive and selective. Therefore, prospective students are encouraged to consider an alternate degree program in the event that they are not accepted into the Co-operative program.
- Applicants should note that it is possible to enter Term 1 only in the Fall semester commencing in September of each academic year. Application forms are available in the Department of Economics. The deadline for applications for admission to Term 1 is March 1.
- The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Students with weak overall academic records are unlikely to be admitted.
- To be eligible for admission to Term 1 an applicant must have successfully completed a minimum of 30 credit hours with an overall average of at least 65% as follows: All applicants must have completed Economics 2010 and 2020; at least 6 credit hours in English*; Mathematics 1000; and 15 credit hours chosen from courses in the Faculties of Arts** Business or Science. B.Sc. applicants must have completed Mathematics 1001.

*It is recommended that students complete English 1110 as one of these English courses.

It is also advised that B.A. students choose courses which can satisfy the requirements for the **Core Program (see **Regulations for the General Degree of Bachelor of Arts** for these requirements), including courses in a second language.

- Students may apply for admission to Advanced Standing.
- Transfer students from other universities will be placed in that term of the program judged to be appropriate considering equivalent credits, as determined by the Department.

2. Program of Study

- Promotion from each of Terms 1 through 6 requires a passing grade in all specified required courses and an overall average of at least 60% in all courses including electives. A student who fails a required course or fails to maintain the overall average of 60% will not be promoted to the next term and will be required to withdraw from the program. The student in question may apply for readmission in a subsequent year after passing the specified required course(s) previously failed, or re-establishing the 60% average.
- In addition to the 30 credit hours required for admission, students are required to complete the six academic terms in the ECEO program for a total of 120 credit hours. Students must complete three Work Terms which follow Academic Terms 2, 4, and 5.
- Courses shall normally be taken in academic terms or "blocks" in the sequenced course load and order as set out in the table **Major in Economics (Co-operative Option) B.A. Academic Course Program** or in the table **Major in Economics (Co-operative Option) B.Sc. Academic Course Program**. Unspecified credits may be used to fulfill elective requirements only.
- UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) Classification of Students** notwithstanding, students do not require special permission to register for courses while on work terms if the courses are in addition to the prescribed program.

3. Work Term Placement

- General management of the work terms in the ECEO is the responsibility of the Division of Co-operative Education (DCE). It is responsible for assisting potential employers to become involved in the program, organizing competitions for Work Term employment, arranging student-employer interviews and facilities, data base management, and for the continual development of employment opportunities. The program co-ordinator (hereafter referred to as co-ordinator) is an Academic Staff member who will work with the department to counsel students, visit students on their work assignments and evaluate the work term.
- Work placement is not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of students who are required to withdraw from the program, the DCE has no responsibility for placement until they have been re-admitted to the program.
- A student who applies for admission to the co-op program gives permission to the University to provide a copy of the applicant's resume, university transcript and work term evaluations to potential employers.
- A student who has been accepted to the ECEO program may obtain his/her own work term placement outside the competition. Such employment positions must be confirmed by the employer, and must be approved by the co-ordinator.
- Students are expected to submit, within a month from starting a Work Term, a plan of the intended work that term.
- Salaries paid to co-operative students are determined by employers based on their internal wage structures, and tend to increase as the student progresses through the program and assumes more responsibility. However, students should not expect the income from work terms to make them completely self-supporting.

4. Registration and Evaluation of Performance

- In Work Terms I, II, and III, students must register for Economics 299W, 399W, and 499W respectively.
- Student performance evaluations are to be completed by the employer and returned to the co-ordinator. The Work Term evaluations shall consist of two components:
 - On-the-job Student Performance:
Job performance shall be assessed by the co-ordinator in consultation with the department using information gathered during the Work Term and input from the employer towards the end of the Work Term. Formal written documentation from the employer shall be sought. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.
 - The Work Report:
 - Students are required to submit a Work Term report to the co-ordinator on the first day of final exams.

- Work Term reports shall be evaluated by a faculty member and the co-ordinator.
- If an employer designates a report to be of a confidential nature, both employer and the co-ordinator must agree as to the methods to protect the confidentiality of such a report before the report may be accepted for evaluation.
- Reports must contain original work related to the Work Term placement. The topic must relate to the work experience and will be chosen by the student in consultation with the employer. The topic must be approved by the co-ordinator or a faculty member of the Department of Economics.

Evaluation of the work term will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

The evaluation of the job performance and the work term report are recorded separately on the transcript. Overall evaluation of the work term will result in one of the following final grades being awarded:

- Pass with Distinction: Indicates OUTSTANDING PERFORMANCE in both the work report and the job performance.
- Pass: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and the job performance.
- Fail: Indicates FAILING PERFORMANCE in the work report or the job performance.

For promotion from the Work Term, a student must obtain at least a Pass. Students should also refer to the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)** of the University.

The grades awarded for each work term will be noted on the transcript of the student.

- If a student fails to achieve the Work Term standards specified above the student will be required to withdraw from the program. Such a student may reapply to the program after a lapse of two semesters, at which time the student will be required to repeat the Work Term with satisfactory performance before being admitted to any further academic term in the Faculty. A given work term may be repeated only once, and not more than two work terms may be repeated in the entire program.
- In order to be considered for readmission, students must formally apply for readmission to the program not later than the deadline date specified in Clause b. of the Admission section 1. above.
- A student who withdraws from a Work Term without acceptable cause subsequent to a job placement will be required to withdraw permanently from the Co-operative education program. Students who drop a Work Term without prior approval from both the co-ordinator and the Head of the Department of Economics, or who fail to honour an agreement to work with an employer, or conduct themselves in such a manner as to cause their discharge from the job will normally be awarded a failed grade for the Work Term in question. Permission to drop a Work Term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved Work Term in lieu of the one dropped.

9.9.7 Honours in Economics (Co-operative), (B.A. or B.Sc.)

9.9.7.1 Admission Requirements

See Major in Economics (Co-operative), (B.A. or B.Sc.) Economics Co-operative Education Option (ECEO) and the General Regulations for the B.A. and B.Sc. (Honours) Degrees.

9.9.7.2 Program of Study

1. See the General Regulations for the B.A. and B.Sc. (Honours) Degrees.
2. All students shall consult with the Head of the Department or delegate when choosing courses for an Honours program.
3. All students shall complete all non-Economics courses required of B.A. or B.Sc. Majors, and at least 60 credit hours in Economics, of which 2010, 2020, 2550, 3000, 3001, 3010, 3011, 3550, 3551, 4120, 4550 and 4551 shall be chosen.
4. Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of the Department or delegate, including at least 6 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.
5. Promotion from each of Terms 1 through 6 requires a grade of 70% in all specified required courses and an overall average of at least 70% in all courses including electives. A student who fails a required course or fails to maintain an overall average of 70% will not be promoted to the next term and will be required to withdraw from the program. The student in question may be eligible from readmission in the subsequent year after passing the specified required course(s) previously failed, or re-establishing the 70% average. See also **UNIVERSITY REGULATIONS - Regulations for the Honours Degree**.
6. In addition to the 30 credit hours required for admission, students are required to complete the six academic terms in the ECEO program for a total of 120 credit hours. Students must complete three Work Terms, which follow Academic Terms 2, 4 and 5.
7. Courses shall normally be taken in academic terms or "blocks" in the sequenced course load and order set out in the table **Honours in Economics (Co-operative Option) B.A. Academic Course Program** or in the table **Honours in Economics (Co-operative Option) B.Sc. Academic Course Program**. Unspecified credits may be used to fulfill elective requirements only.
8. **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**, Classification of Students notwithstanding, students do not require special permission to register for courses while on work terms if the courses are in addition to the prescribed program.

9.9.7.3 Work Term Placement

See Major in Economics (Co-operative), (B.A. or B.Sc.) Economics Co-operative Education Option (ECEO).

9.9.7.4 Registration and Evaluation of Performance

See Major in Economics (Co-operative), (B.A. or B.Sc.) Economics Co-operative Education Option (ECEO).

Major in Economics (Co-operative Option) B.A. - Academic Course Program Table

Term 1 (Fall) Economics 3000 Economics 3550 Statistics 2500 Six Credit Hours in Minor, Core and elective courses [see Notes 1. and 2. below]	Work Term II (Spring) Economics 399W
Term 2 (Winter) Economics 3001 Economics 3010 Economics 2550 Six credit hours in Minor, Core and elective courses [see Notes 1. and 2. below]	Term 5 (Fall) Six further credit hours in Economics courses Nine credit hours in Minor, Core and elective courses [see Notes 1. and 2. below]
Work Term I (Spring) Economics 299W	Work Term III (Winter) Economics 499W
Term 3 (Fall) Economics 4550 Twelve credit hours in Minor, Core and elective courses [see Notes 1. and 2. below]	Term 6 (Spring) Six further credit hours in Economics courses Nine credit hours in Minor, Core and elective courses [see Notes 1. and 2. below]
Term 4 (Winter) Economics 3011 Economics 4120 Economics 4551 Six credit hours in Minor, Core and elective courses [see Notes 1. and 2. below]	

Notes: 1. Courses specified for admission to and completion of the ECEO only partially satisfy the **Core Requirements** for the Degree of Bachelor of Arts. Additional Core Requirements are 6 credit hours in the same second language, 3 credit hours in a Social Science course (other than Economics), 12 credit hours in Humanities courses, as well as 6 credit hours in research/writing courses (which may be met within the major and minor programs and/or in courses completed for the Social Science and Humanities requirements). These additional requirements should be completed before and following admission to Term 1 as part of the Minor program and elective components of the degree. Students are reminded that careful planning is necessary to ensure that all Core and minor requirements are satisfied.

2. A minor is required for a B.A. degree in Economics.

Major in Economics (Co-operative Option) B.Sc. - Academic Course Program Table

Term 1 (Fall) Economics 3000 Economics 3550 Statistics 2510 Computer Science 1700 Three credit hours in elective courses [see Note 1.]	Work Term II (Spring) Economics 399W
Term 2 (Winter) Economics 3001 Economics 3010 Economics 2550 Mathematics 2050 Three credit hours in elective courses [see Note 1.]	Term 5 (Fall) Six further credit hours in Computer Science courses [see Note 2.] Nine credit hours in elective courses [see Note 1.]
Work Term I (Spring) Economics 299W	Work Term III Economics 499W
Term 3 (Fall) Economics 4550 Three further credit hours in Economics courses Nine credit hours in elective courses	Term 6 (Spring) Six further credit hours in Economics courses Nine credit hours in elective courses [see Note 1.]
Term 4 (Winter) Economics 3011 Economics 4120 Economics 4551 Three further credit hours in Statistics courses [see Note 2.] Three credit hours in elective courses [see Note 1.]	

Notes: 1. Elective courses should be chosen with reference to the Regulations for the General Degree of Bachelor of Science, since courses specified for admission to and completion of the ECEO only partially satisfy these regulations. In particular note that (i) at least 78 credit hours (26 courses) in Science subjects are required and that (ii) at least 3 credit hours in an additional Science subject other than Mathematics/Statistics, Economics and Computer Science must be included in these Science courses.

2. The Statistics and Computer Science elective courses may both be taken in either Term 4 or 5.

Honours in Economics (Co-operative Option) B.A. - Academic Course Program Table

Term 1 (Fall) Economics 3000 Economics 3550 Statistics 2500 Six credit hours in Minor, Core and elective courses [see Notes 1. and 2.]	Work Term II (Spring) Economics 399W
Term 2 (Winter) Economics 3001 Economics 3010 Economics 2550 Six credit hours in Minor, Core and elective courses [see Notes 1. and 2.]	Term 5 (Fall) Nine further credit hours in Economics courses [see Note 3.] Six credit hours in Minor, Core and elective courses [see Notes 1. and 2.]
Work Term I (Spring) Economics 299W	Work Term III (Winter) Economics 499W
Term 3 (Fall) Economics 4550 Six further credit hours in Economics courses [see Note 3.] Six credit hours in Minor, Core and elective courses [see Notes 1. and 2.]	Term 6 (Spring) Six further credit hours in Economics courses [see Note 3.] Nine credit hours in Minor, Core and elective courses [see Notes 1. and 2.]
Term 4 (Winter) Economics 3011 Economics 3551 Economics 4120 Economics 4551 Three credit hours in Minor, Core and elective courses [see Notes 1. and 2.]	

- Notes: 1. Courses specified for admission to and completion of the ECEO only partially satisfy the **Core Requirements** for the Degree of Bachelor of Arts (Honours). Additional Core Requirements are six credit hours in the same second language, three credit hours in a Social Science course (other than Economics), twelve credit hours in Humanities courses, as well as six credit hours in research/writing courses (which may be met within the major and minor programs and/or in courses completed for the Social Science and Humanities requirements). These additional requirements should be completed before and following admission to Term 1 as part of the Minor program and elective components of the degree. Students are reminded that careful planning is necessary to ensure that all Core and minor requirements are satisfied.
2. A minor is required for a B.A. degree (Honours) in Economics.
3. Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of Department or delegate, including at least 6 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.

Honours in Economics (Co-operative Option) B.Sc. - Academic Course Program Table

Term 1 (Fall) Economics 3000 Economics 3550 Statistics 2510 Computer Science 1700 [see Note 1] Three credit hours in elective courses [see Note 2.]	Work Term II (Spring) Economics 399W
Term 2 (Winter) Economics 3001 Economics 3010 Economics 2550 Mathematics 2050 Three credit hours in elective courses [see Note 2.]	Term 5 (Fall) Six further credit hours in Computer Science courses [see Note 4.] Nine further credit hours in Economics courses [see Note 3.]
Work Term I (Spring) Economics 299W	Work Term III (Winter) Economics 499W
Term 3 (Fall) Economics 4550 Six further credit hours in Economics courses [see Note 3.] Six credit hours in elective courses [see Note 2.]	Term 6 (Spring) Six further credit hours in Economics courses [see Note 3.] Nine credit hours in elective courses [see Note 2.]
Term 4 (Winter) Economics 3011 Economics 3551 Economics 4120 Economics 4551 Three further credit hours in Statistics courses [see Note 4.]	

- Notes: 1. Another 1000-level Computer Science course may be substituted for Computer Science 1700 with the approval of the Department Head.
2. Elective courses should be chosen with reference to the Regulations for the Honours Degree of Bachelor of Science, since courses specified for admission to and completion of the ECEO only partially satisfy these regulations. In particular note that (i) at least 90 credit hours in Science subjects are required and that (ii) at least three credit hours in an additional Science subject other than Mathematics/Statistics, Economics and Computer Science must be included in these Science courses.
3. Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of Department or delegate, including at least 6 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.
4. the Statistics and Computer Science elective courses may both be taken in either Term 4 or 5.

9.10 English Language and Literature

www.mun.ca/english/home/

English Language and Literature course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, English Language and Literature**.

9.10.1 General Degree

1. One of English 1000 or 1080, and one of English 1001, 1101, 1102, 1103, 1110 are prerequisites for all other courses. In the case of students whose first language is not English and who take 1020 or 1030, that course and one of English 1000, 1001, 1021, 1080, 1101, 1102, 1103 are prerequisites for all other courses.
2. Students who choose English as their Major must include 36 credit hours in courses in the subject, including:
 - a. Six credit hours in English courses at the first-year level (see Clause 1. above).
 - b. English 2000 and 2001;
 - c. English 3200 or 3201;
 - d. Three credit hours in Canadian literature;
 - e. Three credit hours in American literature;
 - f. Six credit hours at the 4000-level;
 - g. Nine credit hours in additional English courses.

Notes: 1. *At least 9 credit hours must be at the 3000-level.*

2. *Students must normally complete English 2000 and English 2001 before they are eligible to register for courses at the 4000-level.*

3. In addition to the general major defined in 2. above, students may take a specialization in theatre/drama within the English major. In this specialization, students must complete 36 credit hours in courses as follows:
 - a. Six credit hours in English courses at the first-year level (see Clause 1. above).
 - b. English 2000, 2002, 3350, 3351, 4400, 4401;
 - c. Three credit hours in one of 3200, 3201;
 - d. Three credit hours in one of 4300, 4301;
 - e. Three credit hours in one of English 3156, 3171, 3260 or 4302;
 - f. Three credit hours in one of English 3021, 3022, 3181, or 3302.
4. In addition to the general major defined in 2. above students may take a specialization in language within the English major. In this specialization students must complete 42 credit hours in courses as follows:
 - a. Six credit hours in courses at the first-year level (see **Clause 1.** above).
 - b. English 2000, 2400, 2401;
 - c. Three credit hours in one of 2390, 3651;
 - d. Three credit hours in one of 3200, 3201;
 - e. At least 21 credit hours chosen from the following courses, of which at least two courses shall have an initial digit "3" and at least two courses an initial digit "4": 2600, 2601, 3500, 3501, 3650, 3651, 3700, 3814, 4403, 4420, 4421, 4500, 4501, 4600, and 4601. Students in this specialization are advised to take 2390 before 3650 and to take 2400 before 2401.
5. Students who choose English as their minor must complete at least 24 credit hours in the subject. These must include:
 - a. Six credit hours in courses at the first-year level (see **Clause 1.** above).
 - b. One of English 2002, 2003, 2004, 2120, 2121, 2210, 2211, 2212, 2213, 2214, 2811;
 - c. One of English 3200 or 3201;
 - d. Three credit hours in Canadian literature;
 - e. Nine credit hours in additional English courses.

Note: *At least 9 credit hours must be at the 3000-level.*

Requirements for the minor may not be chosen from courses conducted by another Department.
6. No student shall register in any course having an initial digit "3" unless he/she has successfully completed at least 6 credit hours in courses having an initial digit "2".
7. No student shall register in any course having an initial digit "4" unless he/she has successfully completed at least 6 credit hours in courses having an initial digit "3".
8. The programs at the Grenfell Campus contain some courses that are not available in St. John's. Hence, students wishing to transfer from the St. John's campus to Grenfell Campus may have difficulty in completing their program in a timely fashion.

9.10.2 Honours Degree With English as Major Subject

1. Courses will be chosen in consultation with the Head of Department.
2. Students who choose to complete an Honours in English must complete 60 credit hours in the subject, including:
 - a. Six credit hours in courses at the first-year level (see **Clause 1.** above under **English Language and Literature, General Degree**).
 - b. English 2000 and 2001;
 - c. One of English 3200 or 3201;
 - d. Three credit hours in Canadian literature;
 - e. Three credit hours in American literature;
 - f. English 4100 and 4101;
 - g. English 4900;
 - h. Three credit hours in pre-19th century literature (excluding 3200 and 3201);
 - i. Three credit hours in 19th century literature;

- j. Three credit hours in 20th century literature;
- k. Two of 2600, 2601, 3500, 3501, 3600;
- l. Twelve credit hours in additional English courses, three of which must be at the 3000-level and six of which must be at the 4000-level;
- m. English 4999.

Notes: 1. At least 36 of the 60 credit hours required must be in English courses at the 3000-level or above. Courses at the 4000-level may not be chosen from those conducted by another department.

2. A course that considers more than one national literature or century fulfills only one requirement for the Honours degree in English.

- 3. In their final year, all Honours students are required to present an Honours Essay (4999); the topic of the Honours Essay is to be approved by the Head.

9.10.3 Joint Honours Degree in English and Another Major Subject

- 1. See **Regulations for the Honours Degree of Bachelor of Arts**.
- 2. Students shall complete at least 45 credit hours in courses in English including the first-year; and a student's program must be approved by the Head of the Department and conform to the General Regulations for Joint Honours degrees.
- 3. The 45 credit hours shall include:
 - a. Six credit hours in courses at the first-year level (see **Clause 1.** above under **English Language and Literature, General Degree**).
 - b. English 2000 and 2001;
 - c. One of English 3200 or 3201;
 - d. Three credit hours in Canadian literature;
 - e. English 4100 and 4101;
 - f. English 4900;
 - g. Three credit hours in pre-19th century literature (excluding 3200/3201);
 - h. Three credit hours in 19th century literature;
 - i. Three credit hours in 20th century literature;
 - j. Nine credit hours in additional English courses, three of which must be at the 3000-level and six of which must be at the 4000-level.

Note: At least 27 of the 45 credit hours required must be in English courses at the 3000-level or above. Courses at the 4000-level may not be chosen from those conducted by another department.

9.11 English as a Second Language

www.mun.ca/esl/about/

English as a Second Language course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, English as a Second Language**.

The English as a Second Language Office, affiliated with the Department of English Language and Literature, and under the auspices of the Faculty of Arts, offers year-round programs for adult students wishing to improve their English language skills and learn about Canadian culture. These include:

- 1. A five-week intensive English Language Summer School program;
- 2. English language preparation for students enrolled in graduate programs such as the Master's in Business Administration and Master's of Engineering;
- 3. Tutorials, workshops, and conversation programs for current Memorial University of Newfoundland students in undergraduate and graduate degree programs;
- 4. Custom-designed language and culture programs for schools, universities, or businesses. These can be developed on contract and are either for general learning purposes or to suit the needs of specific disciplines or professions; and
- 5. Twelve-week non-credit Intensive English Programs which are offered year-round on a semesterized basis.

Information regarding the above services is available from the Director of English as a Second Language programs at Memorial University of Newfoundland. Information regarding the **Intensive English Programs** is provided below.

A **Diploma in teaching English as a Second Language** is also offered through the Faculty of Arts. Information regarding that program can be found under the Faculty of Arts in this Calendar.

9.11.1 Intensive English Program

Memorial University of Newfoundland's full-time, non-credit Intensive English Program (IEP) is designed to improve English language skills for academic, professional and personal purposes. Reading, writing, speaking and listening skills are covered, and workshops on culture and social activities promoting integration with the local community also form part of the program.

The IEP is offered at intermediate to advanced levels in each of the Fall, Winter, and Spring terms. The program consists of two required courses: English as a Second Language 011F, Core Intensive English, and English as a Second Language 012F, Speaking, Listening, and Culture. Students admitted to the IEP must normally register for both courses each semester.

Students wishing to complete the Intensive English Program in preparation for admission to Memorial University of Newfoundland as undergraduate degree students may apply for this program at the same time as they apply for admission to undergraduate studies. Subject to **General Academic Regulations (Undergraduate)**, **Admission/Readmission to the University (Undergraduate)**, governing admission for undergraduate studies, and the regulations in place for admission to specific programs, students may be provisionally admitted for studies at an undergraduate level in an upcoming term if they are currently enrolled in the Intensive English Program. The **General Academic Regulations (Undergraduate)**, **Admission/Readmission to the University (Undergraduate)**, governing Admission/Readmission to this University, also contained in this Calendar, should be reviewed carefully by students as well.

Final admission for provisionally admitted students will be subject to successful completion of the Intensive English Program with an acceptable score on the Canadian Academic English Language (CAEL) Assessment. The CAEL Assessment is administered as part of the Intensive English Program at the end of each semester. Students enrolled in the Intensive English Program may be considered for enrolment in the Intensive English Bridge Program under the conditions described as the Admission requirements for that program.

Students at any level in the program may take the CAEL Assessment at the end of the semester. The number of semesters of Intensive English study required to achieve a student's desired level of proficiency will vary according to his or her initial proficiency level and individual progress rate.

9.11.1.1 Admission Requirements

Applicants to the Intensive English Program:

1. must be at least 18 years old, and
2. must hold a valid high school diploma, and
3. should have an elementary level of English proficiency.

Applications for the Intensive English Program must be submitted directly in writing to Director, English as a Second Language Programs, Memorial University of Newfoundland, St. John's, NL, A1B 3X9, Canada.

9.11.1.2 Program Requirements

1. Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Director of English as a Second Language programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll in the IEP in the following semester.
2. Evaluation of students may include, but not be limited to, any or all of the following: projects, assignments, quizzes, oral presentations, and class participation.

9.11.2 Intensive English Bridge Program (IEBP)

The Intensive English Bridge Program (IEBP) is intended for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students and who are students in the advanced level of the Intensive English Program (IEP). It requires ten to fifteen hours of classroom language instruction in reading, writing, grammar, and listening. The emphasis is on English for Academic Purposes. Students in this program may register for an undergraduate credit course concurrently, in consultation with the Director of English as a Second Language Programs.

9.11.2.1 Admission

Students for the Intensive English Bridge Program must have:

1. been provisionally accepted to undergraduate studies at Memorial University of Newfoundland;
2. achieved an average of Band 40 in the CAEL with a Writing sub-score of at least 40, a paper-based TOEFL score of 520, a computer-based TOEFL score of 190, an iBT TOEFL score of 68, or an IELTS score of 5.5 with no sub-score less than 5; and
3. achieved a grade of "C" or better with a satisfactory attendance level (90%) in both ENGS 011F and ENGS 012F if enrolled in the Intensive English program in the previous semester.

A student may be considered as a candidate for the Intensive Bridge Program under the following conditions:

9.11.2.2 Program Requirements

1. Students admitted to the Intensive English Bridge Program must register for the course English as a Second Language 011F.
2. Students in this program may normally register for no more than one credit course, chosen in consultation with the director or coordinator of the English as a Second Language Program.
3. Students may register in the Intensive English Bridge Program for a maximum of two semesters.
4. Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Director of English as a Second Language programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll in the IEBP in the following semester.

9.12 European Studies

www.mun.ca/interdisciplinary/european/

Program Co-ordinator: Dr. E. Warkentin, Department of German and Russian

9.12.1 Minor in European Studies

The Minor in European Studies is an interdisciplinary program. It requires the completion of at least 9 credit hours at the Harlow Campus or as part of an approved exchange program with a European university. The Minor is an alternative to a Minor offered by a single department and satisfies degree requirements for a Minor. Students completing this Minor must choose a Major in a single discipline.

The objective of the program is to explore contemporary Europe through the study of its politics, society, history and culture. The program consists of a series of inter-related courses in different disciplines focussing on present-day Europe and its recent history (19th and 20th centuries), and is coordinated by a Program Co-ordinator in consultation with the Director of the Harlow Campus.

European Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, European Studies**.

9.12.2 Regulations

Students who minor in European Studies shall complete a minimum of 24 credit hours including:

1. European Studies 2000
2. History 2310
3. One of French 3650, German 2901, German 3000, German 3001, German 3005, History 3005, Russian 2900, Russian 2901, Russian 3005, Spanish 3400
4. One of European Studies 3000-3030 (Special Topics in European Studies) or 3 credit hours from the European Studies Course List below.
5. Twelve additional credit hours from the European Studies Course List below including at least 9 credit hours completed at the Harlow Campus or as part of an approved exchange program with a European university or an approved study abroad program.

No more than 12 credit hours from any one discipline shall be applied to the Minor in European Studies. Students should consult the European Studies Minor Program Co-ordinator on the availability of courses at Harlow (or in exchange programs or study abroad programs) and at the St. John's and Grenfell campuses.

9.12.3 Course List

Courses marked with an asterisk normally may be taken only after completion of at least one prerequisite at the 2000 level or beyond. Other courses, especially at the 3000 level and above, are normally taken after one or more introductory courses in the discipline are completed.

- Notes: 1. Students should consult the European Studies Program Co-ordinator on the applicability of special topics and other courses not listed above to the European Studies Minor program. In particular, courses taught at the Harlow Campus by other academic units and dealing with the broad themes of the program may be applicable to the Minor in European Studies. Such courses may be offered by Grenfell Campus, the Faculty of Business Administration, the Faculty of Science, the School of Music, and other faculties and schools.
2. The suffix -097 indicates course sections offered at the Harlow Campus by various academic units.
3. Courses in the series 3710 to 3729 indicate courses which form part of programs offered by the Faculty of Arts only at the Harlow Campus.
4. Up to 6 credit hours in the discipline of a student's major programs may count towards the minor, but these shall be in addition to the minimum course requirements for the major.
5. Normal prerequisites, policies on the waiver of prerequisites and credit restrictions in the respective departments will apply.

9.13 Film Studies

www.mun.ca/interdisciplinary/film/

Program Co-ordinator: Dr. J.O. Buffinga, Department of German and Russian Language and Literature

The Minor in Film Studies is an interdisciplinary program. It consists of a complement of core courses that is supported by elective courses in cognate disciplines. The objective of the program is to teach students to think historically, theoretically and analytically about film within the broad context of humanistic studies. Students completing this Minor must choose a Major in a single discipline.

9.13.1 Minor in Film Studies

Students who choose the Minor in Film Studies must complete at least 24 credit hours, including:

1. English 2850 and 2851;
2. 18 credit hours selected from the Film Studies **Course List** below ;
3. a maximum of 6 credit hours at the 1000 level; and
4. a minimum of 6 credit hours at the 3000 level or higher

Note: Not more than 3 credit hours in courses in the student's Major Program may also be used to satisfy the requirements of the minor in Film Studies.

9.14 Folklore

www.mun.ca/folklore/about/

The discipline of Folklore is a diverse examination of informal culture. Its subjects include stories, music, dance, drama, architecture, material culture, celebrations and patterns of belief, as well as customs related to work, leisure, childhood, family, aging, individuality and community.

Folklore explores these customs as dynamic relationships between old ideas and new, individual creation and collective acceptance, local and global influences. And because folklore concerns the everyday, intimate practices of people, ethnographic field research is a vital part of its practice.

Folklore course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Folklore**.

9.14.1 General Degree

Folklore 1000 (or 2000) is recommended as an introductory course for all other courses in Folklore.

9.14.2 Major in Folklore

A student registered to major in Folklore must take a minimum of 36 credit hours in courses as follows:

1. Eighteen required credit hours: 1000 (or 2000), 2100, 2300, 2401, 2500, 4470;
2. Six credit hours from Group A - Folk Literature Genres: 3100, 3200, 3250, 3300, 3450, 3612, 3618;
3. Six credit hours from Group B - Folklife Genres: 3001, 3350, 3591, 3606, 3650, 3700, 3713, 3820, 3830, 3850, 3860, 3870, 4460;
4. Six credit hours from Group C - Topics: not more than 3 of which can be taken from courses at the 1000 level: 1050, 1060, 2230, 2700, 3350, 3360, 3460, 3591, 3601, 3613, 3618, 3700, 3714, 3800, 3900, 3910, 3920, 3930, 3940, 3950, 4015, 4100, 4300, 4310, 4320, 4350, 4360, 4370, 4400, 4410, 4420, 4440, 4480, 4810.

Students who declare a major in Folklore should have completed Folklore 1000 (or 2000); it is recommended that students intending to major in Folklore take Folklore 2100 as early in their programs as possible.

All students who major in Folklore will be assisted by a faculty advisor who will help them in planning their academic program. Consequently, it is essential that students consult with the Department at an early stage in their studies.

9.14.3 Minor in Folklore

A student declaring a minor in Folklore must take a minimum of 24 credit hours including:

1. Fifteen required credit hours: 1000 (or 2000), 2100, 2300, 2401, 2500;
2. Nine additional credit hours in Folklore - not more than 3 of which can be taken from courses at the 1000 level.

Students who declare a minor in Folklore should have completed Folklore 1000 (or 2000); it is recommended that students intending to minor in Folklore take Folklore 2100 as early in their programs as possible.

9.14.4 Honours Degree in Folklore

See **General Regulations for Honours Degree**. An Honours student in Folklore must complete a minimum of 60 credit hours, including the 36 as prescribed for the Major in Folklore. The remaining courses will normally include one of the following options:

1. Folklore 400X
2. Folklore 4998
3. Folklore 4999

9.14.5 Joint Honours Degree in Folklore and Another Major Discipline

See **General Regulations for Honours Degrees**. A minimum of 84 credit hours in the two subjects selected, with the approval of the Heads of both Departments, is required.

Of the credit hours required in the two subjects selected, not fewer than 42, and not more than 51, must come from each discipline. The student may choose the discipline in which to complete the Honours Essay or the Comprehensive Examination. If the student chooses the 400X option, the Folklore component will consist of the major in Folklore plus 400X, for a maximum of 51 credit hours in Folklore. Students are advised to choose an option as soon as possible after declaring the second subject of the Joint Honours degree.

9.15 French and Spanish

www.mun.ca/frenchandspanish/welcome/

The Department of French and Spanish offers the following programs:

1. French Major
2. French Minor
3. Honours Degree in French
4. Joint Honours in French
5. Frecker program in French Immersion
6. Canadian Third Year In Nice
7. Université de Bretagne Sud (UBS)
8. Spanish Major

9. Spanish Minor

Native speakers of French, Spanish or Italian and students with near-native fluency will not normally receive credit for courses taken at the first year level in their native language nor will they be allowed to challenge for credit at the first year level. Such students shall consult the Department to be placed at the appropriate level.

French course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, French**.

9.15.1 French Major Program

Students who choose French as their Major must complete at least 42 credit hours in French, including:

1. 2100 and 2101 OR 2159 and 2160
2. 2300
3. 2601 and 2602
4. 3100 and 3101
5. At least two of 3500, 3501, 3502, 3503, 3504 or 3506
6. At least 6 credit hours at the 4000 level

Notes: 1. No more than 6 credit hours at the 1000 level may be used to fulfil the minimum requirements of the Major in French.
 2. No more than 12 transfer credit hours may be used to fulfil the minimum requirements of the Major in French.
 3. By the time of their graduation, all students majoring in French must have spent at least four weeks at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment.
 4. It is strongly recommended that students in the Major program complete Classics 1120.

9.15.2 French Minor Program

Students who choose French as their Minor must complete at least 24 credit hours in French, including:

1. 2100 and 2101 OR 2159 and 2160
2. 3100 OR 3101

Notes: 1. No more than 6 credit hours at the 1000 level may be used to fulfil the minimum requirements of the Minor in French.
 2. No more than 6 transfer credit hours may be used to fulfil the minimum requirements of the Minor in French.

9.15.3 Honours Degree in French

In addition to the following regulations students are advised to see the General Regulations for Honours Degrees.

An Honours degree in French shall consist of at least 60 credit hours in French, including:

1. 2100 and 2101 or 2159 and 2160
2. 2300
3. 2601 and 2602
4. 3100 and 3101
5. At least two of 3500, 3501, 3502, 3503, 3504 or 3506
6. A minimum of 21 credit hours at the 4000 level, including French 4900 and 4999.

Notes: 1. Classics 1120 may be substituted for 3 credit hours in French.
 2. By the time of their graduation, all students completing the Honours program in French must have spent at least two semesters at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment.
 3. No more than 24 transfer credit hours may be used to fulfil the minimum requirements of the Honours program in French.

9.15.4 Joint Honours

French may be combined with any other subject approved in the General Regulations to form a Joint Honours program. Students will establish their program in consultation with the Heads of the Departments of their chosen Honours subjects.

The Joint Honours program in French shall include at least 51 credit hours in French, including the same requirements as the French Major with the exception of a minimum of 15 credit hours at the 4000 level.

Notes: 1. Classics 1120 may be substituted for 3 credit hours in French beyond the first-year level.
 2. By the time of their graduation, all students completing the Joint Honours program in French must have spent at least two semesters at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment.
 3. No more than 18 transfer credit hours may be used to fulfil the minimum requirements of the Joint Honours program in French.

9.15.5 Transfer Credit for Language Courses

Students who successfully complete French or Spanish language programs offered by recognized universities and colleges in Canada and elsewhere may apply to have their courses evaluated for equivalent Memorial University of Newfoundland credit. To do so, they must follow such procedures as may be specified by the Office of the Registrar; they may also be required to sit a placement test administered by the Department of French and Spanish. The result achieved on this placement test will influence any determination of the number and level of transfer credits to be awarded.

Students intending to participate in a summer language bursary program or the Student Fellowship Programs are particularly advised to consult the Head of the Department of French and Spanish before leaving Memorial University of Newfoundland. All students intending to request transfer of credit are strongly advised to obtain a Letter of Permission from the Office of the Registrar before registering for any course of study offered by another institution.

Notes: 1. In any event, no more than 9 transfer credit hours in either French or Spanish at the first-year level, and 18 at the second-year level, may be granted to any student.
 2. See specific program regulations for restrictions placed on the maximum number of transfer credit hours applicable to the Minor, Major, Honours and Joint Honours programs.

9.15.6 Frecker Program

The Frecker Program is a one-semester immersion program offered by Memorial University of Newfoundland in St-Pierre. Students who successfully complete this program will receive 15 credit hours in French as specified in Note 3. below. All students will board with French families and will participate in extra-curricular activities designed to take full advantage of the French milieu.

Notes: 1. The minimum prerequisites for admission to the program are successful completion of French 1502 and permission of the Head of the

Department following written application. Admission to the program will be on a competitive basis and will depend on marks obtained in French courses at Memorial University of Newfoundland and on instructors' recommendations.

2. *The cost of room and board is partially subsidized by the Federal Government Bursary Program in the case of residents of Newfoundland and Labrador. (A limited number of non-bursary students may be admitted to the program.)*
3. *Students who are admitted to this program will register for French 2100, 2101, 2300, 2900, and 2601 or 2602.*

9.15.7 Canadian Third Year in Nice Program

Memorial University of Newfoundland is a member of a consortium of Canadian universities (with Guelph University, University of Western Ontario, University of Windsor), which offer the Canadian Third Year in Nice Program. This program enables students to spend a full academic year studying at the Université de Nice-Sophia Antipolis in the South of France. Canadian Students participating in this program are accompanied by a faculty member from one of the Canadian universities participating in the program. This person teaches two of the five courses which students complete each semester in Nice, the other three being chosen from the offerings of the Université de Nice. Specific Memorial University of Newfoundland credits are awarded for successful completion of the courses taught by the Canadian coordinator and specified and/or unspecified credits are awarded for the courses offered by the Université de Nice. All courses completed under this program will be offered outside the normal time frame for courses offered at Memorial University of Newfoundland. Fall Semester courses will be completed between October and January each year, Winter Semester courses between February and May. This follows the time frame of Sessions I and II at the Université de Nice-Sophia Antipolis.

L'université Memorial fait partie du consortium des universités canadiennes qui offre le programme Canadian Third Year in Nice (avec Guelph University, University of Western Ontario, University of Windsor). Ce programme permet à des étudiants et étudiantes de passer une année académique à l'université de Nice-Sophia Antipolis dans le sud de la France. Les étudiant/e/s et canadien/ne/s qui participent à ce programme sont encadrés par un/e professeur/e d'une des universités qui participent à ce programme. Chaque semestre, cette personne enseigne deux cours sur les cinq. Les trois autres cours sont choisis parmi les cours enseignés à l'université de Nice. Les cours de l'enseignant/e canadien/ne donneront droit à des crédits spécifiés, alors que les cours suivis avec les professeur/e/s niçois/es donneront droit à des crédits spécifiés et/ou non spécifiés. Le calendrier sera différent de celui de l'université Memorial: les cours d'automne auront lieu de septembre à janvier et ceux d'hiver de février à mai, suivant le calendrier des sessions I et II de l'université de Nice-Sophia Antipolis.

9.15.7.1 Program of Study

Session I (Fall Semester):

3102 French Language Studies at Nice (I)

3102 Études de la langue française à Nice (I)

3507 Advanced French Studies at Nice (I)

3507 Études françaises à Nice (I)

Session II (Winter Semester):

3103 French Language Studies at Nice (II)

3103 Études de la langue française à Nice (II)

3508 Advanced French Studies at Nice (II)

3508 Études françaises à Nice (II)

Notes: 1. *The above-mentioned courses are offered only at the Université de Nice-Sophia Antipolis in France. Les cours mentionnés ci-dessus ne sont offerts qu'à l'Université de Nice-Sophia Antipolis en France.*

2. *French 3102/3103 can be substituted for French 3100/3101 for the purposes of French program requirements and as course prerequisites. Les cours Français 3102/3103 pourront remplacer les cours Français 3100/3101 pour satisfaire aux exigences du programme de français.*

3. *Students should consult the Head of the Department regarding course selection. Les étudiants et étudiantes doivent consulter la direction du département concernant le choix des cours.*

9.15.8 Université de Bretagne Sud (UBS)

The exchange program with the Université de Bretagne Sud (UBS) in Lorient, France, is a one semester immersion program (January to May) offered by Memorial University of Newfoundland at the third and/or fourth year level. Specified and/or unspecified Memorial University of Newfoundland credits are awarded for successful completion of the courses taken at UBS.

Le programme d'échanges avec l'université de Bretagne Sud à Lorient, France, est un programme d'immersion d'un semestre aux niveaux de la troisième et/ou de la quatrième année. Les cours suivis à l'UBS donneront droit à des crédits spécifiés et/ou non spécifiés de Memorial University of Newfoundland.

9.15.9 Italian

The Department of French and Spanish offers introductory Italian courses.

Italian course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Italian**.

9.15.10 Spanish

Spanish course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Spanish**.

9.15.10.1 Spanish Major Program

A Major in Spanish consists of a minimum of 36 credit hours in Spanish chosen from the courses listed under the **Spanish Course Descriptions**.

Note: *It is strongly recommended that students in the Spanish Major Program complete Classics 1120 and 1121.*

9.15.10.2 Spanish Minor Program

A Minor in Spanish consists of a minimum of 24 credit hours in Spanish from the courses listed below.

9.15.10.3 Study Abroad Programs in Spanish

The Spanish section of the Department of French and Spanish offers students the opportunity of participating in Study Abroad programs in Spanish. These programs are designed to provide an intensive immersion experience in a Spanish-speaking country each summer. On successful completion of one of these programs, students will be awarded specific credits applicable to their academic program at Memorial University of Newfoundland.

A Study Abroad program in Spanish will be offered each summer, provided that there is sufficient enrolment. All such courses will be

offered outside the normal time frame for courses offered at Memorial University of Newfoundland.

Students will be required to register for either SPAN 2010/2020 or SPAN 3010/3020 in any one program.

Students who are unsure whether they meet the prerequisites for SPAN 2010, 2020, 3010, 3020, or 6900 should consult the Co-ordinator for Spanish.

Spanish course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Spanish**.

9.16 Gender Studies

www.mun.ca/genderstudies/

Gender Studies is an academic area of study that critically examines how gender shapes our identities, our social interactions and our world. Through exposure to interdisciplinary perspectives, students develop frameworks for thinking about power relations and the ways that those relations are shaped and challenged by intersecting constructions of gender, race, class, sexuality, ability, age and nationality. Gender Studies examines everyday experiences, social and political institutions, literary and philosophical contributions, and past and present ideas and world events. The discipline provides students with tools to engage with and critically analyze these areas.

Women's Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Gender Studies**.

9.16.1 Major Program Regulations

Students declaring a Major in Gender Studies should consult the Head of the Department regarding course selection.

The Major Program in Gender Studies consists of a minimum of 39 credit hours. The following courses are required:

1. Gender Studies 1000, Gender Studies 2005, Gender Studies 3000, one of Gender Studies 3005, or Gender Studies 3025, Gender Studies 4000, and Gender Studies 4005.
2. A minimum of 21 credit hours from the Gender Studies **Electives Courses Table** outlined below, selected from at least three different subject areas.
3. One of these courses may be a selected topics or directed readings course in any subject relevant to the major program.
4. A selected topics or directed readings course included in the student's major program must be approved in advance by the Committee on Undergraduate Studies on the recommendation of the Head of the Department.

9.16.2 Minor Program Regulations

Students who minor in Gender Studies shall complete a minimum of 24 credit hours in courses which shall include the following:

1. Gender Studies 1000, Gender Studies 3000 or 3025, and Gender Studies 4000.
2. A minimum of 15 credit hours in courses from the Gender Studies **Electives Courses Table** outlined below taken in at least three different subject areas. Gender Studies courses that are not required for the Minor, but that have a Gender Studies (GNDR) designation can be counted as Minor Elective Courses in one subject area. One of these courses may be selected topics or directed
3. A selected topics course or directed readings course included in the student's minor program must be approved in advance by the Committee on Undergraduate Studies on the recommendation of the Head of the Department.
4. Not more than 3 credit hours in courses in the students major Program may be used to satisfy the requirements of the minor in Women's studies.

9.16.3 Elective Courses

Normal prerequisites and waiver policies in the respective departments will apply. Some courses may not be offered on a regular basis. Students should consult the appropriate department(s) for scheduling information.

9.17 Geography

www.mun.ca/geog/about/

The following undergraduate programs are available in the Department of Geography:

1. Major in Geography (B.A. or B.Sc.)
2. Honours in Geography (B.A. or B.Sc.)
3. Minor in Geography
4. Joint Programs

5. Focus Area in Geography
6. Diploma in Geographic Information Sciences

Geography course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Geography**

9.17.1 Major in Geography (B.A. or B.Sc.)

1. Students may complete a Major in Geography as part of either a B.A. or B.Sc. program. See the **Regulations for the General Degree of Bachelor of Arts** and **Regulations for the General Degree of Bachelor of Science** degrees as appropriate.
2. All students who major in Geography shall consult with their assigned faculty advisor, or the Head of the Department, who will help them in planning their academic program. For this purpose, it is essential that students declare their major at an early stage of their studies.
3. The Major in Geography consists of 45 credit hours in Geography courses including:
 - a. 1050, or 1000 & 1001, or 1010 & 1011;
 - b. 2001, 2102, 2195, 2226, 2302, 2425;
 - c. 3222, 3226;
 - d. Nine credit hours from courses at the 3000-level;
 - e. At least 9 credit hours chosen from courses at the 4000-level;
 - f. Further credit hours in courses at the 3000-level or above, to fulfil the required 45 credit hours in Geography courses.
4. B.Sc. students must complete 15 credit hours in science courses outside Geography at the 2000-level or above.

9.17.2 Honours in Geography (B.A. or B.Sc.)

1. Students intending to take an Honours degree in Geography must apply for entry to the Honours program through the Office of the Registrar.
2. Students accepted in the Honours program must:
 - a. Comply with the **Regulations for the Honours Degree of Bachelor of Arts** or **Regulations for the Honours Degree of Bachelor of Science** as appropriate.
 - b. Arrange their program in consultation with the Head of the Department.
3. For the Honours Degree, a student will be required to have completed at least 60 credit hours in courses in Geography, including:
 - a. Forty-five credit hours in courses as listed under Major in Geography.
 - b. Geography 3230, 4990 and 4999.
 - c. Six additional credit hours at the 4000-level.

9.17.3 Minor in Geography

The Minor in Geography consists of 24 credit hours in Geography courses, including:

1. 1050, 2001, 2102, 2195, 2302, 2425; and 6 credit hours in electives taken from Geography courses at the 3000- or 4000- level, or
2. 1000 and 1001, or 1010 and 1011; 2001, 2102, 2195, 2302, 2425; and 3 credit hours in electives taken from Geography courses at the 3000- or 4000- level.

9.17.4 Joint Programs

Regulations for the Joint Honours in Computer Science and Geography, Joint Honours in Geography/Earth Sciences, and Joint Major in Computer Science and Geography are found under the heading **Joint Programs** in the entry for the Faculty of Science.

Students who wish to take a Joint Major or a Joint Honours in Geography and another subject must arrange their program in consultation with the heads of the Departments concerned, and comply with the General Regulations of the appropriate Faculty.

9.17.5 Focus Area in Geography - Bachelor of Education (Primary/Elementary)

The focus area in Geography is applicable only to the Bachelor of Education Primary/Elementary degree programs offered by the Faculty of Education. Please see **Focus Areas** under the Faculty of Education for program details.

9.17.6 Diploma in Geographic Information Sciences

Information regarding the Diploma Program in Geographic Information Sciences may be found under the heading Diploma Programs Offered in the Faculty of Arts.

9.18 German and Russian Language and Literature

www.mun.ca/german/about/

9.18.1 German

www.mun.ca/german/german/

German course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, German**.

9.18.1.1 General Degree

All students who did not matriculate in German will begin their study with Elementary German I (1000) or equivalent.

9.18.1.2 German Language and Literature Major Program

Students majoring in German must comply with the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)** and arrange their program in consultation with the Head of the Department. Students majoring in German may choose from three streams: literature, cultural studies, or business and commerce streams. The choice of stream will determine the courses required for a major. It is highly desirable that, during their course of study, all students majoring in German spend at least one semester of study in a German-speaking country.

Major Streams**1. Literature Stream**

Students majoring in German (Literature stream) will normally be required to complete a minimum of 36 credit hours in German including at least 24 credit hours in the following courses or their equivalents: German 1000, 1001, 2010, 2011, 3010, 3011, 3900 and 3901. Exceptional students may be extended an invitation to participate in a graduate level seminar.

Suggested Course Pattern for the Major in German (Literature Stream) Table

First-Year	Second-Year	Third-Year	Fourth-Year
GERM 1000 GERM 1001	GERM 2010 GERM 2011 Recommended: GERM 3912, 3913, or other electives	GERM 3010 GERM 3011 GERM 3900 GERM 3901 Recommended: two 3 credit hour electives	Remaining courses to complete the Major in German (Literature Stream)

2. Cultural Studies Stream

Students majoring in German (Cultural Studies stream) will normally be required to complete a minimum of 36 credit hours in German, including at least 24 credit hours in the following courses or their equivalents: German 1000, 1001, 2010, 2011, 2900, 2901, 3010, and 3011. Exceptional students may be extended an invitation to participate in a graduate level seminar.

Suggested Course Pattern for the Major in German (Cultural Studies Stream) Table

First-Year	Second-Year	Third-Year	Fourth-Year
GERM 1000 GERM 1001	GERM 2010 GERM 2011 GERM 2900 GERM 2901	GERM 3010 GERM 3011 Recommended: four 3 credit hour electives	Remaining courses to complete the Major in German (Cultural Studies Stream)

3. Business and Commerce Stream

Students majoring in German (Business and Commerce stream) will normally be required to complete a minimum of 36 credit hours in German, including at least 24 credit hours in the following courses or their equivalents: German 1002, 1003, 2010, 2011, 2012, 3010, 3011, and 3902. The student will be required to complete a period of work of not less than four weeks with a company in a German-speaking country, or with approval of the Department Head, a company that can provide the student with an environment that requires substantial work to be done in German.

Suggested Course Pattern for the Major in German (Business and Commerce Stream) Table

First-Year	Second-Year	Third-Year	Fourth-Year
GERM 1002 GERM 1003	GERM 2010 GERM 2011 GERM 2012 one 3 credit hour elective	GERM 3010 GERM 3011 GERM 3902 four 3 credit hour electives	Remaining courses to complete the Major in German (Business and Commerce Stream)

9.18.1.3 German Language and Literature Minor Program

A Minor in German will consist of a minimum of 24 credit hours. Students must obtain credit for: German 1000, 1001 (or their equivalents), 2010, 2011.

9.18.1.4 German Studies Minor Program

A Minor in German Studies is offered as a special program of an interdisciplinary nature, consisting of a minimum of 24 credit hours in courses as follows:

1. Eighteen credit hours in German, including: 1000; 1001 (or their equivalents); 2010 and 2011; 2900; 2901;
2. Six credit hours taken in either additional courses in German and/or from cognate courses offered by other departments, such as History 3370, 3380, Philosophy 3850, 3851, 3860, to be chosen through prior consultation with the Head of the Department.

Note: German 2030, 2031, 2900, 2901, 2910, 3000, 3001, 3002, 3003, 3005, 3902, 3911, 3912, 3913, 3914, 3915 and the Special Topics courses in German Studies may not be used as part of the Faculty of Arts requirements for 6 credit hours in a second language.

9.18.1.5 Honours Degree

Students wishing to take an Honours degree in German must arrange their program in consultation with the Head of the Department. They will be required to comply with the University regulations for Honours degrees, to take a minimum of 60 credit hours in German with at least a 'B' standing, and to write a comprehensive examination or present a Honours Essay in their final year. Courses in German must include the following required 27 credit hours: German 1000, 1001 (or their equivalent), 2010, 2011, 3010, 3011, 4010, 4011, and 4998 or 4999. Students reading German in a Joint Honours degree program will take a minimum of 42 credit hours in German, which must include the following 24 credit hours in courses German 1000, 1001 (or their equivalents), 2010, 2011, 3010, 3011, 3900, 3901 with at least a 'B' standing.

Suggested Course Pattern for the Honours Program Table

First-Year	Second-Year	Third-Year	Fourth-Year
GERM 1000 GERM 1001	GERM 2010 GERM 2011 GERM 2900 GERM 2901 Recommended: two 3 credit hour electives at the 2000 level or higher	GERM 3010 GERM 3011 GERM 3900 GERM 3901 Recommended: two 3 credit hour electives at the 3000 level or higher	GERM 4010 GERM 4011 GERM 4998 or 4999 two 4000 level literature courses taught in German one 3 credit hour elective

9.18.2 Russian

www.mun.ca/german/russian/

Information regarding the Russian Studies program can also be found online at www.mun.ca/german/russian/course_descriptions.php.

Russian 1000 and 1001 are prerequisites for all other Russian courses except Russian 2030, 2031, 2600, 2601, 2900, 2901, 3005, 3023 and 3910.

Russian 2600, 2601, 2900, 2901, 3023, 3005, 3023 and 3910 may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language.

Russian course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Russian**.

9.18.2.1 Russian Language and Literature Major Program

A Major in Russian consists of a minimum of 36 credit hours in Russian including Russian 2600, 2601, 2900, 2901 and 3010, as well as 6 credit hours in courses at the 4000 level.

9.18.2.2 Russian Language and Literature Minor Program

A Minor in Russian consists of a minimum of 24 credit hours in Russian including 12 credit hours in the following: Russian 1000, 1001, 2010, and 2011.

Students should note that credit for courses 2600 and 2601 will not normally count towards a Minor in Russian Language and Literature.

9.18.2.3 Russian Studies Minor

A Minor in Russian Studies is offered as a special program of an interdisciplinary nature, consisting of a minimum of 24 credit hours, namely 12 credit hours in Russian and 12 in at least two disciplines, to be chosen in consultation with the Head of Department of German and Russian from the following course offerings:

1. History 3350, History 3360, Philosophy 3890, Political Science 3020, the former Political Science 3320, Sociology 3710
2. and other such courses as may be added to the list from time to time by the Faculty of Arts Committee on Undergraduate Studies.

9.19 History

www.mun.ca/history/home/

History course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, History**.

9.19.1 General Degree

1. See the **Regulations for the General Degree of Bachelor of Arts**.
2. Any one of History 1009-1015 or the sequence History 1100* and 1101* form the introductions to the theory and practice of history. Third and fourth-year students taking History courses as electives or to satisfy General Regulations for the B.A. Degree are encouraged to enrol in the department's second-year courses. Students cannot receive credit for more than two first-year courses.
3. All students who Major in History will be assisted by a faculty advisor who will help them in planning their academic programs. It is essential that students register with the Department at an early stage of their studies.
4. **Major in History**

Students who undertake a Major in History must complete 36 credit hours in History, including:

- a. Three credit hours in a course beginning with the initial digit '1'. All first-year courses in History are research/writing courses.
- b. At least 12 credit hours in courses with the initial digit '2' including 3 credit hours in one of History 2200, 2210 or 2400.
- c. Students should complete at least 9 credit hours in courses with the initial digit '2' before registering in a course with the initial digit '3'. Student should pay particular attention to necessary prerequisites when scheduling courses. In addition, students should obtain advice on the appropriate courses from their faculty advisor.
- d. At least 9 credit hours in courses with the initial digit '3'. Students must complete History 3840 for which there is a prerequisite of 12 credit hours in History.
- e. Students should complete at least 3 credit hours in courses with the initial digit '3' before registering in a course with the initial digit '4'.
- f. At least 6 credit hours in courses with the initial digit '4'.
- g. Six additional credit hours in courses with an initial digit beyond '1'.
- h. The following courses may not be used to meet the requirements for a Major in History without the prior written approval of the Head: History 4480, 4800, 4821, 4822, and 4999.
- i. No more than 15 transfer credit hours in History may be used to fulfil the requirements for a Major in History.
- j. Some fourth-year courses may require completion of courses in the same topic/subject area. Such prerequisites are at the discretion of the instructor.

5. Minor in History

Students who undertake a Minor in History must complete 24 credit hours in History, including:

- a. Three credit hours in a course beginning with the initial digit '1'. All first-year courses in History are research/writing courses.
- b. At least 9 credit hours in courses with the initial digit '2'.
- c. Students should complete at least 6 credit hours in courses with the initial digit '2' before registering in a course with the initial digit '3'.
- d. At least 6 credit hours in courses with the initial digit '3'.
- e. At least 3 credit hours in courses with the initial digit '4'.
- f. No more than 9 transfer credit hours in History may be used to fulfil the requirements for a Minor in History.
- g. Three additional credit hours in courses with an initial digit beyond '1'.
- h. Some fourth-year courses may require completion of courses in the same topic/subject area. Such prerequisites are at the discretion of the instructor.

6. Specialization in Maritime History

The Department of History offers a specialization in Maritime History. Recommended courses include History 2100**, History 2110, History 3680, History 3690, and 6 credit hours from History 4670-4690.

* For descriptions of History 1100 and 1101, see the separate section under Grenfell Campus.

** Grenfell Campus only.

9.19.2 Honours Degree

1. Students intending to take an Honours Degree with a Major in History must comply with the Regulations for the Honours Degree of Bachelor of Arts.
2. For consideration as entrants during the Fall semester, students must make application by 30 June; for the Winter semester, by 1 November. Applications received after 30 June will be considered for the Winter semester; applications received after 1 November will be considered for the next Fall semester. Students intending to complete an Honours degree in History will be assisted by a faculty advisor who will help them in planning their academic programs. The academic programs for Honours students must be approved by the Head or delegate.
3. Students are required to complete at least 60 credit hours in History, 45 chosen in accordance with the pattern set out in the Departmental General Degree Regulation No. 4 above. In addition, students must complete History 4800, 4821, 4822, and 4999. The minimum grades required are: (a) 70%, or an average of 75%, in the prescribed number of courses, and (b) 70% in History 4999.
4. Students electing Joint Honours are required to complete at least 51 credit hours in History, 39 chosen in accordance with the pattern set out in the Departmental General Degree Regulation No. 4 above. In addition, students must complete History 4800, 4821, and 4822, with grades prescribed in Honours Degree Regulation No. 3. If the student chooses to do the Honours Essay (4999) in History, it must be passed with a grade of 70% or better.
5. No more than 27 transfer credit hours may be included in the minimum 60 credit hours required for the Honours degree in History.

9.20 Law and Society

www.mun.ca/interdisciplinary/lawsocietymajor/

Program Co-ordinator: Dr. K. Side

The programs listed below are interdisciplinary programs intended to encourage students to examine different facets of law and its role in society. They are neither pre-law programs nor ones offering a certificate or qualification in legal studies. They will acquaint and confront students with different aspects of the history, philosophical basis, and role of law in modern society. They include both courses which deal explicitly with law (e.g. Canadian Constitutional Law, International Law, History of Law, Criminal Justice), and courses in social and political theory and the role of law and its norms in diverse settings. Law and Society 1000 and Law and Society 4000 are intended to integrate the material and provide a common focus at both the beginning and the end of the programs.

As is the case in any interdisciplinary program, it will be up to the students to ensure that they have the necessary prerequisites to complete the program. For purposes of entry into the courses offered by participating departments, heads will be asked to treat these students on the same basis as their own majors.

Law and Society course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Law and Society**.

Programs:

The interdisciplinary Major and Minor programs are offered to students for the Degree of Bachelor of Arts. These programs are offered in conjunction with a major or a minor in a single discipline. In order to be awarded a Bachelor of Arts with a Major or Minor in Law and Society, students must complete all the requirements of the Bachelor of Arts.

Students majoring or minoring in Law and Society may use the courses they complete to meet the requirements of either their Law and Society major or minor or their single-discipline major or minor but not both.

9.20.1 Major Program Regulations

Students who major in Law and Society must complete:

1. all the requirements of the Bachelor of Arts program;
2. a minimum of 36 credit hours in courses which shall include, in addition to Law and Society 1000 and Law and Society 4000, an additional 30 credit hours in at least 3 different disciplines and chosen from the **Table** below including:
 - a. 9 credits at the 1000 or 2000 level
 - b. 15 credits at the 3000 level
 - c. 6 credits at the 4000 level

Before registering for any Law and Society 4000 level course, students must complete 18 of the 36 credit hours required for the major including Law and Society 1000. In exceptional circumstances, the Co-ordinator may waive this prerequisite.

Elective Courses Approved for Inclusion in the Law and Society Major and Minor Programs Table

1000 and 2000 Level Courses	3000 Level Courses	4000 Level Courses
Anthropology 2260 Anthropology 2413 Archaeology 2492 Law and Society 2000 Philosophy 2230 Philosophy 2400 Police Studies 2000 Political Science 1000 Political Science 2600 Political Science 2800 Psychology 2150 Sociology 2100	German 3915 History 3200 Law and Society 3012 Law and Society 3013 Law and Society 3014 Law and Society 3015 Law and Society 3016 Law and Society 3200 Law and Society 3300 Law and Society 3400 Linguistics 3220 Philosophy 3400 Police Studies 3000 Political Science 3210 Political Science 3290 Political Science 3620 Political Science 3800 Political Science 3810 Political Science 3820 Political Science 3830 Sociology 3130 Sociology 3290 Sociology 3306 Sociology 3320 Sociology 3395	Business 4000 History 4810 Law and Society 4900 Law and Society 4901-4909 Political Science 4200 Political Science 4215 Political Science 4360 Political Science 4370 Sociology 4095 Sociology 4099 Sociology 4212

9.20.2 Minor Program Regulations

A Minor program in Law and Society will consist of a minimum of 24 credit hours as outlined below:

1. Law and Society 1000 and Law and Society 4000
2. 18 credit hours chosen from the **Elective Courses Approved for Inclusion in the Law and Society Major and Minor Programs Table**, with a maximum of 6 credit hours in courses from each participating department. At least 12 of the 18 credit hours must be completed in courses numbered 3000 or higher. The normal departmental prerequisites are applicable, but Department Heads may waive course prerequisites in cases where alternate preparation can be demonstrated.
Up to 6 credit hours in Special Topics courses in Law and Society may be used to fulfil the 6 of the 18 credit hour requirement of this clause.
3. Students majoring in one of the participating disciplines may not use courses counted toward their major to fulfil the Law and Society minor requirements; however, up to 6 additional credit hours from their major subject area, listed above, may be used to fulfil the requirements of the minor.

9.21 Linguistics

www.mun.ca/linguistics/home/

Linguistics course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Linguistics**.

9.21.1 General Degree

The general degree requires 12 courses, 36 credit hours.

1. Students majoring in Linguistics must complete 36 credit hours in Linguistics, which must include the five courses numbered Linguistics 1100/2100, 1103/2103, 1104/2104, 3100, 3201 plus 21 credit hours in courses chosen from Linguistics 1105/2105, 2060, 2210, 2400, 2401, 2710, 3000, 3104, 3105, 3150, 3155, 3210, 3212, 3220, 3302, 3310, 3311, 3500, 3850, 3950-3960, 4010-4091, 4100, 4110, 4150, 4151, 4201, 4202, 4210, 4301, 4310, 4350, 4400, 4403, 4420, 4421, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4950-4960. Of these 21 credit hours, 9 must be at the 4000 level.
2. Many courses formerly offered by the Department of Linguistics have been renumbered or renamed. Students who have taken Linguistics courses at Memorial University of Newfoundland may not obtain credit for renumbered or renamed courses which the student has already taken. Students should consult with an advisor in the Department of Linguistics to ensure that they are taking the appropriate courses.
3. Prerequisites may be waived in special cases by the Head of the Department.

Note: Students intending to pursue graduate work in Linguistics should include Linguistics 3500, 4201 and at least one of 4100 and 4110 in their programs.

9.21.2 Honours Major

The honours major requires twenty courses, 60 credit hours and the joint honours requires sixteen courses, 48 credit hours.

1. See General Regulations for the Degree of Bachelor of Arts (Honours).
2. An Honours degree in Linguistics must include 60 credit hours in Linguistics courses of which the following are required: Linguistics 1103/2103, 1104/2104, 2210, 3000, 3100, 3201, 3210, 3500, 3850, 4100 (or 4110), 4201 (or 4202), 4999, and at least one of Linguistics 4010-4091, 4150, 4210, 4500, 4700, 4950-4960. Students should choose courses in consultation with their Honours Essay supervisor, to ensure that the needs and interests of the individual candidate are met, and to take into account the availability of courses which the department is able to offer.
3. Linguistics may also be combined with another subject or subjects to constitute a Joint Honours degree. The required courses listed above for the Honours degree, except for Linguistics 4999, will also be required for any Joint Honours degree in Linguistics. A total of 48 credit hours in Linguistics, which may include Linguistics 4999, is required for Joint Honours in Linguistics. Students should consult their Department of Linguistics advisor to ensure that they select courses which complement their other Honours Subject of Specialization.

9.21.3 Minor Programs

1. The General Minor requires eight courses, 24 credit hours. The following courses are required:

- a. Linguistics 1103/2103 and 1104/2104
- b. Any 2 courses from the following list: Linguistics 3000, 3100, 3104, 3201, 3500, 3850
- c. An additional 12 credit hours selected from: Linguistics 1100/2100, 1105/2105, 2060, 2210, 2400, 2401, 2710, 3000, 3100, 3104, 3105, 3150, 3155, 3201, 3210, 3212, 3220, 3302, 3310, 3311, 3500, 3850, 3950-3960, 4010-4091, 4100, 4110, 4150, 4151, 4201, 4202, 4210, 4301, 4310, 4350, 4400, 4403, 4420, 4421, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4950-4960.

2. **Focus Area in Linguistics for B.Ed. (Primary/Elementary) Students (6 courses, 18 credit hours)**

A minimum of 18 credit hours in Linguistics is required for students who are doing a focus area in the discipline. The program is as follows:

- a. Linguistics 1100 or 2100, 1103 or 2103, 1104 or 2104, 2210, and 6 credit hours in courses chosen from Linguistics 3000, 3100, 3104, 3105, 3150, 3155, 3201, 3210, 3212, 3500, 3850.
- b. Students are urged to include more than the minimum number of linguistics-related courses in their program.

9.22 Mathematics and Statistics

For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar.

The following undergraduate programs are available in the Department of Mathematics and Statistics:

1. Applied Mathematics Honours (B.Sc. only)
2. Applied Mathematics Major (B.Sc. only)
3. Applied Mathematics and Chemistry Joint Honours (B.Sc. Only)
4. Applied Mathematics and Computer Science Joint Major (B.Sc. only)
5. Applied Mathematics and Economics Joint Major (B.Sc. only)
6. Applied Mathematics and Physics Joint Honours (B.Sc. only)
7. Applied Mathematics and Physics Joint Major (B.Sc. only)
8. Biology and Statistics Joint Honours (B.Sc. only)
9. Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
10. Computer Science and Pure Mathematics Joint Major (B.Sc. only)
11. Computer Science and Statistics Joint Honours (B.Sc. only)
12. Computer Science and Statistics Joint Major (B.Sc. only)
13. Economics and Pure Mathematics Joint Major (B.Sc. only)
14. Economics and Statistics Joint Major (B.Sc. only)
15. Economics (Co-operative) and Statistics Joint Major (B.Sc. only)
16. Mathematics Minor
17. Pure Mathematics Honours
18. Pure Mathematics Major
19. Pure Mathematics and Statistics Joint Honours
20. Statistics Honours
21. Statistics Major
22. Statistics Minor

9.23 Medieval Studies

www.mun.ca/interdisciplinary/medieval/

Program Supervisor: Dr. S. McGrath, Department of Philosophy

A multi-disciplinary program in Medieval Studies is offered for students for the degree of Bachelor of Arts; it may be taken only as a second Major program in conjunction with a disciplinary Major, or as a Minor program.

The objective of the program is the integrated study through core courses of a historical and cultural period, the Middle Ages, here defined as the period between Antiquity and the Modern Age. Such an approach, coordinating the methods and subjects of several disciplines, mirrors the pluralistic and interreligious framework of the age and provides context for the study of a student's first Major.

Medieval Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Medieval Studies**.

9.23.1 Major Program

Students majoring in Medieval Studies shall discuss their program with the Program Supervisor or delegate.

Students electing Medieval Studies as their second Major shall complete a minimum of 36 credit hours in courses which shall include the following:

1. Medieval Studies 2000 and either Medieval Studies 2001 or Medieval Studies 2002
2. Six credit hours from Medieval Studies 3000, 3001, 3002, 3003, 3004, and 3006.
3. Six credit hours in courses at the 4000 level chosen from either Medieval Studies 4000-4020 or **List A**.
4. Classics 1120 and 1121.
5. An additional 12 credit hours in courses either from the **Course Descriptions** or from **List A** below, normally to include at least 6 credit hours taken in courses at the 3000 level or above. Additional courses may be chosen in consultation with the Program Supervisor.
6. No more than 6 credit hours in courses counted for a student's first major may be counted towards the Major in Medieval Studies.

9.23.2 Minor Program

Students pursuing a minor in Medieval Studies shall discuss their program with the Program Supervisor or delegate.

Students electing Medieval Studies as a Minor shall complete a minimum of 24 credit hours in courses which shall include the following:

1. Medieval Studies 2000 and either Medieval Studies 2001 or Medieval Studies 2002
2. Six credit hours from Medieval Studies 3000, 3001, 3002, 3003, 3004, and 3006.
3. Three credit hours in courses at the 4000 level chosen from either Medieval Studies 4000-4020 or **List A**.
4. An additional 9 credit hours in courses either from the **Course Descriptions** or from **List A** below, normally to include at least 3 credit hours taken in courses at the 3000 level or above. Additional courses may be chosen in consultation with the Program Supervisor.
5. No more than 3 credit hours in courses counted for a student's Major may be counted towards the Minor in Medieval Studies.

9.23.3 List A: Other Courses Approved For Inclusion in Medieval Studies Major and Minor Programs Subject to the Foregoing Regulations

Not all these courses may be offered each year; students should check with departments with regard to availability and prerequisites.

9.24 Newfoundland and Labrador Studies

www.mun.ca/interdisciplinary/newfoundland/

Acting Program Supervisor: Associate Dean of Arts (Undergraduate)

The Minor in Newfoundland and Labrador Studies is an interdisciplinary program. The objective of the program is the study of the society and culture of Newfoundland and Labrador through a variety of disciplinary approaches rather than the concentration upon a single discipline. This Minor program is an alternative to a Minor offered by a single department. Students completing this Minor must choose a Major in a single discipline. Since the program draws upon courses in several departments, it is administered by an interdepartmental committee. The Program Supervisor will advise students upon the selection of courses in the Minor.

9.24.1 Minor Program

1. To qualify for a Minor in Newfoundland and Labrador Studies, a student shall complete a total of 24 credit hours in courses as follows:

- a. Fifteen credit hours in courses on the following list and from at least four different Departments.
 Archaeology 3850 (same as Folklore 3850), 3860 (same as Folklore 3860 and History 3860)
 Economics 2070, 3070
 Education 3571
 English 3155
 Folklore 2230, 2300, 3850 (same as Archaeology 3850) and 3860 (same as Archaeology 3860 and History 3860)
 Geography 2290, 2495
 History 3110, 3120, 3200 (same as Law and Society 3200), 3860 (same as Archaeology 3860 and Folklore 3860)
 Law and Society 3200 (same as History 3200)
 Linguistics 2210
 Music 2021, 2022, 2023 (a maximum of 3 credit hours)
 Political Science 3880 or the former Political Science 3780
 Religious Studies 3900, 3901
 the former Sociology/Archaeology 2220
 Sociology 2230 (same as Folklore 2230)

Note: Religious Studies 3900/3901 deal with different periods and topics. Students can register in 3901 without having taken 3900.

- b. Nine additional credit hours in courses chosen from the above list and/or from the following, including at least 3 credit hours chosen from courses at the 4000 level:
 Anthropology 4280
 Folklore 4310, 4400
 French 4400 (same as Folklore 4400)

History 4230, 4231
 Linguistics 4220
 Political Science 4650 or the former Political Science 4731
 Sociology 4240

Note: Students should consult the Program Supervisor on the applicability of special topics and other courses that have a high level of Newfoundland and/or Labrador content. The Program Supervisor can then seek permission for the inclusion of such courses in the student's minor program.

- c. Prerequisites: Normal departmental prerequisites will be required as laid down by the various Departments.
2. Up to 6 credit hours in courses counted for a student's Major Department may count towards the Minor, but these shall be in addition to the minimum course requirements for the Major.

9.25 Philosophy

www.mun.ca/philosophy/

9.25.1 General

Philosophy courses may be taken singly as general arts electives or as part of a Minor, Major, Honours or multidisciplinary program. Normally, Philosophy 1200 is a prerequisite for all philosophy courses at the 3000 level and above, though all courses are open to any student as electives with the permission of the Head of Department. Philosophy 1000, or the former Philosophy 1600, is not required for further courses in philosophy but is of particular value to students interested in the Social Sciences and Humanities.

Philosophy course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Philosophy**.

9.25.2 Major Program

The major program in Philosophy consists of a minimum of 36 credit hours in courses chosen in accordance with the following requirements:

1. Philosophy 1200, Philosophy 2000 or 2220, Philosophy 2210, Philosophy 2230 or 3400, Philosophy 2701 or 2702
2. 3 credit hours from Philosophy 3110 to 3620 (excluding Philosophy 3400 if previously completed to fulfill the requirements in 1. above).
3. 3 credit hours from Philosophy 3730-3790
4. 3 credit hours from Philosophy 3800-3851
5. 3 credit hours from Philosophy 3860-3890
6. 3 credit hours from Philosophy 3900-3950
7. 3 credit hours from the Philosophy 4700-4790 series
8. 3 credit hours from the Philosophy 4800-4890 series

Note: Students declaring a Major in Philosophy must choose a program advisor in consultation with the Head of the Department or Undergraduate Officer and the faculty member concerned.

9.25.3 Minor Program

The minor program in Philosophy consists of a minimum of 24 credit hours in courses which must be chosen in accordance with the following requirements:

1. Philosophy 1200, Philosophy 2000 or 2210 or 2220, Philosophy 2230 or 3400, Philosophy 2701 or 2702
2. 3 credit hours from Philosophy 3110 to 3950 (excluding Philosophy 3400 if previously completed to fulfill the requirements in 1. above).
3. An additional 6 credit hours in Philosophy courses at the 3000-level or higher.
4. 3 credit hours from 4000-level courses

Note: Students declaring a Minor in Philosophy may choose to have a program advisor by mutual agreement with a member of the Philosophy Department.

9.25.4 Honours Program

The full Honours program requires a minimum of 60 credit hours in Philosophy courses; Joint Honours requires a minimum of 45 credit hours in Philosophy courses. These must include:

1. Philosophy 1200, Philosophy 2000 or 2220, Philosophy 2210, Philosophy 2230, Philosophy 3400, Philosophy 2701 or 2702
2. 3 credit hours from Philosophy 3110 to 3620 (excluding Philosophy 3400 if previously completed to fulfill the requirements in 1. above).
3. 3 credit hours from Philosophy 3730-3790
4. 3 credit hours from Philosophy 3800-3851
5. 3 credit hours from Philosophy 3860-3890
6. 3 credit hours from Philosophy 3900-3950
7. 3 credit hours from the Philosophy 4700-4790 series
8. 3 credit hours from the Philosophy 4800-4890 series
9. An additional 3 credit hours in courses at the 4000-level.
10. Either Philosophy 4998 or 4999
11. Candidates for Joint Honours must choose 4998
12. Candidates for full Honours may take 4999 only with permission of the Department.
13. Other Philosophy courses to a total of 60 credit hours for full Honours, 45 credit hours for Joint Honours.
14. Candidates for Joint Honours who elect to fulfill the honours requirement in the other discipline are not required to take the Comprehensive Examination. (See **Bachelor of Arts (Honours) Degree Regulations**).

9.26 Police Studies

www.mun.ca/interdisciplinary/police/

Acting Program Co-ordinator: Associate Dean of Arts (Undergraduate)

This major program in Police Studies would be most beneficial for students who have completed the **Diploma in Police Studies**, for experienced police officers and for others working in a policing environment, and for those interested in any aspect of policing, corrections or law enforcement, who wish to obtain a university degree. While students who successfully complete the Diploma in Police Studies Program are guaranteed probationary employment with the Royal Newfoundland Constabulary (RNC), no such arrangement exists with regard to those students admitted to the major in Police Studies.

The major program in Police Studies is intended to promote critical thinking about social issues to those working in a policing environment.

Police Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Police Studies**.

9.26.1 Major Program

The multi-disciplinary Major in Police Studies program is offered to students completing the Degree of Bachelor of Arts (B.A.). It is offered in conjunction with a minor in a single discipline. In order to be awarded a B.A. with a Major in Police Studies, students must complete all the requirements of the B.A. as outlined under **Regulations for the General Degree of Bachelor of Arts**. Students should contact the Program Coordinator by June 1st for Fall admission and by October 1st for Winter to discuss the planning of their program.

As is the case with any multi-disciplinary program, it is the students' responsibility to ensure that they have the necessary prerequisites to complete the program. For purposes of entry into the courses offered by participating departments, departmental heads will be asked to make every effort to offer places to these students as early as possible in the registration process.

9.26.2 Major Regulations

Students who major in Police Studies shall complete a minimum of 36 credit hours in courses which shall include the following:

9.26.2.1 Core Courses

1. Police Studies 2000, Police Studies 3000, Police Studies 4000 or 4001
2. Students are required to complete an additional 27 credit hours in at least three different disciplines and chosen from the **Elective Courses** list below including:
 - a. a maximum of 6 credit hours at the 1000 level;
 - b. a maximum of 9 additional credit hours at the 2000 level;
 - c. a minimum of 9 additional credit hours at the 3000 level or above; and
 - d. a minimum of 3 additional credit hours at the 4000 level

9.26.2.2 Elective Courses

The normal departmental prerequisites are applicable, but Department Heads may waive course prerequisites in cases where alternate preparation can be demonstrated. Previous specialized police training may be approved for unspecified credits which may be applied to the elective requirements of the Major in Police Studies only. It is recommended that students interested in applying to the RNC wait to enrol and complete Police Studies 3500 as part of that program.

Courses may be selected from the following list, and/or as approved by the Program Coordinator.

Anthropology 2260, 2350, 3100, 3240
 Archaeology 2492
 Business 1000, 1101, 1210, 2000, 2102, 2210, 2301, 3320, 4320
 Economics 3150
 English 2010, 2700
 Education 3255, 3620, 4240, 4260, 4420
 Folklore 2230
 Gender Studies 1000, 2005
 History 3120, 3560, 3813
 Human Kinetics and Recreation 1000, 1001, 2005, 4330
 Law and Society 2000, 4000
 Philosophy 2552, 2591
 Police Studies 3100, 3200, 3500, 4000, 4001
 Political Science 1000, 1010, 2800 (or the former 2710), Political Science 3610 (or the former 3741), Political Science 3620 (or the former 3521), Political Science 3681 (or the former 3791), Political Science 3820 (or the former 3720), Political Science 3880 (or the former 3780)
 Psychology 2010, 2011, 2100, 2120, 2150, 2440, 2540, 2610, 2800, 2810, 3533, 3640
 Religious Studies 1000, 2350, 2610, 3650
 Social Work 1710, 2520, 3310
 Sociology 2210, 2230, 2270, 3040, 3120, 3180, 3290, 3306, 3318, 3395, 3731, 4095, 4210, 4212
 Statistics 2500, 2501

9.27 Political Science

www.mun.ca/posc/welcome/

The following undergraduate programs are available in the Department of Political Science:

1. **Honours in Political Science**
2. **Major in Political Science**
3. **Honours and Major in Political Science (Co-operative)**
4. **Minor in Political Science**

The Department also offers two Political Science concentrations: a concentration in **Canadian Government** and a concentration in **Global Studies**. These concentrations are applicable to all programs in Political Science other than the Minor.

Political Science course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Political Science**.

9.27.1 General Information

1. Students for an Honours, a Major or a Minor in Political Science may consult with the Head of the Department or its Undergraduate Advisor to receive advice on Political Science course selections. As part of their non-Political Science electives, Honours or Major students may consider courses with associated content offered by other departments, such as Economics, History, Philosophy, Sociology, or Women's Studies. Related university programs or certificates of interest may include Aboriginal studies, Canadian Studies, Criminology, European studies, Law and Society, Newfoundland and Labrador studies, Public Administration and Police Studies.
2. The Department's website at www.mun.ca/posc features details about upcoming course offerings, course instructors, the undergraduate (Honours, Major, Minor) and graduate (Master of Arts) programs, work internships, studying abroad opportunities, special events, frequently asked questions, and more. In the event of conflicting information, the official University Calendar and information issued by the Office of the Registrar shall take precedence.
3. Anticipated completion of an introductory course is generally recommended prior to enrolling in a corresponding course at the next level. Students following this path may opt to take courses in the same area in the same academic year (e.g., if a 2000-level course is completed in Fall then a corresponding 3000-level course may be taken in Winter). This is presented, for illustrative purposes only, in **Table 1: Recommended Course Sequencing by Student's Area of Interest**

Table 1: Recommended Course Sequencing by Student's Area of Interest

	Political Theory	International Politics	Comparative Politics	Public Policy and Administration	Canadian Politics
Overview Course	POSC 1000	POSC 1000	POSC 1000	POSC 1000	POSC 1000
Area introduction	POSC 2100	POSC 2200	POSC 2300	POSC 2600	POSC 2800
Area specialization	POSC 31xx	POSC 32xx	POSC 33xx	POSC 36xx	POSC 38xx
Advanced seminar	POSC 41xx	POSC 42xx	POSC 43xx	POSC 46xx	POSC 48xx

With the written consent of the course instructor and the Head of the Department, certain prerequisite requirements may be waived.

9.27.1.1 Course Prerequisites

1. The following prerequisite schedule applies to Political Science courses, except Co-operative work term courses.
2. All research techniques courses POSC 2010, 3010, 4010, 4011 have prerequisites specified in their descriptions.
3. 1000-level: No prerequisites. Suitable for students in all disciplines.
4. 2000-level: Except for POSC 2010, no prerequisites. Completion of POSC 1000 is generally recommended.
5. 3000-level: Except for POSC 3010, no prerequisites. Completion of a corresponding 2000-level area introduction course is generally recommended as outlined under **Table 1: Recommended Course Sequencing by Student's Area of Interest**.
6. 4000-level: Prerequisites are specified in course descriptions. Completion of at least 12 credit hours in Political Science, including 6 at the 3000-level, is generally recommended.

9.27.1.2 Previous Calendar Regulations

In accordance with **UNIVERSITY REGULATIONS - Year of Degree and Departmental Regulations - Faculty of Arts and Faculty of Science**, students for a Political Science Honours, Majors or Minor who had completed a 2000-level course or above in Political Science prior to September 2009 will normally follow the departmental regulations in effect at that time. For those students, POSC 2800 may be substituted for 2710; one of POSC 2100, 2600 or 3810 may be substituted for 2711; 3011 need not apply; and prerequisites for 4000-level courses (except POSC 4010, 4011, 4600) may be substituted with at least 12 credit hours in Political Science including at least 6 credit hours at the 3000-level. Such students may instead elect to follow the degree regulations outlined in this version of the Calendar. A student who, prior to September 2009, had completed both of POSC 1010 and 1020 but who had not yet completed a 2000-level course or above in Political Science, is exempted from the 1000 requirement. In all other cases, such as Minors and concentrations, the corresponding renumbered course will apply (e.g., POSC 2100 for 2000, 2800 for 2710).

9.27.2 Honours in Political Science

1. An Honours degree provides students with additional research and writing skills, may be required for admission to a graduate program, and may be useful preparation for law and other professional fields. Students considering the Honours program are encouraged to apply before their fourth semester and to begin considering a potential Honours research topic before their seventh semester. Admission to the program is in accordance with **UNIVERSITY REGULATIONS** and the **Regulations for the Honours Degree of Bachelor of Arts**.
2. In addition to meeting the general requirements for the degree, students for a B.A.(Hons.) in Political Science must complete at least 60 credit hours in courses offered by the Department, including:
 - a. POSC 1000;
 - b. a minimum of 15 credit hours at the 2000-level, which must include POSC 2010, 2100, 2800, and a minimum of two of POSC 2200, 2300, 2600;
 - c. a minimum of 36 credit hours at the 3000-level or above, which must include:
 - i. a minimum of 18 credit hours at the 3000-level, which must include POSC 3010, a minimum of 3 credit hours from a course numbered 32xx or 33xx, and a minimum of 3 credit hours from a course numbered 36xx or 38xx; and,
 - ii. a minimum of 15 credit hours at the 4000-level, which must include POSC 4010, 4011.

Notes: 1. No more than one of POSC 1010 or 1020 can be included among the 60 Political Science credit hours required for an Honours degree.

2. For Honours, Philosophy 3870 and 3890 may be substituted for 3000-level Political Science credit hours (31xx), and Gender Studies 4005 may be substituted for 4000-level Political Science credit hours (41xx). No other such substitutions may apply.

3. If the Honours essay topic encompasses one of Canadian Government or Global Studies, the POSC 4010 and 4011 may be applied towards the applicable Political Science concentration, subject to permission of the Head of the Department.

3. Students for an Honours degree are required to select courses as specified under **Honours in Political Science**. A possible course pattern is presented in **Table 2: Course Pattern for an Honours in Political Science**.

Table 2: Course Pattern for an Honours in Political Science (POSC)

Term	Political Science Courses (POSC)	Credit Hours
Fall Academic Term 1	POSC 1000	3
Winter Academic Term 2	POSC 2010, 2800	6
Fall & Winter Academic Terms 3 and 4	POSC 2100 and two of 2200, 2300 or 2600 One of POSC 36xx or 38xx	12
Fall & Winter Academic Terms 5 and 6	POSC 3010 and five other 3000-levels (at least one of 32xx or 33xx) One POSC course at the 4000-level	21
Fall Academic Term 7	POSC 4010 Two other POSC courses at the 4000-level	9
Winter Academic Term 8	POSC 4011 Two other POSC courses at the 3000- or 4000-levels	9

- Prior to enrolling in POSC 4010, all Honours students should review the *Guidelines Governing Honours Essays* available from the Head of the Department, and are required to follow these guidelines while enrolled in POSC 4010 and 4011.
- Students electing Joint Honours are required to complete at least 51 credit hours in Political Science, including POSC 2010, and including 42 credit hours chosen in accordance with the pattern set out in the degree regulations for a Bachelor of Arts with a **Major in Political Science**. If the student chooses to complete the Honours Essay (POSC 4010 and 4011) in Political Science, it must be passed with a grade of 70% or better.

9.27.3 Major in Political Science

- In addition to meeting the general requirements for the degree, students for a B.A. with a Major in Political Science must complete at least 42 credit hours in courses offered by the Department, including:
 - POSC 1000;
 - a minimum of 12 credit hours at the 2000-level, which must include: POSC 2100, 2800 and a minimum of two of 2200, 2300, 2600;
 - a minimum of 15 credit hours at the 3000-level, which must include: POSC 3010, a minimum of 3 credit hours from a course numbered 32xx or 33xx, and a minimum of 3 credit hours from a course numbered 36xx or 38xx; and,
 - a minimum of 9 credit hours at the 4000-level.

Notes: 1. No more than one of POSC 1010 or 1020 can be included among the 42 Political Science credit hours required for a Major.
 2. POSC 2010 is a recommended choice for a Major.
 3. For a Major, Philosophy 3870 and 3890 may be substituted for 3000-level Political Science credit hours (31xx), and Gender Studies 4005 may be substituted for 4000-level Political Science credit hours (41xx). No other such substitutions may apply.
- Students for a Major degree are required to select courses as specified under **Major in Political Science**. A possible course pattern is presented in **Table 3: Course Pattern for a Major in Political Science (POSC)**.

Table 3: Course Pattern for a Major in Political Science (POSC)

Term	Political Science Courses (POSC)	Credit Hours
Fall Academic Term 1	POSC 1000	3
Winter Academic Term 2	POSC 2010, 2800 (POSC 2010 is a recommended choice)	6
Fall & Winter Academic Terms 3 and 4	POSC 2100 and two of 2200, 2300 or 2600 One of POSC 36xx or 38xx	12
Fall & Winter Academic Terms 5 and 6	POSC 3010 and three other 3000-levels (at least one of 32xx or 33xx)	12
Fall & Winter Academic Terms 7 and 8	Three 4000-level POSC courses	9

9.27.4 Political Science Concentrations

While meeting the requirements for a program in Political Science, other than a Minor in Political Science, students may optionally select courses in one of two formal concentrations which, if completed, will be noted on the student's transcript. A possible course pattern is presented in **Table 4: Course Pattern for Optional Political Science (POSC) Concentration**.

9.27.4.1 Concentration in Canadian Government

The concentration in Canadian Government is applicable to all programs in Political Science other than the Minor in Political Science. As part of their course selection, students opting for a Canadian Government concentration will complete a minimum of 24 credit hours in POSC courses emphasizing public policy (second digit is "6") and/or Canadian politics (second digit is "8"). These POSC x6xx and/or x8xx credit hours must include 2600 and 2800, and at least 6 credit hours at the 4000 level.

9.27.4.2 Concentration in Global Studies

The concentration in Global Studies is applicable to all programs in Political Science other than the Minor in Political Science. As part of their course selection, students opting for a Global Studies concentration will complete a minimum of 24 credit hours in POSC courses emphasizing international politics (second digit is "2") and/or comparative politics (second digit is "3"). These POSC x2xx and/or x3xx credit hours must include 2200 and 2300, and at least 6 credit hours at the 4000-level. Up to 6 credit hours from political theory POSC courses (second digit is "1") at the 31xx and/or 41xx level may be included among the 24 credit hours.

Table 4: Course Pattern for Optional Political Science (POSC) Concentration

Concentration	Courses for Political Science (POSC) Honours or Major
No Concentration	Honours: See Table 2 or Table 5 Major: See Table 3 or Table 6
Canadian Government	Follow applicable Table 2 , Table 3 , Table 5 , or Table 6 , choosing 2600, three 36xx/38xx and three 46xx/48xx courses.
Global Studies	Follow applicable Table 2 , Table 3 , Table 5 , or Table 6 , choosing 2200 and 2300, three 32xx/33xx and three 42xx/43xx courses. Up to two 31xx and/or 41xx courses may be included.

9.27.5 Honours and Major in Political Science (Co-operative)

The Political Science Co-operative Education Program (PSCE) is available to full-time Political Science Honours and Majors students only.

The PSCE provides an opportunity for students to obtain public policy and other relevant full-time employment experience in fields related to Political Science, particularly governmental organizations. Students will apply their academic knowledge to practical situations as they develop their research, analysis and writing skills, as well as their career interests. A commitment to ethical and professional conduct is expected of all students.

Candidates who are accepted into the PSCE must complete the normal requirements for their degree, as well as three full-time work terms. In addition to following the PSCE regulations, students must satisfy the **Bachelor of Arts General Degree Regulations**, the **Bachelor of Arts (Honours) Degree Regulations**, and the Department's requirements for the **Honours in Political Science** or the **Major in Political Science**, as applicable. Additional information about the PSCE can be found on the Department of Political Science website at www.mun.ca/posc.

9.27.5.1 Eligibility for Admission

Admission to the Political Science Co-operative Education Program is competitive and selective.

The primary criterion used in reaching decisions on applications is overall academic achievement. Students with weak academic records are unlikely to be admitted.

Application forms can be obtained from the Department. The annual deadline for application is November 15 (or the next business day). Application should be made in the Fall when a student expects to have completed a minimum of 42 credit hours, including POSC 1000 and 2800 (2010 and 2600 are strongly recommended), by the end of that semester.

Admission criteria include, but are not necessarily limited to, the following:

- students currently enrolled in the Honours in Political Science or a Major in Political Science; and
- an overall average of at least 65%, and a minimum average of 70% in Political Science courses.
- Applicants transferring from another institution must normally have completed at least one semester at Memorial University of Newfoundland before applying to the program.
- Applicants may be asked to attend an interview.

9.27.5.2 Program of Study

- In addition to the requirements below students must fulfill all requirements for either a Honours or Major in Political Science.
- Students' status in the program is assessed at the end of each semester. To be eligible to continue, students must maintain a course load of 15 credit hours in each Academic Term as indicated under **Table 5: Suggested Course Pattern for the PSCE Program (Honours)** and **Table 6: Suggested Course Pattern for the PSCE Program (Major)**, and maintain a cumulative average of at least 65% and an average of at least 70% in Political Science courses. Students who fail to maintain the required averages will be required to withdraw from the PSCE. Such students may apply for readmission in a subsequent year after re-establishing the required averages.
- Students must complete three work terms at the prescribed times as indicated under **Table 5: Suggested Course Pattern for the PSCE Program (Honours)** and **Table 6: Suggested Course Pattern for the PSCE Program (Major)**.
- Work terms normally begin after the student has completed four academic terms. Academic Term 8 must not be completed before Work Term 3. Students may elect to complete one other course during a placement, subject to the approval of the Head of Department, as long as this does not interfere with the successful completion of the work term.
- The selection of Honours Essay semesters must be discussed with the student's Essay supervisor.
- It is recommended that Honours students complete POSC 4010 (Honours Essay I) prior to enrollment in 460W.

Table 5: Suggested Course Pattern for the PSCE Program (Honours)

Term	Political Science Courses (POSC)	Credit Hours
Fall Academic Term 1	POSC 1000	3
Winter Academic Term 2	POSC 2010 POSC 2800	6
Fall Academic Term 3	POSC 2100 POSC 2600	6
Winter Academic Term 4	One of POSC 2200, 2300 One of POSC36xx or 38xx	6
Spring Work Term 1	POSC 260W	0
Fall Academic Term 5	POSC 3010 One of POSC 32xx or 33xx One other POSC course at the 3000-level	9
Winter Academic Term 6	Two 3000-level POSC courses One 4000-level POSC course	9
Fall Work Term 2	POSC 360W	0
Winter or Spring Academic Term 7	POSC 4010 Two other POSC courses at the 3000 or 4000-level	9
Winter or Spring Work Term 3	POSC 460W	3
Fall Academic Term 8	POSC 4011 Two 4000-level POSC courses	9

Table 6: Suggested Course Pattern for the PSCE Program (Major)

Term	Political Science Courses (POSC)	Credit Hours
Fall Academic Term 1	POSC 1000	3
Winter Academic Term 2	POSC 2010 POSC 2800	6
Fall Academic Term 3	POSC 2100 POSC 2600	6
Winter Academic Term 4	One of POSC 2200, 2300 One of POSC 36xx or 38xx	6
Spring Work Term 1	POSC 260W	0
Fall Academic Term 5	POSC 3010 One of POSC 32xx or 33xx	6
Winter Academic Term 6	One 3000-level POSC course	3
Fall Work Term 2	POSC 360W	0
Winter or Spring Academic Term 7	One 4000-level POSC course	3
Winter or Spring Work Term 3	POSC 460W	3
Fall Academic Term 8	Two 4000-level POSC courses	6

9.27.5.3 Preparation for Work Placements

The Program is coordinated by the Division of Co-operative Education (DCE). Information regarding the DCE can be found at www.mun.ca/coop. The DCE is responsible for counseling students; delivering professional development seminars; identifying and liaising with employers; organizing competitions for work term placements; arranging student-employer interviews and facilities; coordinating database management; administering work placements; visiting students on their work assignments; evaluating the work term in consultation with the Department; and the continuous development of employer opportunities. The Program is overseen by a designated Department faculty member, who is ordinarily the administrator of POSC 260W/360W/460W, and supervised by the Head of the Department. These academic liaisons work closely with the DCE coordinator.

- A student admitted to the co-op program gives permission to the University to provide a copy of the student's résumé, university transcript and work term evaluations to potential employers.
- The dates for starting and finishing each work term are shown in the **University Diary**. At the start of the job competition the Division of Co-operative Education will normally provide a detailed description of each available position. Work placements cannot be

guaranteed though every effort is made to ensure that appropriate employment is made available. With the express permission of the DCE, students may identify and initiate contact with a potential employer outside of the placement competition, though the designated faculty member must ultimately approve all positions. Such jobs must be confirmed by letter from the employer before the first day of the work period.

9.27.5.4 Delivery of Work Term Placements

- a. At least one work term must occur in a Fall or Winter semester. The final work term must be completed before the final academic term. Competition for placements is heaviest in the Spring semester and students are strongly recommended to complete one Spring placement outside of the St. John's area. With permission of the DCE coordinator, and in consultation with the designated faculty member, a student may complete a maximum of two work terms in consecutive semesters.
- b. During the first week of a work placement, students must provide a completed confidentiality and professional conduct agreement to the DCE coordinator.
- c. Within two weeks of starting a work term, students must submit a plan of learning objectives for that placement to the Division of Co-operative Education. The placement should normally entail 35 hours of work per week for 12 weeks for a minimum total of 420 hours. Students must maintain an attendance form that must be regularly initialed by the employer and a completed copy must be submitted with the reflective essay.
- d. Remuneration for work placements is determined by employers based on their internal wage structures. Salaries tend to increase as students progress through the program and assume more responsibility. Students must not expect any such income to make them completely self-supporting.

9.27.5.5 Evaluation of Work Term Placements

- a. The first of three components of a work term evaluation will be the preparation of a written assignment such as a briefing note and/or a cabinet paper of a topical issue relevant to the student's placement. This will be assigned and assessed by the designated faculty member who will consider it when arriving at the final grade for POSC 260W, 360W or 460W as applicable. The note is to be submitted to both the faculty member and the employer.
- b. The second evaluation component will be of a student's on-the-job performance. This will be assessed by the DCE coordinator using information gathered during the work term and input from the employer. Formal written documentation from the employer will be sought and the employer will be encouraged to provide students with an exit interview.
- c. The third evaluation component will be of a substantive reflective essay which must be submitted to the DCE coordinator on the first day of the final examination period. Reflective essays will be evaluated by the DCE coordinator. When preparing the essay the student must continue to respect the confidentiality of the employer. Late essays will not be graded unless prior permission was granted by the designated faculty member.
- d. Evaluation of the briefing note and/or cabinet paper, job performance and of the reflective essay will each result in one of the following classifications: outstanding, above expectations, satisfactory, fail. These are recorded separately on the student's transcript.
- e. Overall evaluation of the work term will result in one of the following final grades being awarded for POSC 260W, 360W or 460W as applicable, which will be noted on the student's transcript:
 - *Pass with Distinction*: Indicates outstanding performance in the briefing note and/or cabinet paper, the reflective essay and the job performance.
 - *Pass*: Indicates that performance meets expectations in the briefing note and/or cabinet paper, the reflective essay and the job performance.
 - *Fail*: Indicates failing performance in one or more of the briefing note and/or cabinet paper, the reflective essay and/or the job performance.

To be eligible for promotion from the work term and continuation in the PSCE a student must not be awarded a Fail. Students should also refer to the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**. If a student fails the work term the student will be required to withdraw from the PSCE. Such a student may reapply to the program after a lapse of two semesters, at which time the student will be required to repeat the work term with satisfactory performance. A given work term may be repeated only once and only one work term may be repeated in the entire Program.

- f. A student who accepts a job placement and who subsequently withdraws from a work term without acceptable cause will be required to withdraw permanently from the PSCE. Students who drop a work term without prior approval from both the DCE coordinator and the designated faculty member, or who do not honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause their discharge from the job, will normally be awarded a grade of *Fail* for the work term in question. Permission to drop a work term does not constitute a waiver of degree requirements and students who have obtained such permission must complete an approved work term in lieu of the one dropped.
- g. A student who has already completed a work placement outside of the PSCE may, upon approval of the DCE coordinator and of the designated faculty member, receive an exemption for a maximum of one work term placement in lieu of POSC 260W or 360W. Such a student must provide documentation of completion of a comparable level of work and submit a reflective essay for evaluation by the DCE coordinator. A written evaluation of the student's on-the-job performance will be required from the employer.

9.27.6 Minor in Political Science

1. Students for a Minor in Political Science must complete at least 24 credit hours in courses offered by the Department, including:
 - a. POSC 1000;
 - b. a minimum of 6 credit hours at the 2000-level, which must include POSC 2800; and
 - c. a minimum of 12 credit hours at the 3000-level or above, which must include at least 3 credit hours at the 4000-level.

Notes: 1. No more than one of POSC 1010 or 1020 can be included among the 24 POSC credit hours required for a Minor.

2. POSC 2010 and 3010 are recommended choices for a Minor.

3. For a Minor, credit hours in another discipline may not be substituted for POSC credit hours.

2. Students for a Minor are required to select courses as specified under **Minor in Political Science**. A possible course pattern is presented in **Table 7: Course Pattern for a Minor in Political Science**.

Table 7: Course Pattern for a Minor in Political Science (POSC)

Term	Political Science Courses (POSC)	Credit Hours
Fall Academic Term 1	POSC 1000	3
Winter Academic Term 2	POSC 2800	3
Fall & Winter Academic Terms 3 and 4	POSC 2010 (POSC 2010 is a recommended choice) One of POSC 2100, 2200, 2300 or 2600	6
Fall & Winter Academic Terms 5 and 6	POSC 3010 (POSC 3010 is a recommended choice) One POSC course at the 3000-level	6
Fall & Winter Academic Terms 7 and 8	One POSC course at the 3000-level One POSC course at the 4000-level	6

9.28 Psychology

For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar.

The following undergraduate programs are available in the Department of Psychology:

1. Biochemistry and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)
2. Biochemistry (Nutrition) and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)
3. Biology and Psychology Joint Honours (B.Sc. Hons. only)
4. Biology and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)
5. Major and Honours in Behavioural Neuroscience (B.Sc. only)
6. Major and Honours in Psychology (B.A. or B.Sc.)
7. Minor in Psychology (B.A. or B.Sc.)

9.29 Religious Studies

www.mun.ca/relstudies/about/

1. Courses in Religious Studies are designed for students who wish to study religion as an academic discipline. They are open to all students on the same basis as are other courses in the Faculty of Arts. They are recommended for
 - a. students who wish to gain an understanding of the essential teachings and beliefs of one or more of the major religions;
 - b. students who are interested in careers for which a knowledge of religious thought and practice is useful; and
 - c. students who are interested in exploring this field as an area of scholarly interest and human concern.
2. Those who plan to teach religion in the schools should complete a major or minor under the degree of Bachelor of Arts or a concentration in Religious Studies under the degree of Bachelor of Education (Primary/Elementary).
3. Religious Studies 1000, 1010, 1020, 1021, 1022, 1032, and 1200 are basic courses which introduce students to the academic study of religion. Religious Studies 1040 and 1041 (Introduction to Chinese) and Religious Studies 1050 and 1051 (Introduction to Biblical Hebrew) are courses which fulfil the language requirement in the Faculty of Arts.
4. Courses at the 2000 level represent a more focussed level of study. Courses are generally of two types: the first introduces specific religious traditions, and the second introduces religious topics or issues. All courses at the 2000 level are introductory and open to any student interested in the subject.
5. Courses at the 3000 and 4000 level in Religious Studies deal with the subject matter in greater depth and assume some previous knowledge.
6. Unless otherwise specified, Religious Studies courses do not have prerequisites. Students who register in a 3000- or 4000- level course are encouraged, however, to make sure that they have adequate preparation for that course, preferably by having completed a first- or second-year course in the field.
7. Students majoring in Religious Studies should plan their program in consultation with a representative of the Department.

Religious Studies course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Religious Studies**.

9.29.1 General Degree

9.29.1.1 Major in Religious Studies

1. A minimum of 36 credit hours in courses in Religious Studies is required. Students must complete at least one course from each of the three following groups:
 - a. 2013, 2050, 2051, 2130, 2140, 2330, 2340, 3000, 3031, 3060, 3091, 3150, 3200, 3210, 3251, 3265, 3272, 3276, 3305, 3310, 3315, 3320, 3510, 3535, 3560, 3591, 3900, 3901.
 - b. 2400, 2410, 2415, 2420, 2425, 2430, 3401, 3411, 3412, 3415, 3431, 3432.
 - c. 2610, 2810, 2811, 2812, 2820, 2830, 2850, 3640, 3650, 3680, 3800, 3810, 3811, 3812, 3820, 3830, 3831, 3850, 3860.
2. At least 18 credit hours of course work must be at the 3000 level or above.
3. With the exception of the language courses (1040, 1041, 1050, 1051), no more than two 1000-level courses can be counted as credit towards a major.

9.29.1.2 Minor in Religious Studies

1. A minimum of 24 credit hours in courses in Religious Studies is required, including at least 9 credit hours in courses at the 3000 level or above.

2. With the exception of the language courses (1040, 1041, 1050, 1051), no more than two 1000-level courses can be counted as credit towards a minor.

9.29.2 Honours Degree

Students planning to do further work in Religious Studies should bear in mind that an Honours degree is the normal requirement for admission to Graduate Schools. Students intending to do an Honours Degree of Bachelor of Arts with a Major in Religious Studies must comply with the **General Regulations for Honours Degrees**, and must complete at least 60 credit hours in Religious Studies courses including Religious Studies 4998 (a comprehensive examination in the area of their specialization) or Religious Studies 4999 (Honours Essay). Honours students may also be required to do courses in a further subject area.

Students considering Honours should arrange their program at the earliest opportunity, normally before the beginning of their fifth semester at the University.

Students will normally be required to have a reading knowledge of a language basic to their area of specialization.

In each case the program of studies leading to an Honours degree will be determined in consultation with the Head of the Department of Religious Studies, or delegate, keeping in mind the needs and interests of the individual student.

Students whose area of specialization requires a knowledge of Greek must complete Classics 1130 and 1131. In such cases these courses may be substituted for 6 of the 60 credit hours required for an Honours degree in Religious Studies.

9.29.3 Joint Honours Degree in Religious Studies and Another Major Subject

The attention of students is drawn to the possibility of doing a Joint Honours program that includes Religious Studies as one of the Major subjects. Such a program may be arranged in consultation with the Head of the Department of Religious Studies and the Head of the other Department concerned.

9.30 Sociology

www.mun.ca/soc/home/

9.30.1 Programs in Sociology

The following undergraduate programs are available in the Department:

1. Major in Sociology
2. Minor in Sociology
3. Honours in Sociology

Sociology course descriptions are found at the end of the Faculty of Arts section under **Course Descriptions, Sociology**.

9.30.2 Major in Sociology

Students who undertake Sociology as their Major must complete at least 36 credit hours in Sociology, as follows:

1. Sociology 1000 (or the former 2000), Sociology 3040, Sociology 3041, Sociology 3150, Sociology 3160, and at least 6 credit hours in Sociology at the 4000 level. No more than an additional 6 credit hours in courses below the 3000-level may be counted toward the Major.
2. The remaining courses, for the minimum of 36 credit hours required for the Major, may be selected from any Sociology course at the 3000 and 4000 levels.

9.30.3 Minor in Sociology

Students who undertake Sociology as their Minor must complete at least 24 credit hours in Sociology as follows:

1. Sociology 1000 or the former 2000, Sociology 3040, 3041, 3150, at least 3 credit hours from Sociology courses at the 4000 level, and 9 credit hours in other Sociology courses.

9.30.4 Honours in Sociology

Honours students are required to complete at least 60 credit hours in courses in Sociology including all courses prescribed for the Major in Sociology, and Sociology 4995, and must meet the requirements outlined in the **Regulations for the Honours Degree of Bachelor of Arts**.

9.30.5 Admission to Honours Program

Admission to the Honours program in the Department of Sociology is competitive and selective. Students who wish to enter this program must submit an "Application for Admission to Honours Program" form to the Department.

To be accepted into the Honours program, a student must not only meet the criteria laid out in the **Regulations for the Honours Degree of Bachelor of Arts**, but must normally have obtained a cumulative average of at least 75% in 18 credit hours in courses in Sociology which must include Sociology 3040, 3041, 3150, and 3160.

10 Course Descriptions

10.1 Anthropology

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive

courses, please contact the Head of the Department.

Students should note that credit may not be obtained for an Archaeology course if, prior to 2007, the student received credit for that course when it was designated as an Anthropology course.

Anthropology courses are designated by ANTH.

1031 Introduction to Anthropology provides an overview of the field of social and cultural anthropology. Diverse case studies will be used to illustrate key anthropological concepts and methods.

CR: the former ANTH 1000 or 2000

2260 War and Aggression (same as the former Sociology/Anthropology 2260 and the former Sociology 2260) is a critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.

CR: the former Sociology/Anthropology 2260, the former Sociology 2260

2280 The City (same as the former Sociology/Anthropology 2280 and the former Sociology 2280) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

CR: the former Sociology/Anthropology 2280, the former Sociology 2280

2350 Religious Institutions (same as Religious Studies 2350) is a comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.

CR: Religious Studies 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

2410 Classics in Anthropology is an examination of selected milestone monographs, ground-breaking studies for subdisciplinary specialties, and major syntheses. This course qualifies as a Research/Writing course.

2411 Anthropologists in the Field combines a firsthand introduction to ethnographic research and writing with an exploration of how anthropological understanding develops through the experiences and human relationships of anthropologists in the field. This course qualifies as a Research/Writing course.

2412 Threatened Peoples is an examination of key social and cultural factors involved in the global extinction of small-scale societies; the intrusive influences that jeopardize small-scale societies, such as disease; economic and military incursion; the role of international non-governmental agencies in aid of threatened peoples; and the role of the anthropologist in this human crisis.

2413 Culture in a Globalized World explores the way in which social, cultural, economic and political interconnections at the global level interact with local social and cultural processes.

2414 Aboriginal Peoples of North America is a survey course dealing with various indigenous peoples of North America.

CR: the former ANTH 3281

2415 Anthropology of Food explores how cultural identities, social relationships, and inequalities are linked to the production, exchange, and consumption of food. This course qualifies as a Research/Writing course.

2416 Cultural Formations explores the symbolic formations that humans create in order to give meaning to their lives. Some of the cultural formations that will be studied include specific examples from the realms of religion, play, sports, art, and commonplace material objects.

3050 Ecology and Culture reviews the co-evolution of the fields of ecology and anthropology since the late 19th century and examines the variety of contemporary perspectives on the interconnection between social and ecological systems.

3052 Anthropology and Directed Social Change - inactive course.

3053 Anthropology of Religion (same as Religious Studies 3053) is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.

CR: Religious Studies 3053

3054 Play, Games and Sport is an examination of the phenomenon of play in a variety of human cultures, and in such forms of activity as religion, politics, festival, speech, performance, and artistic creation. Principal themes are the functional role of play in social relations, and the meaningful role of play in social thought.

3058 Urban Anthropology is an examination of anthropological studies of urban populations and population segments, such as ethnic groups and categories, occupations, neighbourhoods, etc.

3060 The Idea of Culture is the history of ideas, dealing with the emergence of this key anthropological concept, the meanings it has acquired, its broader implications, and major critiques of its use in the social sciences.

3061 Culture and Social Inequality examines the role of culture in mediating different forms of social inequality, exploring the idea that culture is not only a way of life but also a way of managing power among unequals, from individuals to social classes. Readings in the course concentrate on cultural techniques of social control.

3062 Anthropology in Social Policy-making - inactive course.

3063 The Politics of Ethnicity and Multiculturalism examines anthropological approaches and contributions to debates about ethnicity and multiculturalism.

3064 Anthropology and the Study of Social Problems - inactive course.

3073 Imaginary Worlds explores the anthropology of imaginary worlds, including those created through pseudo-history, on-line gaming, science fiction and fantasy literature, and film. Particular examples will be examined in terms of the ways that social stratification, gender, ethnicity, race, and cultural beliefs become constructed inside of these imaginary worlds.

3082 Banditry, Rebellion, and Social Revolution examines types of social conflict specific to different kinds of class-based society, including social banditry, primitive rebellions, and peasant revolutions. More generally, social conflict is used to explore the variety of ways that pre-industrial societies have been made part of the modern world economy.

3083 Environmental Crises examines the social, cultural, and economic forces that have contributed to rapid resource depletion and other environmental changes during the 20th century and looks at how the impacts of these changes have been experienced in different parts of the world.

3100 Dominance and Power (same as the former Sociology/Anthropology 3100 and the former Sociology 3100) is a study of dominance behaviour in human societies, surveying the range from private to public and from openly exploitative to fully legitimate power systems.

CR: the former Sociology/Anthropology 3100, the former Sociology 3100

3240 Regional Studies: Contemporary Native Peoples of Canada - inactive course.

3241 Regional Studies: The Atlantic - inactive course.

3242 European Societies - inactive course.

3249 Peoples of the Pacific - inactive course.

3254-3257 Regional Studies (same as the former Sociology/Anthropology 3254-3257 and the former Sociology 3254-3257) are interdisciplinary approaches to the study of selected regions.

CR: the former Sociology/Anthropology 3254-3257, the former Sociology 3254-3257

3260 Social and Economic Development (same as Sociology 3260 and the former Sociology/Anthropology 3260) is an examination of theories of development including a critical analysis of empirical situations to which they are applied.

CR: Sociology 3260, the former Sociology/Anthropology 3260

3280 The Arctic studies cultural, ecologic, economic and social systems in the northern circumpolar regions.

3300 Fieldwork Methods focuses on the process of anthropological fieldwork. Readings, discussions and evaluations will examine a range of issues and concepts that include observation techniques, interviewing, ethical issues, and the interpretation of data. Students will conduct original fieldwork to learn how to apply some of these skills.

CR: the former ANTH 4300

3305 The Anthropology of Gender - inactive course.

3384-3389 Regional Studies in Anthropology

3403 The Anthropology of Travel and Tourism is an exploration of the anthropological study of travel and tourism. Students will learn how to critically evaluate this global industry and consider the role that it plays in the formation of contemporary human identity.

3404 Visual Anthropology explores the use of documentary film, photography, and new digital media in anthropological fieldwork. It also teaches students how anthropologists study visual media such as television, newspapers, popular films, social networking sites, web sites, and photography collections.

3406 The Anthropology of Ritual examines a range of theoretical perspectives, case studies and individual theorists in the study of ritual.

3407 Medical Anthropology focuses on a range of issues including illness, disease and healing, sexuality and reproduction, pandemics and epidemics, medical technology and bioethics.

3408 Engaged Anthropology is a seminar course exploring debates about the potential - and potential pitfalls - of a variety of approaches to publicly engaged anthropology.

3409 War, Violence and Society provides students with a comprehensive understanding of the issues and problems entailed in the anthropological analysis of war and violence. Key topics include: the relationships between war and globalization, political violence and culture, and militarization and social memory.

3410 Classic Theory in Anthropology (same as the former ANTH 4410) follows a historical approach to understanding some of the key theoretical trends in anthropology since the inception of the discipline.

CR: the former ANTH 4410

3411 Anthropology of Foraging deals with societies heavily reliant on hunting, fishing, and gathering wild foods. Industrial and post-industrial settings in which various forms of foraging (including recycling) are the basis for some people's livelihood will also be considered.

3421-3430 Anthropological Specialties will have a topic of current interest and importance announced by the Department for each term.

3451 Ethnography of Gambling - inactive course.

3452 The Fisheries Revolution - inactive course.

3630 New Media Methods in Social Research (same as Sociology 3630 and the former Sociology/Anthropology 3630) will explore non-print means for recording social behaviour and will utilize various forms of the media as a descriptive and an analytic tool.

CR: Sociology 3630, the former Sociology/Anthropology 3630

3700 Social and Cultural Change - inactive course.

4030 Legal Anthropology explores selected themes and problems relating to the anthropology of law and legal institutions.

4070 Aboriginal Self-Governance - inactive course.

4071 Social and Cultural Aspects of Health and Illness - inactive course.

4072 Social and Cultural Aspects of Death (same as the former Sociology/Anthropology 4072 and the former Sociology 4072) covers topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the instructor.

CR: the former Sociology/Anthropology 4072, the former Sociology 4072

4073 Studies in Underclass Life (same as the former Sociology/Anthropology 4073 and the former Sociology 4073) is a critical inquiry into the social sources of human misery and suffering that characterize life in the underclass.

CR: the former Sociology/Anthropology 4073, the former Sociology 4073

4081 Advanced Seminar in the Anthropology of Gender focuses on the critical analysis of cross-cultural research on gender roles, ideologies, and identities. Each year, particular emphasis is placed on the topics that are the current subject of extensive theoretical enquiry and debate in feminist anthropology.

PR: ANTH 3305 or permission of the instructor

4089 Language and Social Change - inactive course.

4200 Anthropology of Economic Processes explores the way in which anthropologists have studied the inter-linkages among economic, social and cultural processes. Topics covered include key concepts and debates in economic anthropology and the way in which different societies and social groups are integrated within global capitalist markets.

4201 Current Debates in the Anthropology of Ireland explores selected current debates in the anthropology of Northern Ireland and the Republic of Ireland. Seminars centre on the critical reading of recent ethnographic studies. The course considers Ireland, north and south, as a changing scene, assesses the current state of Irish ethnography and considers how the field might develop.

4202-4209 Special Areas in Anthropology is a series of individual or small group tutorials and reading courses on topics of special or current interest.

PR: Departmental permission

4280 Advanced Newfoundland Ethnography - inactive course.

4301 The Intensive Study of One Culture - inactive course.

4302 Ethnographic Life Histories - inactive course.

4412 Contemporary Theory in Anthropology is an evaluation of current approaches to culture and power through a focus on critical issues and major schools of contemporary thought influencing Anthropology in the late 20th and early 21st centuries. Emphasis is placed on major works, paradigms and individual theorists.

4415 Anthropology of Labour examines core issues and problems entailed in the anthropological analysis of work and labour in the context of the global economy.

4416 Anthropology of Slums examines social class forces producing a planet of slums, and details ways that everyday forms of violence, social injustice, and poverty take social shape in the everyday lives of slum dwellers. Among the topics covered are: social class formations, including ghettos, favelas, and shanty towns; surplus populations and disposable

peoples resulting from late capitalist globalization; and forms of resistance and struggle that arise within dispossessed populations.

4417 Anthropology of Sound examines how ethnographers do comparative research on the everyday sounds found in people's daily environments, including music and new media products.

4418 Marx and Anthropological Inquiry examines the uses of Marx's later writings, especially Capital, in current American Anthropology. The primary focus is on the agenda-setting works of Eric Wolf and David Harvey. Topics include: capital accumulation and the making of localities; primitive accumulation and class formation; uneven global development; crises of capitalism and crises of social reproduction; capitalist globalization and disposable surplus populations.

4422 The Craft of Writing Anthropological Narrative is a seminar open to senior students in any discipline, which examines in detail both the mechanics and the sensitivities necessary to produce literate analysis.

4450 Politics of Landscapes - inactive course.

4994 Honours Essay I prepares students for the Honours Essay by helping them refine their research topics; providing them with independent research and writing skills; and offering a structured context in which to conduct the preliminary stages of Honours Essay research and writing.

PR: admission to the Honours program in Anthropology

4995 Honours Essay II is required as part of the Honours program.

PR: ANTH 4994

4996 Comprehensive Examination - inactive course.

10.2 Archaeology

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Students should note that credit may not be obtained for an Archaeology course if, prior to 2007, the student received credit for that course when it was designated as an Anthropology course.

Archaeology courses are designated by ARCH.

1030 Introduction to Archaeology and Bioarchaeology is a broad overview of Archaeology and Bioarchaeology introducing the concepts of human biological and cultural evolution and the methods and techniques by which these are investigated. The course is designed to provide the basis for further study in the disciplines.

2430 Principles of Bioarchaeology investigates the human animal as we exist now and as we developed through time. Students will discover how the study of fossil remains, living and extinct primates, and the applications of the principles of genetics, adaptation and variation of human evolution help to provide an understanding of how biology and culture have interacted to produce modern humans.

PR: ARCH 1030

2450 Principles of Archaeological Science introduces the student to a broad range of scientific approaches used in archaeology. The course provides an overview of the historical development of archaeological science and a survey of the current techniques used to investigate materials recovered from archaeological contexts, including biomolecular methods, paleoethnobotany, zooarchaeology, geoarchaeology, dating techniques, remote sensing and conservation.

PR: ARCH 1030

2480 Principles of Archaeology introduces the student to a broad range of scientific approaches used in archaeology. The course provides an overview of the historical development of archaeological science and a survey of the current techniques used to investigate materials recovered from archaeological contexts, including biomolecular methods, paleoethnobotany, zooarchaeology, geoarchaeology, dating techniques, remote sensing and conservation.

PR: ARCH 1030

2481 Ancient Civilizations of the Americas is a survey course introducing the archaeology and ethnohistory of various pre-contact civilizations of North, Central and South America. Archaeological Evidence will be used to explore the rise of civilizations in the Americas and particular civilizations will be examined and compared based on ideology, economy and administration.

PR: ARCH 1030

2491 Popular Archaeology is a course on how human history is reconstructed from archaeological remains. Methods and techniques of archaeology are illustrated through discussion of archaeological research

currently in progress, both in Newfoundland and Labrador and elsewhere in the world.

UL: may not be used for credit toward a major or minor in Archaeology

2492 Forensic Archaeology is an examination of procedures and techniques used by Biological anthropologists and archaeologists to obtain data pertinent to investigations by law enforcement and medical authorities; evidence concerning the identification of human remains and the cause, time and manner of death.

UL: may not be used for credit toward a major or minor in Archaeology

2493 Archaeology on Film explores the use of archaeology as a popular backdrop to many films and documentaries. Yet, the manner in which archaeology is represented in modern film is hardly realistic, or is it? The portrayal of archaeology in popular film will be discussed in order to determine what movies convey to the public about archaeological method and theory as well as the historical stories that archaeologists investigate.

UL: may not be used for credit toward a major or minor in Archaeology

2582 Principles of Historical Archaeology (same as History 2582) will introduce students to historical archaeology, with special reference to the North Atlantic, 1000 to 1900 AD. The archaeology of specific sites will be examined in order to raise issues about theory and method. Students will be introduced to palaeography; historic maps; documentary archaeology; the survey, excavation and analysis of complex sites; material culture and subsistence studies; cultural resource management and theoretical approaches including historical anthropology, ethnohistory, world systems and consumer studies.

CR: the former ARCH 3582, Anthropology 3582, History 2582

PR: ARCH 1030

2590 Basic Research and Writing about the Archaeological Past is aimed at introductory level students who are curious about how archaeologists uncover evidence about the past. It is also designed to help students to become better researchers and writers. Readings will explore a variety of short classics in archaeology, from debates about when and where humans first evolved to recent research on the historical archaeology of Newfoundland. This course qualifies as a research writing course.

3001 Art, Architecture and Medieval Life (same as Medieval Studies 3001, History 3020, Folklore 3001) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.

CR: the former ARCH 3589, Anthropology 3589, Medieval Studies 3001, History 3020, Folklore 3001

PR: it is recommended but not obligatory, that students should have successfully completed one of the following courses: ARCH 2480, ARCH 2582, Folklore 1000 or 2000, History 2320, Medieval Studies 2001, History 2330/Medieval Studies 2002, or Medieval Studies 2000.

3020 What is Human? discusses how humans have long considered themselves unique. Through readings, discussions and presentations this seminar will explore exactly how distinctive humans are in their biological, behavioural, and intellectual traits and whether there is, in fact, something which sets us apart from all other creatures.

PR: ARCH 2430

3040 The Human Skeleton reflects genetic, environmental and cultural influence. This course, emphasizing identification of individual bones in the skeleton, techniques for obtaining size and shape differences in individual bones and the entire skeleton, estimation of group numbers and death rates, and diagnosis of disease and other abnormal conditions, provides a means of assessing all of these influences on past human populations.

PR: ARCH 2430

3290 Newfoundland and Labrador Prehistory is a seminar and reading course on the culture history of Newfoundland and Labrador from about 9,000 years ago until the time of European settlement. Particular attention will be paid to the interactions among the several ethnic and cultural groups upon whose history this course focuses.

PR: ARCH 1030

3291 Maritime Provinces Prehistory is cultural developments in the area which today includes the Maritime Provinces and northern Maine, from the entry of humans into the region until the time of European contact. Emphasis is placed on cultural adaptations to a changing regional environment and the evidence for intercultural contact.

PR: ARCH 1030

3500 Prehistory of Africa, Asia and Europe I examines the early stages of cultural evolution in the Old World. Topics include: earliest human origins in Africa; the dispersal of humans throughout the Old World; the appearance of modern-type humans during the last ice age.

PR: ARCH 1030

3505 Prehistory of Africa, Asia and Europe II is a survey of the more recent stages of human cultural evolution in the Old World. Topics include: complex behaviour of modern-type hunter-gatherers of the last ice age; the

domestication of plants and animals in early farming communities.

PR: ARCH 3500

3510 Prehistory of the New World is a survey of cultural development in the Americas from the entry of humans until the time of European contact. Topics include: the earliest human migrations and the dispersal of human groups throughout the New World; the development of complex hunting-gathering societies; the origins of agriculture and sedentism.

PR: ARCH 1030

3515 Prehistory of Mesoamerica (same as History 3515) discusses the Spanish explorers arriving in Mesoamerica i.e. Mexico and Guatemala of today, and how they discovered rich and complex civilizations that had developed independently of European or Asian influence. This course traces the development of Mesoamerican civilizations from their known origins to the point at which growth was terminated by Spanish intervention.

CR: History 3515

PR: ARCH 1030

3520 The Early Ethnohistory of North America's Native People - inactive.

3525 The Later Ethnohistory of North America's Native People - inactive.

3561 Ethnoarchaeology is a subfield of archaeology that uses recent ethnographic information to interpret and explain the material remains of past human behaviour. This course compares the goals and methods of ethnoarchaeologists with those of ethnographers and archaeologists. Case studies are used to illustrate the different approaches and concerns of ethnoarchaeologists working in different regions of the world.

PR: ARCH 2480, or permission of instructor

3580 Bronze Age Archaeology of the Eastern Mediterranean (same as Classics 3580) examines the archaeological evidence that underlies the current reconstruction of the Bronze Age in the eastern Mediterranean. The Bronze Age of the Aegean and the island of Cyprus is essentially prehistoric and inaccessible except through the methods of archaeology; physical dating techniques, geoarchaeology, residue studies, palaeoethnobotany, zooarchaeology, forensic anthropology, underwater archaeology and cultural resource management. Pieced together these give us a compelling picture of the cultural history, lifeways and the dynamics of cultural change during this important period. Emphasis is placed on the role of Cyprus as a physical and cultural link between peoples of the Aegean and the Near East.

CR: Classics 3580

PR: ARCH 1030 or permission of instructor

3583 Archaeological Field School Orientation is designed to familiarize students with field and laboratory techniques. Students will learn about research design and the methodologies involved in archaeological site survey and mapping. Students will be instructed in the identification of archaeological sites, completion of site inventory forms, the use of surveying instruments, and the creation of accurate site maps, using these instruments as well as the concepts associated with archaeological excavation, mapping, recording and photography. Finally, students will be given basic instruction in artifact identification, processing and cataloguing. This course is intended to be a precursor to Arch 3585 and 3586 (Archaeology Field School).

PR: ARCH 2480

3584 Historical Anthropology (same as the former Anthropology 3584 and History 3535) will explore selected issues in historical anthropology, with special reference to the Mediterranean and North Atlantic worlds. Students will read specific case studies in order to explore the theoretical issues raised by the attempt to understand historically-documented past cultures. In order to give practical examples of methodology classes will analyse primary source material. Students will be introduced to the textual analysis of myth and legal records, to the interpretation of images and to the analysis of patterns in material culture. The course will consider specific current interpretive issues, particularly the rise of individualism, the consumer revolution and the cultural construction of gender.

CR: the former Anthropology 3584, History 3535

PR: ARCH 2582 or any 2000-level History course

3585-3586 Archaeology Field School offers students practical introduction to archaeological fieldwork (3585) and laboratory techniques (3586). These courses provide instruction and experience in site mapping, sampling strategies, the recovery and conservation of archaeological materials (i.e., artifacts and ecofacts) and the cleaning, cataloguing and cultural interpretation of artifacts and features. The students will also receive an introduction to archaeological research concerning prehistoric and/or historic cultures of a selected region.

PR: ARCH 3583

3587 Archaeological Conservation is an introduction to principles and techniques for the preservation of archaeological materials, with an emphasis on conservation in the field.

PR: ARCH 2480 or ARCH 2450

3588 Arctic Archaeology is an introduction to the archaeology of the Canadian Arctic, Greenland, and Alaska, from earliest settlement to historic

interactions between Inuit and Europeans. Special emphasis is placed on the eastern Canadian Arctic, and the changing social and economic adjustments arctic peoples have made to a challenging environment.

PR: ARCH 1030

3590 Hunter-Gatherer Studies (same as the former Anthropology 3590) examines past and present hunting and gathering societies from various areas of the world, both from an ethnographic and an archaeological perspective.

CR: the former Anthropology 3590

PR: ARCH 1030 or Anthropology 1031

3591 Collections Management (same as Folklore 3591) will introduce students to the problems of collections storage with respect to environment, materials and artifact access. Students will become familiar with the materials encountered in archaeological and ethnographic collections. The storage of specific historic and prehistoric collections from Newfoundland and Labrador will be examined with the purpose of providing practical examples of methodology.

CR: Folklore 3591

PR: one of ARCH 2450, 2480 or 2582

3592 Norse Archaeology explores the influence of the Vikings on the medieval world and the place of L'Anse aux Meadows within this cultural milieu. Students will be introduced to Viking-Age archaeological and literary texts to gain knowledge of specific questions and problems concerning multicultural contact within the Viking-Age world, specifically the North Atlantic region. They will also gain an appreciation of the challenges associated with using interdisciplinary evidence as well as migration and multicultural issues in the past and present.

CR: the former ARCH 3685

PR: ARCH 1030

3593 Archaeology of Children examines emerging archaeological and bioarchaeological research on children and childhood. Topics include play, learning work, embodiment, identity, death, narrative approaches to children's lives, and the paleoanthropology of childhood.

CR: the former ARCH 3684

PR: ARCH 2480

3650 Artifacts of Colonial North America provides students with practical experience in the analytical methods used to identify, date and interpret the different types of artifacts encountered on seventeenth- and eighteenth century archaeological sites in Colonial North America. In depth discussions on manufacture, technology, form and function provide the necessary background for a better understanding of concepts relating to artifact identification, provenance, dating techniques, theoretical approaches and other current issues. Practical, hands-on exercises will help reinforce weekly topics and teach students the fundamentals required to interpret artifact assemblages from the historic period.

PR: ARCH 2480, or ARCH 2582

3651 Archaeology of Colonial North America focuses on the history and archaeology of North American colonization and covers the period of European exploration and settlement from approximately 1500 to 1700. A diverse range of topics will be discussed including: contracts and interaction with native peoples; early colonies and seasonal outposts; established settlements; war, trade and economics; the material record; the built landscape; daily life in colonial society and maritime archaeology.

CR: the former ARCH 3862, or the former Anthropology 3682

PR: ARCH 1030

3680-3689 Studies in Archaeology and Prehistory will include the consideration of current developments in methods, techniques and theory as applied to selected areas of the world.

PR: ARCH 2480 or equivalent

3710 Museums and Historic Sites (same as Folklore 3700) is an introduction to museums and historic sites, their work, and their role in societies past and present. Various types of museums and historic sites will be discussed using local, national and international examples, looking at their collections and exhibitions policies. Practical issues will also be discussed; these include museum exhibit display techniques, public programming, virtual museums, and the museum profession.

CR: Folklore 3700

PR: ARCH 2480 or ARCH 2582

3750 Archaeology of Warfare is a broad overview of archaeological research conducted at sites associated with human conflict spanning from ancient Greece to World War II. Weekly lectures will provide students with a solid background on the various means by which archaeologists study and excavate sites relating to war, conflict and subjugation. A broad range of topics will be covered including remote sensing and field survey techniques, the changing technology and tactics of war, battlefield sites, POW camps, sunken naval vessels, aviation sites, fortifications and frontier outposts.

PR: ARCH 2480 or ARCH 2582

3800 Fieldwork in Vernacular Architecture: Drawings and Photography - inactive.

3850 Material Culture (same as Folklore 3850) is an examination of various interpretive theories of objects as cultural products. Problems of defining the artifact will be discussed, as well as the strengths and limitations of using objects in historical and ethnographic research. Questions discussed include form, design, decoration, diffusion, and the role of the creator of the object. Besides, folkloristic work on material culture, a variety of interdisciplinary approaches will be considered. Emphasis will be on the material folk culture of Newfoundland and its European antecedents.

CR: Folklore 3850

3860 Vernacular Architecture (same as Folklore 3860 and History 3860) is a historical survey of vernacular architectural forms in various regions of North America, with attention to Newfoundland materials. Issues discussed include the relationship of house form and culture, the concepts of antecedents, diffusion, innovation and evolution of building forms and technologies, and the siting of buildings in the landscape. Dwelling houses, outbuildings, churches and industrial vernacular architecture will be included.

CR: Folklore 3860 and History 3860

3900 Newfoundland Vernacular Furniture (same as Folklore 3900) is an introduction to the furnishings of the Newfoundland domestic interior, involving case studies from public and private collections. The focus of the course will be on furniture, looking at both urban and outport forms. The cultural context of typical furnishings will be discussed, as well as details of furniture form and construction. While furniture will be emphasized, other objects of domestic material culture may be included; glass, ceramics, metalware and textiles.

CR: Folklore 3900

4015 Cultural Resource Management (same as Folklore 4015 and Geography 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management. Three hours of lecture and three hours of seminar per week.

CR: Folklore 4015 and Geography 4015

PR: ARCH 2480 or ARCH 2582

4041 Palaeopathology looks at disease, diet, genetics, accidents and maternal health factors as contributors to variations in the human skeleton. In this lecture and laboratory course these factors are diagnosed from bones, and aspects of the culture, health, economy and environment of the skeletal individuals are examined.

PR: ARCH 2430 and ARCH 3040

4043 Biomolecular Archaeology is a rapidly developing, multidisciplinary subfield of archaeology concerned with unraveling aspects of human behaviour and adaptation from ancient biomolecules preserved in artifacts and biological remains. Through lectures, directed readings and seminars this course aims to review and critically assess the many facets of biomolecular archaeology, including how biological and (geo)chemical methods can be used to address questions of diet, migration and ancestry in the past.

PR: ARCH 2430 and ARCH 2450

4050-4059 Special Projects in Bioarchaeology includes directed reading, seminars and lab analysis of various skeletal collections. Topics to be covered may include primate behaviour, forensic anthropology, stable and radiogenic isotope analysis and various aspects of human evolution.

PR: ARCH 2430 and ARCH 2450

4150 Environmental Change and Quaternary Geography (same as Geography 4150) examines methods of reconstructing Quaternary environments, effects of Quaternary environmental changes on landform, with special reference to North America, development and characteristics of glacial and nonglacial climates.

CR: Geography 4150

LH: 3

PR: 6 credit hours in Physical Geography or in Archaeology at the 3000-level, or permission of the instructor

4151 Paleoethnobotany is a combined directed readings/laboratory course on palaeoethnobotany. Palaeoethnobotany concerns the recovery and analysis of archaeological plant remains as a basis for understanding human and plant interactions in the archaeological record. This course focuses on recent palaeobotanical research in northeastern North America.

PR: ARCH 2450, ARCH 2480, or the permission of the instructor

4152 Zooarchaeology aims to introduce the student to the wide range of information that can be gleaned about past human groups from the animal remains they left behind after butchery, meals, toolmaking and other activities. Students will also gain practical experience in the identification and analysis of faunal remains.

CR: the former ARCH 4195 or the former Anthropology 4195

PR: ARCH 2450 or ARCH 2480

4153 Lithic Analysis explores the range of techniques used to study stone tools, including material and provenance identification, morphology and functional analysis, temporal and cultural typology, measurement,

illustration, experimental manufacture, use wear and breakage patterns, refitting, debitage analysis and spatial distribution.

CR: the former ARCH 4196 or the former Anthropology 4196

PR: ARCH 2450 or ARCH 2480

4160-4169 Special Projects in Archaeology are courses which may be offered from time to time as demand arises. They may involve readings, seminars and actual analysis of archaeological collections on, for example: The Neolithic of Western Asia; the Rise of Civilization in Western Asia; Scandinavian Prehistory; Palaeoethnobotany; and Technology and Material Culture.

PR: one of ARCH 2450, 2480, 2481, 2582 or permission of the instructor

4170 Settlement and Subsistence Studies in Archaeology - inactive.

4171 Iroquoian Archaeology is a lecture course examining the culture developments of the Iroquoian peoples of Northeastern Canada and the USA. Using both archaeological and ethnohistoric materials, this course will outline and explain the changing social, political and economic traditions of this culture group from their origins through the early contact period.

CR: the former ARCH 4190

PR: ARCH 2480

4172 Postcolonial Archaeology critically explores the history and contemporary practice of archaeology in light of the political claims of (formerly) subjugated groups. Topics to be discussed include archaeological antecedents of a postcolonial perspective (postprocessualism, critical archaeology), political economy of archaeology, interests of indigenous and other descendant groups, repatriation, national and transnational archaeologies, and community archaeology.

CR: the former ARCH 4192 or the former Anthropology 4192

PR: ARCH 2480 or ARCH 2582

4173 Archaeology of the Body explores the possibility of a more encompassing archaeology of embodied experience, starting from archaeological work on gender and recent reconceptualizations of the body in social, cultural and feminist theory. Topics to be discussed include the notion of bodily practice, biopolitics, sexuality, hybridity, violence, identity, sensory experience, disability and aging.

CR: the former ARCH 4191 or the former Anthropology 4191

PR: ARCH 2480

4182 History of Archaeology is an intensive study of the emergence and maturation of archaeology as a discipline within the social sciences, particularly in Western Europe and North America, during the 19th and 20th centuries.

PR: ARCH 2480

4190-4199 Selected Topics in Archaeology and Prehistory is a seminar course focusing on recent theoretical and methodological developments in archaeological research.

PR: one of ARCH 2450, 2480, or 2582

4411 Theory and Method in Archaeology and Prehistory is a seminar course focusing on recent theoretical and methodological developments in archaeological research.

PR: ARCH 2480 and ARCH 4182

4500 Special Topic in Historical Archaeology is a consideration of current developments in methods, techniques, and theory in Historical Archaeology.

PR: ARCH 2582 or permission of instructor.

4994 Past Material - Advanced Research and Writing is a directed reading course and is a prerequisite for the Honours Essay in Archaeology (ARCH 4995). Readings will be chosen to complement students' specialization and to prepare them for the honours essay. Assignments will emphasize short essays and will provide students with the opportunity to improve their professional writing skills in the fields of archaeology, material culture and heritage.

PR: ARCH 2480

4995 Honours Essay is required as part of the Honours program.

PR: ARCH 4994

4996 Comprehensive Examination is an alternate option to the Honours Essay.

10.3 Arts

1250 Enhancing Academic Performance is a learning seminar in which students and faculty use discussion, reciprocal feedback and co-investigation techniques to enhance the teaching and learning process in the study of Arts subjects. For course description see General Information, Student Affairs and Services, UCC2020: Applied Cognitive and Affective Learning Strategies for Undergraduate Students.

CR: the former ARTS 1200

PR: Admission to the Enhancing Academic Performance program.

1500 An Introduction to University Writing introduces students to some of the processes, techniques and standards of university-level writing. Students

will engage in the practices of pre-writing, drafting, revising and editing. An emphasis will be placed on using writing as a learning tool and on preparing and editing texts.

PR: restricted to students with fewer than eighteen credit hours

10.4 Canadian Studies

Canadian Studies courses are designated by CNST.

4000 Interdisciplinary Seminar in Canadian Studies will expose students to the interdisciplinary approach to the study of Canada through a series of lectures and discussions conducted by members of departments represented on the Canadian Studies Major Program Co-ordinating Committee and through the preparation of formal written work which explores a specific theme from a variety of disciplinary perspectives.

CR: History 4247

PR: permission of the Supervisor of the Canadian Studies Major Program

10.5 Classics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

In special circumstances, prerequisites may be waived with the permission of the Head of the Department.

Classics courses are designated by CLAS.

10.5.1 Greek

1130 Elementary Ancient Greek I is an introduction to the grammar and syntax of ancient Greek, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.

CR: the former CLAS 130B

1131 Elementary Ancient Greek II is a continuation of the work begun in Elementary Ancient Greek I.

CR: the former CLAS 130B

PR: CLAS 1130 or its equivalent

2300 Intermediate Ancient Greek is a continuation of the grammar, syntax, reading, and composition completed in the elementary program.

PR: CLAS 1131

2302 Readings in New Testament Greek (same as Religious Studies 2302)

CR: Religious Studies 2302

3300 Advanced Ancient Greek refines the skills developed in Intermediate Greek and applies them to selected readings of Greek authors.

CR: the former CLAS 2305

PR: CLAS 2300

4300 Greek Tragedy

PR: CLAS 3300

4305 Greek Comedy

PR: CLAS 3300

4310 Greek Epic Poetry

PR: CLAS 3300

4315 Attic Orators

PR: CLAS 3300

4320 Greek Lyric Poetry

PR: CLAS 3300

4325 Greek Historians

PR: CLAS 3300

4340 Greek Philosophical Authors

PR: CLAS 3300

4355-4365 Special Topics in Greek Readings will have authors and readings selected by the Department.

PR: CLAS 3300

4370 Hellenistic Poetry

PR: CLAS 3300

4391 Special Authors

PR: CLAS 3300

4999 Honours Essay is a requirement of the Honours program.

PR: CLAS 3300

10.5.2 Greek and Roman Studies

For the following courses, no knowledge of Greek or Latin is required. Students are strongly advised to have completed at least one 1000-level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course.

Although there are no formal prerequisites for any course in Greek and Roman Studies, students are encouraged to ensure that they have adequate preparation for the courses numbered above 3000 in which they intend to register.

Medieval Studies 3000 may be substituted for a Greek and Roman Studies course in both the Classics degree programs (Honours, Joint Honours and general degree) and the Greek and Roman Studies degree programs (Honours, Joint Honours and general degree).

1051 Gods in Classical Mythology is an introduction to some of the major myths of ancient Greece and Rome, with particular attention to the gods. The myths will be studied with reference to their social and historical contexts, literary and artistic representations, and modern theories of interpretation.

CR: the former CLAS 1050

1052 Heroes in Classical Mythology is an introduction to some of the major myths of ancient Greece and Rome, with particular attention to the heroes. The myths will be studied with reference to their social and historical contexts, literary and artistic representations, and modern theories of interpretation.

CR: the former CLAS 1050

1100 Introduction to Greek Civilization is a general illustrated survey of the origins and evolution of Ancient Greek Civilization. The course introduces the student to Greek social and political institutions, religion and myth, and achievements in art, philosophy, science and literature, as well as the influence of Ancient Greece on the modern world. This course may be offered as a research/writing course. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

1200 Introduction to Roman Civilization is a general illustrated survey of the origins and evolution of Ancient Rome. The course introduces the student to social, political, and legal institutions, the growth of the Roman Empire, Roman art, literature, and religions, as well as Rome's pervasive influence in the modern world. This course may be offered as a research/writing course. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2010 Greek Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Greece.

2015 Roman Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Rome.

2020 History of the Hellenistic World (same as History 2034) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.

CR: History 2034

2025 Introduction to Ancient History (same as History 2020) is an introduction to the history of ancient city-states, kingdoms and empires, including economic, social, political and cultural developments.

CR: History 2020

2035 History of Classical Greece (same as History 2035) is a survey of Greek History from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century B.C.

CR: History 2035

2041 History of the Roman Republic (same as History 2041) is a survey of Roman history from the early monarchy to the death of Julius Caesar, with special reference to the society and politics of the late Republican period.

CR: History 2041, the former CLAS 2040, the former History 2040

2042 History of the Roman Empire (same as History 2042) is a survey of Roman history from the death of Julius Caesar to the rise of Constantine, with special reference to the society and politics of the early Imperial period.

CR: History 2042, the former CLAS 2040, the former History 2040

2055 Women in the Ancient World is an examination of the role of women in ancient Mediterranean civilizations from the perspectives of social and political history and culture. Critical assessments of relevant scholarship and methodologies will be included.

2400 Literature of Ancient Greece introduces students to Greek Literature from the Archaic to the Imperial Periods. Students will study epic poetry, drama and other genres typical of these periods. Students will also be introduced to important themes, methodologies and scholarship. This course may be offered as a research/writing course. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former Classics 3110, the former English 3110

2500 Literature of Ancient Rome introduces students to Latin Literature from the Republican to the Late Antique Periods. Students will study epic poetry, drama and other genres typical of these periods. Students will also be introduced to important themes, methodologies and scholarship. This course may be offered as a research/writing course. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former English 3111, the former Classics 3111

2701 History of Ancient Philosophy (same as Philosophy 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Philosophy 2701

2900 Science and Technology in the Ancient World is an introduction to significant developments in ancient Greek and Roman science and technology with emphasis on interpreting the primary evidence, including written sources (in translation) and material remains, assessing the historical context, and considering the nature of advancements.

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Religious Studies 3010, the former CLAS 3121, the former Religious Studies 3121

3020 Roman Religion (same as Religious Studies 3020) is a study of the role of religion in the private and public life of the Roman world.

CR: Religious Studies 3020, the former CLAS 3121, the former Religious Studies 3121

3030 Greece and Persia is a study of relations between Greece and Persia from the foundation of the Persian Empire to the death of Alexander the Great.

3040 Socrates and Athens is an introduction to and examination of Socrates within the context of Athenian political, social, cultural, intellectual, and religious life, and against the background of the fifth-century enlightenment and the sophistic movement.

3050 Augustus and Rome is a course that examines the Age of Augustus (27 B.C. to A.D. 14) which witnessed not only Rome's greatest achievements in literature and art but also the replacement of republican government by a monarchy; this course, based on original sources, examines the period through its most powerful and influential figure.

3150 Early Christian Thought: The First Five Centuries (same as Religious Studies 3150) is an advanced study of selected themes and personalities in Christian thought and literature from the second to the sixth centuries. Particular attention will be given to the controversies centring on the doctrines of the Trinity and the Person of Christ.

CR: Religious Studies 3150

3270 Christianity and the Roman Empire - inactive course.

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics to be discussed include the development of ancient tragedy, its literary, performative and thematic traditions, its representation of social and historical conditions, and its influence on later tragic drama.

CR: the former Classics 2805

3410 Comic Drama in Greece and Rome is a detailed examination of the comic dramas of ancient Greece and Rome. A selection of plays by Aristophanes, Menander, Plautus and Terence will be read in English translation. Topics to be discussed include the development of ancient comedy, its literary and thematic traditions, its representation of social and historical context, and its influence on later comic drama.

CR: the former Classics 2810

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry of ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society.

CR: the former Classics 2060

3420 Lyric Poetry in Greece and Rome is a study of Greek and Roman poetry often conventionally termed 'lyric', including such genres as choral and solo songs, elegy, epigram, love poetry, and others. A selection of important works from Archaic Greece to Augustan Rome will be studied with

reference to their social and literary contexts.

3500-3510 Special Topics in Classics will have topics determined by the Department.

3580 Bronze Age Archaeology of the Eastern Mediterranean - inactive course.

3600 Ancient Myth and Cult (same as Religious Studies 3600) develops the students' knowledge of myth and material culture by examining specific religious sites in the Greek and Roman world as foci of ritual practice. Students will learn to integrate knowledge of the physical remains with the literary and ritual evidence in order to obtain a more integrated understanding of religious life in ancient Greece and Rome.

CR: Religious Studies 3600

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence which informs them. The ancient world's impact on modern Western society will be considered together with the film industry's recasting of the ancient world in response to modern social and historical developments.

3710-3729 Special Topics in Classics is available only as part of the part of the Harlow Campus Semester.

3900 Greek and Roman Medicine examines the medical theories and practices of the ancient Greek and Roman world by taking account of ancient texts (in translation) as well as evidence from material culture, including art and architecture. Topics may include the relationship between science and medicine, concepts of health and illness, the role of the healer, practical applications, gender differentiation of patients, and legacy of ancient practices.

4000 Seminar in Greek History and Society - inactive course.

4010 Seminar in Roman History and Society is a seminar in Roman History and Society.

4020 Seminar in Greek Literature and Culture is a seminar in Greek Literature and Culture.

4030 Seminar in Roman Literature and Culture is a seminar in Roman Literature and Culture.

4100-4109 Special Topics in Greek and Roman Studies will have topics announced by the Department and may include field studies in topography, Greek and Roman art and architecture, archaeology, and related areas, to be held in the Mediterranean and other regions of Graeco-Roman influence.

PR: permission of the instructor and the Head of the Department

4999 Honours Essay is a requirement of the Honours program.

10.5.3 Latin

1120 Elementary Latin I is an introduction to the grammar and syntax of Latin, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.

CR: the former CLAS 120A

1121 Elementary Latin II is a continuation of the work begun in Elementary Latin I.

CR: the former CLAS 120B

PR: CLAS 1120 or its equivalent

2200 Intermediate Latin is a continuation of the grammar, syntax, reading, and composition completed in the elementary program.

PR: CLAS 1121

3200 Advanced Latin refines the skills developed in Intermediate Latin, and applies them to selected readings of Latin authors.

10.6 Communication Studies

Communication Studies courses are designated by CMST.

2000 Critical Approaches to Popular Culture considers critical issues and approaches in the study of popular culture. It will explore the ways in which everyone is both a user of and is used by popular culture. A variety of critical approaches to studying popular culture will be examined: Production, Texts, Audience, and History.

2001 Introduction to Communication Theory provides an introduction to theoretical approaches to organization, use and manipulation of language, including semiotics, performativity, mass and group communications, sociolinguistics and interpersonal communication. We will examine notions of influence, rhetoric, social judgment, deception, subject formation, globalization and cultural hybridity within the field of communications.

PR: CMST 2000

4000 Advanced Communications Theory engages communication theories, such as interpersonal, organizational, intercultural, or international communication, seeking to understand how and why mediated communication works have found their explanatory power to be useful. The course will aim to analyze various communication theories, apply communication theories to everyday life, write a theoretical literature review, and form sound hypotheses or focused research questions to advance theory.

PR: CMST 2000 and 2001 and 9 additional credit hours chosen from

Program and Regulations, Elective Courses, List A or B

10.7 Economics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Economics courses are designated by ECON.

2010 Introduction to Microeconomics I examines scarcity and opportunity cost. Demand and supply. Elasticity. Household demand: marginal utility. Household demand: indifference curves. Production functions. Short-run and long-run cost functions. Perfect competition in the short run and the long run. Monopoly.

2015 Introduction to Microeconomics II - inactive course.

2020 Introduction to Macroeconomics covers national income accounting, aggregate income analysis, money, banking and foreign trade.

2070 The Structure and Problems of the Newfoundland Economy - inactive course.

2550 Economic Statistics and Data Analysis is an analysis of economic statistics and the use of economic data. A course designed to introduce students to the task of economic data collection, description and analysis. Emphasis will be on interpretation and analysis of data using computer software programs.

PR: ECON 2010, 2020, and Statistics 2500 or equivalent

3000 Intermediate Macro Theory I is the basic microeconomic theory course; consumer demand, indifference curve analysis, theory of production and cost, factor substitution, and the theory of the firm under perfect competition and monopoly.

PR: ECON 2010 and 2020

3001 Intermediate Micro Theory II is a continuation of basic

microeconomic theory; the theory of imperfect competition, theory of factor pricing under various market structures, general equilibrium and welfare economics.

PR: ECON 2010, 2020, and 3000

3010 Intermediate Macro Theory I is aggregate analysis including consumer, investment, government and international sectors, the role of money, determinants of aggregate supply, and the effects of autonomous behavioural changes and fiscal and monetary policies on unemployment, price levels and the balance of payments.

3011 Intermediate Macro Theory II is a consideration of modern theories of macroeconomics, dynamics, empirical evidence and simulation of the national economy. Emphasis on the availability and effectiveness of government policy instruments.

PR: ECON 2010, 2020, and 3010

3030 International Economics - Issues and Problems in a Canadian Context is an intermediate course in international economics. The course covers the theory of comparative advantage, the structure and policy issues of the Canadian balance of payments, the foreign exchange market and the institutional aspects of international commerce.

PR: ECON 2010 and 2020

3070 The Structure and Problems of the Newfoundland Economy is an analysis of the structure of the economy of Newfoundland. Basic economic theory will be applied to current economic issues and problems in Newfoundland.

PR: ECON 2010 and 2020

3080 Natural Resource and Environmental Economics is application of economic analysis to renewable and nonrenewable natural resource industries such as the fishery, forestry, and mining. Emphasis is given to the criteria for optimal resource use under various market structures and their implications for public policy. Issues of environmental resource management and pollution control will also be covered.

PR: ECON 2010 and 2020

3140 Economic Analysis in Health Care evaluates the role of economic analysis to health and medical care. Topics in the application of cost effectiveness analysis [and cost-benefit analysis] to health care programs, as well as comparisons of the Canadian experience with other health care systems will be discussed.

PR: ECON 2010 and 2020

3150 Money and Banking examines the operation of the money and banking system, with special emphasis on Canadian problems. Monetary theory will be treated in relation to income theory and foreign trade.

PR: ECON 2010 and 2020

3360 Labour Market Economics is an intermediate course concentrating on Canadian labour issues. The course investigates the labour market decisions that workers face and the influence of government decisions. Course topics also include factors affecting a firm's demand for labour, wage determination in non-union market, the role of unions, the various structure of wages and wage differentials in the Canadian setting.

CR: the former ECON 4360

PR: ECON 2010 and 2020

3350 Mathematical Economics I examines linear algebra and differential calculus, with applications to economics.

PR: ECON 2010, 2020, and Mathematics 1000 or equivalent with a "B" standing, or Mathematics 2050

3551 Mathematical Economics II covers integral calculus, difference and differential equations, with applications to Economics.

PR: ECON 2010, 2020, and 3550

3600 Industrial Revolutions of the 18th and 19th Centuries - inactive course.

3610 International Economic History of the 19th and 20th Centuries - inactive course.

3620 Canadian Economic History to the End of the 19th Century - inactive course.

3630 Canadian Economic History in the 20th Century - inactive course.

3711 Intergovernmental Relations is (I.) federal-provincial-municipal fiscal relations in Canada: intergovernmental tax agreements and equalization payments. (II.) Co-operative federalism: shared-cost programs and opting-out arrangements. (III.) Intergovernmental bargaining in the following issue areas: tax reform; administration of justice; welfare policy; post-secondary education.

CR: the former Political Science 3711

PR: ECON 2010 and 2020

4000 Advanced Microeconomic Analysis is an advanced treatment of theoretical and applied microeconomic theory, including topics such as intertemporal choice, risk and information, game theory and competitive

strategy, index numbers, public goods, externalities, input-output analysis, linear programming, duality theory and empirical microeconomic studies.

PR: ECON 2010, 2020, and 3001

4010 Economics of Development in Less Developed Countries - inactive course.

4011 Economic Planning and Development - inactive course.

4025 Public Expenditure is an analysis of the theory of public expenditure. Relationship to resource allocation and distribution of income. Market failure and the rationale for government intervention. Theory of public goods. Public choice mechanisms. Expenditure patterns in Canada. Public sector budgeting. Public enterprise pricing and investment rules. Introduction to cost-benefit analysis.

CR: the former ECON 4020

PR: ECON 2010 and 2020

4026 Taxation is an analysis of the theory of taxation. Relationship to resource allocation and distribution of income. Incentive effects of taxation. Tax incidence. Tax structure in Canada at federal, provincial and local levels.

CR: the former ECON 4020

PR: ECON 2010 and 2020

4030 International Trade is pure theory of trade, commercial policy, price discrimination and cartels, commercial policy for developing countries and the customs union.

PR: ECON 2010 and 2020

4031 International Monetary Problems is an advanced course in open economy macroeconomics covering balance of payments adjustment under fixed and flexible exchange rates; exchange rate movements and capital movements; the international monetary system; interdependence in the world economy.

PR: ECON 2010 and 2020

4040 Economics of Education - inactive course.

4050 Inflation: Theory and Policy - inactive course.

4061 Development of Economic Thought I is Adam Smith to Karl Marx. A study in the development of Classical Economics with emphasis on the contributions of Smith, Malthus, Ricardo, Mill and Marx.

PR: ECON 2010 and 2020

4070 Forestry Economics - inactive course.

4080 Advanced Fisheries Economics - inactive course.

4085 Advanced Environmental Economics is an advanced treatment of the environmental consequences of economic activities and the associated policy issues.

PR: ECON 2010 and 2020

4090 Mineral and Petroleum Economics is an introduction to some of the theoretical economic problems and practical solutions involved in the exploration, development and production phases of mineral and petroleum mining in Newfoundland and Labrador.

PR: ECON 2010 and 2020

4100 Industrial Organization and Public Policy - inactive course.

4120 Applied Welfare Economics and Cost Benefit Analysis investigates some current criteria of welfare theory found in the literature and then outlines the principles used in measuring changes in consumer and producer welfare. The theory of cost benefit analysis is examined and then the principles are applied to a variety of projects, some of which are proposed to take place in Newfoundland and Labrador.

PR: ECON 2010 and 2020

4140 Health Economics - inactive course.

4150 Monetary Theory examines empirical studies in money. Readings in current literature. Monetary theory with applications to problems of employment and foreign trade.

PR: ECON 2010 and 2020

4361 Labour Market Theory and Income Distribution - inactive course.

4550 Econometrics I covers estimation of the general linear regression model with emphasis on fundamental theory and examples from published empirical research.

PR: ECON 2010 and 2020

4551 Econometrics II covers further problems in econometric theory and technique: multicollinearity, autocorrelation, nonlinear estimation, and the identification and estimation of systems of equations. Published empirical research will be discussed and each student will be expected to perform an original empirical study.

PR: ECON 2010, 2020, and 4550

4999 Honours Essay is required as part of the Honours program.
PR: ECON 2010, 2020 and admission to the Honours program.

10.7.1 Work Terms

The following Work Terms are a requirement of the Bachelor of Arts and Bachelor of Science Co-operative Education Option only.

299W Work Term I follows the successful completion of Academic Term 2. For most students, it represents their first work experience in a professional environment and as such represents their first opportunity to evaluate their choice of pursuing a career in Economics. Students are expected to learn, develop and practice the high standards of behaviour and performance normally expected in the work environment. (A detailed description of each job is normally posted during the job competition.)

As one component of the Work Term, the student is required to complete a work report. The work report, as a minimum requirement should

1. analyse an issue/problem related to the student's work environment.
2. demonstrate an understanding of the structure of a professional report, and show reasonable competence in written communication and presentation skills. (Students should consult the evaluation form provided in the placement package.)

Late reports will not be graded unless prior permission for a late report has been given by the co-ordinator.

Seminars on professional development, conducted by the Co-operative Education Services Centre (CESC), are presented during Academic Term 2 to introduce and prepare the student for participation in the subsequent work terms. Topics may include, among others, work term evaluation, work report writing, career planning employment seeking skills, resume preparation, selfemployment, ethics and professional concepts, behavioural requirements in the work place, assertiveness in the work place and industrial safety.

CH: 0

LC: 0

PR: Admission to the Co-operative Education Option of the Bachelor of Arts or Bachelor of Science degree programs and successful completion of Academic Term 2.

399W Work Term II follows the successful completion of Academic Term 4. Students are expected to further develop and expand their knowledge and work-related skills and should be able to accept increased responsibility and challenge. In addition, students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems. The Work Report, as a minimum requirement should

1. analyse an issue/problem related to the student's work environment and demonstrate an understanding of practical application of concepts relative to the student's academic background,
2. demonstrate competence in creating a professional report, and
3. show competence in written communication and presentation skills.

Late reports will not be graded unless prior permission for a late report has been given by the co-ordinator.

CH: 0

LC: 0

PR: Admission to the Co-operative Education Option of the Bachelor of Arts or Bachelor of Science degree programs and successful completion of Academic Term 4.

499W Work Term III follows the successful completion of Academic Term 5. Students should have sufficient academic grounding and work experience to contribute in a positive manner to the problem-solving and management processes needed and practiced in the work environment. Students should become better acquainted with their discipline of study, should observe and appreciate the attitudes, responsibilities, and ethics normally expected of professionals and should exercise greater independence and responsibility in their assigned work functions.

The Work Report should reflect the growing professional development of the student and, as a minimum requirement, will

1. demonstrate an increased ability to analyse a significant issue/problem related to the student's experience in the work environment
2. demonstrate a high level of competence in producing a professional report, and
3. show a high level of competence in written communication and presentation skills.

Late reports will not be graded unless prior permission for a late report has been given by the co-ordinator.

CH: 0

LC: 0

PR: Admission to the Co-operative Education Option of the Bachelor of Arts or Bachelor of Science degree programs and successful completion of Academic Term 5.

10.8 English

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from

the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Lists of texts and readings for courses may be obtained from the Secretary of the Department of English. Courses for which there is insufficient demand will not be given.

1. ENGL 1000 and 1080 are courses for students who have attained a standard in Level III English acceptable to the Department.
2. ENGL 1001, 1101, 1102, 1103, 1110 are courses which may be taken by students who have successfully completed 1000 or 1080.
3. ENGL 1000, 1001, 1080, 1101, 1102, 1103 are courses which may be taken by students who have successfully completed 1020 or 1030.
4. Students cannot receive credit for more than one of ENGL 1000, 1080, or for more than one of 1001, 1101, 1102, 1103, 1110.

English courses are designated by ENGL.

100C Survey of the English Language I - inactive course.

101C Survey of the English Language II - inactive course.

102C Survey of the English Language III - inactive course.

102F Foundation English is a non-credit course designed for students whose first language is other than English and whose knowledge and use of English do not meet the standards for entry into the regular first-year English courses.

CH: 0

LC: 4 hours of lecture plus one hour conversation class

LH: 1

103C Survey of the English Language IV - inactive course.

1020 Writing for Second Language Students I is an introduction to the use of English with emphasis on composition for non-native English-speaking students. This course is for students whose first language is not English and who have passed 102F or have attained a standard acceptable to the Department on the English Placement Test. Students who have passed ENGL 1020 may take as their second English course one of ENGL 1021, 1080, 1101, 1102, or 1103.

CR: English 1030, ENGL 1110. Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer credits).

PR: Admission to this course will be determined on the basis of the departmental English Placement Test or successful completion of ENGL 102F.

1021 Writing for Second Language Students II develops skills in critical reading and writing of academic English, with emphasis on research and writing syntheses from sources, for non-native English-speaking students.

CR: Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer credits).

PR: ENGL 1020

1030 Writing - inactive course.

1031 Prose Literature - inactive course.

1080 Critical Reading and Writing I is an introduction to such literary forms as poetry, short fiction, drama, and the essay. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, quoting and documenting, revising and editing.

CR: ENGL 1000. Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer credits).

1101 Critical Reading and Writing II (Fiction) is a study of such forms as the novel, the novella, the story sequence. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing.

CR: Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer credits).

PR: ENGL 1000 or 1020 or 1030 or 1080

1102 Critical Reading and Writing II (Drama) is a study of drama. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing.

CR: Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer

credits).

PR: ENGL 1000 or 1020 or 1030 or 1080

UL: may not be used instead of ENGL 2002 as a prerequisite for entry into the Theatre-Drama specialization within the Major.

1103 Critical Reading and Writing II (Poetry) is a study of poetry. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing.

CR: Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer credits).

PR: ENGL 1000 or 1020 or 1030 or 1080

1110 Critical Reading and Writing II (Context, Substance, Style) is an examination of prose texts such as essays, articles and reviews. Students write for different purposes and audiences. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing.

CR: ENGL 1020, ENGL 1030. Students may not receive credit for more than 6 credit hours in first-year courses in English (this includes unspecified first-year transfer credits).

PR: ENGL 1000 or 1080

2000 Major Writers to 1800 is an introduction to the work of major authors by detailed study of selected texts. There is an emphasis on the various skills of essay writing. Some sections of this course may qualify as Research/Writing courses for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: ENGL 2005

2001 Major Writers from 1800 is an introduction to the work of major authors by detailed study of selected texts. There is an emphasis on the various skills of essay writing. Some sections of this course may qualify as Research/Writing courses for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: ENGL 2007

2002 Drama is a survey of drama from the Greeks to the present day. Some sections of this course may qualify as Research/Writing courses for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: ENGL 2350

2003 Poetry is a study of poetry, which aims to increase the students critical understanding and appreciation of poetry, conducted through an examination of a wide variety of kinds and techniques.

2004 Short Fiction is a study of short fiction which aims to give the students an appreciation of the short story as a literary form. The course will deal with the nature, history and development of short fiction by considering a variety of authors and stories.

2010 Introduction to Professional Writing requires students to analyze published essays for their aims, strategies, and discourses. Students practice writing as a process of discovery in the context of a learning community: for instance identifying questions to explore, free-writing, finding a focus, drafting, peer-editing, revising, editing. Each student produces a portfolio of revised, edited work. This course qualifies as a Research/Writing Course.

2013 Twentieth Century Musicals (same as Music 2013) is a survey of twentieth-century musical theatre. Selected works, presenting different styles and periods, will be examined in detail. There will be a strong, required listening/viewing component to this course. The ability to read music is not required.

CR: Music 2013 and Music 3007

UL: cannot be taken for credit by students enrolled in the Bachelor of Music program

2020 Comprehension, Writing and Prose Style II is a continuation of the work begun in ENGL 1110 and ENGL 2010.

PR: ENGL 1110 or ENGL 2010

2030 Comprehension, Writing and Prose Style - inactive course.

2031 Modern Canadian Fiction - inactive course.

2110 Survey of English Literature I - inactive course.

2111 Survey of English Literature II - inactive course.

2120 Introduction to Tragedy - inactive course.

2121 Introduction to Comedy - inactive course.

2122 Introduction to World Literature in English introduces students to

the significant body of contemporary literature written in English that stands outside the dominant British/North American canon. Authors addressed include writers of global significance such as Achebe, Rushdie, Coetzee, Walcott, Kincaid and Desai. Some sections of this course may qualify as Research/Writing courses for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2150 Modern Canadian Fiction is a study of representative Canadian fiction since 1930, including such authors as Ross, Buckler, Davies, Laurence, Atwood, Ondaatje and Findley.

2151 New Canadian Fiction is a study of fiction of Canadian writers since the 1970s.

2160 North American Aboriginal Literature will introduce aboriginal literature in a social, political and historical context. Beginning with the oral tradition (songs, narratives, legends, and orations), it will focus on different works by North American aboriginal writers: poetry, drama, short stories and novels.

2211 The English Novel from 1800-1900 is a study of representative English novels of the nineteenth century including works by such authors as Austen, the Brontës, Dickens, Thackeray, Gaskell, Eliot, Trollope and Hardy. Some sections of this course may qualify as Research/Writing courses for the B.A. **Core Requirements**. CH: 6

PR: completion of the six courses in the program, with an overall average of 65% in these courses.

10.8.1 English as a Second Language

011F Core Intensive English Program covers reading through a variety of types of texts, vocabulary development, writing development, and academic listening and note-taking skills. Students will be placed into appropriate sections following a placement test.

012F Speaking, Listening, and Culture includes development of speaking and listening abilities through a wide variety of tasks and communicative activities, including discussions, debates, conversation, role-plays, and presentations. Listening activities promote comprehension of rapid conversational English, while discussion topics enrich students' understanding of Canadian culture. Students will be placed into appropriate sections following a placement test.

10.9 European Studies

European Studies courses are designated by EURS.

2000 Europe in the Twentieth Century (same as History 2350 and Political Science 2990) is a social, economic and political history of Europe from World War I to the present. The course examines the shift from war and depression to peace and prosperity. Examining the rise and demise of fascism and communism, postwar reconstruction, and Europe's changing position in the world, it explores the interplay between domestic and international politics and Europe's position in the international order. This course is recommended for students considering a Harlow semester,

exchange programs in Europe, or further courses in European history or politics.

CR: History 2350, Political Science 2990, the former Political Science 2350

3000-3030 Special Topics in European Studies will be a reflection on modern Europe through the study of one or more of the following: film, comparative literature, art, architecture, music, etc.

10.10 Folklore

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Folklore courses are designated by FOLK.

1000 Introduction to Folklore explores the role of tradition in communication, art and society. Reading assignments and audiovisual material will emphasize the use of folklore in context. Students will analyse traditions in their own lives through special assignments.

CR: FOLK 2000

1050 Folklore Studies - inactive course.

1060 Folklore and Culture is an introduction to traditional expressive behaviour as cultural experience. Readings and lectures will explore the various meanings of "culture" from interdisciplinary perspectives and link the development of theoretical approaches to culture (evolutionary, materialist, particularist, psychological, semiotic, dramaturgic) to specific folkloric phenomena. Illustrations will derive primarily from children's folklore, material culture, and occupational folklore.

PR: while there is no prerequisite for this course, students should note that they will need to take Folklore 1000 (or 2000) before they can advance to other courses

2000 Introduction to Folklore - inactive course.

2100 Folklore Research Methods introduces the resources, tools and methods that folklorists use for primary and secondary research, including interviewing and participant observation. This course qualifies as a Research/Writing course.

PR: it is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses

2230 Newfoundland Society and Culture (same as Sociology 2230 and the former Sociology/Anthropology 2230) is a survey of the full range of folklore in the province, with an emphasis on community and regional identity.

CR: Sociology 2230, the former Sociology/Anthropology 2230

2300 Newfoundland and Labrador Folklore (same as the former Anthropology 2300) is a survey of the full range of folklore in the province, with an emphasis on community and regional identity.

CR: the former Anthropology 2300, the former FOLK 3420

2401 Folklife Studies examines the interweaving of traditional elements in the tangible and intangible cultural heritage of various cultures. These may include holiday customs, rites of passage, folk religion, home remedies, clothing, food and art.

CR: the former FOLK 3500

2500 Oral Literature (same as the former Anthropology 2500) focuses on the analysis of folk literature - narrative, poetry and song, drama, and speech from around the world - through textual, comparative and contextual methods.

CR: the former Anthropology 2500, the former English 3400, the former FOLK 3400, the former Sociology/Anthropology 3400

2700 Ethnography of the University allows students to develop their skills in cultural documentation as they work within a team-based approach to record and analyse Memorial University's unofficial culture. Course readings cover ethnographic practices and issues as well as the dynamics of student and work culture. Through a series of hands on fieldwork assignments students engage in research, cultural description, analytic writing and presentation. In documenting local university culture, they learn about the variety, persistence, and flexibility of traditional culture as it lives in the present. This course qualifies as a Research/Writing course.

3001 Art, Architecture and Medieval Life (same as Archaeology 3001, History 3020, and Medieval Studies 3001) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.

CR: Archaeology 3001, History 3020, and Medieval Studies 3001

PR: it is recommended, but not obligatory, that students should have successfully completed one of the following courses: Archaeology

2480, FOLK 1000 or 2000, History 2320/Medieval Studies 2001, History 2330/Medieval Studies 2002, Medieval Studies 2000

3100 Fictional Worlds: The Folktale is a study of fictional folk narratives told worldwide. Students may be asked to read, collect, and/or analyze folktales.

CR: the former FOLK 4200

3200 Music, Song and Tradition (same as Music 3017) introduces students to a wide range of traditional song. Students will hear and discuss local, regional and international examples. Ability to read music or familiarity with music theory not required.

CR: Music 3017, the former FOLK 2430

3250 Song Worlds: The Ballad examines traditional balladry (including subgenres such as tragic, comic, romantic, religious, and medieval ballads) in the contexts of transmission, function, performance, and aesthetics. Differences in dealing with written literature and the literature of tradition will also be addressed.

CR: the former FOLK 4445

3300 Vernacular Drama is a survey of traditional drama and its study with an emphasis on North America and Great Britain from social function, performance, and aesthetic perspectives.

3350 Folklore of the Body examines how the body is socially constructed and how it is represented through folklore genres from narrative, to material culture and custom. It considers how culture is both inscribed on the body and how it is bodily performed.

CR: the former FOLK 3611

3360 Sex/Folklore/Power is 1) an introduction to the many ways that sexual identities are displayed, developed, and categorized through informal and everyday cultural performances, i.e., folklore; 2) a study of how such performances relate to various folklore genres, including folk language and narrative, music/song/ballad, material culture/space, and festival/ritual; and 3) an examination of how social power structures are (de)constructed and negotiated through folk processes involving sexuality/sexual identities.

3450 Language and Play examines the role of play in the folklore of children and adults with particular attention to games, rhymes, proverbs and other small genres of wordplay.

3460 Folklore and Literature (same as English 3460) will examine the interrelationships among folklore forms and literary genres, the influence of oral traditions on written literatures, and consider the theoretical issues raised by these interrelationships. The primary emphasis will be on the interpretation of literature from the perspective of folk tradition. Extensive reading, oral and written reports will be required.

CR: English 3460, the former English 4450, the former FOLK 4450

3591 Collections Management (same as Archaeology 3591) will introduce students to the problems of collections storage with respect to environment, materials and artifact access. Students will become familiar with the materials encountered in archaeological and ethnographic collections. The storage of specific historic and prehistoric collections from Newfoundland and Labrador will be examined with the purpose of providing practical examples of methodology.

CR: Archaeology 3591

3601-3640 (Excluding 3606, 3612 and 3618) Special Topic in Folklore will have topics to be studied announced by the Department.

3606 Supernatural Folklore focuses on the ethnography of belief systems. Students examine patterns of belief and the features of supernatural folklore.

3612 Urban Legend provides an introduction to the study of one of the most rapidly expanding and exciting areas of folk narrative research. The course looks at the main features of the urban legend and the topics they cover. Examination is also made as to how, when, where and why stories of this type are used, including their incorporation into television programs, films and literature.

3618 Jazz and Blues: The Roots of Popular Music - inactive course.

3650 Artifacts of Colonial America (same as Archaeology 3650) provides students with practical experience in the analytical methods used to identify, date and interpret the different types of artifacts encountered on seventeenth- and eighteenth-century archaeological sites in Colonial North America. In-depth discussions on manufacture, technology, form and function provide the necessary background for a better understanding of concepts relating to artifact identification, provenance, dating techniques, theoretical approaches and other current issues.

CR: Archaeology 3650, Archaeology 3683, the former Anthropology 3683

3700 Museums and Historic Sites - inactive course.

3710-3729 Special Topics in Folklore is available only as part of the Harlow Campus Semester.

3800 Fieldwork in Vernacular Architecture: Drawings and Photography

- inactive course.

3820 Folk Custom provides an introduction to the study of the forms of British, European, and North American folk custom. Issues for discussion will include the diffusion, functions, maintenance and invention of calendar, seasonal, occupational, and life-cycle customs. As such, we will review much of the new scholarship which has shifted folkloristic attention from origins of customs to the analysis of custom as symbolic behaviour. Current work on the study of custom has examined, for example, the legitimization of class interests via traditional customs, the play of metaphor in festivals, and the symbolic statement of social obligations through life-cycle ritual.

CR: the former FOLK 3600

3830 Foodways as a term embraces a variety of traditions which focus on dietary practices as well as the preparation and allocation of food. As an introduction to foodways, the course will begin by looking at a variety of regional foods. In addition, both historical and contemporary approaches to the supply, storage, preparation and serving of food will be considered. In fact, we will be looking, from both practical and theoretical perspectives, at the whole range of cookery and food habits - from the acquisition of raw materials to the allocation of portions.

3850 Material Culture (same as Archaeology 3850) is an examination of various interpretive theories of objects as cultural products. Problems of defining the artifact will be discussed, as well as the strengths and limitations of using objects in historical and ethnographic research. Questions discussed include form, design, decoration, diffusion, and the role of the creator of the object. Besides folkloristic work on material culture, a variety of interdisciplinary approaches will be considered. Emphasis will be on the material folk culture of Newfoundland and Labrador and its European antecedents.

CR: Archaeology 3850

3860 Vernacular Architecture (same as Archaeology 3860 and History 3860) is a historical survey of vernacular architectural forms in various regions of North America, with attention to Newfoundland and Labrador materials. Issues discussed include the relationship of house form and culture, the concepts of antecedents, diffusion, innovation and evolution of building forms and technologies, and the siting of buildings in the landscape. Dwelling houses, outbuildings, churches and industrial vernacular architecture will be included.

CR: Archaeology 3860, History 3860

3870 An Introduction to the History of Western Architecture Since the Renaissance - inactive course.

3900 Newfoundland and Labrador Vernacular Furnishings (same as Archaeology 3900) is an introduction to the furnishings of the Newfoundland and Labrador domestic interior, involving case studies from public and private collections. The focus of the course will be on furniture, looking at both urban and outport forms. The cultural context of typical furnishings will be discussed, as well as details of furniture form and construction. While furniture will be emphasized, other objects of domestic material culture may be included: glass, ceramics, metalware and textiles.

CR: Archaeology 3900

3910 Traditions of Work concerns the development and role of tradition in occupational groups and work settings. Verbal and non-verbal codes including narratives, joking relationships, pranks, material culture, and labourlore will be examined in a variety of contexts.

3920 Folklore and Education familiarizes students with the function of Folklore in the educational process. Emphasis will be on cultural transmission and cultural learning inside and outside the K-12 classroom.

3930 Folklore and Popular Culture is an examination of the transitional processes involved in the development of folk societies to mass cultures with regard to folklore and the products of popular culture. In addition, sensory and technological media theories will be scrutinized and evaluated in conjunction with cultural comparisons of the qualities and functions of: folksong, disc recordings and the radio; folktales, television melodrama and popular film; folk art and popular "techno-art" forms.

CR: the former FOLK 2400

3940 Folklore in Medieval Society - inactive course.

3950 Women and Traditional Culture is an introduction to the ways in which women shape and/or are shaped by traditional culture. Readings and lectures will explore roles and contributions of women as folklore collectors, examine representations of women in folklore forms, and analyse women's creation of their own traditions.

4015 Cultural Resource Management (same as Archaeology 4015 and Geography 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management.

CR: Archaeology 4015, Geography 4015

OR: three hours of seminar per week

4100 History and Memory (same as History 4100) is a course which recognizes that memory is not one of the natural parts of ourselves, nor is remembering a way of connecting with a single reference point in a social reality outside ourselves. These things are socially determined. Starting here, this course is designed to have students reflect on what they know about the past and how they know about it. The class will examine how individual and social memory works, concentrating on particular historical contexts.

CR: History 4100, the former History 4569

4300 Folklore of Canada - inactive course.

4310 Studies in Newfoundland and Labrador Folklore studies rural and urban Newfoundland and Labrador with specific reference to a culture in transition. Folklore is examined as one of the channels through which a people maintain, change and adapt various cultural patterns.

CR: the former FOLK 3421

PR: FOLK 2300

4320 Folklore of the United States - inactive course.

4350 Folklore of the British Isles - inactive course.

4360 Traditional Culture of Scotland - inactive course.

4370 Culture and Traditions of Ireland - inactive course.

4400 Traditional Culture of French-Newfoundlanders - inactive course.

4410 Folklore of France - inactive course.

4420 French Folklore in the New World - inactive course.

4440 Music and Culture (same as the former Anthropology 4440, Music 4040, and the former Music 4440) examines traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.

CR: the former Anthropology 4440, Music 4040, the former Music 4440

4460 Folk Religion (same as Religious Studies 4460) is an examination of folk responses to organized religion, surveying the religious forms and interpretations not specifically delineated by Theology. Areas of focus include: folk religious concepts of space and time; religion and healing; witchcraft and the devil; religious folk art and music; religious verbal art; the role and power of the holy person; the saint system; and community social activities sponsored by the church. A discussion of some current popular religious movements will also be included. Attention will be given to material in the MUN Folklore and Language Archive, and research based on field data will be encouraged.

CR: Religious Studies 4460, the former FOLK 4240

4470 Spaces and Places critically examines how physical space is transformed into cultural place through folklore. The study of region will be used to introduce scholarship on a number of issues central to contemporary folkloristics: sense of place, space and place analysis, space and place as theory, critical regionalism, nationalism and vernacular regionalisms. Students will learn how folklore and localization interact to counter fears and assumptions regarding globalization, homogenization, and the loss of local or regional identities.

4480 Oral History (same as History 4480) is a seminar which deals with the uses of oral sources, particularly those which have a traditional dimension, for the study of history. The uses of oral testimony in the study of traditional modes of life and work, and in social and political history will be discussed.

CR: History 4480

4500-4520 Special Topic in Folklore will have topics to be studied announced by the Department.

4600-4615 Special Research in Folklore will be determined by the Department.

4700-4715 Directed Reading Course will be offered as determined by the Department.

4810 Documents Management (same as History 4810) is an introduction to the management of records and documents, both official and private.

CR: History 4810

400X Folklore in the Community Context - inactive course.

4998 Honours Comprehensive Examination may be written or oral, or a combination of both.

4999 Honours Essay is required as part of the Honours program.

10.11 French

In accordance with Senate's *Policy Regarding Inactive Courses*,

the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Students who have successfully completed one or more credit courses in French language will not subsequently be permitted to receive credit for courses not previously completed and judged by the Department to be of a lower level than those already completed. Students returning to the study of French after an absence should consult the Department for current information on these restrictions before registering. Students who wish to return to a previously completed course to improve their standing may do so only with the permission of the Head of the Department.

French courses are designated by FREN.

1500 Introductory University French I is a course for beginners and for students whose background in French is very weak. Students with a strong background in high-school French should bypass 1500 and begin their University study with 1501, especially if they intend to proceed beyond the first-year level. Very well-prepared students may apply to the Department for permission to enter 1502 directly.

1500 Introduction à la langue française, niveau universitaire I cours pour débutants et pour ceux dont les connaissances du français sont très faibles.

CR: the former FREN 1010 or the former FREN 1011

LH: two additional hours of language laboratory work or conversation class, or both

PR: students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department.

UL: permission to register for this course will not be given to students who have completed Français 3202 (High School French immersion)

1501 Introductory University French II is one of three consecutive credit courses in French language at the first-year university level, offering a complete overview of basic oral and written French. New students may choose to register initially in FREN 1500 or 1501; a diagnostic test is offered to assist students with initial course selection or to confirm that initial course selection is appropriate. Students with a limited background in French should register for FREN 1500 and continue with 1501. Students with a strong background in high-school French should bypass 1500 and begin their University study with 1501, especially if they intend to proceed beyond the first-year level. Very well-prepared students may apply to the Department for permission to enter 1502 directly.

1501 Introduction à la langue française, niveau universitaire II

CR: the former FREN 1050

LH: two additional hours of language laboratory work or conversation class, or both

PR: High School FREN 3200 or permission of the Head of the Department. Ex-immersion students should consult the Head of the Department before registering for this course. Students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department.

1502 Introductory University French III is one of three consecutive credit courses in French language at the first-year university level, offering a complete overview of basic oral and written French.

1502 Introduction à la langue française, niveau universitaire III

CR: the former FREN 1051

LH: two additional hours of language laboratory work or conversation class, or both

PR: FREN 1501 with a grade of at least 60% or by permission of the Head of the Department. Students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department. Very well-prepared students may apply to the Department for permission to enter 1502 directly.

2100 Intermediate French I is a course on composition, grammar and practice in oral skills.

2100 Français intermédiaire II rédaction, grammaire et pratique orale.

CR: FREN 2160 or 2101

PR: FREN 1502 with a grade of at least 60%

2101 Intermediate French II is further work in composition, grammar and oral skills.

2101 Français intermédiaire II continuation du travail de rédaction, de grammaire et de communication orale.

CR: FREN 2100 or 2160

PR: FREN 2100

2159 Advanced French for First-year Students I is primarily intended to build on the language skills acquired by students in immersion programs. Development of reading, writing, listening and speaking ability through practical oral and written exercises.

2159 Français avancé pour étudiants de première année I ce cours est

conçu principalement pour développer les compétences linguistiques des étudiants qui ont reçu leur formation dans les programmes d'immersion. La compréhension et l'expression écrites et orales seront développées au moyen d'exercices pratiques oraux et écrits.

PR: primarily intended for students who completed immersion programs or with permission of the Head of the Department. FREN 2159 and 2160 are courses designed for former French immersion students as well as others with exceptional backgrounds in French, and are intended as an alternative to the 1500, 1501, 1502, 2100, 2101 sequence.

2160 Advanced French for First-year Students II is an intensive review of French grammar with oral and written practice. Particular attention will be paid to ensuring precision in language use in both oral and written forms and to eradicating anglicisms.

2160 Français avancé pour étudiants de première année II révision intensive de la grammaire et pratique de la langue écrite et parlée pour assurer la précision linguistique à l'oral ainsi qu'à l'écrit et supprimer les anglicismes.

CR: French 2100 or 2101

PR: French 2159 or the former French 1060. FREN 2159 and 2160 are courses designed for former French immersion students as well as others with exceptional backgrounds in French, and are intended as an alternative to the 1500, 1501, 1502, 2100, 2101 sequence.

2300 Phonetics is a practical introduction to French phonetics, including the International Phonetic Alphabet and phonetic transcription as well as corrective phonetics.

2300 Phonétique introduction pratique à la phonétique du français. Emploi des symboles de l'alphabet phonétique, transcription phonétique et phonétique corrective.

PR: FREN 1502 or equivalent

2601 Grammar and Reading will explore reading strategies in a variety of narrative and descriptive readings in French. This course will normally be taught in French.

2601 Grammaire et texte les étudiants exploreront des stratégies de lecture qui faciliteront la compréhension de textes narratifs et descriptifs divers. Ce cours sera enseigné normalement en français.

PR: FREN 1502 or 2159 or equivalent

2602 Reading Practice will explore reading strategies in a variety of readings in FREN intended to inform or persuade. This course will normally be taught in French.

2602 Pratique de la lecture les étudiants exploreront des stratégies qui faciliteront la compréhension de textes informatifs et argumentatifs divers. Ce cours sera enseigné normalement en français.

PR: FREN 2601 or equivalent

2900 A Survey of Francophone Cultures places emphasis on oral comprehension and expression.

2900 Survol des cultures francophones accent mis sur la compréhension et l'expression orales.

CR: the former FREN 2500

PR: FREN 1502 or equivalent. Students who have obtained less than 70% in 1051 are, however, advised to complete FREN 2100 before attempting this course.

3100 Grammar and Textual Analysis is a revision of the French noun and verb systems (morphology, number, gender, tense, aspect, mood, voice). Grammatical and stylistic textual analysis with special emphasis on the use of verbs in French. Vocabulary enrichment.

3100 Grammaire et analyse de textes révision des catégories nominale et verbale du français (morphologie, nombre, genre, temps, aspect, mode, voix). Analyse grammaticale et stylistique des textes avec un accent particulier sur l'emploi du verbe en français. Travaux d'expansion lexicale.

PR: FREN 2101 or 2160 and at least one other 2000-level course in French

3101 Stylistics and Textual Analysis examines role and function of the parts of speech in French; semantic enrichment (synonymy, polysemy); tropes and figures of speech. Grammatical and stylistic textual analysis with special emphasis on these phenomena. Vocabulary enrichment.

3101 Stylistique et analyse de textes rôle et fonction des parties du discours; exploitation sémantique (synonymie, polysémie); tropes et figures de style. Analyse grammaticale et stylistique de textes avec un accent particulier sur ces phénomènes. Travaux d'expansion lexicale

PR: FREN 3100

3102 French Language Studies at Nice (I) is a required course of Session I of the Canadian Third Year Program in Nice. The content of this course will be the equivalent of a language course at the third year level.

3102 Études de la langue française à Nice (I) est un cours obligatoire lors du premier du programme Canadian Third Year in Nice. Le contenu de ce cours correspond à un cours de langue de troisième année de l'université responsable de la coordination.

PR: admission to the Canadian Third Year Program in Nice and French 2101, or permission of the Head of the Department.

3103 French Language Studies at Nice (II) is a required course of Session II of the Canadian Third Year Program in Nice. The content of this course

will be the continuation of the language course offered during the previous semester and will be the equivalent of a language course at the third year level in the university that sends the Coordinator.

3103 Études de la langue française à Nice (II) est un cours obligatoire lors du deuxième semestre du programme Canadian Third Year in Nice. Le contenu de cours est la suite de ce cours de langue enseigné pendant le précédent et correspond à un cours de langue de troisième année de l'université responsable de la coordination.

PR: admission to the Canadian Third Year Program in Nice and French 3102

3300 Rhetoric and Public Speaking is convincing and arguing in French. The course will be structured by rhetoric: memory, invention, disposition, elocution, diction. Various oral exercises.

3300 Rhétorique et art oratoire le discours et le dialogue. Le cadre du cours est la rhétorique: mémoire, invention, disposition, élocution, diction. Exercices oraux variés.

OR: two and a half hours of instruction plus one 50-minute period of conversation class per week

PR: 6 credit hours in FREN at the 2000 level

3302 History of the French Language (same as Linguistics 3302) is a study of the origins of French, including the influence of Gaulish, Vulgar Latin, Frankish and the langue d'oc/langue d'oïl division, a survey of the dialects, morphology and syntax of Old French and of the evolution from Old to Middle French, including phonology, morphology, syntax and vocabulary.

3302 Histoire de la langue française (identique à Linguistique 3302) Une étude des origines du français qui porte sur l'influence du gaulois, du latin vulgaire, du francique et de la division langue d'oc/langue d'oïl; survol des dialectes, de la morphologie et de la syntaxe de l'ancien français, ainsi que de l'évolution de l'ancien français au moyen français, en tenant compte de la phonologie, de la morphologie, de la syntaxe et du vocabulaire.

CR: Linguistics 3302

PR: French 2101 (or 2160) and 2300; Classics 1120 is strongly recommended

3310 Phonology and Morphology of French (same as Linguistics 3310) is an examination of the phonological and morphological structure of French. Data from regional and non-standard varieties contrasted with data from standard French: formal rules to deal with observed regularities. Interactions of phonology and morphology in phenomena such as liaison. Derivational and inflectional morphology. Research articles on one or more of the topics dealt with in the course will be assigned as readings, and a written report in French based on one or more of the articles is to be submitted as part of the term work. This course will normally be taught in French.

3310 Phonologie et morphologie du français (identique à Linguistique 3310) Une étude de la structure phonologique et morphologique du français. Données des variétés régionales et non-standard en contraste avec le français standard: règles formelles pour rendre compte des régularités observées. Interaction de la phonologie et de la morphologie dans la liaison et d'autres contextes. La flexion et la dérivation. On prescrit des articles de recherche sur l'un ou plusieurs des thèmes à l'étude et un rapport rédigé en français sur l'un ou plusieurs des articles. Ce cours est normalement enseigné en français.

CR: Linguistics 3310

PR: French 2300 or permission of the instructor. Students who have not completed FREN 2300 are strongly advised to complete at least one 2000-level course in French before attempting FREN 3310.

3311 Introduction to General Linguistics: Aspects of French Linguistic Theory (same as Linguistics 3311) is a practical examination of the French verbal system, with a thorough exposition of the systems of aspect, voice, tense and mood. The fundamental concepts of linguistics will form the framework of this exposition: the langue/parole distinction and its relationship to underlying and surface entities, language as activity and the generation of surface elements from underlying subsystems. This course will normally be taught in French.

3311 Initiation à la linguistique générale: aspects de la théorie linguistique française (identique à Linguistique 3311) Étude pratique du système verbal du français et une exposition approfondie des systèmes de l'aspect, de la voix et des modes. Les concepts fondamentaux de la linguistique serviront de cadre à cette exposition: la distinction langue/parole et le rapport avec les entités sous-jacentes et de surface; le langage comme activité et la génération des éléments de surface à partir des systèmes sous-jacents. Ce cours sera normalement enseigné en français.

CR: Linguistics 3311

PR: a Linguistics course or FREN 2100 or 2159

3500 An Introduction to Prose Literature in French pays particular attention to the literatures of French Canada and France.

3500 Introduction à la prose de langue française une attention particulière sera accordée aux littératures du Canada français et de la France.

PR: FREN 2602 or equivalent

3501 An Introduction to Drama in French pays particular attention to the literatures of French Canada and France.

3501 Introduction au théâtre de langue française une attention particulière sera accordée aux littératures du Canada français et de la

France.

PR: FREN 2602 or equivalent

3502 An Introduction to Poetry in French pays particular attention to the literatures of French Canada and France.

3502 Introduction à la poésie de langue française une attention particulière sera accordée à la poésie du Canada français et de la France.

PR: FREN 2602 or equivalent

CO: any Spanish 3000 level course and Spanish 2001 or equivalent, or permission of the Head of the Department

4700 Oral and Written Spanish Composition I - inactive course.

4701 Oral and Written Spanish Composition II - inactive course.

4800 Directed Reading Course in Spanish - inactive course.

6900 Reading in Spanish is a graduate service course.

PR: offered only in the context of a study-abroad program in a Spanish speaking country

10.12 Gender Studies

Gender Studies courses are designated by GNDR.

1000 Introduction to Gender Studies (same as the former WSTD 1000) considers gender, gender studies and feminisms as areas of exploration from historical, contemporary, transnational and interdisciplinary perspectives. The aim of this course is to provide a critical framework for thinking about questions relating to gender and other forms of social difference.

CR: the former Women's Studies 1000, the former Women's Studies 2000

2005 Identities and Difference (same as the former WSTD 2005) examines feminist scholarship about the construction of identities and difference in cultural discourses, representation and institutions. This course qualifies as a Research/Writing course.

CR: the former WSTD 2005
PR: GNDR 1000 or the former WSTD 1000

3000 Research Methods in Gender Studies (same as the former WSTD 3000) familiarizes students with basic tools and research skills for feminist enquiry in Gender Studies research. As a requirement of this course, students may be asked to design and carry out a research project.

CR: the former WSTD 3000

PR: GNDR 1000 or the former WSTD 1000

3001 Women Writers in the Middle Ages (same as English 3006, Medieval Studies 3006 and the former WSTD 3001) will study selections from the considerable corpus of women's writing in the Medieval period, as well as issues which affected women's writing. All selections will be read in English translation.

CR: English 3006, Medieval Studies 3006, the former Medieval Studies 3351, the former WSTD 3001

3002-3020 (Excluding 3004, 3005 and 3009) Special Topics in Gender Studies (same as the former WSTD 3002-3020 excluding 3004, 3005 and 3009) will have topics announced by the Department.

CR: the former WSTD 3002-3020 excluding 3004, 3005 and 3009

3005 Feminist Texts, Theories and Histories (same as the former WSTD 3005) is an examination of the development of feminist theories through analyses of key texts and their connections to historical and contemporary debates within feminism.

CR: the former WSTD 3005

PR: GNDR 1000 or the former WSTD 1000 is required and GNDR 2005 or the former WSTD 2005 is recommended

3025 Theories of Gender, Race and Post-Colonialism examines theories, themes and issues that have emerged from, and in response to, post-colonial studies in recent decades. This course focuses particularly on what this body of scholarship contributes to understandings of the roles of gender, race and sexuality in colonialism, as well the comprehension of current social and political realities.

PR: GNDR 1000 or the former WSTD 1000 is required and GNDR 2005 or the former WSTD 2005 is recommended

3100 Gendered Politics of Health (same as the former WSTD 3100) examines intersections of gender and health, recognising these to be politically shaped categories that have direct implications for individual's lives. This course considers the ways that particular conceptualizations of gender, health and well-being are shaped and challenged and considers the role of individuals, institutions and states in structuring opportunities and challenges related to health.

CR: Sociology 4201, the former WSTD 3100

PR: GNDR 1000 or the former WSTD 1000 is required and GNDR 2005 or the former WSTD 2005 is recommended

3710-3720 Special Topics in Gender Studies (same as the former WSTD 3710-3720) are available only as part of the Harlow Campus Semester.

CR: the former WSTD 3710-3720

4000 Contemporary Feminist Issues (same as the former WSTD 4000) is an interdisciplinary seminar in Gender Studies that identifies emerging debates in contemporary feminism and analyses complex and contentious issues and how they intersect and disrupt social constructions of gender.

CR: the former WSTD 4000

OR: 3 hour seminar per week

PR: students must normally have completed GNDR 3005 or the former WSTD 3005 or GNDR 3025 and 15 credit hours in other courses applicable to the Gender Studies Major and Minor programs before taking GNDR 4000. In exceptional cases, students without these prerequisites may be accepted, with the approval of the instructor of GNDR 4000 and the Head of the Department.

4005 Feminist Praxis (same as the former WSTD 4005) examines, in considerable depth and detail, connections between feminist theories and activism for social and political change. It examines how social movement activism, including feminism, is mobilized in different historical, cultural and national contexts.

CR: the former WSTD 4005

PR: students must normally have completed GNDR 3005 or the former WSTD 3005 or GNDR 3025 and 15 credit hours in other courses applicable to the Gender Studies Major and Minor programs before taking GNDR 4000. In exceptional cases, students without these prerequisites may be accepted, with the approval of the instructor of GNDR 4005 and the Head of the Department.

10.13 Geography

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

It is strongly recommended that all 2000-level core courses be completed before registration in 3000-level courses. All 2000-level core courses must normally be completed prior to registration in a 4000-level course.

Specific prerequisites for courses may be waived only with permission of the instructor and the Head of Department.

Geography courses are designated by GEOG.

1050 Geographies of Global Change provides perspectives on the major geographical challenges and changes facing the contemporary globe, including: climate and environmental change, sustainability, human development, economic globalization, cultural change, and population and migration. Using the integrative skills of geographical analysis, the course prepares students for advanced study in geography and citizenship in the modern world.

CR: credit may not be obtained for Geography 1050 and any one of Geography 1000, 1001, the former 1010, the former 1011

2001 Cultural Geography is an introduction to the study of culture in geography, emphasizing both the history of the field from classic studies of landscapes to contemporary scholarship and themes of recent importance. These include the relationship between nature and culture: imperialism and colonialism; place, identity, and power; and global cultures of commodities, media, and tourism.

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

2102 Physical Geography: The Global Perspective is a study of form, process, and change in natural systems at and near the surface of Earth, viewed as human environment. Emphasis is on global and regional scales in the systematic study of climate, water, landforms and vegetation.

CR: the former GEOG 2100, the former GEOG 2101

LH: 3

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

2105 Canada's Natural Environments and Landscapes examines the characteristics and development of the natural environments and landscapes of each of the major regions of Canada. The diversity of natural environments is illustrated through discussion of the climatic, hydrological, biogeographical, and geomorphic processes responsible for shaping the land. The impact of both gradual and rapid (catastrophic) changes on local, national, and global scales will be emphasized. This course is complementary to GEOG 3405; students are encouraged to take both.

CR: the former GEOG 3100

2195 Introduction to Geographic Information Sciences is an introduction to the fields of cartography, remote sensing, and geographic information systems (GIS). Geographic information collection, representation and analysis methods are the topics for the course. An emphasis is given to applications of maps and satellite images.

2226 Field Methods I is designed to introduce students to the practice of geography in the field. Field techniques will focus on the observation, identification, and collection of primary data. This course provides a basis for further study in advanced geography courses.

CH: 1

PR: GEOG 1050 or permission of the instructor

2290 Historical Geography of Newfoundland - inactive course.

2302 Issues in Economic Geography covers basic issues and ideas in economic geography. The development of a regional economy will be related to underlying economic, cultural and physical factors.

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

2425 Natural Resources is an introduction to the concepts of natural resources, environment and conservation: the nature and distribution of natural resources; methods of use, allocation and development of natural resources and the role of various physical, social, economic, political and technological factors influencing decision-making about resources.

CR: the former GEOG 3325

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

2495 Regional Geography of Labrador is a holistic study of the Geography of Labrador, including the terrain, geology, Quaternary history, climate, vegetation, and fauna; the cultural geography of Labrador, including Innu, Inuit, Métis, and Settler people and communities; economic activities in Labrador, and the interaction of the Labrador economy within Newfoundland, Canada, and globally; the management of physical and human resources; and the geographic techniques used to investigate and understand Labrador's unique Geography.

CR: the former GEOG 3495

3000 Population Geography - inactive course.

3010 The Evolution of Urban Form - inactive course.

3110 Physical Geography of the Watershed - inactive course.

3120 Climatology is an analysis of the energy and moisture budgets and circulation of the atmosphere at the macro-scale, together with an examination of resulting climate characteristics for selected world regions.

LH: 3

PR: GEOG 2102, Mathematics 1000

3140 Biogeography is the application of ecological concepts to the study of the spatial variations in the distribution of plants and vegetation. Laboratory work emphasizes terrestrial flora of Newfoundland.

LH: 3

PR: GEOG 2102, Mathematics 1000

3150 Geomorphology is a study of the relationships between geomorphic processes and landforms. Practical work will involve collection of data and samples in the field and analytical laboratory techniques.

CR: the former Earth Sciences 3700

LH: 3

PR: GEOG 2102 or Earth Sciences 2905; Mathematics 1000

3202 Introduction to Cartography is an introduction to the field of cartography and its different components, including: projections, generalization, cartographic design, data classification, topographic and thematic mapping.

CR: the former GEOG 2200

LH: 3. Laboratory exercises will utilize Geographic Information Systems software.

PR: 6 credit hours at the 2000-level

3210 History of Map Making is an examination of the major characteristics of the evolution of the art and science of map-making from the earliest time to the present. Emphasis is on the development and application of theory and method in the cartographic process.

3222 Research Design and Quantitative Methods in Geography is an introduction to principles of research design, and to the use of quantitative techniques. This course provides students with a basic understanding of data collection, entry, and analysis and presentation skills most commonly used by geographers. Practical, computer-based exercises are an essential part of the course. It is strongly recommended that this course be completed before registration in a 4000-level geography course.

CR: the former GEOG 2220

LH: 3

PR: GEOG 1050, or the former GEOG 1011, or 1001 and at least 9 credit hours from GEOG 2001, 2102, 2195, 2302, 2425

3226 Field Methods II is designed to provide students with field experience at a more advanced level, building on GEOG 2226. In this course, the students will experience the field research process from the initial observation of a site through research and analysis to completion of a written report.

CH: 2

PR: GEOG 2226

3230 Field Course will normally be taken by Geography Majors just prior to the Fall Semester of their third year. The course will be held off campus and is designed to provide experience in instrument and field techniques in physical, economic and cultural Geography.

3250 Introduction to Remote Sensing is an introduction to digital image analysis. Will include many aspects of pre-processing and processing of airborne and satellite imagery.

LH: 3

PR: GEOG 2195, Mathematics 1000

3260 Introduction to Geographic Information Systems (GIS) introduces the principles of GIS as they relate to spatial data input, structures, management, integration, analysis and output. Laboratory exercises permit students to use GIS software and explore how it can be applied to a wide variety of disciplines and real world issues.

CR: the former GEOG 4251

LH: 3

PR: GEOG 2195, Mathematics 1000

3303 Location Theory - inactive course.

3320 Fisheries Geography - inactive course.

3340 Techniques of Regional Analysis - inactive course.

3350 Community and Regional Planning and Development introduces students to regional planning and development theories, techniques and approaches. Understanding of networks of development actors at community and regional scales, methods of delineating regions, links between theory and practice in planning and development. Focus on Canadian experiences and a sustainable development perspective.

PR: GEOG 2302 or permission of the instructor

3405 Canada is a study of the regional geography of Canada, with emphasis on social, economic and political characteristics. The course is a core course in the **Canadian Studies Major** program. This course is complementary to GEOG 2105; students are encouraged to take both.

CR: the former GEOG 2400

PR: GEOG 2001, 2102 and 2302; or 6 credit hours in courses for the Major in Canadian Studies; or permission of the instructor and the Head of the Department

3425 Geographical Analysis of Resources is the geographic study of

contemporary North American issues in resources and their management. Emphasis will be placed on air and water quality issues, lands and forest resources, energy resources, and coastal zone resources. A number of substantive areas in resource analysis will be considered, including resource appraisal, landscape evaluation, and environmental impact assessment.

CR: the former GEOG 4400
PR: GEOG 2425 or equivalent

3510 Geography of the Seas is an introductory course in marine science and management treating the world's oceans as a geographic unit. The course covers basic physical, geological and biological marine science and applications of basic science to management issues facing the oceans today.

PR: GEOG 2102, 2425, or permission of instructor

3610 Cultural Landscape is an investigation of a principal subject of study in cultural geography; the human imprint on the land. The course will include a detailed consideration of the origin of landscape studies in geography; newer approaches emphasizing visual and representational aspects of landscapes; and several diverse case studies, historical and contemporary, concerned with struggles over their definition.

PR: GEOG 2001

3620 Migration and Colonization is a study of population movements associated with colonization and frontier development.

PR: GEOG 2001

3701 Urban Geography is an examination of the evolution, structure and dynamics of cities and urban systems.

PR: GEOG 2302

3710-3729 Special Topics in Geography will have topics to be studied announced by the Department.

PR: available only as part of the Harlow Campus Semester

3800 Political Geography is a geographic study of political ideas and processes. The course will consist of a historical discussion of the origins and trajectory of geopolitics, from the beginning of the 20th century to contemporary uses. Key themes in political geography, including strategy and statecraft, decolonization and nationalism, global technologies, and environmental security will be discussed.

PR: GEOG 2001

3900-3909 Special Topics in Geography will have topics to be studied announced by the Department.

PR: permission of the instructor and the Head of the Department

3990-3999 Special Topics in Geography will have topics to be studied announced by the Department.

PR: permission of the instructor and the Head of the Department.

4010 Cultural Geography is concepts and methods in the study of cultural geography.

PR: GEOG 2001 and at least one of GEOG 2290, 3000, 3010, 3610, 3620, 3800. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4015 Cultural Resource Management (same as Archaeology 4015 and Folklore 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management.

CR: Archaeology 4015, Folklore 4015

OR: three hours of seminar per week

PR: it is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses

4120 Applied Climatology - inactive course.

4141 Glacial Environments is an examination of the landforms, processes and sediments of past and present glacial environments. Course work will stress broad applications to environmental science.

CR: the former Earth Sciences 4701

LH: 3 hours of laboratory/field work per week

PR: 6 credit hours in physical geography courses at the 3000-level; or permission of Head of Department. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4150 Environmental Change and Quaternary Geography (same as Archaeology 4150) covers methods of reconstructing Quaternary environments; effects of Quaternary environmental change on landforms, with special reference to North America; development and characteristics of glacial and non-glacial climates.

CR: Archaeology 4150

LH: 3

PR: 6 credit hours in physical geography courses at the 3000-level; or permission of Head of Department. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4190 Coastal Geomorphology is an advanced course in geomorphology of coastal regions in all climate zones. Covers reflective and dissipative beaches, barrier systems, coastal sand dunes, deltas, tidal flats, estuaries, reefs, bedrock and karst shorelines, ice-dominated shorelines, and influence of climate change and sea level change on coastal environments.

CR: the former GEOG 4180

LH: 3

PR: GEOG 3150 or permission of instructor. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4202 Advanced Cartography will provide students with advanced knowledge in computer-based cartography required to produce final geographic datasets and maps.

LH: 3. Laboratory exercises will utilize Geographic Information Systems software.

PR: GEOG 3202 or permission of instructor. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4220 Advanced Quantitative Methods - inactive course

4250 Environmental Image Analysis is remote sensing techniques applied to various environmental problems. Techniques include selection of the system for data acquisition (airborne or satellite imagery), planning of a ground truth survey, and of data processing. Applications to high and low density urban areas, agricultural, forestry, coastal zone, oceanic, and environmental monitoring.

LH: 3

PR: GEOG 3250. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4261 Advanced Methods in Geographic Information Systems (GIS) explores the nature and use of advanced GIS algorithms, discrete and continuous data structures, computational methods and analysis of error for the purpose of analysing and modelling spatial patterns and processes. Laboratory exercises permit students to use GIS software to explore as well as develop problem solving and modelling skills for a wide variety of real world applications.

LH: 3

PR: GEOG 3260; Mathematics 2050; Computer Science 1710; (or equivalent, with permission of instructor and the Head of Department). It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4290 Geographic Information Sciences Practicum is practical experience with the geographic information sciences fields of cartography, remote sensing or geographical information systems. Students will serve as interns in governmental, institutional or private agencies, or in non-profit organizations.

CO: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences

LH: six hours per week or a total of 72 hours of research or laboratory work

OR: six hours per week or a total of 72 hours of research or laboratory work

PR: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4300 World Fisheries: Current Discourse and Future Directions is a seminar course on the key concepts, principles and challenges in fisheries resources worldwide. Topics of discussion include the state of world fisheries, analysis of various management approaches and tools, and future scenarios for world fisheries.

PR: 6 credit hours in Geography at the 3000-level or permission of Head of Department. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4320 Regional Development Seminar is focussed on understanding the region and regional development in theoretical terms and in a policy context. The central question of the course is: how do we understand the region and regional development in a globalizing world? What are the policy options for people interested in making regional development work in a global economy? The case studies will cover both the developing and the developed world.

PR: GEOG 2302 or permission of Head of Department. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4405 Outdoor Recreational Resources and Planning is an introduction to the major themes and techniques in the study of outdoor recreation. A theoretical framework will provide a base for the evaluation of the complex issues involved in managing a physical resource for recreational purposes. North American examples will be emphasized.

CR: GEOG 4909

LH: 3

PR: GEOG 2425 or the former GEOG 3325. It is strongly recommended that Geography 3222 and 3226 be completed before registration in

4000-level courses.

4410 Research Seminar in Resources offers the opportunity to undertake advanced work in a number of resource sectors such as energy, fisheries, forests, lands, air and water. The emphasis will be on learning through experience. Students will be expected to initiate and complete suitable research projects in close consultation with faculty involved.

PR: GEOG 2425 or the former GEOG 3325. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4600 Historical Geography is a study of concepts and methods in historical geography. The field concerned with geographies of the past and their relation to the present. Themes will include the history of geography as a discipline, particularly its relevance to imperialism and state power; changing relationships between humans and the natural environment; and histories of the spaces of social life and human identity.

PR: GEOG 2001 and at least one of GEOG 2290, 3000, 3010, 3610, 3620, 3800. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4640 Historical Geography of Canada (formerly GEOG 3240) explains the geographical dimensions of Canada, past and present, in terms of spatial origins and processes of geographical change in the population, economy and landscape of the country. Themes will include: changing perceptions of the environment; the historical demography of immigration and initial settlement; the reconstruction of past regional geographies; the sequent occupation of particular regions; the human alteration of the natural landscape.

CR: the former GEOG 3240

PR: GEOG 2001 and at least one of GEOG 2290, 3000, 3010, 3610, 3620, 3800; or 12 credit hours in core courses for the Major in Canadian Studies. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4650 Conservation in Biology and Geography (same as Biology 4650) is an examination of how biological and geographical principles can be applied to conserving biological diversity in the natural world under conditions of exploitation and habitat loss. Special emphasis will be given to relevant provincial examples.

CR: Biology 4650

OR: 3 hours of seminar/discussion group per week

PR: 30 credit hours in either Biology or Geography and permission of the course co-ordinator. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4700 Seminar in Advanced Urban Geography will provide senior students with the opportunity to immerse themselves in the analysis of a small number of problems related to contemporary urban structure and growth.

PR: GEOG 3701. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4900-4918 Special Topics in Geography will have topics to be offered announced by the Department of Geography.

PR: permission of the instructor and the Head of the Department of Geography. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4919 Integrative Practicum in Geographic Information Sciences is an applied or research project integrating aspects of cartography, geographical information systems and remote sensing. Students will have access to the GISciences Research Laboratory to complete their project. This is the capstone course for the students registered in the Diploma in Geographic Information Sciences program. It will involve the knowledge and experiences acquired over the years in the program.

CO: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences

LH: six hours per week or a total of 72 hours of individual research or laboratory work

OR: six hours per week or a total of 72 hours of individual research or laboratory work

PR: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4990 Nature of Geography is an examination of the major philosophical issues in the nature of geography and recent changes in geographical method. Particular emphasis will be placed on the implications of the quantitative, systems, behavioural and ecological approaches in geography, the use of models, the place of theory and the study of process in geography.

PR: primarily intended for Honours students. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

4999 Dissertation Honours Degree is required of the Honours degree.

PR: It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses. Admission to the Honours program.

10.14 German

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

The Department offers several courses in Germany during the Spring/Summer semester. See the Departmental web page at www.mun.ca/german for details on the German Field School.

German courses are designated by GERM.

1000 Elementary German I is intended to give beginners a basic knowledge of the spoken and written language and culture of the German-speaking countries.

CR: GERM 1002

1001 Elementary German II is a continuation of Elementary German I with the same basic text.

CR: GERM 1003

PR: GERM 1000

1002 Elementary Business German I is a course intended to give beginners a basic knowledge of spoken and written German with an emphasis on developing skills pertinent to business and commerce.

CR: GERM 1000

1003 Elementary Business German II - inactive course.

2010 Intermediate German I is a completion of the fundamentals of the German language, with a continued strong cultural component.

PR: GERM 1000 and GERM 1001 or equivalent

2011 Intermediate German II is a grammar review and introduction to literature.

PR: GERM 2010 or consent of the Head of the Department

2012 German Reading and Aural Comprehension for Business and Commerce - inactive course.

2030 Reading German I - inactive course.

2031 Reading German II - inactive course.

2510 Intermediate Composition and Conversation I - inactive course.

2511 Intermediate Composition and Conversation II is a continuation of Intermediate Composition and Conversation I.

OR: includes a 4- week field school in Germany in August, which lengthens the time frame for the course by approximately two weeks

PR: GERM 1001 and consent of the Head of the Department

2900 Introduction to German Culture I is a study of the major cultural trends and movements of German-speaking Europe to the beginnings of the modern age. Lectures are given in English. This course qualifies as a research/writing course.

2901 Introduction to German Culture II is a study of the major cultural trends and movements of German-speaking Europe in the modern age. Lectures are given in English. This course qualifies as a research/writing course.

2910 Myths of the North is a study of the major myths of the Celtic and Germanic peoples as embodied in the literary and artistic remains of the early history of Northern Europe, and of the influence of these myths on later art and literature. Lectures and readings in English.

3000 German Film I is a survey of German film from the beginnings to 1945.

3001 German Film II is a survey of West German film from 1945 to 1990.

3002 Post-Wall Cinema is a study of German cinema from 1990 to the present. It addresses a number of issues that are clearly identified with a post-Wall, unified Germany, such as German unification itself, the new German comedy of the 1990's, the transnationalization of German cinema, the treatment of the Nazi and the Communist past, the rediscovery of the social as a narrative focus, and on the evolving cinematographic directions taken by contemporary German film. The movies are subtitled and lectures and readings are in English.

3003 DEFA The Cinema of East Germany is an examination of East German cinema through its feature films addressing issues in the context of Germany's divided status and its split screen from 1946 to 1990.

3004-3009 Special Topics in German Studies I will have topics to be studied announced by the Department.

3005 West to East: Aspects of the German Intellectual Influence on

Russia (same as History 3005 and Russian 3005) examines the fluidity of ideas across geo-political borders, languages and cultures, by exploring how the German intellectual discourse was received and reinterpreted by Russians in their literary, artistic and cultural dialogue. Ideas about the Romantic Hero become conflated with theories involving the Will, the Nietzschean Superman and the Proletarian Revolutionary, personified and embodied in what some scholars characterize as political/cultural Gods (Lenin, Stalin, Hitler).

CR: History 3005, Russian 3005

3010 Advanced German I aims at a high level of accomplishment in German pronunciation, composition and translation through practice in the spoken language, written exercises and the reading of more advanced literary material.

PR: GERM 3010 or consent of the Head of the Department

3011 Advanced German II is a continuation of Advanced German I.

PR: GERM 3010 or consent of the Head of the Department

3510 Advanced Composition and Culture aims to increase accuracy and fluency in written and spoken German with emphasis on culture.

OR: includes a 4- week field school in Germany in August, which lengthens the time frame for the course by approximately two weeks

PR: GERM 1001 and consent of the Head of the Department

3511 Advanced Composition and Conversation aims to increase accuracy and fluency in written and spoken German with emphasis on grammar review.

OR: includes a four week field school in Germany in August, which lengthens the time frame for the course by approximately two weeks

PR: GERM 1001 and consent of the Head of the Department

3900 Survey of German Literature I is a study of the chief periods of German literature based on works of representative authors. A general survey from the earliest works to 1805.

PR: GERM 2011 or the consent of the Head of Department

3901 Survey of German Literature II is a study of the chief periods of German literature based on works of representative authors. A general survey from 1805 to the present.

PR: GERM 2011 or the consent of the Head of Department

3902 Business Culture in the German-Speaking World familiarizes students for a work-term or internship in a German speaking environment. It covers business practices and culture in addition to business etiquette and protocols.

PR: GERM 2012 or the consent of the Head of Department

3911 Faust and the Magus Tradition is a study of the legend of Faust's pact with the devil from the Middle Ages to the present in art, music and literature, and its influence on various cultures in both Europe and America. Lectures and readings in English.

3912 Modern German Literature in Translation I (Pre-1945) is a study of the works of some major modern German authors. Lectures and readings in English.

3913 Modern German Literature in Translation II (Post-1945) is a study of the works of some major modern German authors. Lectures and readings in English.

3914 German Women Writers in English Translation studies representative works by prominent German, Austrian, and Swiss women writers from the 19th century to the present day, their place in German literary history, and the impact of their individual voices.

PR: the former Women's Studies 2000 or permission of the Department Head

3915 National Socialist Ideology and Culture examines German culture within the context of National Socialist era. Special attention will be focussed on how language, art and literature were used in National Socialist propaganda.

4000 German Literature of the Eighteenth Century I is a study of the historical and cultural background of the eighteenth century, of Enlightenment and Storm and Stress. Reading and discussion of representative works with emphasis on Lessing, Goethe and Schiller. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

4001 German Literature of the Eighteenth Century II is a study of the historical and cultural background of the eighteenth century, of Storm and Stress and Classicism. Reading and discussion of representative works with emphasis on Goethe and Schiller. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

4010 Advanced Stylistics I is specialized study of the more complex areas of German grammar, style, and idiomatic usage, involving intensive practice in composition and oral expression, and focussed on detailed work with contemporary cultural materials such as newspapers, television, and film. This course is taught in German.

PR: GERM 3011 or the consent of the Head of Department

4011 Advanced Stylistics II is a continuation of Advanced Stylistics I. This course is taught in German.

PR: GERM 4010 or consent of the Head of the Department.

4100 German Literature of the 19th Century I is a study of the leading exponents of nineteenth-century literature, including the background of Romanticism and the young Germany movement. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

4101 German Literature of the 19th Century II is a study of the leading exponents of nineteenth-century literature, including the background of Poetic Realism and Naturalism. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

4200 German Literature of the Twentieth Century I traces the important literary movements up to 1945, using a number of representative authors. Reading of selected dramas, novels, poems and short stories. This course is taught in German.

PR: GERM 3011 or the consent of the Head of Department

4201 German Literature of the Twentieth Century II traces the important post 1945 literary movements, using a number of representative authors. Reading of selected dramas, novels, poems and short stories. This course is taught in German.

PR: GERM 3011 or the consent of the Head of Department

4300 Middle High German Language and Literature I is an introduction to the German language, literature and culture of the eleventh to fifteenth centuries: historical linguistics, Middle High German grammar and the court epic.

PR: one of German 2011, 2511, 3011 or the consent of the Head of Department

4301 Middle High German Language and Literature II - inactive course.

4400 Early Modern German Literature I is reading, interpretation and critical analysis of representative works of German literature written in the Age of Reformation and the early Baroque period.

PR: one of German 2011, 2511, 3011 or the consent of the Head of Department

4401 Early Modern German Literature II - inactive course.

4802-4825 Special Topics in German Studies II will have topics to be studied announced by the Department.

4998 Comprehensive Examination for Honours Students is the comprehensive examination required for honours students.

4999 Honours Essay for Honours Students is required as part of the Honours program.

PR: admission to the Honours program

10.14.1 Russian

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

The Department offers several courses in Russian during the Spring/Summer Semester. See the Departmental web page at www.mun.ca/german/russian/course_descriptions.php for details on the Russian Summer Program.

Russian courses are designated by RUSS.

1000 Elementary Russian I is a course intended to give beginners the fundamentals of Russian grammar and a basic knowledge of the spoken and written language.

1001 Elementary Russian II is a continuation of Elementary Russian I with the same basic text and a reader.

PR: RUSS 1000 or equivalent

2010 Intermediate Russian I continues the linguistic study begun in the first year and to introduce students to Russian texts from literature or newspapers.

PR: RUSS 1000 and 1001 or equivalent

2011 Intermediate Russian II is a continuation of Intermediate Russian I.

PR: RUSS 1000 and 1001 or equivalent

2030 Russian for Reading I - inactive course.

2031 Russian for Reading II - inactive course.

2510 Intermediate Composition and Conversation I increases fluency in speaking and writing Russian.

2511 Intermediate Composition and Conversation II is a continuation of RUSS 2510.

2600 Russian Literature in Translation: Nineteenth Century is a study of selected works of Russian authors including Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoyevsky, Chekhov. This course qualifies as a Research/Writing course.

UL: may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language

2601 Russian Literature in Translation: Twentieth Century is a study of selected works of Russian authors of the pre-revolutionary, Soviet and post-Soviet periods. This course qualifies as a Research/Writing course.

UL: may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language

2900 Russian Culture I is a study of the evolution of Russian culture and Russian intellectual history until 1917. Lectures regularly supplemented by examples of Russian art, music and film. Lectures are given in English. This course qualifies as a Research/Writing course.

UL: may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language

2901 Russian Culture II is a study of the evolution of culture in the USSR and during the post-Soviet period. Insights into the social and political character of pre- and post-revolutionary Russia. Lectures regularly supplemented by examples of Russian art, music and film. Lectures are given in English. This course qualifies as a Research/Writing course.

UL: may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language

3000-3009 (Excluding 3005) Special Topics in Russian Studies will have topics to be studied announced by the Department.

3005 West to East: Aspects of the German Intellectual Influence on Russia (same German 3005 and History 3005) examines the fluidity of ideas across geo-political borders, languages and cultures, by exploring how the German intellectual discourse was received and reinterpreted by Russians in their literary, artistic and cultural dialogue. Ideas about the Romantic Hero become conflated with theories involving the Will, the Nietzschean Superman and the Proletarian Revolutionary, personified and embodied in what some scholars characterize as political/cultural Gods (Lenin, Stalin, Hitler).

CR: German 3005, History 3005

UL: may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language

3010 Advanced Russian I is an advanced study of literary texts and grammar, composition and translation with practice in the spoken language. PR: RUSS 2010 and 2011

3011 Advanced Russian II is a continuation of Advanced Russian I with the reading and discussion of selected texts from Russian short stories, magazines and newspapers.

PR: RUSS 2010 and 2011

3023 Post-Soviet Russia: Media and Film examines visual media with attention paid to the embedded cultural discourse that can only be understood with references to Russian history, language, and cultural identity. Liberated from communist ideology following the collapse of the Soviet Union, Russian film-makers refused to construct a bright future. Instead they portrayed the reality surrounding them for the first time without ideological constraints. These explorations, in turn, will raise certain questions about visual media in post-Soviet society.

UL: may not be used as part of the Faculty of Arts requirement of 6 credit hours in a second language

3900 Survey of Russian Literature I - inactive course.

3901 Survey of Russian Literature II - inactive course.

3910 The Post-Soviet Era - inactive course.

4001-4010 Special Topics in Russian will have topics to be studied announced by the Department.

4100 Russian Literature of the Nineteenth Century I is a study of major Russian authors, including Pushkin, Lermontov, and Gogol.

PR: one of RUSS 2011, 2511, 3011, or permission of the Head of the Department

4101 Russian Literature of the Nineteenth Century II - inactive course.

4200 Russian Literature of the Twentieth Century I - inactive course.

4201 Russian Literature of the Twentieth Century II is a study of major Russian authors of the Soviet period including Sholokhov, Pasternak, Evushenko, and Solzhenitsyn.

PR: one of RUSS 2011, 2511, 3011, or permission of the Head of the Department

4800 Special Topics in Russian Studies I will have topics to be studied announced by the Department.

4801 Special Topics in Russian Studies II will have topics to be studied announced by the Department.

10.15 Greek

For Greek course descriptions see under Classics.

10.16 Greek and Roman Studies

For Greek and Roman Studies course descriptions see under Classics.

10.17 History

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

History courses are designated by HIST.

1009 Issues in Ancient and Medieval History will introduce students to the methodology of studying ancient and/or medieval history through a close examination of textual and material remains. The course will be taught around a particular theme and/or historical period each year. This course qualifies as a research and writing course.

CR: cannot receive credit for more than two first-year courses in History

1010 The North Atlantic in the Age of Expansion, 1492-1776 is a thematic examination of European imperial expansion into the North Atlantic and the Americas, starting with the discoveries of Columbus and concluding with American Independence. This course qualifies as a research/writing course.

CR: cannot receive credit for more than two first-year courses in History

1011 Europe and the Wider World, 1750-1914 is a thematic examination of the political, economic, social and cultural developments in Europe and the wider world from the French Revolution to World War I. This course qualifies as a research/writing course.

CR: cannot receive credit for more than two first-year courses in History

1012 The World in the Twentieth Century will examine some of the major themes in world history since 1914. This course qualifies as a research/writing course.

CR: cannot receive credit for more than two first-year courses in History

1013 Issues in Canadian History will examine the historical context for various contemporary problems being experienced by Canadians. This course qualifies as a research/writing course.

CR: cannot receive credit for more than two first-year courses in History

1014 Issues in United States History will examine several historical themes or problems in the history of the United States. This course qualifies as a research/writing course.

CR: cannot receive credit for more than two first-year courses in History

1015 Ideas and Society in the West introduces students to early modern western history (1500 - 1800) through the study of original texts. It will combine lectures on the historical background to the texts, discussion of them and analysis of their meanings in assigned essays. This course qualifies as a research/writing course.

CR: cannot receive credit for more than two first-year courses in History

1070 A History of Canada's Native Peoples - inactive course.

2020 Introduction to Ancient History (same as Classics 2025) is an introduction to the history of ancient city-states, kingdoms and empires, including economic, social, political and cultural developments.

CR: Classics 2025

2031 Ancient Asian History is a study of the history of ancient India, China, and Japan with emphasis on the way of life of the people, their customs, traditions, art and heritage.

2034 History of the Hellenistic World (same as Classics 2020) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.

CR: Classics 2020

2035 History of Classical Greece (same as Classics 2035) is a survey of Greek history from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century B.C.

CR: Classics 2035

2041 History of the Roman Republic same as Classics 2041) is a survey of Roman history from the early monarchy to the death of Julius Caesar, with special reference to the society and politics of the late Republican period.

CR: Classics 2041, the former Classics 2040, the former HIST 2040

2042 History of the Roman Empire (same as Classics 2042) is a survey of Roman history from the death of Julius Caesar to the rise of Constantine, with special reference to the society and politics of the early Imperial period.

CR: Classics 2042, the former Classics 2040, the former HIST 2040

2050 Introduction to the Medieval Middle East provides an introduction to the medieval Middle East (330-1453). Students will examine the Byzantine Empire, the Sasanian Empire, and the various Islamic Empires, as well as the minority groups living under these empires, including the Coptic, Armenian, and Syriac communities.

2110 North Atlantic History Since 1820 is a survey of the relations among the regions of the North Atlantic since 1820. Emphasis will be placed on social and economic history.

2130 Seafaring Places and Seafaring Peoples: An Introduction to Oceanic History 1650-1850 is a study of the places and people involved in maritime activities between Europe and Asia and in India, south-east Asia, China and Japan during the period of European expansion to the region.

2200 Canadian History to Confederation, 1867 is a survey of Canadian History to Confederation, 1867

2210 Canada Since 1867 is a survey of Canadian history since Confederation.

2300 Introduction to Modern European History, 1500-1789 is an introduction to the main issues and problems in early modern European history with an emphasis on the political, social, economic and cultural developments from the sixteenth to the eighteenth century.

2310 Europe in the Nineteenth Century, 1789-1914 is a survey of the economic, social, political and cultural developments of Europe from 1789-1914.

2320 Medieval Europe to 1050 (same as Medieval Studies 2001) is a survey of the economic, social, political and cultural developments of the early Middle Ages.

CR: Medieval Studies 2001, the former HIST 2030

2330 Medieval Europe, 1050 to the Reformation (same as Medieval Studies 2002) is a survey of the economic, social, political and cultural developments of Europe in the high and late Middle Ages.

CR: Medieval Studies 2002, the former HIST 2030

2340 European Urban History examines the development of urban networks and the growth of specific towns and cities in early modern and modern Europe. We will also study how these centres were perceived, and the roles of public spaces and public festivals. Much of this course is devoted to examining the conditions found in urban centres and the impact on local inhabitants. The course concludes with a study of nineteenth century urban boosterism.

PR: at least 3 credit hours in History

2350 Europe in the Twentieth Century (same as European Studies 2000, Political Science 2990, and the former Political Science 2350) examines social, economic, and political changes from 1918 to the present including the collapse of monarchies, the emergence of mass politics, fascism and totalitarianism, World War II, postwar reconstruction and the welfare state, European integration, and Europe in the postwar economic and political order. The course will examine Britain, France, Germany, and Italy, and particularly the European Union. Special attention will be paid to the demise of class politics and the impact of postwar affluence.

CR: European Studies 2000, Political Science 2990, the former Political Science 2350

2400 A History of Atlantic Canada Since 1500 is a history of the peoples and provinces of Atlantic Canada from the time of First European contact with First Nations.

CR: the former HIST 3100

2500 The Twentieth Century I is a study of the world-wide impact of the main events and developments in the age of global interdependence.

CR: the former HIST 3700

2510 The Twentieth Century II is an historical analysis of the main issues in the contemporary world since 1945.

CR: the former HIST 3710

2582 Principles of Historical Archaeology (same as Archaeology 2582) will introduce students to historical archaeology, with special reference to the North Atlantic, 1000 to 1900 AD. The archaeology of specific sites will be examined in order to raise issues about theory and method. Students will be introduced to palaeography; historic maps; documentary archaeology; the survey, excavation and analysis of complex sites; material culture and subsistence studies; cultural resource management and theoretical approaches including historical anthropology, ethnohistory, world systems and consumer studies.

CR: Archaeology 2582, the former Archaeology 3582, the former History 3530

PR: Archaeology 1030

2600 History of the United States of America to 1865 is a survey of the history of the United States of America from the origins of the independence movement to the Civil War.

CR: the former HIST 3230

2610 History of the United States of America Since 1865 is a survey of the history of the United States of America since the Civil War.

CR: the former HIST 3240

2665 Sickness and Health in Western Society examines changing understandings of disease causation and how the human body functions, the evolution of formal medical education, and the rise of medical institutions. Examples of fine art, literature, and popular culture will be integrated into lectures and seminars to help provide a comprehensive overview of what it has been like to be ill and well over the last three millennia.

2700 Art History Survey I (same as Visual Arts 2700) is the history of art from prehistoric times to the Renaissance.

CR: Visual Arts 2700

2701 Art History Survey II (same as Visual Arts 2701) is the history of art from the Renaissance to the twentieth century

CR: Visual Arts 2701

2760 An Introduction to Women's Gendered History provides an introduction to gender studies in history. This course examines women's experience in the Western past with a view to complexities sometimes missed. It takes the gendering of history as a means to explore the significance of historical understanding in the ways in which we come to know the world.

3000 Medieval Books (same as English 3002, Medieval Studies 3002, Religious Studies 3000) is an examination of the development and role of the manuscript book during the Middle Ages. Topics covered will include book production and dissemination; authors, scribes and audiences; and various kinds of books (e.g. glossed Bibles, anthologies, books of hours, etc.) and their uses.

CR: English 3002, Medieval Studies 3000, Religious Studies 3000

PR: Medieval Studies 2000, 2001 or 2002 or permission of the instructor

3005 West to East: Aspects of the German Intellectual Influence on Russia - inactive course.

3011-3019 Special Topics in Ancient and Medieval History are specialized studies in Ancient and Medieval history. Topics to be studied will be announced in the Department of History brochure.

CR: HIST 3803, HIST 3016

3020 Art, Architecture and Medieval Life is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.

PR: it is recommended, but not obligatory, that students should have successfully completed one of the following courses: the former Anthropology 2480, Folklore 1000 or 2000, HIST 2320, History 2330, Medieval Studies 2000, Medieval Studies 2001, Medieval Studies 2002

3030 Environmental History examines the history of human relationships to the natural environment. The focus of the course is the history of environmental changes caused by humans, the reciprocal influence of the natural environment on human cultures and societies. Case Studies will introduce patterns of ecological change associated with broad historical transformations such as colonialism, military conflict, the development of world economies, etc.

3050 History of Warfare to 1789 is a survey of major developments in the history of warfare from the earliest times to 1789 with particular emphasis on changes in the nature and conduct of warfare, the evolution of military thinking, the organization of military and naval forces, the impact of technological change, the emergence of professionalism and the relationship between societies and armed forces.

3060 History of Modern Warfare Since 1789 is an examination of those major developments which have affected the nature and conduct of warfare

in the period since 1789, with particular emphasis on the evolution of military thinking, the impact of technology on organization and planning, the role of air power, the civil-military relationship, professionalism in the armed forces, and the changing nature of warfare, the emergence of total war, global war, guerilla warfare, and limited warfare.

3110 History of Newfoundland to 1815 studies the growth of settlement and the manner in which a 'migratory' fishery carried on from England and Ireland changed into a 'sedentary' fishery carried on by residents of Newfoundland.

3120 Modern Newfoundland Since 1815 examines the establishment and development of political institutions, changes in economic structure and the growth of populations.

3130 History of French Canada Since 1791 - inactive course.

3140 Social History of the Canadian Worker to 1896 - inactive course.

3150 Social History of the Canadian Worker Since 1896 - inactive course.

3200 Women and the Law in Newfoundland History (same as Law and Society 3200) examines how legal reforms addressed or challenged the values of the community. Students will investigate the various ways in which Newfoundland women interacted with the law and on occasion found themselves before a magistrate.

CR: Law and Society 3200

3250 Migration History of North America - inactive course.

3270 Christianity and the Roman Empire - inactive course.

3330 France, 1750-1852 - inactive course.

3340 France Since 1852 - inactive course.

3350 Imperial Russia - inactive course.

3360 Revolutionary and Soviet Russia studies Russian history from the 1917 Revolutions to the emergence of the USSR as a superpower.

3370 German History I, to the Mid-Nineteenth Century - inactive course.

3380 German History II, Since the Mid-Nineteenth Century examines the history of German-speaking central Europe with special reference to the evolution of modern Germany since the mid-nineteenth century.

3440 History of the British Empire and Commonwealth Since 1815 examines the transition from British Empire to Commonwealth of Nations.

3450 Tudor and Stuart Britain, 1485-1714 examines the emergence of Britain under the Tudors and early Stuart monarchs.

3460 British History Since 1714 examines British history from the accession of the Hanoverians to the welfare state.

3480 History of Ireland, 1603 to the Great Famine is a survey of Irish history from Hugh O'Neill's submission to the English in 1603 to the mid-nineteenth century disaster of the Great Famine.

3490 History of Ireland Since the Great Famine is a survey of Irish history from the mid-nineteenth century to the present.

CR: the former HIST 3470

3515 Prehistory of Mesoamerica - inactive course.

3520 The Early Ethnohistory of North America's Native Peoples (same as Archaeology 3520) examines the North American native response to early European contact and initial settlement. Particular attention will be paid to cultural change resulting from the adoption of European goods, participation in the fur trade, the introduction of European disease, and the adaptation to a permanent European presence.

CR: Archaeology 3520

3525 The Later Ethnohistory of North America's Native Peoples (same as Archaeology 3525) examines Indian and Inuit cultural history of the eighteenth and nineteenth centuries, including the fur trade, resistance and accommodation to European expansion, the emergence of revitalization movements, demographic changes, and population shifts. Special emphasis will be placed on the ethnohistory of the native peoples of what is now Canada and northern United States.

CR: Archaeology 3525

3535 Historical Anthropology (same as Archaeology 3584 and the former Anthropology 3584) will explore selected issues in historical anthropology, with special reference to the Mediterranean and North Atlantic worlds. Students will read specific case studies in order to explore the theoretical issues raised by the attempt to understand historically-documented past cultures. In order to give practical examples of methodology classes will analyse primary source material. Students will be introduced to the textual analysis of myth and legal records, to the interpretation of images and to the analysis of patterns in material culture. The course will consider specific

current interpretive issues, particularly the rise of individualism, the consumer revolution and the cultural construction of gender.

CR: Archaeology 3584, the former Anthropology 3584

3540 History of China - inactive course.

3545 History of Modern Japan - inactive course.

3550 History of India - inactive course.

3555 Methods and Materials in Historical Archaeology (same as the former Archaeology 3555) is a combination lecture and laboratory course designed to acquaint students with the analysis of artifacts and other evidence from historical archaeological sites. It is ordinarily intended to follow Archaeology 3480, Field and Laboratory Techniques in Archaeology.

CR: the former Archaeology 3555

3560 A History of Human Rights - inactive course.

3570 The Modern Middle East - inactive course.

3580 South Africa Since 1815 - inactive course.

3585 Tropical Africa Since 1800 - inactive course.

3600 Industrial Revolutions of the Eighteenth and Nineteenth Centuries - inactive course.

3610 International Economic History of the Nineteenth and Twentieth Centuries - inactive course.

3620 Canadian Economic History to the End of the Nineteenth Century - inactive course.

3630 Canadian Economic History in the Twentieth Century - inactive course.

3650 Canadian Business History - inactive course.

3660 The Scientific Revolution examines the change from the Aristotelian-Ptolemaic to the Newtonian world view with special emphasis on the work of Copernicus, Kepler, Galileo, Descartes and Newton.

3665 History of Western Medicine introduces students to the major topics and themes with which historians of medicine are currently engaged. These include the nature of doctor-patient relationships, perceptions of the body, professionalization, patterns of disease, and the development of European public health movements. The course traces the practice of medicine from ancient Greece to the present although the primary focus will be on the period from the eighteenth to the early twentieth century.

PR: at least 3 credit hours in History at the 2000 level or above

3675 Navies and Societies Since 1650 - inactive course.

3680 North Atlantic Seafaring to 1850 examines the maritime mercantile development of the countries on the Atlantic littoral, 1650-1850.

3690 North Atlantic Seafaring from 1850 - inactive course.

3700 Art History: The Italian Renaissance - inactive course.

3701 Art History: The Renaissance Outside Italy (same as Visual Arts 3701) examines the Renaissance outside Italy from the late fourteenth century and the international style through the sixteenth century.

CR: Visual Arts 3701

3710-3729 Special Topics in British History are available only as part of the Harlow Campus Semester.

3740-3750 Studies in Modern Social and Intellectual History are selected studies in the history of modern ideas and society. Aspects to be studied will be announced in the History Department brochure.

3760 Women in Western Society and Culture I - inactive course.

3770 Women in Western Society and Culture II - inactive course.

3780 Women in Medieval Europe, 500-1500 - inactive course.

3785 The European Family: The Age of Faith to the Welfare State focuses on the family in Europe from the middle ages to the early twentieth century. Topics examined will include: family structure, kinship, demography, sexuality, gender relations, child-rearing, attitudes towards the elderly and care of them, and the place of the family in the larger community.

CO: at least 3 credit hours in history at the 2nd-year level, or permission of the instructors

PR: at least 3 credit hours in history at the 2nd-year level, or permission of the instructors

3790 Reel American History: United States History through its Films, 1895-1945 interprets narrative films as historical evidence to shed light on shifts in American culture and society during the first half of the twentieth century.

3795 Reel American History: United States History through its Films since WWII interprets narrative films as historical evidence to shed light on shifts in American culture and society during the second half of the twentieth century.

3800-3830 (Excluding 3822) Contemporary Problems in Historical Perspective is an analysis of developments leading to a contemporary issue or problem selected each year or semester. Aspects to be studied will be announced in the Department of History brochure.

CR: credit may not be obtained for only one of HIST 3803 and HIST 3016

3840 Historical Methods is an introduction to the methods and practices of history in the modern era. This course is compulsory for Majors and Honours students, including those intending to apply for graduate studies.

CR: the former HIST 4801

PR: 12 credit hours in History

3860 Vernacular Architecture same as Folklore 3860 and the former Anthropology 3860) is a historical survey of vernacular architectural forms in various regions of North America, with attention to Newfoundland materials. Issues discussed include the relationship of house form and culture, the concepts of antecedents, diffusion, innovation, and evolution of building forms and technologies, and the siting of buildings in the landscape. Dwelling houses, outbuildings, churches and industrial vernacular architecture will be included.

CR: Folklore 3860, the former Anthropology 3860

3870 An Introduction to the History of Western Architecture Since the Renaissance (same as Folklore 3870) introduces students to the history of architecture in the western world, beginning with the revival of classical forms in Renaissance Italy.

CR: Folklore 3870

3925 The Pre-Islamic Empires of Iran introduces students to the history of Iran from the rise of the Achaemenid Empire, through the Parthian and Sasanian Empires, to the advent of the Islamic era. Through the use of primary source material, students will be introduced to the types of historical sources available for Iran, the problems associated with this evidence, and the different ways that we construct ancient history.

3930 Byzantine History to 1453 will introduce students to the history of Byzantine society from its beginnings under Constantine to the fall of Constantinople to the Turks in 1453. In addition to the chronological history, students will also encounter several characteristics of Byzantine society, including religion, urbanization, and interaction with the Persian Empire.

3935 Islamic History to 1453 will introduce students to the history of Islamic society from its beginnings under Muhammad to the rise of the Ottomans and the fall of Constantinople in the fifteenth century. We will also discuss the non-Muslim communities which co-existed with the Muslim umma or community. Through the use of primary source material, students will be introduced to the types of historical sources available for Islamic history, as well as the problems associated with this evidence.

PR: there is no prerequisite for this course although History 2050 is strongly recommended

3999 Quantitative Approach in Historical Writing - inactive course.

4000-4010 Special Topics in Ancient and Medieval History are specialized studies in Ancient and Medieval history. Aspects to be studied will be announced in the Department of History brochure.

4100 History and Memory (same as Folklore 4100) is a course which recognizes that memory is not one of the natural parts of ourselves, nor is remembering a way of connecting with a single reference point in a social reality outside ourselves. These things are socially determined. Starting here, this course is designed to have students reflect on what they know about the past and how they know about it. The class will examine how individual and social memory works, concentrating on particular historical contexts.

CR: Folklore 4100, the former HIST 4569

4110-4130 Special Topics in North Atlantic History are specialized studies in the history of the North Atlantic. Aspects to be studied will be announced in the Department of History brochure.

4210-4229 (Excluding 4214) Special Topics in North American History are specialized studies in the history of North America. Aspects to be studied will be announced in the Department of History brochure.

4230 Special Topics in Newfoundland History I are specialized studies in the history of Newfoundland to the mid-nineteenth century.

4231 Special Topics in Newfoundland History II are specialized studies in the history of Newfoundland since the mid-nineteenth century.

CR: the former Political Science 4731

4232 Special Topics in Newfoundland History III - inactive course.

4240-4260 Special Topics in Canadian History are specialized studies in Canadian history. Aspects to be studied will be announced in the

Department of History brochure.

4310-4330 Special Topics in European History are specialized studies in the history of Europe. Aspects to be studied will be announced in the Department of History brochure.

4360-4380 Special Topics in European History are available only as part of the Harlow Campus Semester.

4410-4430 Historical Problems are specialized studies in historical problems. Aspects to be studied will be announced in the Department of History brochure.

4480 Oral History (same as Folklore 4480) is a seminar course which deals with the uses of oral sources, particularly those which have a traditional dimension, for the study of history. The uses of oral testimony in the study of traditional modes of life and work in social and political history will also be discussed.

CR: Folklore 4480

4520-4529 Special Topics in Economic and Mercantile History are specialized studies in Economic and Mercantile history. Aspects to be studied will be announced in the Department of History brochure.

4560-4570 (Excluding 4569) Special Topics in Social and Intellectual History are specialized studies in Social and Intellectual history. Aspects to be studied will be announced in the Department of History brochure.

4670-4690 Special Topics in Maritime History are specialized studies in Maritime history. Aspects to be studied will be announced in the Department of History brochure.

4695 The Middle Ages on Film will look at a variety of films set in the Middle Ages. This course will address questions such as how directors approach historical subject matter generally and the Middle Ages in particular; what subjects they choose, and how and why these change. This is a course not about film criticism, but about medievalism. This course will consist of viewing and discussion.

PR: it is recommended that students have completed one course in Medieval History or Medieval Studies

4730 Art History: Modern Art I Precursors to Modernism (same as Visual Arts 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.

CR: Visual Arts 4730

PR: 6 credit hours in Art History or permission of the Chair of the Visual Arts Program

4731 Art History: Modern Art II Early Modernism (same as Visual Arts 4731) is an examination of the various cultural and social forces between 1850 and 1914 which shaped the rise of the Modern movement.

CR: Visual Arts 4731

PR: 6 credit hours in Art History or permission of the Chair of the Visual Arts Program

4800 Historiography is an introduction to the major historians and historiographical traditions of the West. This course is for Honours students and other selected students, including those intending to apply for graduate studies.

PR: permission of the Head of Department

4810 Documents Management (same as Folklore 4810) is an introduction to the management of records and documents, both official and private.

CR: Folklore 4810

4821 Reading Course is a directed reading course for Honours and selected students including those intending to apply for graduate studies. Readings will be taken from a list of works by historians, or social theorists whose works are related to history.

PR: permission of the Head of Department

4822 Reading Course is a directed reading course for Honours and selected students. The readings will be chosen in such a way as to supplement a student's knowledge of his/her area of specialization and, where appropriate, to prepare the student for the honours essay. If a student intends to complete HIST 4999, a proposal for the honours essay will be a requirement of the course.

CR: the former HIST 4820

PR: permission of the Head of Department

4830-4850 Reading Courses are directed reading courses for selected Bachelor of Arts students.

PR: permission of the Head of Department or delegate

4999 Honours Essay is required as part of the Honours program.

PR: HIST 4822, admission to the Honours program

10.18 Italian

For Italian course descriptions see under French.

10.19 Law and Society

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Program Co-ordinator.

Law and Society courses are designated by LWSO.

1000 Law, Democracy and Social Justice examines the nature and aims of democracy and contemporary issues related to social justice through a law and society perspective.

2000 Law and Society in Canada is an introduction to law in Canadian society and the role which it has played in societies past and present.

PR: LWSO 1000

3010-3019 (Excluding 3012, 3013, 3014, 3015 and 3016) Special Topics in Law and Society will have topics to be studied announced by the Program Co-ordinator.

PR: LWSO 1000

3012 Aboriginal Peoples: Concepts of Land, the Law and the Constitution traces the historical development of Aboriginal land and resource rights; colonial and Canadian law; and the Constitution of Canada as it relates to the Indian, Inuit and Metis people of Canada. The developing concept of Aboriginal law is presented within the context of the treaty process, Indian Act, contemporary land claims, the Canadian Constitution, and federal/provincial relations.

PR: LWSO 1000. LWSO 2000 is recommended

3013 Resource Management and Collective Bargaining - inactive course.

3014 Aboriginal and Government Relations in Newfoundland and Labrador traces the historical development of Aboriginal and Government relations in Newfoundland and Labrador. Topics include: the current legal and constitutional status of the Inuit, Indian and Metis people within the context of land claims, application of the Indian Act, access to programs and services, and federal/provincial relations.

PR: LWSO 1000. LWSO 2000 is recommended.

3015 Women and Law in Canada looks at the interplay between law and status under the law, the course proceeds to look at some of the main legal issues affecting women today, such as workplace equality, family law and women and crime. This course provides students with the opportunity to study cases in depth and apply legal theory to current issues affecting Canadian women.

PR: LWSO 1000. LWSO 2000 is recommended.

3016 Western Traditions of Law and War provides students with a historical overview of the law of war. The course goes beyond the traditional legal definition of war as an armed conflict between states, and examines whether the law of war should be applied to terrorism and wars of national liberation. Topics include: just war theory, the legality of the various means of warfare, the treatment of protected people and places and the prosecution of war criminals.

PR: LWSO 1000

3200 Women and the Law in Newfoundland History (same as History 3200) examines how legal reforms addressed or challenged the values of the community. Students will investigate the various ways in which Newfoundland women interacted with the law and on occasion found themselves before a magistrate.

CR: History 3200

PR: LWSO 1000. LWSO 2000 is recommended.

3300 Understanding Human Rights introduces students to the theory and practice of human rights. Course topics include: history; philosophy; and international and Canadian structures and provisions. The course includes an examination of selected areas of human rights, i.e. labour, women's and children's rights, and explores current and future applications of human rights.

PR: LWSO 1000

3400 Organized Crime in Canada: National and Global Perspectives examines the origins, expansion, and changing character of organized crime in Canada from the early twentieth century to the present. Laws relating to criminal activity, law enforcement and available tools to combat organized crime are assessed according to the inherent problems of investigation, evidence, and litigation.

PR: LWSO 1000. LWSO 2000 is recommended.

4000 Multidisciplinary Perspectives on Law and Society is an appreciation and understanding of those rules and activities termed legal

which can be gained from a variety of disciplinary perspectives. The purpose of this seminar is to introduce students to the different ways in which law may be approached within the social sciences and humanities. The topic or topics to be discussed in a given semester will depend on the availability and participation of faculty from participating departments. Through seminar readings, discussions and research, students will gain a wider understanding of the role of law in society and of the diverse academic approaches for understanding it.

PR: LWSO 1000 and at least 15 credit hours in courses applicable to the Law and Society major or minor

4900 Development of Law in Newfoundland (same as History 4232 and the former History 4214) traces the evolution of the legal system of Newfoundland and Labrador from its earliest beginnings. Students are responsible for contributing to seminar discussions and presenting a research essay on some major themes that distinguish legal developments in Newfoundland and Labrador.

CR: History 4232, former History 4214

PR: LWSO 1000. LWSO 2000 is recommended.

4901-4909 Special Topics in Law and Society will have topics to be studied announced by the Program Co-ordinator.

PR: LWSO 1000

10.20 Latin

For Latin course descriptions see under Classics.

10.21 Linguistics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Linguistics courses are designated by LING.

1100 Language and Communication is a general and non-technical introduction to linguistic concepts which are important for understanding the nature of language, its change and its function for communication. Topics include: languages as structured systems; the systematicity of language change; the classification of languages into families and their geographical distribution; language, the brain, and language disorders; the acquisition of language; and human vs animal communication. (Intended for first-year students.)

CR: LING 2100

1103 Introduction to Morphology and Syntax is an introduction to the study of the meaningful components of words and sentences. This course will demonstrate the principles by which parts of words are organized into larger units (inflectional morphology and word-formation), and by which words pattern into phrases and sentences (syntax). Synchronic and diachronic data from English and several other languages will be analysed to illustrate how language is structured.

CR: LING 2103

1104 Introduction to Phonetics and Phonology is an introduction to the sounds of speech, their description (phonetics), organization (phonology), and interactions with morphology (morphophonology). The synchronic and diachronic patterns and regularities of language will be demonstrated through analysis of data selected from English and other languages.

CR: LING 2104

1105 The Wonder of Words is an introduction to the structure of words. This course presents methods of linguistic analysis through an in-depth study of English word origins. The French, Latin and Greek origins of technical and scientific words are studied, together with the ways that these words may change in structure, sound, and meaning. The course will also provide an introduction to etymology, to writing systems and transliteration, and to the use of dictionaries.

CR: credit may not be obtained for both LING 2105 and the former LING 1101, nor for both LING 1105 and LING 2105

1530 Reading and Writing in Innu-aimun I - inactive course.

1531 Reading and Writing in Innu-aimun II - inactive course.

2020 Introduction to the Structure of Inuttitut I - inactive course.

2021 Introduction to the Structure of Inuttitut II - inactive course.

2022 Issues in Oral Inuttitut reviews issues of oral Inuttitut. Topics included will be the primary role of oral language in communication, language, acquisition and language maintenance. The nature and significance of dialect differences will also be discussed. Different types of oral language will be examined, e.g. stories, newscasts, conversation. Students will study how oral language is used within modern Labrador

society and whether language attitudes are reflected in this use. Students will also consider how best to teach oral Inuittitut and different ways to test for oral proficiency. This course is intended for fluent speakers of Inuittitut who are planning to complete the Diploma in Native and Northern Education (T.E.P.L.). This course is not normally offered at the St. John's campus.

PR: LING 2020

2023 Reading and Writing in Inuittitut - inactive course.

2025 Introduction to Inuittitut I introduces students to Inuittitut (Eskimo). Students will develop a working knowledge of basic vocabulary and grammar, as well as a number of linguistic concepts that will enable them to consult a wide range of reference books. A strong emphasis will be placed on oral skills. This course is intended for students who want to learn an Aboriginal language spoken in Newfoundland and Labrador.

2026 Introduction to Inuittitut II is a continuation of LING 2025. Students will learn further vocabulary and grammar of the language. They will also be required to submit a project based on their own investigation of some aspect of the grammar of the language (based on either reference books or fieldwork). A strong emphasis will be placed on oral skills. This course is intended for students who want to learn an Aboriginal language spoken in Newfoundland and Labrador.

PR: LING 2025

2030 Introduction to Innu-aimun (Montagnais/Naskapi) I - inactive course.

2031 Introduction to Innu-aimun (Montagnais/Naskapi) II - inactive course.

2040 Introduction to Mi'kmaq I - inactive course.

2041 Introduction to Mi'kmaq II - inactive course.

2060 Aboriginal Languages of Eastern Canada is an overview of the aboriginal languages of three language families of Eastern Canada: Eskimo-Aleut (Inuittitut) and Algonquian (Innu-aimun, Mi'kmaq, Maliseet-Pasmaquoddy and Beothuk) and Iroquoian (Mohawk) with respect to both linguistic structure and current vitality. The history of language suppression and revitalization efforts, within the context of the larger issues of minority language attrition and maintenance. This course is intended for students who want to learn an Aboriginal language spoken in Newfoundland and Labrador.

2100 Language and Communication is a general and non-technical introduction to linguistic concepts which are important for understanding the nature of language, its change and its function for communication. Topics include: languages as structured systems; the systematicity of language change; the classification of languages into families and their geographical distribution; language, the brain, and language disorders; the acquisition of language; and human vs animal communication. This course may qualify as a Research/Writing course. Prior to registration a list of courses which may be used as a research/ writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: LING 1100

2103 Introduction to Morphology and Syntax is an introduction to the study of the meaningful components of words and sentences. This course will demonstrate the principles by which parts of words are organized into larger units (inflectional morphology and word-formation), and by which words pattern into phrases and sentences (syntax). Synchronic and diachronic data from English and several other languages will be analysed to illustrate how language is structured.

CR: LING 1103

2104 Introduction to Phonetics and Phonology is an introduction to the sounds of speech, their description (phonetics), organization (phonology), and interactions with morphology (morphophonology). The patterns and regularities of language will be demonstrated through analysis of synchronic and diachronic data selected from English and other languages.

CR: LING 1104

2105 The Wonder of Words is an introduction to the structure of words. This course presents methods of linguistic analysis through an in-depth study of English word origins. The French, Latin, and Greek origins of technical and scientific words are studied, together with the ways that these words may change in structure, sound, and meaning. The course will also provide an introduction to etymology, to writing systems and transliteration, and to the use of dictionaries.

CR: credit may not be obtained for both LING 2105 and the former LING 1101, nor for both LING 1105 and LING 2105

2210 Language in Newfoundland and Labrador: An Introduction to Linguistic Variation is a general, non-technical introduction to the languages of Newfoundland and Labrador. Topics covered include the concept of variation within language, both regional and social; the chief causes of such variation, and some of its societal and educational consequences; a survey of the regional and social dialects of Newfoundland English, and their major features; an overview of languages in the province

other than English, and their current situation. Note: This course may qualify as a Research/Writing course. Prior to registration a list of courses which may be used as a research/ writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2300 Philosophy of Language and Mind (same as Philosophy 2300) is a survey of philosophical thinking about human language and thought, and about how these phenomena relate to the rest of the natural world. Topics covered include the nature of language, the relations between thought and language, and the nature of consciousness.

CR: Philosophy 2300, the former Linguistics 2710, the former Philosophy 2710

2400 History of the English Language to 1500 - inactive course.

2401 History of the English Language from 1500 to Modern Times - inactive course.

2700-2720 (Excluding 2710) Special Topics in Linguistics is an introduction to Uncommonly Taught Languages including the following:

2700 Introduction to Irish Gaelic I is an introduction to Irish Gaelic I.

2701 Introduction to Irish Gaelic II is an introduction to Irish Gaelic II.

2702 Introduction to Japanese I is an introduction to Japanese I.

2703 Introduction to Japanese II is an introduction to Japanese II.

PR: LING 2702

2704 Introduction to Japanese III - inactive course.

2705 Introduction to Japanese IV - inactive course.

2706 Introduction to Japanese V - inactive course.

3000 Morphological Analysis studies the meaningful parts from which words are built by using restricted data from a variety of languages. Practical work on selected languages will illustrate the wide range of notions which acquire formal expression in grammatical systems. Although previous knowledge of the languages to be discussed is not necessary, an important aspect of the course will be practical experience in analysing phenomena which are foreign to English. Discussion of languages taught at this University will be balanced with analysis of limited data sets from more exotic languages. Comparison of the means by which smaller units are organized into words will make possible an elementary typology of the world's languages.

PR: LING 1103 or LING 2103

3100 Generative Syntax is an introduction to a major contemporary approach to syntactic theory. Topics include phrase structure and constituency, case theory and agreement, principles of thematic role assignment, parametric variation, and the different types of syntactic movement.

PR: LING 1103 or LING 2103

3104 Phonetics builds on the introduction to phonetics given in LING 1104 or LING 2104, and deals with the wide range of sounds that are used in human languages. On the practical side, the student will systematically learn to identify, symbolize and pronounce a large number of sounds. The theoretical work will concentrate on an understanding of the articulatory, acoustic and perceptual features of speech sounds. This involves the close examination of data from foreign languages chosen to illustrate the fact that languages differ widely in their selection and organization of speech sounds. It also involves study of selected regional differences in the pronunciation of English.

PR: LING 1104 or LING 2104

3105 Issues in the Acquisition of English and the Adult Learner - inactive course.

3150 Bilingualism: Linguistic, Cognitive and Educational Aspects - inactive course.

3155 Introduction to Language Acquisition will examine a number of critical issues in the first and second language acquisition of syntax and phonology. Current generative approaches to first and second language acquisition will be covered, which will be exemplified with data from different languages. An introduction to phonological and syntactic speech disorders will also be offered.

PR: LING 1103 or LING 2103 and LING 1104 or LING 2104

3201 Generative Phonology will present the basic terms, concepts, and methods of Generative Phonology. Theoretical constructs surveyed will include distinctive feature theory and syllable structure. These constructs will be exemplified using phenomena observed in natural languages, including allophony, allomorphy, and processes such as assimilation and neutralization.

PR: LING 1104 or LING 2104

3210 Language Variation and Change will provide a thorough grounding in the methods and theory underlying current approaches to language variation

and change.

PR: LING 2210, or third-year standing, or permission of the instructor

3212 Language and Gender is an introduction to research and critical thinking on the relationship of language and gender to culture, power, construction of identity, performance, interaction, social networks, language change, sexuality, and language in the school and workplace.

PR: LING 2210 or Gender Studies 1000

3220 Linguistics and Law - inactive course.

3302 History of the French Language (same as French 3302) is a study of the origins of French, including the influence of Gaulish, Vulgar Latin, Frankish and the langue d'oc/langue d'oïl division, a survey of the dialects, morphology and syntax of Old French and of the evolution from Old to Middle French, including phonology, morphology, syntax and vocabulary.

CR: French 3302

PR: French 2101 (or 2160) and 2300; Classics 1120 is strongly recommended

3310 Phonology and Morphology of French (same as French 3310) is an examination of the phonological and morphological structure of French. Data from regional and non-standard varieties contrasted with data from standard French: formal rules to deal with observed regularities. Interactions of phonology and morphology in phenomena such as liaison. Derivational and inflectional morphology. Research articles on one or more of the topics dealt with in the course will be assigned as readings, and a written report in French based on one or more of the articles is to be submitted as part of the term work. This course will normally be taught in French.

CR: French 3310

PR: French 2300 or permission of the instructor. Students who have not completed French 2300 are strongly advised to complete at least 3 credit hours in French courses at the 2000 level before attempting LING 3310.

3311 Introduction to General Linguistics: Aspects of French Linguistic Theory (same as French 3311) is a practical examination of the French verbal system, with a thorough exposition of the systems of aspect, voice, tense and mood. The fundamental concepts of linguistics will form the framework of this exposition: the langue/parole distinction and its relationship to underlying and surface entities; language as activity and the generation of surface elements from underlying subsystems. This course will normally be taught in French.

CR: French 3311

PR: a course in Linguistics or French 2100 or 2159

3500 Historical Linguistics will focus on: Genetic relationships between languages; the comparative method; language change found in phonetics/phonology, morphology and syntax; lexical and semantic change; the role of language and dialect contact; comparative and internal reconstruction; the typological and genetic classification of languages.

PR: LING 1103 or LING 2103 and LING 1104 or LING 2104

3850 Semantics is an introduction to the study of linguistic meaning. Word and sentence-level semantics, grammatical meaning, pragmatics, and logical aspects of meaning.

PR: LING 1103 or LING 2103 is required; LING 3000 and 3100 are recommended

3950-3960 (Excluding 3951) Special Topics in Linguistics will have topics to be studied announced by the Department.

3951 Language Endangerment and Revitalization provides an introduction to the key issues surrounding the discussion of endangered languages. Causes, consequences, and efforts to reverse the process of decline (language revitalization or maintenance) are examined through consideration of case studies from around the world. Theoretical models developed to evaluate the current status and future prospects of endangered languages are also considered. The course is likely to include substantial discussion of the situation in Canada and the USA.

PR: LING 1100 or 2100

4010-4091 will focus on the linguistic structure of certain languages, and are designed to provide senior students with the opportunity of being exposed to a substantial part of the grammar of a language other than those regularly offered in the Faculty of Arts. One course in this series will be offered each year, subject to availability of instructor.

PR: LING 1103 or LING 2103 and LING 1104 or LING 2104 or the permission of the instructor and the Head of the Department.

4050-4054 Linguistic Structure of a North American Aboriginal Language could study the following languages: Cree, Inuitit (Inuktitut), Innu-aimun (Montagnais/Naskapi), etc.

CR: Except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the LING 4050-4054 series. Students may not obtain credit for any of the previously offered LING 4010, 4020, 4021, 4030, 4031, 4040, 4041 in addition to a course in the LING 4050-4054 series.

PR: LING 1103 or LING 2103 and LING 1104 or LING 2104 or the permission of the instructor and the Head of the Department.

4055-4059 Linguistic Structure of an Uncommonly Taught Language could study the following languages: Fijian, Modern Arabic, Classical and Vedic Sanskrit, or other exotic languages.

CR: Except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the LING 4055-4059 series. Students may not obtain credit for any of the previously offered LING 4011, 4060, 4061, 4065, 4066, 4070, 4071, 4080, 4081, 4090, and 4091 in addition to a course in the LING 4055-4059 series.

PR: LING 1103 or LING 2103 and LING 1104 or LING 2104 or the permission of the instructor and the Head of the Department.

4100 Morphosyntactic Analysis is an analysis of a wide range of linguistic data in morphology and syntax. The course will focus on essential linguistic concepts in more than one theoretical framework, and on the nature of linguistic evidence. This course is usually offered in alternate years.

CR: the former LING 4001

PR: LING 3000

4110 Selected Topics in Generative Grammar examines a particular topic or set of related topics which are selected by the instructor and which are important in contemporary generative theory. Readings will normally come from the primary literature. This course is usually offered in alternate years.

PR: LING 3100

4150 Language Acquisition II provides an evaluation of the theoretical aspects of first and second language acquisition. Theories about the role of linguistic principles, learnability and the role of linguistic input are discussed, in light of research on the acquisition of English and other languages.

PR: LING 3155

4151 Advanced Topics in Phonological Acquisition will address current empirical and theoretical issues pertaining to the first language acquisition of phonology. From an empirical perspective, we will look at developmental patterns as well as variation or lack thereof among and between learners, within and across languages. From a theoretical perspective, we will address how theoretical frameworks can, and at times cannot, account for the variation observed. Taking a universalist approach as a starting point, we will address how the language input provided by different languages can influence the learner's analysis of the phonology of this language during the course of acquisition. This influence will be both addressed in terms of grammatical learning and from the perspective of production patterns observed in the data.

PR: LING 4150

4201 Phonological Theory will familiarize students with current issues in phonological theory. Issues such as phonology in the lexicon, segmental and prosodic representations, the analysis of stress and tonal systems, as well as a comprehensive introduction to constraint-based approaches to phonology will be covered. Students will further develop their ability to analyse phonological data. This course is usually offered in alternate years.

PR: LING 3201

4202 Selected Topics in Generative Phonology examines a particular topic or set of related topics which are selected by the instructor and which are important in contemporary generative phonology. Readings will normally come from the primary literature. This course is usually offered in alternate years.

PR: LING 3201

4210 Sociolinguistics studies the detailed patterns of variation found in any given speech community, and factors which co-vary with them; the various theoretical models proposed to account for such variability. As their major assignment, students will complete a carefully restricted sociolinguistic project. This course is usually offered in alternate years.

PR: LING 2210

4301 French Dialects, Patois and Argots - inactive course.

4310 The French Language in Canada - inactive course.

4350 General Romance Linguistics - inactive course.

4400 Historical and Comparative Linguistics - inactive course.

4403 Etymology: History of English Words - inactive course.

4420 English Dialectology I - inactive course.

4421 English Dialectology II - inactive course.

4500 Introduction to Field Methods is data collection and organization for an unfamiliar language in a simulated field situation, including methods of elicitation, data filing, preliminary analysis, and hypothesis formation and testing. In this course students will also learn to apply analytical skills developed in the core theoretical areas of phonetics/phonology, morphology, syntax and semantics. This course is usually offered in alternate years.

PR: LING 3000 or 3100, and 3201 or permission of the instructor

4700 Experimental Phonetics examines some empirical methods of studying the different stages of 'the speech chain' which links speaker to

hearer, with special emphasis on the acoustic and perceptual stages. The source-plus-filter theory of speech production. A survey of the range of natural articulations and their acoustic effects. Some competing theories of speech perception. Acoustic versus perceptual bases for phonological features.

PR: LING 1104 or 2104

4750 Selected Topics in Phonology will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 4201 or LING 4202

4751 Selected Topics in Morpho-Syntax will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 4100 or LING 4110

4752 Selected Topics in Semantics will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 3850

4753 Selected Topics in Acquisition will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 4150 or LING 4151

4754 Selected Topics in Linguistic Variation will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 4210

4900-4901 Independent Study are courses that are open to advanced students wishing to do individual research in consultation with an advisor.

PR: permission of instructor

4950-4960 Special Topics in Linguistics will have topics to be studied announced by the Department.

PR: permission of the instructor

4999 Honours Essay is required as part of the honours program.

10.22 Medieval Studies

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Medieval Studies courses are designated by MST.

2000 The Cultural Legacy of the Middle Ages will survey the formative cultures of the Middle Ages - Latin, Celtic, Arabic - as well as the rise of the new vernacular cultures, Germanic and Romance. Literary trends such as the reliance on authority, the emergence of national epic and the development of court literature will be studied. The course examines the interplay of all the arts - literature, music, art and architecture.

2001 Medieval Europe to 1050 (same as History 2320) is a survey of the economic, social, political and cultural developments of the early Middle Ages.

CR: History 2320

2002 Medieval Europe, 1050 to the Reformation (same as History 2330) is a survey of the economic, social, political and cultural developments of Europe in the high and late Middle Ages.

CR: History 2330

3000 Medieval Books (same as English 3002, History 3000, Religious Studies 3000) is an examination of the development and role of the manuscript book during the Middle Ages. Topics covered will include book production and dissemination; authors, scribes and audiences; and various kinds of books (e.g. glossed Bibles, anthologies, books of hours, etc.) and their uses.

CR: English 3002, History 3000, Religious Studies 3000

PR: MST 2000, 2001 or 2002 or permission of the instructor

UL: this course may be substituted for a Greek and Roman Studies course in both the Classics degree programs (Honours, Joint Honours and general degree) and the Greek and Roman Studies degree programs (Honours, Joint Honours and general degree)

3001 Art, Architecture and Medieval Life (same as Archaeology 3001, Folklore 3001, History 3020) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. The course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.

CR: Archaeology 3001, Folklore 3001, History 3020

PR: MST 2000, 2001 or 2002 or permission of the instructor. It is recommended, but not obligatory, that students should have successfully completed one of the following courses: Archaeology 2480, Folklore 1000 or 2000, History 2320, History 2330, MST 2000, MST 2001, MST 2002

3002 Folklore in Medieval Society - inactive course.

3003 Christian Thought in the Middle Ages (same as Religious Studies 3560) is a study of the development of Christianity in the West from the eleventh century to the eve of the Reformation, through an examination of its principal thinkers and the most significant societal forces and events: the crusades, the universities, monasticism, religious dissent, and mysticism.

CR: Religious Studies 3560

3004 Medieval Philosophy (same as Philosophy 3760) is developments in Philosophy from Augustine to Ockham.

CR: Philosophy 3760

3006 Women Writers of the Middle Ages (same as English 3006, Gender Studies 3001, and the former Women's Studies 3001) will study selections from the considerable corpus of women's writings in the Medieval period, as well as issues which affected women's writing. All selections will be read in English translation.

CR: English 3006, the former MST 3351, Gender Studies 3001, the former Women's Studies 3001

3710-3729 Special Topics in Medieval Studies is available only as part of the Harlow Campus Semester.

4000-4020 Special Topics in Medieval Studies are seminars on such general, interdisciplinary or comparative subjects as, e.g., Popular Culture in the Middle Ages, The Medieval Stage, The Medieval Court, The Religious Orders, Women in Medieval Society, Medieval Universities, Scholasticism, Dante's *Divine Comedy*, Medieval Historiography, Arthurian Romance, Jewish Medieval Communities, Muslim Art and Architecture and The Byzantine World.

PR: MST 3000 or 3001 or permission of the instructor

4021 Medieval Latin (same as Classics 4202)

CR: Classics 4202

10.23 Philosophy

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Philosophy courses are designated by PHIL.

1000 Philosophy of Human Nature is an approach to philosophical thinking by way of analysis and critique of theories of human nature, classical and modern, and the world views associated with them. Philosophy 1000, or the former Philosophy 1600, is not required for further courses in philosophy but is of particular value to students interested in the Social Sciences and Humanities. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 1001, the former PHIL 1600

1100 Critical Thinking aims to impart critical analytic skills: i.e., the ability to recognize good and bad arguments, to explain why a particular argument is good or bad, and a general understanding of why a good argument ought to persuade and a bad argument ought not to persuade.

CR: the former PHIL 1003

1200 Introduction to Philosophy is a general introduction to the study of Philosophy both as a contemporary intellectual discipline and as a body of knowledge. The course covers the main divisions, fundamental questions and essential terminology of Philosophy through a reading of classical texts. It is a prerequisite for courses at the 3000 level or above in Philosophy programs. It is intended for students in first year who have completed one semester of university education. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2200

2000 Introduction to Metaphysics is an introduction to the systematic inquiry into the nature of reality. Topic may include the nature of being, time, the question of God, appearance and reality, the one and the many, mind and matter, essence and existence.

2210 Logic is an introduction to traditional and modern logic. Open in any year to all students wishing acquaintance with basic logical skills.

2220 Epistemology examines various concepts of knowledge - empirical, rational, transcendental, systematic. Their metaphysical grounds and implications. The concept of scientific knowledge; real and abstract entities; objectivity and subjectivity.

2230 Moral Philosophy examines the sources and validity of ethical principles which underlie individual and social action.

2300 Philosophy of Language and Mind (same as Linguistics 2300 and the former Linguistics 2710) is a survey of philosophical thinking about human language and thought, and about how these phenomena relate to the rest of the natural world. Topics covered include the nature of language, the relations between thought and language, and the nature of consciousness.

CR: Linguistics 2300, the former Linguistics 2710, the former PHIL 2710

2400 Introduction to Philosophy of Law employs historical and contemporary sources to explore major traditions and concepts in the philosophy of law. Topics covered include natural law, legal positivism, the nature of legal interpretation, the relationship between law and morality, and the concepts of rights, responsibility, and justice.

2500-2550 Contemporary Issues discusses the philosophical dimensions of an area of practical concern such as contemporary culture, professional ethics, leisure, education, the mass media, gender, war and human rights. Some sections of this series may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2541 Philosophy and Western Spirituality will examine Western theories and practices of soul-care which parallel and resonate with Eastern approaches. We will learn what is distinctive to Western approaches with selections from Socrates, Jesus, Paul, Plotinus, Augustine, Eckhart, Alchemy, Freud, Jung and Foucault. Students will not only gain knowledge of this lost road in Western culture, but also an understanding of themselves. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2551 Health Ethics examines concepts of health and illness and their ethical implications. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2803

2552 Mental Health Ethics examines concepts of mental health and illness and their ethical implications. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2802

2553 Biomedical Ethics examines medical dilemmas from legal and ethical points of view. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2807

2561 Environmental Ethics examines concepts of nature and their ethical implications. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2809

2571 Technology examines concepts of technology and their ethical implications. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2801

2581 Philosophy of Film introduces some of the central philosophers, topics and themes in the philosophy of film. Topics and themes include: the nature of film image, the relationship between film and "reality", the social/political role and function of film and the nature and value of the documentary. The course will also consider the representation of broader philosophical ideas in film. A film or films will accompany each section. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2582 Media Ethics examines ethical issues and dilemmas arising in the realm of the mass media, within the context of foundational ethical theories and major philosophies of mass communication. Topics include the nature

and structure of mass communication, the public sphere, and the role of the media in a functioning democracy. Subtopics include: propaganda, censorship, freedom of speech, and access to information and communication. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2591 Restorative Justice explores the phenomenon of violence. When we understand violence, the need for justice quickly comes into view. With this need, however, comes a complex mixture of personal and political affairs. Justice can be retaliatory or restorative. The meaning and consequences of each kind of approach to justice will be traced through selected ancient and contemporary authors. Some sections of this course may qualify as a Research/Writing course for the B.A. **Core Requirements**. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

CR: the former PHIL 2810

2701 History of Ancient Philosophy (same as Classics 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Classics 2701

2702 History of Modern Philosophy is a survey of the development of Western philosophy since the 17th century.

CR: the former PHIL 3700, the former PHIL 3701

3110 Intermediate Logic examines techniques and topics in the logic of propositions, of predicates and of induction and probability. Normally the second course in logic.

PR: PHIL 1200 and PHIL 2210 or permission of the Department

10.23.1 Philosophy of...Series

3120 Philosophy of Language investigates various uses of language and its relationship to thought, as well as particular features of language, such as meaning, synonymy, reference, translation and interpretation.

PR: PHIL 1200 or permission of the Department

3150 Philosophy of the Natural Sciences examines major issues in the origins, methods and philosophical implications of science. Science as a form of knowledge; its relation to metaphysics; to more general theories of knowledge. Science and values.

PR: PHIL 1200 or permission of the Department

3160 Hermeneutics, Semiotics and Deconstruction will examine methodological foundations of psychology, cognitive science and the social sciences, Philosophical presuppositions and implications of these approaches to human nature.

PR: PHIL 1200 or permission of the Department

3400 Political Philosophy examines leading philosophical ideas concerning the origin and justification of political institutions.

PR: PHIL 1200 or permission of the Department

3500 Philosophy of Religion (same as Religious Studies 3500) examines the philosophical aspects of religious belief, religious language and theology.

CR: Religious Studies 3500

PR: PHIL 1200 or permission of the Department

3940 Existentialism examines the philosophy and literature of Existentialism from Kierkegaard, Nietzsche, Dostoevsky to Sartre, de Beauvoir and Camus.

CR: the former PHIL 3980

PR: PHIL 1200 or permission of the Department

3950 Recent Philosophy - inactive course.

10.23.6 4000-Level and Higher

4100 Seminar in Logic and the Philosophy of Mathematics topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4110 Seminar in Logic and the Philosophy of Mathematics - inactive course.

4150 Seminar in the Philosophy of Science - inactive course.

4160 Seminar in the Philosophy of Science - inactive course.

4200 and 4210 Seminar in the Philosophy of Mind - inactive course.

4250 and 4260 Seminar in Metaphysics and Epistemology topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4300 and 4310 Seminar in Ethics topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4350 and 4360 Seminar in the Philosophy of Law - inactive course.

4400 and 4410 Seminar in Political Philosophy - inactive course.

4450 and 4460 Seminar in the Philosophy of History - inactive course.

4500 and 4510 Seminar in the Philosophy of Religion - inactive course.

4520 and 4530 Seminar in Philosophical Background to Literature - inactive course.

4550 Seminar in the Philosophy of Language - inactive course.

4560 Seminar in the Philosophy of Language - inactive course.

4600 and 4610 Seminar in Aesthetics - inactive course.

4700-4790 Seminar in Special Authors and Texts will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4800-4890 Seminar in Twentieth- and Twenty-First Century Philosophy topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4900 Advanced Readings in Ethics is an individualized course tailored to the specialized moral interests of each student.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4998 Comprehensive Examination is part of the Honours program.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

4999 Honours Essay is part of the Honours program.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

5000 Instructional Field Placement in Applied Ethics is a part-time, one semester period of practical work designed to provide experience in medical, psychiatric, environmental, or other similar settings. Students may be placed, e.g., in a government policy office or a hospital.

UL: applicable only towards the **Diploma in Applied Ethics**

10.24 Police Studies

Police Studies courses are designated by PLST.

2000 An Introduction to Policing in Canada will examine the organization of policing, its mandate and operation. It will provide an overview of the history and development of policing in Canada; examples from Newfoundland and Labrador will be used where appropriate. It will discuss the various roles and responsibilities of the police in society. It will explore the issue by police decision making, the exercise of police powers, and the use of discretion by police officers. Several other issues relating to policing will be discussed including police recruitment and training, the professional role of the police, stress on the job and policing in a diverse society.

3000 Crime Victims and Policing will provide an opportunity to explore contemporary victim issues, in particular, as they relate to enhancing police response and sensitivity to the needs of victims. The course will explore different types of victimization, encourage critical analysis and understanding of the impact of the CJS on victims and the role of the victim in bringing about progressive and positive changes in the CJS. It will consider recent legislative developments, programs, services and emerging issues and discuss how victim engagement can promote public confidence in the administration of justice.

PR: a minimum of 60 credit hours, including PLST 2000 and two additional courses from the **Elective Courses List** under the **Major Program in Police Studies**

3100 Gender, Crime and Criminal Justice examines the gendered aspects of criminal offending, victimization, criminal justice responses (police, courts, corrections), and workers in the criminal justice system.

PR: a minimum of 60 credit hours including PLST 2000 and Sociology 1000

3200 Internship is a part-time unpaid placement with a police department, Provincial Corrections, or various areas of the Department of Justice

including the Sheriff's Office and Correctional Facilities. The number of openings varies and admission to the course is selective and competitive. Placements are for 12 weeks, eight hours a week, in addition to a regularly scheduled class meeting.

PR: a minimum of 60 credit hours including PLST 2000 and three additional courses from the **Elective Courses List** under the **Major Program in Police Studies**

3500 Investigative Interviewing will introduce students to investigative interviewing. It covers a range of topics that will help develop and/or improve the interviewing skills of those working in various disciplines where professional interviewing skills are essential.

PR: completion of a minimum of 60 credit hours

4000 Advanced Issues in Policing provides in depth discussion of various aspects of policing. It will discuss how social, economic and political factors influence the challenges of policing in a democratic society. It will look at police powers of arrest, search and release and how they are affected by the Charter of Rights and Freedoms. The different types of offences found in the Criminal Code and the special knowledge required to police them will be covered. The course will consider the use of police discretion, police misconduct and accountability and ethics in policing. It will also look at officer safety and stress in the work place. Several special topics related to policing will be discussed including: policing persons with mental illness, policing drug related offences, and policing racially diverse communities.

PR: a minimum of 60 credit hours including PLST 2000 and three additional courses from the **Elective Courses List** under the **Major Program in Police Studies**

4001 Police Decision Making and Ethics provides students with the tools to locate, critically review, and summarize the findings and practical implications of police research on key topics. These topics include the influence of discretion on police powers and the importance of ethics and accountability in policing. The course will also discuss police officer stress and how it is influenced by ethical dilemmas. Examples of misuse of discretion and ethical dilemmas will be discussed.

PR: a minimum of 60 credit hours including PLST 2000 and three additional courses from the **Elective Courses List** under the **Major Program in Police Studies**

5000 Instructional Field Placement in Police Studies is a one-semester course offered in the Spring semester, following completion of ten courses specified for the **Diploma Program in Police Studies**, designed to integrate knowledge acquired in coursework with the training curriculum provided by the Royal Newfoundland Constabulary to its recruit cadets. In consultation with the course instructor, students will prepare and submit a reflective report linking their observation of and instruction in the practical techniques and methods of police work with the broad range of knowledge acquired in other courses taken in the diploma program.

CH: 6

CO: completion of two semesters of course work in the **Diploma Program in Police Studies**, admission to the **Diploma Program in Police Studies**, and good standing as a recruit cadet of the Royal Newfoundland Constabulary

PR: completion of two semesters of course work in the **Diploma Program in Police Studies**, admission to the **Diploma Program in Police Studies**, and good standing as a recruit cadet of the Royal Newfoundland Constabulary

10.25 Political Science

Political Science 1000 provides an introduction to the study of politics, power, law, public policy and government. Courses at the 2000-level offer an introduction to major fields and can be taken beginning in a student's first year of study. Courses at the 3000-level usually assume that students have completed at least two courses in Political Science including the corresponding 2000-level introductory course. At the 4000-level, courses are advanced seminars with small enrollment caps, and therefore have formal prerequisites.

The second digit in each course number designates a field in Political Science. Students interested in notionally concentrating in an area may be guided in their course selections, as follows:

Second Digit

0 General & Research techniques

1 Political theory

2 International politics

3 Comparative politics

6 Public policy and public administration

8 Canadian politics

9 Special topics

Enrollment in Political Science courses is limited. First priority is given to students registered as an Honours, Major or Minor in

Political Science. During this time other students may be temporarily placed on a wait list.

Political Science courses are designated by POSC.

1000 Introduction to Politics and Government is an introduction to basic concepts in the study of politics, power, law, public policy and government, touching on major areas of political ideologies, institutions, and current domestic and international political issues. Suitable for students in all disciplines seeking an introduction to Political Science.

1010 Issues in Canadian Politics explores some of Canada's most pressing and interesting political issues. This course profiles important political problems facing federal and provincial politicians and society. Suitable for students in all disciplines who have an interest in Canadian politics and who wish to develop a basic awareness of Canadian government.

1020 Issues in World Politics explores some of the world's most pressing and interesting political issues. This course profiles important political problems, such as a power struggle within a particular country, a controversial topic that affects an entire continent, or a major crisis that has implications for inhabitants around the world. Suitable for students in all disciplines who have an interest in international politics.

2010 Research and Writing in Political Science provides an overview of the research and analysis skills used in Political Science. Students can expect to learn about library research, electronic data gathering, and the elements of strong essay writing which can be applied across disciplines in the social sciences. The "political" content will vary by instructor and will address more specific topics than those ordinarily covered in 2000-level Political Science courses. This course qualifies as a Research/Writing course.

PR: POSC 1000

2100 Introduction to Political Theory is a survey of the most important political thinkers and schools of political thought. The course will ordinarily cover major political thinkers and include a selection of contemporary political ideologies.

CR: the former POSC 2000

2200 Introduction to International Politics is an examination of the "building blocks" of international politics including determinants, means, processes and ends. Emphasis is on the post-1945 period.

2300 Introduction to Comparative Politics is an introduction to comparative politics and techniques of comparative analysis across political jurisdictions. This course focuses on the differences between, and similarities among, a variety of countries and systems of government.

2600 Introduction to Public Policy and Administration outlines major concepts in, and issues relating to, the fields of public policy and administration.

CR: the former POSC 3540

2800 Introduction to Canadian Politics and Government is an introduction to the structure and operations of institutions of Canadian government and the nature of political actors. Topics to be examined may include the constitution, federalism, parliament, political parties, political culture and elections.

CR: the former POSC 2710

2990 Europe in the Twentieth Century is a pre-Harlow course which examines the social, economic and political history of Europe from World War I to the present. It examines the shift from war and depression to peace and prosperity. Examining the rise and demise of fascism and communism, postwar reconstruction, and Europe's changing position in the world, this course explores the interplay between domestic and international politics and Europe's position in the international order. This course is recommended for Political Science students considering a Harlow semester, exchange programs in Europe, or further courses in European politics.

CR: European Studies 2000, History 2350, the former POSC 2350

3010 Empirical Methods in Political Science is an introduction to basic concepts in the scientific approach to studying politics, and provides students with the fundamental skills for conducting empirical research using both qualitative and quantitative methods. These skills include how to construct a research project, and how to collect and analyze information.

PR: POSC 2010 or 9 credit hours in Political Science; enrollment in the Political Science Honours, Major or Minor program

3100 Political Theory from Plato to Rousseau examines selected political theory from Plato to Rousseau. The theme of the course is the development of liberal democratic theory.

3110 Political Theory from Tocqueville to Present examines selected political theory from Tocqueville to the present. The theme of the course is the crisis in liberal democratic theory.

3140 Feminist Political Theory examines feminist scholarship that has challenged previously accepted notions in political theory, including

definitions of politics itself, the distinctions between public and private, the nature of citizenship, and the roles of women in civil society. This course considers different ways of looking at power and political culture in modern societies, examining these such as gender and democracy, race and class, poverty and welfare, sexuality and morality.

3210 International Law is an introduction to international law concerned with the interaction of the political and legal systems. Topics discussed are sources, agreements, membership, recognition, territory, jurisdiction, immunities, state responsibility, and force and war.

3220 International Organizations examines the origins, structures and roles of international organizations as both 'arenas' in which states pursue their interests and 'evidence' of an embryonic international society. The focus will be primarily on the workings of the United Nations, especially its 'collective security' function, and other regional security organizations.

3250 International Political Economy studies the interaction between world politics and international economics. Major theoretical debates regarding globalization and multinational corporations are covered, as well as current topics such as: the politics of the global monetary and financial order, international trade, foreign investment and debt, international development, and environmental issues.

3280 Canadian Foreign Policy is an introduction to the analysis of foreign policy, with special reference to domestic and international constraints, capabilities and ideology.

CR: the former POSC 3200, the former POSC 3760

3290 Human Security examines political concepts and government policies related to security contexts, such as the displacement of citizens, food supply issues, energy, information flows, war and/or the environment.

CR: the former POSC 3391

3300 European Politics is a comparative study of government and politics in selected states of Western Europe. Emphasis will be on parties, institutions, and policy-making, particularly the ways in which states manage their economies.

3305 Irish Politics introduces students to the politics of the Republic of Ireland. Topics covered include the historical origins of the state, the political influence of the Roman Catholic Church, the evolution of political institutions, as well as the evolving relationship with Northern Ireland, Europe and the world.

3310 American Politics examines the governmental process in the United States including the role of parties and interest groups. This course will also consider select contemporary problems.

3315 Latin American Politics is an analysis of the forces influencing politics in contemporary Latin America with particular emphasis being given to those factors promoting political change. No prior knowledge of Latin America is assumed.

CR: the former POSC 3430

3325 South Asian Politics analyzes the history and development of political change in a selection of South Asian states with a focus on the contemporary challenges that they face in a globalized political environment.

CR: the former POSC 3420

3340 Women and Politics examines the role of women in the political process in comparative context. Topics may include the political socialization, organization, and recruitment of women; voting behaviour; and the organization of governmental institutions as a response to the concerns of women.

3350 Public Opinion and Voting looks at the measurement and formation of political attitudes, factors affecting attitude stability and change, and the distribution of opinion in society. Emphasizes public opinion and voting behaviour in the United States and Canada during campaigns and interelection periods.

CR: the former POSC 3510

3390 Political Parties is a study of political parties in liberal democracies. Attention is given to the origin and development of parties, how they organize, multiparty competition and what difference parties make. Political parties in Europe, the United States, and Canada are considered in a comparative context.

CR: the former POSC 3531

3600 Public Policy in Canada is an examination of the relationship between public policy development in Canada and changes in the social and economic policy environment.

CR: the former POSC 4790

3610 Public Administration in Canada is an introduction to public administration, history of the public service in Canada, an examination of the structure and functioning of contemporary federal and provincial governments. Topics covered include cabinet organization, financial and personnel management, collective bargaining, and bilingualism.

CR: the former POSC 3741

3620 Law and Society reviews traditional theories about law, discuss their inadequacies, and consider the benefits of a policy-oriented approach to the study of the role of law in society. The concept of law as a process of authoritative decision will be used to examine the function of the judicial authority.

CR: the former POSC 3521

3650 Canadian Political Economy introduces students to major debates about the role of the state in Canadian economic development and public policy. Topics may include: the challenges of natural resource dependency, regionalism, globalization, and the relationship between Canada and the United States.

CR: the former POSC 3751

3681 Corrections Policy in Newfoundland and Labrador examines how various political, social and economic forces have helped shape correctional policy and practice in Newfoundland and Labrador.

CR: the former POSC 3791

3800 Federalism in Canada examines relationships between government in the Canadian federation ranging from high-profile disputes to efficient diplomacy. This course reviews longstanding intergovernmental stresses such as the constitution, legislative powers, legal matters, sub-state nationalism (e.g., Quebec, Newfoundland, Labrador) and wealth distribution.

CR: the former POSC 3710

3810 Political Executive in Canada explores executive institutions and the roles of political actors, such as prime ministers, premiers and ministers, in addressing and shaping important political issues in Canada.

CR: the former POSC 2711

3820 Constitutional Law in Canada uses a casebook approach to examine critical issues of Canadian constitutional law. The development of the Canadian Constitution and processes of judicial review, as well as the legal development of federalism and protection of civil rights, are examined in detail.

CR: the former POSC 3720

3830 Aboriginal Government and Politics in Canada is an introductory course in Aboriginal governance. It examines Aboriginal culture and traditions, the variety of Aboriginal governments and governing traditions, and Aboriginal and treaty rights. Public policy issues surrounding categories of Aboriginal peoples, intergovernmental relations affecting them, and the role and significance of Aboriginal political organizations and actions are explored.

3860 Media and Politics in Canada draws upon communications theory to analyze major political problems and processes. Specific attention is given to Canadian politics in the news and to various print, broadcast and online media.

CR: the former POSC 3511

3870 Provincial Politics is a comparative study of politics in selected Canadian provinces and territories. Consequences of varying historical and cultural contexts will be examined with special attention to parties and movements, leadership styles, and orientations to the Canadian federation.

CR: the former POSC 3770

3880 Newfoundland and Labrador Politics is a study of the political process in Newfoundland and Labrador. Topics may include electoral behaviour and attitudes, the party system, leadership styles, the consequences of federalism, and public administration.

CR: the former POSC 3780

3890 Municipal Politics is an examination of the theory, structure and operation of local governments in Canada, with particular emphasis on Newfoundland and Labrador. Recent proposals for reform and the politics of implementing regional government and financial reorganization will be examined.

CR: the former POSC 3790

3900-3979 Special Topics in Political Science will have topics announced by the Department.

CR: credit restrictions will be designated on a course-by-course basis

3980-3999 Special Topics in European Politics is offered only at the Harlow (England) campus and explore selected facets of the politics of contemporary Europe. Typical themes include the European Union and its member-states, asylum and immigration, social and economic policy, foreign policy and the position of Europe in the international system. For further information about the Harlow semester consult the Department or the Faculty of Arts.

CR: credit restrictions will be designated on a course-by-course basis

4010 Honours Essay I develops independent research and writing skills through regular meetings with a research supervisor, the preparation of an approved research proposal, and the completion of a high quality draft of at least one section of the Honours essay. Students are expected to follow the Department's "Guidelines Governing Honours Essays". Prior to enrolling, and ideally a semester in advance, students should contact the Head of the

Department to identify a potential supervisor.

CR: the former POSC 4950

PR: enrollment in the Honours program and permission of the Head of the Department

4011 Honours Essay II builds on skills developed in POSC 4010, requires students to complete the writing of their Honours essay, including submitting a high quality complete draft at the midpoint of the semester, with the final complete document to follow soon afterwards. Students are expected to meet regularly with their research supervisor and to follow the Department's "Guidelines Governing Honours Essays".

CR: the former POSC 4951

PR: completion of POSC 4010 with a minimum grade of 70%

4100 Approaches to Political Theory is an introduction to the interpretation of political texts. Features historical and hermeneutical approaches to the study of Political Science.

PR: POSC 2100 or a POSC 31xx course, or the instructor's permission

4110 Multicultural Citizenship discourses on multiculturalism in contemporary political theory from a normative perspective. Focuses on the justice and equality frameworks within which multiculturalism is understood, and the challenges arising from pluralism in democratic societies.

PR: POSC 2100 or a POSC 31xx course, or the instructor's permission

4120 Contemporary Democratic Theory examines significant debates in the contemporary scholarship on democratic theory, such as the relationship between democratic decision-making and individual liberty; who "the people" are in democratic states and how they make their will known; whether democracy depends upon a sense of collective identity; and whether democracy is inherently exclusionary.

PR: POSC 2100 or a POSC 31xx course, or the instructor's permission

4200 International Law and Politics is a research seminar on contemporary Canadian legal problems. Each semester will focus on one problem, such as Northern sovereignty, pollution, fishing zones or control of the sea.

PR: POSC 2200 and a POSC 32xx course, or POSC 3210, or the instructor's permission

4210 Arms Control and Proliferation examines the evolution of arms control and considers the consequences of success and failure.

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

4215 Human Rights and International Politics examines the evolution of global norms of human rights and consequences for the structures of the international system, international civil society, and the international political process.

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

4230 Theories of International Relations examines the major theories used to understand world politics and international conflict, such as constructivism, feminism, game theory, historical structuralism, liberalism, and realism. These are explored through classic readings in international relations and case studies.

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

4250 The European Union is an examination of the European Community as an emergent transnational form of governance. The course will consider the origins of the Community, the operation of its institutions, its transformation from Common Market to European Union, and the ways in which EC politics impinges on national-level politics.

CR: the former POSC 3291

PR: POSC 2200 and a POSC 32xx course, or POSC 3300, or the instructor's permission

4255 Controversies in Political Economy examines current political and public policy challenges from a political economy perspective. Topics may include globalization, major trade disputes, currency and debt crises, economic development and global environmental problems.

CR: the former POSC 4350

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

4280 American Foreign Policy reviews the structures, process and major foreign policy perspectives of the United States of America in a global context.

CR: the former POSC 3200

PR: POSC 2200 or a POSC 31xx course, or POSC 3310, or the instructor's permission

4310 Comparative Federalism examines theories of federalism along with the development and operation of federalism in selected nation states.

PR: POSC 2300 and a POSC 33xx course, or POSC 3800, or the instructor's permission

4330 Comparative Political Representation studies the role of both the public and political institutions in affecting political and policy outcomes. Topics will address the nature of political institutions, public demands, and evidence regarding how interests are facilitated through the political process.

CR: the former POSC 4313

PR: any POSC course at the 2000 level or higher, or the instructor's permission

4340 Women and Mass Politics focuses on the gender gap in both political behaviour and participation. Focusing primarily on Canada and the United States, this course assesses patterns of involvement in political institutions, and examines differences between men's and women's political attitudes.

CR: the former POSC 4503

PR: 2300 and a POSC 33xx course, or POSC 3140 or 3340, or the instructor's permission

4360 Contentious Politics - Protest, Violence and Terrorism examines protest and movement politics, insurgent and counter-insurgent politics, terrorism, and revolution.

CR: the former POSC 4740

PR: POSC 2300 and a POSC 33xx course, or the instructor's permission

4370 Democracy and Democratization is a comparative study of the conditions necessary to develop and sustain democratic regimes and the circumstances under which transitions to democracy succeed or fail. The course will examine theoretical materials and apply them to recent and historical transitions to democratic rule.

CR: the former POSC 4301

PR: POSC 2300 and a POSC 33xx course, or the instructor's permission

4380 The Developing World considers the practical and theoretical issues that affect the chances of the over five billion inhabitants of the developing world to secure democratic governance and material well-being.

CR: the former POSC 4450

PR: POSC 2300 and a POSC 33xx course, or the instructor's permission

4600 Public Policy Work Internship provides career-related policy work experience with government, a political party, a non-governmental organization, a union, or another employer involved in public affairs. Job placements are for twelve weeks at eight hours per week and are typically unpaid. Class meetings and course work are required. Admission is selective and competitive. Details are available on the Department's website at www.mun.ca/posc. Enrollment constitutes permission for the course administrator to provide the student's transcript to a potential employer.

CR: POSC 460W, the former POSC 4000

PR: a minimum 60 credit hours, including at least 15 credit hours in Political Science courses with a minimum 70% average, and permission of the instructor

4630 Policy Analysis is a survey of the major frameworks for the study of public policy, including decision-making theories. The course examines different stages in the policy-making process, such as policy initiation, priorities planning, choice of governing instruments, implementation and evaluation in relation to the objective and normative factors in Canadian policy environment, key institutions, dominant interests, and political leadership.

CR: the former POSC 3730

PR: POSC 2600 and a POSC 36xx course, or POSC 3600, or the instructor's permission

4650 Public Policy in Resource Dependent Economies examines the political economy of Canada's human and natural resources, such as labour, energy, fisheries, forestry, mining, and water. The political consequences of natural resource dependency on the environment and Aboriginals are also discussed.

CR: the former POSC 4731

PR: POSC 2600 and a POSC 36xx course, or the instructor's permission

4680 Public Policy in Newfoundland and Labrador is a study of public policy in Newfoundland and Labrador. Examines the formation, implementation and impact of policies in one or more of the following areas: fisheries, resources, industrial development, agriculture, social policy.

CR: the former POSC 4730

PR: POSC 2600 and a POSC 36xx course, or POSC 3600 or 3880, or the instructor's permission

4860 Elections in Canada is an examination of election campaigns and electoral systems in the Canadian political system, with an emphasis on students, parties, voters, electioneering activities and campaign regulations.

CR: the former POSC 3700

PR: POSC 2800 and a POSC 38xx course, or POSC 3350, 3390, or 3860, or the instructor's permission

4870 Regionalism in Canada is an examination of the economic, social, and institutional determinants of regionalism and the ways in which these forces have shaped decision-making in Canada. Emphasis on the various models and frameworks used to study regionalism.

CR: the former POSC 4750

PR: POSC 2800 and a POSC 38xx course, or POSC 3800 or 3870, or the instructor's permission

4880 Research in Newfoundland and Labrador Politics requires students to participate in advanced research projects dealing with selected aspects of the politics of Newfoundland and Labrador. Topics to be considered may include the legislature and the executive, the civil service, interest groups,

parties, elections and political recruitment.

CR: the former POSC 4780

PR: POSC 2800 and a POSC 38xx course, or POSC 3880, or the instructor's permission

4900-4990 (Excluding 4950 and 4951) Special Topics in Political Science

will have a seminar topic announced by the Department.

CR: will be designated on a course-by-course basis

PR: will be designated on a course-by-course basis

10.25.1 Work Terms

The following Work Terms are requirements for the Bachelor of Arts Honours (Co-operative) and Bachelor of Arts (Cooperative) programs only.

260W Work Term 1 for most students this represents their first work experience in a professional environment. They are expected to learn, develop and practice the high standards of behaviour normally expected in the workplace. They are normally required to attend seminars on professional development.

OR: Professional development seminars, delivered by Co-operative Education Services Centre (CESC), are presented in the previous semester to introduce and prepare the student for participation in the subsequent work terms. Topics may include, among others; résumé preparation; interview training; work term evaluation; preparation of reflective essays; career planning employment seeking skills; self-employment; ethics and professional concepts; behavioural requirements in the workplace; assertiveness in the workplace; and industrial safety.

PR: enrollment in the **Political Science Co-operative Education Program (PSCE)**; 18 POSC credit hours; a minimum overall average of 65% and a minimum average of 70% in POSC courses; and permission of the designated faculty member. A candidate for a Political Science Honours or Major who completed a minimum of 18 credit hours in Political Science prior to September 2011 and who is not pursuing the co-op option may apply to enroll in POSC 260W. Priority will be given to PSCE students.

360W Work Term 2 building on their first work term placement students will further develop their knowledge and work-related skills in a position that entails increased responsibility and challenge. Students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems.

PR: enrollment in the **Political Science Co-operative Education Program (PSCE)**; 27 POSC credit hours; POSC 260W; a minimum overall average of 65% and a minimum average of 70% in POSC courses; and permission of the designated faculty member

460W Work Term 3 building on their previous work term placements and Political Science course knowledge students will be assigned to a highly challenging position. They should have sufficient academic grounding and work experience to contribute in a positive manner to the problem-solving and management processes needed and practiced in the work environment. Students should become better acquainted with their discipline of study; should observe and appreciate the attitudes, responsibilities and ethics normally expected of professionals; and should exercise greater independence and responsibility in their assigned work functions.

CR: POSC 4600

PR: enrollment in the **Political Science Co-operative Education Program (PSCE)**; a minimum third-year standing and 33 POSC credit hours; POSC 360W; a minimum overall average of 65% and a minimum average of 70% in POSC courses; and permission of the designated faculty member.

10.26 Religious Studies

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Religious Studies courses are designated by RELS.

1000 The Religions of the World is an introduction to the basic beliefs and practices of the world's great religions.

CR: the former RELS 2010

1010 Religion in the Modern World is an introduction to some of the major issues confronting religion in the modern world. The focus will be on such topics as globalization and religion, religious faith and violence, freedom and authority.

1020 Christianity in Western Civilization is an introduction to Christianity and its place in the history of Western civilization through examples from Early Christianity, the Reformation, and the Modern Period.

1021 Apocalypse: The End Times in Thought, Action, and Imagination will explore the many ways in which Judaism and Christianity have anticipated and imagined the end times. Attention will be given to Jewish and early Christian notions of the Messiah and his reign, the end of the world, and the impending judgment, as well as how Christianity has coped repeatedly with the delay of the end and how millennial thought and action have affected people during periods of social and natural crises. The role of millennial expectations in our modern era and why the apocalypse is once again a powerful image in religion, film, and literature will also be covered.

1022 Jesus in Film is a study of how Jesus is represented in modern film. The course explores the continuing impact that the Jesus of history and faith has had on modern Western culture. The course will examine such films as *The Greatest Story Ever Told*, *The Robe*, *The Gospel According to St. Matthew* (by Pasolini), *Jesus Christ Superstar*, *Jesus of Montreal*, *The Last Temptation of Christ*, *The Life of Brian*, *The Passion of the Christ*, *The Newfoundland Passion* (video of the Squires' Paintings).

1032 Introduction to Asian Religions and Culture is a broadly based survey course introducing students to the religions, culture, and societies of Asia. Traditions explored may include those of India (Hinduism, Buddhism, Sikhism, Jainism), China (Daoism, Confucianism, Buddhism), Japan (Shinto, Zen Buddhism), and Korea.

1040 Introduction to Chinese (Mandarin) I will introduce students to the basics of Chinese vocabulary, characters, and grammar. Mandarin Chinese, the official dialect of China, Taiwan, and Singapore, will be taught. This course is not intended for native speakers.

CR: the former RELS 4904

1041 Introduction to Chinese (Mandarin) II is a continuation of RELS 1040. At the end of this course students should know over a hundred Chinese characters, which should enable them to read basic texts and carry on a simple conversation. This course is not intended for native speakers.

CR: the former RELS 4911

PR: RELS 1040

1050 Introduction to Biblical Hebrew I is designed to introduce students to the elements of Biblical Hebrew in order to prepare them for reading the Hebrew Bible/Old Testament in the original. The emphasis will be upon learning the basic grammar and syntax of Biblical Hebrew.

CR: the former RELS 3700, the former RELS 4900

1051 Introduction to Biblical Hebrew II is a continuation of RELS 1050. The emphasis will be upon the reading of selected Hebrew texts.

CR: the former RELS 3701, the former RELS 4901

PR: RELS 1050

1200 The Bible in Western Religion and Culture is an introduction to the Bible and its impact on literature, art, film, and music in Western culture. This course explores both the basic story line, characters, and themes in the Bible and the Bible's foundational role in the depiction and development of Western culture.

2013 Introduction to Christianity is a study of the Christian tradition, its development and variety. The course will include an examination of the beliefs and practices of both Eastern and Western Christianity and a study of the main differences among the major Western denominations.

2050 Introduction to the Old Testament is an introduction to the historical background, literary structure, and content of the Old Testament. Emphasis will be placed on the authorship and dating of the various texts that comprise the Old Testament, as well as on major themes, figures, and events. This course may qualify as a Research/Writing course. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2051 Introduction to the New Testament is an introduction to the history and literary structure of the documents comprising the New Testament. Emphasis will be placed on the major themes found in these documents and on the distinctiveness of approach of the individual writers.

2130 Christianity from the First Century to the Middle Ages explores the historical development of the principal doctrines of Christianity from the period of the Early Church to the Middle Ages. Topics will include the doctrine of the Trinity, the doctrine of the Person of Christ, the nature of the Church, the doctrine of the sacraments, and early and medieval speculation on the nature of Heaven and Hell.

2140 Christianity from the Reformation to the Present explores the radical religious, ethical, and intellectual changes and challenges that brought about the modern world we live in: the Reformation, the Enlightenment, the Romantic Period and Pietism, and Secularism. This course may qualify as a Research/Writing course. Prior to registration a list of courses which may be used as a research/writing course will be posted on the website of the Faculty of Arts at www.mun.ca/arts.

2302 Readings in New Testament Greek - inactive course.

2330 Introduction to Judaism is an exploration of Judaism from its beginnings to the modern era. This course introduces students to the basic

beliefs and practices of the Jewish faith.

2340 Introduction to Islam is a study of the religion of Islam in its historical and contemporary manifestations; Muhammad, the Qur'an, Islamic sects, relations with Judaism and Christianity; trends and developments in contemporary Islamic thought and practice.

CR: the former RELS 3340

2350 Religious Institutions (same as Anthropology 2350) is a comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.

CR: Anthropology 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

2400 Introduction to Buddhism is a study of the history of the Buddhist tradition in India and China, the development of the main lines of Buddhist thought, and the nature of the Chinese transformation of Buddhism.

CR: the former RELS 3400

2410 Introduction to Hinduism involves a study of the religious thought and history of India, the literature of Hinduism, the major thinkers in Hindu philosophy, and the role of Hinduism in the culture and society of India.

CR: the former RELS 3410

2415 Gods and Goddesses of Hinduism is focussed on myth, iconography and ritual of Hindu gods and goddesses from the ancient to the contemporary period. The course will explore fundamental assumptions of Hindu theistic traditions in popular practice and in formal religious institutions.

2420 Introduction to Chinese Philosophy and Religion is an introduction to the principal forms of tradition to emerge in China. This course examines the origins and development of Confucianism, Daoism, Moism, and Legalism. After exploring the social and historical conditions that gave rise to them, the course will explore their continuing development and role in Chinese society.

2425 Contemporary Issues in Chinese Religion and Culture is an examination of religion in modern China and the Chinese diaspora in Taiwan, Singapore, and North America. Special attention will be paid to religious beliefs, practices, and institutions and the way in which modern attitudes have been framed by the past.

CR: the former RELS 3425

2430 Introduction to Japanese Religions is an examination of the nature and development of Shinto, the history and characteristics of the major sects of Japanese Buddhism, and the origins and importance of the New Religions of the 19th and 20th centuries, especially Tenrikyo and Soka Gakkai.

CR: the former RELS 3430

2610 Introduction to Religious Ethics is an introduction to religious ethics through the systematic study of selected writers and issues in biomedicine, human sexuality, and social justice. Possible topics for discussion include euthanasia, abortion, poverty, and unemployment.

CR: students who have successfully completed both the former RELS 2600 and the former RELS 2601 may not receive credit for RELS 2610

2800 Women in Western Religions is an examination of the attitudes toward, and roles of, women in the Western religions, including prehistoric traditions, Judaism, Christianity, and Islam. Contemporary evaluations of these traditions from the point of view of women will also be considered.

2801 Women in Eastern Religions is an examination of the history of women in the traditions of Hinduism, Buddhism, Confucianism, Taoism, and folk traditions in Asia. The modern status of women in Asia and its relationship to traditional religious ideas will also be studied.

2810 Religion and Modern Culture is an historical examination of the impact of science on religion in Western culture. Particular emphasis will be placed on such developments as the scientific revolution, the rise of modern technology, and the emergence of modern scientific theories.

2811 Introduction to Contemporary Religious Movements is an introduction to contemporary religious movements in the West, including modern witchcraft, Neo-pagan religions, Mother Earth Spirituality, UFO religion, and the New Age Movement.

2812 Religion and Popular Culture will focus on the portrayal and treatment of religion in popular culture and will examine some of the ways in which religious and mythic themes are expressed in such pop culture forums as television shows, films, music, mass-market fiction, and material culture.

2820 Cults and New Religious Movements - inactive course.

2830 Religion and Popular Music is an introduction to the study of religious themes in popular music. The course will explore the influence of religious music on popular music and song and examine the role of music and song in the expression of religious themes.

2850 Religion in Contemporary Canada examines contemporary religious

practices in Canada. Its perspective will be historical and sociological. It will examine indigenous traditions, the beginnings of Christianity in Canada, and how shifts in immigration policy have encouraged a diversity of contemporary religious practice. It will conclude by examining religion in contemporary Canada, particularly issues of religion and public policy (related to the Multiculturalism Act) and to shifting Christian membership.

3000 Medieval Books (same as English 3002, History 3000, and Medieval Studies 3000) is an examination of the development and role of the manuscript book during the Middle Ages. Topics covered will include book production and dissemination; authors, scribes and audiences; and various kinds of books (e.g. glossed Bibles, anthologies, books of hours, etc.) and their uses.

CR: English 3002, History 3000, and Medieval Studies 3000

PR: Medieval Studies 2000, 2001 or 2002 or permission of the instructor

3010 Greek Religion (same as Classics 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Classics 3010, the former RELS 3121, the former Classics 3121

3020 Roman Religion (same as Classics 3020) is a study of the role of religion in the private and public life of the Roman world.

CR: Classics 3020, the former RELS 3121, the former Classics 3121

3031 The Book of Genesis introduces students to one of the founding texts of Western culture, the book of Genesis. Special attention will be paid to the role of myth, human origins, values, and political institutions.

CR: the former RELS 3030

3053 Anthropology of Religion (same as Anthropology 3053) is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.

CR: Anthropology 3053

3060 The Prophets of Israel is a study of the prophets through the relevant books of the Old Testament. Problems of text and interpretation will be discussed in relation to selected passages, but the general approach will be to bring out the creative genius and radical implications of the prophetic movement as a whole.

3091 Visions of Human Suffering in the Hebrew Bible introduces students to the universal problem of human suffering as it is depicted in various biblical books. Special attention will be placed on the book of Job, but notions of suffering in the Psalms, Jeremiah, Proverbs, Ecclesiastes, and some apocryphal literature will also be considered.

CR: the former RELS 3090

3150 Early Christian Thought: The First Five Centuries (same as Classics 3150) is an advanced study of selected themes and personalities in Christian thought and literature from the second to the sixth centuries. Particular attention will be given to the controversies centering on the doctrines of the Trinity and the Person of Christ.

CR: Classics 3150

3200 Jesus: His Life and Teaching is a study of the ministry and thought of Jesus of Nazareth as contained in the Gospels and other New Testament writings. Attention will be given to the methods and conclusions of recent scholarship as applied to his principal teachings and to the study of the historical Jesus.

3210 Paul and His Writings is a study of the Pauline writings and an appraisal of the contribution to Christianity of his mission and theology on the basis of New Testament and other relevant material. Particular attention will be given to such related themes as salvation, reconciliation, grace, and justification.

3251 The Gospel of John is an examination of the Gospel of John and the community which produced it. Special attention will be given to the place of the Gospel in the history of early Christianity.

3265 Ethics and the New Testament - inactive course.

3270 Christianity and the Roman Empire - inactive course.

3272 Bible, Culture and Interpretation examines ways in which the Bible has been interpreted from the beginnings of Christianity to the present.

CR: the former RELS 3271, the former RELS 4200

3276 Contemporary Issues and the Bible examines the relevance of the Bible to such issues as the environmental crisis, emergent global capitalism, and technology and freedom.

CR: the former RELS 3275

3305 The Religion of Ancient Israel is an exploration of the religious thought and institutions of the kingdoms of Israel and Judah in their cultural and historical contexts from their beginnings to the sixth century B.C.E. The course introduces students to the religious beliefs, practices, and institutions of these two kingdoms prior to their destruction and prior to the development of Judaism in the post-exilic period.

CR: the former RELS 3050

3310 Judaism at the Beginning of the Christian Era will explore the developments in Jewish thought, institutions, beliefs, and practices during the time when Greek and Jewish cultures encountered one another and in which Jesus of Nazareth lived.

CR: the former RELS 3220

3315 The Development of Modern Judaism covers the period from the destruction of the Jerusalem Temple to the present and explores Judaism under the spiritual leadership of the rabbis. Approaching the material from a historical and cultural perspective, the course introduces students to the main developments of the Talmudic, Medieval, and Modern periods.

CR: the former RELS 3302, the former RELS 3303

3320 Mysticism in Judaism and Islam is a study of the origins, development, and importance of mysticism in the Jewish and Muslim traditions. In Judaism, the course will include a survey of Merkavah mysticism, the Qabbalah, and Hasidism. In Islam, it will include an examination of the two major streams of Muslim mysticism (Sufism) - the "drunken" and the "sober" - and the development of the Sufi Orders.

3401 Zen, Buddhist Meditation, and Buddhist Psychology examines the relationship between meditation and theories of human psychology in Buddhism from its origins to its formulation in Zen.

3411 The Ramayana: A Hindu Epic and Performance Tradition is a study of one of the most influential Epics of Hinduism, the story of Rama, the perfect king of a golden age. The course examines various versions of the narrative, the social and religious values expressed through the story, and the Epic's place in Indian politics, in dramatic performances, and in visual arts.

3412 The Teachings of the Upanishads is an in-depth examination of some of the principal Upanishads, foundational texts for Hindu religious philosophy and techniques of meditation. The course also examines classical and modern interpretations of these texts.

3415 Warrior, Wife, Witch: Ideal Females and Female Ideals in Hinduism is a study of Hindu constructions of ideal or iconic females (e.g., Durga, the warrior goddess; Sita, the perfect wife; the Yoginis, the "witches" of Tantra) and their power in the lives of Hindu women. The course includes critical examination of the history of Hindu goddess traditions, the ideals for females in Hindu law, and Hindu women's interpretations of "ideal females".

3431 Readings in Daoism: The Laozi and the Zhuangzi is a course in the critical reading of the two most important texts in Daoism, the *Laozi* and the *Zhuangzi*.

CR: the former RELS 3420, the former RELS 3422

3432 Confucius and Confucianism - inactive course.

3500 Philosophy of Religion (same as Philosophy 3500) explores the philosophical aspects of religious belief, religious language, and theology.

CR: Philosophy 3500

3510 Christianity in the Reformation Era is a study of Christian thought and practice in the Reformation era. This course will examine both Protestant and Catholic efforts at reform from the late Middle Ages to the seventeenth century.

3535 Christianity in the Modern Era is a study of Western Christianity from the Enlightenment to the twentieth century through an examination of institutional and intellectual developments as well as changes in popular religious consciousness and practice.

CR: the former RELS 3530, the former RELS 3595

3560 Christian Thought in the Middle Ages (same as Medieval Studies 3003) is a study of the development of Christianity in the West from the eleventh century to the eve of the Reformation, through an examination of its principal thinkers and the most significant societal forces and events: the crusades, the universities, monasticism, religious dissent, and mysticism.

CR: Medieval Studies 3003

3591 Christian Mysticism is a study of the origins and development of the mystical tradition in Christianity from the fathers of the early Church to contemporary spirituality. The course will examine representative writers and writings from both the Western Christian tradition and Eastern Orthodoxy.

3600 Ancient Myth and Cult (same as Classics 3600) develops the students' knowledge of myth and material culture by examining specific religious sites in the Greek and Roman world as foci of ritual practice. Students will learn to integrate knowledge of the physical remains with the literary and ritual evidence in order to obtain a more integrated understanding of religious life in ancient Greece and Rome.

CR: Classics 3600

3640 Religion and Bioethics is an examination of the religious ethics of health care in the light of foundational concepts of bioethics. Topics to be discussed will include the relation of religion and medicine, as well as specific issues such as abortion, euthanasia, and genetic engineering.

3650 Religion and Social Justice is a study of social justice issues that

arise from an investigation of economic and political systems from the perspective of religious ethics. Topics addressed may include environmental ethics, ecofeminism, gender equity, pacifism, civil disobedience, poverty, and social welfare questions.

3680 Religion and the Problem of Evil is a study of religious approaches to the problem of evil. Attention will be paid to both traditional and contemporary efforts among the world's religions to address the problem.

CR: the former RELS 4800

3800 Re/Presentations of Muslim Women: Gender, Colonialism and Islam is presented in three parts. Firstly, there will be a grounding theoretically in Islam, Orientalism, feminism and contemporary political implications related to the study of Muslim women. Secondly, there will be a consideration of topics which have served as explanations for the "difference" of Muslim women in various contexts, both in contemporary Muslim-majority and minority political situations. Lastly, the course concludes by considering a variety of contemporary ethnographic representations of Muslim women in Egypt, Palestine, France, Turkey, Cyprus and Malaysia.

3810 Modern Interpretations of Religion is a study of modern attempts to analyze, interpret, and reassess the place and significance of religion in human life. Attention will be given to thinkers such as Nietzsche, Marx, Freud, Sartre, Otto, Eliade, and Tillich.

CR: the former RELS 3531

3811 Contemporary Alternative Spirituality is an in-depth examination of one or more forms of contemporary alternative spirituality. Students will study the writings of practitioners of alternative spirituality, as well as social-scientific studies of alternative spiritual groups. Religious movements to be explored include African-American alternative spirituality, Mother Earth and Creation spirituality, Neo-paganism, the New Age Movement, UFO spirituality, and contemporary witchcraft.

3812 Religion and Disney: Not Just Another Mickey Mouse Course provides an in-depth examination of religious themes and issues arising from and within the philosophies of Walt Disney, the Disney animated films, other Disney feature films, and the Disney theme parks. Theoretical models drawn from the field of Religion and Popular Culture will provide the lens through which the religious dimensions of Disney and Disney fandom will be explored.

PR: completion of RELS 2812 is recommended but not required

3820 Religion and the Arts (same as Visual Arts 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture, and dance.

CR: Visual Arts 3820

3830 Religion, Science and Technology - inactive course.

3831 Religious Themes in Contemporary Songwriting is a study of religious themes in contemporary songwriting through the in-depth examination of the work of a selection of contemporary songwriters. The course will explore how religious questions and themes are handled in contemporary song and explore how song as an artistic medium expresses religious meaning. Songwriters to be explored may include the following: Bob Dylan, Bob Marley, Joni Mitchell, Leonard Cohen, Van Morrison, Tori Amos, Nick Cave, Alanis Morissette, Julie Miller, the Louvin Brothers, the Stanley Brothers, Hank Williams, etc.

3850 Religion and Healing - inactive course.

3860 Implicit Religion: The Sacred in Secular Places is an in-depth examination of the concept of implicit religion. The course will explore the concept of "the sacred" through an examination of the ideas of such theorists as Eliade, Turner, and Bailey and will examine the claims of some Religious Studies scholars that the sacred can be found in secular contexts.

3880 Spirituality and the Earth is an examination of the attitudes of various religious traditions to the environment. Special attention will be paid to Native American spirituality.

PR: 3 credit hours in Religious Studies beyond the first-year level or departmental permission

3900 Religion in Newfoundland and Labrador: Beginnings is a study of religion and its role in Newfoundland society from the seventeenth century to the middle of the nineteenth century. Attention will be given to the origin, growth, and consolidation of the Anglican, Roman Catholic, Methodist, Moravian, and Congregational churches.

3901 Religion in Newfoundland and Labrador: The Nineteenth and Twentieth Centuries is a study of religion and its role in Newfoundland society from the middle of the nineteenth century to the present. The course will include the history of the Anglican, Roman Catholic, United (Methodist), Congregational, and Presbyterian churches in Newfoundland and the establishment and social significance of the Pentecostal movement and the Salvation Army.

4201-4230 Biblical Studies: Special Subjects are courses which will be

offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision.

PR: permission of the Department

4300-4330 World Religions: Special Subjects are courses which will be offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision.

PR: permission of the Department

4460 Folk Religion - inactive course

4500 and 4510 Seminar in the Philosophy of Religion - inactive course.

4700-4730 Christian Thought and History: Special Subjects are courses which will be offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision.

PR: permission of the Department

4801-4830 Religion, Ethics, and Modern Culture: Special Subjects are courses which will be offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision.

PR: permission of the Department

4902-4910 (Excluding 4904) Language Studies: Special Subjects are designed to provide students with some basic knowledge of the languages necessary for studying the original texts of the major world religions. The languages presently offered through the Department are Mishnaic Hebrew, Aramaic, Coptic, Pali, Tibetan, Japanese, Manchu, Arabic, and Chinese. These courses will be offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision. In addition to those languages mentioned above, courses in Latin and New Testament Greek are available from the Department of Classics and courses in Sanskrit from the Department of Linguistics.

4998 Comprehensive Examination for Honours Students will be based on a program of assigned reading related to the general subject area of the student's dissertation.

4999 Honours Essay for Honours Students may be required as part of the honours program.

10.27 Russian

For Russian course descriptions see under German.

10.28 Sociology

Sociology courses are designated by SOCI.

1000 Introduction to Sociology is an introduction to the concepts, principles, and topics of Sociology. This course is a prerequisite to most departmental courses.

CR: the former SOCI 2000

2100 Social Inequality introduces the subject of social inequality and stratification, examines social inequality in historical perspective, reviews major theories about social inequality, and considers key social developments in contemporary societies in the area of social inequality.

2110 Economy and Society as its principle task, explores different links that exist between economy and society. Emphasis will be put on embeddedness of economic processes in a broader social context. Several approaches to the study of the embeddedness will be discussed: economic sociology, institutional economics, law and economics, and others. Do we really live in a network society, where the most important thing is to 'get connected'? How important is it to trust people in everyday life and to what extent? What role do power and coercion play in our everyday lives? The course will provide guidelines for finding tentative answers to these questions.

2120 Technology and Society is an examination of the role of technology in society. Topics may include the emergence of modern technological society, the impact of new technologies on social organization and culture, and the institutionalization of science and the production of scientific knowledge. The course also explores the ideological functions of science and technology in advanced industrial societies as well as the question of "the domination of nature".

2210 Communication and Culture (same as the former Sociology/Anthropology 2210 and the former Anthropology 2210) is an examination of

verbal and non-verbal systems of communication, and the influence of language on human cognition.

CR: the former Sociology/Anthropology 2210, the former Anthropology 2210

2230 Newfoundland Society and Culture (same as the former Sociology/Anthropology 2230, the former Anthropology 2230, and Folklore 2230) focuses on the social and cultural aspects of contemporary island Newfoundland.

CR: Folklore 2230, the former Sociology/Anthropology 2230, the former Anthropology 2230

2240 Canadian Society and Culture (same as the former Sociology/Anthropology 2240 and the former Anthropology 2240) is a descriptive and analytic approach to the development of Canadian society and culture.

CR: the former Sociology/Anthropology 2240, the former Anthropology 2240

2250 Changing World is a sociological analysis of contemporary world issues and social problems.

2270 Families (same as the former Sociology/Anthropology 2270 and the former Anthropology 2270) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

CR: the former Sociology/Anthropology 2270, the former Anthropology 2270

3030 Political Sociology is an introduction to the sociological foundations of political life. Topics to be examined include voting behaviour, comparative power systems, ideologies, mass movements, parties, voluntary associations, and bureaucracies. Attention is given to the concepts of class, status, command, power, authority, and legitimacy.

CR: the former Political Science 3030
PR: SOCI 1000 or the former 2000

3040 Introduction to the Methods of Sociological Research provides elementary familiarization with the study of sociology. To this end various strategies for posing and answering sociologically grounded questions will be explored. We take you 'behind the scenes' of the research process to provide basic research skills and strengthen your capacity to critically read and evaluate the research-based writing of others.

PR: SOCI 1000 or the former 2000

3041 Theory and Practice of Sociological Research develops and elaborates upon work introduced in SOCI 3040. Students will more deeply explore the theories of knowledge that underpin social research. They will further hone their abilities to assess different forms of sociological work and to craft research questions. Instruction takes place in a classroom equipped with the computer hardware and software necessary for all students to gain experience performing literature searches and both qualitative and quantitative research. This course includes lectures, discussion, and hands-on experience with sociological research.

CO: SOCI 3040

PR: SOCI 1000 or the former 2000, and one Sociology course at the 2000 level

3120 Social Psychology examines sociological perspectives on social psychology: the physiological and psychological basis of sign and symbol use, the context and emergence of self, identity, role, encounters, social relationships, altercasting.

PR: SOCI 1000 or the former 2000

3130 Sociology of Gambling provides a critical overview of the major social and cultural aspects of modern gambling in terms of leisure, work and economic development, social inequality, health and illness, deviance and crime, and policy. Special attention is directed at the promotion of modern gambling by the state (lotteries, casinos, video lottery terminals, slot machines, and horse racing).

PR: SOCI 1000 or the former 2000

3140 Social Movements (same as the former Sociology/Anthropology 3140 and the former Anthropology 3140) is an examination of social movements which challenge prevailing social institutions and cultural values. Social movements considered may include religious cults and sects, millenarian movements, attempts at utopian and communal living, feminism, labour and revolutionary movements.

CR: the former Sociology/Anthropology 3140, the former Anthropology 3140

PR: SOCI 1000 or the former 2000

3150 Classical Social Theory is an introduction to the work of major 19th and early 20th-century social theorists including Marx, Durkheim, Weber and Freud.

PR: SOCI 1000 or the former 2000

3160 Contemporary Social Theory is an exploration of selected topics from issues in contemporary social theory, including theories of feminism, the state, the environment, culture, organization, and communication.

PR: SOCI 1000 or the former 2000, and SOCI 3150

3180 Minority Groups examines the nature of minority group status in society and various examples of minority groups in past and present societies, reviews theoretical perspectives on minority groups, and explores various aspects of the relationship between minority groups and the rest of society.

CR: the former SOCI 3304

PR: SOCI 1000 or the former 2000

3200 Population is an Introduction to demography, the scientific study of human populations, their size and composition, and the processes by which they change over time: nuptially, fertility, mortality, and migration. Includes analyses of past and present Newfoundland populations.

PR: SOCI 1000 or the former 2000

3220 Work and Society (same as the former Sociology/Anthropology 3220 and the former Anthropology 3220) is an historical and comparative perspective on the cultural and social organization of work, its determinants and human implications.

CR: the former Sociology/Anthropology 3220, the former Anthropology 3220

PR: SOCI 1000 or the former 2000

3260 Social and Economic Development (same as Anthropology 3260) is an examination of theories of development including a critical analysis of empirical situations to which they are applied.

CR: Anthropology 3260, the former Sociology/Anthropology 3260

PR: SOCI 1000 or the former 2000

3290 Deviance examines major sociological theories and methodological techniques central to the study of deviance and crime. The distribution, attributes and explanations of a variety of forms of deviance are examined, which may include violence, sexual deviance, delinquency, addiction, mental disorder, theft, organized crime, political deviance and corporate deviance.

PR: SOCI 1000 or the former 2000

3300-3313 Sociological Specialties will have a topic of current interest and importance, announced by the Department for each term, such as racial and ethnic relations, sociology of religion, art, politics, language, conflict, stratification, knowledge, selected social problems.

3317 Oil and Society (same as the former Sociology/Anthropology 3317 and the former Anthropology 3317) is an examination of the sociology of the Western oil industry and of the social and cultural implications of oil activities for those regions in which they occur. Particular attention will be paid to North Atlantic societies: Scotland, Norway, and Atlantic Canada.

CR: the former Sociology/Anthropology 3317, the former Anthropology 3317

PR: SOCI 1000 or the former 2000

3318 Culture and Aging (same as the former Sociology/Anthropology 3318 and the former Anthropology 3318) is an Introduction to the study of aging from a social and cultural perspective. Distinctions between the biological and social elements of the aging process will be examined. The overview of social and cultural gerontology includes social, economic and political influences on later life, as well as the culture-based needs and aspirations of the aged.

CR: the former Sociology/Anthropology 3318, the former Anthropology 3318

PR: SOCI 1000 or the former 2000

3320 Terrorism and Society (same as the former Sociology/Anthropology 3320 and the former Anthropology 3320) is an examination of the recourse to violence as a recurring phenomenon in social and political movements. Consideration will be given to problems of classifying and explaining various forms of "terrorism", and to discussing their consequences for society.

CR: the former Sociology/Anthropology 3320, the former Anthropology 3320

PR: SOCI 1000 or the former 2000

3395 Criminal Justice provides an introduction to the sociological perspectives on our system of formal social control (police, courts, corrections). Special attention is directed at how social structure and social inequality (class, ethnicity and race, gender) influence criminal justice decisions. Topics discussed include public opinion on crime and criminal justice, offenders and victims in the system, consensus and conflict in the creation of criminal law, finding a delicate balance between police powers for crime control and democratic rights, types of sentencing options and rationales, and the dual and conflicting goals of prisons and alternatives to incarceration.

PR: SOCI 1000 or the former 2000, and SOCI 3290

3400 Sociology of Youth explores the social construction of youth and reviews major theoretical approaches to the study of youth within Western Society. The course examines youth in relation to culture and identity, place and space, social inequalities, and social institutions.

PR: SOCI 1000 or the former 2000

3410 Sociology of Sport (same as Human Kinetics and Recreation 3410) is an examination of the relationship between sport and society. Areas could include social origin of sport, social history of sport, religion and sport, sport

and socialization, sport and social stratification, gender and sport, violence in sport, sport and nationalism.

CR: Human Kinetics and Recreation 3410

PR: SOCI 1000 or the former 2000

3420 Sociology of Gender provides a comprehensive introduction to the major themes, theories and research questions addressed by sociologists studying 'gender'. The economic, social, cultural and political aspects of gender formations, in comparative Canadian and transnational contexts, will be examined.

PR: SOCI 1000 or the former 2000

3630 New Media Methods in Social Research (same as Anthropology 3630) will explore non-print means for recording social behavior and will utilize various forms of the media as a descriptive and an analytic tool.

CR: Anthropology 3630, the former Sociology/Anthropology 3630

PR: SOCI 1000 or the former 2000

3710 Post-Soviet Transformations will explore problems of development in post-Soviet countries, examining them in a broader context of modernization. 'Catch-up' modernization gives rise to a set of problems related to institutional importation, e.g., a gap between formal and informal institutions. These problems exist in Russia as well as in a number of other less-developed countries.

PR: SOCI 1000 or the former 2000

3731 Sociology of Culture is a comparative examination of major contemporary sociological texts on the relationship between culture, broadly understood as symbolic systems, and social structure

PR: SOCI 1000 or the former 2000

4040 Advanced Methods of Social Research is conceptualization and empirical research. Selection of appropriate indicators. Multidimensional classification. Multivariate analysis. Special aspects of multivariate analysis. Panel analysis. Group analysis. The structure of arguments. Clarification of concepts.

PR: SOCI 3040 and 3041

4071 Social and Cultural Aspects of Health and Illness (same as Anthropology 4071) will cover topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbiotic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine.

CR: Anthropology 4071, the former Sociology/Anthropology 4071

PR: SOCI 3040 and 3150

4074 Ritual and Ceremony (same as the former Sociology/Anthropology 4074 and the former Anthropology 4074) is about ritual and ceremony, as both analytic and descriptive concepts, in both industrial states and subsistence-oriented societies. Topics examined could include: the universality of ritual and ceremony; essential differences between ritual and ceremony; their relative importance in non-industrialised and industrialised societies; the place of symbolism in ritual and ceremony; and the relationship between ritual, ceremony, religion and the sacred.

CR: the former Sociology/Anthropology 4074, the former Anthropology 4074

PR: SOCI 3040 and 3150

4077 Advanced Studies in Terror and Society - inactive course.

4091 Oil and Development (same as the former Sociology/Anthropology 4091 and the former Anthropology 4091) is an advanced seminar which will consider some selected topics dealing with the petroleum industry and its implications for economic development and social change. A comparative approach will be taken, using material from developed, underdeveloped and intermediate regions of the world.

CR: the former Sociology/Anthropology 4091, the former Anthropology 4091

PR: SOCI 3040 and 3150

4092 Gender and Social Theory (same as the former Sociology/Anthropology 4092 and the former Anthropology 4092) is a seminar which will develop the material covered in SOCI 3420 at a more theoretical level. It will cover the history of social thought as it applies to issues of gender, and will discuss some theoretical debates in the area of gender and social theory.

CR: the former Sociology/Anthropology 4092, the former Anthropology 4092

PR: SOCI 3040, 3150, 3420 or permission of the instructor

4093-4099 (Excluding 4096) Special Areas in Sociology will have the content announced when offered.

PR: SOCI 3040 and 3150

4100 Internship is a part-time, one-semester internship course, and is normally an unpaid supervised field placement for academically strong sociology majors. The goal is to help give students basic skills required for employment in nonprofit organizations in the social services and arts management.

UL: six hours per week of worksite activities over a period of eight weeks as well as classroom instruction during part of the term

4100-4109 (Excluding 4100, 4104 and 4107) Special Topics in Institutional Analysis is advanced analysis from a sociological perspective of issues pertaining to specific social institutions.

PR: SOCI 3040 and 3150

4104 Environmental Sociology examines the social forces that drive environmental degradation and responses to environmental issues. The course explores how environmental issues, such as climate change, fisheries collapse, or deforestation, are intertwined with systems of social power and inequality. Through this course, students will learn how a sociological perspective helps address the causes and potential solutions for environmental problems and conflicts.

CO: SOCI 3040, SOCI 3150 and 3 additional credit hours in Sociology courses at the 3000 level, or permission of the course instructor

PR: SOCI 3040, SOCI 3150 and 3 additional credit hours in Sociology courses at the 3000 level, or permission of the course instructor

4107 Women and Technological Change (same as the former Women's Studies 4107) is an advanced seminar which provides an interdisciplinary survey of the effects of technology on women's lives. Topics could include: The historical development of domestic technology; changes in workplace technology and their impact on women; assessing technologies from a feminist perspective; the design of technological systems; biomedical and reproductive technologies; information technologies; biotechnology; development in architecture and design; women, development, and technology; women and weapons technology; women and ecology; future technological change and women's lives. The course will combine seminar discussions of reading with films, workplace tours and guest speakers.

CR: the former Women's Studies 3009, the former Women's Studies 4107
PR: SOCI 3040 and 3150

4200-4220 (Excluding 4201, 4204, 4212 and 4213) Special Topics in Sociology will have topics to be studied announced by the Department.

PR: SOCI 3040 and 3150

4201 The Sociology of Gender, Health and Risk is a seminar course that critically examines how gender structures risk factors and health outcomes and shapes how we experience and understand bodies and minds in relation to health and risk. Topics may include transgender and transsexual health, masculinities and femininities, the body, mental health, leisure and sport, the health care system, and occupational health and safety.

CR: Gender Studies 3100

PR: SOCI 3040 and 3150

4212 Sociology of Policing is a seminar course that focuses on the role policing plays in society, the social, economic, and political factors that shape policing services, and the policies that may be implemented to strengthen policing in the future. The popular view of the police role, detective myths and effectiveness, community policing, police socialization, policing special types of problems, police misconduct, and the expansion of private policing are considered.

PR: SOCI 3040 and 3150

4213 Sociology of Sexuality explores the socially constructed nature of sexuality, and examines how concepts of sexuality are used in the current North American context as well as across different times and cultures. The course explores sex and sexuality in connection to community and identity, social problems, social control, and political resistance.

PR: SOCI 3040 and 3150

4230 Gender and Development is a seminar course focusing on theoretical and empirical explanations of how development processes affect gender inequality and relations between men and women. The course provides students an understanding of how the theories, actors, and ongoing challenges of development interact with and work to shape socially constructed gender relations in a global perspective. Special attention is paid to how globalization influences gender in the development context.

CR: the former SOCI 4204

PR: SOCI 3040 and 3150

4240 Development Issues and Policies in Newfoundland and Labrador is a senior-level seminar course that focuses on the interaction between sociological research and theory on the one hand and government policymaking and implementation on the other with respect to social and economic development in Newfoundland and Labrador.

PR: SOCI 3040 and 3150

4995 Honours Essay is a part of the honours program.

10.29 Spanish

For Spanish course descriptions see under French.

10.30 University

University courses are designated by UNIV.

1010 The University Experience introduces students to the different modes of enquiry that one finds in the University, the interrelatedness of knowledge and the role of the University in society. It also provides students with tools and techniques of study and research that can lead them to academic success and fulfilling career.

1020 Applied Cognitive and Affective Learning Strategies for Undergraduate Students introduces students to cognitive and affective learning strategies and techniques with an emphasis on the application of these techniques in the students' own learning repertoires together with an overview of relevant research from cognitive psychology and related fields. Topics covered will include information processing, memory, forgetting, problem solving, metacognition, general and specific learning strategies, learning styles, and affective strategies.

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Faculty Description

The Faculty of Business Administration is known for innovative, high-quality academic programs, basic and applied research, and

responsive community outreach activities, including those provided by the **Gardiner Centre**. The faculty prepares students to succeed in a competitive work place. Each business program is designed to give students the skills and experience needed to advance their careers. The faculty's close-knit community provides students with many opportunities to get involved and network with fellow classmates.

Additional information regarding the Faculty of Business Administration is available at www.business.mun.ca. Information about the Gardiner Centre is available at www.busi.mun.ca/gardinercentre/.

Students must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

2.1 Faculty History

In 1954, the University approved a bachelor of commerce undergraduate degree. Over the next two decades, the Department grew substantially in the size of its student enrolment and program offerings. In 1973, it was renamed the School of Business Administration and Commerce, and the University established the first co-operative undergraduate business program in Canada. In 1981 the School was granted faculty status, reflecting the growth and diversity of its academic programs.

In 2002, the Faculty of Business Administration became the first in Atlantic Canada to be accredited by AACSB International—the Association to Advance Collegiate Schools of Business. AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, stressing academic excellence and dedication to continuous improvement. This accreditation is the highest distinction offered to business schools both nationally and internationally.

2.2 Vision Statement

Our Vision is to enhance our reputation as a leading business school with an international presence and national and provincial relevance.

2.3 Mission Statement

Our Mission is to prepare our students for global success, to engage in scholarship with global reach and local relevance, and to serve as a catalyst for the success of organizations and individuals. In this way we fulfill our special obligation to the people of Newfoundland and Labrador.

1. We provide comprehensive business education that combines theory and practice, inspiring students to become successful and valued members of their professions and communities.
2. We conduct and disseminate high quality basic and applied research that informs understanding of the core disciplines of business and management and enhances organizational practice.
3. We engage with our community to share expertise, advance and apply business knowledge, and develop and deliver best practices.

3 Description of Programs

Students must meet all regulations of the Faculty of Business Administration in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

All courses of the Faculty are designated by BUSI.

3.1 Undergraduate Programs

The following undergraduate programs are available:

1. **Minor in Business Administration:** is comprised of eight business courses (24 credit hours) and is available to students who are completing non-Business degree programs which provide for the completion of a minor.
2. **Minor in International Business:** is comprised of eight business courses (24 credit hours) and is available to students who are completing non-Business degree programs which provide for the completion of a minor.
3. **Diploma in Business Administration:** is a 20-course (60 credit hour) program designed to meet the needs of individuals who hold full- or part-time employment and wish to complement their work experience with theoretical business training. The majority of the required courses are offered through distance education.
4. **Bachelor of Commerce (Co-operative):** is a full-time, 45-course (135 credit hour) program with a structured format. This five-year degree includes three four-month work terms. Students have the opportunity to concentrate in accounting, finance, human resource and labour relations, information systems, international business, marketing, operational research, small business/entrepreneurship, or supply chain management.
5. **Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts:** is comprised of 50-courses (150 credit hours). Students in the Bachelor of Commerce (Co-operative) program may simultaneously complete the requirements for a Bachelor of Arts program. Some degree requirements are modified for students pursuing joint degrees.
6. **Bachelor of Commerce (Co-operative) (Honours):** signifies superior academic achievement.
7. **Bachelor of Business Administration (B.B.A.):** is a 40-course (120 credit hour) general business program with a flexible course structure. This four-year degree may be completed in-class, via distance education, or a combination of both. It can be completed full- or part-time.
8. **Bachelor of Business Administration (Honours):** signifies superior academic achievement.
9. **International Bachelor of Business Administration (i.B.B.A.):** is comprised of 40 courses (120 credit hours) and is designed to produce business professionals with a global perspective. This four year degree differs from traditional business programs in its requirements that graduates must complement the usual set of business skills with an understanding of the international environment as well as with cross-cultural skills and experience relevant to a particular global region (e.g., Asia, Europe or Latin America).
10. **International Bachelor of Business Administration (i.B.B.A.) (Honours):** signifies superior academic achievement.

3.1.1 Business Co-operative Education

General management of the work terms in the Co-operative Program is the responsibility of Business Co-operative Education. Through

its co-ordinators, it is responsible for assisting potential employers to become involved in the program, for the continual development of employment opportunities, for arranging student-employer interviews, for counselling of students, for visiting students on their work assignments and for the evaluation of the work term.

Students and employers choose each other through the job competition process. Job advertisements are posted and students may apply for up to twelve positions. Employers interview students, and both the students and employers express their preferences for one another.

Students are then placed by Business Co-operative Education to reflect expressed preferences. Placement is not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of students who are required to withdraw from the program, Business Co-operative Education has no responsibility for placement until they have been readmitted to the program.

Salaries paid to co-operative students are determined by employers based upon their internal wage structures, and tend to increase as the student progresses through the program and assumes more responsibility. However, students should not expect the income from work terms to make them completely self-supporting.

Students in the Co-operative Program give permission to prospective employers, in the course of the placement process, to have access to their records, which contain their academic marks and their work term evaluations. After accepting a position, students may not withdraw from a specific job situation unless prior permission is obtained from the Committee on Undergraduate Studies.

3.2 Graduate Programs

Programs leading to the **Master of Business Administration (M.B.A.)**, the **Master of Employment Relations (MER)**, and the **Ph.D.(Management)** degrees are described in the **School of Graduate Studies** section of the University Calendar.

4 Program Regulations

1. The Office of the Registrar and the Faculty of Business Administration will assist students with any questions or problems which might arise concerning the interpretation of academic regulations. It is, however, the responsibility of students to see that their academic programs meet the University's regulations in all respects.
2. No student shall obtain more than one undergraduate degree from the Faculty of Business Administration.
3. The Faculty of Business Administration may recommend that transfer credit for certain Business courses be awarded on the basis of successful completion of professional courses that lead to a professional designation (e.g. C.A., C.G.A., C.M.A.). Applications for transfer credit should be made through the Office of the Registrar.
4. The Faculty of Business Administration may approve that credit for certain Business courses successfully completed through Memorial University of Newfoundland's former Extension Services Division be granted upon application to the Registrar for transfer credit evaluation.

4.1 Regulations for Business Minors

1. Students who are completing a non-Business degree program which provides for the completion of a minor may complete a minor in either Business Administration or International Business.
2. Students who wish to undertake either Business minor program must have completed a minimum of 30 credit hours. Application is made in the space provided on the Declaration/Change of Academic Program Form which must then be approved by the Dean of the Faculty of Business Administration or delegate. The form may be obtained in person at the Office of the Registrar or at www.mun.ca/regoff/registration/Declare_Change_Academic_Program.pdf. Admission into the minor program is selective: at the time of application a student must have a cumulative average of at least 65%.
3. A **Minor in Business Administration** shall consist of 24 credit hours comprising the following courses: BUSI 1000, 1101, 1210, 3310, 4000, 4500, and two courses chosen from BUSI 1600, 2101, 2210, 3101, 3700, 4320 and 4330.
4. A **Minor in International Business** is offered as a special program of an interdisciplinary nature, consisting of 24 credit hours as follows:
 - a. BUSI 1101, 1210, 3310, 5302, Political Science 2200; and
 - b. Three further courses from 6040, 6311, 6330, 7005, 6550, 7240, a pre-requisite for one of the preceding courses and/or from cognate courses such as Economics 3030, 4030, Political Science 3210, and 3250, to be chosen through prior consultation with the Coordinator of the International Business program.
5. Course prerequisites for all courses shall apply to both Business minors. Students should note, for example, that the prerequisites for BUSI 4500 are BUSI 1101, Statistics 2500 and Economics 2010, and that the prerequisites for BUSI 5302 are BUSI 1000, Economics 2010 and 2020. It should be noted that some courses are not offered every semester.

4.2 Regulations for General Degree of Bachelor of Commerce (Co-operative)

4.2.1 Admission Modes and Requirements

4.2.1.1 Direct Entry (for High School Students)

Students may apply for admission into first year of the Bachelor of Commerce (Co-operative) program (Terms A/B) directly from high school by indicating this in the appropriate place on their Undergraduate Application for Admission/Readmission to Memorial University of Newfoundland. Direct entry from high school is subject to the applicant's final acceptance to the University and admissibility into either Mathematics 1000 or 1090. Terms A/B normally starts in September.

4.2.1.2 Advanced Standing (for Current Memorial University of Newfoundland Students)

1. Students may apply for admission with Advanced Standing into terms beyond Terms A/B up to and including Term 4. Students applying for admission to a term beyond Terms A/B must have completed all of the courses required in the program up to that term, including the courses required in Terms A/B, with grades high enough to have met promotion requirements. Students applying for admission with advanced standing must complete and submit to the Office of the Registrar the Faculty of Business Administration Application For Admission, normally on or before the deadlines specified in the **University Diary** for the semester in which they intend to begin their program.
2. Admission with Advanced Standing is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce (Co-operative) program.
3. The primary criterion used in reaching decisions on applications for admission with advanced standing is overall academic

achievement. Selection, therefore, will be based on a student's overall academic performance. Students with weak overall academic records are unlikely to be admitted.

4.2.1.3 Transfers From Other Post-Secondary Institutions

1. Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified in the **University Diary** for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. Subject to items 2. and 3. under **Advanced Standing (for Current Memorial University of Newfoundland Students)** above, transfer students from other universities will be placed in that Term of the program judged by the Admissions Committee of the Faculty to be appropriate considering equivalent credits. Regardless of the Term into which they are admitted, transfer students must complete a minimum of two work terms.
2. Subject to items 2. and 3. under **Advanced Standing (for Current Memorial University of Newfoundland Students)** above, graduates of a three-year community college business diploma program may be considered for admission into Term 3. Space for Term 3 admissions is limited and competitive and admission decisions will be based on overall academic performance. Specific course requirements will be determined on an individual basis at the time of admission.

4.2.2 The Curriculum

1. To graduate with the Bachelor of Commerce (Co-operative) degree, every candidate shall successfully complete 135 credit hours over nine academic terms in the Co-operative Program and shall normally be required to successfully complete three work terms. The 135 academic credit hours are distributed as follows: 30 credit hours over the course of Terms A/B and 15 credit hours in each of Terms 1 through 7.
2. Students who have been admitted to the Bachelor of Commerce (Co-operative) program must complete courses in academic terms or "blocks" in the sequence, order and course load as set out in the **Table 1 Bachelor of Commerce (Co-operative) Curriculum**. Exceptions to this prescribed program, including specified course load, must have the approval of the Admissions Committee or of the Committee on Undergraduate Studies of the Faculty.
3. By the end of the Winter semester of their first year, Terms A/B students must have successfully completed the following 30 credit hours:
 - a. Six credit hours in English courses which must include English 1110 or 1021;
 - b. Mathematics 1000;
 - c. Economics 2010 and 2020;
 - d. BUSI 1000;
 - e. Twelve additional credit hours in non-Business electives. Students who wish to complete the **Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts** [see entry immediately following The Curriculum below] are strongly advised to include courses in a second language and courses in the subject of the intended Major program.
4. The curriculum of courses and work terms beyond the 30 credit hours required in Terms A/B is as follows:
 - a. Statistics 2500
 - b. Fifty-four credit hours in core Business Administration courses: 1101, 1210, 1600, 2010, 2101, 2210, 2400, 2710, 3310, 3401, 3700, 4000, 4050, 4320, 4330, 4500, 5301, and 7000.
 - c. At least 21 credit hours but no more than 36 credit hours in Business electives which must be chosen from **Table 4 Business Electives**.
 - d. At least 12 credit hours but no more than 27 credit hours in non-Business electives.
 - e. Three work terms of four months duration each.

Unspecified credits may not be used to fulfil the requirements outlined in a., b., and e. above.
5. Notwithstanding clauses 2. and 4. and bullet three of **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**, **Classification of Students**, students do not require special permission to register for courses while on work terms if the courses are in addition to the prescribed program.

Table 1 Bachelor of Commerce (Co-operative) Curriculum

Fall and Winter Terms A/B	6 credit hours in English courses which must include English 1110 or 1021 Mathematics 1000 Economics 2010 and 2020 BUSI 1000 12 additional credit hours in non-BUSI electives
Fall Academic Term 1	BUSI 1101 BUSI 1210 Statistics 2500 6 credit hours chosen from: BUSI 1600, BUSI 2010, BUSI 2400, BUSI 2710, and 3 credit hours of electives*
Winter Academic Term 2	BUSI 2101 BUSI 2210 Remaining 9 credit hours chosen from: BUSI 1600, BUSI 2010, BUSI 2400, BUSI 2710, and 3 credit hours of electives*
Spring	
Fall Academic Term 3	BUSI 3310 BUSI 3401 BUSI 3700 6 credit hours in elective courses*
Winter Work Term 1	BUSI 399W
Spring Academic Term 4	BUSI 4000 BUSI 4050 BUSI 4320 BUSI 4330 BUSI 4500
Fall Work Term 2	BUSI 499W
Winter Academic Term 5	BUSI 5301 12 credit hours in elective courses*
Spring Work Term 3	BUSI 599W
Fall Academic Term 6	BUSI 7000 12 credit hours in elective courses*
Winter Academic Term 7	15 credit hours in elective courses*

* Of the 48 credit hours in elective courses required in the program from Terms 1 through 7, 21 – 36 credit hours must be chosen from Business electives in **Table 4 Business Electives** and 12 – 27 credit hours must be non-Business electives.

4.2.3 Regulations for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts

Any student who is admitted into the Bachelor of Commerce (Co-operative) program may simultaneously complete the requirements for a Bachelor of Arts program. Under those circumstances, regulations for the Bachelor of Commerce (Co-operative) program will be relaxed as follows. Notwithstanding clauses 4.c. and 4.d. of **The Curriculum** under the **Regulations for the General Degree of Bachelor of Commerce (Co-operative)**, students in the Bachelor of Commerce (Co-operative) program who are concurrently completing the Bachelor of Arts degree will be permitted to make the following adjustments to those clauses:

1. clause 4.c. - no fewer than 15 credit hours, but no more than 36 credit hours, in Business electives which must be chosen from **Table 4 Business Electives**.
2. clause 4.d. - no fewer than 12 credit hours, but no more than 33 credit hours, in elective courses chosen from the Faculty of Arts.

These adjustments to the normal curriculum will only be permitted for students who are graduating with the Bachelor of Commerce (Co-operative) degree and the Bachelor of Arts degree at the same convocation. In order to meet all of the requirements of both degree Programs at the same time, students who are completing the joint degrees are strongly advised to follow **Table 2 Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts)**.

Table 2 Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts)

Fall and Winter Terms A/B	6 credit hours in English courses which must include English 1110 or 1021 Mathematics 1000 Economics 2010 and 2020 BUSI 1000 12 additional credit hours in non-BUSI electives [see Note 1. below]
Fall Academic Term 1	BUSI 1101 BUSI 1210 Statistics 2500 6 credit hours chosen from: BUSI 1600, BUSI 2010, BUSI 2400, BUSI 2710, and 3 credit hours in Major, Core or elective courses [see Note 1. below]
Winter Academic Term 2	BUSI 2101 BUSI 2210 Remaining 9 credit hours chosen from: BUSI 1600, BUSI 2010, BUSI 2400, BUSI 2710, and 3 credit hours in Major, Core or elective courses [see Note 1. below]
Spring	[see Note 2. below]
Fall Academic Term 3	BUSI 3310 BUSI 3401 BUSI 3700 At least 6 credit hours in Major, Core or elective courses [see Note 3 below]
Winter Work Term 1	BUSI 399W [see Note 2. below]
Spring Academic Term 4	BUSI 4000 BUSI 4050 BUSI 4320 BUSI 4330 BUSI 4500
Fall Work Term 2	BUSI 499W [see Note 2. below]
Winter Academic Term 5	BUSI 5301 At least 12 credit hours in Major, Core or elective courses [see Note 3. below]
Spring Work Term 3	BUSI 599W [see Note 2. below]
Fall Academic Term 6	BUSI 7000 At least 12 credit hours in Major, Core or elective courses [see Note 3. below]
Winter Academic Term 7	At least 15 credit hours in Major, Core or elective courses [see Note 3. below]

- Notes: 1. The Bachelor of Arts requires completion of a Major program, a Minor program, a set of Core Requirements, and elective courses, totalling at least 78 credit hours in courses offered by departments within the Faculty of Arts (or Computer Science, Mathematics and Statistics, and Psychology). When the Bachelor of Arts is completed jointly with the Bachelor of Commerce (Co-operative):
- Minor program requirements are satisfied by BUSI courses specified in **Table 1 Bachelor of Commerce (Co-operative) Curriculum** above.
 - Core requirements for English and Numeracy/Science are satisfied by courses completed in Terms A/B or during Terms 1 or 2 of the Bachelor of Commerce (Co-operative) degree.
 - It is recommended that the Core Requirement for 6 credit hours in courses in a second language be completed in Terms A/B of the Bachelor of Commerce (Co-operative) degree program.
 - Core requirements for 6 credit hours in research/writing courses may be satisfied by including two such courses within the 78 credit hours in courses offered by departments within the Faculty of Arts. Please consult the **Undergraduate Registration Procedures** to determine research/writing course offerings in any given semester.
 - Major requirements for the Bachelor of Arts may be satisfied in 36 to 45 credit hours, depending on the department or program chosen. Students are strongly recommended to seek advice from the department or program of their Major to ensure that their proposed degree program is possible within the constraints of course scheduling and prerequisites.
2. Students are advised that, in order to complete the joint degrees within the minimum 150 credit hours, they must complete at least five of the courses required for the Bachelor of Arts as opportunities arise and as courses are offered. These courses may be completed during the Spring semesters between Terms A/B and Term 1, between Terms 2 and 3, or during any of the three Work Terms (for example, in the evening or by distance), or as sixth courses during any of the academic terms (following submission of a course load waiver).
3. To meet the requirements for the Bachelor of Commerce (Co-operative), not fewer than 15 and not more than 36 credit hours in BUSI electives must be chosen from **Table 4 Business Electives**. Students intending to complete the joint degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Arts (or Psychology, Mathematics and Statistics, and Computer Science). Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the joint degrees.

4.2.4 Minor or Cognate From Another Academic Unit

- A student enrolled in the Bachelor of Commerce (Co-operative) program may, using all of the non-Business electives required in the curriculum, complete a minor within the Faculty of Arts, the Faculty of Science, the School of Music, or offered at Grenfell Campus. Regulations for the minor are given under the Calendar entries for the Faculty of Arts, the Faculty of Science, and the School of Music, and under the Calendar entry for Grenfell Campus.
- A student enrolled in the Bachelor of Commerce (Co-operative) program may pursue a minor (or equivalent) in other non-business academic units (where minor programs exist) with permission of that academic unit and permission of the Committee on Undergraduate Studies of the Faculty of Business Administration.

4.2.5 Examination and Promotion for the Bachelor of Commerce (Co-operative)

- The Faculty Council of the Faculty of Business Administration constitutes the examining body for all examinations in Business

courses. In addition, the standing of every student will be assessed by the Committee on Undergraduate Studies in accordance with the promotion requirements outlined in Clauses 2., 3., and 9. below.

2. Students in Terms A/B will be considered for promotion to Term 1 at the end of the Winter semester of their first year. At that time, for promotion from Terms A/B, students must have successfully completed the 30 credit hours prescribed in 3. of **The Curriculum** above, with an overall average on those 30 credit hours of at least 65%. Students who do not satisfy these requirements will be required to withdraw from the program and will not be promoted to Term 1.

Students who have been required to withdraw following Terms A/B may be considered for readmission to the program in accordance with the entry under **Admission Modes and Requirements** above, with the heading **Advanced Standing (for Current Memorial University of Newfoundland Students)**.

A required withdrawal for failure to meet the promotion requirements from Terms A/B will not be reflected on a student's transcript.

3. For promotion from each of Terms 1 through 7, the requirements are the achievement of a passing grade in at least 12 credit hours and an overall average of at least 60% in those courses required in each academic term.

Students in an academic term who do not maintain the appropriate course load as outlined in Clause 2. of **The Curriculum**, and who do not have the prior approval of the Committee on Undergraduate Studies for a reduced course load, will be required to withdraw from the program and will not be promoted.

Students completing Terms 1 through 7 who fail to achieve these standards will be required to withdraw from the program. A required withdrawal from any of Terms 1 through 7 will be reflected on a student's transcript.

Students who meet the academic promotion requirements above but who fail a core course in any of Terms 1 through 7 will be required to successfully repeat that course prior to graduation. Students who meet the promotion requirements above but who fail an elective in any of Terms 1 through 7 will be required to either successfully repeat that elective or successfully complete an additional elective to replace it prior to graduation.

4. The Committee on Undergraduate Studies of the Faculty of Business Administration may promote a student notwithstanding promotion requirements listed in Clause 3. above. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies, and in the case of a student thought likely to succeed in future terms.
5. Students who have been required to withdraw following any one of Terms 1 through 7 may be considered for readmission after the lapse of two semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Admissions Committee, Faculty of Business Administration, a more meaningful course of study would be appropriate.

In order to be considered for readmission, students must formally apply for readmission to the program not later than the deadlines specified in the **University Diary** for the semester in which they wish to recommence their program.

6. The dates for starting and finishing each work term are shown in the **University Diary**.
Successful completion of the work term requirements is a prerequisite to graduation.
7. A competition for work term employment is organized by Business Co-operative Education.
Students may obtain their own work term jobs outside the competition. Such jobs must be confirmed by letter from the employer and approved by Business Co-operative Education on or before the first day of the work period.
By entering the competition, students give permission for Business Co-operative Education to supply their university transcripts to potential employers.
8. A work report on a topic approved by Business Co-operative Education must be submitted for each work term. This report must be approved by the employer and submitted to Business Co-operative Education on or before the deadline scheduled by Business Co-operative Education. Evidence of the student's ability to gather material relating to the report, analyse it effectively, and present it in a clear, logical and concise form, will be required in the report. Late reports will not be graded unless prior permission for a late report has been given by Business Co-operative Education.
9. The overall evaluation of the work term is the responsibility of Business Co-operative Education. The work term shall consist of two components:

Student performance as evaluated by a co-ordinator, given input from the employer, and a work report graded by a co-ordinator or a member of faculty.

Evaluation of the work term will result in the assignment of one of the following final grades:

- a. *Pass with Distinction*: Indicates **EXCELLENT PERFORMANCE** in both the work report and work performance. The student is commended for his/her outstanding performance in each of the required components; pass with distinction has been awarded to each of the work report and work performance.
- b. *Pass*: Indicates that **PERFORMANCE MEETS EXPECTATIONS** in both the work report and work performance. The student fully meets the requirements of a passing work report and completely satisfactory work term performance.
- c. *Fail*: Indicates **FAILING PERFORMANCE** in the work report and/or the work performance.

For promotion from the work term, a student must obtain **PASS WITH DISTINCTION** or **PASS**.

If a student fails to achieve the standards outlined above, the student will be required to withdraw from the program and may be considered for readmission after the lapse of two semesters, at which time the student will be required to complete a further work term with satisfactory performance before being admitted to any further academic term in the Faculty.

10. A student who has been required to withdraw from the program as a result of failing to meet the requirements of either two academic terms or two work terms will not be eligible for readmission to the program.
11. Students are not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies upon the recommendation of Business Co-operative Education. Students who drop a work term without permission, or who fail to honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause their discharge from the job, will normally be awarded a grade of FAL for that work term. Permission to drop a work term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved work term in lieu of the one dropped.

4.2.6 Regulations for the Honours Degree of Bachelor of Commerce (Co-operative)

An Honours Degree of Bachelor of Commerce (Co-operative) signifies superior academic achievement.

1. To be considered for an Honours Degree, the candidates must so indicate on the prescribed "Application for Graduation" form. This form may be obtained at the Office of the Registrar or on-line at the Memorial Self Service at www3.mun.ca/admit/twbkbis.P_WWWLogin.
2. Candidates for the Honours Degree of Bachelor of Commerce (Co-operative) shall comply with all regulations governing the **General Degree of Bachelor of Commerce (Co-operative)**.

3. A candidate shall obtain at least a 75% average and a grade point average of at least 3.5 on the courses which comprise the total number of credit hours required for the degree. Candidates are not permitted to repeat or substitute courses for the purpose of meeting these criteria.
4. To be eligible for the Honours degree, a candidate must pass all of the core courses required in Terms 1 through 7 on his/her first attempt.
5. A student who has been required to withdraw from the program as a result of failing to meet the requirements for promotion from academic Terms 1 through 7 or from Work Terms 1, 2, or 3 will not be eligible for an Honours Degree.
6. An applicant for the Honours Degree who fails to fulfill the conditions of Clauses 3., 4., and 5. but fulfills the requirements for a General Co-operative Degree shall be awarded the General Degree of Bachelor of Commerce (Co-operative).

4.3 Commerce Concentrations

Students completing the Bachelor of Commerce (Co-operative) degree may choose to complete their Business electives in a number of different areas or to concentrate in one of the areas outlined below. In either case, students must complete at least 21 credit hours but no more than 36 credit hours in BUSI electives which must be chosen from **Table 4 Business Electives**. A concentration provides the student with the opportunity of broadening knowledge and understanding of one of the following areas. Particular attention should be paid to necessary prerequisites when scheduling courses. Students enrolled in Study Abroad programs should consult with the appropriate Faculty of Business Administration Area Group Coordinator regarding the applicability of courses taken while studying abroad to their chosen concentration.

4.3.1 Accounting

Students electing an Accounting concentration should complete the following courses:

1. BUSI 3101, BUSI 5160, BUSI 5500, BUSI 6100, BUSI 6110, BUSI 6120, BUSI 6130, BUSI 7120; and
2. either BUSI 7110 or BUSI 7160. Normally students pursuing a C.M.A. designation would complete BUSI 7160.

Students intending to pursue the C.A., C.M.A., or C.G.A. designations in general should consult the appropriate body to determine the courses required.

4.3.2 Finance

Students electing a Finance concentration should complete the following courses:

1. BUSI 5500, BUSI 6120, BUSI 6510, BUSI 6550, BUSI 7500, and BUSI 7510; and
2. any three of the following courses: Mathematics 2090, Economics 3000, Economics 3010, Economics 3030, Economics 3150, Economics 4025, Economics 4026, BUSI 5530, BUSI 6100, BUSI 6110, or BUSI 7150.

4.3.3 Human Resources and Labour Relations

Students electing the Human Resources and Labour Relations concentration should complete the following courses:

1. BUSI 6310, BUSI 6320, BUSI 7310, BUSI 7322; and
2. any four of the following: BUSI 6301, BUSI 6311, BUSI 6312, BUSI 6330, BUSI 7315, BUSI 7320, BUSI 7321, BUSI 7330, or Economics 3360.

4.3.4 Information Systems

Students electing an Information Systems concentration should complete the following courses:

1. Six of BUSI 5700, BUSI 5701, BUSI 5702, BUSI 5703, BUSI 6700, BUSI 6701, BUSI 7700, and BUSI 7701; and
2. a. either Geography 2195, Geography 3260, and one of Geography 3202, Geography 4202, Geography 4261
b. or three of the following: Computer Science 1710, Computer Science 2500, Computer Science 2710, Computer Science 2760, Computer Science 3710, Computer Science 3715, Computer Science 4761, Computer Science 4767.

4.3.5 International Business

Students electing an International Business concentration should complete the following eight courses, of which at least five should be from the Faculty of Business Administration:

1. BUSI 5302, Political Science 2200 and either BUSI 6550 or Economics 3030; and
2. any five of the following: BUSI 6040, BUSI 6311, BUSI 6330, BUSI 6550, BUSI 7005, BUSI 7240 and other courses with global or regional business content selected in consultation with the Coordinator of the i.B.B.A. program. These may include courses taken as part of an approved Study Abroad program (up to a maximum of 9 credit hours).

4.3.6 Marketing

Students electing a Marketing concentration should complete the following courses:

1. BUSI 3210, BUSI 5220, and BUSI 7230; and
2. any three of the following: BUSI 5210, BUSI 5217, BUSI 6217, BUSI 6218, BUSI 6230, BUSI 6241, BUSI 6250, BUSI 7240, or BUSI 7250.

4.3.7 Operational Research

Students electing a Operational Research concentration should complete the following eight courses:

1. BUSI 5401, BUSI 5402, BUSI 6400, and BUSI 7400; and
2. any four of: Computer Science 1710, Computer Science 2710, Mathematics 1001, Mathematics 2050, and any Business Information Systems course (or courses) at the 5000 level or above.

4.3.8 Small Business/Entrepreneurship

Students electing a Small Business/Entrepreneurship concentration should complete the following courses:

1. BUSI 5220, BUSI 5600, BUSI 6605, BUSI 7010, BUSI 7600, and BUSI 7610; and

2. any three of the following: BUSI 6120, the former BUSI 6220, BUSI 6250, BUSI 6312, BUSI 6610, BUSI 7230, or BUSI 7240.

4.3.9 Supply Chain Management

Students electing a Supply Chain Management concentration should complete the following courses: BUSI 5401, BUSI 5402, BUSI 6410, BUSI 6415, BUSI 7410, and BUSI 7415.

4.4 Regulations for the Diploma in Business Administration

1. To be considered for admission to the Diploma Program in Business Administration, applicants must normally have satisfied the following requirements:
 - a. Successful completion of 15 academic credit hours as follows:
 - i. Six credit hours in English which must include English 1110 or 1021;
 - ii. Mathematics 1000;
 - iii. BUSI 1000;
 - iv. Three credit hours of non-Business electives.

Only students with an overall average of at least 60% in the courses comprising the 15 credit hours required will be considered for admission to the program.

Overall academic performance is an important criterion in reaching decisions on applications for admission, and will be considered, in addition to the average on the five courses required for admission, in the selection process. Students with weak overall academic records are unlikely to be admitted.
 - b. At least five years of full-time work experience, or equivalent, that is deemed acceptable by the Admissions Committee of the Faculty of Business Administration.

In the case where students have been required to withdraw from one of the Faculty's other undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.
2. To be eligible for the Diploma in Business Administration, a student must:
 - a. have been admitted to the Diploma Program;
 - b. successfully complete the following 45 credit hours in addition to the 15 credit hours required for admission (a total of 60 credit hours):
 - i. Economics 2010 and 2020;
 - ii. Statistics 2500 or equivalent;
 - iii. BUSI 1101, 1210, 1600, 2400, 2710, 3310, 4000, and 4500;
 - iv. Four of the following, one of which must be either BUSI 4320 or 4330: BUSI 2010, 2101, 2210, 3401, 3700, 4050, 4320, and 4330.
 - c. Achieve an overall average of at least 60% in the courses which comprise the 45 credit hours specified in clause 2. b. A student failing to meet this requirement will be required to repeat a course(s) to raise the overall average to the minimum acceptable level.
 - d. Successfully complete a comprehensive case analysis with report (BUSI 450W). BUSI 450W will not be required of students who complete BUSI 4050 from the list in 2.b.iv. above.
 - e. Students planning to pursue their Bachelor of Business Administration (see **Regulations for the General Degree of Bachelor of Business Administration (B.B.A.)**) are encouraged to note the prerequisites for BUSI 7000 and to plan their courses so that they have completed the prerequisites prior to the semester in which they plan to take BUSI 7000.
3.
 - a. Every candidate for the Diploma in Business Administration will be required to complete at least 30 credit hours at this University. The courses comprising these credit hours must be applicable to the Diploma in Business Administration.
 - b. Every candidate for the Diploma in Business Administration, who has completed a Bachelor's degree at this University or another recognized university or university college, will be required to complete at least 30 credit hours at this University beyond those required for that degree. The courses comprising these credit hours must be applicable to the Diploma in Business Administration.

4.4.1 Continuance Regulations

1. The Faculty Council of the Faculty of Business Administration constitutes the examining body for all examinations in Business courses. In addition, the standing of every student will be assessed by the Committee on Undergraduate Studies in accordance with the continuation requirements outlined in 2. below.
2. Students must qualify for continuation after each term of study. To continue, students must have an overall average of at least 60% over their last ten courses taken. In the event that a student has more courses than needed in the earliest term used, the courses with the highest grades in that term will be used.
3. Students who fail to achieve the standards outlined in 2. above normally will be required to withdraw from the program. They may be considered for readmission after a lapse of two semesters. In order to be considered for readmission, students must formally apply for readmission.
4. Students who are required to withdraw a second time are not eligible for readmission into the program.
5. The Committee on Undergraduate Studies of the Faculty of Business Administration may allow a student to continue who fails to achieve the standards outlined in 2. above. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies.

4.5 Regulations for the General Degree of Bachelor of Business Administration (B.B.A.)

4.5.1 The Curriculum

1. To be admitted to the B.B.A. program, students should select the B.B.A. program on their Undergraduate Application for Admission/Readmission to the University or on the Declaration/Change of Academic Program Form.

2. To graduate with the B.B.A., candidates must successfully complete the following 120 credit hours with a Grade Point Average on those 120 credit hours of at least 2.5 and a numeric average on those 120 credit hours of at least 60%:
 - a. Six credit hours of English which must include English 1110 or 1021;
 - b. Mathematics 1000;
 - c. Economics 2010 and 2020;
 - d. Statistics 2500;
 - e. Business 1000, 1101, 1210, 1600, 2010, 2101, 2210, 2400, 2710, 3310, 3401, 3700, 4000, 4050, 4320, 4330, 4500, 5301, and 7000. Students are encouraged to note the prerequisites for 7000 (Strategic Management 2) and to plan their courses so that they have completed the prerequisites prior to the semester in which they plan to take 7000.
 - f. 45 credit hours of electives, of which not more than 21 credit hours may be from Business courses (which must be chosen from **Table 4 Business Electives**).
3. Notwithstanding 1. above, graduates of a three year community college business diploma program may be eligible for exemptions for some of the curriculum requirements of the B.B.A. Students who are granted exemptions on the basis of their college business diploma will be required to complete, at this University, a minimum of 45 credit hours beyond those awarded on the basis of their college diploma. Specific course requirements will be determined on an individual basis by the Undergraduate Programs Office, Faculty of Business Administration.

4.5.2 Minor or Cognate From Another Academic Unit

1. A student enrolled in the B.B.A. program may complete a minor within the Faculty of Arts, the Faculty of Science, the School of Music, or from Grenfell Campus. Regulations for the minor are given under the Calendar entries for the Faculty of Arts, the Faculty of Science, the School of Music, and Grenfell Campus.
2. A student enrolled in the B.B.A. program may pursue a minor (or equivalent) in other non-business academic units (where minor programs exist) with permission of that academic unit and permission of the Committee on Undergraduate Studies of the Faculty of Business Administration.

4.6 Regulations for the Honours Degree of Bachelor of Business Administration

An Honours degree of Bachelor of Business Administration signifies superior academic achievement. The difference between a First Class General B.B.A. Degree and an Honours B.B.A. Degree is that for a First Class B.B.A., a candidate must obtain a grade point average of at least 3.5 on the best 120 credit hours which meet curriculum requirements, and for an Honours B.B.A., a candidate must obtain a grade point average of at least 3.5 on the earliest attempt at courses which meet curriculum requirements.

1. To be considered for an Honours degree, a candidate must so indicate on the University's official Application for Graduation form. This form may be obtained at the Office of the Registrar or on-line at the Memorial Self Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin.
2. A candidate for the Honours Degree of Bachelor of Business Administration shall:
 - a. comply with all regulations governing the General Degree of Bachelor of Business Administration, and
 - b. obtain at least a 75% average and a grade point average of at least 3.5 on the courses prescribed in **The Curriculum**. Candidates are not permitted to repeat or substitute courses for the purpose of meeting these criteria. In the case of a student who has repeated courses and/or who has completed more than 120 credit hours at the time of application for graduation, applicable courses will be taken in chronological order rather than in order of grade in calculating these averages. This may mean that failed courses will be used in calculating this grade point average even when the courses were later repeated and passed or, in the case of electives, replaced with other courses later in a candidate's academic career.
3. A declared candidate for an Honours degree who fails to fulfil the conditions of clause 2. but fulfils the requirements for a General degree shall be awarded the General Degree of Bachelor of Business Administration.

4.7 Regulations for the General Degree of International Bachelor of Business Administration (i.B.B.A.)

4.7.1 General Regulations

1. The International Bachelor of Business Administration (i.B.B.A.) program requires a total of 120 credit hours.
2. The program includes a compulsory one-semester approved program of full-time study at an overseas location. Subject to the **Study Abroad Program** regulations below, students must normally have completed at least 72 credit hours of the program and no more than 96 credit hours of the program prior to commencement of the study abroad program.
3. The overall program must have a coherent global and regional content. In order to achieve this coherency students shall nominate a global region (e.g. Asia, Europe, Latin America) as a focus area within their program. The choice of region will affect both the choice of non-BUSI courses and the choice of location and content of the study abroad program (see **Global and Regional Content** below).

4.7.2 Admission Requirements

1. Normally, admission is offered for the Fall Semester. The deadline for admission or readmission is March 1. Students applying for admission to the i.B.B.A. must submit the Faculty of Business Administration Application For Admission to the Office of the Registrar on or before this deadline. Where circumstances permit, applications will be considered for the Winter and Spring Semesters. The deadlines for admission or readmission are specified in the **University Diary**.
2. Students who are seeking admission for the Fall Semester normally must have completed all the courses required for admission by the end of the Winter Semester.
3. Applications received after the deadline will be considered only if a space is available in the program.
4. To be eligible for Admission to the i.B.B.A. program an applicant must have successfully completed the Pre-i.B.B.A. program (see **The Curriculum**, clause 1, below) with an average on those courses of at least 65%, or the equivalent at another recognized post-secondary institution. Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified in the **University Diary** for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits.
5. Admission is competitive and selective. Therefore, prospective students are encouraged to consider an alternate degree program in

the event that they are not accepted into the International Bachelor of Business Administration program.

6. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Selection, therefore, will be based on a student's overall academic performance in addition to the average on the 30 credit hours required for admission. Students with weak overall academic records are unlikely to be admitted.
7. In the case where an applicant has been required to withdraw from one of the Faculty's other Undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.

4.7.3 The Curriculum

1. The i.B.B.A. program includes the following 30 credit hours that comprise the Pre-i.B.B.A. program:
 - a. Six credit hours of English which must include English 1110 or 1021;
 - b. Mathematics 1000;
 - c. Economics 2010 and 2020;
 - d. BUSI 1000;
 - e. Political Science 2200;
 - f. Nine additional credit hours in non-BUSI courses. It is strongly recommended that students take into account the **Global and Regional Content** requirement outlined below when choosing these additional 9 credit hours of study.
2. In addition to the Pre-i.B.B.A. program requirements, the curriculum shall consist of the successful completion of:
 - a. Thirty-nine credit hours consisting of: Statistics 2500 and BUSI courses 1101, 1210, 2010, 2101, 2400, 3310, 3401, 3700, 4000, 4320, 4500, and either 7000 or 7005.
 - b. Fifteen credit hours of international business related courses, which must include:
 - i. BUSI 5302 and either Economics 3030 or BUSI 6550; and
 - ii. any three from: BUSI 6311, BUSI 7005 (if not completed to fulfill 2.a.i above), BUSI 7240, BUSI 6550 (if not completed to fulfill 2.b.i. above), BUSI 6040, Economics 4030, or Political Science 3250 or any other approved course with an international focus.

Pre-requisites for all courses shall apply to the i.B.B.A. program. Students should note, for example, that the pre-requisites for BUSI 7000 include BUSI 4050 and BUSI 5301, which are not program requirements for the i.B.B.A.
 - c. Thirty-Six further credit hours of which at least 12 must be in non-BUSI courses. Students should take into account the **Non-business Elective Courses** regulations under the **Global and Regional Content** requirement below when choosing these 12 credit hours of non-business electives.
 - d. It is recommended that students choose their elective courses so that their overall program contains at least one group of four or five courses within a chosen functional area or specialization or minor.
3. At least 12 credit hours of the program described in 2. above must be completed in an approved study abroad program. The program must meet the **Study Abroad Program** regulations under the **Global and Regional Content** requirements below. Courses taken by distance education from Memorial University of Newfoundland may not be used to satisfy the **Study Abroad Program** requirement.
4. For graduation, a student must be enrolled in the i.B.B.A. program, and have completed the 120 credit hours required with a minimum average of 65% on the program courses.

4.7.4 Global and Regional Content

Courses chosen to meet the above requirements must have a coherent global and regional content. In order to achieve this coherency, students shall nominate a global region (e.g. Asia, Europe, Latin America) as a focus area within their program. The choice of region will affect the choice of non-BUSI elective courses as well as the choice of location and content of the study abroad program. Students must consult with the Undergraduate Programs Office of the Faculty of Business Administration when selecting courses to satisfy the global and regional content requirement to ensure that the selected courses will fulfill the requirement.

4.7.4.1 Non-business Elective Courses

1. Non-business elective courses must include the following 9 non-language credit hours:
 - a. at least 3 further credit hours with a global and/or comparative international perspective
 - b. at least 6 credit hours with a chosen regional perspective.
2. Study of a foreign language relevant to the chosen region, commencing in the Pre-i.B.B.A. program, is highly recommended. Students selecting a regional perspective and planning to undertake their study abroad program where English is not the main language must complete 6 credit hours of the relevant language prior to undertaking study abroad.

4.7.4.2 Study Abroad Program

1. Notwithstanding the **General Regulations** above and the **Continuance Regulations** below, a student may be held back from participating in the study abroad program if the student has not completed at least 10 courses since his/her admission to the i.B.B.A. program or has not completed a course load of 15 credit hours with a semester average of at least 65% in a single semester. A student who is prevented from starting the study abroad program for either of these reasons will be permitted to participate in the study abroad program once the student has met these criteria.
 2. To ensure that students obtain regional perspectives and skills not available at Memorial University of Newfoundland an approved program must include:
 - a. at foreign language locations, at least 3 credit hours of study of a regional language and at least 6 credit hours with a specific regional content.
 - b. at locations in Britain, Ireland, the US, Australia and New Zealand, at least 9 credit hours with a specific regional content.

For the study abroad program, courses regarded as having specific regional content would include languages, regional studies and other cross-cultural courses as well as approved courses in Economics and Business.
 3. Subject to these requirements there is no additional restriction as to the proportion of business or non-business courses studied abroad. For example, an approved study abroad program may contain courses entirely of an 'Arts' nature. It is also possible to select courses that have no exact equivalent at Memorial University of Newfoundland and must be counted as unspecified credit.
- Courses studied abroad may be approved as counting toward any of the Curriculum course requirements listed above, but no

course may count towards meeting two such requirements.

4.7.5 Minor From Faculty of Arts

A student enrolled in the i.B.B.A. program may both meet the requirements of the degree and be able to complete a minor within the Faculty of Arts. Regulations for the minor are given under the Calendar entries for the **Faculty of Arts**.

4.7.6 Continuance Regulations

1. The Faculty Council of the Faculty of Business Administration constitutes the examining body for all examinations in Business courses. In addition, the standing of every student will be assessed by the Committee on Undergraduate Studies in accordance with the continuation requirements outlined in 2. and 3. below.
2. Following entry to the program, i.B.B.A. students must qualify for continuation after each term of study. For continuation, students must have an overall average of 65% over their last ten courses taken. In the event that a student has more courses than needed in the earliest term used, the courses with the highest grades in that term will be used.
Students who fail to achieve these standards will be required to withdraw from the program. They may be considered for readmission after a lapse of two semesters. In order to be considered for readmission, students must formally apply for readmission. A required withdrawal for failure to meet **Continuance Regulations** in the i.B.B.A. program will be reflected on a student's transcript.
3. Students who are required to withdraw from the program a second time are not eligible for readmission into their program.
4. The Committee on Undergraduate Studies of the Faculty of Business Administration may allow a student to continue who fails to achieve the standards outlined in 2. above. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies.

4.8 Regulations for the Honours Degree of International Bachelor of Business Administration

An Honours degree of Bachelor of International Business Administration signifies superior academic achievement.

1. To be considered for an Honours degree, the candidates must so indicate on the University's official Application for Graduation form. This form may be obtained on-line at the Memorial Self Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin or at the Office of the Registrar.
2. Candidates for the Honours Degree of International Bachelor of Business Administration shall:
 - a. comply with all regulations governing the General Degree of International Bachelor of Business Administration, and
 - b. obtain at least a 75% average and a grade point average of at least 3.5 on the 120 credit hours completed for the degree.
3. Candidates are not permitted to repeat or substitute courses for the purpose of meeting the academic standing specified in Clause 2. In the case of a student who has repeated courses and/or who has completed more than 120 credit hours at the time of application for graduation, applicable courses will be taken in chronological order rather than in order of grade in calculating 2.b. above.
4. A declared candidate for an Honours degree who fails to fulfil the conditions of Clause 2 but fulfils the requirements for a General degree shall be awarded the General Degree of International Bachelor of Business Administration.

5 Business Electives

Only those courses listed below are acceptable as Business electives towards the **Bachelor of Commerce (Co-operative)**, **Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts**, and **Bachelor of Business Administration** programs.

Table 4 Business Electives

6 Waiver of Faculty Regulations

Any student has the right to request waiver of Faculty regulations. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

7 Appeal of Regulations

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Regulations**.

8 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the Faculty.

All courses of the Faculty are designated by BUSI.

8.1 Service Course Descriptions

2000 Business Communications focuses on the development of written and oral communication skills critical in the workplace. The common communications media are reviewed with emphasis on electronic and written correspondence. Students learn how to prepare comprehensive analytical reports including proposal writing. Attention is also given to building confidence in delivering oral presentations and preparing appropriate employment packages. A highly interactive design encourages student practice and participation.

CR: BUSI 2010

UL: may not be used to fulfil any of the requirements of any of the programs of the Faculty of Business Administration including the minor, diploma and degrees

2102 Introductory Accounting for Non-Business Students provides full introductory coverage of both financial and managerial accounting. The course focuses on the most widely used accounting theory and practice.

CR: BUSI 1101 or BUSI 2101

UL: may not be used to fulfil any of the requirements of any of the programs of the Faculty of Business Administration including the minor, certificate, diploma and degrees

8.2 Core and Elective Course Descriptions

Enrolment in Business courses is limited and first priority will be given to students registered in the Faculty of Business Administration programs and to Business Minor Candidates who have obtained the approval of the Dean of the Faculty of Business Administration or delegate.

1000 Introduction to Business in Society (formerly BUSI 2001) introduces the basics of business and business corporations in society, in a real-world relevant manner. Particular attention is given to societal stakeholders and to corporations' internal business processes and management functions. Major emphases include corporate social responsibilities and management ethics, and these are recurring themes in other topics such as technology, globalization and people in organizations. The course is a combination of textbook theory and guided learning activities and assignments based on finding and integrating real-world information.

CR: the former BUSI 2001

1101 Principles of Accounting emphasize the concepts and issues of introductory financial accounting as they relate to the Canadian conceptual framework, and will also address the strengths and weaknesses of financial reporting at an introductory level. The student will be introduced to the

accounting process and analysis of the balance sheet, income statement, and the statement of changes in financial position.

CR: the former BUSI 3100, the former BUSI 2100

1210 Introduction to Marketing Strategy introduces students to the concepts, analyses, and activities that comprise marketing strategy, and provides practice in assessing and solving strategic problems in marketing. The course is also a foundation for BUSI 2210 Introduction to Marketing Tactics, and for advanced electives in marketing. Topics include: marketing strategy, environmental analysis, competitive analysis, customer behaviour, marketing research, segmentation, targeting, and positioning.

CR: the former BUSI 1201 or BUSI 2201 or BUSI 3200

PR: English 1110 or 1021, BUSI 1000, Economics 2010, Economics 2020

1600 Introduction to Entrepreneurship is an introductory course designed to give students a broad understanding of the field of entrepreneurship and the role that entrepreneurship plays in society. Topics will include the nature and theories of entrepreneurship, the characteristics and behaviours of entrepreneurs, and the entrepreneurial process in small and large firms. Students will get to think and act in a creative manner, obtain exposure to local entrepreneurs, assess their potential for entrepreneurial careers and develop attitudes and skills that will be useful in any organization. The course is also useful for those who will be dealing with smaller firms in the context of larger organizations and for those who will be working for entrepreneurs.

PR: BUSI 1000, and English 1110 or 1021

2010 Business Research and Writing introduces students to research, writing, and reporting processes in business. Through ongoing, multi-stage evaluation, students learn the fundamentals of business research, including analytical thinking and proposal writing involving research using secondary sources. A key focus is the writing process, including grammar, punctuation, structure, flow, and format in common business communications media. Students also develop their oral presentation competence by presenting the results of their research. A highly interactive design encourages student practice and participation.

CR: BUSI 2000

PR: BUSI 1000, and English 1110 or 1021

2101 Managerial Accounting provides an overview of the use of financial data for managerial decision making. The student will be introduced to basic budgeting and analysis techniques for both service-oriented and manufacturing businesses.

CR: the former BUSI 4100

PR: BUSI 1101

2210 Introduction to Marketing Tactics introduces students to the concepts, analyses, and activities that comprise marketing tactics, and provides practice in making decisions about tactical problems in marketing. The course is also a foundation for advanced electives in marketing. Topics include: product management, pricing, marketing communications, channels of distribution, implementation, and budgeting.

CR: the former BUSI 1201 or BUSI 2201 or BUSI 3200

PR: BUSI 1210, Mathematics 1000

2400 Decision Modeling provides an introduction to: spreadsheet modeling; linear optimization and the related topics of integer, assignment, and transportation models; and decision analysis including payoff matrices, decision trees, and Bayesian revision. All topics will be taught within the context of business applications.

CO: Statistics 2500

CR: the former BUSI 4401

PR: Mathematics 1000

2710 Modeling and Implementing Business Processes introduces techniques for understanding and modelling business processes and implementing them in modern enterprise systems. Course work will be project-based; students will create small-scale business applications, including web-based applications, using current design and development methodologies and tools.

PR: BUSI 1000, and English 1110 or 1021

3101 Accounting Applications continues the study of accounting on a more in-depth and detailed basis. Building on the theory and concepts of BUSI 1101 and 2101, BUSI 3101 will emphasize the procedures and techniques required for the preparation and presentation of accounting information and general purposes financial statements.

CR: the former BUSI 3100, the former BUSI 2100

PR: BUSI 1101

3210 Consumer Behaviour (formerly BUSI 5200) deals with concepts related to factors which influence the purchase and consumption behaviour of individuals including culture, social class, reference groups, perception, learning, motivation, personality and lifestyle. The unique aspects of groups and organizational buyers will also be examined.

CR: the former BUSI 5200

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

3310 Organizational Behaviour (formerly BUSI 2301 and 4300) focuses on

the study of individual and group processes in formal organizations. The student is introduced to the nature of work, the systematic approach to the study of behaviour, organizational roles and socialization, motivation, leadership, communication, and group dynamics.

CR: the former BUSI 2301 and the former BUSI 4300

PR: English 1110 or 1021

3401 Operations Management teaches fundamental concepts, methods, tools, and techniques to understand, analyze, and effectively manage as well as improve operations in business organizations. The course covers operations competitiveness and strategy, productivity, forecasting, capacity planning, material requirements planning, waiting lines analysis, project management, inventory management, quality control and its improvement, and supply chain management.

CO: BUSI 2710

CR: the former BUSI 5400

PR: Statistics 2500, and BUSI 2400 or the former BUSI 2401

3700 Information Systems examines the operational and strategic importance of information systems in organizations. Topics include: types of systems; business requirements and information systems planning; approaches to acquiring information systems; managing information systems resources; and ethics, security and privacy issues in information management.

CR: the former BUSI 3701

PR: BUSI 1000, and English 1110 or English 1021

399W Work Term I (see description in Work Term Descriptions and course title section below.)

4000 Business Law I (formerly BUSI 3000) is a course dealing with the law relating to certain aspects of business activity; includes introductory material on the nature of law and legal processes, together with a detailed study of certain aspects of the law of contract, examination of the general principles of the law of agency as they affect business operations; introduction to selected topics in company and partnership law.

CR: the former BUSI 3000

4050 Strategic Management 1 introduces students to the strategic management approach. The course builds upon the knowledge and concepts developed in Business 1000 and prepares students for later business courses in their programs, especially Business 7000. Through experience and analysis in and of real or reality-based situations and issues, students will develop critical and integrative thinking and information literacy. Activity and action components of the strategic management process are the basis for student learning. The purpose of this course is to recognize the importance of situational analysis and strategy in the management process, including business functional and organizational integrative thinking, and decision-making regarding courses of action, resource allocation, and leadership.

CO: BUSI 4000 and 4330

PR: BUSI 1600, BUSI 2010, BUSI 2101, BUSI 2210, BUSI 2400, BUSI 3310, BUSI 3401, BUSI 3700

4320 Human Resource Management introduces the student to the design, operation and management of HRM processes, their evaluation, and their contribution to employee and organization effectiveness. The principal processes considered are staffing, development, employment relations, and compensation. Consideration of the influence of relevant organizational and external conditions on HRM is included. The course views the management of human resources as the joint responsibility of line and HRM managers.

PR: BUSI 3310 or the former BUSI 2301

4330 Introduction to Labour Relations (formerly BUSI 3320) provides an introduction to the field of industrial and labour relations in Canada, with primary emphasis on the labour-management relationship. Students will be introduced to the basic elements of an industrial relations system, including the participants, their roles and relationships, the social, economic, legal and political environment in which the participants interact, and the process and outcomes of collective bargaining. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

CR: the former BUSI 3320

PR: English 1110 or English 1021

4500 Financial Management I is designed to introduce the student to the role of financial management in business, financial analysis techniques, working capital management, and long-term and short-term financing.

CR: the former BUSI 4110

PR: BUSI 1101, Statistics 2500, and Economics 2010

450W Business Methods in Practice I (see description in Comprehensive Case Analysis Descriptions and course title section below.)

499W Work Term 2 (see description in Work Term Descriptions and course title section below.)

5000 Business Law II is designed to show the student how principles of Law are applied to four areas of Business. The areas dealt with in this course are accounting/finance, marketing, personnel and production.

PR: BUSI 4000

5160 Cost Accounting (formerly BUSI 7100) deals with the use of accounting data for decision making. Topics covered include: cost estimation, pricing, joint costs, advanced variance analysis, total quality management, just-in-time, decentralization, transfer pricing, performance evaluations, activity based accounting, and backflush costing.

CR: the former BUSI 7100

PR: BUSI 2101, or the former BUSI 3100 and the former BUSI 4100

5210 Marketing Communications (formerly BUSI 6210) provides a theoretical background on the nature, role and principles of marketing communications; and develops analytical and decision-making skills in planning, executing, evaluating and controlling marketing communications campaigns.

CR: the former BUSI 6210

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

5217 Professional Selling provides a detailed introduction to and application of the principles of personal selling. The course introduces the basic concepts of professional selling, including customer analysis, communication skills, effective openings and closings, and customer relations. Selling skills and concepts are developed through the extensive use of sales exercises, role-plays and presentations.

CR: the former BUSI 6220

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

5220 Marketing Research (formerly BUSI 6200) is designed to acquaint the student with the use of marketing research as an aid to management. This is a comprehensive survey of the scope and methods of marketing research.

CR: the former BUSI 6200

PR: Statistics 2500, BUSI 2010, and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

5301 Organizational Theory (formerly BUSI 5300) focuses on the organization, its environment, and its subsystems. From providing a basic appreciation of the role and practice of research in organizations, study extends to measures of organizational effectiveness, determinants of structure and design, power and politics, intergroup conflicts and conflict resolution, and organizational development and change.

CR: the former BUSI 5300

PR: BUSI 3310 or the former BUSI 2301

5302 International Business (formerly BUSI 7302) is designed to introduce students to the issues of international business: these are the processes of cultural confrontation and compromise; the problems of competitive sovereignty involving multinational corporations and the governments of host societies; the organization, structure, operation and control of diverse international businesses; and, finally, the role of multinational enterprise as a catalyst in economic development and resource employment, in particular, the North-South context. The relevance of international business as an area of study to the Canadian economy is discussed. The course is both conceptual and empirical in content.

CR: the former BUSI 7302

PR: BUSI 1000, Economics 2010 and Economics 2020

5401 Linear Optimization and Extensions I: Applications is more complex linear optimization models. Emphasis will be on formulation and computer-based sensitivity analysis, applications to other fields of business, cases in linear optimization and related fields.

PR: BUSI 2400 or the former BUSI 4401

5402 Linear Optimization and Extensions II: Algorithms include the simplex and revised simplex algorithms, sensitivity analysis and duality, goal optimization, advanced formulation of 0/1 models, branch and bound algorithm, network models: assignment, transportation, transshipment, shortest path, critical path, minimal spanning tree, and maximal flow.

PR: BUSI 2400 or the former BUSI 4401

5500 Financial Management II (formerly BUSI 7140) is an extension of BUSI 4500. Capital investment decision-making using discounted cash flow methodology; investments under certainty; financial structure and leverage; analysis of money and capital markets; further examination of long-term external financing.

CR: the former BUSI 5140, the former BUSI 7140

PR: BUSI 4500 or the former BUSI 4110

5530 Public Finance (formerly BUSI 5100) recognizes the large role played by government in our society. Sources and uses of government funds at the federal, provincial and local levels will be covered. Intergovernmental fiscal problems will be examined with special emphasis on various incentive programs available to business from the three levels of government.

CR: the former BUSI 5100

PR: Economics 2010 and Economics 2020

5600 New Venture Creation (formerly BUSI 5030 and BUSI 7030) covers the business creation process from the idea conception stage to the launch stage. Students learn how to search for, screen and evaluate opportunities, and to plan and assemble the required resources, including the preparation of an actual business plan. Alternatives to new venture creation, such as

purchasing an existing business and purchasing a franchise, are also explored. Extensive group work is required.

CR: the former BUSI 5030, the former BUSI 7030

PR: BUSI 1101, BUSI 1600, and BUSI 2210

5700 Information Systems Analysis and Design provides students with the skills to identify business problems which may be solved using information technology, determine requirements for information systems (IS) solutions, and develop detailed designs which form the basis for implementing systems. Topics may include: role of the user in systems development, systems development life cycle, requirements analysis and conceptual modelling, structured analysis and design, and trends in systems development methodologies. The importance of CASE tools in modern systems development will be emphasized through hands-on exercises.

PR: BUSI 3700

5701 Information Systems Development - inactive course.

5702 Business Models and Strategy of Electronic Commerce (formerly BUSI 6027) examines business concepts, social issues, and technology issues related to e-commerce, as well as providing an introduction to current practices, opportunities and challenges in implementing e-commerce solutions. Topics include: business models associated with web-based commerce; security, privacy, and intellectual property issues; payment and distribution systems; internet marketing; and strategic and planning issues.

CR: the former BUSI 6027

PR: BUSI 3700

5703 Information Security, Privacy, and Ethics examines the use of information technology and related privacy, security, and ethical issues in the information age. Topics covered will include information and property rights and obligations; system quality; quality of life; accountability and system controls; behavioural factors that can lead to data loss; legal issues; and managerial responsibilities. The course examines these topics from individual, society, and business perspectives.

PR: BUSI 3700

599W Work Term 3 (see description in Work Term Descriptions and course title section below).

6000-6029 (Excluding 6001, 6004, 6008, 6009, 6010, 6012, 6021, 6022, 6024 and 6027) Special Topics will have the topics to be studied announced by the Faculty.

6010 Strategic Management of Technology and Innovation is designed to explore the strategic management of technology and innovation for improving competitiveness and for business development. This will include market-strategy-technology connections, and technical innovation/new product development processes. Technology and technical innovation are viewed as fundamental to strategic competitiveness and business development as important elements of the management of strategic change in the business firm. In approaching technical innovation as strategic implementation, business environmental, organizational capability, human resources and management factors will be discussed.

PR: BUSI 3700, BUSI 4050, BUSI 4320, BUSI 4500, and BUSI 5301

6040 International Business Law develops the skills a business student must have in understanding the laws and regulations that exist and relate to international business decision making. The course will equip students with a knowledge and understanding of laws and regulations that currently prevail in international business operations.

PR: BUSI 4000

6041-6060 Special Topics Courses will have the topics to be studied announced by the Faculty.

6100 Intermediate Accounting I continues the study of financial accounting by focussing on specific topics such as current assets, long-term investments, capital assets, intangibles, current liabilities, and long-term liabilities. Emerging issues in accounting will also be covered.

PR: BUSI 3101 or the former BUSI 3100

6110 Intermediate Accounting II is designed to integrate the principles, concepts and skills acquired in previous accounting courses and to enhance the student's analytical and decision-making capabilities. The course will focus on specific topics related to deferred taxes, pension liabilities, shareholders' equity, and financial statement presentation. The skills acquired in earlier courses will be integrated for purposes of interpreting and analysing financial information.

PR: BUSI 3101 or the former BUSI 3100

6120 Taxation I is a determination of income tax liability of individuals and corporations, and a survey of sales taxes.

PR: BUSI 1101 or the former BUSI 3100, and BUSI 4000

6130 Auditing introduces the student to the practice of auditing and to stress the auditor's decision-making process when determining the nature and amount of evidence the auditor should accumulate. Specific topics to be covered include the auditor's legal liability, materiality, internal control, transaction cycles, and audit of information processed through electronic

data processing systems.

PR: either BUSI 6100 or BUSI 6110

6217 Salesforce Management examines the elements of an effective salesforce as a key component of the organization's total marketing effort. The course will apply theory relating to salesforce management from a manager's point of view. Topics include the sales process, the relationship between sales and marketing salesforce structure, territory design, use of technology to improve salesforce effectiveness, and issues in recruiting, selecting, training, motivating, compensating and retaining salespeople.

CR: the former BUSI 6220

PR: BUSI 2010 and any of: BUSI 2210 or the former BUSI 2201, the former BUSI 3200

6218 Customer Relationship Management (CRM) is the evolution and integration of marketing ideas, data, technology, and organizational factors. Relying on the integration of people, processes, and marketing capabilities and facilitated by information technology, effective CRM optimizes the identification, acquisition, growth, and retention of desired customers. The history of CRM and the benefits and challenges of its implementation in business and consumer markets are addressed. The course culminates in the student's creation of a CRM strategic plan.

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

6230 Services Marketing is intended to examine the marketing of services and the role of services in supporting the marketing of tangible products. The distinction between the marketing of tangibles and intangibles will be stressed. The course will identify and examine the distinct issues which are encountered in the marketing of services and will explore appropriate strategies for implementing services marketing programs, primarily in services organizations, including health care, transportation, telecommunications, education, etc. Specifically, the course will examine in detail the role of people in delivering services, the importance of service quality as a strategic differentiating tool, and the importance of collaboration between marketing and human resources management in the delivery of services.

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

6241 Digital Marketing is designed to acquaint students with Internet and other electronic based marketing efforts. It addresses the use of the Internet as a digital channel and communications medium.

CR: the former BUSI 6004 and the former BUSI 6240

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

6250 Retailing Management (formerly BUSI 7210) provides an integrative examination of the activities involved in marketing goods and services directly to the ultimate consumer. Specifically, the following areas will be examined within a managerial framework: the evolution of retailing; retailing within the marketing channel; market analysis and planning; shopping behaviour; image and retail advertising; trading area and site analysis; store layout; shelf space utilization; merchandising; and the future prospects for retailing.

CR: the former 7210

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

6301 New Directions in Organizational Behaviour provides an opportunity for students to explore and to develop their interests in topics in a dynamic field. Topics will be selected according to current emphases in the organizational behaviour literature.

PR: BUSI 3310 or the former BUSI 2301, and BUSI 5301

6310 Advanced Human Resource Management reinforces the applied aspects of theory covered in BUSI 4320 by examining approaches to (a) the avoidance of lawsuits, arbitration and performance-related problems which could result from the lack of both due process and effective policies and procedures, and (b) processes for the management of contemporary issues in Human Resource Management. Topics include problem solving in the areas of promotion policy, performance appraisal, test validation, training and development, compensation, job evaluation and pay equity, wrongful dismissal, occupational health and safety, absenteeism, substance abuse and AIDS. Students will examine cases and other material involving worker-management conflict in the above areas and seek to relate these to the legal, ethical and behavioural foundations of Human Resource Management in both unionized and non-unionized settings.

PR: BUSI 4320

6311 International Human Resources Management develops the skills a business student must have in understanding the processes and practices of international human resource management (IHRM) for a successful managerial career. The course will equip students with a solid knowledge and understanding of human resource functions and practices that currently prevail in global/international business operations.

PR: BUSI 4320

6312 Employee Recruitment and Selection (formerly BUSI 6022) is a critical factor in creating high performance work systems. This course

examines the role of selection in HRM, legal issues, measurement, selection criteria, job competencies, testing, and interviewing, and making the employment decision.

CR: the former BUSI 6022

PR: BUSI 4320

6320 Advanced Labour Relations provides advanced level treatment of the field of industrial and labour relations in Canada, with primary emphasis on the labour-management relationship. Emphasis is placed on understanding recent problems/issues in industrial and labour relations and the range of options available for resolving these same problems. Topics examined may include: industrial relations theory; labour law reform; union growth and structure; management strategy; the role of third parties; workplace innovations; alternative dispute resolution mechanisms; union impact; public sector labour relations; comparative industrial relations; etc. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

PR: BUSI 4330 or the former BUSI 3320

6330 International Labour Relations (same as the former BUSI 6024) aims to place Canadian industrial relations in an international context by studying industrial relations in a number of different countries, bearing in mind the challenges faced by practitioners and policy makers arising from globalization and the information age. The review includes a selection of long established industrialized countries as well as later industrializing countries.

CR: the former BUSI 6024

PR: BUSI 4330

6400 Advanced Management Science provides advanced level treatment of special topic(s) in Management Science, such as, waiting lines, stochastic dominance, stochastic dynamic programming, etc. The topic(s) to be covered in any particular year will be chosen by the Instructor and may vary from year to year.

PR: BUSI 5401 or BUSI 5402

6410 Logistics Management will focus on transportation, location, procurement and distribution aspects of logistics management, within local and global settings. A number of classical and latest models related to the focus areas would be introduced, and some real-life case examples discussed. The focus is on modes of transportation, transportation management, facility location, procurement and supplier selection, distribution strategies, and global logistics.

PR: BUSI 3401, BUSI 5401 and BUSI 5402

6415 Supply Chain Management is about the management of the processes, assets, and flows of material and information required to satisfy customers' demands. In this course, a few important supply chain drivers will be identified and investigated in details such as inventory, information and pricing. Those drivers determine the performance of a supply chain. The understanding of these key drivers and their inter-relationships with strategy and other functions of the company are really crucial in the management of any supply chain.

CO: BUSI 3401 and BUSI 3700

6510 Investments (formerly BUSI 6140) is a study of investment securities, risks, markets and mechanics; an appraisal of the economy, the industry and the firm; and portfolio management for personal and institutional investments.

CR: the former BUSI 6140

PR: BUSI 4500 or the former BUSI 4110

6550 International Finance examines the additional risks and profitable opportunities that arise for the firm when it extends its operations into international markets. Specific topics will include the determination of exchange rates, the international monetary system, balance of payments, the foreign exchange market, international money and capital markets, the parity conditions, accounting exposure, economic exposure, transactions exposure, political risk, and global financing. Knowledge of these topic areas will give further understanding with respect to operating within the constraints of the international marketplace.

CR: the former BUSI 6008, the former BUSI 6500

PR: BUSI 4500 or the former BUSI 4110

6605 Small Business Consulting introduces students to the nature of business consulting and the challenges associated with growth in small firms. The course draws upon knowledge from various functional areas and emphasizes complex and interdisciplinary applications of this knowledge in a real-world environment. Topics include models of the consulting process, problem diagnosis, managing the client relationship, research design, document preparation and ethics in consulting. Working in teams students will undertake a problem-solving project for a local organization. Students will not be permitted to register for the course after the first day of classes.

AR: attendance is required

PR: BUSI 4050, BUSI 5301

6610 Small Enterprise and Regional Development (formerly BUSI 7031) explores the potential and constraints on efforts to foster small enterprise formation and expansion as a means to promote regional economic development. It critically examines government initiatives to promote small

business as the panacea for depressed regional economies, and reviews changes in the global economy and the organization of production which may enhance small business competitiveness. Both Canadian and international cases are studied, with theoretical and empirical findings related to the Newfoundland context.

CR: the former BUSI 6009, the former BUSI 7031

6700 Data Management is based on the premise that data is a valuable resource which needs to be managed effectively to provide accurate, complete, timely, relevant, and accessible information to support decision making. Topics may include: enterprise data modelling, logical database design, database management systems, query languages, transaction management and concurrent access, and security.

PR: BUSI 3700 or the former BUSI 6300

6701 Information Technology Management examines issues of managing information systems and technology. Topics may include: success and failure in IS implementation, IS planning, economics of IS, telecommunications and network management, and legal and ethical issues.

PR: BUSI 3700 or the former BUSI 6300

7000 Strategic Management 2 emphasizes concepts of strategic management and strategy in various contexts and situations covering corporations and businesses, and other institutions or organizations and their purposeful activities. Through in-depth analysis of reality-based situations and strategic issues, students will develop their contextual and situational orientation, and further develop their applied, investigative critical thinking and information search skills. Further, students will be expected to develop an applied ability in the contextual and situational analysis of corporations/businesses and institutions/purposeful activities, and in corresponding strategy formulation and planning for strategy implementation. Student learning activities may be based on published business cases, decision-making and group dynamics exercises, business simulation exercises, and information search projects. Learning outcomes also may include research and information search methodologies and information literacy, and good writing.

CO: BUSI 5301

PR: BUSI 4050, BUSI 4320, and BUSI 4500

7005 International Strategic Management (same as the former BUSI 6012) examines corporate strategy and strategic management in enterprises whose interests extend across national boundaries. International business managers and consultants must be able to formulate business strategy in environments that are affected by different politics, cultures, laws, economics, among other factors. The adept international business strategist will have a competitive edge if able to be at home in looking at international issues through a multidisciplinary prism. This course strives to help students to develop such an edge by providing an opportunity to acquire the knowledge and skills necessary to understand and make strategic decisions in the international business environment.

CR: the former BUSI 6012

PR: BUSI 5302

7010 Business and Society examines the inter-relationships among business, government, society and the environment. Topics include: the social-economic business system, business ideologies, social responsibilities of business, business ethics, stakeholder and issues management, and selected current issues in business.

PR: BUSI 5301

7110 Accounting Theory deals with the theoretical issues of specific topics such as the accounting standard setting process, the Canadian conceptual framework, assets, liabilities, revenues, expenses, not-for-profit organizations, related party transactions, and financial statement presentation and disclosure. Considerable emphasis will be given to emerging issues.

PR: BUSI 6100, BUSI 6110, BUSI 6120, and BUSI 6130

7120 Advanced Financial Accounting covers specific topics such as long-term investments, consolidated financial statements, joint ventures, segmented financial information, foreign exchange transactions, and fund accounting.

PR: BUSI 6100 and BUSI 6110

7150 Taxation II is designed to provide a detailed and comprehensive analysis of income taxation as well as sales taxation and customs duties and excise taxes. Information relating to the use of trusts, partnerships, and joint ventures will be included, as well as the use of various tax shelters and international tax implications in business planning. The concentration will be on how tax planning for both individuals and corporations can be a significant element in the regular decision-making process, especially for the private corporation.

PR: BUSI 6120

7160 Advanced Topics in Managerial Accounting introduces the student to an in-depth study of advanced qualitative and quantitative methodology available to the managerial accountant. The application of mathematical models and behavioural theories to realistic challenges faced by various fiscal entities will be stressed. Class instruction will include the use of cases and rely heavily on a multidisciplinary approach towards solving the

unstructured problem.

PR: BUSI 5160

7230 Marketing Management is designed to integrate the principles, concepts and skills acquired in previous marketing courses and to enhance the student's analytical and decision-making capabilities with regard to developing marketing strategies. The course will focus on: market analysis, marketing planning, the strategic decisions to be made within the framework of the marketing mix (product, price, promotion, and distribution); and the control systems related to the marketing program. The use of market research and knowledge from other functional areas of the organization (accounting, finance, economics, etc.) will be considered throughout the course.

PR: BUSI 2010, BUSI 3210 or the former BUSI 5200, BUSI 4500, and BUSI 5220

7240 International Marketing provides an understanding of the effects that the international dimension has upon the strategies and management of the marketing efforts of the firm. In particular, the student is introduced to the analysis techniques of the various environments that constitute a country analysis. Entry strategies are discussed with an emphasis upon the export process. Finally, the standardization/adaptation question is discussed in the context of each element of the marketing mix.

CR: the former BUSI 6001

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

7250 Business and Industrial Marketing (formerly BUSI 7220) presents a comprehensive view of business markets, including industrial, institutional, and government markets. There is a balanced focus on strategy development and implementation. Particular attention is given to organizational buying behaviour, relationship management, global competitiveness, and the marketing of new high technology products and services.

CR: the former BUSI 7220

PR: BUSI 2010 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

7310 Seminar in Human Resource Management seeks to integrate policies, procedures and methods covered in BUSI 6310 with other functional areas which impact upon the management of Human Resource Systems. Stakeholder assumptions about: work-force characteristics; management philosophy; business strategy; labour markets; laws and society; task technology and unions will be examined via a combination of cases, readings, research, peer discussion and dialogue with guest speakers.

PR: BUSI 4320

7315 Human Resource Management Training exposes students, through a variety of methods including lecture, discussion, case analysis, research, and the development of a detailed training program, to many topics in the area of human resource management training; including: needs analysis, training design, on and off-the-job training methods, technology and training, training implementation and delivery, transfer of training, and training evaluation.

CR: the former BUSI 6021

PR: BUSI 4320

7320 Collective Agreement Administration and Arbitration provides advanced coverage of the substantive and procedural rights of employers, unions and employees under collective agreements, and the means by which disputes over these rights are resolved through the grievance arbitration process. Topics examined include: the legal framework and place of grievance arbitration in the industrial relations system; the nature and scope of the arbitrator's role; preparation for and conduct of arbitration hearings; arbitral jurisprudence; alternative dispute resolution processes; and the development of a sound labour relations climate. Students will undertake extensive reviews of labour arbitration cases and will examine the impact of jurisprudence on the philosophy and practice of management in the private and public sectors. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

PR: BUSI 4000 and BUSI 4330

7321 Dispute Settlement in Labour Relations provides advanced level study of conflict in industrial relations, its determinants, the various institutional procedures used to deal with it, and the effectiveness of these same procedures. Topics examined include: theories of industrial conflict; the legal framework; union and employer strategies; interest dispute resolution; the right to strike and alternatives to same; the role and effectiveness of alternative forms of voluntary and compulsory third party assistance; etc. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

PR: BUSI 6320

7322 Labour Law provides an overview of laws regulating the employment relationship in Canada, including the common law, general employment and collective bargaining laws, and the Charter of Rights and Freedoms. Emphasis is placed on the law of collective bargaining in the private sector, including the acquisition and termination of bargaining rights, unfair labour

practices, the duty to bargain, industrial conflict and the administration of the collective agreement.

PR: BUSI 4000 and BUSI 4330

7330 Organizational Development - inactive course.

7400 Simulation in Management emphasizes the use of simulation modeling technique to study and analyze management systems. Generally, simulation is considered as an experimental technique and is used in problem situations whose complexity precludes the use of analytical problem solving techniques. Topics to be covered include: simulation methodology, model building, developing and building simulation models, simulation languages, generation of random numbers, and simulating a business system. Computers and case studies will be used to study various applications of simulation in Business.

PR: : BUSI 5401 or BUSI 5402

7410 Project Management introduces appropriate methodology and theory for selecting, planning and managing projects. This includes the project portfolio selection, the initial creation of a plan in terms of the breakdown of the tasks, construction of the relationships and dependencies inherent in any plan, and controlling the execution of the activities according to the plan as the project proceeds. Emphasis will be placed on resource allocation, leveling and management, critical path analysis, risk analysis, accounting for uncertainties and time-cost trade offs. The role of the project manager and project team as well as issues related to multi-project management will also be addressed.

PR: BUSI 3401 and BUSI 5401

7415 Managing Business Process Flows employs a logical, rigorous approach to studying the fundamentals of business processes. This approach is based on modeling business process and its flows, studying causal relationships between the business process and its performance, and formulation implications for managerial action by determining business process drivers and their impact on process management and performance. The focus is on business process flow, capability, productivity, variability, control, improvement, risk sharing and management, coordination and integration.

PR: BUSI 3401, BUSI 3700, BUSI 5401

7500 Advanced Finance (formerly BUSI 7130) examines advanced developments in finance. Several topics will be selected, researched and discussed. These topics shall vary as financial practices change.

CO: BUSI 6510

CR: the former BUSI 7130

PR: BUSI 5500

7510 Options and Futures (formerly BUSI 7170) is an extension of BUSI 6510 Investments which will introduce the student to the workings of the options and futures markets. Specific topics will include the institutional structure of the markets, option pricing, strategies such as straddles and spreads, hedging, spot/forward/futures markets, speculation, risk transference and market efficiency considerations.

CR: the former BUSI 7170

PR: BUSI 6510 or the former BUSI 6140

7600 Current Topics in Entrepreneurship (formerly BUSI 7032) endeavours to address recent research findings in various aspects of entrepreneurship. Students will have the opportunity to pursue issues in entrepreneurship development covering a wide range of topics using publications, journals and conference proceedings.

CR: the former BUSI 7032

PR: BUSI 5600

7610 Regulatory and Taxation Issues for Small Business is designed to provide students with a general knowledge base of the various tax and other regulatory issues that should be considered in starting a business. The role that tax plays in decision making will be examined as well as the types of corporate funding to establish a new business through government grants, conventional loans and tax credits as provided under the Income Tax Act. Alternative corporate structures will be examined as well as aspects of employee compensation and business valuations. Practical aspects of starting your own business, such as registration requirements, will also be examined.

PR: BUSI 6120

7700 Strategic Information Systems - inactive course.

7701 Current Topics in Information Systems examines new developments and trends in information systems. The scope of the course includes: implications of emerging hardware and software technologies, emerging systems applications, and the state-of-the-art in IS management practice. Specific topics will change each year. Readings assigned from professional and academic journals will form the basis of class discussion.

PR: BUSI 5700, BUSI 6700, and BUSI 6701

Commerce Co-operative program only.

The objectives of the Work Term component of the Business Administration Co-operative Program are embodied in the Work Term descriptions below. The descriptions serve to guide the student and employer toward achieving these objectives and to guide Business Co-operative Education and the Faculty of Business Administration in monitoring and evaluating each student's progress.

399W Work Term 1 follows the successful completion of Academic Term 3. For most students, it represents their first professional work experience in a business environment and as such represents their first opportunity to evaluate their choice of pursuing a career in business administration. Students are expected to learn, develop and practice the high standards of behaviour and performance normally expected in the work environment. (A detailed description of each job is normally posted during the job competition.)

As one component of the work term, the student is required to complete a work report. The work report, as a minimum requirement should

- analyse an issue/problem related to the student's work environment,
- demonstrate an understanding of the structure of a professional report, and
- show reasonable competence in written communication and presentation skills. Students should consult **UNIVERSITY REGULATIONS - Good Writing**, and the evaluation form provided in the placement package.

Notes: 1. *Students shall not conduct primary research as part of the Work Report.*

2. *Seminars on professional development, conducted by Business Co-operative Education Coordinators, are presented during Academic Term 3 to introduce and prepare students for participation in the subsequent work terms. Topics may include work term evaluation, work report writing, career planning, self-marketing skills, resume preparation, self-employment, workplace ethics, sexual harassment and workplace safety.*

499W Work Term 2 follows the successful completion of Academic Term 4. Students are expected to further develop and expand their knowledge and work-related skills and should be able to accept increased responsibility and challenge. In addition, students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems. Students should conscientiously assess the various business opportunities relative to their individual interests.

The Work Report, as a minimum requirement should

- analyse an issue/problem related to the student's work environment and demonstrate an understanding of business concepts relative to the student's academic background,
- demonstrate competence in creating a professional report, and
- show competence in written communication and presentation skills.

Note: *Students are permitted to conduct primary research as part of the Work Report, when it is required to achieve the report's research objectives. If primary research is conducted as part of the Work Report, it must be conducted in accordance with all policies and regulations of the University and the Faculty of Business Administration, including Memorial University of Newfoundland's policy on ethics of research involving human participants (www.mun.ca/policy/site/policy.php?id=139).*

599W Work Term 3 follows the successful completion of Academic Term 5. Students should have sufficient academic grounding and work experience to contribute in a positive manner to the management and problem-solving processes needed and practiced in the workplace. Students should become better acquainted with their discipline of study, should observe and appreciate the attitudes, responsibilities, and ethics normally expected of business managers and should exercise greater independence and responsibility in their assigned work.

The Communications Component should reflect the growing professional development of the student and, as a minimum requirement, the student will;

- demonstrate an ability to analyse a significant business issue/problem related to the student's experience in the workplace,
- demonstrate a high level of competence in delivering a professional oral presentation, and
- demonstrate a high level of competence in written communications.

The Communications Component for Work Term 3 consists of an Oral Presentation on a workplace-related business issue/problem. The presentation should be of about seven minutes duration followed by a three-minute question period and will normally be given on campus in a formal setting after students have returned to Academic Term. A written Executive Summary is also required. Guidelines for the preparation and delivery of this oral presentation along with deadlines are provided in the *Business Co-operative Education Handbook* located online at www.mun.ca/coop/programs/business/Business_CO-OP_HANDBOOK.pdf.

8.3 Work Term Descriptions

The following work terms are a requirement of the Bachelor of

8.4 Comprehensive Case Analysis Description

The following course of study is an academic requirement of the Diploma in Business Administration and does not carry academic credit.

450W Business Methods in Practice is a non-credit course in which each

student will undertake an analysis of an assigned case. A written report is mandatory. Evidence of the student's understanding of various business methods and the ability to gather material relating to the report, analyse it effectively, and present it in a clear, logical and concise form, will be required in the report.

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Faculty of Education Degree Regulations

2.1 Mission Statement for the Faculty of Education

The Faculty of Education is committed to improving the human condition through education. The Faculty is dedicated to leadership and exemplary practice in teaching and learning, research and scholarship, and public engagement in local and global communities.

Additional information regarding the Faculty of Education is available at www.mun.ca/educ.

2.2 Degree Programs

The following Degree and Diploma Programs are offered through the Faculty of Education:

1. Bachelor of Education (Primary/Elementary) as a First Degree
2. Bachelor of Education (Primary/Elementary) as a Second Degree
3. Bachelor of Education (Intermediate/Secondary)
4. Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education
5. Bachelor of Music Conjoint with Bachelor of Music Education
6. Bachelor of Music Education as a Second Degree
7. Bachelor of Education (Native and Northern)
8. Bachelor of Special Education
9. Bachelor of Education (Post-Secondary) as a First Degree
10. Bachelor of Education (Post-Secondary) as a Second Degree

2.3 Diploma Programs

Diploma in Adult Teacher Education

Diploma in Native and Northern Education (T.E.P.L.)

Diploma in Post-Secondary Education

2.4 Student Responsibility Clause

The Office of Undergraduate Student Services, Faculty of Education, will assist students with questions or problems which may arise concerning their programs. It is, however, the responsibility of students to see that their academic programs meet the Faculty of Education and the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.

2.5 Teacher Certification

Teacher Certification is a Provincial responsibility. Students are advised to contact Teacher Certification in writing at Teacher Certification and Records, Department of Education, P.O. Box 8700, St. John's, NL, A1B 4J6, or by visiting the website at www.ed.gov.nl.ca/edu/k12/teaching/certification.html for advice regarding Teacher Certification Regulations.

2.6 Admission

Note: It is possible that individuals who have been convicted of a crime against a person may not be accepted into a school for any activities which are required under the Faculty of Education degree and diploma regulations.

1. Admission to programs within the Faculty of Education is limited, selective and highly competitive. Meeting minimum admission requirements does not guarantee acceptance to a program. The Faculty reserves the right to limit the number of spaces available in each program. When the number of eligible applicants exceeds the number of spaces available in a particular program, preference may be given to students who are permanent residents of Newfoundland and Labrador.
2. Applicants for admission to a program within the Faculty of Education must submit the appropriate completed Faculty application form, and if applicable a form for admission/readmission to the University. Application forms and transcripts from institutions other than Memorial University of Newfoundland must be sent to the Office of the Registrar in accordance with the deadlines specified for each program in the **Application Deadline Dates** table. Letters of reference and personal statement as required by the application form must be forwarded directly to the Faculty of Education Undergraduate Admissions Office. Students who must apply for admission/readmission to the University must also submit the General Application for Admission/Readmission to the Office of the Registrar within the deadlines specified in the **University Diary**.

Application Deadline Dates

Program	Commencement Date	Application Deadline
Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program	Spring	December 1
Bachelor of Education (Primary/Elementary) as a First Degree Integrated Delivery Program	Fall	December 1
Bachelor of Education (Primary/Elementary) as a Second Degree	Spring	December 1
Bachelor of Education (Intermediate/Secondary)	Fall	January 15
Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education	Spring	December 1
Bachelor of Music Education - first and second degree	Fall	January 15
Bachelor of Special Education	Fall	January 15
Native & Northern Teacher Education Programs	ongoing intake	
Bachelor of Education (Post-Secondary) - first and second degree - and Diploma in Post-Secondary Education	Fall Winter Spring	June 15 October 1 January 15
Diploma in Adult Teacher Education	Fall Winter Spring	June 15 October 1 January 15

3. Admission to programs within the Faculty of Education is determined by a Selections Committee and is based on the criteria listed for each degree/diploma program. Applicants who are completing courses at this or another institution and for whom final and complete transcripts are not yet available may be granted provisional acceptance to the program to which they are applying pending the receipt of final transcripts. This provisional acceptance will remain valid until final transcripts are received. Deadline for receipt of final transcripts is June 15th. Provisionally accepted applicants may be granted a final acceptance upon review of the final transcript by the Selections Committee. The Faculty reserves the right to deny admission to a candidate who, in the opinion of the Selections Committee, is deemed unsuitable for admission to a program.
4. Students who have been admitted to a program in the Faculty of Education requiring a teaching internship are advised that they may be assigned to any Provincial school district and are responsible for all travel and accommodation costs associated therewith.
5. Students who have been admitted to a particular degree program offered by the Faculty of Education and who wish to change to another degree program within the Faculty must submit a new Faculty application form to the Office of the Registrar that will be considered in competition with all other students.
6. In special circumstances, the Committee on Undergraduate Studies, on recommendation from the Admissions Committee may, at its discretion, consider an applicant or group of applicants as an exception to the requirements.
7. Students who decline an offer of admission to the Faculty of Education, withdraw from the program, or who do not register for courses during the academic year in which admission is granted must, if they wish to be subsequently considered for admission, submit a new application in competition with other applicants.
8. An unsuccessful applicant has the right to appeal against the decision of the Admissions Committee not to offer him/her a place, if it is felt by the applicant that the decision was reached on grounds other than those specified in the admission requirements listed in the Faculty of Education section of the Calendar. The appeal should be made in writing within twenty-one days of the notification of the decision and should be directed to the Dean of Education. The letter should state clearly and fully the grounds for the appeal. If the Dean of Education, in consultation with the Registrar, judges the grounds to be sufficient, the formal appeals mechanism will be initiated. Normally, appeals will only be considered in the case of procedural error and/or receipt of new information that is relevant to the application. Students are advised to refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Regulations** section of the University Calendar.

2.7 Regulations for Readmission and Advancement

These regulations apply to all programs except the Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program, Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Intermediate/Secondary), and the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education which have separate readmission and advancement regulations.

1. a. Following admission to a program of the Faculty of Education, all full-time students must obtain a semester average of at least 65% in order to remain in clear standing in the Faculty.
b. These regulations will be applied to part-time students only after they have completed 12 consecutive credit hours on a part-time basis.
2. Students who fail to obtain a semester average of 65% but who are eligible for readmission under **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)** will be placed on probation in the Faculty. Probationary students who fail to obtain a 65% average during the next semester in which they complete courses will be required to withdraw from the Faculty.
3. Students completing the Bachelor of Education (Primary/Elementary), Bachelor of Music Conjoint with Bachelor of Music Education, or the Bachelor of Music Education as a Second Degree who attain a grade of FAL (fail) in their internship will either:
 - a. be required to withdraw from the program; or
 - b. with the recommendation of the Office of Undergraduate Student Services, Faculty of Education, repeat the internship in another school setting.
4. Students who have been required to withdraw from the Faculty of Education may, after a lapse of at least two semesters, apply for readmission to the Faculty. Students who are readmitted under this Clause will be considered probationary and must meet requirements stated in Clause 2. above.
5. Students who are required to withdraw from the University under **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)** will be required to withdraw from the Faculty of Education.
6. Students who have been required to withdraw from the Faculty on two occasions will be ineligible for future readmission.
7. Notwithstanding Clauses 1. through 4., the Committee on Undergraduate Studies on recommendation from the Admissions Committee reserves the right to require students to withdraw from the Faculty at any time if, in the opinion of the Committee, they are deemed unsuitable for continued attendance in the programs.
8. Students who have been required to withdraw from the Faculty may register only in those Education courses listed as applicable for non-Education students.
9. In exceptional circumstances, the Committee on Undergraduate Studies may waive the Readmission and Advancement regulations for the Faculty of Education as stated above.

2.8 Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program, Bachelor of Education as a Second Degree, Bachelor of Education (Intermediate/Secondary), and Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

1. Students must successfully complete all courses, attain an overall semester average of at least 65%, and a grade of PAS (pass) in the internship(s). Students failing to meet any of the above criteria will be required to withdraw from the program.
2. Notwithstanding Clause 1., the Committee on Undergraduate Studies, on recommendation from the Admissions Committee, reserves the right to require students to withdraw from the Faculty at any time if, in the opinion of the Committee, they are deemed unsuitable for continued attendance in the programs.
3. In exceptional circumstances, waiver of these regulations may be granted by the Committee on Undergraduate Studies, Faculty of Education, on advice of the Office of Undergraduate Student Services.

2.9 Registration in Education Courses (Non-Education Students)

Registration in Education courses is normally restricted to those students who have been admitted to a degree or diploma program in the Faculty of Education. Students in first year or students in other Faculties or Schools who have completed not fewer than 24 credit hours may register for the following courses in Education without acceptance to a program: 2040, 2800, 2801, 2803, 3210, 3211, 3565, 3570, 3571, and 3660.

Such students are advised to consult degree or diploma regulations to determine which, if any, of the above courses can be applied to their program.

2.10 Registration in Education Courses for Teacher Certification Upgrading and the Post-Secondary Instructors Certificate (as issued by the Department of Education, Government of Newfoundland and Labrador)

Students having completed a degree program in Education, or equivalent, who wish to register in Education courses for certification upgrading purposes and students requiring Education courses for the Post-Secondary Instructors Certificate should contact the Office of Undergraduate Student Services at least one month in advance of registration for permission and procedure.

2.11 Bachelor of Education (Primary/Elementary)

Important Notice

May 2013 will be the final date for admission to the Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery. Students admitted or readmitted to the Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery and who intend to complete the requirements of the degree, as in effect at the time of their acceptance, must complete their program no later than August 31, 2014.

The Bachelor of Education (Primary/Elementary) degree program is designed to prepare teachers for kindergarten through grade six. The program is available both as a First Degree and as a Second Degree.

2.11.1 Bachelor of Education (Primary/Elementary) as a First Degree

The Bachelor of Education (Primary/Elementary) as a First Degree is a 150 credit hour program. All students will attend full time during the Professional Year which involves both a specific set of courses and a field experience. The Professional Year is followed by a one semester teaching internship and a subsequent semester of study intended to allow students to build on strengths and remedy weaknesses that may have become apparent during the internship. Basic computer keyboarding skills will be expected during the first semester of this program.

The Bachelor of Education (Primary/Elementary) as a First Degree is offered in two delivery formats:

1. **Bachelor of Education (Primary/Elementary) as a First Degree Integrated Delivery Program**
2. **Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program**

Refer to the **Application Deadline Dates** table for application deadlines.

2.11.1.1 Admission

1. Applications for admission for both Integrated and Consecutive Delivery are considered together. Consideration will be given to the courses for which students are registered at the time of assessment of applications. Applicants for Integrated Delivery who have completed all requirements for admission by the end of the Spring semester of the year that admission is being sought will be considered as time and resources permit.
2. To be considered for admission, students must have successfully completed 60 credit hours as outlined in Clauses a. - h. below with a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours. Students applying to the Consecutive delivery option must have completed a total of 78 credit hours including a completed Focus Area. The 60 credit hours are:
 - a. twelve credit hours in English including at least 6 credit hours at the 2000 level or above - ESL courses cannot be used to satisfy this requirement;
 - b. six credit hours in Mathematics or 3 credit hours in Calculus;
 - c. six credit hours in Psychology;
 - d. Science 1150 and 1151; or 9 credit hours from 3 separate Science areas. The science areas are: Biochemistry, Biology, Chemistry, Earth Science, Environmental Science, or Physics; or a Focus Area in Science;
 - e. six credit hours chosen in any combination from Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies, Sociology;
 - f. six credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language;
 - g. fifteen credit hours as part of a Focus Area; and
 - h. additional credit hours from areas other than Education.
3. In assessing applications to the Bachelor of Education (Primary/Elementary) as a First Degree program, consideration will be given to student's:
 - a. overall academic performance; and
 - b. personal statement and references as outlined on the application to the Faculty.

2.11.1.2 Regulations for the Degree of Bachelor of Education (Primary/Elementary) as a First Degree

1. Candidates for the degree of Bachelor of Education (Primary/Elementary) as a First Degree will be required to complete a minimum of 150 credit hours in accordance with **Table 1** or **Table 2** below. Including the courses required for admission and completion of the focus area, a minimum of 75 of these credit hours will be in non-Education courses. Students:
 - a. will normally follow the appropriate Program Plan as outlined below;
 - b. must enrol full-time during the Professional Year; and

c. may enrol in the Internship only after successful completion of the Professional Year.

Students will normally complete the Bachelor of Education (Primary/Elementary) as a First Degree in the academic terms, sequence and course load as set out in either **Table 1, Bachelor of Education (Primary/Elementary) as a First Degree Integrated Delivery Program Plan** or in **Table 2, Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program Plan**.

2.11.1.3 Bachelor of Education (Primary/Elementary) as a First Degree Integrated Delivery Program Plan

To complete the 150 credit hour Bachelor of Education (Primary/Elementary) Integrated Delivery Program, students must have 75 credit hours from areas other than Education, including a completed focus area, plus the 75 credit hours in Education specified in **Table 1 Bachelor of Education (Primary/Elementary) as a First Degree Integrated Delivery Program Plan**.

Table 1 Bachelor of Education (Primary/Elementary) as a First Degree Integrated Delivery Program Plan

Education Semester One - Fall	Education Semester Two - Winter	Education Semester Three - Fall (Professional Year Semester One)
Education 3618 Education 3951 HKR 2001 6 credit hours in non-Education Electives	Education 3484 Education 3619 Education 3952 6 credit hours in non-Education Electives	Four Education courses from 3120, 3131, 3273, 3312, 3322, 3940, 3962 (to be determined by the Office of Undergraduate Student Services) One of Education 2050, 2194, 2515*, 3050, 4205, 4240 or 4242 (*Required for students completing a music focus area) Non-credit Field Experience (five days)
Education Semester Four - Winter (Professional Year Semester Two)	Education Semester Five - Fall	Education Semester Six* - Winter
Four additional Education courses from 3120, 3131, 3273, 3322, 3543, 3940, 3962 (to be determined by the Office of Undergraduate Student Services) One of Education 2050, 2194, 2515*, 3050, 4205, 4240 or 4242 (*Required for students completing a music focus area) Non-credit Field Experience (five days)	Education 401X	Education 4240 (or an Education elective if Education 4240 has been completed previously) Education 4362 Education 4383 Education 4425 3 credit hours in an Education Elective *Students may have the option of completing Education Semester Six courses in the Spring semester following the Professional Year.

2.11.1.4 French Immersion Option

The French Immersion Option is only available in the Bachelor of Education (Primary/Elementary) Integrated Delivery Program.

In addition to meeting the Admission Requirements for the Bachelor of Education (Primary/Elementary) Degree Program, students applying for this option must have French as a Focus Area. Admitted students will spend the two semesters of the Professional year in a French milieu.

These students must meet all requirements for the Bachelor of Education (Primary/Elementary) Integrated Delivery Program except as modified in Clauses 1.-3. below:

Students must successfully complete:

1. prior to the beginning of the Professional Year
 - a. at least 27 credit hours in French, including French 3100 and 3101,
 - b. either high school French Immersion including Français 3202 or at least four weeks of study in a French milieu,
2. the Professional Year in a French milieu, including the equivalent of Education 4155 and Education 3050, and
3. the internship in a French Immersion setting.

Students who are interested in the French Immersion Option should contact the Office of Undergraduate Student Services, Faculty of Education, at their earliest opportunity.

2.11.1.5 Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program Plan

Important Notice

May 2013 will be the final date for admission to the Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery. Students admitted or readmitted to the Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery and who intend to complete the requirements of the degree, as in effect at the time of their acceptance, must complete their program no later than August 31, 2014.

To complete the 150 credit hour Bachelor of Education (Primary/Elementary) Consecutive Delivery Program students must have at least 75 credit hours from areas other than Education and the 69 credit hours in Education specified in **Table 2 Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program Plan**. The additional 6 credit hours required for the degree may be either Education or non Education credits.

Table 2 Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program Plan

Professional Year Semester I - Spring	Professional Year Semester II - Fall	Semester III - Winter	Semester IV - Spring
Education 3120 Education 3273 Education 3312 Education 3618 Education 3951 Education 3962	Education 3322 Education 3484 Education 3543 Education 3619 Education 3940 Education 4240 Non-credit Field Experience (ten days)	Education 401X Education 4425	Education 3131 Education 3952 Education 4362 Education 4383 3 credit hours in an Education Elective HKR 2001

Note: Due to the nature of the French Immersion option of the primary/elementary program, the Consecutive Delivery Program is not available to applicants preparing to be French Immersion teachers.

2.11.1.6 Focus Areas

English (24 credit hours):

1. Six credit hours at the 1000 level
2. English 2390 or 3395
3. Three credit hours chosen from English 2000, 2001, 2005-2007, 3200, 3201, 3205
4. Three credit hours chosen from English 2002-2004, 2010 or 2020, 2350, 2351
5. Six credit hours chosen from English 2146, 2150, 2151, 2155, 2156, 2160, 3145, 3147-3149, 3152, 3155-3158
6. Three additional credit hours in English at the 2000 level or above

Folklore (24 credit hours):

1. Folklore 1000 or 2000
2. Folklore 2100, 2300, 2401, 2500
3. Three credit hours chosen from Folklore 3450 or 3930
4. Six credit hours in Folklore chosen from the 3000 or 4000 level

French (21 credit hours):

A maximum of 6 credit hours at the 1000 level

1. French 2100 or equivalent
2. French 2101 or equivalent
3. French 2601 or French 2602 or equivalent
4. French 3100 or French 3101 or equivalent
5. At least four weeks at an approved francophone institution in a French-speaking area or have acquired equivalent work experience in a francophone environment.
6. Additional credit hours in French to bring the total to 21.

It is recommended that students complete at least one of French 2900, 3650, 3651, 3652, 3653, 3654

Note: Students may wish to select the French Immersion option listed at the end of Program Plan: Bachelor of Education (Primary/Elementary).

Geography (18 credit hours):

1. Geography 1050, 2001, 2102, 2195, 2302, and 2425; or
2. Geography 1000 and 1001, or 1010 and 1011, and 12 credit hours in courses chosen from Geography 2001, 2102, 2195, 2302, 2425

History (18 credit hours):

1. Three credit hours in History at the 1000 level
2. Nine credit hours in History at the 2000 level
3. Six credit hours in Newfoundland and Labrador History at the 3000 level

Linguistics (18 credit hours):

1. Linguistics 1100 or 2100
2. Linguistics 1103 or 2103
3. Linguistics 1104 or 2104
4. Linguistics 2210
5. Six credit hours chosen from Linguistics 3000, 3100, 3104, 3105, 3150, 3155, 3201, 3210, 3212, 3500, 3850

Mathematics (18 credit hours including):

No more than 6 credit hours at the 1000 level and at least 3 credit hours at the 3000 level.

Music (18 credit hours):

1. Music 1120
2. Three credit hours chosen from Music 2011, 2012, 2013, 2014
3. Three credit hours chosen from Music 2021, 2022, 2023, 2611, 2612, 2613, 2614, 2619 (admission to 2612, 2613 and 2619 is by audition only)
4. Six credit hours chosen from Music 3014, 3015, 3016, 3017, 3018, 3019, 4040
5. Three additional credit hours from the courses in 2. or 4. above.

Physical Education (HKR) (18 credit hours):

1. Human Kinetics and Recreation 1000, 2210, 2300
2. Nine credit hours chosen from Human Kinetics and Recreation 2002, 2310 or 2311, 2320, 2600, 2601, 3330, 3340, 3400, 3490

Religious Studies (18 credit hours including):

1. Religious Studies 1000
2. Three credit hours from Religious Studies 2013, 2130, 2140, 2330, 2340
3. Three credit hours from Religious Studies 2400, 2410, 2420, 2425, 2430
4. Three credit hours from Religious Studies 2350, 2610, 2810, 2811, 2812, 2820, 2830
5. Six credit hours in Religious Studies at the 3000 level or above

Science (18 credit hours including):

At least 6 credit hours in each of two subject areas selected from Biochemistry, Biology, Chemistry, Earth Science, Environmental Science, or Physics.

Theatre Arts (18 credit hours)

For information on the Theatre Arts Focus Area contact the Undergraduate Admissions Office, Faculty of Education.

Visual Arts (18 credit hours)

Courses in Art History may be used to satisfy this requirement in whole or in part. For information on the Visual Arts Focus Area contact the Undergraduate Admissions Office, Faculty of Education.

2.11.2 Bachelor of Education (Primary/Elementary) as a Second Degree

The Bachelor of Education (Primary/Elementary) as a Second Degree is a 72 credit hour program. It is intended for candidates who have completed an appropriate Bachelor's degree.

2.11.2.1 Admission

1. Refer to the **Application Deadline Dates** table for application deadlines. Consideration will be given to the courses for which students are registered at the time of assessment of applications. Students attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades by February 1.
2. To be considered for admission to the Bachelor of Education (Primary/Elementary) as a Second Degree program, individuals must have:
 - a. been awarded a Bachelor's Degree, or approved (prior to program startup) for the award of a Bachelor's Degree from a university recognized by Memorial University of Newfoundland;
 - b. achieved a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours;
 - c. completed a minimum of:
 - i. six credit hours in English - ESL courses cannot be used to satisfy this requirement;
 - ii. six credit hours in Mathematics or 3 credit hours in Calculus;
 - iii. six credit hours in Psychology;
 - iv. Science 1150 and 1151 or 6 credit hours in science in any combination to be chosen from: Biochemistry, Biology, Chemistry, Earth Science, Environmental Science and Physics;
 - v. six credit hours in any combination to be chosen from: Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies and Sociology;
 - vi. six credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language; and
 - vii. the equivalent of a completed focus area as per the Faculty of Education **Focus Areas** or the completion of a major or minor within the initial Bachelor's degree program in a subject area classified as a focus area.

Notes: 1. It is recommended that students have 9 credit hours in science.
2. Applicants with French as a focus area must also have completed at least 4 weeks at an approved francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment.
3. In assessing applications to the Bachelor of Education (Primary/Elementary) as a Second Degree program, consideration will be given to the following:
 - a. overall academic performance; and
 - b. personal statement and references as outlined on the application to the Faculty.

2.11.2.2 Regulations for the Degree of Bachelor of Education (Primary/Elementary) as a Second Degree

1. In addition to meeting these regulations, students must also meet **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Second Degree**.
2. To obtain the Bachelor of Education (Primary/Elementary) as a Second Degree, students will be required to complete a minimum of 72 credit hours. The 72 credit hours are the same as those outlined in **Table 2 Bachelor of Education (Primary/Elementary) as a First Degree Consecutive Delivery Program Plan**.
3. Students will normally attend full-time and complete the Bachelor of Education (Primary/Elementary) Second Degree program in the academic terms, sequence, and course load as set out in Table 2.

2.11.3 Waiver Guidelines for Education 401X

1. Education 401X may, in special circumstances and upon individual request, be waived by the Office of Undergraduate Student Services in accordance with the guidelines listed below. Students requesting waiver should apply in writing and submit evidence of the following:
 - a. Permanent certification and tenure.
 - b. A minimum of five years teaching experience (or equivalent) in an environment appropriate to the degree sought.
 - c. Recommendation from an individual in an administrative position i.e. School Principal or Superintendent, attesting to the satisfactory quality of the teaching experience.
2. Students whose requests for waiver of the internship are approved must substitute in its place 15 appropriate credit hours in Education. These replacement credit hours will be determined by the Office of the Undergraduate Student Services on an individual basis and must be approved by the Committee on Undergraduate Studies.

2.12 Bachelor of Education (Intermediate/Secondary)

The Bachelor of Education (Intermediate/Secondary) is a second degree program designed to prepare teachers of grades 7-12. The program is offered in a three semester (12 month), full-time format, and commences in the Fall semester of each year.

2.12.1 Admission

- Refer to the **Application Deadline Dates** table for application deadlines. Consideration will be given to the courses for which students are registered at the time of application. Applicants who will have completed all requirements for admission by the end of the Spring semester of the year that admission is being sought will be considered as time and resources permit. Students attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Winter semester grades no later than June 15.
- To be considered for admission to the Bachelor of Education (Intermediate/Secondary) Degree Program, individuals must have:
 - been awarded a Bachelor's Degree from a university recognized by Memorial University of Newfoundland;
 - completed 36 credit hours in a subject listed under **Academic Disciplines** in Clause 3. below (Religious Studies, Business Studies and Newfoundland and Labrador Studies cannot be used to satisfy the 36 credit hour requirement. Effective with admission for Fall 2014, in addition to the 36 credit hours, those with an academic discipline of French are required to have completed at least four weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment), and
 - completed 24 credit hours in a subject listed under **Academic Disciplines** in Clause 3. below but different from that in b i. (Effective with admission for Fall 2014, in addition to the 24 credit hours, those with an academic discipline of French are required to have completed at least four weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment);
 - achieved an overall average of at least 65% in each of the sets of courses in b. i. and b. ii.
- Academic Disciplines are deemed to be the disciplines on the following list. Courses from other disciplines deemed by the Admissions Committee to be equivalent to courses in any of the listed **Academic Disciplines** will be acceptable.

Academic Disciplines

Biochemistry** Biology** Business Studies*** Canadian Studies Chemistry** Earth Sciences**	Economics English Environmental Science** French General Science Geography	History Mathematics (may include Statistics) Newfoundland and Labrador Studies Physical Education* Physics**	Political Science Religious Studies Theatre Arts Visual Arts
---	---	--	---

* In order to be considered for admission within this Academic Discipline, students must have completed courses in the following areas: Human Anatomy, Human Physiology, Motor Learning, Biomechanics, Primary/Elementary Physical Education Curriculum and Teaching, Issues and Trends in Physical Education and a minimum of 18 credit hours in Physical Education activities.

**Students who use General Science as an Academic Discipline may use courses from these separate science disciplines in any combination, but must complete a minimum of 12 credit hours in each separate science discipline used.

***Students who use Business Studies as an academic discipline must have at least a minor in Business Administration.

Notes: 1. When calculating averages in the first and second teachable areas, no more than two 1000-level courses in each of the first and second teachable areas will normally be used.

2. A limited number of program spaces are allocated to each discipline. Students who are admitted with a particular Academic Discipline and who wish to change to a different Academic Discipline must obtain permission of the Office of Undergraduate Student Services. Such changes may not be possible in particular areas.

3. Applicants are advised that admission to the program on the basis of academic disciplines is dependent on sufficient numbers of students to warrant the offering of applicable methodology courses in those disciplines in any given year.

- Candidates who are registered in their final semester of their first Bachelor's Degree program during the Winter semester must have satisfied the academic requirements set out in Clause 2. above upon completion of their first degree program.
- In assessing applications to the Bachelor of Education (Intermediate/Secondary) Program, consideration will be given to the following:
 - average in each of the two academic disciplines;
 - overall academic performance; and
 - personal statement and references as outlined on the application to the Faculty.
- Because of the structured, sequential nature of this program, students must attend full-time. Students who drop any course which is part of the program will be dropped from the entire program.
- Students who have been admitted to the program but choose not to attend in the Fall semester of their year of admission will lose their admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be considered in competition with those of all other applicants.

2.12.2 Regulations for the Degree of Bachelor of Education (Intermediate/Secondary)

- A candidate for the degree of Bachelor of Education (Intermediate/Secondary) shall complete 51 credit hours in the academic semesters, sequence and course load specified in the **Bachelor of Education (Intermediate/Secondary) Program Plan** below. Candidates must also have complied with the **Regulations for Readmission and Advancement for this program**.
- The 51 credit hours shall include:
 - Education 4005, 4240, 4242, 4260, 4381, 4390, 4427, 4950 and 5000.
 - two of the following: Education 4120, 4121, 4142, 4154, 4161, 4174, 4175, 4180, 4181, 4190, 4203. These methodology courses must be chosen to match the academic disciplines under which the student was admitted. Those whose discipline is Geography are required to complete either Education 4180 or 4174. Those whose area is Social Studies (academic disciplines of Business Studies, Canadian Studies, Economics, History, Newfoundland and Labrador Studies, and Political Science) are required to complete Education 4180. Students whose first and second academic disciplines are in Social Studies are required to complete Education 4180 and 4181. Students whose first and second academic disciplines are in sciences (Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Sciences, General Science, Physics) are required to complete Education 4174 and 4175.

- c. Education 406T and 407T (for a total of 15 credit hours internship)
- d. Education 4350 or 3 credit hours in Institutes in Intermediate and Secondary Education or equivalent. A minimum of two institutes is required.

2.12.3 Bachelor of Education (Intermediate/Secondary) Program Plan

Table 3 Bachelor of Education (Intermediate/Secondary) Program Plan

Semester 1 - Fall (18 Credit Hours)	Semester 2 - Winter (15 Credit Hours)	Semester 3 - Spring* (18 Credit Hours)
Education 4005 Education 406T Education 4240 Education 4260 Two methodology courses from Clause 2b. Education 5000 (non-credit)	Education 407T Education 4350 or 3 credit hours in Institutes in Intermediate and Secondary Education Education 5000 (non-credit)	Education 4242 Education 4381 Education 4390 Education 4427 Education 4950 Education 5000 (3 credit hours) *courses may be offered in Spring, Intercession and/or Summer Session

Note: The Fall and Winter semesters of the Bachelor of Education (Intermediate/Secondary) Program will follow a schedule that falls outside the normal teaching semester. Consult the **University Diary** for applicable dates.

2.13 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

The Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education is a program designed to prepare both Intermediate/Secondary and Technology Education teachers. The program is offered in a four semester (16 month), full-time format and commences in the Spring of each year. Students in the program will complete courses that address the development of basic skills and competencies in a variety of technological areas and how to apply them through design and problem solving processes in a school classroom/laboratory setting.

2.13.1 Admission

- Consideration will be given to the courses for which students are registered at the time of application. Refer to the **Application Deadline Dates** table for application deadlines. Students attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades no later than February 1.
- To be considered for admission to the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education program individuals must have:
 - been awarded a Bachelors Degree from a university recognized by Memorial University of Newfoundland;
 - completed 36 credit hours in a subject listed under **Academic Disciplines** in clause 3. below. Effective with admission for Spring 2014, in addition to the 36 credit hours, those with an academic discipline of French are required to have completed at least four weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment; and
 - achieved an overall average of at least 65% in the courses chosen to meet b. above.
- Academic Disciplines** are deemed to be the disciplines on the following list. Courses from other disciplines deemed by the Admissions Committee to be equivalent to courses in any of the listed **Academic Disciplines** will be acceptable.

Academic Disciplines

Biochemistry** Biology** Canadian Studies Chemistry** Earth Sciences**	Economics English Environmental Science** French General Science	Geography History Mathematics (may include Statistics) Physical Education*	Physics** Political Science Theatre Arts Visual Arts
--	--	---	---

*In order to be considered for admission within this Academic Discipline, students must have completed courses in the following areas: Anatomy, Physiology, Motor Learning, Kinesiology, Evaluation and Testing in Physical Education, Primary/Elementary Physical Education Curriculum and Teaching, Issues and Trends in HPERS and a minimum of 6 activities.

** Students who use General Science as an Academic Discipline may use courses from these separate science disciplines in any combination, but must complete a minimum of 12 credit hours in each science discipline used.

Notes: 1. When calculating the average in the 36 credit hours required under clause 2. b. above, no more than two 1000-level courses will normally be used.

2. A limited number of program spaces are allocated to each discipline. Students who are admitted with a particular Academic Discipline and who wish to change to a different Academic Discipline must obtain permission of the Office of Undergraduate Student Services. Such changes may not be possible in particular areas.

3. Applicants are advised that admission to the program is dependent on sufficient numbers of students to warrant the offering of applicable methodology courses in those disciplines in any given year.

- Candidates who are registered in their final semester of their first Bachelor's Degree program during the Winter semester must have satisfied the academic requirements set out in Clause 2. above upon completion of their first degree program.
- In assessing applications to the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education Program, consideration will be given to the following:
 - average in courses in clause 2. b.;
 - overall academic performance; and
 - personal statement and references as outlined on the application to the Faculty.
- Because of the structured, sequential nature of this program, students must attend full-time. Students who drop any course which is part of the program will be dropped from the entire program.
- Students who have been admitted to the program but choose not to attend in the Spring semester of their year of admission will lose their admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be

considered in competition with those of all other applicants.

2.13.2 Regulations for the Degree of Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

- A candidate for the degree of Bachelor Education (Intermediate/ Secondary) Conjoint with the Diploma in Technology Education shall complete 69 credit hours in the academic semesters, sequence and course load specified in the **Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education Program Plan** below. The 69 credit hours shall include 30 credit hours in intermediate and secondary education, 24 credit hours in technology education and 15 credit hours of internship. Candidates must also have complied with the **Regulations for Readmission and Advancement** for this program.
- The 69 credit hours shall include:
 - 30 credit hours in intermediate and secondary education:
 - Education 4005, 4240, 4242, 4260, 4381, 4390, 4427, 4950 and 5000.
 - One of the following: Education 4120, 4121, 4142, 4154, 4161, 4174, 4180, 4190. This methodology course must be chosen to match the academic discipline under which the student was admitted. Those whose discipline is Geography are required to complete either Education 4180 or 4174. Those whose area is Social Studies (academic disciplines of Canadian Studies, Economics, History, and Political Science) are required to complete Education 4180.
 - 24 credit hours in Technology Education: Education 2711, 2750, 2752, 3750, 3751, 4750, 4752 and 4753.
 - Education 406T and 407T (for a total of 15 credit hours internship).

2.13.3 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education Program Plan

Semester 1 - Spring (18 Credit Hours)	Semester 2 - Fall (18 Credit Hours)	Semester 3 - Winter (15 Credit Hours)	Semester 4 - Spring* (18 Credit Hours)
Education 2711 Education 2750 Education 2752 Education 3750 Education 3751 Education 4427	Education 4005 Education 406T Education 4240 Education 4260 One methodology course in accordance with clause 2b. One of: Education 4750, 4752, 4753 (to be determined by the Office of Undergraduate Student Services) Education 5000 (non-credit)	Education 407T a second course (to be determined by the Office of Undergraduate Student Services) chosen from: Education 4750, 4752, 4753 Education 5000 (non-credit)	Education 4242 Education 4381 Education 4390 a third course from: Education 4750, 4752, 4753 Education 4950 Education 5000 (3 credit hours) *Courses may be offered in the Spring, Intersession and/or Summer Session.

Note: With the exception of the final semester, the Bachelor of Education (Intermediate/ Secondary) Conjoint with the Diploma in Technology Education Program will follow a schedule that falls outside the normal teaching semester. Consult the **University Diary** for applicable dates.

2.14 Bachelor of Music Education

The Bachelor of Music Education Program is designed to prepare music teachers in all facets of school music education: foundations of music education; primary/elementary, intermediate/secondary classroom music; and choral and instrumental music education. The program consists of 30 credit hours of course work in music education and general foundational education and a 15 credit hour teaching internship. The program is delivered in two formats: Bachelor of Music Conjoint with Bachelor of Music Education and Bachelor of Music Education as a Second Degree.

Refer to the **Application Deadline Dates** table for application deadlines.

2.15 Bachelor of Music Conjoint with Bachelor of Music Education

2.15.1 Admission

- Applications for admission are considered once a year normally to the Fall semester. Consideration will be given to the Winter semester courses for which students are registered at the time of application.
- At the time of application, students must have been formally admitted to, and be in clear standing with, the School of Music.
- To be considered for admission, students must have successfully completed a minimum of 45 credit hours with either a cumulative average of at least 65% or an average of at least 65% on their last attempted 30 credit hours.

Within the 45 credit hours, students must have completed the following:

- at least 6 credit hours in English and/or research/writing;
 - at least 3 credit hours from the following: Music 3221, 3222, 3231, 3232, 3233, 3241, 3242, 3261, 3281, 3282;
 - at least 12 credit hours in Music, in addition to the 3 credit hours used to satisfy Clause 3.b. above.
- In assessing applications, consideration will be given to the following:
 - average in the courses required for admission in Clause 3. above;
 - overall academic performance; and
 - personal statement and references as outlined on the application to the Faculty. One reference must be from a faculty member of the School of Music.

2.16 Regulations for the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education

- A candidate for the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education shall be required to complete a minimum of 159 credit hours in accordance with the Bachelor of Music degree regulations for the Bachelor of Music Conjoint with

Bachelor of Music Education and Clause 2. below:

2. A candidate shall complete the following 45 credit hours in Education:
 - a. Education 3618 or 4260
 - b. One of Education 4362, 4381, 4383
 - c. Education 2500, 2515, 2520, 3920 (including a 2 hour twice weekly laboratory component), 3925, 4240, and 4830
 - d. Education 403X (15 credit hour Internship)
 - e. Three other credit hours in Education other than Music Education. It is recommended that these 3 credit hours be used toward the acquisition of instructional content in a second teachable area.

2.17 Bachelor of Music Education as a Second Degree

2.17.1 Admission

1. Applications for admission are considered once a year normally to the Fall semester. Consideration will be given to the Winter semester courses for which students are registered at the time of application.
2. A candidate who has been awarded a Bachelor's degree in Music (or equivalent) from a recognized post-secondary institution may be admitted to the program leading to the degree of Bachelor of Music Education provided that the pattern of courses for the first degree is acceptable to the Selections Committee of the Faculty of Education. This pattern normally includes courses or equivalent experiences in conducting and instrumental techniques (brass, woodwinds, strings and percussion).

2.18 Regulations for the Bachelor of Music Education as a Second Degree

1. The degree of Bachelor of Music Education may be awarded upon the successful completion of at least 30 additional credit hours in accordance with clause 2. below.
2. A candidate shall complete the following 45 credit hours in Education:
 - a. Education 3618 or 4260
 - b. One of Education 4362, 4381, 4383
 - c. Education 2500, 2515, 2520, 3920 (including a 2 hour twice weekly laboratory component), 3925, 4240, and 4830
 - d. Education 403X (15 credit hour Internship)
 - e. Three other credit hours in Education other than Music Education. It is recommended that these 3 credit hours be used toward the acquisition of instructional content in a second teachable area.

2.19 Bachelor of Education (Native and Northern)

The Bachelor of Education (Native and Northern) is a teacher education program designed for Native students in Labrador who intend to pursue a teaching career in the communities of northern Labrador. It would be of particular interest to students who wish to continue their studies beyond the Diploma in Native and Northern Education.

2.19.1 Regulations for Admission/Readmission and Advancement to the Bachelor of Education (Native and Northern)

1. Students who wish to enter the program must submit an application to the Office of Undergraduate Student Services, Faculty of Education.
2. Applicants to the Bachelor of Education (Native and Northern) must complete the general application form for admission to the University and the application form for admission to the Faculty of Education, Native and Northern Program.
3. Normally, to be considered for admission, a student must have completed a minimum of 15 credit hours with an average of at least 55% in those courses and be in clear standing.

Note: Students may be considered for conditional admission to the program upon admission to the University. Students admitted conditionally will be admitted in clear standing after successful completion of 15 credit hours with an average of not less than 55% percent.

4. Students who have completed more than 15 credit hours prior to admission to the program will be permitted to apply those credit hours, where appropriate, towards the Bachelor of Education (Native and Northern) provided an average of at least 60% has been obtained in all courses beyond the first 15 credit hours.
5. Students who have been admitted to the Bachelor of Education (Native and Northern) will normally be governed by Regulations 2. and 4. - 9. of the Regulations for Readmission and Advancement of the Faculty of Education. For this program only, advancement regulations will be applied upon the completion of each 15 credit hour segment throughout the duration of the program and will be assessed on the basis of the average obtained on those 15 credit hours.
6. Students who have not met the requirements for direct entry from high school, but are eligible for entry on other criteria, will be assessed for literacy in English through procedures in accordance with University regulations. Where necessary, courses may be provided to give students an opportunity to upgrade their literacy skills.
7. Within the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Residence Requirements**, candidates for the Bachelor of Education (Native and Northern) Degree shall have completed a minimum of 12 credit hours as full time students through attendance at classes for the duration of at least one semester on a campus of Memorial University of Newfoundland.

2.19.2 Regulations for Students on the Primary/Elementary Education Route

1. Candidates for the degree of Bachelor of Education (Native and Northern), Primary/Elementary route, shall be required to complete a minimum of 150 credit hours in accordance with the clauses 2. - 6. below and in consultation with the Office of Undergraduate Student Services.
2. The following academic credit hours are compulsory:
 - a. twelve credit hours in English
 - b. six credit hours in Math
 - c. six credit hours in Science

- d. six credit hours in Anthropology
- e. six credit hours in Linguistics (Inuktitut or Innu-aimun)
- f. three credit hours in Psychology]
- g. a concentration of four courses from each of two of the following subject areas: Aboriginal Studies, Art, Folklore*, French, Geography, History, Linguistics*, Mathematics, Music/Music Education, Physical Education, Religious Studies, Science, Theatre Arts*

Note: *Only one of these subject areas may be chosen.

3. Candidates shall be required to complete a minimum of 60 credit hours in education, to be determined from an approved list, in consultation with the Office of Undergraduate Student Services. Included in those credit hours will be:
 - a. At least 3 credit hours in Education from each of the following areas:
Administration, Assessment of Primary/Elementary Children, Arts, Childhood Development, Children's Literature, Curriculum Development, Introductory Overview of Native Education, Language Arts, Mathematics, Native Education Issues and Trends, Reading, Science, Social Studies, Social Context of Education, Tests and Measurement, Teaching English as a Second Language, Teaching Strategies
 - b. Three credit hours from one of the following areas:
 - i. Teaching of Inuktitut or Innu-aimun for students who are proficient speakers of one of these languages
 - ii. Language and culture for students who are not proficient speakers of Inuktitut or Innu-aimun
 - c. Further credit hours in Education to complete the required total of 60 must be chosen from appropriate course offerings of the Faculty of Education, in consultation with the Office of Undergraduate Student Services.
4. Candidates who are proficient speakers of Inuktitut or Innu-aimun and who plan to teach one of these languages and/or plan to teach in one of these languages shall complete at least 3 credit hours from each of the following areas:
 - a. Language literacy skills
 - b. Language teaching skills
5. a. In addition to satisfying clause 3 above, all candidates shall be required to complete a 15 credit hour internship (Education 404X).
 Note: Candidates who have completed the Diploma in Native and Northern Education in Labrador and have successfully completed at least five years as a teaching assistant or certified teacher may apply to the Office of Native Education for a waiver of the internship requirement. In cases where waivers are granted, candidates will be required to complete 15 credit hours in Primary or Elementary Education to be determined from an approved list, in consultation with the Office of Undergraduate Student Services.
 - b. Students may enrol in the Internship Program only after successful completion of the credit hours required in clauses 2. and 3. a. and b. above.
6. Further credit hours to complete the required total of 150 may be selected from any subject area outside of Education or from other credit hours in Education which are approved for the primary/elementary area.

2.19.3 Regulations for Students on the Secondary Education Route

1. Candidates for the degree of Bachelor of Education (Native and Northern), Secondary route, shall be required to complete a minimum of 150 credit hours in accordance with clauses 2. - 6. below and in consultation with the Office of Undergraduate Student Services.
2. The following academic credit hours are compulsory:
 - a. six credit hours in English
 - b. six credit hours in Anthropology
 - c. six credit hours in Linguistics (Inuktitut or Innu-aimun)
 - d. three credit hours in Psychology
 - e. Either
 - i. A concentration of eight courses in each of two of the following areas: Aboriginal Studies, Art, Biochemistry, Biology, Canadian Studies, Chemistry, Computer Science, Earth Sciences, Economics, English, Folklore*, French, Geography, History, Linguistics*, Mathematics (may include Statistics), Newfoundland Studies*, Physical Education, Physics, Political Science*, Religious Studies, and Theatre Arts*
 Note: * Only one of these subject areas may be chosen.
 Or
 - ii. A concentration of eight courses from one subject area in clause 2. e. i. above, and four courses from each of two of the other subject areas, other than the subject area chosen for the eight-course subject area concentration.

Courses from other disciplines deemed to be equivalent to courses in any of the above listed academic disciplines will be accepted.
3. Candidates shall be required to complete a minimum of 54 credit hours in Education, to be determined from an approved list, in consultation with the Office of Undergraduate Student Services. Included in those credit hours will be:
 - a. At least 3 credit hours in Education from each of the following areas:
Administration, Curriculum Development, Educational Psychology, Introductory Overview of Native Education, Native Education Issues and Trends, Reading, Social Context of Education, Student Evaluation, Teaching English as a Second Language, Teaching Strategies
 - b. Appropriate teaching methodology courses to correspond with concentrations in clause 2. e. to be determined from an approved list, in consultation with the Office of Undergraduate Student Services
 - c. Three credit hours from one of the following areas:
 - i. Teaching of Inuktitut or Innu-aimun for students who are proficient speakers of one of these languages
 - ii. Language and culture for students who are not proficient speakers of Inuktitut or Innu-aimun
 - d. Further credit hours in Education to complete the required total of 54 must be chosen from appropriate course offerings of the Faculty of Education, in consultation with the Office of Undergraduate Student Services.
4. Candidates who are fluent speakers of Inuktitut or Innu-aimun, and who plan to teach one of these languages and/or plan to teach in

one of these languages, shall complete at least 3 credit hours from each of the following areas:

- a. Language literacy skills
- b. Language teaching skills

Note: These courses are cross listed as Education/Linguistics. Where candidates complete four courses under clause 4., in addition to the two linguistics courses required in clause 2. c., only one additional four course concentration shall be required under clause 2. e. ii.

5. a. In addition to satisfying clause 3. above, all candidates shall be required to complete a 15 credit hour internship (Education 404X)

Note: Candidates who have completed the Diploma in Native and Northern Education in Labrador and have successfully completed at least five years as a teaching assistant or certified teacher may apply to the Office of Native Education for a waiver of the internship requirement. In cases where waivers are granted, candidates will be required to complete 15 credit hours in Secondary Education to be determined from an approved list in consultation with the Office of Undergraduate Student Services.

- b. Students may enrol in the Internship Program only after successful completion of the credit hours required in clauses 2. and 3. a., b., and c. above.

Note: Students who do not register for courses during the academic year in which admission is granted will be dropped from the program and must, if they wish to be subsequently considered for admission, submit a new application which will be considered in competition with those of all other applicants.

6. Further credit hours to complete the required total of 150 may be selected from any subject area outside of Education or from other credit hours in Education which are approved for the secondary area.

2.20 Bachelor of Special Education

This degree program is for the preparation of Special Education teachers and is available through part-time or full-time study. A limited number of courses are available through distance education. Candidates must comply with the University's **Regulations for a Second Degree** as outlined in the General Regulations section of the Calendar. Refer to the **Application Deadline Dates** table for deadlines.

There are four Education courses applicable to the Special Education degree program that may be completed prior to admission (following completion of an Education degree). They are Education 3040, 3640, 3660, 3941 (please see the **Course Descriptions** section for prerequisites).

2.20.1 Admission

1. Consideration will be given to the courses for which students are registered at the time of application. Provisional acceptance may be granted to students who will successfully complete all prerequisites prior to commencement of Program. A percentage of program spaces will be allocated to applicants having relevant teaching experience.
2. To be considered for admission candidates shall have a minimum of a 65% average in the last 60 attempted credit hours (not including the internship) and also meet the following requirements:
 - a. hold a degree in Primary and/or Elementary, Music Education, or Intermediate/Secondary Education from Memorial University of Newfoundland or another Education degree deemed appropriate by the Faculty of Education, AND have credit for one of Education 4240 or 4242 or the former Education 3220 or 3230 (or equivalent). Intermediate/Secondary graduates must also have credit for Education 4350; Music Education graduates must also have credit for both Education 3312 and 3543 or 4350.
 - b. have successfully completed a professional internship in education or have equivalent teaching experience prior to admission.

2.20.2 Regulations for the Degree of Bachelor of Special Education

To be eligible for the Degree in Special Education, a student must have completed:

1. The Memorial University of Newfoundland Bachelor of Education Degree Primary and/or Elementary, Music Education, or Intermediate/Secondary, or another Education degree deemed appropriate by the Faculty of Education, and
2. 36 credit hours as follows:
 - a. Required courses: Education 3600, 3610, 3620, 3630, 3650; and
 - b. 21 credit hours selected from the following elective offerings in Special Education: Education 3040, 3640, 3660, 3680, 3690, 3941, 4505, 4510, 4515, 4520, 4530, 4540, 4541, 4543.

2.20.3 Waiver Guidelines - Education 3650

Following completion of Education 3600, students who have at least two years experience as a Special Education teacher, and who provide written reports from their principal or other appropriate authority, certifying the quality of their experience, to the Office of Undergraduate Student Services, may be granted waiver of Education 3650 upon approval by the Faculty of Education. Candidates approved for the waiver must substitute in its place one 3 credit hour course in Special Education. Students may contact the Office of Undergraduate Student Services for additional information and application forms.

2.21 Bachelor of Education (Post-Secondary) and Diploma in Post-Secondary Education

2.21.1 Admission

1. To be considered for admission to the Post-Secondary Education Degree and Diploma programs, a student must meet, in addition to the general admission requirements of the University, special admission requirements as outlined below. Refer to the **Application Deadline Dates** table for application deadlines.
2. Occupational training as verified by one of:
 - a. a certificate of qualification as a journeyman for a designated trade;
 - b. a certificate or diploma from a technical or business school or college;
 - c. an appropriate undergraduate degree from a university;
 - d. satisfactory completion of a program equivalent to a., b. or c. above.
3. At least one year of work experience or equivalent in the occupational area in which training was obtained. This experience must be subsequent to the completion of or concurrent with the occupational training program.

Note: Training and experience will be assessed and verified by the Selections Committee for Post-Secondary Education.

2.22 Regulations for the Degree of Bachelor of Education (Post-Secondary) as a First Degree

1. A candidate for the Bachelor of Education (Post-Secondary) Degree will be required to complete the equivalent of at least 120 credit hours approved by the Office of Undergraduate Student Services. The 120 credit hours must include:
 - a. Twenty-one credit hours as follows: Education 2710, 2720, 2730, 2801, 3280, 3801, 4700
 - b. Twenty-one credit hours to be chosen from: Education 2800, 2803, 2806, 3440, 3710, 3720, 3730, 4710, 4730, 4760-4780.
 - c. Six credit hours in English.
 - d. Thirty non-Education credit hours patterned to strengthen the area of teaching specialization and/or provide the development of depth in a related field of study as approved by the Office of Undergraduate Student Services. Education 4760-4780 may be used to satisfy non-Education specialization course credit hour electives if not already used to satisfy clause 1.b. above.
 - e. Twelve additional credit hours from any subject areas outside of Education. Six of these 12 credit hours may be chosen from courses listed in clause 1.b. above if not already used to satisfy the requirements of clause 1. b.
2. Advanced standing to a maximum of 30 credit hours may be awarded for students possessing at least a combined total of six years of training and work experience in the occupational area in which training was obtained. Students who because of a deficiency of work experience are not eligible to receive the maximum of 30 credit hours advanced standing will be required to obtain further work experience and/or to complete additional university courses, either or both of which must be approved by the Admissions Sub-Committee for Post-Secondary Education.
3. At least half the credit hours required under clauses 1. a. and b. above must be completed at this University.

2.23 Regulations for the Degree of Bachelor of Education (Post-Secondary) as a Second Degree

1. Candidates must also comply with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Second Degree**.
2. To obtain the Bachelor of Education (Post-Secondary) as a second degree a candidate must complete at least 36 credit hours in Education. The 36 credit hours must include:
 - a. Twenty-one credit hours as follows: Education 2710, 2720, 2730, 2801, 3280, 3801, 4700.
 - b. Fifteen credit hours of which 6 must be chosen from Education 2800, 2803, or 2806, and 9 must be chosen from 3440, 3710, 3720, 3730, 4710, 4730 or 4760-4780
3. At least 9 of the credit hours required under clause 2.a. must be completed at this University.

Note: *Work competence and experience related to occupational area is required for acceptance to this program as outlined in the Admission Requirements but no advanced standing will be granted.*

3 Diploma Regulations

3.1 Regulations for the Diploma in Post-Secondary Education

1. A candidate for the Diploma in Post-Secondary Education will be required to complete 60 credit hours as outlined below:
 - a. Twenty-one credit hours as follows: Education 2710, 2720, 2730, 2801, 3280, 3801, 4700.
 - b. Nine credit hours to be chosen from: Education 2803, 3440, 3710, 3720, 3730, 4710, 4730, 4760-4780.
2. Advanced standing to a maximum of 30 credit hours may be awarded for students possessing at least a combined total of six years of training and work experience in the occupational area in which training was obtained. Students who because of a deficiency of work experience are not eligible to receive the maximum of 30 credit hours advanced standing will be required to obtain further work experience and/or to complete additional University courses, either or both of which must be approved by the Admissions Sub-Committee for Post-Secondary Education.
3. At least 24 of the credit hours required under clause 1.a. and b. must be completed at this University.

Note: *The requirement of Education 4700 may be waived by the Office of Undergraduate Student Services in consultation with the post-secondary group.*

3.1.1 Waiver Guidelines - Education 4700

1. Students who have at least two years of Post-Secondary teaching experience, and who produce written reports from their former principal or other appropriate authority to the Office of Undergraduate Student Services certifying the quality of their experience, may be excused from Education 4700. Students who are excused from taking the student teaching course must substitute in its place Education 2900 or an appropriate course in Education designated Adult or Post-Secondary to make up the required total for the degree.

3.2 Regulations for the Diploma in Adult Teacher Education

Refer to the **Application Deadline Dates** table for application deadlines.

1. To be admitted to the Diploma Program in Adult Teacher Education, an applicant shall:
 - a. be admitted to this University,
 - b. satisfy at least one of the following:
 - i. have been admitted to the Faculty of Education,
 - ii. have been approved by the Office of Undergraduate Student Services.
2. To be eligible for the Diploma in Adult Teacher Education, a student shall complete a total of 30 credit hours in Education courses as follows: 2710, 2800, 2801, 2803, 2806, 2730 or 3430, 3440, 4450, two of 3280, 3210, 3801.
3. A maximum of 12 credit hours referred to in Clause 2. above and which have already been counted toward a degree or diploma may also be counted toward the Diploma in Adult Teacher Education.
4. At least 21 of the credit hours required for the Diploma in Adult Teacher Education must be completed at this University.
5. The requirement for a specific course, or courses, may in special circumstances, and upon individual request, be waived by the Committee on Undergraduate Studies. Such waivers shall not reduce the total number of credits required for the Diploma.

3.2.1 Waiver Guidelines of Education 4450

Students who have at least two years of experience teaching adults, and who produce written reports from their former principal or other appropriate authority to the Office of Undergraduate Student Services, certifying the quality of their experience may be excused from Education 4450. Students who are excused from taking the practicum must substitute in its place an appropriate course in Education to make up the required total for the diploma.

3.3 Regulations for the Diploma in Native and Northern Education in Labrador

1. The Diploma in Native and Northern Education in Labrador (T.E.P.L.) is a teacher education program in Labrador with Options in Classroom Teacher or Core Language Teacher.
2. Admission to the T.E.P.L. program requires a regular application for admission to Memorial University of Newfoundland and a special application for admission to the program. Application forms may be obtained from the Office of Native and Northern Teacher Education Programs, Faculty of Education, Memorial University of Newfoundland, St. John's, NL, A1B 3X8.
3. A candidate for admission to this program must normally be a speaker of either Innu-aimun or Inuktitut and meet the General Admission Requirements of the University as outlined in the Calendar.
4. To be eligible for the Diploma in Native and Northern Education, a candidate shall complete a total of 60 credit hours as follows:

The following 30 credit hours are required for both **Option A - Classroom Teacher** and **Option B - Core Language Teacher**.

Education 2022 or 2032, Education 2655, Education 3001, Education 3002, Education 3321, Education 4220 or 4230, English 1030, Linguistics 1530, Linguistics 1531, and Linguistics 2020 or 2030

5. For **Option A - Classroom Teacher** - the following 30 credit hours are compulsory in addition to those in 4. Above.
 - a. Education 2182, Education 2194, Education 2200, Education 2350, Education 3007, Education 3140, Education 3281, Education 3961, Education 4330, Sociology/Anthropology 2220
 - b. Professional Seminars. This is a non-credit component which is compulsory and will include seminars dealing with topics such as: Classroom Management, Organizational Skills, Healing, Computer Training and Resource Development.
6. For **Option B - Core Language Teacher** - the following 30 credit hours are compulsory in addition to those in 4. above.
 - a. Education 2035, Education 2036, Education 2037, Education 2038, Education 2039, the former Education 2041, Education 3007, Education 4221 or 4231, Education 4330, Linguistics 2021, or 2031
 - b. Professional Seminars. This is a non-credit component which is compulsory and will include seminars dealing with topics such as: Classroom Management, Organizational Skills, Healing, Computer Training, and Resource Development.

Note: Courses designated for the T.E.P.L. program (designated by T) are intended for students registered in this program, but may be opened to other students upon permission of the Office of Undergraduate Student Services.

4 Waiver of Regulations of the Faculty of Education

Regulations involving course prerequisites or co-requisites, departmental regulations, and faculty regulations may be waived where circumstances so warrant. The routing of requests for such waivers and the procedure for appealing unfavourable decisions are outlined in the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

5 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the Faculty.

Students wishing waiver of Education 3650, Education 4700, post-session block or Education 401X should refer to the waiver guidelines under each appropriate program.

All courses of the Faculty are designated by ED.

Legend:

PE: Courses for students on the Primary/Elementary program

IS: Courses for students on the Intermediate/Secondary program

ISI: Courses for students on the Intermediate/Secondary Conjoint with the Diploma in Technology Education program

T: Courses for students on the T.E.P.L. Diploma program

A: Courses for students on the Diploma in Adult Teacher Education program

ME: Courses for students on the Music Education program

PS: Courses for students on the Post-Secondary Education programs

SE: Courses for students on the Special Education program

NPE: Courses for students on the Native and Northern Teacher Education program - Primary/Elementary route

NS: Courses for students on the Native and Northern Teacher Education program - Secondary route

2022 The Teaching of Inuktitut (T,NPE) focuses on the preparation of materials and classroom strategies for the teaching of Inuktitut in Primary and Elementary schools in Native communities. Attention will be given to linguistic difficulties encountered in schools by children whose first language

is English.

2023 Language and Culture in Education (NPE,NS) is an overview of issues of language and culture in Native and Northern Education. Emphasis will be placed on examination and development of curricula and materials that recognize cultural diversity (especially Aboriginal cultures), foster the teaching and maintenance of Aboriginal languages, and support the work of Aboriginal language specialists in the classroom.

2032 The Teaching of Montagnais (T,NPE) - inactive course.

2035 The Teaching of History and Culture of Labrador Inuit and Innu (T) applies the principles of effective teaching to the learning of history and culture as it applies to the Labrador Inuit and Innu. Topics include specific teaching strategies and examination of the selection and use of learning resources for unit planning, development and evaluation.

2036 The Teaching of Aboriginal Issues (T) examines the teaching of specific current events relevant to Labrador Inuit and Innu. This will include issues in the areas of education/environment/society politics/self-government/industry and the economy. Class sessions will include a workshop mode of learning (public speaking, panel debates, use of Internet, research, survey and interviews).

2037 Aboriginal Drama (T) introduces drama as a way of transmitting culture and values and as a vehicle to communicate. Topics include an examination of the foundation, values and assumptions of drama (with emphasis on aboriginal forms) as an effective means of curriculum implementation in Innu-aimun and Inuktitut. An activity-centred approach will be emphasized.

2038 Aboriginal Music and Art (T) is a study of music and art in cultural transmission. The course will develop skills in reading and writing associated with Innu and Inuit cultures, and will emphasize activities for exploring the elements of music. Innu and Inuit art forms will be explored as well as art as decoration in Innu and Inuit society.

2039 Cultural Camp (T) is intended for aboriginal people to learn about ways of helping and healing that are traditional to their own culture and to learn ways of effectively incorporating those cultural aspects in the school

curriculum of aboriginal schools. This course includes a one-week field trip to an isolated camp in coastal Labrador, where students and instructors will live according to traditional cultural practices under the guidance of community elders.

2040 Basic Interpersonal Communication (PE) is designed to help students develop confidence through self-expression, and acquire skills in interpersonal relationships.

CR: the former ED 2041

2050 Introduction to Drama Education (PE,ME) is designed to introduce students to the use of drama as a learning medium. Students will be expected to participate in and to critically analyse practical drama sessions in order to gain an understanding of the fundamental nature of drama. Students will be engaged in a variety of teacher devised drama structures to introduce them to the theory and practice of selected pioneers in the field. Reference will be made to some aspects of child development such as play, cognition, affect and language and their relationship to learning through drama. It is expected that students will begin to formulate a rationale for the use of drama education in their future classroom practice.

CR: the former ED 2030

2182 An Introduction to the Teaching of Science in the Primary and Elementary Grades - inactive course.

2194 Physical Education in the Primary and Elementary Grades (PE,T,ME,NPE) examines the curriculum organization in physical education for the Primary and Elementary grades; instructional material and teaching techniques for these grades; creative, aesthetic, and health-developing aspects of physical education.

CR: the former ED 3070, or the former ED 2192 taken during the 1984-85 or 1985-86 academic years

2200 Language Arts - inactive course.

2202 Education in Native and Northern Communities - An Overview (PE,NPE,NS) is a general introductory course for students planning to teach in a classroom where Innu and/or Inuit children are in attendance. Emphasis will be placed on creating an awareness of the religion, philosophy, cultural values and way of life of Native peoples; the legal and administrative processes concerning Native peoples from the past to the present; a historical perspective in Native education; and contemporary issues and trends in Native education. This course will provide the necessary foundation for the training of teachers who are sensitive to the influence of culture on the values, behaviour, needs and motivations of children.

2222 Teaching English as a Second Language (PE,IS,NPE,ISI, NS) includes selection and preparation of materials, and suitable classroom strategies for teaching English as a second language. Stress will be on the methods appropriate to cope with linguistic difficulties encountered in schools by children whose first language is not English.

2350 An Introduction to the Teaching of Mathematics in the Primary and Elementary Grades (T,NPE) examines intuitive notions of a mathematical system with special emphasis on the concepts, basic mathematical properties and skills associated with the number systems of arithmetic. Additional topics will include relations, functions and basic concepts of Geometry related to the Mathematics programs of the elementary school.

2361 The School and Community - inactive course.

2430 Administration and Supervision in Native and Northern Education (NPE,NS) is a study of the administrative structures involved in the education of children of Innu and Inuit backgrounds. The study examines the administrative structures of the past and present with particular reference to the problems which arise in the administration of schools in remote, isolated regions. Further, the study includes an overall examination of the alternative Native processes of education relevant to the philosophy of Native people.

2500 Orientation to Music Education (ME) is an introduction to music education, bridging life as a musician and the development of a career as a musician-teacher. Topics include an overview of theoretical, philosophical, historical, sociological, cultural, psychological, methodological, and curricular foundations of music education as well as contemporary contexts and issues in music education. Emphasis is on research and writing in music education, technology applications, and the development of functional keyboard skills specific for music educators.

2515 Primary/Elementary School Music Methods (ME,PE) examines current pedagogical practices, methodologies, and resources for use in the primary and elementary school music program. Within the context of authorized K-6 curriculum guides, teacher candidates will develop skills and instructional strategies for developing the singing, moving, playing, listening, and creating child.

CR: the former ED 2510, the former ED 2530

PR: Primary/Elementary program candidates must have completed the focus area in music

2520 Voice and Choral Methods (ME) examines current pedagogical

practices, procedures, and resources for use with all levels of school singing ensembles and choirs. Emphasis is placed on developing teacher candidates' own vocal techniques. Topics include philosophy and history of choral music education, vocal and choral pedagogy, and components/organization of choral programs.

2655 Recognizing and Protecting Children's Needs - inactive course.

2710 Course Organization and Development in Post-Secondary Education (A,PS) examines the development of procedures for the identification of concepts in instructional units; analysis of tasks and identification of related competencies; development of resource units.

2711 Course Organization and Development in Technology Education (ISI) is an examination of the development, structure and organization of technology education curriculum locally and internationally; applications of design and problem solving instructional strategies; the management of resources in technology education laboratories; the development of resource units for teaching.

2720 Introduction to Post-Secondary Education (PS) is a study of the back-ground of Post-Secondary Education and of its development and present forms in Newfoundland, other provinces of Canada, and other countries; an examination of current programs in Post-Secondary Education; the role of federal and provincial governments in Post-Secondary Education.

2730 General Methods of Teaching in Post-Secondary Education (A,PS) is an introduction to the methodology of teaching psychomotor and cognitive skills; selection of appropriate methods for individual and group instruction; organizing laboratory and shop instruction; principles of instructional management.

2750 Introductory Design and Materials Processes (ISI) examines theory and practice of teaching problem solving, design and materials processes. Topics and practical activities include production and computer assisted design.

AR: attendance is required

OR: WHMIS training. Information can be obtained from the Office of Undergraduate Student Services.

2752 Teaching Current and Emerging Power Technology Systems (ISI) provides technology education students with opportunities to apply current teaching and learning strategies to the issues surrounding traditional and emerging energy technologies. Major topics of study include: fundamentals of sustainable energy production and control, redevelopment and use of traditional energy sources, application of solar energy, wind power production, and fuel cell development and utilization.

AR: attendance is required

OR: WHMIS training. Information can be obtained from the Office of the Undergraduate Student Services.

2800 Introduction to Adult Education (A,PS) is a review of the history of the Adult Education movement. The rationale for the investment of public or private resources in the education or training of adults. An examination of current educational philosophies related to Adult Education.

2801 The Adult as Learner (A,PS) examines the implications for diversity in adult programs and instructional strategies for adults with various social roles, abilities, attitudes, interests, and skills.

2803 Educational Aspects of Adult Development (A,PS) is an examination of the educational aspects of adult development from early adulthood through middle age to later maturity.

2806 Sociology of Adult Education (A,PS) explores the sociological context of adult learning. The interrelationship between particular social factors (e.g., age, sex, occupational structure) and the need for adult educational programs are studied. The potential effects of such programs on society are examined with reference to community development. Special emphasis is given to societal change as it relates to education as a way of life.

2900 Introduction to Statistics in Education (PE,IS,ISI,ME) is a laboratory course which takes a practical case study approach to survey and quasi-experimental quantitative methods in education, together with supporting statistical concepts of probability, descriptive and inferential statistics sampling and sampling distributions, correlation and bivariate regression.

3001 Supervised Practice Teaching in Native Schools I (T) is a four month period as a teaching assistant involved in the preparation of teaching materials, teaching assigned lessons and participating in other activities related to the duties of a teacher. This session is to be under the direction of a co-operating teacher and a university professor.

3002 Supervised Practice Teaching in Native Schools II (T) is a four month continuation of the experiences provided in Education 3001 with added responsibilities, and increased development of competencies essential for teaching. Prospective interns for the Fall semester should apply not later than February 15; prospective interns for the Winter semester should apply not later than September 30. Prospective interns for the Spring semester should apply not later than October 15. Applications received after

these dates will be considered in terms of the number of spaces available.
PR: ED 3001

3007 Teaching Strategies in Native and Northern Schools (T,NPE,NS) will examine a broad range of teaching strategies and instructional methods which may be used in classrooms. Students will be encouraged to incorporate elements of the Native and northern perspective in order to bring relevance to the province-wide curriculum. Particular emphasis will be placed upon how Native groups perceive education and the methods they view as appropriate.

CR: the former ED 2230, the former ED 2240, the former ED 4320

3009 Drama Education in the Primary and Elementary Grades (PE,ME) - inactive course.

3040 The Assessment and Development of Children's Language Abilities (PE,SE) focuses on techniques for assessing language abilities in primary and elementary students and will provide models for developing strategies in implementing language instruction appropriate to students' needs.

PR: ED 4350, 3543, or the former 3540 or 3545

3050 The Teaching of French as a Second Language in the Primary and Elementary Grades (PE,ME) is an introduction to the general principles of second-language teaching, to the curriculum materials currently prescribed for use in the schools, and to a consideration of teaching strategies and evaluation techniques associated with these materials.

PR: French 2101

3052 and 3053 Institute for Teachers of Core French in the Elementary Grades (PE) - inactive course

3120 Foundations of Art Education (PE,ME,NS) develops an understanding of art in relation to current theories of education and art education and to provide individual exploration of an experience in appropriate techniques. Curriculum will be examined with the focus on understanding how to provide favourable conditions and experiences for high quality individual development in visual expression.

CR: the former ED 2020, the former ED 3110, the former ED 3112

3131 Music Education in the Primary/Elementary Grades (PE) is designed to provide the prospective primary/elementary classroom teacher with the knowledge, skills and understandings necessary for presenting basic music concepts and skills to students and for using music as a means for teaching or enriching other areas of the curriculum. Course work will include study in the three facets of general classroom music: scholarship of the discipline, musicianship, and classroom methodology.

CR: former ED 3130

UL: not applicable towards the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education or the Bachelor of Music Education as a Second Degree

3140 Creative Arts (T,NPE) - inactive course.

3150 Bilingualism: Linguistic, Cognitive and Educational Aspects (PE) - inactive course.

3210 An Introduction to Guidance Services (A,PE,IS,ISI) is an introduction to guidance services in the modern school with specific emphasis on its history, purpose, basic concepts and principles, and services. Students are introduced to the nature of counselling, ways of developing effective interpersonal relationships within the school environment, and the role of the school counsellor and other educational personnel in the provision of guidance services.

3211 Introduction to Career Education (PE,IS,ISI) is an introduction to contemporary concepts and practices of career education and to theories of career development. Emphasis is on the practical application of theory and basic principles to the design and delivery of career education programs and to career counselling. Attention will be given to continuing career counselling and career development needs of individuals as well as to groups with special needs.

CR: the former ED 4906

3255 Child Abuse and the School-Age Child (PE,IS,ISI) will discuss the general issues of child abuse including definitions, detection, reporting, protection, prevention, and the educational implications of child abuse. A number of specific issues including provincial policies presently in force in Newfoundland and Labrador and elsewhere will be examined. The teacher's role in collaboration between officials in education, social work, health and justice agencies will be explored with a view to preventing abuse and modifying the circumstances of abused children.

3273 Science in the Primary/Elementary Grades (PE) is a practical course designed to develop approaches to Science teaching based on student investigation of scientific phenomena. Examples are drawn from both provincial and other major curricula.

CR: the former ED 2180, the former ED 3270, the former ED 3275

3280 Educational Assessment (A,PS) is a study of the broad spectrum of educational assessment focussing specifically on the development of

objectives, the construction and use of formal teacher-made tests, the use of informal assessment techniques, the interpretation and application of assessment data, continuous evaluation, criterion-referenced measurement, and emerging trends in assessment.

CR: the former ED 4912

3281 Tests and Measurements (T,NPE,NS) examines basic concepts of evaluation involving teacher-made and standardized tests, with particular reference to validity and reliability in cross-cultural situations.

CR: the former ED 4912

3290 Identifying Learner Diversity Within a Context of Culture (PE,IS,ISI) - inactive course.

3312 Language Arts in the Primary/Elementary School I (PE) provides students with a holistic view of the learning and teaching of language arts (i.e., the receptive language abilities of viewing, listening and reading, and the expressive language abilities of speaking and writing). This course will help students develop a theoretical perspective on two major aspects of language, that being "knowledge of language" (i.e., knowledge of the structures of language) and "knowledge about language" (i.e., knowledge about attitudes and perceptions towards language and the various purposes of language). This course will extend students' understanding of the importance of the home/community influences upon emergent and developmental literacy and language development.

CR: the former ED 2210, the former ED 2220, the former ED 3305, the former ED 3315

3321 Native Literature (T,NPE) is an examination of Native literature with special emphasis on writings of Native peoples for Native children. Literature which presents the Native point of view will be examined in the light of historical and current developments in Native and northern conditions.

3322 Children's Literature in the Primary/Elementary School (PE) focuses on the personal and educational values for using children's literature in the classroom, examines the literary genres appropriate for primary/elementary children and explores meaningful literacy extensions to develop children's literacy strategies and skills. In addition, the course examines guidelines for evaluating children's literature for literacy and aesthetic qualities. Instructional strategies to integrate children's literature across the curriculum are explored.

CR: the former ED 2060, the former ED 2065, the former ED 3310, the former ED 3320

3430 General Methods of Instruction of Adults (A) is a study of the various processes of Adult Education: discussion groups, case studies, role playing, individual and group discovery, demonstrations, simulation exercises, action research, report writing and lectures.

3440 Organization and Administration of Programs in Adult Education (A,PS) examines alternative provincial or regional methods of organization for the provision of Adult Education, including the statutory framework within which Adult Education functions.

3484 Computers and Learning Resources for Primary/Elementary Teachers (PE) focuses on the integration of computer software and other learning resources into primary/elementary school teaching. Laboratory components will be scheduled so that students may learn how to use and implement communications, applications and curricular software.

CR: the former ED 3480, ED 3801, the former ED 4480, the former ED 4905

3515 Current Approaches to Reading in the Primary and Elementary Grades (PE) - inactive course.

3542 Reading in the Primary and Elementary Grades (NPE) is concerned with the teaching of reading in the primary and elementary grades. Special attention is given to the learning needs of children whose first language is not English. Emphasis is placed upon understanding the nature of the reading process and the current practices used in classroom reading instruction for kindergarten through grade six.

CR: the former ED 2110, the former ED 2120, the former ED 3540, the former ED 3543, the former ED 3545

UL: applicable only to students enrolled in the Bachelor of Education (Native and Northern) Degree program

3543 Language Arts in the Primary/Elementary School II (PE) provides students with a social-psychological perspective on children's learning to read, reading and reading to learn. Students will explore current and traditional models of the reading process and the importance of home/school/community contexts for fostering literacy learning. Students will apply instructional strategies for children's learning of story, book and print concepts, word identification, fluency, vocabulary development and comprehension for a variety of texts.

CR: the former ED 2110, the former ED 2120, the former ED 3540, ED 3542, the former ED 3545

PR: ED 3312

3565 Gender and Schooling (PE,IS,ISI) is an introduction to the study of gender and education. It includes a historical overview of the link between

gender and schooling as well as an examination of contemporary theoretical perspectives and research relating to the role of the school in gender development in general and gender inequality in particular. Implications for educational policy and practices will also be explored.

3570 History of North American Education (PE,IS,ISI) - inactive course.

3571 The History of Education in Newfoundland Since 1800 (PE,IS,ISI) is a survey of the main trends in the development of the educational system; the social, religious and demographic factors which have affected educational progress; the place of education in the cultural development of Newfoundland.

3573 History of Native and Northern Education in Canada (PE,NPE,NS) - inactive course.

3585 Multiculturalism and Education (PE,IS,ISI) - inactive course.

3600 Academic and Behavioural Assessment (SE) applies the theories of test development in establishing a competent understanding of the utilization of diagnostic and prescriptive instruments as well as teacher-made tests as they apply to the area of exceptional children.

3610 Nature and Characteristics of Intellectual Disabilities (SE) aims to provide an understanding of the nature and characteristics of intellectual disabilities and the psycho-social implications of this area of exceptionality.

3618 Nature of the Primary/Elementary School Child - Development (ME,PE) is intended to provide students with an awareness and understanding of the origins of many aspects of child behaviour and competence. While focussing on the development and nature of the "normal" child, where appropriate, contrasts and comparisons will be made between the development of "normal" and "exceptional" individuals.

CR: the former ED 2610, the former ED 3240

3619 Nature of Primary/Elementary School Child - Learning and Cognition (ME,PE) provides an introduction to human learning, motivation and cognition and to the related concepts and theories underlying children's classroom learning and behaviour. Focus will be on typical development with some attention to atypical (exceptionality) functioning in these areas. The course will familiarize students with the concepts and vocabulary used to describe classroom learning and with explanations and justifications for many educational and instructional activities and practices. Particular attention will be paid to application of this knowledge to instruction and classroom management and to the facilitation of learning.

CR: the former ED 3616, the former ED 3615

PR: ED 3618

3620 Nature and Characteristics of Emotional/Behavioural Disorders (SE) includes an examination of procedures for the early identification of children with behavioural disabilities and major systems of classification of behaviour problems. It will also include an analysis of: aberrant adjustment mechanisms, deviant development and specified behaviour problems with implication for therapeutic education.

PR: ED 4240, or the former ED 3220 or ED 3230

3630 Nature and Characteristics of Learning Disabilities (SE) examines our theoretical understanding of the nature and characteristics of learning disabilities. It explores contemporary understandings, assessment/identification approaches, and current research as it relates to educational practice.

CR: the former ED 3231

3640 Current Issues in Special Education (PE,SE) consists of a study of special and selected problems related to the teaching of special education with particular emphasis placed on special education within the Province of Newfoundland and Labrador.

PR: ED 4240, or the former ED 3220 or ED 3230

3650 Practicum in Special Education (SE) encompasses a practice experience with students who have an identified exceptionality. The emphasis will be on a supervised field placement in a special education position within a school setting.

PR: completion of 18 credit hours in Special Education including ED 3600

3660 A Study of the Gifted Child (PE,ME,SE) is an examination of the nature and characteristics of gifted children, with emphasis upon methods of identifying gifted children, implications of giftedness for learning and instruction and reviews of several educational programs for the gifted.

3680 Inclusive Practices for Students with Autism Spectrum Disorder (ASD) (SE) examines the nature of ASD with particular focus on methods of behavioural assessment, use of assistive technology and specific therapy techniques. Support programs will be considered within an ecological context that prioritizes collaborative planning with parents and other therapeutic agents.

3690 Collaborative Practice (SE) examines the theoretical and practical aspects of collaborative practice within an interagency model of case planning for students with diverse learning needs. Emphasis is on exploring issues of power/empowerment, consultation, communication, conflict

resolution/problem-solving, advocacy and collaboration. Perspectives of parents and families, educators, and community resource professionals will be explored. The course strives to create a family-focussed approach to effective planning in contemporary schools.

3691-3699 Special Topics Courses in Special Education (SE) to be announced by the Faculty of Education.

3710 Group Instruction in Post-Secondary Education (PS) is an in-depth study of various methods of group instruction; planning and presenting demonstration teaching units; practice in techniques of group instruction.

PR: ED 2710 and ED 2730

3720 Individualized Instruction in Post-Secondary Education (PS) is a study of the various systems of individualized instruction; the theoretical basis for individualizing courses, individual differences, organizing individualized courses, selection and development of materials; management of individual student progress.

PR: ED 2710 and ED 2730

3730 Curriculum and Instructional Development in Post-Secondary Education (PS) examines the social, cultural, philosophical, and economic forces influencing changes in Post-Secondary curriculum and instructional methods. Study of current Post-Secondary Education curriculum designs, problems and trends; methods of gathering curriculum information; procedures for revising and evaluating a curriculum.

PR: ED 2710 and ED 2730

3750 Intermediate Design and Materials Processing Technology (ISI) provides opportunities to apply current teaching and learning strategies within the technology education laboratory environment. Technology education students will examine labor trends that are impacting society's ability to expand and maintain today's infrastructure. Innovative teaching methodologies will be utilized to facilitate further investigation of the opportunities offered in skilled trades. Topics include: Red Seal Certification, print reading and application of the National Building Code within selected skilled trades.

AR: attendance is required

OR: WHMIS training. Information can be obtained from the Office of Undergraduate Student Services.

3751 Teaching Intermediate Communication Systems (ISI) examines the application of communication techniques through the various forms of media available. Technology education students will engage in activities that will provide insights into how current teaching and learning strategies can be blended with contemporary communication devices and means to facilitate collaborative lifelong learning. Topics include: web based multimedia, graphic design, audio/video production, animation production and social networking applications.

3801 Educational Media (A,PS) introduces audio visual communications with emphasis on equipment operation and basic local production of instructional materials; and the application of computers to education.

CR: the former ED 3480, ED 3484, the former ED 4480, the former ED

4905

3920 Instrumental Teaching Methods (ME) examines current pedagogical practices, procedures, and resources for teaching brass, woodwinds, percussion, and strings in both band and orchestral school settings. Emphasis is placed on the development of comprehensive instrumental music education programs.

LH: a 2 hour twice weekly laboratory section (MUN Lab Band and

Orchestra) designed to provide practical teaching experience and methodology in both band and orchestral settings

3925 Intermediate/Secondary School Music Methods (ME) examines current pedagogical practices, procedures, and resources for teaching Music in the intermediate/secondary schools. In addition to standard contexts in general music, choral, and instrumental settings, emphasis is placed on technology and settings such as musical theatre in order to reflect the diversity of music programming in intermediate/secondary schools.

3940 Mathematics in Primary and Elementary Grades (PE, ME) is a general overview of aspects of teaching Mathematics in the primary and elementary grades. Theories of child development as they relate to Mathematics teaching, characteristics of Mathematics topics in primary and elementary grades, and the implications for teaching will be the major topics to be discussed in this course.

CR: the former ED 2340, the former ED 2310, the former ED 2320

3941 Diagnosing and Directing Learning in Primary and Elementary Mathematics (PE,T,SE) is a study of aspects of diagnosis and remediation in primary and elementary Mathematics, and of the basis for constructing and applying diagnostic techniques. The course offers an examination, development, and application of a variety of manipulative aids and assistive technology to be used in the teaching of Mathematics in the primary and elementary grades.

PR: ED 3940

3945 and 3946 Institute in Teaching of Junior High School Mathematics

Courses (PE) will focus on the nature of junior high Mathematics instruction and how it should differ from elementary and high school instruction. Emphasis will be placed on the transition between informal and formal approaches to the teaching of junior high Mathematics. The Van Hiel levels and their implications for instruction in geometry will be discussed. Activities appropriate to the teaching of junior high Mathematics will be developed and demonstrated. A particular focus in this component of the Institute will be on activities appropriate to the new program and how they can be integrated into the junior high Mathematics curriculum.

PR: ED 3940 (or equivalent) or ED 4161 (or equivalent) or permission of the instructor

3951 Curriculum, Instruction, and Assessment in the Primary/Elementary School I (PE) is designed to engage students in an introduction to curriculum, instruction, and assessment in the primary/elementary school through active participation in problem solving. Students will be introduced to the different ways that primary/elementary school children view and make sense of their world (i.e., the linguistic, mathematical, scientific, and artistic). Working through such a framework, students will be introduced to instructional strategies and planning, formative and summative assessment, and issues inherent in the management of the primary/elementary classroom, as they create multi-disciplinary, thematic, resource-based units.

3952 Curriculum, Instruction, and Assessment in the Primary/Elementary School II (PE) is designed to engage students in a deeper exploration of issues in curriculum, instruction, and assessment in the primary/elementary school through active participation in problem solving. Students will be introduced to the different ways that primary/elementary school children view and make sense of their world. Working through such a framework, students will be introduced to instructional strategies and planning, formative and summative assessment, and issues inherent in the management of the primary/elementary classroom, as they create multi-disciplinary, thematic, resource-based units.

PR: ED 3951

3961 Social Studies in Native and Northern Schools (T,NPE) will include an examination of teacher planning, appropriate teaching strategies for and the evaluation of pupil learning in the social studies within those contexts, in addition to exploring the nature and purposes of social studies education in Native and northern schools.

CR: the former ED 2150, the former ED 3960

3962 Social Studies in the Primary/Elementary School (PE) is an introduction to the social studies program at the primary/elementary school level. Topics to be explored include the nature and purposes of the social studies curricula, approaches to teaching and learning in this curricula area, selecting and utilizing learning resources, and conducting assessment in the social studies.

CR: the former ED 2160, the former ED 3960

4005 Effective Teaching and Learning Environments (IS,ISI) introduces the principles, dispositions, and skills needed to create various types of effective learning environments. Topics include: professional relationships, school culture, decision making classroom management and models of teacher power.

401X Undergraduate Teaching Internship (PE) (equivalent to 15 credit hours in Education) is designed as an extended practicum affording students an opportunity to integrate theory and practice in a working situation, the internship consists of intensive classroom experience extending over one semester during the final stage of the program. During this period, students will be provided with educational experiences in which the interrelationships among the components of the university program are brought into focus through the teaching exercise.

The internship is intended to help students develop their individual style of teaching, to enable students to recognize the scope and complexity of a classroom teacher's role and responsibility, and to provide opportunities for the study of children as individuals and in groups, both in the classroom and other school settings.

Beginning with orientation activities early in the semester, students' responsibilities will include observing and analysing teaching-learning activities, preparing and presenting student-learning activities, assessing both personal and class progress, and participating in discussions with co-operating teachers and faculty advisers. Throughout the internship semester, students will be required to participate in seminars related to in-school work.

AR: Attendance is mandatory. With respect to holidays, interns follow the schedule of the school and not that of the University.

CR: the former ED 302X and ED 403X

OR: students may not be placed in their first district of choice and may be assigned to another Provincial school district

PR: successful completion of the professional year. Students completing a Focus Area in French must have completed the courses in French required under the regulations for this focus area, and Education 3050.

4020 Issues and Trends in Native Education (NPE,NS) is a seminar course dealing with research, current problems and issues associated with Native Education within a Canadian, and in particular, a Newfoundland and

Labrador context.

403X Internship in Music Education (ME) (equivalent to 15 credit hours in Education) is a one semester internship in one or more schools to provide student teaching experiences in choral, classroom, and/or instrumental teaching contexts in primary, elementary, intermediate, and/or secondary schools settings.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

OR: students may not be placed in their first district of choice and may be assigned to another Provincial school district

PR: ED 2500, ED 2515, ED 2520, ED 3920, ED 3925 and any additional requirements as outlined in the letter of acceptance to the music education program

404X Internship in Native and Northern Education (NPE,NS) (equivalent to 15 credit hours in Education) is a one-semester internship in a school setting that will enable students to become directly involved in the teaching/learning process through observation and practice. Activities during the semester will involve seminars to assist students in the assessment of teaching methodologies most appropriate for the curriculum in Native schools. Student placement will be in a school setting depending upon the program route which students have followed.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

PR: see Bachelor of Education (Native and Northern) Degree Regulations

406T Introductory Internship in the Intermediate and Secondary School (IS,ISI) is a 10 (consecutive) work day teaching and learning experience, framed by explicit guidelines, that focuses on key learning experiences and graduated responsibilities related to professional teaching. It includes both observation periods and initial teaching experiences.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

407T Extended Internship in the Intermediate and Secondary School (IS,ISI) is a 60 day teaching and learning experience, framed by explicit guidelines, that focuses on key learning experiences and graduated responsibilities related to professional teaching. It includes both observation periods and extensive teaching experiences.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

CH: 12

CR: the former ED 405X

OR: Interns completing the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education will be placed for part of the internship in a Technology Education classroom setting.

PR: Education 406T. Interns wishing to complete an internship in French immersion must complete Education 4154 and obtain the permission of the Office of Undergraduate Student Services. Normally, French immersion interns have the equivalent of a major in French and a minimum of two semesters in a French milieu.

4120 The Teaching and Learning of Art in the Intermediate and Secondary School (IS,ISI,ME) introduces the rationales for teaching art and examines contemporary art teaching practices. Teacher candidates will examine their roles as artist-teacher and teacher-artist, as well as explore learning in and through art. Topics include curriculum implementation; instructional planning; managing the learning environment; assessment and evaluation; safety; arts advocacy; and visual, artistic and technological literacies.

4121 The Teaching and Learning of Theatre Arts in the Intermediate and Secondary School (IS,ISI,ME) engages teacher candidates in developing their role as theatre artist/teacher. Topics include: beliefs informing the practice of theatre arts in the context of school; related pedagogies and educational practices in dialogue with the art form of drama; process drama and theatre education, an interdependent relationship; implementation planning strategies; communication style and facilitative language.

4142 The Teaching and Learning of the English Language Arts in the Intermediate and Secondary School (IS,ISI,ME) draws on research in the teaching and learning of English/language and literacy to prepare teacher candidates to develop engaging, differentiated experiences for students. Topics include: curriculum; the nature and structure of language and literature programs; test analysis, response and critique; writing and representing genres in multimodal and linguistic; media literacy forms; and oracy.

4151 Advanced French Methodology (IS,ISI,NS) is an in-depth analysis of the nature and purpose of the French program. Topics include a brief overview of the history of French teaching methodologies, an introduction to the research literature, an evaluation of techniques, and a consideration of issues facing the teaching of French.

PR: ED 4154 or permission of the Office of Undergraduate Student Services

4154 The Teaching and Learning of French in the Intermediate and

Secondary School (IS,ISI,ME) provides an introduction to the nature and purpose of French programs in Canada. Topics include: an overview of the purpose of core French and French immersion; theories and principles of second-language teaching and learning; methods; techniques, strategies and characteristics of effective planning and assessment in second-language teaching.

4155 Introduction to Teaching in French Immersion in the Primary and Elementary Grades (PE,ME) is a brief overview of the development of French Immersion programs; aims and objectives of French Immersion; evaluation of the extent to which objectives and materials can reflect those of the regular English classroom; analysis of differences between teaching in the French Immersion classroom and the core French, the French mother tongue, and the regular English classrooms; general teaching strategies appropriate to the level of French language development in the immersion setting.

OR: this course will be conducted in French

4161 The Teaching and Learning of Mathematics in the Intermediate and Secondary School (IS,ISI,ME,NS) introduces teacher candidates to the principles, dispositions, and skills necessary to teach mathematics. Topics include: the nature of mathematical knowledge, learning principles, mathematics pedagogy, curriculum, instructional planning, and evaluation in mathematics.

4174 The Teaching and Learning of Science in the Intermediate and Secondary School I (IS,ISI) provides a context for teacher candidates to develop the knowledge, abilities, and dispositions to provide learners with the opportunity to develop multidimensional scientific literacy. Topics include: assessment and instruction, controversial issues in Science, curriculum planning, differentiating instruction in science, inquiry, information and communication technologies in science, learning theories, multicultural science education, scientific literacy, science-technology-society-environment, and student naive and alternative conceptions.

CR: the former ED 4170, the former ED 4171, the former ED 4270, the former ED 4271

LH: two hours per week

4175 The Teaching and Learning of Science in the Intermediate and Secondary School II (IS) provides a context for teacher candidates to develop a greater understanding of the nature of scientific knowledge and how it is generated, explore the rationale(s) for the inclusion of the nature of science as a goal of scientific literacy, analyse research that reports on teachers' and students' views about the nature of science, and examine the potential of a range of pedagogical approaches for helping all learners in science develop a greater understanding of the nature of science. Topics include: philosophy, history, and sociology of science; the nature of science (definitions and beliefs); and the nature of science in the classroom.

CO: ED 4174

4180 The Teaching and Learning of Social Studies in the Intermediate and Secondary School (IS,ISI,ME,NS) examines the theory and practice of social studies education. Teacher candidates will investigate ways of applying the principles of effective teaching and learning in the social studies classroom. Topics include: the nature and purpose of social studies education, specific teaching strategies, and instructional planning and evaluation.

4181 The Teaching and Learning of Social Studies in the Intermediate and Secondary School II (IS) examines the separate disciplines of social studies. Topics include: the evolution and nature of social studies education, current issues and trends in the area and various teaching strategies and assessment techniques appropriate to the discipline.

CO: ED 4180

4190 The Teaching and Learning of Physical Education in the Intermediate and Secondary School (IS,ISI,ME) applies the principles of effective teaching to the teaching and learning of physical education. Topics include the nature and purpose of physical education, an examination of the physical education curriculum, an analysis of quality daily physical education, approaches to teaching physical education, and evaluation of progress in physical education.

LH: two hours per week supervised practice teaching on-campus and/or in a school setting

4203 The Teaching and Learning of Religious Education in the Intermediate and Secondary School (IS,ME) applies the principles of effective teaching to the teaching and learning of religious education. Topics include formulating objectives, examining theories of faith and moral development, selecting and using resources, and evaluating learning.

4205 Religious Education in Primary and Elementary Grades (PE,ME) is an introductory study of aims and objectives, subject matter, curriculum materials, teaching methods, learning experiences, and evaluation for Religious Education courses.

CR: the former ED 2080

4220 The Teaching of Inuttut I (T,NPE,NS) explores a variety of teaching techniques and materials developed to assist in the teaching of Inuttut in Native schools. Problems associated with second-language teaching will be

explored.

PR: 9 credit hours in Inuttut

4221 The Teaching of Inuttut II (T,NPE,NS) is a continued exploration of teaching techniques and material development for the teaching of Inuttut with emphasis on linguistic difficulties encountered in Native schools by children whose first language is English.

PR: ED 4220

4230 The Teaching of Innu-aimun I (T,NPE,NS) explores a variety of teaching techniques and materials developed to assist in the teaching of Innu-aimun in Native Schools.

PR: 9 credit hours in Innu-aimun

4231 The Teaching of Innu-aimun II (T,NPE,NS) explores a variety of teaching techniques and material development for the teaching of Innu-aimun. Linguistic difficulties encountered by students whose first language is not Innu-aimun.

PR: ED 4230

4240 An Introduction to the Exceptional Learner (IS,ISI,ME,PE) is an introduction to the nature of exceptionality in the student. Topics include an examination of special needs resulting from exceptionality, approaches to meeting the special needs, issues of exceptionality, and a consideration of selected categories of exceptionality.

CR: the former ED 3220, the former 3230, the former ED 4902

4242 Identification and Remediation of Learning Difficulties (IS,ISI,PE) examines the identification processes and remediation techniques appropriate for dealing with student learning difficulties. Topics include identification of learning difficulties, the process of program planning, and the application of teaching and learning strategies to specific subject areas.

PR: ED 4240 or the former 3220 or 3230

4250 and 4251 Institute for Teaching French in Immersion Programmes Courses (PE) - inactive course.

4252 and 4253 Institute in the Teaching of Social Studies in French Immersion Courses (PE) - inactive course.

4260 Engaging the Adolescent Learner (IS,ISI,ME) considers the unique learning contexts and characteristics of learners through the span of adolescence, from early adolescence to young adulthood. It focuses on the intersection of psychological aspects of adolescence with biological, social and cultural, as well as cognitive and affective aspects in order to understand, to engage, and to effectively teach the adolescent learner. The implications of these unique periods for creating effective teaching and learning environments in both intermediate and secondary classrooms will be considered.

4275 Environmental Education Across the Curriculum (IS,ISI) examines various international and Canadian initiatives, models, curricula, and programs in environmental education and explores effective methods of developing environmental awareness through the various content areas of elementary, intermediate and secondary education.

4300-4310 Special Topics Courses in Primary/Elementary (P/E) will have topics to be offered announced by the Faculty of Education.

4330 Curriculum and Instruction in Native and Northern Schools I (T,NPE,NS) reviews the principles of and techniques for curriculum development. Adaptation or reformulation of these will be made in the light of the needs and desires of Native peoples. Critical analysis will be made of curriculum resources presently in use. Instructional materials will be prepared and produced with emphasis on printed materials relevant to the experiential background of the Indian and Inuit child.

4331 Curriculum and Instruction in Native and Northern Schools II (PE,NPE,NS) is an in-depth examination of innovations in curriculum and instruction in Native communities within Canada. Emphasis will be placed on projects in curriculum planning and the development of instructional material, to be conducted in conjunction with school personnel already in the field. This course would serve as a valuable resource to school systems involved in curriculum planning and instructional development.

4350 Reading in the Content Areas (IS,ISI) examines the nature of reading in subject-specific areas such as history, biology, and mathematics. Topics include the role of the teacher in the teaching of content in different areas, evaluating vocabulary, grammar, usage and text structure for instruction, and analysing the variety of strategies for reading, writing and studying.

4362 Sociological Perspectives on Teaching and Learning (PE,ME) is an examination of such social issues in education as poverty, child abuse, gender, ethnicity, and changes in the society and their implications for the nature and process of schooling. A study of social dimensions of education, including the content of education and the organization of teaching and learning. An analysis of students' experiences in the internship with regard to the above and other aspects of education the students might identify.

CR: the former ED 4360

PR: completion of the Professional Year

4381 Perspectives on Schooling (IS,ISI,ME) examines educational theory, practice and policy from the disciplinary perspectives of philosophy, sociology, history and/or comparative education. Its aim is to foster an appreciation of the intrinsic value of these specific forms of inquiry as contributions to contemporary understanding of educational enterprise. Topics include: ethical and epistemological considerations related to areas such as critical pedagogy, equal educational opportunity, educational reform, change and social justice.

4383 Philosophy of Teaching and Learning (PE,ME) examines a number of central philosophical concepts, assumptions and issues involved in the pursuit of teaching and learning in the schools. The aim of the course is to provide students with an understanding of the distinctive character of philosophical analysis as a reflective and critical practice that intends to promote professional excellence and personal well-being.

CR: the former ED 4380

PR: completion of the Professional Year

4390 Diversity, Social Justice, Teaching and Learning (IS,ISI) examines the intersection of multiple and inter-related forms of social and cultural diversity such as those related to social class, ethnicity, gender, ability, place, and sexual identity. The course explores ways to create more effective equitable learning environments through renewed, culturally responsive and respectful policy; critical, reflective and anti-discriminatory teaching; and more inclusive, socially critical curriculum.

4420 Legal and Moral Issues in Education (IS,ISI,PE) examines educational law and sources of conventional morality for the purpose of clarifying individual stances on legal and moral issues. Topics include the nature and theoretical bases of law and morality in education, the legal foundations of the Canadian education system, the legal and moral rights and responsibilities of teachers and students, and teacher liability.

4425 Introduction to Educational Administration (PE,IS,ISI) is an examination of the roles of various levels of government in Education; theories of administration; management as it relates to curriculum, organization, personnel, finance, and communication; and their implications for teachers in the Newfoundland context.

CR: the former Education 2410

PR: completion of the Professional Year

4427 Professional Leading and Learning in the School Organization (IS,ISI) explores the theory and practice of school organization and its effect on teaching and learning and provide opportunities for teacher candidates to become reflective learners and teacher leaders. Topics include: parents and families, communities and schools; law and education; resources in education; policy and politics; teacher leadership, school and system administration; and the teaching profession.

CR: ED 4425

4450 Practicum in Adult Education (A) are on-the-job supervised activities designed to have the student implement the theory and principles of Adult Education.

4505 Transition Planning for Adolescents with Intellectual Disabilities (SE) focuses on the application of educational procedures relevant to successful post-secondary education, employment and community integration of adolescents and young adults with mild and moderate developmental disabilities. Appropriate senior high programming, life skills development, use of assistive technology and resource materials necessary for transition planning for this population will be reviewed.

CO: ED 3610

PR: ED 3610

4510 Inclusive Practices for Students with Mild Intellectual Disabilities (SE) gives consideration to the establishment of objectives; selection, development and review of materials; the use of various instructional strategies; assistive technology and the provision of appropriate experiences for the education of students with mild intellectual disabilities.

CO: ED 3610

PR: ED 3610

4515 Inclusive Practices for Students with Moderate Intellectual Disabilities (SE) focuses on inclusive educational practices for students with moderate intellectual disabilities. Emphasis will be placed on the development, implementation and management of a well-balanced individualized curriculum as articulated in an individual educational plan. Students will be expected to demonstrate fluency in the design of effective instructional strategies, including the use of assistive technology to maximize student's individual strengths across a variety of environments.

CO: ED 3610

PR: ED 3610

4520 Inclusive Practices for Students with Behavioural Challenges (SE) examines programs and strategies for students with behavioural issues. These will include counseling skills, case conferences, structured learning environments, use of assistive technology and therapeutic interventions for specific behaviour problems. In addition, consideration will be given to collaboration with mental health practitioners and procedures to develop readiness for return to regular instructional programs.

CO: ED 3620

PR: ED 3620

4530 Inclusive Practices for Students with Learning Disabilities (SE) investigates specific teaching methods, use of assistive technology and programming practices as they pertain to reading, writing, language, mathematics, social skills, and metacognitive skills for students with identified learning disabilities.

CO: ED 3630

PR: ED 3630

4540 Inclusive Practices for Students with Speech/Language Disorders (SE) examines theoretically sound and research-based methods for the identification and remediation of speech and language concerns in children and adolescents. Topics include typical language development; nature of developmental concerns for both speech (articulation, voice and fluency) and language (receptive, expressive and phonetic awareness); social use of language; and use of assistive technology. Particular focus will be placed on current interventions/strategies and programs/models. The course is aimed at supporting teachers in developing effective individualized programs.

4541 Communication for the Deaf - inactive course.

4543 Inclusive Practices for Students with Hearing Loss (SE) examines the effects of hearing loss on language and social/emotional development in students and the resulting programming implications for the inclusive classroom. The course strives to prepare teachers to identify the needs of students with various degrees of hearing loss and develop effective programs to accommodate their needs. The use of assistive technology such as hearing aids, cochlear implants and other assistive listening devices will be discussed.

4610 The Nature and Management of Stress (PE,IS,ISI) studies the nature of stress as it is manifested in the teacher and the teaching profession, and provides approaches to coping effectively with the factors which are related to that stress. Topics include the nature of the human stress response, causes and symptoms of stress (personal and professional), self-assessment techniques, and a selection of approaches available to cope with the stress typically related to the roles and expectancies of teaching.

4620-4639 Institutes in Intermediate and Secondary Education (IS) will be topics announced by the Faculty of Education.

CH: 1

4640-4659 Institutes in Intermediate and Secondary Education (IS) will be topics announced by the Faculty of Education.

CH: 2

4700 Student Teaching in Post-Secondary Education (PS) applies theories of education in the learning situation; observation and demonstration of lessons; seminars in teaching techniques.

PR: ED 2710, ED 2720, ED 2730, ED 2801, ED 3280, and ED 3801, or equivalent teaching experience and permission of the course instructor

4710 Recurring Issues in Post-Secondary Education (PS) identifies, analyses, and discusses major issues, practices and problems in Post-Secondary Education provincially, nationally, and internationally.

PR: ED 2710, ED 2720, and ED 2730

4730 Educational Programs and Practices in Industry and Labour (PS) is a study of the various Post-Secondary Education programs operated either wholly by industry and labour or jointly with educational institutions; apprenticeship, work experience and study programs, co-operative education, training-in-industry, training on-the-job, supervisory training, and management development.

PR: ED 2710, ED 2720, and ED 2730

4750 Integrated Materials and Production Processes (ISI) provides technology education students with opportunities to examine current teaching and learning strategies applicable to intermediate and secondary technology education programs. The course will focus on advanced materials processing using Computer Numeric Control (CNC) devices. Students will receive practical instruction in the use of fluidic control systems that are used in many manufacturing processes. Topics include: CNC production processing, fluidic control systems, and application of the design process and portfolio development.

4752 Technology Robotics Systems (ISI) is designed to provide technology education students with an understanding of key concepts in robotic development and control applications. Students will complete practical activities that promote development of the skills necessary to deliver a comprehensive program in this area of study. Topics include: the study of electrical energy, analog and digital electronics; fabrication techniques; object oriented/event driven programming; and wireless robotic control over Internet Protocol (IP).

AR: attendance is required

OR: WHMIS training. Information can be obtained from the Office of Undergraduate Student Services.

4753 Teaching Residential Construction Technology (ISI) provides technology education students with opportunities to apply current teaching and learning strategies while developing the skill set necessary to deliver a comprehensive program in residential construction technologies. Topics include: shop and site safety, print reading and interpretation, basic residential framing techniques, installation of exterior construction features, installation of interior environmental applications, and energy control systems.

AR: attendance is required

OR: WHMIS training. Information can be obtained from the Office of Undergraduate Student Services.

4760-4780 Advanced Specialized Post-Secondary Education Technologies (PS) examines the theory and practice of selected advanced specialized Post-Secondary Education technical skills and their application to the laboratory, workshop and business office. Emphasis will be placed on innovative and emerging techniques in selected areas of business, industry, and the service occupations.

4830 Music Education Seminar (ME) examines, through inquiry, reflection and synthesis, the foundations of music education common to all levels and contexts of school music. The focus is the bridging of theory, philosophy, and practice in music education. Topics include current issues; challenges and opportunities in music education (provincial, national, and international); interdisciplinary and integrated arts education; cultural pedagogy, diversity, and social justice in education; and teacher professional development. Additional modules will be designed to meet teacher candidates' needs and interests.

4901 Effective Teaching Strategies for Multi-grade/Multi-age Classrooms (PE,IS,ISI) begins with a critical examination of traditional approaches to multi-grading. The main focus of the course will be to introduce teachers to the potential of adopting a multi-age approach in small schools which have of necessity grouped children of more than one age group and grade level together for instruction. This course will also examine the implications of implementing a philosophy of multi-age pedagogy in the primary, elementary and intermediate grades (K-9).

4943 Computing Technology in Mathematics Education in the Primary and Elementary Grades (PE) will explore the impact of computing technology on Mathematics curriculum and instruction. Topics will include

the role of computers and calculators in developing mathematical concepts, computational skills and mathematical problem-solving processes; the use of computer animation and simulation to enhance Mathematics instruction; and, the evaluation and adaption of commercially developed software for Mathematics instruction. An in-depth look at LOGO and available CAL materials will be included.

PR: ED 3940

4944 Computing Technology in Mathematics Education in the Secondary School Grades will explore the role of the computer as a provider of learning experiences in the high school Mathematics curriculum. The focus of the course will be on CAL in Mathematics and will investigate drill and practice, tutoring, simulation, animation, and demonstration. The role of the computer in communication and testing in Mathematics will be included.

PR: ED 4161

4950 Assessment of Learning (IS,ISI) introduces the theory and practice of evaluation and assessment in educational settings. Topics include the nature of classroom assessment; production, administration and evaluation of teacher-made tests and other assessment tools; product and performance assessment; grading and reporting communication of evaluation information; and the analysis and application of assessment data to instructional planning and the improvement of teaching.

CR: the former ED 4912

4970-4980 Special Topics Courses in Intermediate/Secondary (IS) will have topics offered announced by the Faculty of Education.

5000 The Teacher Development Seminar (IS,ISI) provides teacher candidates with an opportunity to frame, conceptualize and articulate educational issues; (re)consider the purposes of education; reflect on teaching and learning; and develop and display artifacts that document learning, professional knowledge and practice, and teacher identity. Teacher candidates are expected to participate in a series of critical reflective seminars and workshops, and to create an electronic portfolio (e-portfolio). Topics include: critical reflection, professionalism and ethics in teaching, and teacher identity.

AR: attendance is required

OR: seminars, workshops and other professional development sessions

Dean

Venkatesan, R., B.E.(Hons.) *Madurai*, M.Sc.E., Ph.D. *New Brunswick*, P.Eng.; Professor, Electrical and Computer Engineering; Dean *pro tempore*, July 1, 2011 - July 31, 2012

Naterer, G. F., B.Math., M.A.Sc., Ph.D. *Waterloo*, FCSME, FASME, FEIC, P.Eng.; Professor, Mechanical Engineering; Dean as of August 1, 2012

Associate Dean (Undergraduate Studies)

Fisher, A.D., B.Sc. *Queen's*, M.Eng. *McMaster*, FEC, P.Eng.; Associate Professor, Mechanical Engineering

Associate Dean (Graduate Studies)

Lye, L.M., B.Sc.(Hons.) *Bolton Inst.*, Ph.D. *Manitoba*, FCSCE, FEC, P.Eng.; Winner of the President's Award for Distinguished Teaching, 2003-2004; Professor, Civil Engineering

Interim Associate Dean (Research)

Moloney, C.R., B.Sc.(Hons.) *Memorial*, M.A.Sc., Ph.D. *Waterloo*; Professor, Electrical and Computer Engineering

Acting Director, Ocean Engineering Research Centre

Qiu, W., B.Eng., M.A.Sc. *Dalian University of Technology*, Ph.D. *Dalhousie*, P.Eng., Associate Professor, Ocean and Naval Architectural Engineering

Director, Industrial Outreach

Fisher, A.D., B.Sc. *Queen's*, M.Eng. *McMaster*, FEC, P.Eng.; Associate Professor, Mechanical Engineering; Associate Dean (Undergraduate Studies)

Manager, Finance and Administration

Elliott, B., B.Comm. *Memorial*

Manager, Engineering Laboratories

Pike, D., B.Eng., M.Eng. *Memorial*

Professores Emeriti

Haddara, M.R., B.Sc. *Ain-Shams*, M.S., Ph.D. *Berkeley*, C.Eng., P.Eng.

Jordaan, I.J., B.Sc.(Eng.), M.Sc.(Eng.) *Witwatersrand*, Ph.D. *London*, FRSC, P.Eng.; University Research Professor, Awarded 1997

Peters, G.R., B.Sc. *Memorial*, B.A.Sc. *Toronto*, Ph.D., *Aberdeen*, P.Eng.

Sharp, J.J., B.Sc., A.R.C.S.T., M.Sc. *Glasgow*, Ph.D. *Strathclyde*, F.I.C.E., F.C.S.C.E., F.E.I.C., P.Eng., C.Eng.

Walsh, J., B.Eng.(Hons.) *TUNS*, Ph.D. *Calgary*, P.Eng.

Honorary Research Professors

Bass, D.W., B.Sc. *Hull*, Cert.Ed. *London*, M.Phil. *Birkbeck College*, Ph.D. *Warwick*

Bruce-Lockhart, M.P., S.B., S.M., *M.I.T.*, P.Eng.; Winner of the President's Award for Distinguished Teaching, 2006-2007

Friis, D.A., B.Sc. *Newcastle*, M.B.A. *Toronto*, Siv. Ing., P.Eng.

Molgaard, J., B.Sc. *Belfast*, Ph.D. *Leeds*, P.Eng.

Seshadri, R., B.E.(Hons.) *Jabalpur*, M.Tech. *I.I.T. Madras*, M.Sc., Ph.D. *Calgary*, FCSME, FEIC, FASME, P.Eng.

Swamidas, A.S.J., B.E.(Hons.), M.Sc.(Eng.) *Madras*, Ph.D., *I.I.T. Madras*, P.Eng.

Civil Engineering Discipline

Chair

Hussein, A., B.Sc.(Eng.) *Ain Shams University*, M.Eng., Ph.D. *Memorial*, P.Eng.; Associate Professor

Professor

Husain, T., B.Sc.Eng. (Hons.) *Aligarh*, M.Eng. *AIT Bangkok*, Ph.D. *British Columbia*, P.Eng.

Associate Professors

Adluri, S.M.R., B.Tech., *J.N.T. Univ.*, M.Tech. *I.I.T. Kanpur*, M.A.Sc., Ph.D. *Windsor*

Chen, B., B.Eng. *Jilin*, M.Sc. *Peking*, Ph.D. *Regina*, P.Eng.

Coles, C.A., B.Eng., M.Eng., Ph.D. *McGill*, P.Eng.

Hawladar, B.P., B.Sc. Eng. *BUET*, M.Eng. *AIT*, Ph.D. *Yokohama National*

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Faculty Description

The Faculty of Engineering and Applied Science offers a co-operative undergraduate program leading to the degree of Bachelor of Engineering, as well as graduate programs leading to the degrees of Master of Engineering, Master of Applied Science, Master of Engineering Management, and Doctor of Philosophy. Through teaching, research and outreach, the Faculty of Engineering plays a critical role in the economic development of the province, and graduates from the programs hold key positions in the major industrial developments in our province. A growing number of our recent graduates are leading emerging high-technology companies and hold important positions in national and international industries and governments, contributing to the University's global impact. Research in the Faculty of Engineering and Applied Science has a strong focus on research and development opportunities associated with the general technological needs of our society. The Faculty maintains a very strong sense of identity and cooperation among students, faculty, and staff, and prides itself on its strong linkages with industry and the engineering profession.

Additional information regarding the Faculty of Engineering and Applied Science is available at www.engr.mun.ca.

Students must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to the **UNIVERSITY REGULATIONS**.

2.1 Accreditation Status

Graduates of Memorial University of Newfoundland's engineering programs have been enjoying the benefits of full accreditation with the Canadian Engineering Accreditation Board (CEAB) since 1975. Accreditation for the Process Engineering major will be sought, in line with the normal procedures of the CEAB, in 2013.

2.2 Objectives of the Bachelor of Engineering Degree Program

The objectives of the undergraduate program are to provide students an excellent academic experience and to equip graduates with the ability to solve a broad range of problems in our rapidly changing technological, economic and social environment. To this end, the Faculty is committed to educate graduates who have:

1. a strong foundation and knowledge in engineering fundamentals with a capacity to know how, when and where to use the knowledge in specific ways;
2. an ability to identify, formulate, analyse and solve engineering problems and a capacity to integrate material from more than one subject and to apply appropriate engineering principles to arrive at correct and effective solutions;
3. a comprehensive knowledge in the fundamentals of engineering practice, including an ability to use analytical techniques, experimental and laboratory skills and modern engineering simulation and design software tools;
4. a broad knowledge of the principles and skills in engineering design, development and management in global, cultural and business contexts;
5. a multidisciplinary view with an ability to work effectively as members of teams, composed of individuals from different disciplines and different professional cultures;
6. strong oral and written communication skills with a capacity to produce effective technical documents and to use current communication techniques and tools;
7. a culture of life-long learning with a capacity to engage in continuous self-improvement, personal enrichment and professional development; and
8. a broad sense of social, ethical and professional responsibility with a capacity to demonstrate an understanding and appreciation of the human dimension of technology and its impact on mankind.

3 Description of Program

The Bachelor of Engineering Degree at Memorial University of Newfoundland is a Co-operative Program in which regular full-time academic study is supplemented by four month periods of full-time work in positions related to the student's future career. The Bachelor of Engineering degree program is available in the following six majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering.

Engineering One, the first-year of the engineering program, comprises courses in mathematics and basic science (physics and chemistry), as well as courses covering engineering fundamentals which are common to each of the majors. The engineering courses in Engineering One introduce students to engineering problem-solving, analysis, design, communication, and teamwork. Students will develop an understanding of the different engineering specialities, as well as the interdisciplinary nature of engineering practice.

The specialized major programs of Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering are offered in academic terms 3 through 8. Students in the Mechanical Engineering major may also choose to pursue an Offshore Oil and Gas Engineering option (OOG) in the last three terms of the program. For specific details on each major, refer to the appropriate **Program Regulations**.

Electives can be tailored to meet the needs of those who plan to go straight into industry and those who wish to join the increasing number of our graduates who are pursuing advanced degrees.

All courses of the Faculty are designated by the abbreviation ENGI.

3.1 Program of Study

1. Courses in the engineering program are normally taken in blocks as shown in the appropriate program table. Students must satisfy the criteria for promotion as described below under **Promotion Regulations** to remain in the Engineering program.
2. The Engineering Program consists of eight academic terms and four work terms. The first-year of the Engineering Program, known as Engineering One, forms a core that is common to all majors. All students must successfully complete the requirements of Engineering One prior to being promoted to Academic Term 3.
3. In 1000 level Engineering courses, registration priority is given to students who have been admitted to Engineering One. Other students will be admitted to these courses only with the approval of the Associate Dean (Undergraduate Studies).
4. In these program regulations, including the program tables, wherever reference is made to English 1080 or Chemistry 1050, these courses may be replaced by courses deemed equivalent by the relevant academic unit.
5. Upon entering Academic Term 3, students begin to specialize in their academic program, in one of the following six majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, or Process Engineering. All Engineering students who successfully complete the Engineering One requirements during their first year of Engineering will be guaranteed a place in Academic Term 3, although not necessarily in the preferred major as indicated under **Promotion Regulations, Promotion Status (Engineering One)**.
6. Upon entering Academic Term 6, students in the Mechanical Engineering major may choose to pursue the Offshore Oil and Gas Engineering option (OOG).
7. Engineering courses in Academic Term 3 and beyond (i.e., those with numbers 3000 and greater) are restricted to students who have been admitted or promoted to the appropriate academic term and major (e.g., Academic Term 3 for 3000 level courses, restricted by major). Other students will be admitted to these courses only with the approval of the Associate Dean (Undergraduate Studies) in consultation with the appropriate Discipline Chair.

Some of the courses offered in academic terms 3 to 8 are taken by all Engineering students, others are offered for more than one major, but most technical courses in academic terms 3 to 8 are specific to the individual majors. Students should refer to the program descriptions for the detailed course requirements in each phase of their program.

8. Technical elective courses may be offered in terms other than those indicated in the program tables.
9. A student who has previously met a technical elective requirement in a given semester or wishes to defer it, may request an exemption or deferral by applying to the Associate Dean (Undergraduate Studies), who will consult the appropriate Discipline Chair. A minimum grade of 60% is required for credit to be given towards a student's engineering program for any technical elective taken outside the normal blocks as shown in the tables.
10. Students registered in Academic Term 7 of any Engineering major are eligible to apply for admission to a **Master of Engineering** fast-track option (M.Eng.). The purpose of the option is to encourage students interested in pursuing graduate studies to begin their graduate program while still registered as an undergraduate student. While enrolled in the option, a student may complete some of the M.Eng. Degree requirements and potentially be able to graduate earlier from the M.Eng. Program. For further details and the

regulations regarding the option, refer to the **School of Graduate Studies, Regulations Governing the Degree of Master of Engineering.**

3.2 Complementary Studies

1. The Complementary Studies component has been developed to make students aware of the function and responsibilities of the Professional Engineer in society and the impact that engineering in all its forms has on environmental, economic, social and cultural aspects of our society. This complements the technical expertise and communications skills developed and practised in all components of the program.
2. The Complementary Studies component is the same for all programs and consists of a minimum of 21 credit hours as follows:
 - English 1080 or English 1020
 - Engineering 3101
 - Engineering 4102
 - One 3 credit hour course that deals with the effect of technology on society and the environment. The course is to be chosen from Engineering 6101, Sociology 2120, Philosophy 2571 or the former Philosophy 2801, Sociology 4107
 - Engineering 7102
 - One Elective course of a 3 credit hour value chosen from the arts, humanities, social sciences and management and approved by the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science. List A is an approved list of courses maintained by the Office of the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science and is available at the web site www.engr.mun.ca.
 - One Elective course of a 3 credit hour value chosen from the humanities and social sciences and approved by the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science. This course must be second-year or higher and it is intended to provide experience with the central issues, methodologies and thought processes of the humanities and social sciences. List B is an approved list of courses maintained by the Office of the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science and is available at the web site www.engr.mun.ca.
3. In order to graduate, the student must obtain an overall average of at least 60% in the 21 credit hours in Complementary Studies courses required in the program.

3.3 Bachelor of Engineering Majors

The Bachelor of Engineering degree program is available in the following six majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering.

3.3.1 Civil Engineering

Civil Engineering deals with the planning, design, and construction of roads, railways, harbours, docks, tunnels, bridges, buildings, water supplies, hydroelectric power development, and sewage collection, treatment, and disposal systems.

The Civil Engineering major provides a broad introduction to the scientific principles and engineering techniques necessary for an understanding of the fundamental problems tackled by civil engineers.

3.3.2 Computer Engineering

Computer Engineering is the design and analysis of computer systems applied to the solution of practical problems. It encompasses both hardware and software design in applications ranging from telecommunications and information systems to process control and avionics. Computer Engineering students learn the mathematics of discrete and continuous systems, the design of digital machines such as processors and memories, the fundamentals of software design, and the principles used in communications systems such as telephone networks and the Internet.

Computer Engineering shares many fundamentals with Electrical Engineering, which are covered in a common curriculum up to and including Academic Term 3. In recognition of the considerable diversity of careers available to computer engineers, students are given latitude in the final three academic terms to choose from a wide range of electives in various specialty areas.

3.3.3 Electrical Engineering

Electrical Engineering is a broad field encompassing the study of control systems, electromagnetics and antennas, power systems, electronics, communications, and computer hardware and software.

Electrical Engineering shares many fundamentals with Computer Engineering, which are covered in a common curriculum up to and including Academic Term 3. In recognition of the considerable diversity of careers available to electrical engineers, students are given latitude in the final three academic terms to choose from a wide range of electives in various specialty areas. Making use of their elective course choices, students in the Electrical Engineering major also have the opportunity to undertake a minor in Physics.

3.3.4 Mechanical Engineering

Mechanical engineering is a highly diversified discipline encompassing the design, analysis, testing and manufacture of products that are used in every facet of modern society. Mechanical engineers analyse and design using the principles of motion, energy, and force to ensure that the product functions safely, efficiently, reliably, and can be manufactured at a competitive cost. This activity requires a thorough knowledge of materials, mathematics, and the physical sciences, and an ability to apply this knowledge to the synthesis of economical and socially acceptable solutions to engineering problems.

Mechanical Engineering is designed to provide students with a knowledge in the following four areas: design and dynamics area, emphasizing solid mechanics, material science, dynamics, vibrations and machine component design; thermo-fluids area, focussing on thermodynamics, heat transfer and fluid mechanics; mechatronics area, dealing with electro-mechanical systems, control, robotics, and automation; and manufacturing/industrial area, which encompasses CAD/CAM, production and operation management. In Academic Term 6, students may select the Offshore Oil and Gas option (OOG). Students may choose from a wide range of electives in various specialty areas in academic terms 7 and 8.

3.3.5 Ocean and Naval Architectural Engineering

Ocean and Naval Architectural Engineering covers aspects of both naval architecture and ocean engineering. The Ocean and Naval Architectural Engineering major is the only accredited undergraduate program specifically in naval architecture/ocean engineering in Canada. The major is designed to provide education to work in marine transport, ship and boat building, offshore engineering,

submersibles design and many related marine areas. The undergraduate program is also a comprehensive preparation for graduate studies, research and consulting in ocean engineering.

Naval Architecture is primarily concerned with the design and construction of ships, offshore structures and other floating equipment and facilities. Ocean Engineering extends this focus to cover virtually all aspects of engineering related to the world's oceans. Topics including sub-sea systems and oceanographic science add core ocean engineering content to the program. Students will be able to further develop their particular interests by using the focus stream to study any of a wide variety of topics, reflecting the tremendous diversity of the field.

A student's selection of courses for the focus stream requires the prior approval of the discipline chair of Ocean and Naval Architectural Engineering. In order to graduate, the student must obtain an overall average of at least 60% in the 12 credit hours in focus stream courses required in the program.

3.3.6 Process Engineering

Process Engineering is a diversified discipline encompassing new development, design, optimization, and operation of sustainable processes for human needs. A process engineer uses biological, chemical, and physical processing of substances to modify their nature, their properties, and/or the composition of mixtures to produce useful products. This activity requires a thorough knowledge of materials, chemical and physical sciences, and mathematics and an ability to apply this knowledge in an economical and sustainable way to engineering development.

The process engineering major is designed to provide students with a specialization in the areas of minerals and metals processing, and downstream oil and gas processing. Throughout the major and within each area of specialization, emphasis is placed on green and clean processes which are environmentally benign and inherently safe. The goal of this major is to prepare graduates with knowledge and ability to implement this knowledge in a sustainable manner to larger-scale industrial development.

3.4 Work Terms

Engineering work term registration, grading, and tuition fee charges and payments are governed by the **UNIVERSITY REGULATIONS** in this Calendar and those outlined below. Engineering work term placement and opt-outs, conduct, and evaluation are governed by the *Engineering Student Co-op Handbook* which is available at www.mun.ca/coop/home/enghandbook.pdf.

Students must complete successfully a minimum of four work terms in order to graduate with a Bachelor of Engineering degree. The Bachelor of Engineering degree offers the opportunity to complete up to five work terms beyond academic term 3. Students are expected to complete as many of these work terms as possible. Students who expect to complete the Engineering One requirements by the end of the Winter semester may apply to the Committee on Undergraduate Studies to undertake a work term during the Spring semester of Engineering One. Academic performance is the basis for approving such requests.

All students in academic terms 3 to 7 and any student approved to complete a work term during the Spring semester of Engineering One will be registered automatically during the regular registration period for the next scheduled work term unless the student has opted-out. Students may opt out of up to two work terms beyond Academic Term 3 by completing the procedures outlined in the *Engineering Student Co-op Handbook*. Opt outs normally are approved only in cases where students have successfully completed a minimum of four work terms.

3.4.1 General Information

- During work terms students are brought into direct contact with the engineering profession, exposed to the work place setting, expected to assume ever-increasing responsibility in employment situations as their education advances, and introduced to experiences beyond the scope of those which could be provided in the classroom.
- Students are responsible for finding suitable work placements. The Division of Co-operative Education provides resources to assist in this process.
- Students who cannot meet the demands of the work term may be required by the Faculty to withdraw from the work term until they can demonstrate an ability to continue in the program.
- Following the date of automatic registration for a work term, only students who are registered for that work term will be approved to join the job placement process and be approved to begin a work placement
- Students are not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies, on the recommendation of the Division of Co-operative Education. Students who drop a work term without permission, or who fail to honour an agreement to work with an employer, will be assigned a grade of FAL (fail) for that work term.
- Students who conduct themselves in such a manner as to cause their termination from the job, will be assigned a grade of FAL (fail) for that work term.

3.4.2 Evaluation of Work Terms

Two components are considered in work term evaluation: work performance and a communications component, as described in the *Co-operative Student Handbook* which is available at www.mun.ca/coop/home/enghandbook.pdf.

Each component is evaluated separately and equally weighted resulting in one of the following classifications: Outstanding, Above Expectations, Satisfactory, Marginal Pass, Fail. Both evaluations will be recorded on the transcript. Overall evaluation of the work term will result in the assignment of one of the following final grades:

- Pass with distinction (PWD): To receive a PWD, a student must obtain an evaluation of Outstanding in both the communications and work performance components of the work term.
- Pass (PAS): To receive a PAS, a student must achieve an evaluation of Marginal Pass or better in the communications component and in the performance component of the work term.
- Fail (FAL): A student receiving a Fail in either the communications or performance component of the work term will receive a FAL. For promotion from the work term, a student must obtain PWD or PAS.

3.5 Continuing Engineering Education

The Faculty of Engineering and Applied Science has a firm commitment to continuing engineering education and offers a variety of seminars and short courses in St. John's and in other centres for practising engineers. For applicability of courses towards diplomas and certificates in Engineering, contact the Continuing Engineering Education office by telephone to (709) 864-7467, in-person at EN 3017, or through the website at www.engr.mun.ca/continuing/index.php.

4 Admission/Readmission Regulations for the Faculty of Engineering and Applied Science

In addition to meeting **UNIVERSITY REGULATIONS**, students must meet the admission/readmission regulations for the Faculty of Engineering and Applied Science.

4.1 General Information

1. Entry to Engineering One and to the majors offered by the Faculty is competitive for a limited number of placements. Meeting the minimum admission requirements does not guarantee acceptance into the Engineering program. The final decision on admission or readmission to Engineering One or any engineering major rests with the Admissions Committee of the Faculty.
2. Admission or readmission to the University does not necessarily constitute admission or readmission to Engineering One or to any major.
3. The primary criterion used in reaching decisions on applications for admission or readmission is the Admission Committee's judgement of the likelihood of an applicant succeeding in the program.

4.2 Application Forms and Deadlines

1. The program of the Faculty commences in the Fall semester. The deadline for application for admission is March 1. Students are encouraged to submit their applications as early as possible since the Faculty may begin to offer provisional admissions as early as February to students applying to begin their program in September.
2. The deadline for application for readmission, for students who were previously admitted to a Faculty program, is June 1 for the Fall semester, October 1 for Winter, and February 1 for Spring.
3. Applications received after the relevant deadline may be considered as time and space permit. Incomplete applications will not be considered.
4. Application forms are available in person from the Faculty's General Office and the Office of the Registrar or through the Faculty's website at www.engr.mun.ca. Application forms may also be obtained by writing to the Faculty of Engineering and Applied Science, Memorial University of Newfoundland, St. John's, NL, A1B 3X5, or to the Office of the Registrar, Admissions Office, Memorial University of Newfoundland, St. John's, NL, A1C 5S7.
5. All applications for admission or readmission must be submitted to the Office of the Registrar. A complete application package includes an application to the University (for those who have not attended Memorial University of Newfoundland in the two preceding semesters), an application to the Faculty and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

4.3 Admission Requirements to the Faculty Program

Applicants may apply for admission to the University in a category as defined in the Calendar section under **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate), Categories of Applicants, Admission Criteria and Other Information**. In addition to meeting these regulations, applicants to the faculty program in the following categories must meet the requirements as indicated below.

4.3.1 High School Applicants

- The Faculty of Engineering and Applied Science encourages applications from high school students who have an interest in pursuing an engineering degree and who have achieved a good academic performance during high school.
- High school applicants admitted to the program who are admissible to the required Engineering One courses Mathematics 1000, Physics 1050, and Chemistry 1050 are expected to be able to complete the Engineering One requirements during their first two semesters at Memorial University of Newfoundland.
- High school applicants who are not admissible to these courses, but who are interested in pursuing an engineering degree, are encouraged to apply to the Faculty and to discuss an appropriate first-year program with the Associate Dean (Undergraduate Studies).

4.3.2 Memorial University of Newfoundland Applicants

- To be eligible for consideration for admission to Engineering One, students who are attending or have previously attended this University must have a cumulative average of at least 60% or an average of at least 65% on their most recent 30 attempted credit hours and be admissible to (or have previously completed) the Engineering One courses Mathematics 1000, Physics 1050 and Chemistry 1050.
- To be eligible for consideration for admission to Academic Term 3, students who are attending or have previously attended this University must meet the requirements stated in the **Promotion Regulations, Promotion Status (Engineering One)**.

4.3.3 Transfer Applicants

- Applicants seeking admission through transfer from accredited post-secondary institutions must have achieved a minimum overall average of 60% to be considered for admission.
- A student's placement within a program, and requirements needed to complete the program, will be determined on an individual basis at the time of admission. Transfer applicants must complete a majority of the credit hours in their program at Memorial University of Newfoundland.

4.4 Other Information

1. The Faculty will notify applicants in writing regarding an admission decision to the Faculty program.
2. Students admitted to the program in any term, without receiving credit for all courses required up to that level, must successfully complete those courses prior to graduation.
3. Students who have been admitted to one major offered by the Faculty and who wish to change to another major within the Faculty must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the appropriate deadline date as outlined above in **Application Forms and Deadlines** and will be considered in competition with all other applications.

4. Students admitted full-time to the program and who decline the offer of admission or who fail to register for the appropriate courses during the term of admission will be considered withdrawn from the program. Such students, if they subsequently wish to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the appropriate deadline date in **Application Forms and Deadlines** above and will be considered in competition with other applications.

5 Program Regulations

5.1 Civil Engineering Program Regulations

5.1.1 Civil Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Civil Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 1 Civil Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 1 Civil Engineering Major**.

Table 1 Civil Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 English 1080 ENGI 1010 ENGI 1020 ENGI 1030 ENGI 1040 Mathematics 1000 Mathematics 1001 Mathematics 2050 Physics 1050 Physics 1051	Students who are expecting to complete the Engineering One requirements during the first two semesters may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W must be completed during the Winter semester.
Fall Academic Term 3	ENGI 3101 ENGI 3425 ENGI 3610 ENGI 3703 ENGI 3731 ENGI 3934	ENGI 200W (if not completed during Engineering One).
Winter	001W or 002W

Fall	004W or 005W (optional) or 006W (optional)	
Winter Academic Term 8	ENGI 8854 ENGI 8894	Complementary Studies Elective One free elective which must be a 5000-level or higher Engineering course, or a 2000-level or higher course either from the Faculty of Arts or the Faculty of Science, or a 3000-level or higher course from the Faculty of Business Administration. Selection of a course must be approved by the Discipline Chair. 6 credit hours from: ENGI 7680, 8821, 8826, 8863, 8868, 8879, 8801-8805, or other courses as specified by the Discipline Chair

5.3 Electrical Engineering Program Regulations

5.3.1 Electrical Engineering

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Electrical Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 3 Electrical Engineering Major**.
- Work terms shall be taken in the order as set out in **Table 3 Electrical Engineering Major**.
- The requirements for a minor in Physics in the Electrical Engineering program are detailed under **Faculty of Science, Minor In Physics**. Students wishing to undertake a minor in Physics must obtain approval from the Discipline Chair for their course selection.

Fall	004W or 005W (optional) or 006W (optional)	
Winter Academic Term 8	ENGI 8000 Physics 4300	Complementary Studies Elective Two of ENGI 8003, 8054, 8058, 8074, or other courses as specified by the Discipline Chair Focus Stream Elective *

***Focus Stream Electives:**

The courses in the Focus Stream allow a student to pursue a specialization in an area of interest. The area can be in engineering, the sciences, the arts and humanities or business. Students will plan their own focus stream, with approval by the Committee on Undergraduate Studies upon the recommendation of the Discipline Chair of Ocean and Naval Architectural Engineering.

In reviewing the plan for the stream, the Faculty will be looking for clear educational goals by each student, with increasingly advanced courses in the topic area. The stream is not meant to be a series of random free electives, and especially not a series of introductory courses. The stream will enable students to complete a significant part of a minor in almost any subject. Students are encouraged to take the required additional courses to complete such a minor. Interdisciplinary experience and education is increasingly valuable and this focus stream opportunity will provide our graduates with unique and special knowledge.

5.6 Process Engineering Program Regulations

5.6.1 Process Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Process Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 7 Process Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 7 Process Engineering Major**.

Table 7 Process Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 English 1080 ENGI 1010 ENGI 1020 ENGI 1030 ENGI 1040 Mathematics 1000 Mathematics 1001 Mathematics 2050 Physics 1050 Physics 1051	Students who are expecting to complete the Engineering One requirements during the first two semesters may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W must be completed during the Winter semester.

Fall	004W or 005W (optional) or 006W (optional)	
Winter Academic Term 8	ENGI 8640 ENGI 8671 ENGI 8677	Complementary Studies Elective One free elective which must be a 5000-level or higher Engineering course, or a 2000-level or higher course either from the Faculty of Arts or the Faculty of Science, or a 3000-level or higher course from the Faculty of Business Administration. Selection of a course must be approved by the Discipline Chair. 3 credit hours from: ENGI 8911, 8670, 8676, 8696. other courses as specified by the Discipline Chair.

5.7 Advanced Standing

Students are occasionally admitted to later terms in Engineering from other institutions. Such entry is normally based on a detailed analysis of the student's record and is handled on a case-by-case basis. Such students should contact the Office of the Associate Dean (Undergraduate Studies).

6 Promotion Regulations

6.1 General Information

1. In addition to meeting the promotion regulations for the Faculty of Engineering and Applied Science, all students must meet the general academic regulations (undergraduate). For further information refer to the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.
2. Success in the programs depends on meeting the requirements of both academic terms and work terms.

6.2 Promotion Status (Engineering One)

1. The requirements for promotion to Academic Term 3 are:
 - a. an overall average of at least 65% on the following nine courses: Mathematics 1001, Mathematics 2050, Physics 1051, Chemistry 1050, English 1080 (or equivalent), ENGI 1010, ENGI 1020, ENGI 1030 and ENGI 1040; and
 - b. a grade of at least 55% in each of the above nine courses.
2. In order to remain in the Engineering program, students admitted to Engineering One must complete the requirements for promotion to Academic Term 3 before the end of the academic year of admission.
3. Students who fail to meet the requirements for promotion to Academic Term 3 before the end of the academic year of admission will be deemed to have withdrawn from the Engineering program.
4. Promotion from Engineering One guarantees admission to one of the six majors, but not necessarily to a student's preferred major. The Faculty reserves the right to limit the number of spaces available in each major. The Faculty also reserves the right to guarantee admission into a particular major at the time of admission into the Engineering program.
5. Students completing the requirements of Engineering One are required to apply for their major by March 1 of the academic year of admission, indicating their preferences for major in rank order. All Engineering students who successfully complete Engineering One in the academic year of admission will be guaranteed a place in Academic Term 3, although not necessarily in the preferred major.

6.3 Promotion Status (Beyond Engineering One)

A student's eligibility for promotion from semesters beyond Engineering One will be determined at the end of each term. Promotion from each academic semester will be based upon the student's Promotion Average for the semester. The Promotion Average, which will appear on the transcript, is calculated to be the overall average of courses completed in the semester excluding complementary studies, focus stream electives and free elective courses. Promotion from work terms will be determined based upon the grade awarded in that work term.

A student's promotion status will be determined beyond Engineering One and at the end of each term in one of the following three categories:

6.3.1 Clear Promotion

Clear Promotion means that a student can proceed to the next term without restrictions.

1. A student completing or repeating an academic term will receive a Clear Promotion by obtaining a promotion average of at least 60% and a numeric grade of at least 50% in each of the courses included in the calculation of the promotion average in that academic term.
2. A student completing a work term will receive a Clear Promotion by obtaining an overall grade of PAS or PWD in that work term.

6.3.2 Probationary Promotion

A student who is not eligible for Clear Promotion from an academic semester but who achieves a promotion average of at least 60% in that term will be granted Probationary Promotion.

1. A student's Probationary Promotion status will be reflected on the University Transcript under the Promotion Average for the semester.
2. A student with Probationary Promotion from an academic term may continue to the subsequent work term under the condition that entry into the next academic term is not allowed until the student's status is changed to Clear Promotion.
3. A student with Probationary Promotion at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.
4. To change Probationary Promotion to Clear Promotion for a semester the student must satisfy the Faculty that he or she is competent in the subject of the ENGI course(s) in which the student has failed to achieve 50%. This will normally entail re-examination(s), after which the student will be declared to have passed or failed a test of competency in the subject(s) concerned. No numerical grade will be assigned in the re-examination(s). Upon passing a re-examination, the original grade submitted for the course will be changed to PAS, but the promotion average will not change.
5. Re-examination will be at a time determined by the Faculty.
6. A student with Probationary Promotion who does not complete the re-examination(s) or who fails in the re-examination(s) must repeat the corresponding failed course(s) successfully in order to change the Probationary Promotion to Clear Promotion.

6.3.3 Promotion Denied

Promotion Denied status is awarded when a student does not meet the requirements for Clear Promotion or Probationary Promotion.

The student's Promotion Denied status will be reflected on the University Transcript under the Promotion Average for the semester.

1. A student with Promotion Denied status will be required to withdraw from the Faculty.
2. A student with Promotion Denied status may apply for readmission to the program after two semesters. Subject to space being available, a student will be readmitted into the term from which promotion was denied. An academic term may be repeated only

once, and not more than two academic terms may be repeated in the entire program.

3. A student who is denied promotion for failing a work term may be considered for readmission. A student readmitted under this clause must successfully complete four work terms prior to graduation.
4. A student who has been denied promotion as a result of having failed a work term and who, in the opinion of the Faculty, can benefit from a remedial program, may be permitted an extension of time, not to exceed the end of the registration period of the subsequent semester, to complete the requirements of the work term.
5. A student who is denied promotion from an academic term will be required to repeat all required courses in which the student obtained a numeric grade of less than 60% in that term. A technical elective course in which the student obtained a numeric grade of less than 60% may be replaced by a course acceptable in the student's program.
6. A student with Promotion Denied status at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.

6.4 Other Information

1. The appropriate discipline will make a recommendation to Faculty Council on each student's promotion status at the end of each of academic terms 3 to 8.
2. To be recommended for graduation, a student must have clear promotion from Academic Term 8, must have successfully completed at least four work terms and must have an average of at least 60% in the 21 credit hours in complementary studies as described in **Description of Program, Complementary Studies**.
3. The Office of Co-operative Education will make a recommendation to Faculty Council on each student's promotion status at the end of each work term.
4. A student must have completed at least one work term successfully, in order to be promoted to Academic Term 5.
5. A student must have completed at least two work terms successfully, in order to be promoted to Academic Term 6.
6. A student must have completed at least three work terms successfully, in order to be promoted to Academic Term 7.
7. A student must have completed four work terms successfully, in order to be promoted to Academic Term 8.
8. A student denied promotion shall be permitted only one readmission to the same term and a total of no more than two readmissions to the Faculty.
9. No course required in any of academic terms 3 to 8 of the program may be attempted more than twice.
10. Students may be required to withdraw from their program at any time, if, in the opinion of the Faculty, they are unlikely to benefit from continued attendance.

7 Waiver of Faculty Regulations

Every student has the right to request a waiver of Faculty regulations. Students seeking a waiver of University academic regulations should refer to the **UNIVERSITY REGULATIONS - General Academic Regulations Undergraduate - Waiver of Regulations**.

1. The Faculty Council reserves the right in special circumstances to modify, alter, or waive any Faculty regulation in its application to individual students, where merit and equity so warrant in the judgment of the appropriate Committee of the Faculty Council.
2. All requests must be submitted to the Office of the Associate Dean (Undergraduate Studies) for submission to the appropriate Committee of the Faculty. Students must submit their request in writing. Medical and/or other documentation to substantiate the request must be provided.
3. Requests for waivers of admission requirements will be submitted to the Admissions Committee who will make a recommendation for action to the Committee on Undergraduate Studies of the Faculty.
4. Requests for a waiver of a course(s) required in academic terms 3 to 8 should be made prior to the commencement of the academic term and will be considered by the Committee on Undergraduate Studies, upon recommendation of the appropriate Discipline Chair.
5. Requests for a waiver of a work term will be considered by the Committee on Undergraduate Studies upon recommendation of the Office of Co-operative Education. Any waiver granted does not reduce the total number of work terms required for the degree below an absolute minimum of three.

8 Appeal of Regulations

8.1 Faculty Appeal Committee

Appeals against decisions of the Faculty Admissions Committee and appeals against promotion decisions of Faculty Council will be considered by the Faculty Appeal Committee.

1. An appeal against promotion decisions of Faculty Council will normally only be considered upon presentation of evidence which has not been placed before Faculty Council.
2. Any such appeal must be made within one month of the issue of the decision of the Admission Committee or within one month of the issue of results by the Registrar, as the case may be.
3. When a student has requested a re-read of an examination paper which may affect an appeal that appeal must nevertheless be made within one month of the issue of the original results, and consideration of the appeal will be delayed until the result of the re-read is available.

8.2 Other Appeals

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Regulations**.

9 Course Descriptions

All courses of the Faculty are designated by ENGI.

9.1 Work Terms and Non-Credit Courses

001W Engineering Work Term 1 represents, for most students, their first experience in an engineering or related work environment. Students are expected to learn, develop and practise the basic standards of behaviour, discipline and performance normally found in a professional work environment. Students are also expected to learn the basics of technical writing and to become familiar with the various communications tools used in a technical work environment.

Two documents must be submitted for evaluation for the communications component for Work Term 1. Additional communication requirements such as technical reports or manuals may be requested by the employer. The two documents to be submitted to the Engineering Co-operative Education Office are the Personal Job Diary and the Work Term Journal or Short Technical Report or Portfolio. Detailed guidelines for the preparation of these documents are provided in the *Co-operative Student Handbook*. These documents shall be submitted or postmarked no later than the last official day of the work term as shown in the University Calendar.

CH: 0
LC: 0
PR: ENGI 200W

002W Engineering Work Term 2 requires students to have sufficient academic grounding and work experience to contribute in a positive manner to the engineering design and problem solving processes practised in the work environment. Students are expected to show greater independence and responsibility in their assigned work functions than in Work Term 1. An ability to deal, under supervision, with complex work-related concepts and problems should also be demonstrated. Students can become better acquainted with their chosen discipline, and can observe and appreciate the attitudes, responsibilities, and ethics normally expected of engineers.

The communications component for Work Term 2 consists of a formal, descriptive technical report describing a technical process, project, procedure or investigation chosen from the student's work environment. Students are also expected to keep a job diary, which will not be submitted but must be available for review during monitoring.

Guidelines for the preparation of a descriptive technical report are provided in the *Co-operative Student Handbook*. The report shall be submitted or postmarked no later than the last official day of the work term as shown in the University Calendar.

CH: 0
LC: 0
PR: ENGI 001W, ENGI 3101

003W Engineering Work Term 3 requires greater participation in the student's selected engineering discipline. Students become more experienced and proficient with the appropriate design procedures than in the preceding work terms. Students are expected to acquire improved speed and accuracy in their work and at the same time accept greater responsibility and be able to function with less direct supervision. Self-confidence and initiative as well as improved analytical skills are expected to develop at this stage in the student's engineering education.

The communications component for Work Term 3 consists of a formal technical report on a topic related to a specific theme prescribed by the Faculty and the Co-operative Education Office. Examples of themes would be sustainable development and environmental stewardship. Ideally the report would relate to the student's work in the areas of process, project, procedure or investigation.

Guidelines for the preparation of a descriptive technical report are provided in the *Co-operative Student Handbook*. The report shall be submitted or postmarked no later than the last official day of the work term as shown in the University Calendar.

CH: 0
LC: 0
PR: ENGI 002W

004W Engineering Work Term 4 requires students to engage in various facets of engineering, such as design, analysis, project management, specifications, plans, formal proposals, tender documents, etc. Participation in their selected engineering discipline is expected. Students should continue to gain an appreciation of the use and importance of acquired analytical skills in engineering analysis as well as the application of specifications and codes. Students should have a level of responsibility commensurate with their academic background and experience.

The communications component for Work Term 4 consists of an oral presentation on a technical subject taken from the student's work environment and preferably related specifically to the student's work. The presentation should be of 10 minutes duration and will be given on campus in a formal setting after students have returned to class. A written summary is also required. Guidelines for the preparation of this oral presentation are provided in the *Co-operative Student Handbook*.

CH: 0
LC: 0
PR: ENGI 003W

005W Engineering Work Term 5 requires students to engage in various facets of engineering, such as design, analysis, project management, specifications, plans, formal proposals, tender documents, etc. Participation in their selected engineering discipline is expected. Students should continue to gain an appreciation of the use and importance of acquired analytical skills in engineering analysis as well as the application of specifications and codes. Students should have a level of responsibility commensurate with their academic background and experience. The promotion criteria for this work term will be determined by the Committee on Undergraduate Studies. Students in the new program can apply to enter Work Terms 5 and 6.

CH: 0
LC: 0
PR: ENGI 004W

006W Engineering Work Term 6 requires students to engage in various facets of engineering, such as design, analysis, project management, specifications, plans, formal proposals, tender documents, etc. Participation in their selected engineering discipline is expected. Students should continue to gain an appreciation of the use and importance of acquired analytical skills in engineering analysis as well as the application of specifications and codes. Students should have a level of responsibility commensurate with their academic background and experience. The promotion criteria for this work term will be determined by the Committee on Undergraduate Studies. Students in the new program can apply to enter Work Terms 5 and 6.

CH: 0
LC: 0
PR: ENGI 005W

200W Professional Development Seminars are offered during the Fall and Winter semesters prior to a student's first work term. These seminars introduce the co-operative education process and prepare the student for work terms. These seminars are graded PAS or FAL based on attendance, participation and assignments.

AR: attendance is required
CH: 0
LC: as scheduled

9.2 Engineering One Courses

1010 Engineering Statics is the first course in Engineering mechanics. Forces and moments are described with vector algebra, leading to a description of the equilibrium conditions for particles and solid bodies. The importance of free body diagrams is highlighted. This knowledge is then applied to the analysis of trusses, frames and machines. Additional topics include an examination of friction and the concepts of centre of force, centroids and second moments of area.

CO: Mathematics 1000
CR: the former ENGI 1313
OR: tutorial 1 hour per week
PR: Level III Physics or Physics 1020 or equivalent

1020 Introduction to Programming is an introduction to algorithmic problem solving techniques and computer programming, including basic program control structures (sequence, call, branch, loop) and data representations, functional decomposition, and design by contract. Exercises and examples are drawn from a variety of engineering disciplines and are implemented using a standard modern programming language.

CR: the former ENGI 2420
LH: at least four 2-hour sessions per semester
PR: eligibility to register for Mathematics 1000

1030 Engineering Graphics and Design provides two complementary competencies. Firstly, it provides an introduction to the fundamentals of graphic communication, including orthographic projections, three dimensional pictorials, sectioning and dimensioning. Both sketching and CAD are utilized. Secondly, the course introduces students to standard design methodologies. The graphics and design competencies are reinforced through lab and project exercises.

LH: 3
PR: eligibility to register for Mathematics 1000

1040 Mechanisms and Electric Circuits is offered in two serial modules, including laboratory and workshop practice, and a team project to expose students to the concept of system integration involving electrical and mechanical systems. The electrical module provides an introduction to dc circuits, with an analysis of dc circuits used in control, measurement and instrumentation systems. The mechanism module provides an introduction

to machine components such as belts, pulleys, gears, and simple linkages. The laboratory and workshop component introduces students to hands-on practice in basic laboratory instruments, tools and safety procedures. A team project involves the construction, assembly and testing of a simple mechanism.

LH: 3

PR: Level III Physics or Physics 1051 (which may be taken concurrently) and Mathematics 1000 (which may be taken concurrently).

9.3 Academic Term 3 Courses

3001 Ocean/Naval Design is an introductory course to design in naval architecture and ocean engineering. It introduces the design challenges in a marine setting. A series of modules will familiarize the students with the main design issues. The first module covers the basic economic question of why ships are built. This is followed by an examination of the materials of construction and the primary fabrication method – welding. The third module deals with manufacturing, including design for manufacturing and the workflow process itself. The final module examines methods of marine design and performance evaluation. This covers numerical and experimental simulation methods and design software. There are several relevant labs and a design project.

LH: at least six 3-hour laboratory sessions per semester

3054 Ocean Engineering Hydrostatics is an introductory course to naval architecture and marine engineering. It discusses the basic principles of the statics of rigid floating or submerged structures. These include: ships, offshore platforms and submersibles. Methods of analysis of the hydrostatics, stability and trim, damage stability and the statics of mooring systems are introduced. Applications are also discussed.

LH: at least nine 3-hour laboratory sessions per semester

PR: ENGI 1010

3101 The Engineering Workplace is a course that deals with issues associated with professional engineering practice. Topics will include workplace and professional ethics, public and workplace occupational health and safety including first-aid, equity, gender and diversity issues, and technical written, oral and visual communication.

AR: attendance is required

3424 Engineering Mathematics includes ordinary differential equations of first order and first degree; linear ordinary differential equations of higher order, methods of undetermined coefficients and variation of parameters; applications to electric circuits and mass-spring systems; Laplace transforms; partial differentiation; convergence of series; Taylor and binomial series; remainder term; and an introduction to Fourier series.

CH: 4

CR: the former ENGI 2422

LC: 4

OR: tutorial 1 hour per week

PR: Mathematics 1001, Mathematics 2050

3425 Mathematics for Civil Engineering I includes sequences & series, functions of a single parameter, conic sections, polar coordinates, partial differentiation, multiple integration, introduction to first order ordinary differential equations.

CH: 4

LC: 4

OR: tutorial 1 hour per week

PR: Mathematics 1001 and 2050

3600 Introduction to Process Engineering is an introductory course in process engineering, which comprises principles and the practical aspects of organic, inorganic and biochemical processes. It emphasizes the structure and properties of organic, inorganic, and bio-chemicals; process flow sheeting, process variable identification and production processes. The course uses extensive examples from industrial processes. In laboratory sessions students will use HYSYS and OLI software to study process characteristics.

CO: Chemistry 1051

LH: at least four 2-hour sessions per semester

3610 Earth Sciences for Civil Engineering is an introduction to basic concepts in Geology and Mining with emphasis on applications in Civil, Geological, Mining and Environmental Engineering through the use of case histories. It includes the study of rocks and minerals in selected field and laboratory exercises.

LH: 3

3703 Surveying and Geomatics includes plane surveying: distance, elevation, and angle measurements; horizontal and vertical curves; plane survey calculations; area and volume computations. Photogrammetry will be studied, including sensors and platforms, mathematics of photogrammetry; instruments and equipment, photogrammetric products, digital photogrammetry, remote sensing, and introduction to global positioning and geographical information systems (GIS). A surveying field school to introduce students to the use of surveying equipment and mapping will be held in the first two weeks of the term.

LH: 3

OR: 36-hour field school conducted during the first two weeks of the semester

3731 Materials for Construction includes structure of metals and nonmetals; deformation of metals; strengthening mechanisms in metals; concrete and cementitious materials; admixtures; iron and steel; brick masonry; concrete masonry; mortar grout and plaster; reinforced masonry structures; wood and wood products. Relevant experiments are conducted.

LH: at least ten 3-hour sessions per semester

OR: up to ten 1-hour tutorials per semester

3821 Circuit Analysis begins with a review of elementary circuits, then considers wye-delta transformation, bridge circuits; transient analysis of first- and second -order circuits; sinusoidal steady state analysis, phasor diagrams, maximum power transfer, frequency selective circuits (filters); and Laplace transforms in circuit analysis (transients, steady state, transfer function).

CO: ENGI 3424

CR: Physics 3550

LH: at least five 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: Mathematics 1001, Mathematics 2050, ENGI 1040

3861 Digital Logic includes number systems and Boolean algebra; minimization techniques for Boolean functions; basic combinational logic circuit analysis and design; flip-flops, state machine design and implementation; decoders, multiplexors, registers, counters; simple arithmetic and logic unit (ALU) algorithms; introduction to hardware description languages (VHDL) for logic component and circuit modelling.

CR: Computer Science 3723

LH: at least six 3-hour sessions per semester

OR: up to eight tutorial sessions per semester

PR: ENGI 1040

3891 Advanced Programming includes advanced procedural language programming; data structures, user defined types, pointers; modularization techniques, scope and data hiding; object-oriented programming; classes, objects and attributes; data encapsulation, member and non-member functions; overloading, methods and friend functions; inheritance, sub- and super-classes; templates.

LH: at least nine 2-hour sessions per semester

PR: ENGI 1020

3901 Thermodynamics I is a macroscopic approach to heat, work, and energy; properties of pure substances; conservation of mass, energy for open and closed systems; thermal efficiency and coefficient of performance; second law of thermodynamics; and its corollaries; entropy; second law analysis of thermodynamic systems; second law efficiency.

PR: Mathematics 1001

3911 Chemistry and Physics of Engineering Materials I is an introduction to the structure and properties of engineering materials, in particular materials, semiconductors, ceramics, glasses and polymers. Topics include a review of atomic bonding, discussion of basic crystalline and amorphous structures, point and line defects, and the role these structural features play in elastic and plastic deformations, yield, fracture, glass transition, thermal conductivity, thermal expansion, specific heat and electrical conductivity.

CR: the former ENGI 2205

LH: at least four 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: Chemistry 1050

3934 Dynamics includes kinematics and kinetics of particles using rectangular, normal/tangential and polar coordinates; relative motion using rotating axes; two-dimensional kinematics and kinetics of rigid bodies; force-acceleration, work-energy and impulse-momentum methods.

CR: the former ENGI 2313

OR: tutorial 1 hour per week

PR: ENGI 1010, Mathematics 1001, Mathematics 2050

3941 Production Technology includes an overview of production: production strategies; dimensioning and tolerancing; basic material removal process; forming and shaping process; casting; molding, extrusion and joining processes; computer aided machining; new technologies.

LH: at least eight 3-hour sessions per semester

9.4 Academic Term 4 Courses

4011 Resistance and Propulsion examines the phenomena resisting the motions of ships and some factors considered in the design of the marine screw propeller. The topics include the resistance due to friction, wave making, form appendage, wind and waves, squat, blockage, and shallow water effects, and also include the estimation of powering using methodical series and statistical methods. Topics considered in the design of the marine screw propeller include propeller theory, blade sections, blade strength, methodical series charts, efficiency elements, lifting line calculations, cavitation, and propellers in non-uniform flow.

CR: the former ENGI 5011

LH: 3
OR: tutorial 1 hour per week
PR: ENGI 3054

4020 Marine Fluid Dynamics includes fluid statics; fluid flow phenomena, in general and in marine applications; control volume analysis of fluid motion; conservation of mass, momentum and energy; differential approach to flow analysis; head losses; applications of conservation laws; external v.s. internal flow; dimensional analysis and scaling; fluid-structure interaction concepts; potential flow theory, lift and Kutta-Joukowski theorem; viscous flow, boundary layers and drag.

LH: at least one 3-hour session per semester
OR: tutorial 1 hour per week
PR: ENGI 3054

4102 Engineering Economics is an introduction to the concepts in the determination of the economic feasibility of engineering projects; time value of money – interest rates, depreciation, annual, present and future worth analysis; benefit-cost analysis, tangible and intangible benefits and costs; economic risk and sensitivity analysis, economic optimization.

4312 Mechanics of Solids I examines force analysis of structures and structural components, free body diagrams of structure, components and section of a components, definition of a stress at point, stress notation, complementary property of shear stress, definition of strain, normal strain, shear strain, thermal strain, mechanical properties of materials, analysis of prismatic members due to axial, bending and torsion loading, analysis of beams, shear force and bending moment diagrams, combined loads; and the transformation of stresses and strains.

LH: at least four 1-hour sessions per semester
OR: up to ten 1-hour tutorials per semester
PR: ENGI 1010

4421 Probability and Statistics includes probability, probability distributions, probability densities, sampling distribution, hypothesis testing, regression and correlation.

CR: the former ENGI 3423, STAT 2510
OR: tutorial 1 hour per week
PR: Mathematics 1001

4424 Discrete Mathematics for Computer Engineering is an introduction to discrete mathematics including a selection of topics such as propositional logic, introductory predicate logic, mathematical reasoning, induction, sets, relations, functions, integers, graphs, trees, and models of computation.

CR: the former ENGI 3422, Mathematics 2320, or the former Computer Science 2740
OR: tutorial 1 hour per week
PR: Mathematics 2050

4425 Mathematics for Civil Engineering II examines the analytical solutions of ordinary differential equations of the first and higher orders and numerical methods: errors, round off and stability, solution to nonlinear equations, curve fitting and interpolation methods, numerical differentiation and integration.

CH: 4
CR: the former ENGI 4422
LC: 4
OR: tutorial 1 hour per week
PR: ENGI 3425

4430 Advanced Calculus for Engineering includes parametric vector functions; polar curves; gradient, divergence and curl; multiple integration; vector calculus, theorems of Green, Stokes and Gauss; an introduction to partial differential equations; and application of advanced calculus to relevant engineering problems.

CR: the former ENGI 5432
OR: tutorial 1 hour per week
PR: ENGI 3424

4602 Process Engineering Thermodynamics extends the study started in ENGI 3901 of thermodynamics, with special reference to chemical process applications: basic laws, thermodynamic properties of pure fluids and mixtures, heat engines, multicomponent systems, thermal/mechanical equilibrium, chemical equilibrium, and thermodynamics of chemical processes. Special emphasis is placed on the application of thermodynamics to practical problems in chemical engineering such as phase equilibria, solutions and reaction equilibria in separations and reaction engineering.

CR: CHEM 2300, the former CHEM 3300
PR: ENGI 3901

4621 Process Mathematical Methods introduces numerical methods in chemical engineering processes; sets of linear algebraic equations; simultaneous non-linear equations; polynomial functions; numerical integration; numerical differentiation; higher order ordinary differential equations, stiff equations, Runge-Kutta methods, boundary value problems, applications of eigenvalue problems (numerical solutions). It provides applications of the methods to different aspects of process engineering such as reactor design, separation, process modeling, equipment design and analysis.

CO: ENGI 4625
PR: ENGI 3424

4625 Process Engineering Calculations is an introduction to the analysis of chemical processes with an emphasis on mass and energy balances. Stoichiometric relationships, ideal and real gas behaviour are also covered. The course will help process engineering majors in their second year to develop a framework for the analysis of flow sheet problems and will present systematic approaches for manual and computer-aided solution of full scale balance problems.

CO: ENGI 4602
PR: ENGI 3901

4717 Applied Environmental Science and Engineering examines the nature and scope of environmental problems; concept of sustainable development; natural environmental hazards; introduction to ecology, microbiology and epidemiology; basic concepts of environmental quality parameters and standards; solid and hazardous wastes; atmospheric, noise, and water pollution, their measurements, and control.

LH: at least ten 3-hour sessions per semester
PR: Completion of Term 3 of the Civil Engineering program

4723 Geotechnical Engineering I begins with an introduction to soil as a three-phase material and examines physical and mechanical properties; structure; classification of soils; soil compaction; hydraulic properties; permeability; flow of water in soil; flownets; effective stress concept in soils; stresses in soils beneath loaded areas; and one-dimensional consolidation theory.

LH: 3
OR: tutorial 1 hour per week
PR: completion of Term 3 of the Civil Engineering program

4823 Introduction to Systems and Signals begins with an introduction to systems and signals, and includes mechanical and electrical analogues; principles of linear superposition and time-invariance; definitions, properties, and use of the delta function; applications of complex variables and functions; impulse and step responses; input-output relations of continuous-time systems in terms of convolution and transfer functions; frequency response plots; the Fourier transform and applications; applications of Laplace transforms to filtering, communications, and controls.

OR: tutorial 1 hour per week
PR: ENGI 3424, ENGI 3821

4841 Electromechanical Devices includes an introduction to fundamental principles of energy conversion; review of three-phase systems; magnetic fields and circuits; transformer models, performance and applications; basic concepts of rotating machines; performance and control of dc machines.

CR: the former ENGI 5842
LH: at least six 3-hour sessions per semester
OR: up to ten tutorials per semester
PR: ENGI 3424, ENGI 3821

4854 Electronic Circuits I provides an introduction to semiconductor electronic devices and circuits. Topics covered include internal structure of electronic devices; working principles, dc and small-signal models and analysis of p-n junction diodes, bipolar junction transistors and field effect transistors; introduction to digital electronics; differential and multistage amplifier circuits; internal circuits of operational amplifiers; output stages; practical applications of the devices to the design of power supplies, amplifiers and switching circuits. CAD tools are used to illustrate the analysis and design of electronic circuits.

LH: at least ten 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 3821, Physics 3000

4862 Microprocessors is a course on microprocessor architecture; assembly language programming; addressing modes, table look up; memory mapped devices; interfacing techniques: parallel, serial; timing control; analog input and output, and computer displays.

LH: at least eight 3-hour sessions per semester
PR: ENGI 3861

4892 Data Structures examines fundamental data structures; recursive structures and programming techniques; modularity and reusability; time complexity and efficient data structures; procedural abstraction; data abstraction and precise documentation of data structures.

CO: ENGI 4424
PR: ENGI 3891

4901 Thermodynamics II examines thermodynamic cycles: power and refrigeration applications; human comfort and air conditioning; mixture of gases and vapours, humidity, psychrometrics; chemically reacting mixtures and combustion.

LH: at least two 2-hour sessions per semester
PR: ENGI 3901

4932 Mechanisms and Machines includes an overview of mechanisms within machines; graphical and analytical methods for position, velocity, and acceleration analysis of moving mechanisms; kinematics and kinetics of planar mechanisms; static and dynamic loads on mechanisms and an

introduction to mechanism synthesis. There is an analysis project.

CR: the former ENGI 3933
OR: tutorial 1 hour per week
PR: ENGI 3934

4951 Mechatronics I focuses on sensors and instrumentation. The topics covered in the course are: electric circuits; electronic sensors; signal conditioning and instrumentation. There is a sensors project and 4 laboratory exercises.

LH: at least four 1-hour sessions per semester
PR: ENGI 1040

9.5 Academic Term 5 Courses

5003 Ship Structures I examines longitudinal strength, still water and wave bending moment, shear and bending moment curves, Smith Correction, section modulus calculation, torsion and racking forces; bulkhead and girder scantlings, portal frame analysis by moment distribution and energy method; finite element analysis and the use of Classification Society rules for design of midship section.

CR: the former ENGI 6002
PR: ENGI 4312

5020 Marine Propulsion is a second course in marine propellers and ship powering. The purpose of this course is to give students the principles of design and analysis of marine screw propellers and other propulsion devices. The course introduces various marine propulsion devices including conventional and unconventional propulsion systems. It covers methods of propeller design and propeller design philosophy. Emphasis is placed on the design of fixed-pitch propellers based on the lifting line theory and the design of ducted propellers. The student will also develop some insight into the design of other propulsion systems such as waterjets and sails.

CR: the former ENGI 6020
LH: at least one 3-hour session per semester
PR: ENGI 4020

5022 Stochastic Processes in Ocean Engineering includes basic concepts in probability, random variables, multiple random variables, descriptive statistics. The random processes component reviews mathematics of functions; introduces system input-output relations of continuous-time systems; contrasts time vs frequency domain representations; introduces frequency response plots and the Fourier transform; includes selected applications for ocean engineering.

OR: tutorial one hour per week
PR: ENGI 4020, Mathematics 3260

5312 Mechanics of Solids II begins with an introduction to earlier concepts then considers strain transformation; deflections of beams and shafts, energy methods; failure theories; buckling of columns and the inelastic behaviour of beams.

LH: at least five 3-hour sessions per semester
PR: ENGI 4312

5420 Probability and Random Processes includes basic concepts in probability, random variables, multiple random variables, descriptive statistics, random processes and selected applications for engineering.

PR: Mathematics 1001

5434 Applied Mathematical Analysis examines numerical and analytical solutions of applied mathematical problems in Civil Engineering, problems with higher order ordinary differential equations, stiff equations, systems of ODE, Runge-Kutta methods, boundary value problems, applications of eigen value problems (numerical solutions), Fourier analysis, elliptic, parabolic and hyperbolic partial differential equations and their numerical solutions with engineering applications.

PR: ENGI 4425

5601 Mass Transfer covers diffusive as well as convective mass transfer, mass transfer correlations, and the application to absorption and dehumidification.

LH: at least seven 2-hour sessions per semester
PR: ENGI 4602

5621 Process Modelling and Analysis is designed to introduce the concepts of process model building and its application in design and process scheduling. It includes fundamentals of process modelling, lumped parameter dynamic models, distributed parameter dynamic models, advanced dynamic model development, application of process models, and computer aided process design. The course will also introduce concepts and applications of process optimization, process flow sheet optimization, process scheduling, and process flexibility analysis.

PR: ENGI 4621, ENGI 4625

5671 Process Equipment Design I introduces the principles of unit operations, grouped into four sections: fluid mechanics, heat transfer, mass transfer and equilibrium stages, and operations involving particulate solids. It also includes design and operation fundamentals of unit operations: size reduction, filtration, evaporation, drying, crystallization, and humidification, and membrane separation.

CO: ENGI 5601
LH: at least four 2-hour sessions per semester
PR: ENGI 4621, ENGI 4625

5706 Design of Concrete Structures begins with a review of concrete mix design. Topics include design methods and requirements, strength of rectangular sections in bending, balanced condition at ultimate strength with tension reinforcement, bending with both tension and compression reinforcement; serviceability, deflections, flexural crack control for beams and one-way slabs; shear strength, inclined cracking, and shear reinforcement; bond stress and development of reinforcement; T-sections in bending; members in compression and bending; length effects, lateral ties, spiral reinforcement and longitudinal bar placement.

LH: at least five 3-hour sessions per semester
PR: ENGI 4312

5713 Fluid Mechanics examines fluid characteristics; fluid statics; buoyancy and stability; kinematics; pressure measurement; continuity, energy and momentum principles; energy and hydraulic grade lines; free jets; laminar and turbulent flow; dimensional analysis; drag on immersed bodies; flow measurement.

CR: the former ENGI 4913
LH: at least five 1-hour sessions per semester
PR: ENGI 4425

5723 Geotechnical Engineering II examines shear strength of soil, types of laboratory and in-situ soil tests; immediate and consolidation settlement of foundations; plastic equilibrium in soils; limit equilibrium method; earth retaining structures; introduction to bearing capacity theories; and stability of slopes. Relevant laboratory exercises and projects are also included.

CR: the former ENGI 6723
LH: 3
PR: ENGI 4723

5800 Electrical Engineering Design students will work in pairs on small design projects that will require them to follow a hierarchy of design process which includes general product definition, specifications and requirements, functional block diagrams, definition of specification of functional blocks for circuit level synthesis and implementation, system integration, simulation or modelling, testing and verification. The small projects are designed to encourage and motivate students to learn and practise the process of design. The course will culminate in a large design project.

CO: ENGI 5821, ENGI 5854
LC: at least 10 lecture hours per semester
OR: meetings with project supervisor as required
PR: ENGI 4841, ENGI 4854, ENGI 4862

5812 Basic Electromagnetism includes a review of relevant vector calculus, including the divergence, gradient and curl operators in Cartesian, cylindrical and spherical coordinates, divergence theorem, Stokes' theorem, and Laplace's and Poisson's equations. Topics in electrostatics include Coulomb's law, potential and energy, conductors, dielectrics, capacitance and electric field boundary conditions. Topics for magnetism include the steady magnetic field, the Biot-Savart law, Ampère's law, magnetic force, potential and magnetic materials and boundary conditions.

PR: ENGI 3821, ENGI 4430

5821 Control Systems I includes an introduction to control systems with a negative feedback; mathematical modelling and transfer functions of electromechanical systems; block diagram reduction and signal flow graphs; controller realization using op-amps; transient response analysis; Routh's stability criterion; basic control actions and response of control systems; root locus analysis and design; frequency response analysis; Bode diagram; gain and phase margins; compensator design in frequency domain; Nyquist stability criterion; A/D and D/A conversion, digital implementations of analog compensators; and an introduction to PID controller tuning methods.

LH: at least four 3-hour sessions per semester
PR: ENGI 4823

5854 Electronic Circuits II provides an introduction to circuits using operational amplifiers. Topics covered include operational amplifier configurations, analysis, and design; transient and frequency response of amplifier circuits; feedback amplifier analysis and design, stability and compensation techniques; noise and distortion in electronic circuits; analysis and design of data converters; and an introduction to analog filter design. CAD tools are used to illustrate the analysis and design of electronic circuits.

LH: at least five 3-hour sessions per semester
PR: ENGI 4823, ENGI 4854

5865 Digital Systems includes concepts, language, tools, and issues pertaining to specification, modelling, analysis, simulation, testing and synthesis of digital systems, including PLD, FPGA, and ASIC devices. Industry standard CAD tools will be used in this course to facilitate system design and testing.

LH: at least ten 3-hour sessions per semester
PR: ENGI 3891, ENGI 4862

5895 Software Design examines the development process: requirement analysis, design, iterative development, design documentation; an introduction to the Unified Modelling Language: use cases, class diagrams

and sequence diagrams; an introduction to software design patterns: creational patterns, structural patterns and behavioural patterns; object oriented, modular decomposition. The course includes a major design project.

LC: at least 15 lecture hours per semester
OR: meetings with project supervisor as required
PR: ENGI 4892

5911 Chemistry and Physics of Engineering Materials II examines aspects of chemical and physical processes and microscopic structure relevant to the production and use of engineering materials, focussing on metals, alloys, silicates, Portland cement, plastics and adhesives, composites, and wood. Topics include solid-state solutions and compounds, alloy structures, phase diagrams, reaction rates, solid-state transformations, polymerization, oxidation and corrosion, hardness, creep, fatigue, fracture toughness and visco-elastic deformation.

CR: the former ENGI 3205
LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 3911

5927 Mechanical Component Design I examines adequacy assessment and synthesis of machine elements with a focus on failure prevention, safety factors, and strength; static failure of ductile and brittle materials, fatigue analysis of components. Topics include the design of power screws, bolted connections, welds, springs, and shafts.

CR: the former ENGI 5926
LH: at least eight 3-hour sessions per semester
PR: ENGI 4312

5931 Advanced Mechanics of Deformable Solids examines stresses due to combined loads, thin-walled pressure vessels, transformation of stresses and strains, principal stresses and strains (two and three dimensional stresses), Mohr's circle, theory failures, stress concentrations, energy methods, buckling of columns, thick-walled cylindrical pressure vessels, rotating disks, multi layered thick walled pressure vessels, shrink fits and contact stresses.

CR: ENGI 5312
LH: at least four 2-hour sessions per semester
PR: ENGI 4312

5951 Mechatronics II focuses on drives and controllers. The topics covered in the course are: electric motors; actuators; control circuits. There is a motors project and 4 laboratory exercises.

LH: at least four 1-hour sessions per semester
PR: ENGI 4951

5961 Fluid Mechanics I examines fluid statics; fluid flow phenomena; control volume analysis; conservation of mass, momentum, and energy; Bernoulli equation; head losses, applications of conservation laws: flow measurement devices; pipe networks; momentum devices, dimensional analysis, boundary layer phenomena, lift and drag.

CR: the former ENGI 4913
LH: at least five 1-hour sessions per semester

9.6 Academic Term 6 Courses

6003 Ship Structures II is an introduction to ship structural safety and rational design. Topics include local strength analysis, elastic, plastic and ultimate strength of plating, frames and grillages, buckling of columns and plates and fatigue and fracture in ships.

CR: the former ENGI 7002
LH: at least one 4-hour session per semester
PR: ENGI 5003

6005 Floating Ocean Structures Design introduces floating structures used in the offshore petroleum industry, along with functional requirements, such as drilling and production, of the platforms. Field development criteria are discussed in the context of platform concept selection and synthesis. Environmental loads are examined, focussing on wave loads and ice loads. Diffraction theory and its application on offshore structures is presented. Offshore safety is discussed in terms of major hazards, risk management, and case studies.

CR: the former ENGI 7005
LH: 1
PR: ENGI 3054

6055 Marine Cybernetics examines propulsion and motion control of ships, submersibles and offshore structures. Building upon the student's knowledge of mathematics, mechanics and hydrodynamics provides an introduction to control systems and mathematical modeling of marine systems. Course components include: basic control actions and response of control systems; simulation and design of control systems; dynamic positioning; power management; marine automation.

LH: at least four 2-hour sessions per semester
PR: ENGI 4011

6101 Assessment of Technology deals with the issues of the impact of technology on society from an economic, environmental and sociological

point of view. Public safety as an engineering responsibility will also be covered. Students will be expected to participate in group discussions, write a number of essays and give oral presentations.

6322 Thermal Sciences examines fundamental concepts associated with thermodynamics, fluid dynamics and heat transfer; first and second laws of thermodynamics; system and control volume analysis; classification of flows; introduction to boundary layers and drag; convection, conduction and radiation heat transfer; thermal insulation and calculation of R-values; and cooling of electrical components.

CR: the former ENGI 4322
PR: ENGI 5312

6602 Offshore Petroleum Geology and Technology introduces basic concepts in geology and geophysics of the offshore environment. An outline of petroleum geology is presented, following a path from the origins of hydrocarbons through migration in the Earth's crust, accumulation in reservoirs and the strategies used to discover and to exploit liquids found in the subsurface. Topics include an introduction to the offshore oil and gas industry in harsh environment, type of platforms and structures, exploration phase of offshore oil development, production drilling and completion processes and equipment, and oil and gas transportation system. There are case studies and a project.

PR: completion of Academic Term 5

6631 Chemical Reaction Engineering will cover the fundamentals of chemical kinetics and reaction rate expressions as well as the types of reactors, homogeneous and heterogeneous (catalytic) reactors, and the interrelation between transport phenomena and reaction engineering as it applies to process design. It also includes non-ideal flow, non-ideal reactors, catalytic reaction system, and multiphase reactors.

LH: at least four 2-hour sessions per semester
PR: ENGI 4621, ENGI 5961

6651 Sustainable Engineering in Processing Industries will introduce students to sustainable development and its application to processing operations. Areas such as traditional economic growth, materials cycles, methods for measuring environmental impact, life cycle analysis, waste treatment technologies and recycling technologies will be covered. In addition, the concept of industrial ecology will be included.

PR: ENGI 4625, ENGI 5601

6671 Process Equipment Design II will cover design and operation of equilibrium stage separation processes including distillation, extraction, and leaching. It will also cover advanced concept of equipment design such as heterogeneous system, multiphase system, absorption, and adsorption operation and computer assisted design. Course will use HYSIS and other process equipment design tools.

LH: at least four 2-hour sessions per semester
PR: ENGI 5601, ENGI 5671

6705 Structural Analysis I examines structure classification and loads, building code provisions, analysis of statically determinate arches and frames, shear and moment diagrams for frames, influence lines for statically determinate structures, approximate analysis of indeterminate trusses and frames, the force method of analysing indeterminate beams and frames, an introduction to slope deflection method, and moment distribution method.

LH: at least five 3-hour sessions per semester
PR: ENGI 5312

6707 Design of Concrete and Masonry Structures examines design methods for reinforced concrete two-way slabs, two-way slabs supported on walls and stiff beams, design of two-way slab systems, direct design method and equivalent frame method, design of concrete retaining walls and basement walls, engineered masonry, allowable masonry stresses, mortar stress, analysis and design of flexural members, axial load and bending in unreinforced and reinforced walls, columns and masonry shear walls.

LH: 2
PR: ENGI 5706

6713 Hydraulics examines flow in pipe systems and networks; uniform and non-uniform flow in open channels; hydraulic machinery and associated conduits; design and analysis of culverts; and pipeline/pump system optimization.

LH: at least four 3-hour sessions per semester
PR: ENGI 5713

6718 Environmental Geotechniques examines soil characteristics; soil mineralogy; soil water interaction; soil contaminant interactions; advection, adsorption and diffusion; non-aqueous phase liquids; geosynthetics; design of landfills; and use of waste materials. Relevant software programs are used.

CR: the former ENGI 7718
PR: ENGI 5723

6749 Construction Planning Equipment and Methods includes construction equipment selection and utilization; earthmoving including use of explosives; case studies of major civil projects; principles of project planning and control; computer applications to the construction industry.

CR: the former ENGI 8749

PR: completion of Term 5 of the Civil Engineering program

6813 Electromagnetic Fields is a continuation of the topics started in Engineering 5812, including a review of electrostatics and magnetostatics, Maxwell's equations, Lorentz force, Poynting's theorem, plane waves, and applications including two-wire transmission lines.

LH: at least three 3-hour sessions per semester

PR: ENGI 5812

6843 Rotating Machines examines the fundamentals of rotating machines; design of machine windings; polyphase and single phase induction motor theory and applications; synchronous machine theory; stability and control of synchronous generators; control and protection of rotating machines, an introduction to A.C. motor drives, and machines.

LH: at least six 3-hour sessions per semester

PR: ENGI 4841

6855 Industrial Controls and Instrumentation examines control and instrumentation system components; transducers and signal processing circuits; linear variable differential transformers, power oscillators; electromechanical actuators, solenoids, power drives; A/D and D/A conversion, standard PC interfaces; real-time operating systems; design of discrete-time feedback controllers on a PC platform; system integration, control system tweaking and troubleshooting; programming soft-PLC's using IEC61131.

CR: the former ENGI 7858

LH: at least eight 3-hour sessions per semester

PR: ENGI 5821

6856 Power Electronics is an overview of power semiconductor switches, an introduction to energy conversion and control techniques and examination of controlled rectifiers; phase-controlled converters; switch-mode dc/dc converters; variable frequency dc/ac inverters; ac/ac converters; design of thyristor commutation circuits, gate and base drive circuits, and snubber circuits; thermal models and heat sink design.

CR: the former ENGI 7846

LH: at least ten 3-hour sessions per semester

PR: ENGI 5854

6861 Computer Architecture begins with a review of microprocessors and computer organization. Topics include fundamentals of computer design: performance metrics and cost; instruction set architecture; memory hierarchy design: cache, main memory and virtual memory; pipelining; hazards, parallelism; special purpose processors; multiprocessors and thread-level parallelism.

PR: ENGI 4862

6871 Communication Principles begins with a review of signal representation and analysis and includes distortionless signal transmission, analog modulation (AM, FM and PM), super-heterodyne receiver, sampling theorem, pulse amplitude modulation (PAM), pulse code modulation (PCM), delta modulation, baseband digital transmission, digital modulation techniques (ASK, FSK and PSK).

LH: at least four 3-hour sessions per term

PR: ENGI 4823, ENGI 5420

6876 Communication Networks is an introduction to communication networks such as the telephone network and the Internet. Topics include flow control and error control; circuit switching; packet switching; local area networks; internetworking; communication architectures and protocols.

PR: ENGI 5420

6892 Algorithms, Complexity, and Correctness presents fundamental theories and practices for the design of correct and efficient computing systems, including specification of computing systems and their components, correctness with respect to specifications; methods of verification; algorithmic problem solving strategies (such as divide and conquer, dynamic programming, etc.); tractability and intractability of computational problems.

PR: ENGI 4424, ENGI 4892

6901 Heat Transfer I examines modes of heat transfer; conduction: steady 1-D conduction, thermal resistance, extended surfaces (fins), lumped capacitance analysis, 1-D transient conduction; convection: Newton's law of cooling, convection heat transfer coefficient, external boundary layer flows, internal flows, natural convection; radiation: principles, properties, exchange factors, black body radiation, and enclosures, radiation shields.

LH: at least one 3-hour session per semester

PR: ENGI 4901

6927 Mechanical Component Design II is a continuation of the ENGI 5927 course in analysis and synthesis of machinery, including advanced analysis of machine elements such as clutches, brakes, couplings, journal bearings and gears. Advanced machine design concepts are examined, such as reliability, optimization and techniques for stimulating innovative design. A synthesis project involving the machine elements studied is usually included.

CR: the former ENGI 6926

LH: at least ten 3-hour sessions per semester

PR: ENGI 5927

6933 Mechanical Vibrations examines single degree of freedom systems: free vibration, energy methods, response to harmonic excitation, response to arbitrary inputs, two degree of freedom systems: natural frequencies and mode shapes, dynamic vibration absorber.

CR: the former ENGI 5932

LH: at least four 2-hour sessions per semester

PR: ENGI 3934

6951 Automatic Control Engineering examines the performance of feedback control systems. The topics covered in the course are: feedback control concept; control system performance; control system stability; nonlinear phenomena. There is a project which makes use of a peripheral interface controller or PIC. There are 3 laboratory exercises. Extensive use is made of MATLAB.

CR: the former ENGI 6925

LH: at least three 1-hour sessions per semester

PR: ENGI 5951

6961 Fluid Mechanics II examines differential analysis of fluid motion; conservation of mass: continuity equation; conservation of momentum: Navier-Stokes equations; conservation of energy; inviscid incompressible flows; low Reynolds number flows; boundary layer flows; compressible flows.

CR: the former ENGI 5913

LH: at least three 1-hour sessions per semester

PR: ENGI 5961

9.7 Academic Term 7 Courses

7000 Ocean Systems Design examines the preliminary design methods for the design of marine platforms and vehicles from mission statement to the selection of one or more acceptable solutions; weight and cost estimating, power requirements estimating, and selection of principal design characteristics and economic and operational evaluation of alternative solutions. There are relevant design laboratory projects.

CR: the former ENGI 7052

LH: 3

PR: ENGI 3001, ENGI 3054

7007 Marine Materials examines the properties and uses of steel and aluminum in marine applications. Topics include: overview of shipbuilding process; review of mechanics of materials, Hooke's Law, material failure models; carbon steel properties, grades, classification, testing; welding of steel - fundamentals, processes, preparation, design, drawings, certification; joining of aluminum - riveting, welding.

LH: at least 4 three-hour sessions per semester

PR: CHEM 1050, ENGI 4312

7033 Marine Hydrodynamics examines the fundamental equations of hydrodynamics, boundary layers; potential flow, added mass, damping, circulation, and vorticity; numerical methods for hydrodynamic coefficients; water waves and loading for regular and irregular seas.

LH: at least one 3-hour session per semester

PR: ENGI 4020

7035 Dynamics and Maneuvering of Ocean Vehicles (same as the former ENGI 6030) examines applications of the linearised equations of motion to ocean vehicle problems with single and multiple degrees of freedom; dynamics and maneuvering of marine vehicles: motions in calm water and in waves; hydrodynamics effects such as added mass, radiation and viscous damping; strip theory; irregular motions; and systems for course keeping and motion control.

CR: the former ENGI 6030

PR: ENGI 3054, ENGI 4020

7045 Marine Engineering Systems examines shafting system design; shafting system vibration analysis, study of exciting forces and moments, and balancing of reciprocating and rotating machinery; heat transfer and marine heat exchangers; incompressible fluid flow and piping system design and selection of appropriate pumping devices.

CH: 4

LC: 4

LH: 1

PR: ENGI 3901, ENGI 6933

7102 The Engineering Profession examines the origins and development of Engineering as a profession and its values, the place of technology in society and the nature of technological decisions. Topics will include the role and responsibility of the professional engineer in society, code of ethics, sustainable development and environmental stewardship.

CR: the former ENGI 5101

PR: ENGI 003W

7621 Process Dynamics and Control familiarizes students with the scientific and engineering principles of process dynamics and control. Students will apply and integrate knowledge of chemical engineering to identify, formulate and solve process dynamics problems and develop control systems. Modern computational techniques and tools will be used for solving chemical process control problems. Also students will become

familiar with industrial control systems.

LH: at least six 2-hour sessions per semester

PR: ENGI 5621

7623 Process Simulation provides students with the knowledge and experience to use a process simulator effectively for the analysis and synthesis of process flowsheets, mass and energy balances, sizing of individual component and process unit, reactor modeling, separation device modeling, heat exchanger modeling, and dynamic and steady state analysis.

LH: at least nine 2-hour sessions per semester

PR: ENGI 5621, ENGI 6671

7640 Process Engineering Project I gives students the opportunity to apply the knowledge gained in previous design and technical courses to the complete design of a piece of process equipment, e.g. distillation column, evaporator, membrane separation unit, etc. The goal is to expose the students to practical design issues that arise in process equipment design, and to provide experience in the complete design process as applied to real devices. This course is a precursor to ENGI 8640 where students will work in groups to design a process system.

LC: scheduled as required

PR: completion of academic term 6 of the process engineering program

7650 Offshore Oil and Gas Engineering Project I is a multidisciplinary design project that illustrates the application of previous engineering science and design related courses. The project will be done by teams of students with individuals concentrating their participation in their own engineering discipline. The project topic will be from the offshore oil and gas engineering industry. Lectures will be scheduled as required. This is the Term 7 project and if the scope of the project is such that it needs to continue, then the student will have the option to continue the same project in term 8 (in ENGI 8650).

LC: 1

PR: completion of Academic Term 6

7651 Industrial Pollution Control/Pollution Prevention is designed to introduce methods of industrial pollution assessment and control. Topics include waste characterization, water pollution assessment, water pollution control, air pollution assessment and control, solid waste assessment and control, pollution prevention, environmental risk assessment and risk based decision making.

PR: ENGI 5621, ENGI 6671

7680 Supervisory Control and Data Acquisition examines data acquisition and intelligent field devices; distributed systems and fieldbus technology; programmable logic controllers and programming standards; operator control interface; supervisory control and data acquisition; and enterprise organization.

LH: at least four 3-hour sessions per semester

PR: ENGI 5821

7691 Mining and Metallurgical Process Engineering is designed to provide students with a basic fundamental background to the mining, mineral processing, and extractive metallurgical processing industry from both traditional and modern industrial methodologies. Concepts such as a mine design, mineral flow sheets, extraction methods, and examples from industrial applications will be reviewed with problems.

LH: at least four 2-hour sessions per semester

PR: completion of academic term 6 of the process engineering program

7704 Design of Steel Structures begins with a review of Design Concepts, Standards and Products. Topics include design of members and connections, tension members, bolted joints, welded joints, compression members, stability and effective length, flexural members, beams & beam-columns, plate girders, composite construction, introduction to serviceability, and deflections.

LH: at least four 2-hour sessions per semester

PR: ENGI 5706 or approval of the Discipline Chair

7706 Finite Element Structural Analysis includes a review of basic concepts required for FEA, basics of stiffness formulation, direct stiffness method, displacement method, one dimensional elements, trusses and frames. Topics include 1-D fluid and heat transfer elements, automated analysis and modelling concepts, higher order elements, two dimensional elements - plane stress and plane strain, introduction to 3D and other types. - introduction to advanced topics and isoparametric formulation.

LH: at least eight 2-hour sessions per semester

PR: ENGI 6705 or approval of the Discipline Chair

7707 Reliability and Environmental Loading on Offshore Structures begins with an introduction to natural phenomena that cause loading and influence the design of marine structures. Topics include the interpretation and utilization of field data for the determination of design loads for wind, waves currents and ice and case studies of load analysis for the design of offshore structures in Atlantic Canada.

PR: ENGI 5312

7713 Hydrology and Water Resources examines precipitation, snowmelt, infiltration, runoff and streamflow; statistical treatment of hydrologic data; hydrograph analysis and synthesis; evaporation; structure design floods;

reservoir storage and flood routing; urban run-off and drainage.

LH: at least 6 hours per semester

PR: ENGI 5713, ENGI 6322

7716 Hydrotechnical Engineering examines the theory and application of steady gradually-varied flow in artificial and natural open channels together with an introduction to appropriate software; erosion protection and mobile-boundary hydraulics; problems with ice in rivers, the design of spillways, energy dissipaters, and culverts; physical scale models. There is an introduction to water hammer and surge tanks.

LH: at least four 3-hour sessions per semester

PR: ENGI 6713

7723 Geotechnical Engineering III examines soil investigation and site characterization; pile foundations; embankment dams; elements of geotechnical earthquake engineering; constitutive theories for soil materials; and numerical methods in geotechnical engineering. The students select two of the above topics on which they are interested in concentrating their efforts. Bi-weekly lectures are offered on the other topics at an informal level.

PR: ENGI 5723

7745 Highway Engineering examines design and construction of highways including driver, vehicle and road characteristics; highway location and geometric design; soil classification; subgrade and base materials; highway drainage; flexible and rigid pavement; and highway economics.

PR: completion of Term 6 of the Civil Engineering program

7748 Project Planning and Control includes an introduction to types of contracts, project delivery approaches, and prevailing contractual relationships. The course examines basic project management techniques for network planning and scheduling (CPM and PERT); principles of resource productivity databases, preliminary estimating, and detailed bid preparation; quantitative approaches for effective control of time, cost, resource, quality, and value of constructed facilities; use of computer software for scheduling, estimating, and control.

PR: completion of Term 6 of the Civil Engineering program

7803 Electrical Engineering Design Project I provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving an electrical engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ENGI 8853.

CR: the former ENGI 7800

LC: at least 10 lecture hours per semester

OR: weekly meetings with project supervisor

PR: completion of Term 6 of the Electrical Engineering program

7804 Computer Engineering Design Project I provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a computer engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ENGI 8854.

CR: the former ENGI 7800

LC: at least 10 lecture hours per semester

OR: weekly meetings with project supervisor

PR: completion of Term 6 of the Computer Engineering program

7811 Antennas examines the fundamentals of electromagnetic radiation; potentials; small antennas and antenna parameters; thin linear wire antennas and antenna arrays; antenna impedance and ground effects; Friis transmission formula; and aperture antennas.

LH: at least three 3-hour sessions per semester

PR: ENGI 6813

7814 Electromagnetics for Communications examines vector calculus; Green's, Stokes' and Gauss' theorems; Maxwell's differential and integral equations; steady-state and time-varying aspects of Maxwell's equations; uniform plane wave propagation in various media; and applications of electromagnetics in communications.

PR: ENGI 3424, ENGI 3821

7824 Introduction to Digital Signal Processing examines sampling theory; the discrete Fourier transform; the efficient fast Fourier transform algorithm; elementary discrete-time signals; the discrete-time Fourier series; the discrete-time Fourier transform; discrete-time linear and time-invariant systems; linear constant-coefficient difference equations; the convolution sum; the z-transform and frequency response of discrete-time systems; an introduction to digital filter design techniques; and digital signal processing applications.

PR: ENGI 6871

7825 Control Systems II examines state space models for multi-input/output systems; observability, controllability; state feedback without and with integral controller structure, state observers; quadratic optimal regulator and tracking control strategies; discrete-time state equations; and an introduction to optimal control.

CR: the former ENGI 6825

PR: ENGI 5821

7844 Power System Analysis begins with an introduction to electric power systems. Topics include per unit quantities; transmission line parameters; modelling of power system components; single line diagrams; network equations formulation; bus impedance and admittance matrices; load flow analysis and control; design of reactive power compensation for power system performance enhancement; tap changing, auto and control transformers for power system application; economic dispatch and optimal power flow studies.

LH: at least six 3-hour sessions per semester

PR: ENGI 6843

7854 Industrial Machine Vision is a senior undergraduate course in computer vision with an emphasis on techniques for automated inspection, object recognition, mechanical metrology, and robotics. Image processing courses typically focus for image enhancement, restoration, filtering, smoothing, etc. These topics will be covered to a certain degree but the main focus will be on image segmentation, feature extraction, morphological operators, recognition and photogrammetry. Issues related to the efficient software implementation of these techniques for real-time applications will also be addressed. While there is no prerequisite for this course non-computer engineering students must have reasonably strong programming skills.

7855 Communications Electronics begins with an introduction to communications systems components and a review of linear amplifiers. The course examines linear amplifier design and characteristics using s-parameters; power amplifiers; mixers; oscillators; modulator/demodulator circuits and subsystems; and the integration of subsystems into analog and digital communication systems.

LH: at least four 3-hour sessions per semester

PR: ENGI 5854, ENGI 6871

7856 Renewable Energy Systems examines the assessment of wind energy potential, wind turbine aerodynamics, types, modelling and control strategies; hybrid energy systems; energy storage; solar energy systems; photovoltaic, PV system engineering, stand-alone and grid connected systems, sizing and maximum power tracking; solar water pumping; micro-hydro systems and control; tidal power, wave energy converters, ocean thermal systems. Applications of hybrid energy system sizing software are also included in the course.

PR: ENGI 4841 or the former ENGI 5842

7894 Concurrent Programming surveys parallel and distributed architectures and examines patterns of concurrent program design; correctness of concurrent programs: safety and liveness properties, proof of properties; synchronization using locks, semaphores, and monitors; communication using message passing and remote procedures; parallelization for high-performance computation and advanced topics such as scientific applications, distributed systems, model checking, and transaction processing.

CR: the former ENGI 8893

PR: ENGI 6861, ENGI 6892

7901 Heat Transfer II examines advanced topics in heat transfer; multi-dimensional conduction: shape factors, numerical methods, moving heat sources; heat transfer equipment: heat exchangers, heat exchanger design principles; phase change heat transfer: melting, solidification, condensation, and boiling.

LH: at least one 3-hour session per semester

PR: ENGI 6901

7903 Mechanical Equipment examines performance characteristics of mechanical equipment; fluid power devices: pipes; valves; pumps; fans; blowers; compressors; storage tanks; heat transfer devices: heat exchangers; boilers; cooling towers; and pressure vessels.

LH: at least three 1.5-hour sessions per semester

PR: ENGI 6901

7911 Industrial Materials examines physical and mechanical properties; industrial materials; metals and metal alloys, ceramics and polymer, composite materials, failure modes and mechanisms, non-destructive testing and evaluation; damage tolerant materials; material treatments; and materials selection.

CR: the former ENGI 6972

LH: at least 20 hours per semester

PR: ENGI 5911

7926 Mechanical Design Project I is the first of two capstone design courses in the Mechanical Discipline. In this course mechanical students are organized into small groups or teams, which must complete a common design challenge. The project is presented as an open-ended problem statement with specific performance objectives. The system must be designed, prototyped and tested during the course of the term. Each team is a small consulting firm and is required to document its object planning as well as its design.

CR: the former ENGI 7936

LC: scheduled as required

LH: scheduled as required

PR: completion of Term 6 of Mechanical Engineering program

7928 Computer Aided Engineering Applications introduces a variety of Computer Aided Engineering (CAE) applications based on advanced 3D CAD modelling. The fundamentals of 3D modelling are covered including parametric and feature-based design. CAE applications include assembly modelling, mechanism animation and finite element analysis. Further applications include Computer Aided Manufacturing (CAM); model based inspection (i.e. Coordinate Measurement Machines); reverse engineering; document/drawing production; data exchange; and data management. The course has a significant lab component, which provides exposure to solid modelling and CAE applications based on an industrial CAD/CAM/CAE package.

CR: the former ENGI 7962

LH: at least ten 3-hour sessions per semester

PR: ENGI 1030, ENGI 6927

7934 Finite Element Analysis examines the basis of the finite element method. The course examines continuum mechanics applications; beam problems, fluid mechanics problems, and heat transfer problems. There are relevant computer laboratory exercises.

LH: at least ten 2-hour sessions per semester

PR: ENGI 4430, ENGI 5931

7952 Robotics and Automation provides the fundamentals in robotic manipulators and arms. The course provides basic understanding in coordinate transformations for spatial description, both kinematical and kinetic analysis, forces and dynamics and finally trajectory generations and path planning.

CR: the former ENGI 7944

LH: at least three 3-hour sessions per semester

PR: ENGI 1040, ENGI 4430

9.8 Academic Term 8 Courses

8000 Ocean and Naval Architectural Engineering Project executes the design project selected and approved in Term 7. The project must illustrate the application of previous design related courses, i.e., decision methods, impact assessments and application of technology. The subject may be ship design, marine system, directed research or a unique design solution. Lectures will be scheduled as required.

LH: 3

PR: ENGI 7000

8003 Small Craft Design presents the fundamentals of naval architecture as practised in small craft design, and develops a methodology for a variety of craft: tenders, lifeboats, planning vessels, dinghies, coastal cruisers and large, state of the art racing yachts. The emphasis is on recreational craft of all sizes, with special emphasis on sailing vessels. Special topics, such as choice of material of construction, scantlings, performance prediction, seaworthiness, tank testing, modern construction materials and techniques are covered. Specific design problems unique to small craft will be covered such as; mast design and sail area determination, and the state of the art in performance prediction. Students will do a design of their choice over duration of the course. Small weekly design studies will be required.

LH: at least 12 hours per semester

PR: ENGI 7035 or the former ENGI 6030

8054 Advanced Marine Vehicles examines the concepts used in the design of advanced marine vehicles. Emphasis will be given to: structural design of craft constructed from fibre reinforced plastics; high speed marine vehicles (powering, structures, seakeeping and model testing); small craft.

LH: at least 9 hours per semester

PR: ENGI 5003

8058 Submersible Design examines the formulation of mission statement, promotes understanding of various design constraints and reviews the historical developments of submersibles design. The course studies the hydrostatics principles of floatation, stability and control of submersibles. Students will perform resistance and propulsion calculations. The course examines maneuvering and control equations, a survey of different materials and their selection criteria, the design of pressure hulls, the structural design of submersibles and a study of various support systems.

LH: at least 12 hours per semester

PR: ENGI 3054

8074 Arctic Ocean Engineering (same as the former ENGI 8674) examines marine ice as an environmental load factor in the context of ships and engineered structures designed for ice covered waters. Topics include types of naturally occurring ice; sea ice formation and characteristics; mechanical strength of sea ice under common modes of ice failure; modes of ice interaction with ships and marine structures; estimation of ice forces on offshore structures; powering requirements for ice breaking ships; regulations and standards for design of ships and offshore structures in arctic environments.

CR: the former ENGI 8674

LH: at least four 3-hour sessions per semester

PR: ENGI 3934, ENGI 4312

8090-8099 Special Topics in Ocean and Naval Architectural Engineering will have topics to be studied announced by the Faculty.

8601-8610 Special topics in Process Engineering will have topics to be studied announced by the Faculty.

8640 Process Engineering Project II is a design project that illustrates the application of previous engineering science and design related courses. Projects will be done by teams of students with individuals concentrating their participation in their own engineering discipline. The project topic will be from the process industry which includes the offshore oil and gas industry, mining and metal processing industry and chemical process industry.

LC: scheduled as required
PR: ENGI 7640

8650 Offshore Oil and Gas Engineering Project II is a multidisciplinary design project that illustrates the application of previous engineering science and design related courses. The project will be done by teams of students with individuals concentrating their participation in their own engineering discipline. The project topic will be from the offshore oil and gas engineering industry. Lectures will be scheduled as required.

CR: the former ENGI 8600
LC: 1
PR: ENGI 7650

8670 Reliability Engineering is an introduction to reliability engineering; physics of failure and failure mechanism, reliability measures and assessment; reliability of components and parts; complex system reliability and availability analysis; and field reliability assessment. The course includes case studies and a project.

PR: completion of Academic Term 6

8671 Safety and Risk Engineering begins with an overview of safety and risk issues in the offshore oil and gas industry. The course examines regulatory requirements; hazards and structured analysis tools; risk terminology and quantified risk analysis (QRA) techniques; and safety assessment studies. The course includes project and case studies.

PR: completion of Academic Term 6

8673 Subsea Pipeline Engineering provides an introduction to subsea pipeline engineering with a focus on the mechanical design of offshore pipelines. Stress-based, design-based and limit-states design for strength and stability are examined. Other fundamental pipeline engineering design issues such as materials specification, flow assurance and installation are reviewed. Principles of geotechnical engineering and pipeline/soil interaction analysis techniques are investigated. Special topics are also reviewed.

LH: 2
PR: one of ENGI 5312, ENGI 5931 or ENGI 6003

8676 Design of Natural Gas Handling Equipment covers process description, design methods, operating procedures, and troubleshooting aspects of gas production facilities including inlet separation operations, hydrate prevention and control, gas dehydration, NGL recovery and dew point control, gas transmission and pipeline design and transportation systems.

PR: completion of Academic Term 6

8677 Process Plant Design and Economics will provide a comprehensive picture of the availability and design of both traditional and current process equipment. Economic and optimization issues relevant to investment, product-cost estimation, and profitability analysis will also be addressed. The course will provide students with tools to evaluate the economics of process industries reflecting current economic criteria, and provide helpful guidelines to approaching, defining, and solving optimization problems.

PR: ENGI 7623

8680 Process Control and Instrumentation begins with an introduction to feedback and feedforward control systems, regulatory and servo control. Topics include modelling thermal, gas, liquid and chemical processes; sensors and transmitters, control valve sizing for liquids and gases, industrial feedback controllers; design of feedback control loops, tuning of feedback controllers; cascade, ratio, override and selective control; feedforward control; multivariable process control; piping and instrumentation diagrams, and control system documentation.

LH: at least four 3-hour sessions per semester.
PR: ENGI 5821

8690 Reservoir Engineering examines fluid pressure regimes, oil recovery factors, calculation of hydrocarbon volumes, reservoir rock characteristics, reservoir fluid properties, porosity and permeability, material balance, and well test analysis.

PR: completion of Academic Term 6

8691 Petroleum Production Engineering examines the procedures and equipment necessary for preparing a well to produce hydrocarbons and maximizing flow rate during the life of the well; techniques for well productivity analysis in under-saturated, saturated, and natural gas reservoirs; well completion configuration tubulars; packers and subsurface flow control devices; completion and work over fluids; perforating oil and gas wells; formation damage; surfactants for well treatment; hydraulic fracturing;

acidizing; scale deposition, removal, and prevention; work over and completion rigs; and artificial lift.

PR: completion of Academic Term 6

8692 Drilling Engineering for Petroleum Exploration & Production covers both offshore and onshore drilling operations and includes: rotary drilling rig operations, well construction sequence, drill string, drill bits, well bore hydraulics, casing and well heads, cementing, well control, directional and horizontal drilling, well planning and fishing operations, and extended reach, horizontal and multilateral well drilling techniques.

PR: completion of Academic Term 6

8693 Petroleum Facilities Engineering - inactive course.

8694 Downstream Processing includes: oil and natural gas processing, oil and gas storage facilities and their design, oil and gas separation processes, petroleum refining processes, and de-bottle necking.

PR: completion of Academic Term 6

8696 Petroleum Refining Engineering will cover crude and refinery products properties and specifications, process description, design methods, operating procedures, and troubleshooting aspects of modern petroleum refining. It also includes hydrotreating, catalytic reforming, hydrocracking, isomerisation, refinery machinery, and utilities.

PR: completion of academic term 6 of the process engineering program

8700 Civil Engineering Project is a practically oriented design project integrated over the five areas in which Civil programs are offered. Students will operate in consultant groups and will complete a design for a typical Civil Engineering undertaking.

LC: scheduled as required
OR: 1 client meeting per week, 1 tutorial per week
PR: completion of Term 7 of the Civil Engineering program

8705 Structural Building Systems examines geometries, loads, safety and serviceability, procedure of using the national building code for evaluating the governing loads on structural members; design of low rise concrete, timber and steel buildings; lateral load-resisting elements and bracing systems; design of foundation systems, footing design, pile cap design, pile group analysis using elastic centre method and inclined pile analysis; prestressed concrete concepts: strength of flexural members, and shear reinforcement for prestressed concrete beams.

LH: at least nine 3-hour sessions per semester
PR: ENGI 6707

8708 Offshore Structural Design examines guidelines and international codes and standards for offshore structural design; understanding design constraints and concepts of offshore fixed and floating structures; design consideration for fixed offshore concrete platform; design consideration for offshore platform and floating production system design, and analysis of various support systems of the offshore structure.

PR: ENGI 7707

8713 Municipal Engineering includes water supply system overview; water consumption estimation; groundwater and surface water sources; oxygen demand and transfer; water treatment processes; water distribution systems and design software; sewer systems and design software; wastewater treatment processes; sludge handling; decentralized and on-site wastewater treatment.

PR: ENGI 7716

8717 Environmental Assessment, Monitoring and Control covers statistical analysis; pollution monitoring, and sampling network design; water quality and air quality modelling; environmental risk assessment; environmental impact assessment; site remediation and hazardous waste management. There are relevant field trips and case studies.

LH: at least ten 3-hour lab sessions per semester
PR: ENGI 7717

8740 Contract Law and Labour Relations is an introduction to law as it applies to engineering activity; the nature of law and legal processes, including standard forms; liens, bonds and insurances; the labour movement in North America; examination of union philosophies and managerial attitudes; labour law and collective bargaining; disputes and settlements.

CR: the former ENGI 6740
PR: completion of Term 7 of the Civil Engineering program

8751 Coastal and Ocean Engineering examines the coastal and ocean environment; ocean circulation and properties; waves and tides; instrumentation and measurement. Additional topics will be drawn from the areas of hydraulic, geotechnical and structural engineering. Relevant field exercises will be conducted.

PR: ENGI 6713

8790-8799 Special Topics in Civil Engineering will have topics to be studied announced by the Faculty.

8801-8805 (Excluding 8804) Special Topics in Computer Engineering will have topics to be studied announced by the Faculty.

8806-8809 Special Topics in Electrical Engineering will have topics to be

studied announced by the Faculty.

8821 Design of Digital Signal Processing Systems is a review of introductory digital signal processing (DSP) principles, including sampling theory and discrete-time systems and signals. Topics include transform analysis of DSP systems; issues in the implementation of DSP systems; design of IIR and FIR digital filters; computable transforms and their use in the frequency analysis of digital signals; and design of DSP systems for current and emerging applications of digital signal processing.

PR: ENGI 7824

8826 Filter Synthesis begins with an introduction to analog filters. The course examines descriptive terminology, transfer functions and frequency response of filters; design of first order passive and active filters; design and analysis of biquad circuit, Sallen key circuit, multiple feedback circuit and state variable filter; RC-CR transformation; inductance simulation circuit; cascade design principle; design of filters with maximally flat magnitude response; design of filters with equal ripple magnitude response; design of Bessel-Thomson filters; analysis and design of switched capacitor filters; and the use of Matlab for design of analog filters.

LH: at least four 3-hour sessions per semester

PR: ENGI 5854

8845 Power System Operation examines symmetrical components; power system fault analysis; power system stability; and power system protection.

LH: at least four 3-hour sessions per semester

PR: ENGI 7844

8853 Electrical Engineering Design Project II continues ENGI 7803 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving an electrical engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of an electrical engineering system to solve the problem as defined in 7803.

CR: the former ENGI 8800

LC: 0

OR: weekly meetings with project supervisor

PR: 7803

8854 Computer Engineering Design Project II continues ENGI 7804 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a computer engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of a computer engineering system to solve the problem as defined in 7804.

CR: : the former ENGI 8800

LC: 0

OR: weekly meetings with project supervisor

PR: 7804

8863 Introduction to LSI Design (same as Computer Science 4725) is an introduction to ASICs and ASIC design methodology and includes basic concepts of digital logic design tools and ASIC technology libraries; partitioning for logic synthesis and VHDL coding; constraining designs, synthesizing, simulation and optimization; design for testability; layout and post-layout optimization and SDF generation; and static timing analysis.

LH: at least eight 3-hour sessions per semester

PR: ENGI 5865

8868 Computer and Communications Security examines the techniques used to provide security in communication networks and computer systems. The course focuses on topics in cryptography required to provide privacy, authentication, and integrity, including symmetric key ciphers, public key ciphers, message authentication, and digital signature schemes.

PR: ENGI 6876

8877 Wireless and Mobile Communications (same as the former ENGI 8804) covers the fundamentals and main concepts of wireless and mobile communication systems focusing on the system level design and performance. Main topics to be covered include Introduction to Wireless Communication Systems, Wireless Channel Models, Frequency Reuse Concept, Wireless Multiple Access Techniques (TDMA, FDMA, CDMA), Orthogonal Frequency Division Multiplexing (OFDM), Wireless Systems (GSM, 3G, LTE, etc.).

CR: the former ENGI 8804

PR: ENGI 6871, ENGI 6876

8879 Digital Communications is a review of baseband transmission and basic digital modulation schemes, detection (optimum receiver, matched filter, correlator), error performance, intersymbol interference (ISI),

equalization, the concept of information and entropy, source coding including Huffman coding and linear predictive coding, channel coding including block and convolutional error correcting codes, modulation and coding trade-offs, bandwidth and power efficiency.

PR: ENGI 6871

8894 Real-time Operating Systems examines real-time process scheduling; memory and device management; I/O communications; real-time systems; operating system and hardware concurrency issues; kernel architectures; device drivers; and a survey of available real-time operating systems and embedded platforms.

CR: the former ENGI 7863, Computer Science 4721

PR: ENGI 7894

8903 Mechanical Systems examines mechanical systems design; system simulation, control, and optimization; design optimization and system performance evaluation; design case studies and equipment for overall system design.

PR: ENGI 6901

8911 Corrosion and Corrosion Control examines forms of corrosion; the electrochemical nature of the corrosion process; the mixed potential theory, Pourbaix diagrams and Evans diagrams; corrosion testing, control use by use of materials, selection, cathodic protection, inhibitors, and coatings. There are case studies of selected corrosion problems.

CR: the former ENGI 8962

LH: at least five 3-hour sessions per semester

PR: ENGI 7911

8926 Mechanical Design Project II is the second of two capstone design courses in the Mechanical Discipline. Building on skills acquired in the first, student teams each choose a unique design challenge and then proceed to generate a solution. The problem statements are often drawn from industry and, where possible, interdisciplinary interaction is encouraged (for example, with business, computer science, or other engineering disciplines). In most cases, the problem proponent will act as the "client" and the team is expected to manage the client interaction process as well. Significant emphasis is placed on both oral and written communication of both the process and results. Wherever possible, each system or a critical component of it, will be prototyped and tested.

CR: the former ENGI 8936

LC: scheduled as required

LH: scheduled as required

PR: ENGI 7926

8933 Fatigue and Fracture Mechanics - inactive course.

8935 Pressure Component Design - inactive course.

8937 Machine Dynamics begins with a review of Newton's Law, planar rigid body kinematics and kinetics. Topics include three-dimensional kinematics and kinetics: orientation angles, rotation matrices, Euler's equations. Lagrange's and Hamilton's equations, constraints, dynamic simulation of linkages, mechanism loads, balancing, engine dynamics. There is a student analysis project.

CR: the former ENGI 7945

LH: at least eight 1-hour sessions per semester

PR: ENGI 4932, 6933

8945 Production & Operations Management is an overview of production and operations management, and an examination of decision making and operations strategy; process design and improvement, process flow analysis/simulation, capacity planning; design of value chains, lean systems, plant layout and process planning; operating value chains, MIS systems, inventory and resource management; Relevant computer laboratory exercises are conducted.

CR: the former ENGI 7943

PR: ENGI 6901

8964 Fluid Structure Interactions examines structural vibrations generated by fluid flow. These vibrations can be transient or they can take the form of instability or resonance. The course deals with the following fluid structure interactions: (1) Flow induced vibration of structures (2) Unsteady flow in pipe networks (3) Water wave interactions with structures.

CR: the former ENGI 8904

LH: at least three 3-hour sessions per semester

PR: ENGI 6961, ENGI 6933

8970-8979 Special Topics in Mechanical Engineering will have topics to be studied announced by the Faculty.

Fisheries and Marine Institute Advisory Committee

An Industry-based Advisory Committee, established by an Act of Legislature, with members appointed by the Board of Regents of the University, advises the Fisheries and Marine Institute on fisheries and marine related programs and activities.

Chair Advisory Committee

Captain S. Hynes, Executive Chairman, Oceanex Inc.

Committee Members

Allan, M., Manager, Regulatory Affairs and Administration, Husky Energy

Baird, J., Regional Director General DFO

Blackwood, G., Vice-President, Fisheries and Marine Institute

Butler, R., Vice President, Plant Operations, Cooke Aquaculture

Chaulk, N., Vice-President, Business Development, Verafin

Follett, W., President and CEO, Marine Atlantic

Hannaford, A., President, Student Union, Fisheries and Marine Institute

O'Rielly, A., Deputy Minister, Department of Fisheries and Aquaculture

Pecore, L., President, Genoa Design International Ltd.

Petten, I., Vice-President, Ocean Choice International

Pretty, G., Director, Industrial/Retail, Fish, Food and Allied Workers Union

Secretary to the Committee

Kavanagh, J., B.Sc., M.B.A. *Memorial*

Fisheries and Marine Institute Executive Committee

Vice-President (Marine Institute)

Blackwood, G., B.Sc.(Hons.), M.A. *Memorial*

Associate Vice-President (Marine Institute) Academic and Student Affairs

Fisher, P., B.Sc., P.G.C.E., Ac. Dip. Ed. *London*, M.Ed. *Memorial*, Ph.D. *Leeds*

Director, Corporate Services and External Affairs

Clarke, K., B.Sc., M.B.A. *Memorial*

Director, Research and Development

Newhook, R.V., B.Eng. *Memorial*, P.Eng.

Head, School of Fisheries

Bonnell, C., B.Sc. *Memorial*, Adv. Dip. *Marine Institute*

Head, School of Maritime Studies

Dutton, C. R., B.Eng., B.Voc.Ed., M.Eng. *Memorial*

Head, School of Ocean Technology

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 School Description

The Fisheries and Marine Institute was established in 1964 as the College of Fisheries, Navigation, Marine Engineering and Electronics. It became affiliated with the University in 1992 and since then has continued to grow as a world-class centre of marine technology and education. The official name is the Fisheries and Marine Institute of Memorial University of Newfoundland, but it is commonly known as the Marine Institute.

The main campus of the Marine Institute overlooks the city of St. John's from within Pippy Park, which has extensive hiking trails and recreational facilities. This building houses a flume tank, a seafood processing plant, freshwater aquaculture research and development facilities, and extensive marine simulation facilities. The Dr. C. R. Barrett Library, located at this campus, houses one of Canada's largest marine-related collections. In addition, the Institute manages the Offshore Safety and Survival Centre in Foxtrap, the Safety and Emergency Response Training (SERT) Centre in Stephenville and a marine base on the south side of St. John's harbour.

The Marine Institute provides a full range of programs focussing on fisheries and marine science and technology. In addition to undergraduate and graduate degrees, the Institute offers advanced diplomas, diplomas of technology, and technical and vocational

certificates. The Institute also runs a variety of short courses and industrial response programs.

All programs and courses are designed to provide students with the knowledge and skills required for success in the workforce. The Institute seeks the advice of industrial program advisory committees in the ongoing development and review of programs. Whenever appropriate, it submits programs for national accreditation, providing graduates with mobility in professional employment.

2.1 The Marine Institute Students' Union (MISU)

The Marine Institute Students' Union (MISU) was incorporated in 1991. It is committed to the provision of services to students as well as representing the student body at the national, provincial and institute levels in matters affecting the quality of student life.

The MISU is a prominent member of The Canadian Federation of Students (CFS). The CFS provides a voice for students at over 70 universities, colleges, and technical institutes across Canada including more than 32,000 students in Newfoundland and Labrador. The national body has a strong presence in Ottawa and ensures students' opinions are known on Parliament Hill. Services provided by CFS include the National Student Health Network, student saver cards, Student Work Abroad Program (SWAP), International Student Identity Cards (ISIC), and Travel Cuts. The CFS Newfoundland and Labrador (CFS-NL) ensures student's opinions are known in the Provincial House of Assembly. The MISU takes part in the CFS bi-annual conferences to discuss and form policies on behalf of students.

Within the Institute, the MISU has representation on a number of committees, including the Marine Institute Industry Advisory committee and the Academic Council, where the Union members ensure that student well-being is at the forefront in all policies affecting student life. The MISU provides the student health plan. Many social and recreational activities are planned and sponsored by the MISU including Winter Carnival held during the last week of January. Profits from the social activities are returned to the students in the form of scholarships. The MISU manages and maintains the student lounge -The Mariner's Lounge.

3 Description of Degree Programs

Students must meet all regulations of the Fisheries and Marine Institute in addition to those stated in the University's general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

For information about non-degree programs and upgrading opportunities refer to www.mi.mun.ca.

3.1 General Degrees

The Marine Institute offers two undergraduate degrees. For specific details on each degree refer to the appropriate **Degree Program Regulations**. The courses in the programs are available on campus and by distance delivery.

3.1.1 Bachelor of Maritime Studies

The Bachelor of Maritime Studies program prepares graduates for career advancement in the maritime and related industries. It is designed for students who have graduated from accredited, or Transport Canada approved, diploma of technology programs in the marine fields. The program is also available to professional mariners, professional fish harvesters and certain Canadian Forces (Naval Operations) personnel. Courses in the program provide the student with an introduction to human resource and business management concepts, and the social contexts in which their careers will be based. The program consists of 39 credit hours in addition to work completed in a diploma program and can be taken on a full-time or part-time basis.

3.1.2 Bachelor of Technology

The Bachelor of Technology program prepares graduates for career advancement in health science technology or engineering/applied science technology industries. It is designed for students who have graduated from an accredited diploma of technology program that is applicable to one of two optional areas. Courses in the program provide the student with an introduction to human resource and business management concepts, and the social contexts in which their careers will be based. The program consists of 39 credit hours in addition to work completed in a diploma program and can be taken on a full-time or part-time basis.

The optional areas are:

- Engineering and Applied Science Technology Option, which is normally chosen by students who have an engineering/applied science technology diploma.
- Health Sciences Technology Option, which is normally chosen by students who have a health sciences technology diploma.

4 Admission/Readmission Regulations for Degree Programs

In addition to meeting the admission/readmission requirements for the University students must also meet the admission/readmission requirements for the Marine Institute. See **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)** for University requirements.

4.1 General Information

1. All application forms must be submitted to the Admissions Office, Office of the Registrar, Memorial University of Newfoundland, St. John's, NL, A1C 5S7.
2. Students who want to take University courses concurrently with diploma courses should check either Pre-Bachelor of Maritime Studies or Pre-Bachelor of Technology on the Memorial University of Newfoundland application for admission/readmission form.
3. For the purpose of satisfying the requirements of **UNIVERSITY REGULATIONS - Year of Degree and Departmental Regulations - All Other Faculties and Schools**, Pre-Bachelor of Maritime Studies and Pre-Bachelor of Technology students will normally follow regulations in effect in the academic year in which the student first completes a course(s) in the Bachelor of Maritime Studies or Bachelor of Technology program as a Pre-Bachelor of Maritime Studies or Pre-Bachelor of Technology student. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.
4. Students may not obtain both a Bachelor of Maritime Studies and a Bachelor of Technology degree based upon completion of the same diploma of technology.

4.2 Admission Requirements for Applicants to the Bachelor of Maritime Studies Program

1. An applicant must submit a form for admission/readmission to the University. This application must include all required documentation including proof of the diploma or certificate required for admission in a specific category.

2. Categories for admission to the Bachelor of Maritime Studies

Applicants must meet the general admission/readmission requirements of the University and be eligible for admission to the Bachelor of Maritime Studies program in one of the following categories:

- Category A: applicants holding a diploma from the Marine Institute in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology,
- Category B: applicants holding a Canadian Technology Accreditation Board accredited, or Transport Canada approved, diploma in marine engineering technology or nautical science,
- Category C: applicants holding a Canadian or non-Canadian diploma similar to an accredited or Transport Canada approved Marine Institute diploma in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology,
- Category D: applicants holding a Transport Canada Certificate of Competency at the Master Mariner, Fishing Master First Class or Engineering First Class level or equivalent,
- Category E: applicants holding a Transport Canada Certificate of Competency at the Master, Intermediate Voyage level or equivalent,
- Category F: applicants holding a Transport Canada Certificate of Competency at the Engineering Second Class level or equivalent,
- Category G: applicants who have Canadian Forces (Naval Operations) training of a type and at a level acceptable to the Admissions Committee.

3. Applications to the program will be considered by the appropriate admissions committee(s).

4. In accordance with the **UNIVERSITY REGULATIONS - Residence Requirements - Second Degree**, students completing the Bachelor of Maritime Studies program, as a second degree, must complete a minimum of an additional 9 credit hours beyond a first degree and the work completed as required for admission to this degree.

4.3 Admission Requirements for Applicants to the Bachelor of Technology Program

1. An applicant must submit a form for admission/readmission to the University. This application must include all required documentation including proof of the diploma or certificate required for admission in a specific category.

2. Categories for admission to the Bachelor of Technology Program

Applicants must meet the regular admission requirements of the University and be eligible for admission in one of the following categories:

- Category A: applicants holding a diploma of technology accredited by the Canadian Medical Association (CMA),
- Category B: applicants holding a diploma of technology in engineering/applied science technology accredited by the Canadian Technology Accreditation Board (CTAB),
- Category C: applicants holding a diploma of technology comparable to a Marine Institute or College of the North Atlantic three-year CTAB accredited diploma in engineering/applied science technology,
- Category D: applicants holding a diploma of technology comparable to a College of the North Atlantic three-year CMA accredited diploma.

3. Upon acceptance into the program, students will be admitted to one of the two options: the Engineering and Applied Science Technology Option or the Health Sciences Technology Option. Students may be permitted to change their option with the approval of the Marine Institute Committee on Undergraduate Studies.

4. Applications to the program will be considered by the appropriate admissions committee(s).

5. In accordance with the **UNIVERSITY REGULATIONS - Residence Requirements - Second Degree**, students completing the Bachelor of Technology program, as a second degree, must complete a minimum of an additional 9 credit hours beyond a first degree and the work completed as required for admission to this degree.

5 Degree Program Regulations

5.1 Bachelor of Maritime Studies

- Students must complete 39 credit hours in addition to the work which was required under their category of admission.
- The required and elective courses are listed in **Table 1 Bachelor of Maritime Studies - Course Requirements For All Students**. These courses may have prerequisites which have to be met.
- Students admitted to the program in certain categories may have to complete additional requirements. These are listed in **Table 2 Bachelor of Maritime Studies - Additional Requirements Based on Category of Admission**.
- When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission students must take an additional elective University course(s).
- To meet the academic requirements for a Bachelor of Maritime Studies a candidate shall successfully complete the following program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree.
- Students must take 39 credit hours with 21 credit hours from the required courses and 18 credit hours from the electives.
- At least one elective must be chosen from each of the groups A and B.

Table 1 Bachelor of Maritime Studies - Course Requirements for All Students

Required Courses	Group A Electives	Group B Electives
Business 1000 3 credit hours in English at the 1000 level MSTM 4001 MSTM 4004 MSTM 4040 MSTM 4060 or an additional 3 credit hours in English at the 1000 level MSTM 4100 MSTM 4200	Business 1101 or 2102 Business 4000 MSTM 4002 MSTM 4005 MSTM 4011 MSTM 4012 MSTM 4013 MSTM 4020 MSTM 4050 MSTM 4080 Statistics 2500	Economics 2010 Economics 2020 Economics 3030 Economics 3360 Geography 3510 Geography 4410 MSTM 4030 Philosophy 2801 Political Science 3210 Political Science 4200 Sociology 2120 Sociology 3120

Table 2 Bachelor of Maritime Studies - Additional Requirements Based on Category of Admission

Category of Admission	Additional Requirements
A: Students holding a diploma from the Marine Institute in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology.	No additional requirements.
B: Students holding a Canadian Technology Accreditation Board accredited, or Transport Canada approved, diploma in marine engineering technology or nautical science.	No additional requirements, with the possible exception of course prerequisites.
C: Students holding a Canadian or non-Canadian diploma similar to an accredited or Transport Canada approved Marine Institute diploma in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology.	May have to complete additional requirements.
D: Students holding a Transport Canada Certificate of Competency at the Master Mariner, Fishing Master First Class or Engineering First Class level or equivalent.	No additional requirements, with the possible exception of course prerequisites.
E: Students holding a Transport Canada Certificate of Competency at the Master, Intermediate Voyage level or equivalent.	Either: <ul style="list-style-type: none"> • Transport Canada - Ship management 093 (Master Mariner) or • Both of: Marine Institute Business and Organizational Management 3114 and Marine Institute Business and Organizational Management 3204. The prerequisite(s) for Business and Organizational Management 3204 will be waived.
F: Students holding a Transport Canada Certificate of Competency at the Engineering Second Class level or equivalent.	Transport Canada - Applied Mechanics (1st Class) Transport Canada - Thermodynamics (1st Class) Transport Canada - Electrotechnology (1st Class)
G: Students who have Canadian Forces (Naval Operations) training of a type and at a level acceptable to the Admissions Committee.	May have to complete additional requirements.

5.2 Bachelor of Technology

Students must complete 39 credit hours in addition to the work which was required under their category of admission.

The required and elective courses are listed in **Table 3 Bachelor of Technology - Engineering and Applied Science Technology Option** and **Table 4 Bachelor of Technology - Health Science Technology Option**. These courses may have prerequisites which have to be met.

When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission, students must take an additional elective(s) in the Bachelor of Technology program.

To meet the academic requirements for a Bachelor of Technology a candidate shall successfully complete the program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree.

5.2.1 Bachelor of Technology - Engineering and Applied Science Technology Option

- Students must take 39 credit hours with 24 credit hours from the required courses and 15 credit hours from the electives.
- At least one elective must be chosen from each of the groups A and B.

Table 3 Bachelor of Technology - Engineering and Applied Science Technology Option

6 Waiver of Degree Program Regulations

Students requesting waiver of University academic regulations should refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**. Every student also has the right to request waiver of degree program regulations.

6.1 General Information

- The Marine Institute reserves the right in special circumstances to modify, alter, or waive any Marine Institute regulation in its application to individual students where merit and equity so warrant, in the judgement of the Committee on Undergraduate Studies of the Marine Institute.
- Students requesting a waiver of a Marine Institute regulation must submit their request in writing to the head of the program who will forward a recommendation to the Chair of the Committee on Undergraduate Studies of the Marine Institute. Medical and/or other documentation to substantiate the request must be provided.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

7 Appeal of Regulations

Any student whose request for waiver of Marine Institute regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Regulations**.

8 Course Descriptions

All courses of the Marine Institute degree programs are designated as MSTM (Maritime Studies/Technology Management).

4001 The Organization and Issues of Shipping will provide students with knowledge of the economic shipping environment with respect to Canada. The course will develop an understanding of basic trade theory, patterns of trade and sea routes, commodities traded by sea, and the organizational structure of shipping companies.

CR: the former Engineering 8065; Maritime Studies 4001

4002 The Business of Shipping will provide students with an understanding of financial statements, costs, revenues and financial performance of shipping companies as well as computing, voyage and annual cashflows. The course will develop an understanding of marine insurance and forecasting, and risk management.

PR: MSTM 4001

4004 Marine Environmental Management will introduce students to the requirements for the safe management of the marine environment. The course will introduce major environmental problems and identify the major threats to the marine environment. It will provide a working knowledge of these threats and consider the possible counter measures that may be employed by employees in the marine industry.

PR: Admission to the Bachelor of Maritime Studies program

4005 Trends and Issues in International Shipping will provide students with an understanding of how regulatory bodies and their legislation have evolved to affect the modern seafarer trading internationally. This course will develop an understanding of the various rules and regulations dealing with Classification, ISM, MAPROL, SOLAS and SIRE inspections which have to be dealt with on a daily basis at sea.

PR: Admission to the Bachelor of Maritime Studies program

4010 Assessment and Implementation of Technology (formerly Technology 4010) examines the effects of technology on the physical, socio-economic, historic, cultural and aesthetic environments. The course also addresses relevant legislation, the generation and evaluation of project/product alternatives, and the prediction, verification and mitigation of technological effects.

CR: the former Technology 4010

4011 Introduction to Intellectual Property and its Management is an introductory course to the management of Intellectual Property Rights (IPRs). This course will cover the philosophical rationale for intellectual property rights, its technical and legal considerations, its implications to the development of science and technology and its economic impact in society.

PR: Admission to the Bachelor of Technology or the Bachelor of Maritime Studies program

4012 Occupational Health and Safety Legislation and Management is an introduction to occupational health and safety issues in a technical/industrial context. Students will gain a knowledge and understanding of the legislative framework surrounding occupational health and safety, the assignment of responsibilities in the workplace, the management of occupational health and safety in the workplace and the importance of establishing a positive safety culture.

PR: Admission to the Bachelor of Technology or the Bachelor of Maritime Studies program

4013 Structure and Functions of Technology-based Organizations focuses on the emergence of technology-based companies with an emphasis on how we can implement methods to increase their organizational effectiveness. This course will concentrate on the integration of three basic frameworks that are integral to production and performance in the 21st century. It will introduce students to the concepts and processes materializing in a technological milieu. This course also deals with the study of technological economics, organizational progression, structural configurations and operations, and universal and contemporary approaches to organizational design. In addition it will examine the challenges of change that face highly dynamic industries: individual & organizational change, technological change, and national & global change. This course will also examine specialized topics in structure evolution for technology-based organizations with an emphasis on the need for adaptability, innovation & global communications.

PR: Admission to the Bachelor of Technology or the Bachelor of Maritime Studies program

4014 Technology and the Environment will help students critically examine technology and the environment and how the two are linked. Topics may include how technology is both the cause of and solution to many environmental problems, the greenhouse effect, renewable energy vs. fossil fuels, recycling vs. landfills, the efficiency paradox, geo-engineering, and other select current topics.

PR: Admission to the Bachelor of Technology program

4020 Economic Management for Technologists (formerly Technology 4020) provides an introduction to the economics of technological projects. Students will study the mathematics of money, cost composition, and project evaluation, including cost comparison. They will also learn to analyse projects for decision making, including risk assessment and replacement analysis. In addition, they will learn to use suitable criteria for project selection, and to conduct sensitivity analysis.

CR: Engineering 4102; the former Technology 4020

PR: Admission to the Bachelor of Technology or the Bachelor of Maritime Studies program

4030 Technology in the Human Context (formerly Technology 4030) examines technology in the historical context and technology in the modern era. Students will discuss human insights, innovation, the interactions between development and technology transfer, ethics and professionalism and how to develop a technology value system.

CR: the former Technology 4030

4040 Project Management for Technologists (formerly Technology 4040) will introduce the student to the interdisciplinary field of project management. The course covers the interpersonal skills necessary to successfully lead or work effectively within a project team as well as providing an overview of certain planning and scheduling tools and techniques necessary for the planning and monitoring of projects.

CR: the former Technology 4040

4050 Introduction to Quality Management (formerly Technology 4050) will provide students with an understanding of the philosophy and concepts involved in the total quality approach to quality management. The course covers the various tools and techniques used in quality management as well as providing an overview of the role of management.

CR: the former Technology 4050

4060 Advanced Technical Communications will enhance the technical communication skills of students. The course content examines technical writing fundamentals; information gathering, analysis, and documentation; proposal preparation; technical document applications; technical report preparation; graphics preparation; and technical presentations. The course will provide students with the knowledge and skills necessary to develop proposals, reports, and presentations for technical projects.

4070 Special Topics in Technology will provide the opportunity for students to maintain technical currency through a review of recent advances in technology and their application to particular technical areas.

PR: Admission to the Bachelor of Technology Program and MSTM 4060

4080 Environmental Management System (formerly MSTM 4003) will provide students with a knowledge and understanding of international standards for environmental management. The course will develop an understanding of the ISO 14000 standard, its requirements and the process for establishing an environment management system (EMS). The course will include a consideration of the documentation and other requirements for ISO 14000 registration.

CR: the former MSTM 4003

4090 Introduction to Technology will provide a broad survey of practices critical to operating a technology-based business. Topics covered may include an introduction to technology management, historical developments in the management of technology, the functions of technology management, and select current topics that are relevant to operating technology-based businesses.

PR: Admission to the Bachelor of Technology program

4100 Technical Project and Report I (formerly Maritime Studies 4000 and Technology 4000) requires the student to identify a research topic in a specialty area, write a concept paper and develop a proposal to be carried out in MSTM 4200. In addition, the course offers an opportunity to improve time management, critical thinking, project management, problem solving, and reading/writing skills as related to the research process.

CH: 1

CO: MSTM 4060 or second English course at the 1000 level

CR: the former Maritime Studies 4000; the former Technology 4000

PR: MSTM 4060 or second English course at the 1000 level

4200 Technical Project and Report II (formerly Maritime Studies 4000 and Technology 4000) provides a link between the other courses of the program and the technical component from the diploma program. Students will carry out an in-depth study of the topic identified in MSTM 4100. Students will fully document and present their findings through the writing of a formal technical report.

CH: 2

CR: the former Maritime Studies 4000; the former Technology 4000

PR: MSTM 4100

9 Maritime Studies/Technology Management (MSTM) Courses Available to Students not Enrolled in a Degree Program Offered by the Fisheries and Marine Institute

Students not in a degree program offered by the Marine Institute may register in courses from the following list if space is available.

- 4001 The Organization and Issues of Shipping
- 4010 Assessment and Implementation of Technology
- 4030 Technology in the Human Context
- 4040 Project Management for Technologists
- 4050 Introduction to Quality Management
- 4060 Advanced Technical Communications
- 4080 Environmental Management System

Almatarneh, M.H., B.Sc., M.Sc. *Utah*, Ph.D. *Memorial*; Visiting
 Assistant Professor, Environmental Science and Chemistry
 Campbell, C.E., B.Sc. *British Columbia*, M.Sc. *Alberta*, Ph.D.
Memorial; Associate Professor, Environmental Science and
 Biology; Head, Division of Science
 Abhyankar, S.B., B.Sc., M.Sc. *Bombay*, M.S., Ph.D. *Florida State*,
 M.C.I.C.; Associate Professor, Environmental Science and
 Chemistry
 Aleksejevs, A., B.Sc., M.Sc. *Latvian State*, Ph.D. *Manitoba*;
 Associate Professor, Physics and Mathematics
 Bowers, W.W., B.Sc. *Memorial*, Ph.D. *Simon Fraser*; Professor,
 Environmental Science and Biology
 Churchill, D., B.Sc.(Hons) *Memorial*, M.Sc., Ph.D. *Queen's*;
 Adjunct Professor, Environmental Science and Chemistry
 Doucet, C., B.Sc. *Concordia*; M.Sc. *Guelph*; Adjunct Professor,
 Environmental Science
 Dust, J.M., B.Sc.(Hons.) *Waterloo*, M.Sc. *Dalhousie*, Ph.D.
Queen's; M.C.I.C.; Associate Professor, Environmental Science
 and Chemistry
 Forbes, D., B.Sc. *Lyndon State*, M.Sc. *St. Mary's*, Ph.D. *Victoria*;
 Professor, Physics; Winner of the President's Award for
 Outstanding Research, 1993-1994
 Gallant, R., B.Sc.(Hons.) *Memorial*, M.Sc., Ph.D. *Waterloo*;
 Assistant Professor, Mathematics
 Gunther, G., B.Sc., M.Sc., Ph.D. *Toronto*; Professor, Mathematics;
 Winner of the President's Award for Distinguished Teaching,
 1994-95; Program Chair of General Science
 Howell, J.A.J. B.Sc., M.Sc. *Memorial*, Ph.D. *Victoria*; Visiting
 Assistant Professor, Mathematics
 Iams, W.J., B.A. *Johns Hopkins*, M.Sc. *Dalhousie*, Ph.D. *Memorial*;
 Associate Professor, Environmental Science, Earth Science and
 Environmental Studies; Winner of the Sir Wilfred Grenfell
 College Teaching Award, 2006
 Knight, T.W., B.Sc.(Hons.) *Guelph*, M.Sc. *Lakehead*, Ph.D.
Memorial; Adjunct Professor, Environmental Science

Krishnapillai, M., B.Sc.(Agric.), M.Phil. *Peradeniya*, Ph.D.
Manitoba; Associate Professor, Environmental Science and
 Earth Science; Program Chair of Environmental Science
 Liu, C., B.Eng. *Beijing University of Chemical Technology*, M.Sc.
Central Michigan, Ph.D. *Florida*; Visiting Assistant Professor,
 Environmental Science and Chemistry
 Moroni, M.T., B.Agr.Sci.(Hons.), Ph.D. *Tasmania*; Adjunct
 Professor, Environmental Science
 Ncube, I., M.Sc. *Witwatersrand*, Ph.D. *Waterloo*; Assistant
 Professor, Mathematics
 Parkinson, D-R., B.Sc. *Brock*, Ph.D. *London*, M.C.I.C.; Associate
 Professor, Environmental Science and Chemistry
 Porter, N.J., B.A. *Nipissing*, M.Sc., Ph.D. *Windsor*; Visiting
 Assistant Professor, Earth Science
 Rayner-Canham, G.W., B.Sc. *London*, D.I.C. *Imperial College*,
 Ph.D. *London*, F.C.I.C.; Professor, Environmental Science and
 Chemistry; Winner of the Sir Wilfred Grenfell College Teaching
 Award, 2003; Winner of the President's Award for Distinguished
 Teaching, 2005-2006
 Rouleau, P., B.Sc. *UQAM*, Ph.D. *Alberta*; Associate Professor,
 Environmental Science and Physics; Coordinator of Engineering
 One
 Sircom, J.P., B.Sc. *Acadia*, M.Sc., Ph.D. *Dalhousie*; Visiting
 Assistant Professor, Environmental Science and Biology
 Sodhi, A., B.Math. *Waterloo*, M.Sc., Ph.D. *Queen's*; Associate
 Professor, Mathematics and Computer Science
 Sodhi, P., B.Sc., M.Sc. *Punjab University*, M.Sc. *TUNIS*, Ph.D.
Guelph; Visiting Assistant Professor, Biology
 Sveshnikov, D., M.Sc. *M.V. Lomonosov Moscow State University*,
Russia, Ph.D. *Christian-Albrechts-University of Kiel*, Germany;
 Assistant Professor, Environmental Science and Biology
 van Zyll de Jong, M.C., B.Sc. *Toronto*, M.Sc., Ph.D. *Hull*; Adjunct
 Professor, Environmental Science
 Vasilyev, Y., B.Sc., M.Sc. *Novosibirsk State*, Ph.D. *Notre Dame*;
 Associate Professor, Mathematics
 Warkentin, I.G., B.Sc., Ph.D. *Saskatchewan*; Professor,
 Environmental Science and Biology

Division of Social Science

Wright, S.L., B.A. (Hons.), M.Sc. *Simon Fraser*, Ph.D. *Dalhousie*;
 Associate Professor, Psychology; Head, Division of Social
 Science
 Addo, E., B.A.(Hons.)(Geography & Archaeology) *University of*
Ghana, M.A.(Geography) *University of Regina*, M.A.(Political
 Science) *University of Toronto*, Ph.D.(Regional Economic
 Development Planning) *University of Sheffield*,
 Cert.(Hons.)(International Development Studies) *University of*
Oslo, Dip.(Hons.)(Tourism & Computer Applications) *Toronto*
School of Business, *Ottawa*; Assistant Professor, Tourism
 Bodner, J.M., B.A. *Trent*, M.A., Ph.D. *Memorial*; Assistant
 Professor, Folklore and Social/Cultural Studies
 Buckle, J.L., B.Sc.(Hons.) *Acadia*, M.A., Ph.D. *York*; Assistant
 Professor, Psychology
 Cake, L.J., B.A. *Queen's*, M.Sc. *Memorial*, Ph.D. *Queen's*;
 Honorary Research Professor, Psychology
 Carroll, D.A., B.P.E. *Memorial*, M.A. *Alberta*; Associate Professor,
 Human Kinetics and Recreation and Environmental Studies
 Carter, A.V., B.A. (Hons.) *Ottawa*, M.A. *Carleton*, Ph.D. *Cornell*,
 Assistant Professor, Political Science and Environmental
 Studies; Environmental Policy Institute
 Corbin Dwyer, S., B.A.(Hons.), B.Ed. *Memorial*, M.Ed. *Dalhousie*,
 Ph.D. *Calgary*; Professor, Psychology; Chair of Psychology
 Program
 Croll, M.C., B.A. *Mount St. Vincent*, M.A. *Dalhousie*, M.Ed.
University of New Brunswick, Ph.D. *University of Stirling*;
 Associate Professor, Anthropology and Sociology, Social/
 Cultural Studies; Chair of Social/Cultural Studies Program
 Duffy, J., B.A., M.A. *Carleton*, Ph.D. *York*; Professor, Psychology
 Eddy, B., B.Sc. (Hons.) *Acadia*, M.Sc. *Ottawa*, Ph.D. *Carleton*;
 Adjunct Professor, Sustainable Resource Management
 El Dessouky, N.F., B.Sc. *Sadat Academy for Management*
Sciences, M.Sc. *Cairo*, Ph.D. *Université du Québec à Montréal*;
 Adjunct Professor, Environmental Studies, Environmental Policy
 Institute
 Emke, I., B.A. *Ohio State*, M.A. *Windsor*, Ph.D. *Carleton*;
 Associate Professor, Anthropology and Sociology
 Haghiri, M., B.Sc., M.Sc. *University of Tehran*, Ph.D. *University of*
Saskatchewan; Associate Professor, Economics
 Iankova, K., B.A. *University of Veliko Tarnovo*, M.A. *Sofia*
University, Ph.D. *Université du Québec à Montréal*; Adjunct

Professor, Tourism Program
 Kelly, E., B.A. *Whitman*, M.A., Ph.D. *Oregon State*; Post-Doctoral Fellow, Environmental Policy Institute
 Klassen, D.H., B.A. *Wilfred Laurier*, M.A. *Manitoba*, Ph.D. *Indiana*; Associate Professor, Folklore and Social/Cultural Studies
 Klinke, A., M.A. *University of Stuttgart*, Ph.D. *Technical University of Darmstadt*; Associate Professor, Political Science and Environmental Studies; Environmental Policy Institute
 Krachun, C., B.A.(Hons.) *Memorial*, M.A., Ph.D. *Carleton*; Visiting Assistant Professor, Psychology
 Lam, J., B.Sc. *British Columbia*, M.Sc. *McGill*, M.B.A., Ph.D. *Concordia*; Assistant Professor, Business
 Levesque, M., B.A. (Hons.), M.A. *Western Ontario*, Ph.D. *McMaster*, Assistant Professor, Political Science and Environmental Studies, Environmental Policy Institute
 Luther, J.E., B.Sc. (Hons.), M.Sc. *Memorial*; Professional Associate, Sustainable Resource Management
 Mintz, E.P., B.A. *British Columbia*, M.A. *York*; Honourary Research Professor, Environmental Studies
 Monteith, G.R., B.A. *Western Ontario*, M.B.A. *McMaster*, B.Ed. *Toronto*; Lecturer, Business
 Nicol, K.S., B.A., M.Sc. *British Columbia*; Associate Professor, Geography and Environmental Studies
 Novakowski, N., B.A. *Toronto*, M.A., Ph.D. *Ottawa*; Associate Professor, Geography and Environmental Studies
 Okech, R.N., B. Comm. *Marathwada University*, M.A. *Institute for Social Sciences and Research Vellore*, Ph.D. *University of KwaZulu-Natal*; Assistant Professor, Tourism; Chair of Tourism Studies Program
 Otto, R.D., B.Sc. *Acadia*, M.Sc.F. *University of New Brunswick*; Professional Associate, Sustainable Resource Management
 Pitcher, J.B., B.A., M.B.A. *Memorial*; Assistant Professor, Business; Winner of the Grenfell Campus Teaching Award, 2011
 Riehl, M.K., B.A., M.A. *Alberta*; Lecturer, Sociology, Social/Cultural Studies
 Robinson, A., B.A., M.Phil., M.A. *Memorial*, Ph.D. *McMaster*; Assistant Professor, Anthropology
 Ryan, J.L., B.Comm.(Hons.)(Co-op) *Memorial*, M.B.A. *Dalhousie*; Lecturer, Business; Chair of Business Administration; Chair of

Business Administration Program
 Sabau, G.L., B.A., Ph.D. *Academy of Economic Studies, Bucharest*; Associate Professor, Economics and Environmental Studies; Chair of Environmental Studies Program
 Savic, I., B.Comm. *Toronto*, M.A. *Columbia*; Assistant Professor, Political Science and Environmental Studies
 Scott, R.J., B.Sc.(Hons.) *Western Ontario*, M.Sc. *Guelph*, Ph.D. *Clark University*; Assistant Professor, Sustainable Resource Management; Chair of Sustainable Resource Management Program; Cross appointment with Environmental Science Program
 Stewart, P.C., B.A.(Hons.) *Memorial*, Ph.D. *McMaster*; Assistant Professor, Psychology
 Walsh, J.S., B.A.(Hons.) *Memorial*, LL.B. *New Brunswick*, M.B.A. *Memorial*; Assistant Professor, Business
 Warren, K.L., B.A. (Hons.) M.Sc., Ph.D. *Memorial*; Assistant Professor, Psychology
 Wood, G.A., B.P.E., B.Ed. *Memorial*, M.A., Ph.D. *Alberta*; Adjunct Professor, Tourism Program
 Wu, J.H., B.Sc., M.Sc. *Nanjing University*, Graduate Certificate in GIS *University of Southern California*, Ph.D. *McGill*; Assistant Professor, Sustainable Resource Management

Cross Appointments

Baehre, R., B.A., M.A., M.Phil. *Waterloo*, Ph.D. *York*; Associate Professor, Historical Studies; Cross appointment with Social Cultural Studies Program
 Bowers, W.W., B.Sc. *Memorial*, Ph.D. *Simon Fraser*; Professor; Environmental Science and Biology; Interim Director of Environmental Policy Institute; Cross appointment with Sustainable Resource Management
 Klein, R.A., B.S. *Arizona State*, M.S.W. *University of Maryland*, M.A., Ph.D. *Syracuse*; Graduate Officer; Cross Appointment with Tourism Studies
 Newton, M.C., Cert. of Education *King Alfred's College*, B.A., M.A., Ph.D. *McMaster*, Professor, Religious Studies; Cross appointment with Environmental Studies; Winner of the Sir Wilfred Grenfell College Teaching Award, 2008

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 General Information

Grenfell, a campus of Memorial University of Newfoundland, was established in September 1975. In 1979 it was named Sir Wilfred Grenfell College honouring the memory of the medical missionary who pioneered medicine in northern Newfoundland and along the coast of Labrador until his death in 1940. In 2010, it was renamed Grenfell Campus, Memorial University of Newfoundland.

Four year degree programs in arts, science, business administration, fine arts, nursing and resource management may be completed at the Grenfell Campus. The Bachelor of Arts degree is available in English, environmental studies, historical studies, humanities, psychology, social/cultural studies and tourism studies and the Bachelor of Arts (Honours) may be obtained in psychology. The Bachelor of Science and Bachelor of Science (Honours) are offered in environmental science, general science, and psychology, and the University's four year Bachelor of Nursing degree is offered in conjunction with the Western Regional School of Nursing in Corner Brook. Bachelor of Fine Arts degrees are conferred in visual arts and theatre. These programs are different from programs offered on the St. John's campus and most are available only at the Grenfell Campus.

Students at Grenfell Campus may also complete the first year requirements of several programs offered at the St. John's Campus. It is recommended that students meet with an academic adviser concerning course selection for specific programs.

Students have the option of completing distance and web-based credit courses offered by Distance Education, Learning and Teaching Support (DELTS) at Memorial University of Newfoundland. As well, the Division of Community Education and College Relations also offers a wide variety of non-credit courses to the students at the Campus and to the general public.

The Campus affords a spectacular view of the city of Corner Brook and the scenic Bay of Islands. The Arts and Science Building houses administrative and academic units, a bookstore, an athletics and recreation wing, a student residence and the Student Centre. The Library and Computing Building includes the Ferriss Hodgett Library, a computer lab and a high tech lecture theatre. The Fine Arts Building contains facilities for students of theatre and visual arts, the Campus community and the general public. It features a 225 seat "black box" theatre, dressing rooms, scenery, costume and properties workshops, as well as an actors' green room and a rehearsal hall. The Fine Arts Building also includes an art gallery, art storage vault, studios for drawing, painting, sculpture, multi-media and photography, darkrooms, and workshops for lithography, intaglio and serigraphy. The Forest Centre is a shared facility housing classroom, laboratory and research facilities for the Campus as well as the Newfoundland Division of the Canadian Forestry Service. All campus buildings are connected, mostly by skywalks.

Additional information regarding the Grenfell Campus is available at www.Grenfell.mun.ca/Pages/default.aspx.

2.1 Student Services

Student Services promotes the intellectual, social, spiritual, and physical development of all students. By advocating for students, providing the highest quality service and involving students in leadership roles, Student Services strives to help students realize their full potential - to become successful students, caring individuals, and productive citizens.

The department offers many programs and services which promote student development, such as student employment, leadership development, scholarships, orientation, recreation and wellness, academic support, and student housing.

Student Services is located in the Student Services Centre, AS234 at Grenfell Campus. Further information may be obtained by telephone to (709) 637-6232, or by e-mail at saffairs@Grenfell.mun.ca, or through the website at www.Grenfell.mun.ca/student.

2.2 The Learning Centre

One of the most utilized components of Student Services is the Learning Centre, the Grenfell Campus one-stop shop for academic support. Staff in the Centre assist students with writing, math, and study skills. Peer tutoring and supplemental instruction are available to students free of charge. Career services provides students with career development, experiential workplace learning, and employee networking for students and alumni.

The co-ordinator of the Learning Centre is also responsible for helping students who require accommodations because of a disability.

The Learning Centre is located in AS 235. Further information may be obtained by contacting the Centre by telephone to (709) 637-6268 or through the website at www.Grenfell.mun.ca/centre.

2.3 Student Housing

Student Housing currently offers accommodation for 400 students in a suite-style residence and chalet apartments. The suite-style residence is mainly for first-year students while the chalet-style apartments are mainly for students beyond first-year and families. In each apartment, four students share a living room, kitchen and one-and-a-half baths and have his/her own room. Individual phones and Internet ports are provided.

Student Housing facilitates a variety of programs and activities to meet the diverse interests of residents and encourages students to get involved.

The off-campus office assists students seeking accommodation in the Corner Brook area. An online database of boarding houses/apartments is available. The office also offers services and programs throughout the year for students living off campus.

Further information may be obtained by telephone to (709) 637-6266, or by e-mail at resinfo@Grenfell.mun.ca, or through the website at www.Grenfell.mun.ca/res/Pages/default.aspx, or at the Housing Office at Residence Room 221.

2.4 Recreation and Wellness

Grenfell Campus offers a distinctive program of recreation and wellness activities that contributes to the well being and personal and social development of students. The Campus has a 25 metre pool, a gymnasium and an outdoor multi-use court. Through a partnership with the Pepsi Centre, students are able to access a fitness facility, ice rinks and a walking track. Students also have the opportunity to use various recreational facilities in the region and participate in a variety of recreation programs such as intramural sports, step aerobics, and "learn to" programs (downhill skiing, kayaking and swimming).

Through a partnership with the Western Regional School of Nursing, a Wellness Centre operates at Grenfell Campus on a part-time basis during the academic year. The role of the Wellness Centre is to enhance education and awareness of various lifestyles, health and well-being issues relevant to students at the University.

The role of the centre is to enhance education and awareness of various lifestyle, health and well-being issues relevant to students at university.

2.5 Grenfell Campus Student Union

The Grenfell Campus Student Union (GCSU), Local 36, CFS, represents students' interests to the Campus administration and on a provincial and national level through the Canadian Federation of Students. The GCSU also promotes artistic, literary, educational, social, recreational, charitable, and sporting activities for the enhancement of the students of the Campus.

All full and part-time students pay GCSU fees and upon registration become members of the Grenfell Campus Student Union.

2.6 Counselling Services

The Campus has two professional counsellors available to assist students with their concerns. The counsellors provide a free and confidential service that includes career, academic, and personal counselling. The counsellors meet with their clients individually and assist them with a wide range of concerns. When necessary, the counsellors can arrange referrals to other professionals in the community.

2.7 Library

Small branch, big collection! The Ferriss Hodgett Library is one of five libraries that make up the Memorial University of Newfoundland Libraries system. It provides local personalized service and a core collection of over 120,000 books, 200 print journal subscriptions, and other materials, combined with access to a much larger collection of print and online resources. Over 1,000,000 books and articles can be requested from the St. John's campus, and if it's not available through Memorial University of Newfoundland, can be obtained from other libraries worldwide.

Everyone is always welcome in the Library, but for those who like to research after hours or from the comfort of dorms or homes, remote access to the Library catalogue, over 20,000 e-books, 200 article databases, and 26,000 e-journals is available 24/7, making library research easier than ever. The Library also provides equipment loans to support emerging research needs such as eBook readers, digital voice recorders, portable DVD players, and more.

The Library has an Information Commons, with computers providing access to the Library's online resources (like e-journals and e-books), Internet, email, MS Office, and other software. Students can bring their laptops into the Library and access all online services using the campus wireless network. There are a variety of study spaces, from group study rooms to individual study carrels and laptop chairs.

A full range of public services are offered including research assistance, tours, library instruction classes, and support for copyright enquiries.

2.8 Statement of Academic Purpose

Grenfell Campus, as part of Memorial University of Newfoundland, is a four year undergraduate degree granting institution offering a liberal education in arts and science and a professional education in nursing, theatre and visual arts. In addition, the Campus continues to accommodate students who wish to complete their degrees at Memorial University of Newfoundland in St. John's or at universities

elsewhere.

At Grenfell Campus a liberal education means a critical and open-minded pursuit of knowledge providing students with the intellectual tools to enable them to respond to a rapidly changing world. A liberal education marks the start of preparation for a career and it may lead to graduate work in a number of fields. In a broader sense it is intended to build a foundation for social, cultural and recreational interests that will help students move toward a meaningful personal and professional life. Academically, the aim of Grenfell Campus is to enable students to be open to new ways of thinking and to gain a lasting intellectual self-confidence so that they may have both the ability and the desire to be life-long learners.

At Grenfell Campus the goal of high quality education is reflected in the following commitments:

1. to teach students in a variety of challenging contexts and in general provide them with a personalized learning environment;
2. to maintain high academic standards;
3. to foster excellence in teaching, to encourage scholarship, research, performance and artistic endeavour, and to engage students, where appropriate, in these activities.

3 Grenfell Campus Core Program Requirements

Students completing the Bachelor of Arts, Bachelor of Business Administration, Bachelor of Resource Management, and Bachelor of Science degree programs at Grenfell Campus must complete Core program requirements as follows:

1. Literacy Requirement

Thirty credit hours in Writing courses which must include 6 credit hours in first-year English. Up to 6 credit hours in languages other than English may be used to satisfy the literacy requirement. Courses in this group are identified with the designation W and are listed in the table, **Designated Writing Courses (W)**.

Courses in this category must either be completed through on-campus offerings at Grenfell Campus or be demonstrated to be equivalent to Grenfell writing courses.

2. Quantitative Reasoning and Analysis Requirement

Six credit hours in Quantitative Reasoning and Analysis courses. Courses in this group are identified with the designation QRA and are listed in the table, **Designated Quantitative Reasoning and Analysis Courses (QRA)**.

3. Breadth of Knowledge Requirement

Six credit hours from each of the three groups identified below for a total of 18 credit hours. The courses chosen can be any courses within the disciplines identified. However, students are not permitted to use these courses to meet the Quantitative Reasoning and Analysis requirement nor the first-year English requirements.

- Group A: Art History, Classics, English, History, Humanities, Languages, Philosophy, Religious Studies, Theatre, Visual Arts
- Group B: Anthropology, Business, Economics, Education, Environmental Studies, Folklore, Gender Studies, Geography, Human Kinetics and Recreation, Political Science, Psychology, Sociology, Sustainable Resource Management, Tourism Studies,
- Group C: Biology, Biochemistry, Chemistry, Computer Science, Earth Sciences, Environmental Science, Mathematics, Physics, Science

3.1 Designated Writing Courses (W)

Anthropology: 2240, 2300, 2500, 3080, 3083, 3140, 3520, 3525, 4072, 4440
Biology: 2040, 2041, 2122, 2600
Business: 1210, 2000, 2010, 2210, 2808, 3310, 5220, 6500, 6800, 7000, 7010, 7025, 7050, and 7600
Chemistry: 2210
Classics: 1100, 1120, 1121, 1200, 2010, 2015, 2020, 2035, 2040, 2055, 2060, 2701, 2800, 2801, 3010, 3020, 3110, 3111, 3130
Earth Science: 2914, 2915
English: All English courses listed with the Grenfell Campus English Program and English 2010
Environmental Science: 2370, 2371, 3131, 3210, 3211, 3260, 4000, 4133, 4950, 4951, 4959
Environmental Studies: 4000, 4950
Folklore: 1000, 1050, 2000, 2300, 2401, 2500, 2600, 3130, 3200, 3300, 4072, 4440
Forestry: 3000, 3200
French: 2100, 2101, 2601, 2602, 3100, 3101
Gender Studies: 2001
Geography: 2001, 2302
History: All History courses listed with the Grenfell Campus Historical Studies Program
Human Kinetics and Recreation (HKR): 2300, 3330, 3340, 3350, 3410
Humanities: 1001, 1002, 2002, 2001, 2002, 2010, 3001, 3002, 3010, 3020, 3021, 4001, 4010, 4950
Mathematics: 2130
Philosophy: 1001, 1200, 1600, 2200, 2220, 2230, 2551, 2561, 2581, 2701, 2702, 2800-2810, 3120, 3150, 3160, 3400, 3500, 3600, 3610, 3620, 3701, 3730, 3850, 3860, 3940, 4200-4790, 4200, 4250, 4700
Political Science: 1010, 1020, 2000, 2200, 2600, 2711, 3550, 3731
Psychology: 4910, 4925, 4950, 4951, 4959
Religious Studies: 1000, 1010, 1020, 2011, 2013, 2050, 2051, 2610, 3010, 3020, 3030, 3040, 3200, 3401, 3500, 3820, 3831, 3840, 3880
Science: 3000, 3001, 4000, 4950, 4951, 4959
Social/Cultural Studies: 4000, 4100, 4950
Sociology: 2240, 2610, 3140, 3150, 3290, 3395, 4072
Sustainable Resource Management: 2000, 2001, 3000, 3001, 3002, 4001, 4002, 4003, 4010, 4950
Theatre: 1000, 1001
Tourism Studies: 1100, 2000, 3230, 3240, 3800, 4010, 4950
Visual Arts: 2700, 2701, 3620, 3700, 3701, 3702-3721, 3820, 4060, 4700-4729, 4730, 4731, 4740, 4741
University: 1010

Note: Courses will be designated Writing courses by the Academic Studies Committee. A Writing course is a course in which a minimum of 30 percent of the course grade involves a specific component consisting of written work on which students will receive feedback. For the purpose of this regulation, the final examination will not be counted as part of the evaluated Writing component

3.2 Designated Quantitative Reasoning and Analysis Courses (QRA)

Arts Philosophy 2210, 3110
Fine Arts None
Science Biochemistry 1430 Biology 2250, 2600 Chemistry (All courses with the exception of Chemistry 1900) Computer Science (All courses) Earth Science 2150 Environmental Science (All courses with the exception of: 1000, 2360, 2370, 2371, 3072 and 4000) Mathematics (All courses) Statistics (All courses) Physics (All courses)
Social Science Business 1101, 2101, 2400, 3101, 3401, 4500 and 5500 Economics 2010, 2020, 3150 Environmental Studies 2000 Geography 3222 Psychology 2925, 2950, 3950 Sociology 3040 Sustainable Resource Management 4000

Note: Courses will be designated Quantitative Reasoning and Analysis by the Academic Studies Committee. The Quantitative Reasoning and Analysis (QRA) Requirement is intended to help students develop a degree of appreciation of numerical, statistical and/or symbolic modes of representation, as well as an appreciation of the analysis, interpretation and broader quantitative application of such representations.

4 The Bachelor of Arts and Bachelor of Science Degree Programs

Grenfell Campus reserves the right to limit the number of spaces available in each Major/Minor program.

A student may not use the same course to satisfy the requirements for both a Major and a Minor.

Students may devise a Major/Minor of their own choosing in close consultation with a faculty advisor and with approval of appropriate head(s). Such "open" programs must be approved by the Academic Studies Committee.

Course prerequisites may be waived by division heads or program chairs of the disciplines or programs in question. In special circumstances the Academic Studies Committee may waive the requirements that apply to these degree programs.

Courses listed for a Major or for a Minor may require prerequisite courses not listed in the program requirements. Please consult all course descriptions for prerequisites.

4.1 General Regulations

For the Bachelor of Arts and Bachelor of Science degrees at Grenfell Campus students must complete a minimum of 120 credit hours made up of the following components:

1. Core Program Requirements (see above)
2. An approved concentration of courses known as a Major
3. An approved concentration of courses known as a Minor. A Minor is not required for interdisciplinary programs or for Bachelor of Science in Psychology. However, students in such programs may choose to complete a Minor
4. Elective courses

4.2 Major

1. The requirements for a Major can be fulfilled in one of two ways:
 - a. minimum of 36 credit hours in a single discipline or
 - b. minimum of 72 credit hours in an interdisciplinary area

Students choosing a single discipline major (with the exception of Bachelor of Science in Psychology) must complete one of the following: (i) minor or (ii) with the permission of the appropriate program chair(s), a second major.

Actual credit hours required for specific disciplines will vary.
2. All Majors require a minimum of 12 credit hours in 3000-level courses, 6 credit hours in 4000-level courses and 3 credit hours in a 4000-level senior project.
3. A candidate must follow the specific requirements for each major program as set forth in the Grenfell Campus section of the University Calendar
4. Single discipline majors are available in following areas:

Division of Arts: English, Historical Studies, Humanities

Division of Social Science: Psychology (B.A. and B.Sc.); Tourism Studies

Interdisciplinary majors are available in following areas:

Division of Social Science: Environmental Studies, Social/Cultural Studies, Sustainable Resource Management

Division of Science: Environmental Science, General Science

4.3 Minor

A minimum of 24 credit hours must be completed in a single discipline or interdisciplinary area other than that of the Major. Minors are available in the following areas:

Division of Arts: Classics, English, French, Historical Studies, Humanities, Philosophy, Religious Studies

Division of Social Science: Business, Canadian Studies, Economics, Environmental Studies, Folklore, Geography, Psychology, Social/Cultural Studies, Sociology; Tourism Studies

Division of Fine Arts: Art History

Division of Science: Environmental Science, Mathematics, Science

A candidate must follow the requirements for the Minor program as set forth in the Grenfell Campus section of the University Calendar.

As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.

Any student enrolled in the Grenfell Campus B.A. Degree with a Major in English who has completed the B.F.A. (Theatre) Degree at Grenfell Campus will be considered to have fulfilled the requirements for a Minor in Theatre.

4.4 Electives

Courses to make up the total of 120 credit hours, other than those required for the core program and Major/Minor requirements, may be chosen according to the following guidelines:

1. Any courses in arts, social science, science and fine arts
2. Up to 15 credit hours in other subject areas.

4.5 Advice to Students on Planning a Program

When planning the sequence of courses for a Major or Minor Program, students should seek advice from the Office of the Registrar or the appropriate Division Office.

5 Regulations for the Honours Degrees of Bachelor of Arts and Bachelor of Science at Grenfell Campus

Programs are offered leading to the Honours Degrees of Bachelor of Arts and Bachelor of Science. An Honours degree requires, over and above the requirement of the General degree, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to candidates who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program.

5.1 Admission and Registration

1. Admission to the Honours degree is competitive and limited, depending upon available resources. Candidates should consult the criteria established for the program in question. To be considered for admission to an Honours program a candidate shall complete an "Application For Admission to the Honours Program" form. The application must be approved by the Program Chair of the Major before the candidates can be admitted to the program.

A candidate who wishes to enter an honours program is strongly advised to consult the Program Chair at the earliest possible date, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.

2. Students who have been awarded the General Degree of Bachelor of Arts or Bachelor of Science at Grenfell Campus may convert it to an Honours Degree of Bachelor of Arts or Bachelor of Science by following procedure outlined in 1. above.
3. Before registering for any semester or any session, the candidate is strongly advised to consult with the Program Chair on the student's choice of courses. Failure to comply with this requirement may result in denial of access to certain courses.

5.2 Majors

The Honours Degree of Bachelor of Arts is available in Psychology and the Honours Degree of Bachelor of Science is available in Environmental Science, General Science, and Psychology.

5.3 Course Requirements

Candidates for the Honours Degree of Bachelor of Arts or Bachelor of Science shall complete a program of studies which shall consist of not fewer than 120 credit hours subject to the following regulations:

1. All candidates are required to complete the Core Program requirements governing the Bachelor of Arts and Bachelor of Science degrees at Grenfell Campus.
2. All candidates must also submit an Honours thesis or dissertation on an approved topic which may be followed by an oral examination thereon. Two copies of the Honours thesis/dissertation must be submitted to the University Library upon completion. All Honours theses/dissertations in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances which must be approved by the Academic Studies Committee. Copyright remains with the author. A signed release form must accompany a thesis or dissertation when it is submitted to the University Library.
3. Further courses shall be chosen:
 - a. minimum 60 credit hours in the major and, where applicable, not fewer than 24 credit hours in the minor; and
 - b. courses to make up a minimum of 120 credit hours, other than those required for the Core Program, major and minor, shall be chosen as follows:
 - i. any courses in Arts, Science, Social Science and Fine Arts
 - ii. up to 15 credit hours in other subject areas.

5.4 Program Regulations

Candidates for Honours degrees must comply with such additional requirements of the appropriate Program(s) as approved by the Senate and printed in the University Calendar.

5.5 Academic Standing

In order to graduate with an Honours degree, a candidate shall obtain:

1. A grade of 'B' 70% or better, or an average of 75% or higher in the courses that comprise the minimum number of credit hours in the Honours subject(s) prescribed by the program concerned as outlined under the regulations governing specific Honours degree programs, excluding 1000-level courses. Students who wish to fulfil this requirement using repeated or substituted courses must obtain approval of the Program Chair and the Academic Studies Committee. The Honours thesis or dissertation may not be repeated or substituted. A grade of 70% or better must be obtained in the Honours dissertation; and
2. An average of at least 2.75 points per credit hour in the courses required for the degree. (see **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**, for explanation of the point system.)

5.6 Classification of Degrees

1. If a candidate's general average is 3.5 points or better per credit hour in required courses and his/her average is 3.5 per credit hour in the courses in the Honours subject (excluding 1000-level courses), the candidate shall be awarded an Honours degree with First Class standing.
2. If a candidate fulfils the conditions of 6.6 but not of clause 6.7, 1., the candidate shall be awarded an Honours degree with Second Class standing.
3. No classification will be given to the degree awarded a candidate who has completed (i) fewer than one half of the courses required for the degree at this University, or (ii) who has completed fewer than one half of the courses required for the degree at this University since 1959. All candidates for such degrees shall, however, fulfil the condition of paragraph 6 on the courses taken at this University since September 1959 in order to qualify for the degree.
4. A declared candidate for an Honours degree who fails to attain the academic standing specified in clause 6, but fulfils the academic requirements for a General degree shall be awarded a General degree, the classification of which shall be determined in accordance with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.

In these regulations, all references to the Program Chair are to be read as "Program Chair or delegate".

6 Division of Arts

Bachelor of Arts General degrees only.

Majors are available in English, Historical Studies, Humanities.

Minors are available in Classics, English, Historical Studies, Humanities, Philosophy, Religious Studies.

An Intensive English Bridge Program is also available.

6.1 Major in English Language and Literature

Program Chair: Dr. M. Thackray

The Major consists of 42 credit hours including an English Core and one of four possible concentrations.

6.1.1 English Core

1. English 1000 and 1001 or equivalent
2. English 2005, 2006, 2007, 3205 or 3206, 3395, 4105

6.1.2 Concentrations

Students must complete 18 credit hours in one of the following concentrations. Within each concentration, there must be a minimum of 6 credit hours at the 3000 level and 6 credit hours at the 4000 level.

1. Canadian Literature Concentration

English 2146, 4950 and 12 credit hours in Canadian Literature from the following selection: English 2155, 2156, 2905, 3145, 3147, 3148, 3149, 4307, 4825-35.

2. Dramatic Literature Concentration

English 2350, 2351, 3275, 4950 and 6 credit hours in Dramatic Literature from the following selection: English 3021, 3171, 3181, 3205 or 3206 (whichever course has not been used to fulfil the requirements of the English Core), 4302, 4305, 4307, 4308, 4316, 4317, 4836-44.

3. Modern Literature Concentration

English 3215, 3216, 4950 and 9 credit hours in Modern Literature from the following selection: English 2215, 2242, 2243, 2705, 2805, 2870, 2905, 3810, 3275, 3905, 4245, 4246, 4302, 4305, 4308, 4905.

4. Combined Concentration

A total of 18 credit hours from English Concentration Courses which must include:

- a. At least 6 credit hours from one of three concentrations (Canadian, Dramatic, Modern) as specified below and an English 4950 project within the area chosen:

Canadian Literature: 2146 and at least 3 additional credit hours in this concentration or
Dramatic Literature: 2350 or 2351 and at least 3 additional credit hours in this concentration or
Modern Literature: 3215 or 3216 and at least 3 additional credit hours in this concentration.

- b. At least 3 credit hours from each of the other two concentrations.

6.2 Major in Historical Studies

Program Chair: Dr. O.U. Janzen

The Major consists of a minimum of 42 credit hours in History courses and 15 additional credit hours drawn from a prescribed list of courses from other disciplines.

The student must complete:

1. History 1100, 1101, 3840 and 4950.

2. Twelve credit hours from courses in each of the two following categories:
 - a. **Early Western History**
 History/Classics 2035, 2040, 3090
 History 2100, 2200, 2300, 2320, 2330, 3050, 3110, 3135, 3320, 3330, 3445, 3760
 History/Anthropology 3520
 History/Art History 2700, 3700, 3701
 - b. **Later Western History**
 History 2120, 2210, 2310, 2500, 2510, 3030, 3060, 3120, 3250, 3440, 3460, 3490, 3675, 3770
 History/Art History 2701
 History/Anthropology 3525
 History/Economics 3630
3. Six credit hours in 4000-level History courses (in addition to History 4950). Prerequisite: At least six credit hours at the 3000 level, or permission of the Chair.
4. Fifteen credit hours chosen from:
 - Anthropology 1031
 - Economics 2010
 - Economics 2020
 - English 2005
 - English 2006
 - English 2007
 - Folklore 1000
 - Folklore 1050
 - Folklore 2401
 - French 1501
 - French 1502
 - French 2100
 - French 2101
 - French 2601
 - French 2602
 - Geography 1000
 - Geography 1001
 - Geography 2001
 - Philosophy 1600
 - Philosophy 2701
 - Philosophy 2702
 - Philosophy 3400
 - Political Science 1000
 - Political Science 2000
 - Political Science 2500
 - Religious Studies 2013
 - Religious Studies 2050
 - Religious Studies 2051
 - Sociology 2000
 - Sociology 3040
 - Sociology 3150

Note: These are courses that are thematically or methodologically relevant to the study of History (students may be allowed to take others with permission of the Program Chair). Applicable courses used to satisfy the Minor requirements may also be counted as Historical Studies credits. No more than 6 credit hours from any one discipline will be counted toward Historical Studies Major.

6.3 Major in Humanities

Program Chair: Dr. M. Janes

The Major consists of 45 credit hours as follows:

- a. 39 credit hours (Humanities 1001, 1002, 2001, 2002, 2010, 3001, 3002, 3010, 4001, 4010, 4950; one of 3100-3109; one of 4020-4029).
- b. Language requirement: 6 credit hours in a single language other than English.

6.4 Minor Programs - Division of Arts

All minor programs require 24 credit hours

1. Classics Minor:

- a. Classics 1100 and 1200
- b. Classics 2035 and 2040
- c. Three credit hours at 3000 level
- d. Nine additional credit hours in Classics

2. English Minor:

- a. Six credit hours at 1000 level in English
- b. Six credit hours chosen from English 2005, 2006 and 2007
- c. Three credit hours chosen from English 3205 or 3206
- d. Nine additional credit hours in English electives; 3 credit hours must be chosen from courses having an initial digit "3" or "4"

3. French Minor:

No more than 6 credit hours at the 1000 level and no more than 6 transfer credits may be used to fulfill the minimum requirement of the minor in French.

- a. French 2100 and 2101 or French 2159 and 2160

- b. French 3100 or French 3101
- c. 15 additional credit hours in French
- 4. **Historical Studies Minor:**
 - a. History 1100 and 1101
 - b. History 3840
 - c. Three credit hours at 3000 level in History
 - d. Three credit hours at 4000 level in History
 - e. Additional 9 credit hours in History
- 5. **Humanities Minor:**
 - a. Humanities 1001 and 1002
 - b. Six credit hours from Humanities 2001, 2002 or 2010
 - c. Twelve credit hours from Humanities 3001, 3002, 3010, 3020, 3021, 4001, 4010; one of 3100-3109; one of 4020-4029
- 6. **Philosophy Minor:**
 - a. Philosophy 2701 and 2702
 - b. Three credit hours from following list: Philosophy 3730, 3740, 3800, 3840, 3850, 3860
 - c. 15 additional credit hours in Philosophy
- 7. **Religious Studies Minor:**
 - 24 credit hours in Religious Studies with no more than 6 credit hours at 1000 level and at least 9 credit hours at 3000 level or above.

6.5 Intensive English Bridge Program at Grenfell (IEBP-G)

The Intensive English Bridge Program is intended for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students, and who are students of advanced proficiency who meet the criteria outlined in **Admission** below. The program requires ten to fifteen hours of classroom language instruction in reading, writing, grammar, and listening. The emphasis is on English for academic purposes. Students in this program may register for an undergraduate credit course concurrently, in consultation with the Coordinator of English as a Second Language programs.

Final admission for provisionally admitted students will be subject to successful completion of the Intensive English Program with an acceptable score on the Canadian Academic English Language (CAEL) Assessment. The CAEL Assessment is administered as part of the program at the end of each semester. The number of semesters of Intensive English study required to achieve a student's desired level of proficiency will vary according to his or her initial proficiency level and individual progress rate.

6.5.1 Admission

Candidates for the Intensive English Bridge Program must have:

1. been provisionally accepted to undergraduate studies at Memorial University of Newfoundland.;
2. achieved an average of Band 40 in the CAEL with a Writing sub-score of at least 40, a paper-based TOEFL score of 483, a computer-based TOEFL score of 160, an iBT TOEFL score of 56, with a minimum writing score of 16, or an IELTS score of 5.5 with no sub-score less than 5 and a minimum writing score of 5.5; and
3. achieved a grade of "C" or better with a satisfactory attendance level (90%) in both ENGS 011F and ENGS 012F if enrolled in the Intensive English program at the St. John's campus within the previous two semesters.

6.5.2 Program Requirements

1. Students admitted to the Intensive English Bridge Program must register for the course English as a Second Language 011F.
2. Students in this program may normally register for no more than one credit course, chosen in consultation with the Coordinator of the English as a Second Language Program.
3. Students may register in the Intensive English Bridge Program for a maximum of two semesters.
4. Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Coordinator of English as a Second Language programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll in the IEBP-G in the following semester.

7 Division of Social Science

Bachelor of Arts (General) degrees are available with Majors in Environmental Studies, Psychology, Social/Cultural Studies, and Tourism Studies. Bachelor of Arts (Honours) degree is available in Psychology. A Bachelor of Business Administration and a Bachelor of Resource Management is also available.

Bachelor of Science (General and Honours) degrees are available in Psychology.

Minors are available in Business, Canadian Studies, Environmental Studies, Folklore, Geography, Psychology, Social/Cultural Studies, Sociology, and Tourism.

An articulation agreement has been established with the College of the North Atlantic for graduates of the two-year Adventure Tourism Diploma Program who wish to obtain a Bachelor of Arts degree (Major in Environmental Studies).

7.1 Major in Environmental Studies

Program Chair: Dr. G. Sabau

The Major consists of an Environmental Studies Core which provides a broad appreciation of interrelationships inherent in any study of the environment and one of two possible concentrations which provides the depth and focus for the degree program.

7.1.1 Environmental Studies Core

Students must complete the following courses:

Economics 2010

Environmental Studies 1000
 Environmental Studies 2000 (strongly recommended for the Biology Stream of the Environmental Science Program)
 Environmental Studies 3000
 Environmental Studies 3001
 Environmental Studies 4010
 Environmental Studies 4950
 Geography 1000
 Geography 3222
 Philosophy 2561

7.1.2 Environmental Studies Concentrations

Students must complete 42 credit hours in one of the following concentrations:

1. Environmental Perspectives Concentration

Forty-two credit hours at least 15 of which must be at the 3000 or 4000 level:

Anthropology 3080
 Anthropology 3083
 Biology 1001 and 1002
 Biology 2041
 Biology 2600
 Chemistry 1001
 Chemistry 1200
 Earth Sciences 1000
 Earth Sciences 1002
 Environmental Science 2261
 Environmental Science 2360
 Environmental Science 2370
 Environmental Science 2371
 Environmental Studies 4000
 Environmental Studies 4020-4039
 Folklore 2401
 Folklore 2600
 Forestry 1010 and 1011
 Geography 1001
 Geography 2001
 Geography 2102
 Geography 2302
 Geography 2425
 Geography 4405
 Political Science 3550
 Political Science 3731
 Religious Studies 3880
 Sociology 2120

2. Outdoor Environmental Pursuits Concentration

a. Environmental Studies 2210, Environmental Studies 2220, Environmental Studies 3210, Human Kinetics and Recreation (HKR) 3555, and Human Kinetics and Recreation (HKR) 4555

b. Twenty-seven credit hours from the following of which at least 9 credit hours must be at the 3000 or 4000 level:

Anthropology 3083
 Biology 1001 and 1002
 Biology 2041
 Biology 2600
 Chemistry 1001
 Chemistry 1200
 Earth Sciences 1000
 Earth Sciences 1002
 Environmental Science 2261
 Environmental Science 2360
 Environmental Science 2370
 Environmental Science 2371
 Environmental Studies 4000
 Environmental Studies 4020-4039
 Folklore 2600
 Forestry 1010 and 1011
 Geography 1001
 Geography 2102
 Geography 2425
 Human Kinetics and Recreation (HKR) 3565
 Human Kinetics and Recreation 4575
 Political Science 3731
 Religious Studies 3880

7.2 Major in Psychology - B.A. and B.Sc.

Students completing this program cannot receive credit for Psychology 2920.

Program Chair: Dr. J. Buckle

The Major in Psychology consists of a minimum of 45 credit hours in Psychology as follows:

1. Psychology 1000, 1001, 2925, 2950, 3950, 4910, 4925, and one of 4950 or 4951
2. At least 12 credit hours from: Psychology 2025, 2125, 2225, 2425, 2625, 2825

- At least 9 credit hours chosen from the following Contemporary Issues courses: Psychology 3025, 3040, 3125, 3126, 3225, 3226, 3325, 3425, 3525, 3625, 3626, 3627, 3628, 3725, 3825

Candidates for the Bachelor of Science degree with a Major in Psychology shall also complete an additional 36 credit hours as follows:

- Six credit hours in Mathematics, which must include Mathematics 1000
- Biology 1001 and 1002
- Chemistry 1200 and 1001 or Physics 1020 (or 1050) and 1021 (or 1051)
- Nine credit hours at the 2000 level or above (two courses must be laboratory courses) in one of the following subjects: Biochemistry, Biology, Chemistry, Earth Science, Environmental Science, Physics
- Nine additional credit hours chosen in any combination from the following subjects: Biochemistry, Biology, Chemistry, Computer Science, Earth Science, Environmental Science, Mathematics, Physics, Statistics

7.2.1 Requirements for Honours in Psychology

Students completing this program cannot receive credit for Psychology 2920.

The Honours B.A. and B.Sc. degrees in Psychology offer greater concentration in the discipline and also require a higher level of academic achievement than is required for the completion of a degree. The Honours degrees in Psychology at Grenfell Campus are 120 credit hour programs normally requiring four years for completion (See **Regulations for the Honours Degrees of Bachelor of Arts and Bachelor of Science at Grenfell Campus**).

The following requirements govern the Bachelor of Arts (Honours) and the Bachelor of Science (Honours) degrees in Psychology:

1. Course Requirements

- Students must meet the General Regulations for Grenfell Campus Bachelor of Arts or Bachelor of Science degree.
- Candidates must also complete:
 - Psychology 1000, 1001, 2025, 2125, 2225, 2425, 2625, 2825, 2925, 2950, 3950, 4910, 4925
 - Fifteen credit hours from Psychology 3025, 3040, 3125, 3126, 3225, 3226, 3325, 3425, 3525, 3625, 3626, 3627, 3628, 3725, 3825
 - A two-semester research project, Psychology 4951 and 4959.
- Candidates for the Bachelor of Science (Honours) degree in Psychology shall also complete an additional 27 credit hours as follows:
 - Six credit hours in Mathematics, which must include Mathematics 1000
 - Biology 1001 and 1002
 - Chemistry 1200 and 1001 OR Physics 1020 (or 1050) and 1021 (or 1051)
 - Nine credit hours at the 2000 level or above (two courses of which must be laboratory courses) in one of the following subjects: Biochemistry, Biology, Chemistry, Earth Science, Environmental Science or Physics.

2. Honours Thesis

The Honours project sequence (Psychology 4951 and 4959) involves the production of an Honours thesis. This thesis will be evaluated by the thesis supervisor and an additional faculty member selected by mutual consent of the candidate and the supervisor.

7.3 Major in Social/Cultural Studies

Program Chair: Dr. M. Croll

The Major consists of 78 credit hours as follows:

Anthropology 1031, 2210, 3140, 3083, 3520

Folklore 1000, 2100, 2230, 2300, 2401

History 1100, 1101

Social/Cultural Studies 4000, 4100, 4950

Sociology 2000, 2120, 3040, 3150, 3314

Eighteen additional credit hours from Anthropology, Folklore, and Sociology

7.4 Major in Tourism Studies

Program Chair: Dr. R. Okech

7.4.1 Admission Modes and Requirements

7.4.1.1 Direct Entry (for High School Students)

Students may apply for admission into the first year of the Bachelor of Arts in Tourism Studies program (BA (TS)) directly from high school by indicating this in the appropriate place on their Undergraduate Application for Admission/Readmission to Memorial University of Newfoundland. Direct entry from high school is subject to the applicant's final acceptance to the University.

7.4.1.2 Advanced Standing (for Current Memorial University of Newfoundland Students)

- Students may apply for admission with Advanced Standing into the BA (TS) program. A student's placement within the program, and requirements needed to complete the program, will be determined on an individual basis at the time of admission. Students applying for admission with advanced standing must complete and submit the Application for Admission to the Chair of the Tourism Studies program. The deadline for submission of applications for consideration of admission is March 1 for Fall admission.
- Admission with Advanced Standing is limited and competitive. The primary criterion used in reaching decisions on applications for admission with advanced standing is overall academic achievement. Selection, therefore, will be based on a student's overall academic performance.

7.4.1.3 Transfers From Other Post-Secondary Institutions

- Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified in the **University Diary** for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of

transfer credits. The acceptance of transfer students into the BA (TS) program is subject to the same conditions outlined under Advanced Standing (for Current Memorial University of Newfoundland Students) above.

2. Subject to item 2. under **Advanced Standing (for Current Memorial University of Newfoundland Students)** above, graduates of a three year community college tourism-related diploma program may also be considered for admission with advanced standing into the BA (TS) program. Specific course requirements will be determined on an individual basis at the time of admission.

Students may apply for admission with Advanced Standing into the BA (TS) program beyond Year 1.

7.4.1.4 Regulations for a Major in Tourism Studies

The Major consists of a Tourism core which provides a broad appreciation of the implications of tourism activity in the context of social, cultural and physical environments.

The Tourism Studies program requires a total of 120 credit hours.

1. Students must successfully complete 60 credit hours as follows:
 - a. French 1501 and 1502
 - b. Economics 2010 and 2020
 - c. Business 1000;
 - d. three credit hours chosen from Geography 3222, Psychology 2925, Sociology 3040, Statistics 2500, Statistics 2550
 - e. Thirty-three credit hours in Tourism consisting of Tourism Studies 1000, 1100, 2000, 2201, 3100, 3240, 3800, 3900, 4010, 3 credit hours from 4900-4910, and 4950.
 - f. Three additional credit hours in Tourism Studies electives taken at the 2000 level.
 - g. Six additional credit hours in Tourism Studies electives taken at the 3000 or 4000 levels.
2. A minimum of 24 credit hours in an approved minor concentration area other than that of the Major.
3. Courses to make up the total of 120 credit hours, other than those required for the core program. Of these courses, not more than 6 credit hours shall be from courses in the Tourism Studies program.

7.5 Bachelor of Business Administration

Program Chair: J. Ryan

7.5.1 Regulations for the Degree of Bachelor of Business Administration (B.B.A.)

The Bachelor of Business Administration (B.B.A.) degree program at Grenfell Campus is designed to deliver a comprehensive foundation in the fundamental areas of business and decision making. Students also have an opportunity to further specialize in areas of contemporary business studies or small business and entrepreneurship.

7.5.2 Admission Modes and Requirements

7.5.2.1 Direct Entry (for High School Students)

Students may apply for admission into the B.B.A. program directly from high school by indicating this in the appropriate place on the Undergraduate Application for Admission/Readmission to Memorial University of Newfoundland. This form is available at the Office of the Registrar or online at www.Grenfell.mun.ca/regoff/Pages/Forms.aspx. Direct admission from high school is subject to the applicant's final acceptance to the University.

7.5.2.2 Advanced Standing (for Current Memorial University of Newfoundland Students)

Current Memorial University of Newfoundland students should select the B.B.A. program on Grenfell's DECLARATION/CHANGE ACADEMIC PROGRAM form, which must then be signed by the Business Program Chair. This form is available at the Office of the Registrar or online at www.Grenfell.mun.ca/regoff/Pages/Forms.aspx.

7.5.2.3 Transfers from Other Post-Secondary Institutions

1. Students who are transferring from other post-secondary institutions must apply for admission to the University on or before the deadlines specified in the **University Diary** for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The acceptance of transfer students into the B.B.A. program is subject to the same conditions outlined under **Advanced Standing (for Current Memorial University of Newfoundland Students)** above.
2. Graduates of a community college business diploma program may also be considered for admission with advanced standing into the B.B.A. program. To be eligible for the Degree of Bachelor of Business Administration such students will be required to complete a minimum of 45 credit hours from Memorial University of Newfoundland. Specific course requirements will be determined on an individual basis at the time of admission.

7.5.3 The Curriculum

1. The Bachelor of Business Administration requires a total of 120 credit hours. Candidates for graduation must achieve a grade point average of at least 2.5 and an overall numeric average of at least 60% on those 120 credit hours.
2. Students must complete 75 credit hours as follows:
 - a. Economics 2010 and 2020
 - b. six credit hours in first year English which must include English 1110 or 1021
 - c. Mathematics 1000
 - d. Statistics 2500
 - e. Business 1000, 1101, 1210, 1600, 2010, 2101, 2210, 2400, 2700, 3310, 3401, 4000, 4050, 4320, 4330, 4500, 5301, 7000, and 7010

Students who have received credit for both English 1000 and 1001 prior to Fall 2011 will not be required to complete English 1110.

3. Students must complete 15 credit hours from one of the following areas of concentration:

- a. **Contemporary Business Studies**
 - i. 9 credit hours as follows: Business 3350, Business 5302, Business 7050
 - ii. 6 credit hours chosen from: Business 3101, Business 5220, Business 5500, Business 5600, Economics 3150
 - b. **Small Business and Entrepreneurship**
 - i. 9 credit hours as follows: Business 5220, Business 5600, Business 7600
 - ii. 6 credit hours chosen from: Business 3210, Business 6500, Business 6600, Business 6610, Business 7610
4. Students must complete an additional 30 credit hours to make up the total 120 credit hours required for the degree of B.B.A. When selecting these courses, students are reminded that the **Core Requirements** for a Grenfell degree program must be met. In addition, if students choose to complete a minor within the B.B.A. program, they are advised to choose their electives carefully so that they will also meet the requirements for the chosen Minor program as set forth in the University Calendar.

7.5.4 Minor from another Academic Unit

Students enrolled in the B.B.A. program are not required to complete minor programs; however, students may choose to pursue a minor in other non-business academic units (where minor programs exist) with permission of that academic unit.

Students are advised to refer to the requirements for the chosen Minor program as set forth in the University Calendar, and it is recommended that students seek academic advice when planning their program.

7.5.5 Recommended Course of Study for B.B.A. Curriculum

7.5.5.1 Contemporary Business Studies

- Depending on the level of preparation in Mathematics, students may be required to complete Mathematics 1090 as a prerequisite for Mathematics 1000.
- When choosing electives, students are reminded that **Core Requirements** for a Grenfell Campus degree program must be met. In addition, if students choose to complete a minor within the B.B.A. program, they are advised to select their electives carefully so that they will also meet the requirements for the chosen Minor program as set forth in the University Calendar.
- Concentration electives for Contemporary Business Studies must be selected from **The Curriculum**, 3a.

Contemporary Business Studies Table

Year 1 Business 1000 Economics 2010 Economics 2020 6 credit hours in first-year English which must include English 1110 Mathematics 1000 12 credit hours in non-business elective courses	Year 3 Business 2400 Business 2700 Business 3350 Business 3401 Business 4000 Business 4320 Business 4330 Business 4500 3 credit hours from concentration electives 3 credit hours in other elective courses
Year 2 Business 1101 Business 1210 Business 1600 Business 2010 Business 2101 Business 2210 Business 3310 Statistics 2500 6 credit hours in elective courses	Year 4 Business 4050 Business 5301 Business 5302 Business 7000 Business 7010 Business 7050 3 credit hours from concentration electives 9 credit hours in other elective courses

7.5.5.2 Small Business and Entrepreneurship Concentration

- Depending on the level of preparation in Mathematics, students may be required to complete Mathematics 1090 as a prerequisite for Mathematics 1000.
- When choosing electives, students are reminded that **Core Requirements** for a Grenfell Campus degree program must be met. In addition, if students choose to complete a minor within the B.B.A. program, they are advised to select their electives carefully so that they will also meet the requirements for the chosen Minor program as set forth in the University Calendar.
- Concentration electives for Contemporary Business Studies must be selected from **The Curriculum**, 3a.

Small Business and Entrepreneurship Concentration Table

Year 1 Business 1000 Economics 2010 Economics 2020 6 credit hours in first year English which must include English 1110 Mathematics 1000 12 credit hours in non-business elective courses	Year 3 Business 2400 Business 2700 Business 3401 Business 4000 Business 4320 Business 4330 Business 4500 Business 5220 3 credit hours from concentration electives 3 credit hours in other elective courses
Year 2 Business 1101 Business 1210 Business 1600 Business 2010 Business 2101 Business 2210 Business 3310 Statistics 2500 6 credit hours in elective courses	Year 4 Business 4050 Business 5301 Business 5600 Business 7000 Business 7010 Business 7600 3 credit hours from concentration electives 9 credit hours in other elective courses

7.6 Bachelor of Resource Management

Program Chair: Dr. R. Scott

7.6.1 Regulations for the General Degree of Bachelor of Resource Management

The program consists of a Sustainable Resource Management core which provides an interdisciplinary understanding of management activities within the context of the physical, social and economic environments.

The program requires a total of 120 credit hours as follows:

1. The interdisciplinary Major in Sustainable Resource Management consisting of 84 credit hours.
 - a. Biology 1001, 1002, 2600
 - b. Chemistry 1200 and 1001, or equivalent
 - c. Economics 2010
 - d. Environmental Studies 2000, 3000, 3001, 4000
 - e. Geography 1000, 1001, 2425
 - f. Sustainable Resource Management 2000, 2001, 3000, 3001, 3002, 4000, 4001, 4003, 4010, 4950
 - g. One of Philosophy 2561, Religious Studies 3880, Political Science 3550
 - h. Two of Environmental Science 2371, Environmental Science 2369, Biology 2010, Biology 2122, Biology 2210
 - i. Statistics 2500
 - j. One of Environmental Science 3072, 3110, 3130, 3131, 4132, Earth Science 3811
2. 6 credit hours in first-year English
3. 30 credit hours in elective courses. When selecting electives, students are reminded that the **Core Requirements** for a Grenfell Campus degree program must be met.

7.7 Minor Programs - Division of Social Science

Minor programs require 24 credit hours

1. Minor in Business

- a. Students completing a minor in Business must declare their intent to do so on the Grenfell's DECLARATION/CHANGE ACADEMIC PROGRAM form, which then must be approved by the Chair of the Business Program. This form is available at the Office of the Registrar or online at www.Grenfell.mun.ca/regoff/Pages/Forms.aspx.
- b. A minor in Business consists of 24 credit hours. Students must complete 18 credit hours as follows: Business 1000, 1101, 1210, 3310, 4500, and 7010. The remaining 6 credit hours must be chosen from Business 1600, 2101, 2210, 3350, 4000, 4050, 4320, or the former 7302.
- c. Course prerequisites to all Business courses will apply to a Business minor. Students should note, for example, that the prerequisites for Business 4500 are Business 1101, Statistics 2500 and Economics 2010, and that enrolment in Business 7010 requires permission of the Chair of Business. It should also be noted that some courses are not offered every semester.

2. Canadian Studies Minor

A Minor in Canadian Studies shall consist of 24 credit hours as follows:

- a. Fifteen credit hours chosen from at least four different disciplines:
 - English 2146
 - English 2156
 - French 1502
 - French 2601
 - French 2602
 - History 2200
 - History 2210
 - Political Science 1010
 - Political Science 2710

Political Science 2711
Sociology/Anthropology 2240

- b. Nine additional credit hours in courses from at least two different disciplines:

Art History 3710
Art History 3711
English 3145
English 3147
English 3148
English 3149
English 4307
English 4825-35
Folklore 4300
History 2120
History 3520/Anthropology 3520
History 3525/Anthropology 3525
History 4254
Political Science 3731
Sociology 3395

3. **Economics Minor:**

- a. Economics 2010, 2020, 3000, 3010
b. Twelve additional credit hours in Economics of which at least 6 must be at the 3000 or 4000-level

4. **Environmental Studies Minor:**

- a. Environmental Studies 1000 and 9 credit hours from those designated as Environmental Studies core courses
b. Twelve credit hours from one of the Environmental Studies concentrations or a combination of courses taken from both concentrations. The courses chosen must be chosen from at least three subject areas.

5. **Folklore Minor:**

- a. Folklore 1000, 2100, 2300, 2401, 2500
b. Nine additional credit hours in Folklore

6. **Geography Minor:**

- a. Geography 1000, 1001, 2001, 2102, 3222
b. Nine additional credit hours in Geography; at least 6 credit hours of which must be at the 3000 or 4000 level.

7. **Psychology Minor:**

- a. Psychology 1000, 1001
b. Eighteen credit hours in Psychology at the 2000 level or above

8. **Social/Cultural Studies Minor:**

- a. Anthropology 1031, Sociology 2000, Folklore 1000
b. Anthropology 2410 or Sociology 3150
c. Folklore 2100 or Sociology 3040
d. Three additional credit hours in each of Anthropology, Folklore, and Sociology

9. **Sociology Minor:**

- a. Sociology 2000, 3040, 3150
b. Fifteen credit hours in Sociology; at least 6 credit hours must be at the 3000 or 4000 level

10. **Tourism Studies Minor:**

- a. Students who are completing degrees in Arts, Science, and/or Business Administration may complete a minor in Tourism Studies.
b. Students who wish to undertake the Tourism Studies minor program must have completed a minimum of 18 credit hours. Application is made in the space provided on the Change of Academic Program Form, which must then be approved by the Chair of the Tourism Studies program. Admission into the minor program is limited and competitive.
c. A minor in Tourism shall consist of 24 credit hours comprising the following courses: Tourism 1000, 1100, 2000, 3100, 3900, 3 credit hours chosen from a 2000-level or 3000-level Tourism elective, 3 credit hours chosen from a 4000-level Tourism course, and three credit hours chosen from Geography 3222, Psychology 2925, Sociology 3040, Statistics 2500, Statistics 2550.
d. Course prerequisites to all Tourism courses shall apply to a Tourism Studies minor.

11. **Advanced Diploma in Tourism Studies:**

The Advanced Diploma in Tourism Studies is designed for individuals already possessing a post-secondary diploma or degree in any relevant field who wish to acquire the knowledge and skills required to work in today's tourism industries. The program will benefit individuals from a wide variety of backgrounds including, Business, Environmental Science, Environmental Studies, Fine Arts, Historical Studies, Social/Cultural Studies, and Sustainable Resource Management (proposed).

- a. Students who wish to undertake the Advanced Diploma in Tourism Studies must have completed a post-secondary diploma or degree in any field, or possess at least five years of full-time, relevant work experience or equivalent. Application is made in the space provided on the Change of Academic Program Form, which must then be approved by the Chair of the Tourism Studies Program. Admission into this program is limited and competitive.
b. The Advanced Diploma in Tourism Studies shall consist of 30 credit hours comprising the following courses: Tourism 1000, 1100, 2000, 3100, 3900, 12 credit hours chosen from a 2000-level or 3000-level Tourism electives, and 3 credit hours chosen from a 4000-level Tourism course.
c. Prerequisites for all Tourism courses may be waived after consultation with, and permission of, the Chair of the Tourism Studies program.

7.8 Articulation Agreements With the College of the North Atlantic

Students who have graduated from the two-year Adventure Tourism Diploma Program offered by the College of the North Atlantic, or

who are in their final semester of this program, can apply for entry with advanced standing into the Bachelor of Arts Degree (B.A.) with a Major in Environmental Studies or Tourism Studies offered by Grenfell Campus. Students who have graduated from the two-year Hospitality Management Diploma Program offered by the College of the North Atlantic, or who are in the final semester of this program can apply for entry with advanced standing into the B.A. degree, Major in Tourism Studies, offered by Grenfell Campus.

Students who have graduated from either the two-year Fish and Wildlife Technician program or the two-year Forest Resources Technician Diploma program offered by the College of the North Atlantic, or who are in their final semester of one of these programs, can apply for entry with advanced standing into the Bachelor of Resource Management (B.R.M.) offered by Grenfell Campus.

7.8.1 Environmental Studies Major for Graduates of the Two-Year Adventure Tourism Diploma Program

Students who are entering the Environmental Studies Program will be given a total of 60 credit hours towards the 120 credit-hour degree program. Of the 60 credit hours, students taking the Outdoor Environmental Pursuits Concentration will receive credit for EVST 2210, EVST 2220, EVST 3210, HKR 3555, and HKR 4555 as well as 18 unspecified credit hours towards the concentration requirements. Of the 60 credit hours, students taking the Environmental Perspectives Concentration will receive 21 unspecified credit hours towards the concentration requirements.

Students will receive 3 credit hours for unspecified writing courses, 6 unspecified credit hours towards the Group B and 6 credit hours towards Group C breadth of knowledge requirement. The remaining credit hours will be deemed to be unspecified electives.

In addition to the general requirements for the Grenfell Campus B.A. degree, students will be required to complete the following requirements for the Environmental Studies major:

Environmental Studies Core

Economics 2010
Environmental Studies 2000
Environmental Studies 3000
Environmental Studies 3001
Environmental Studies 4010
Environmental Studies 4950
Geography 3222
Philosophy 2561

Additional Requirements Based on Concentration

For Students taking the Outdoor Environmental Pursuits Option:

Fifteen credit hours of the following courses of which at least 9 credit hours must be at the 3000 or 4000 level:

Anthropology 3083
Biology 1001 and 1002
Biology 2041
Biology 2600
Chemistry 1001
Chemistry 1200
Earth Sciences 1000
Earth Sciences 1002
Environmental Science 2261
Environmental Science 2360
Environmental Science 2370
Environmental Studies 4020-4039
Environmental Studies 4000
Folklore 2600
Forestry 1010 and 1011
Geography 1001
Geography 2102
Geography 2425
Political Science 3731
Religious Studies 3880

For Students taking the Environmental Perspectives Concentration:

27 credit hours of the following courses of which 18 must be at the 3000 or 4000 level:

Anthropology 3080
Anthropology 3083
Biology 1001 and 1002
Biology 2041
Biology 2600
Chemistry 1001
Chemistry 1200
Earth Sciences 1000
Earth Sciences 1002
Environmental Science 2261
Environmental Science 2360
Environmental Science 2370
Environmental Science 2371
Environmental Studies 4020-4039
Environmental Studies 4000
Folklore 2401
Folklore 2600
Forestry 1010 and 1011
Geography 1001
Geography 2001
Geography 2102
Geography 2302
Geography 2425

Political Science 3550
 Political Science 3731
 Religious Studies 3880
 Sociology 2120

Note: *The required Philosophy 2809 and the optional Religious Studies 3550 can be used to fulfil the Group A breadth of knowledge requirement. The required Environmental Studies core courses will fulfil the Quantitative Reasoning and Analysis requirement.*

7.8.2 Tourism Studies Major for Graduates of the Two-Year Adventure Tourism Diploma Program

Students who have graduated from the two-year Adventure Tourism Diploma Program offered by the College of the North Atlantic and who are entering the Tourism Studies Program will be given a total of 54 credit hours towards the 120 credit-hour degree program. Students will be required to complete an additional 66 credit hours for the Grenfell Campus B.A. Degree, Major in Tourism Studies as follows:

1. English 1000 and 1001
2. French 1501 and 1502
3. 3 credit hours chosen from Geography 3222, Psychology 2925, Sociology 3040, Statistics 2500, Statistics 2550
4. 21 credit hours in Tourism Studies as follows: Tourism 1000, 1100, 3240, 3900, 4010, 3 credit hours from 4900-4910, and 4950
5. 24 credit hours in Minor program
6. 6 credit hours in elective

Note: *When selecting courses for minor or electives, students must select 6 credit hours in **Designated Writing Courses**, as indicated under **Grenfell Campus Core Program Requirements***

7.8.3 Tourism Studies Major for Graduates of the Two-Year Hospitality Management Diploma Program

Students who have graduated from the two-year Hospitality Management Diploma Program offered by the College of the North Atlantic and who are entering the Tourism Studies Program will be given a total of 45 credit hours towards the 120 credit-hour degree program. Students will be required to complete an additional 75 credit hours for the Grenfell Campus B.A. Degree, Major in Tourism Studies as follows:

1. English 1000 and 1001
2. French 1501 and 1502
3. Economics 2010 and 2020
4. 3 credit hours chosen from Geography 3222, Psychology 2925, Sociology 3040, Statistics 2500, Statistics 2550
5. 24 credit hours in Tourism Studies as follows: Tourism 1100, 2000, 3100, 3240, 3900, 4010, 3 credit hours from 4900-4910, and 4950
6. 24 credit hours in Minor program
7. 6 credit hours in elective

Note: *When selecting courses for minor or electives, students must select 6 credit hours from **Breadth of Knowledge Requirement**, Group C as indicated under **Grenfell Campus Core Program Requirements**.*

7.8.4 Bachelor of Resource Management for Graduates of the Two-Year Fish and Wildlife Technician Diploma Program

Students who have graduated from the two-year Fish and Wildlife Diploma Program offered by the College of the North Atlantic and who are entering the Bachelor of Resource Management (B.R.M.) Program will be awarded a total of 60 credit hours towards the 120 credit-hour degree program. Students will be required to complete an additional 60 credit hours for the Grenfell Campus B.R.M. Degree as follows:

1. Chemistry 1200, 1001
2. Economics 2010
3. English 1000
4. Environmental Studies 3000, 3001, 4000
5. Geography 1001
6. Sustainable Resource Management 2000, 2001, 3000, 3001, 3002, 4000, 4001, 4010, 4950
7. One of Environmental Science 3072, 3110, 3130, 3131 or Earth Sciences 3811
8. 6 credit hours in elective courses. Three of these credit hours must be chosen from Art History, Classics, English, History, Humanities, Languages, Philosophy, Religious Studies, Theatre, or Visual Arts.

7.8.5 Bachelor of Resource Management for Graduates of the Two-Year Forest Resources Technician Diploma Program

Students who have graduated from the two-year Forest Resources Diploma Program offered by the College of the North Atlantic and who are entering the Bachelor of Resources Management (B.R.M.) Program will be awarded a total of 60 credit hours towards the 120 credit-hour degree program. Students will be required to complete an additional 60 credit hours for the Grenfell Campus B.R.M. Degree as follows:

1. Biology 1002, 2600
2. Chemistry 1200, 1001
3. Economics 2010
4. English 1000
5. Environmental Studies 3000, 3001, 4000
6. Geography 1001

7. Sustainable Resource Management 2000, 2001, 3000, 3001, 3002, 4000, 4001, 4010, 4950
8. Three credit hours in elective courses. Three of these credit hours must be chosen from Art History, Classics, English, History, Humanities, Languages, Philosophy, Religious Studies, Theatre, or Visual Arts.

8 Division of Science

Bachelor of Science (General and Honours) degrees are available in Environmental Science, General Science and Psychology. Minors are available in Environmental Science, Mathematics, Science.

An articulation agreement has been established with the College of the North Atlantic for those students who have completed the three-year Environmental Technology diploma program and who wish to obtain a Bachelor of Science degree (Major in Environmental Science).

8.1 Major in Environmental Science

Program Chair: Dr. M. Krishnapillai

The Major consists of an Environmental Science Core which provides a broad appreciation of the interrelationships inherent in any study of the environment and one of two possible streams which provide the depth and focus for the degree program.

1. Environmental Science Core

The student must complete at least 45 credit hours as follows:

- a. Biology 1001, 1002, 2600
Earth Science 1000
Mathematics 1000* (or 1080 and 1081), Statistics 2550 or equivalent
One of Physics 1020* or 1050* and one of Physics 1021* or 1051*
Environmental Science 4000
Environmental Science 4950 (or 4951, see **Requirements for Honours in Environmental Science (B.Sc.)**)
- b. At least two of:
Anthropology 3083
Economics 2010
Environmental Studies 3000
Environmental Studies 4000
Philosophy 2561
Political Science 3550
Political Science 3731
Religious Studies 3880
- c. At least three of:
Environmental Science 2261
Environmental Science 2360
Environmental Science 2370
Environmental Science 2371
Environmental Science 2430
Environmental Science 2450
Environmental Science 3072
Environmental Science 3470
Environmental Studies 2000 **

*It is strongly recommended that students considering the Chemistry stream of the Environmental Science program complete these courses in their first year.

**This course is strongly recommended for the Biology Stream of the Environmental Science program.

2. Environmental Science Streams

Students must complete at least 39 credit hours in one of the following streams:

a. Biology stream

Biology 2010, 2122
Chemistry 1200/1001 sequence or Chemistry 1011/1031 sequence or Chemistry 1050/1051 sequence, and one of Chemistry 2210 or Chemistry 2300 (or 2301) or 2440 or 2400/2401 sequence, or Chemistry 1010/1011 sequence and Chemistry 2440
ENVS 3110, 3130 3131, 4132, 4140 (or equivalent field course)
Two of ENVS 4069, 4131, 4133, 4240, 4479
one additional laboratory (Science/Statistics/GIS) course beyond the first year level excluding Environmental Science Core courses. A course used to fulfill a stream requirement cannot also be used as a Group c. course in the Environmental Science Core.

b. Chemistry stream

Chemistry 1200/1001 sequence or Chemistry 1011/1031 or Chemistry 1050/1051 sequence. It is strongly recommended that students complete one of these sequences of Chemistry courses in their first year.
Chemistry 2210, 2300 (or 2301), Chemistry 2400/2401 or equivalent
Environmental Science 2261, 3210, 3211, 3260, 3261, 4230
Two of Environmental Science 4069, 4131, 4240, 4249, 4479
Mathematics 1001 which should be completed in the first year of studies

8.2 Requirements for Honours in Environmental Science (B.Sc.)

The Bachelor of Science (Honours) degree in Environmental Science offers greater concentration in the discipline and also requires a higher level of academic achievement than is required for completion of the general degree. The Bachelor of Science (Honours) in Environmental Science at Grenfell Campus is a 120 credit hour program normally requiring four years for completion. (See **Regulations for the Honours Degrees of Bachelor of Arts and Bachelor of Science at Grenfell Campus.**) Students will normally not be allowed to repeat courses to fulfil the academic standing criteria for the Bachelor of Science (Honours) in Environmental Science. For students completing an Honours degree in "open" programs the appropriate courses to be used in calculation of academic standing will be determined by the program unit and will be approved by the Academic Studies Committee.

The following requirements govern the Bachelor of Science (Honours) in Environmental Science:

8.2.1 Course Requirements

1. Students must meet the General Regulations for Grenfell Campus Bachelor of Science degree.
2. Candidates must also complete:

Students must complete 75 credit hours as follows:

 - a. the Environmental Science Core requirements
 - b. the course requirements of a specific stream
3. Candidates must complete 3 additional credit hours in courses at the 4000 level. These courses normally will be drawn from the candidates's honours stream as follows:
 - a. For the Honours Bachelor of Science in Environmental Science (Biology), a further course chosen from: Environmental Science 4069, 4131, 4133, 4240, 4479
 - b. For the Honours Bachelor of Science in Environmental Science (Chemistry), a further course chosen from: Environmental Science 4069, 4131, 4240, 4249, 4479
4. Students, in close consultation with a faculty advisor and the agreement of the Chair of the Program, may select fourth-year honours requirement courses in place of those required in Section 1.c. (above), so long as such selections are consistent with the Major to which they are added. Such honours selections will be subject to approval by the Academic Studies committee.
5. Honours graduates of the Environmental Science Program will have also completed a two-semester research project consisting of a research proposal and literature review course (Environmental Science 4951) and a research project course (Environmental Science 4959).

8.2.2 Honours Dissertation

The honours project sequence (Environmental Science 4951 and 4959) involves the production of an honours dissertation. This dissertation will be evaluated by a three member committee that includes the dissertation supervisor(s) and that is approved by the Environmental Science faculty unit.

8.2.3 Academic Standing

1. In order to graduate with an Honours degree, the candidate must satisfy the regulations regarding academic standing as specified under **Regulations for Honours Degree of Bachelor of Science at Grenfell Campus**.
2. Courses used to calculate the academic standing as outlined in the **General Regulations for an Honours Degree at Grenfell Campus** include all required Environmental Science and Chemistry courses for the Chemistry stream students and all required Environmental Science and Biology courses for the Biology stream students, excluding, in both cases, 1000 level courses.
3. More specifically, courses normally used for calculations would be:

Biology stream

Biology 2010, 2122, 2600

Three of: Environmental Science 2261, 2360, 2370, 2371, 2430, 2450, 3072, 3470, or Environmental Studies 2000

Environmental Science 3110, 3130, 3131, 4132, 4140 (or equivalent)

Three of: Environmental Science 4069, 4131, 4133, 4240, 4479

Environmental Science 4000, 4951, 4959

Chemistry stream:

Chemistry 2210, 2300 (or 2301) Chemistry 2400, Chemistry 2401

Two of: Environmental Science 2360, 2370, 2371, 2430, 2450, 3072, 3470, or Environmental Studies 2000.

Environmental Science 2261, 3210, 3211, 3260, 3261, 4230

Three of: Environmental Science 4069, 4131, 4240, 4249, 4479

Environmental Science 4000, 4951, 4959

8.3 Major in General Science

Program Chair: TBA

Students completing the Major in General Science will complete a General Science Core. In addition, they will complete a minimum of 24 credit hours (or 18 credit hours in the case of Mathematics) in each of three streams chosen from Biology, Chemistry, Earth Systems, Mathematics or Physics. A student may not use the same course to satisfy the requirements of more than one stream. Students planning their course selection should be aware of the fact that most senior level science courses have one or more specified prerequisites.

The allowable courses that can be chosen from each stream are listed below.

1. **General Science Core**

Students must complete:

a. **Course Requirements**

Mathematics 1000, 1001

Science 4000 (General Science Seminar)

b. **Independent Project**

Science 4950

2. **General Science Streams**

Students must complete at least 24 credit hours in each of three streams, chosen from the following list of courses:

Biology:

Biology 1001, 1002

Eighteen credit hours from Biology 2010, 2122, 2210, 2250, 2600, 3053, Environmental Science 3072, 3110, 3130, 3131, 4140 (or equivalent field course) where at least 6 credit hours must be beyond the 2000 level.

Chemistry:

Chemistry 1001, 1200, 2210, 2300 (or 2301)

Either Chemistry 2440 or both Chemistry 2400 and 2401

Students who have completed Chemistry 2440 must complete another 9 credit hours from Environmental Science 2261, 3210, 3211, 3261, 4230, 4240; students who have completed Chemistry 2401 must complete another 6 credit hours from Environmental Science 3210, 3211, 3260, 3261, 4230, 4240.

Earth Systems:

Earth Science 1000, 1001 or 1002

Any 18 credit hours (six courses) from the following list, at least 6 credit hours of which are beyond the 2000 level: Environmental Studies 2000, 3001, Environmental Science 2360, 2369, 2370, 2371, 2430, 2450, 3072, 3470, 4069, 4479, Earth Science 2150, 3811.

Mathematics:

Mathematics 1000, 1001, 2000, 2050, 2320

Nine additional credit hours beyond the 1000 level chosen from Mathematics or Statistics, at least 6 which must be beyond the 2000 level.

Physics:

Physics 1050, 1051, 2056, 2065, 3060, 3220

Two of Physics 2151, 2553, 3160, Earth Science 2150, Environmental Science 2430, 2450, 3470, 4479

8.4 Requirements for Honours in the General Science Degree

The Bachelor of Science (Honours) degree in General Science requires students to gain greater depth in one or more of their three chosen streams. It also requires a higher level of academic achievement than is required for the general degree. The Bachelor of Science (Honours) in General Science is a 120 credit hour program normally requiring four years for completion (see **Regulations for an Honours Degree in Arts and Science at Grenfell Campus**).

The following requirements govern the Bachelor of Science (Honours) in General Science:

8.4.1 Course Requirements

1. General Science Core:

Students must complete all of the course requirements of the General Science Core.

2. General Science Streams:

In addition to the courses required under the General Degree regulations, students must complete two additional courses from at least one of their three chosen streams. These additional courses must come from the list of courses given in the stream requirements, and must both be beyond the 2000 level.

3. Honours Dissertation:

For students doing Honours, the Independent Project Science 4950 will be replaced by a two-semester Honours Project, Science 4951/Science 4959.

4. Academic Standing:

In order to graduate with an Honours degree, a student must satisfy the regulations regarding academic standing as specified under **Regulations for Honours Degree of Bachelor of Science at Grenfell Campus**. Courses used to calculate the academic standing as outlined in the General Regulations for an Honours Degree at Grenfell Campus include all courses listed in the stream requirements, with the exception of all 1000 level courses.

8.5 Minor Programs - Division of Science

Environmental Science Minor:

Students may choose one of the following three options:

1. Environmental Science

- Biology 1001, 1002 and 2600 or Chemistry 1200, 1001, and one of Chemistry 2440 or Environmental Science 2261
- Additional 15 credit hours in science courses within the Environmental Science program of which at least 6 credit hours must be at the 3000 or 4000 level

2. Environmental Science-Biology

- Biology 1001, 1002, 2010, 2122, 2600
- Three credit hours from Environmental Science 3110, 3130, 3131, 4131
- An additional 6 credit hours in courses with the Environmental Science designation of which at least 3 credit hours must be at the 3000 or 4000 level.

3. Environmental Science-Chemistry

- Chemistry 1200, 1001, 2210, 2300 (or 2301), Chemistry 2440
- Three credit hours from Environmental Science 3210, 3261, 4240
- An additional 6 credit hours in courses with the Environmental Science designation of which at least 3 credit hours must be at the 3000 or 4000 level

Mathematics Minor:

- Mathematics 1000, 1001 (The only other course at the 1000 level which carries credit toward a Minor in Mathematics is Computer Science 1700.)
- 18 additional credit hours in Mathematics courses beyond 1000 level or 15 additional credit hours in Mathematics courses beyond 1000 level and 3 credit hours in Statistics or Computer Science courses.

At least 6 credit hours will be in courses at the 3000 level or higher.

Science Minor:

Students pursuing the Minor in Science may choose courses from the following disciplines: Biology, Chemistry, Computer Science, Earth Science, Environmental Science, Mathematics, Physics, Science, and Statistics. Students who have completed courses drawn from other Science disciplines must obtain approval of the Head of Science.

- Mathematics 1000

2. Six additional credit hours in first year science courses (At least 3 credit hours must be in a laboratory course chosen from any science discipline except mathematics).
3. Five science courses beyond the 1000 level, at least 6 credit hours of which must be beyond the 2000 level. (Mathematics 1001 may be substituted for one of the 2000 level science courses).

8.6 Articulation Agreement With the College of the North Atlantic

8.6.1 For Graduates of the Three-Year Environmental Technology Diploma Program

Students who have graduated from the three-year Environmental Technology Diploma Program offered by the College of the North Atlantic, or who are in their final semester of this program, can apply for entry with advanced standing into the Environmental Science Degree Program offered at Grenfell Campus. Upon admission to the university, such students will enter the second year of either stream of the Environmental Science Degree Program.

They will be given unspecified credit for 45 credit hours towards the 120 credit-hour degree program. Included in these 45 credit hours will be 9 credit hours for unspecified writing courses, of which 6 credit hours will be at the 1000 level and three will be at the 2000 level. In addition, 6 of these credit hours will be for unspecified credit at the 2000 level satisfying Group B, breadth of knowledge requirement.

Students gaining entry into the Environmental Science Degree Program at Grenfell Campus will need to satisfy all other core program requirements specified for Grenfell Campus degree programs. As well, they will need to satisfy all other course requirements specified for their specific stream in Environmental Science.

Upon admission into the second year of the Environmental Science Degree Program, students will be required to complete the following:

Core Program Requirements:

Six credit hours from Group A Breadth of Knowledge Requirement

21 credit hours in additional designated Writing (W) courses which may include Environmental Science core and stream courses

Environmental Science Core:

Biology 2600 (W)

Environmental Science 4000 (W)

Environmental Science 4950 (W) (students who intend to complete the honours option will complete Environmental Science 4951 (W) and Environmental Science 4959 (W))

Statistics 2550 or equivalent

1. At least two of:

Anthropology 3083

Economics 2010

Environmental Studies 3000

Philosophy 2561 (W)

Political Science 3731, 3550

Religious Studies 3880 (W)

2. At least three of:

Environmental Science 2261, 2360, 2370(W), 2371(W), 2430, 2450, 3072, 3470

Environmental Studies 2000 or equivalent

Biology Stream:

Biology 2010, 2122 (W)

Chemistry 2300 or 2440 or 2400/2401

Environmental Science 3110, 3130, 3131, 4132, 4140 (or an equivalent field course)

Six credit hours from Environmental Science 4069, 4131, 4133, 4240, 4479 (Honours students must complete 9 credit hours from this list)

Three credit hours in an additional science or statistics laboratory course at the 2000 level or higher, excluding Environmental Science core courses

Chemistry Stream:

Chemistry 2210(W), 2300, 2400, 2401

Environmental Science 2261, 3210(W), 3211(W), 3260, 3261, 4230

Six credit hours from Environmental Science 4069, 4131, 4240, 4249, 4479 (Honours students must complete 9 credit hours from this list)

9 Division of Fine Arts

Bachelor of Fine Arts degrees are available in Theatre and in Visual Arts. Students completing a Fine Arts degree are not required to follow the Grenfell Campus Core program requirements.

The Minor Program is available in Art History.

9.1 Bachelor of Fine Arts (Theatre)

The Bachelor of Fine Arts (Theatre) program is designed to educate and train the student in the history, theory and practice of the theatre arts. The degree provides an undergraduate training, delivered by theatre professionals, that will prepare students to enter a professional graduate school of theatre, theatre conservatory or an apprenticeship in the theatre profession. The degree also provides a broad liberal arts education with a strong component of dramatic literature, enabling the graduate to pursue a variety of careers outside the theatre profession.

In recognition of the relative isolation of the Grenfell Campus and the need for students of the performing arts to be exposed to examples of excellence in their field of study, provision will be made for students in their senior years to visit major theatre centres outside the province (e.g. the Harlow Campus will be utilized for studies in London and Stratford).

9.1.1 Admission Requirements

1. Academic Requirements

Applicants must meet the general admission requirements of the University.

2. Audition

In addition to meeting the general admission requirements of the University, applicants for the Bachelor of Fine Arts (Theatre) must

undergo an audition/interview to the satisfaction of the department. Enrollment in the Bachelor of Fine Arts (Theatre) is limited and selection is competitive.

3. The deadline for submission of Theatre application forms is March 31st of the year in which admission is sought.

9.1.2 Academic Performance

1. Attendance and participation in all studio courses and production rehearsals is vital to the collaborative nature of the program of study in Theatre. Absence from classes or rehearsals of any one student could jeopardize a production, the proper dissemination of practical skills and the overall safety of the students. Therefore attendance at all studio classes, rehearsals and crew calls will be compulsory.
2. Students who fail a studio course shall not take more advanced courses in that discipline until the failed course has been satisfactorily completed.
3. Students shall complete all 1000 level Theatre courses before advancing to any 2000 level Theatre course.
4. A candidate whose average in the Theatre courses for the B.F.A. degree falls below 65 percent in any semester will be placed on probation within the program. A student placed on probation at the end of the final semester of the Theatre program will not be recommended for graduation.
5. A candidate will be required to withdraw from the program if the candidate's average in Theatre courses falls below 65 percent in each of two consecutive semesters of his/her enrollment in the program.
6. Candidates who have withdrawn or who have been required to withdraw from the Bachelor of Fine Arts (Theatre) program and wish to re-enter the program must re-apply in competition after a lapse of two semesters by April 30 for the upcoming Fall semester, or by August 30 for the upcoming Winter semester.
7. Candidates who have been required to withdraw twice from the Bachelor of Fine Arts (Theatre) program shall be ineligible for further admission.
8. The Bachelor of Fine Arts (Theatre) program is intended for full-time students only. Students are strongly advised to take the full course load as prescribed each semester and so progress through the degree in clearly defined blocks of courses.

9.1.3 Degree Regulations

Where circumstances warrant any prerequisite(s) for Theatre courses may be waived by the Program Chair.

Students in their first year will not be allowed to participate in theatre productions. Exceptions will be made only with the permission of the Head of the Division of Fine Arts, and permission will be given only where a student demonstrates satisfactory performance.

Where circumstances warrant, a student in second or third year may be given the opportunity for advanced responsibilities in production with the permission of the Program Chair. Permission will be given only where a student demonstrates above average academic performance as well as exceptional theatrical ability.

Productions will constitute the designated number of rehearsal hours as described below. However, the final week of rehearsals (technical rehearsals) will include ten hour days on Saturday and Sunday. All performances will take place in the evenings with the possible exceptions of occasional matinees.

Any departmental regulations may be waived by the Committee on Undergraduate Studies upon request of the Program Chair by the appropriate Committee on Undergraduate Studies.

To be awarded the Bachelor of Fine Arts (Theatre) a student shall successfully complete 120 credit hours which would normally be completed over a four-year period and must be chosen in accordance with the following pattern:

1. English 1000 and 1001 or equivalent
2. Visual Arts 2700 and 2701
3. Eighteen credit hours in dramatic literature as follows:
English 2350 and 2351 (Surveys of major dramatic texts)
English 3205 or 3200 or 3201 (Shakespeare)
English 3275 (Modern Drama)
Two Dramatic Literature courses to be selected from the following: English 3021, 3022, 3156, 3171, 3181, 3206, 3260, 4210, 4211, 4301, 4305, 4307, 4308, 4316, 4317
4. Fifteen credit hours in academic elective courses
5. Seventy-five credit hours in Theatre chosen in accordance with the following pattern:
Theatre 1000, 1001, 1010, 1020, 4030, 4040, and 4001 (Harlow Institute - 10 credit hours) and
Forty-seven credit hours in one of the following Majors:
Acting:
Theatre 1110, 2010, 2011, 2080, 2081, 3010, 3011, 3070, 3071, 3080, 3081, 4010, 4070, and 4080
or
Stagecraft:
Theatre 1120, 2020, 2021, 2090, 2091, 3020, 3021, 3060, 3061, 3090, 3091, 4020, 4060, and 4090

9.1.4 Course Structure for the Bachelor of Fine Arts in Theatre

Year 1	Year 3
Fall Theatre 1000 Theatre 1010 Theatre 1020 English 1000/1050 Elective	Fall Theatre 3010 or Theatre 3020 Theatre 3060 or Theatre 3070, Theatre 3080 or Theatre 3090 English 3275 Elective
Winter Theatre 1001 Theatre 1110 or Theatre 1120 English 1001/1051 Elective Elective	Winter Theatre 3011 or Theatre 3021 Theatre 3061 or Theatre 3071 Theatre 3081 or Theatre 3091 Dramatic Literature course Elective
Year 2	Year 4
Fall Theatre 2010 or Theatre 2020 Theatre 2080 or Theatre 2090 English 2350 English 3205 Visual Arts 2700	Fall Theatre 4010 or Theatre 4020 Theatre 4060 or Theatre 4070 Theatre 4080 or Theatre 4090 Theatre 4040 Theatre 4030
Winter Theatre 2011 or Theatre 2021 Theatre 2081 or Theatre 2091 English 2351 Dramatic Literature course Visual Arts 2701	Winter Theatre 4001 (Harlow Institute - 10 credit hours)

9.2 Bachelor of Fine Arts (Visual Arts)

The Bachelor of Fine Arts (Visual Arts) degree program is a professional program designed to educate and train the student in the history, theory and practice of the Visual Arts. Courses are offered in Drawing, Painting, Sculpture, Printmaking, Photography, Multi-media, Digital Imaging and Digital Multi-Media, and Art History. The curriculum is devised with the aim of producing well-rounded generalists with a solid grounding in all aspects of the Visual Arts. It illustrates the philosophy that artistic freedom and creative expression require both technical skill and intellectual vision, acquired through a disciplined application of effort and a critical awareness of artistic issues, past and present.

In addition to Studio and Art History courses, the student will take a number of appropriate academic courses from disciplines other than Visual Arts, chosen in consultation with the program chair. It is intended that academic courses be chosen which will enhance the Bachelor of Fine Arts (Visual Arts) program and provide, as far as possible, a broad exposure to the liberal arts. The first year of the program consists of intensive foundation of co-requisite courses in Drawing, Two-Dimensional Design and Three-Dimensional Design in preparation for Introductory studio courses in the second year and intermediate studio courses in the third year. In the fourth year, the 4950/4951 studio courses are conducted as tutorials, that is, students will work independently on projects and confer regularly with instructors.

It is recognized that students in the Bachelor of Fine Arts (Visual Arts) program must have occasional opportunities to view important works of art first-hand. Arrangements will therefore be made where possible for students to visit major art centres.

The Bachelor of Fine Arts (Visual Arts) program is rigorous and demanding and it is assumed that students will normally be enrolled for full-time study. A student who withdraws from a course may put his/her program in jeopardy or be unable to complete the degree in the normally allotted time. Where circumstances warrant, any prerequisite(s) or co-requisite(s) for Visual Arts courses may be waived by the Program Chair. Any Visual Arts regulations may be waived by the Committee on Undergraduate Studies upon request of the Program Chair.

9.2.1 Admission Requirements

9.2.1.1 Academic Requirements

Applicants must meet the general admission requirements of the University.

9.2.1.2 Portfolio Submission

In addition to meeting the general admission requirements of the University, all applicants will be required to submit a portfolio of previous art work and a completed Visual Arts application form before March 1st of the year in which entry is sought. Although it is assumed that applicants will have had no previous formal training in art, evidence of suitability for study in the visual arts is required. Instructions for the submission of portfolios will be provided by the Fine Arts Division upon request. Enrollment in the Bachelor of Fine Arts (Visual Arts) program is limited and selection is competitive.

9.2.1.3 Transfers From Other Universities/Colleges

See **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)**.

9.2.2 Academic Performance

- Attendance at all studio courses is considered vital to the program and will be required. It will be used as part of the evaluation.
- Students who fail a course in a studio discipline shall not take more advanced courses in that discipline until the failed course has been satisfactorily completed.
 - Students who fail any studio course will be required to repeat that course and obtain a grade of at least 65%.

3. A candidate whose average in Visual Arts courses falls below 65% in any semester will be placed on probation by the Visual Arts program.
4. A candidate will be required to withdraw from the program if:
 - a. The candidate's cumulative average in Visual Arts courses required for the program falls below 65%. OR
 - b. The candidate's average in Visual Arts courses falls below 65% in each of two consecutive semesters of enrolment in the program.
5. A candidate will be denied graduation if, at the end of the final semester of the Visual Arts Program:
 - a. The candidate's cumulative average in Visual Arts courses required for the program falls below 65%. OR
 - b. The candidate's term average in Visual Arts courses falls below 65% in each of his/her last two consecutive semesters of enrolment in the program.

A candidate denied graduation for either of these reasons will be permitted to register for Visual Arts courses without a waiting period and re-application, and is not bound by Regulation 8 (below).
6. Students who have voluntarily withdrawn from the Bachelor of Fine Arts (Visual Arts) program and wish to re-enter must re-apply in competition by March 1st for the upcoming Fall semester, or by August 30th for the upcoming Winter semester.
7. Students who have been required to withdraw from the Bachelor of Fine Arts (Visual Arts) program and wish to re-enter must re-apply in competition after a lapse of two semesters by March 1st for the upcoming academic year.
8. Candidates who have been required to withdraw twice from the Bachelor of Fine Arts (Visual Arts) program shall be ineligible for further admission.
9. Students denied promotion with a cumulative average below 60% in Visual Arts courses who are re-admitted to the program will normally be required to repeat all the Visual Arts courses of the term, including all the courses which have been passed (in a semester when the courses are normally offered).
10. Students denied promotion with a cumulative average of at least 60% in Visual Arts courses who are readmitted to the program will be required to repeat the failed Visual Arts courses only (in a semester when such courses are normally offered).

9.2.3 Degree Regulations

Visual Arts 1000 and 1001 and Visual Arts 2300 and 2301 are not accepted as credits towards the Bachelor of Fine Arts (Visual Arts) degree. One work of art done during the fourth year will be selected by the Visual Arts Program, in consultation with the student, and retained for the permanent collection of the Campus.

To be awarded the degree of Bachelor of Fine Arts (Visual Arts) a student shall successfully complete 120 credit hours as follows:

1. Six credit hours in English courses.
2. Eighteen credit hours in academic elective courses chosen from Disciplines other than Visual Arts.
3. Visual Arts 2700 and 2701 and an additional 18 credit hours in Art History
4. Visual Arts 1500 and 1501, Visual Arts 1510 and 1511, Visual Arts 1520 and 1521; Visual Arts 2000 and 2001.
5. Studio Courses

Forty-two credit hours in studio courses as follows:

- a. 18 credit hours at the 2000 level.
- b. 18 credit hours at the 3000 level.
- c. Six additional credit hours in studio electives at 2000 or 3000 level.

Students must normally complete Visual Arts 1500 and 1501, Visual Arts 1510 and 1511, Visual Arts 1520 and 1521 before advancing to any 2000 level studio course.

Studio courses are offered in the following subjects: Drawing, Two-dimensional design, Three-dimensional design, Painting, Sculpture, Printmaking, Printmedia, Photography and Multi-media, Digital Imaging and Digital Multi-media. Courses in a studio subject consist of six hours of practical work in a studio class each week. Assigned projects will require that considerable additional studio work be done outside scheduled class time. Students will supply their own art materials. Some courses may not be offered every year. Please consult with the Fine Arts Division prior to registration to confirm course offerings.

6. Visual Arts 4950 and 4951

Program Example:

Year 1 - Foundation Year

Drawing I and II (Visual Arts 1500 and 1501)
 Two-D Design I & II (Visual Arts 1510 and 1511)
 Three-D Design I & II (Visual Arts 1520 and 1521)
 Six credit hours in Art History Survey I, II (Visual Arts 2700 and 2701)
 Six credit hours in English

Year 2

Second Year Drawing I, II (2000/2001)
 Twelve additional credit hours in 2000 level Studio Courses
 Six credit hours in Art History Courses
 Six credit hours in Academic Electives to be chosen in consultation with the Academic Advisor

Year 3

Twelve credit hours in 3000 level Studio Courses
 Six credit hours in 2000 level Studio Courses
 Six credit hours in Art History Courses
 Six credit hours in Academic Electives to be chosen in consultation with the Academic Advisor

Year 4

Independent Projects in Studio I, II (4950/4951) 3 credit hours each
 Six credit hours in 3000 level Studio Courses
 Six credit hours in Art History Courses
 Six credit hours in Academic Electives to be chosen in consultation with the Academic Advisor

9.3 Minor Program - Fine Arts

Art History Minor

Visual Arts 2700 and 2701

18 credit hours in Art History at the 3000- or 4000-level

10 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Division.

Prerequisites may be waived by the Head/Program Chair of the course area in question.

Upon the recommendation of the appropriate Program Chair(s), any Major requirements may be waived by the Academic Studies Committee.

Some of the courses in this section of the Calendar are available only at Grenfell Campus. Students who choose to transfer from Grenfell Campus to the St. John's campus should see their faculty advisor to determine the extent to which such courses can be applied to their new program.

10.1 Anthropology

Anthropology 1030 and Anthropology 1031 or an equivalent course or courses are required of all students wishing to concentrate in anthropology.

The following courses, cross-listed with the Department of Sociology and identified by the prefix "S/A", are also taught at the introductory level: 2200, 2210, 2220, 2230, 2240, 2260, 2270, 2280, and 2350. These courses can be taken as first courses or may be taken following an Anthropology introductory course.

Anthropology courses are designated by ANTH.

1031 Introduction to Anthropology is a general introduction to Anthropology emphasizing different forms of society and culture. Cultures within and outside the Western tradition will be examined, ranging from small-scale to more complex pre-industrial societies.

CR: the former ANTH 1000 or 2000

2200 Communities (S/A 2200) is an interdisciplinary examination of the concept of Community. Readings will include community studies from North America and Europe.

2210 Communication and Culture (S/A 2210) is an examination of verbal and non-verbal systems of communication, and the influence of language on human cognition.

2230 Newfoundland Society and Culture (S/A 2230) (same as Folklore 2230) examines the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.

CR: Folklore 2230

2240 Canadian Society and Culture (S/A 2240) is a descriptive and analytic approach to the development of Canadian society and culture.

2260 War and Aggression (S/A 2260) is a critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.

2270 Families (S/A 2270) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

2280 The City (S/A 2280) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

2300 Newfoundland Folklore (same as Folklore 2300) is a survey of the various types of Folklore: tale, song, rhyme, riddle, proverb, belief, custom, folklore and others, with stress on their function in the Newfoundland community culture. Individual collection and analysis of materials from the students' home communities, supplemented by data from the Memorial University of Newfoundland Folklore and Language Archive.

CR: the former Folklore 3420, Folklore 2300

PR: Folklore 1000 or Folklore 2000, or ANTH 1031

2350 Religious Institutions (S/A 2350) (same as Religious Studies 2350) is a comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and

revitalization.

CR: Religious Studies 2350

2410 Classics in Social and Cultural Anthropology is an examination of selected milestone monographs, ground-breaking studies for subdisciplinary specialties and major syntheses.

2411 Anthropologists in the Field base many of their ideas on experiences they have while living in other cultures. This course examines the human relationships through which anthropologists explore cultures and how in turn these relationships affect the anthropologists and the development of their discipline.

2412 Threatened Peoples is an examination of key social and cultural factors involved in the global extinction of small-scale societies; the intrusive influences that jeopardize small-scale societies, such as disease; economic and military incursion; the role of international non-governmental agencies in aid of threatened peoples; and the role of the anthropologist in this human crisis.

2413 Modern World Cultures is an examination of significant studies of 20th century populations and their implications for understanding the human condition.

2500 Folk Literature (same as Folklore 2500) is an examination of the major genres of folk literature: folk narrative, folk poetry and song, folk drama, and the traditional generic forms within folk speech. An introduction to the textual, comparative and contextual methods of analysis. The literature discussed will be international in scope.

CR: Folklore 2500, the former Folklore 3400, English 3400, Sociology/Anthropology 3400,

PR: Folklore 1000 or Folklore 2000, or ANTH 1031

3053 Anthropology of Religion is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.

CR: Religious Studies 3053

3080 The Third World is an examination of the anthropology of the Third World. The course considers perspectives on peasantry, including such topics as underdevelopment, land reform, hunger, political and social movement.

3083 Cultural Crises and the Environment is an examination of social and cultural aspects of dilemmas in the use of renewable and non-renewable resources such as animals, arable land, forests, fisheries, air, water, fossil fuel, and nuclear energy. Special attention to Third World and marginal populations.

3140 Social Movements (S/A 3140) is an examination of social movements which challenge prevailing social institutions and cultural values. Social movements considered may include religious cults and sects, millenarian movements, attempts at utopian and communal living, feminism, labour and revolutionary movements.

3210 Persistence and Change in Rural Society (S/A 3210) assesses the social and cultural significance of the rural experience in the face of expanding urbanism. Topics may include (a) the nature of rural society in Canada, (b) similarities between Canadian and European rural society, (c) utopian and anarchist movements in rural life, and (d) reaction of agricultural populations to external influence.

3314 Gender and Society (S/A 3314) is an examination of biological, psychological, social and cultural aspects of gender, with an emphasis upon contemporary directions of change in sex roles.

3520 The Early Ethnohistory of North America's Native People (same as History 3520) explores the North American native response to early European contact and initial settlement. Particular attention will be paid to cultural change resulting from the adoption of European goods, participation in the fur trade, the introduction of European disease, and the adaptation to a permanent European presence.

CR: History 3520

3525 The Later Ethnohistory of North America's Native People (A/P) (same as History 3525) examines Indian and Inuit cultural history of the 18th and 19th centuries, including the fur trade, resistance and accommodation to European expansion, the emergence of revitalization movements, demographic changes, and population shifts. Special emphasis will be placed on the ethnohistory of the native peoples of what is now Canada and northern United States.

CR: History 3525

4071 Social and Cultural Aspects of Health and Illness (S/A 4071) covers topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine. Open to those without normal prerequisites by permission of the Instructor.

4072 Social and Cultural Aspects of Death (S/A 4072) covers topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the Instructor.

4440 Music and Culture (S/C 4440) (same as Folklore 4440, Music 4040, the former Music 4440) explores traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.

CR: Folklore 4440, Music 4040, the former Music 4440

10.2 Biochemistry

Biochemistry courses are designated by BIOC.

1430 Biochemistry for Nurses is an introduction to the chemistry and structure-function relationships of carbohydrates, lipids and proteins. Basic metabolism of carbohydrates and fats, with emphasis on the biochemical fluctuations that occur in human health and disease. A brief introduction to molecular genetics. This course may not be used for credit to fulfil the requirements for a major in the Department of Biochemistry. Entry into this course is restricted to students in the Bachelor of Nursing (Collaborative) Program. Prospective fast-track program students should consult with the School of Nursing concerning admission to this course.

CR: the former BIOC 2430

LC: 4

PR: Level 3 Chemistry or Chemistry 1010 or Chemistry 1810 or equivalent

10.3 Biology

Students may obtain credit for only 6 1000-level credit hours in Biology. Normally, these courses will be Biology 1001-1002, which are prerequisite to all higher courses in Biology, except where noted below.

Biology courses are designated by BIOL.

1001-1002 Principles of Biology is an introduction to the science of Biology, including a discussion of the unity, diversity and evolution of living organisms.

LH: 3

PR: BIOL 1001 is a prerequisite for BIOL 1002

2010 Biology of Plants is a study of the structure, function and reproductive Biology of plants, with emphasis on the vascular plants, and on their relationship to environment and human activities.

LC: 3

LH: 3

PR: BIOL 1001, BIOL 1002, and Chemistry 1001

2040 Modern Biology and Human Society I examines various aspects of the human body, and the implications of modern biological research for human beings. Topics include cancer; diet and nutrition and associated diseases; circulatory disease, immunity, human genetics, biorhythms, new diseases, genetic engineering and reproductive engineering.

UL: cannot be used towards the Minor, Major or Honours programs in Biology

2041 Modern Biology and Human Society II examines the origins and consequences of the environmental crisis of the 20th century. Topics include the population explosion, energy, material cycles, air and water and land pollution, global food supplies, the fisheries, wildlands, renewable and non-renewable resources, environmental ethics.

UL: cannot be used towards the Minor, Major or Honours programs in Biology

2122 Biology of Invertebrates is a study of the invertebrates with emphasis on structure and function, adaptations and life histories. The laboratories will present a broad survey of the major invertebrate groups.

CR: the former BIOL 3122

LH: 3

PR: BIOL 1001 and BIOL 1002

2210 Biology of Vertebrates is a study of the vertebrates, with emphasis on structure and function, adaptations and life histories.

CR: the former BIOL 3210

LH: 3

PR: BIOL 1002

2250 Principles of Genetics is an introduction to Mendelian and molecular genetics. Phenotype and genotype, behaviour of alleles in genetic crosses, chromosome theory of inheritance, genetic linkage, molecular Biology of DNA, RNA and protein, molecular basis of mutation, recombinant DNA, applications of genetic biotechnology.

CO: Chemistry 2440 or Chemistry 2400

CR: the former BIOL 3250

LH: 3

PR: Chemistry 2440 or Chemistry 2400, BIOL 1001 and 1002, Chemistry 1010, 1011 or 1050/1051

2600 Principles of Ecology is a conceptual course introducing the principles of ecology, including theoretical, functional and empirical approaches.

CR: the former BIOL 3600

LH: 3

PR: BIOL 1002

3053 Microbiology for Nurses is a course on the fundamentals of microbiology with an emphasis on medical microbiology. The course will include topics such as: host responses to infections, human diseases caused by microorganisms, and the control and exploitation of microorganisms. Entrance is restricted to Nursing students in the Bachelor of Nursing (Collaborative) program.

LH: 2

UL: cannot be used as one of the required courses for the Minor, Major, or Honours in Biology, nor is it acceptable for any of the joint programs between Biology and other disciplines

10.4 Business

Enrolment in some Business courses is limited and first priority will be given to students registered in Grenfell Campus's Business Administration programs and Memorial University of Newfoundland's Faculty of Business Administration programs.

10.4.1 Core Program Course Descriptions

1000 Introduction to Business in Society introduces the basics of business and business corporations in society, in a real-world relevant manner. Particular attention is given to societal stakeholders and to corporations' internal business processes and management functions. Major emphases include corporate social responsibilities and management ethics, and these are recurring themes in other topics such as technology, globalization and people in organizations. The course is a combination of textbook theory and guided learning activities and assignments based on finding and integrating real-world information.

CR: the former Business 2001

1101 Principles of Accounting (QRA) emphasize the concepts and issues of introductory financial accounting as they relate to the Canadian conceptual framework, and will also address the strengths and weaknesses of financial reporting at an introductory level. The student will be introduced to the accounting process and analysis of the balance sheet, income statement, and the statement of changes in financial position.

CR: the former Business 2100 and the former Business 3100

1210 Introduction to Marketing Strategy (W) introduces students to the concepts, analyses, and activities that comprise marketing strategy and provides practice in assessing and solving strategic problems in marketing. The course is also a foundation for Business 2210 Introduction to Marketing Tactics and for advanced electives in marketing. Topics include: marketing strategy, environmental analysis, competitive analysis, customer behaviour, marketing research, segmentation, targeting, and positioning.

CR: the former Business 1201 or 2201 or 3200, Tourism Studies 2201

PR: Business 1000, Economics 2010, Economics 2020, English 1110 or 1021

1600 Introduction to Entrepreneurship is an introductory course designed to give students a broad understanding of the field of entrepreneurship and the role that entrepreneurship plays in society. Topics will include the nature and theories of entrepreneurship, the characteristics and behaviours of entrepreneurs, and the entrepreneurial process in small and large firms. Students will get to think and act in a creative manner, obtain exposure to local entrepreneurs, assess their potential for entrepreneurial careers and develop attitudes and skills that will be useful in any organization. The course is also useful for those who will be dealing with smaller firms in the context of larger organizations and for those who will be working for entrepreneurs.

PR: Business 1000, and English 1110 or 1021

2010 Business Research and Writing (W) introduces students to research, writing, and reporting processes in business. Through ongoing, multi-stage evaluation, students learn the fundamentals of business research, including analytical thinking and proposal writing involving research using secondary sources. A key focus is the writing process, including grammar, punctuation,

structure, flow, and format in common business communications media. Students also develop their oral presentation competence by presenting the results of their research. A highly interactive design encourages student practice and participation.

CR: Business 2000

PR: Business 1000, and English 1110 or 1021

2101 Managerial Accounting (QRA) provides an overview of the use of financial data for managerial decision making. The student will be introduced to basic budgeting and analysis techniques for both service-oriented and manufacturing businesses.

CR: the former Business 4100

PR: Business 1101

2210 Introduction to Marketing Tactics (W) introduces students to the concepts, analyses, and activities that comprise marketing tactics and provides practice in making decisions about tactical problems in marketing. The course is also a foundation for advanced electives in marketing. Topics include: product management, pricing, marketing communications, channels of distribution, implementation, and budgeting.

CR: the former Business 1201 or 2201 or 3200, Tourism Studies 2201

PR: Business 1210, Mathematics 1000

2400 Decision Modeling (QRA) provides an introduction to: spreadsheet modeling; linear optimization and the related topics of integer, assignment, and transportation models; and decision analysis including payoff matrices, decision trees, and Bayesian revision. All topics will be taught within the context of business applications.

CO: Statistics 2500

CR: the former Business 4401

PR: Mathematics 1000

2700 Computing and Information Systems for Business serves to introduce computer applications in document processing, spreadsheet and database management, and basic web design and technology. Students will also examine the role of information systems and their design and management in supporting business decision making, and ethical issues surrounding technology in the workplace.

CR: Computer Science 1600, Computer Science 2650, Computer Science 2801

LH: 3

PR: Business 1000

UL: cannot be used as a Business elective in programs offered by the Faculty of Business Administration

3310 Organizational Behaviour (W) (formerly Business 2301 and 4300) focuses on the study of individual and group processes in formal organizations. The student is introduced to the nature of work, the systematic approach to the study of behaviour, organizational roles and socialization, motivation, leadership, communication, and group dynamics.

CR: the former Business 2301 and the former Business 4300

PR: English 1110 or 1021

3401 Operations Management (QRA) teaches fundamental concepts, methods, tools, and techniques to understand, analyze, and effectively manage as well as improve operations in business organizations. The course covers operations competitiveness and strategy, productivity, forecasting, capacity planning, material requirements planning, waiting lines analysis, project management, inventory management, quality control and its improvement, and supply chain management.

CR: the former Business 5400

PR: Statistics 2500, and Business 2400 or the former Business 2401

4000 Business Law I is a course dealing with the law relating to certain aspects of business activity; includes introductory material on the nature of law and legal processes, together with a detailed study of certain aspects of the law of contract, examination of the general principles of the law of agency as they affect business operations; introduction to selected topics in company and partnership law.

CR: the former Business 3000

4050 Strategic Management 1 introduces students to the strategic management approach. The course builds upon the knowledge and concepts developed in Business 1000 and prepares students for later business courses in their programs, especially Business 7000. Through experience and analysis in and of real or reality-based situations and issues, students will develop critical and integrative thinking and information literacy. Activity and action components of the strategic management process are the basis for student learning. The purpose of this course is to recognize the importance of situational analysis and strategy in the management process, including business functional and organizational integrative thinking, and decision-making regarding courses of action, resource allocation, and leadership.

CO: Business 4000 and Business 4330

PR: Business 1600, 2010, 2101, 2210, 2400, 3310, 3401

4320 Human Resource Management introduces the student to the design, operation and management of HRM processes, their evaluation, and their contribution to employee and organization effectiveness. The principal processes considered are staffing, development, employment relations, and

compensation. Consideration of the influence of relevant organizational and external conditions on HRM is included. The course views the management of human resources as the joint responsibility of line and HRM managers.

PR: Business 3310 or the former Business 2301

4330 Introduction to Labour Relations (formerly Business 3320) provides an introduction to the field of industrial and labour relations in Canada, with primary emphasis on the labour-management relationship. Students will be introduced to the basic elements of an industrial relations system, including the participants, their roles and relationships, the social economic, legal and political environment in which the participants interact, and the process and outcomes of collective bargaining. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

CR: the former Business 3320

PR: English 1021 or English 1110

4500 Financial Management I (QRA) is designed to introduce the student to the role of financial management in business, financial analysis techniques, working capital management, and long-term and short-term financing.

CR: the former Business 4110

PR: Business 1101, Economics 2010 and Statistics 2500

5301 Organizational Theory focuses on the organization, its environment, and its subsystems. From providing a basic appreciation of the role and practice of research in organizations, study extends to measures of organizational effectiveness, determinants of structure and design, power and politics, intergroup conflicts and conflict resolution, and organizational development and change.

CR: the former Business 5300

PR: Business 3310 or the former Business 2301

7000 Strategic Management 2 (W) emphasizes concepts of strategic management and strategy in various contexts and situations covering corporations and businesses, and other institutions or organizations and their purposeful activities. Through in-depth analysis of reality-based situations and strategic issues, students will develop their contextual and situational orientation, and further develop their applied, investigative critical thinking and information search skills. Further, students will be expected to develop an applied ability in the contextual and situational analysis of corporation/businesses and institutions/purposeful activities, and in corresponding strategy formulation and planning for strategy implementation. Students learning activities may be based on published simulation exercises, decision-making and group dynamics exercises, business simulation exercises, and information search projects. Learning outcomes also may include research and information search methodologies and information literacy, and good writing.

PR: Business 4050, 4320, 4500, and 5301

7010 Business and Society (W) examines the inter-relationships among business, government, society and the environment. Topics include: the social-economic business system, business ideologies, social responsibilities of business, business ethics, stakeholder and issues management, and selected current issues in business.

PR: restricted to Bachelor of Business Administration students who have completed at least 90 credit hours, or permission of the Chair of Business

10.4.2 Business Electives

All existing business courses at Memorial University of Newfoundland that are not included in the Grenfell Campus B.B.A. core will be considered business electives. When choosing electives, students must ensure that they satisfy requirements for one of the concentrations listed under **The Curriculum, 3.**

2000 Business Communications (W) focuses on the development of written and oral communication skills in the workplace. The common communications media are reviewed with emphasis on electronic and written correspondence. Students learn how to prepare comprehensive analytical reports including proposal writing. Attention is also given to building confidence in delivering oral presentations and preparing appropriate employment packages. A highly interactive design encourages student practice and participation.

CR: Business 2010

UL: may not be used to fulfill any of the requirements of any of the programs of the Faculty of Business Administration, including the minor, diploma and degrees

2808 Business Ethics (W) examines the implications of business conduct using ethics as a framework, and will provide the tools to anticipate, critically analyse, appropriately respond to, and provide personal and professional leadership regarding critical ethical issues that will arise both during professional and personal careers.

3101 Accounting Applications (QRA) continues the study of accounting on a more in-depth and detailed basis. Building on the theory and concepts of Business 1101 and 2101, Business 3101 will emphasize the procedures

and techniques required for the preparation and presentation of accounting information and general purposes financial statements.

CR: the former Business 2100 or the former Business 3100
PR: Business 1101

3210 Consumer Behaviour deals with concepts related to factors with influence the purchase and consumption behaviour of individuals including culture, social class, reference groups, perception, learning motivation, personality and lifestyle. The unique aspects of groups and organizational buyers will also be examined.

CR: the former 5200
PR: Business 2010 and Business 2210 or the former Business 2201, or the former Business 3200.

3350 Principles of Leadership will build on the concepts introduced in Organizational Behaviour, providing students the opportunity to explore various theories of leadership and styles, and to evaluate their own personal leadership profiles. Students will examine motivation and coaching, strategic leadership and change management, among other topics.

PR: Business 3310 or the former Business 2301

4010 Government Policy and Economic Development examines the integration of Government policy, scientific understanding, local knowledge and social and economic principles for sustainable economic development. Students will explore experiences with various institutions, regulations and policy instruments in dealing with economic development, both theoretically and in a number of case studies.

PR: Business 1000, Economics 2010 and Economics 2020

4020 Research and Economic Analysis will examine the interpretation and analysis of research tools and methods commonly utilized in assessing the impact of economic development in the context of local government, business, social and cultural, and institutional environments.

PR: the former Business 2401, Business 4500, Economics 2010, and Economics 2020

5000 Business Law II is designed to show the student how principles of Law are applied to four areas of Business. The areas dealt with in this course are accounting/finance, marketing, personnel and production.

PR: Business 4000

5010 International Development addresses present critical issues in international development such as sources of national and international economic development, causes of poverty, the role of international trade and financial aid, foreign debt problems, the role of the government and its policies, and globalization. Through lectures, class discussions and project writing it aims to develop the students' knowledge of different theories of development and their ability to identify and analyse the major economic problems, as well as to think critically and to find solutions.

PR: Economics 2010, Economics 2020, Mathematics 1000, and Statistics 2500

5210 Marketing Communications provides a theoretical background on the nature, role and principles of marketing communications; and develops analytical and decision-making skills in planning, executing, evaluating and controlling marketing communications campaigns.

CR: the former Business 6210
PR: Business 2010, Business 2210 or the former Business 2201, or the former Business 3200

5220 Marketing Research (W) is designed to acquaint the student with the use of marketing research as an aid to management. This is a comprehensive survey of the scope and methods of marketing research.

CR: the former Business 6200
PR: Statistics 2500, Business 2010, and Business 2210 or the former 2201, or the former 3200

5302 International Business is designed to introduce students to the issues of international business: these are the processes of cultural confrontation and compromise; the problems of competitive sovereignty involving multinational corporations and the governments of host societies; the organization, structure, operation and control of diverse international businesses; and, finally, the role of multinational enterprise as a catalyst in economic development and resources employment, in particular, the North-South context. The relevance of international business as an area of study to the Canadian economy is discussed. The course is both conceptual and empirical in content.

CR: the former BUSI 7302
PR: Business 1000 and Economics 2010 and 2020

5500 Financial Management II (QRA) (formerly Business 5140 and Business 7140) is an extension of Business 4500. Capital investment decision-making using discounted cash flow methodology; investments under certainty; financial structure and leverage; analysis of money and capital markets; further examination of long-term external financing.

CR: the former Business 5140, the former Business 7140
PR: Business 4500 or the former Business 4110

5530 Public Finance recognizes the large role played by government in our society. Sources and uses of government funds at the federal, provincial and

local levels will be covered. Intergovernmental fiscal problems will be examined with special emphasis on various incentive programs available to business from the three levels of government.

CR: the former Business 5100
PR: Economics 2010 and Economics 2020

5600 New Venture Creation (formerly Business 5030 and Business 7030) covers the business creation process from the idea conception stage to the launch stage. Students learn how to search for, screen and evaluate opportunities, and to plan and assemble the required resources, including the preparation of an actual business plan. Alternatives to new venture creation, such as purchasing an existing business and purchasing a franchise, are also explored. Extensive group work is required.

CR: the former Business 5030, the former Business 7030
PR: Business 1101, Business 1600, and Business 2210

6040 International Business Law develops the skills a business student must have in understanding the laws and regulations that exist and relate to international business decision making. The course will equip students with a knowledge and understanding of laws and regulations that currently prevail in international business operations.

PR: Business 4000

6120 Taxation I is a determination of income tax liability of individuals and corporations, and a survey of sales taxes.

PR: Business 1101 or the former Business 3100, and Business 4000

6500 Family Business, Franchising, and Buying an Enterprise (W) examines various forms of business ventures and the recognition and treatment of associated risks. Emphasis is on the critical importance of the entrepreneur, the demands and the risks faced as well as the rewards and satisfactions to be expected from family-run business, franchising, and enterprise takeover.

PR: Business 1101, Business 1600, and Business 2210

6510 Investments is a study of investment securities, risks, markets and mechanics; an appraisal of the economy, the industry and the firm; and portfolio management for personal and institutional investments.

CR: the former Business 6140
PR: Business 4500 or the former Business 4110

6600 Managing Growth in the Small Firm is designed to introduce the student to the challenges and opportunities of managing small growing businesses. The focus will be on functional issues and solutions within the context of growth oriented small firms. In addition, the course will explore strategic planning in the owner-managed business and strategies for growth and expansion. Extensive use will be made of cases and examples from Atlantic Canada.

CR: the former Business 6030
PR: Business 5600

6610 Small Enterprise and Regional Development (formerly Business 6009 and Business 7031) explores the potential and constraints on efforts to foster small enterprise formation and expansion as a means to promote regional economic development. It critically examines government initiatives to promote small business as the panacea for depressed regional economies, and reviews changes in the global economy and the organization of production which may enhance small business competitiveness. Both Canadian and international cases are studied, with theoretical and empirical findings related to the Newfoundland context.

CR: the former Business 6009 and the former Business 7031

6800 Current Topics in Rural Economic Development (W) focuses on case studies of rewards and challenges inherent in rural economic development. Potential areas of consideration would include economic, environmental, political, and socio-cultural impacts of economic development.

PR: successful completion of at least 60 credit hours

7025 Management Decision Making (W) is a case-based course that takes a critical look at the decision-making process and examines the complexities of the business environment that affect both the effectiveness and efficiency of decision making, including environmental uncertainty, and competing stakeholder interests. Through case analysis, students will have an opportunity to evaluate and practice both qualitative and quantitative managerial decision making skills as they apply to areas such as marketing, human resources, production and operations, and business planning. Topics to be covered may include: decision theory, evaluating risk and uncertainty, game theory, and creative problem solving.

CR: the former Business 4401, the former Business 3400
PR: restricted to Bachelor of Business Administration students who have completed at least 75 credit hours
UL: cannot be used to satisfy the requirement of the former Business 4401 in any program

7050 Current Topics in Business (W) includes current topics in contemporary business thinking will be examined and evaluated in a seminar format. Seminars will be presented by faculty, students, and guest speakers.

PR: restricted to B.B.A. students who have completed at least 90 credit

hours, or students who have permission of the Chair of Business

7600 Current Topics in Entrepreneurship (W) endeavours to address recent research findings in various aspects of entrepreneurship. Students will have the opportunity to pursue issues in entrepreneurship development covering a wide range of topics using publications, journals and conference proceedings.

CR: the former Business 7032
PR: Business 5600

7610 Regulatory and Taxation Issues for Small Business is designed to provide students with a general knowledge base of the various tax and other regulatory issues that should be considered in starting a business. The role that tax plays in decision making will be examined as well as the types of corporate funding to establish a new business through government grants, conventional loans and tax credits as provided under the Income Tax Act. Alternative corporate structures will be examined as well as aspects of employee compensation and business valuations. Practical aspects of starting your own business, such as registration requirements, will also be examined.

PR: Business 6120

10.5 Chemistry

Attendance for all Chemistry Laboratory sessions is mandatory. Failure to attend may result in a failing grade or deregistration from the course.

Students are strongly advised to complete the Chemistry sequence appropriate to their stream (Chemistry 1200/1001 or 1010/1011 or 1011/1031 or 1050/1051) on the campus they first attend prior to transfer to another campus. Consult the credit restrictions listed under the St. John's Campus Department of Chemistry section of the University Calendar.

Chemistry courses are designated by CHEM.

1001 General Chemistry II is rates of reaction, chemical equilibria, thermodynamics, and introduction to organic chemistry.

AR: attendance is required
CR: credit may be obtained for only one of the following pairs of courses:
CHEM 1000 and CHEM 1001; CHEM 1200 and CHEM 1001
LC: 4 including tutorials
LH: 3
PR: CHEM 1200 or equivalent

1200 General Chemistry I is atomic structure and bonding, stoichiometry, reactions in aqueous solutions, gases, energetics of chemical reactions, the periodic table, chemical bonding and molecular geometry, intermolecular forces. This introductory course is intended for students who have a knowledge of high school chemistry. This course is offered at Grenfell Campus only.

AR: attendance is required
CO: credit may be obtained for only one of the following pairs of courses:
CHEM 1000 and CHEM 1001; CHEM 1200 and CHEM 1001
LC: 4
LH: 3

1810 Elements of Chemistry is matter, scientific measurement, atomic theory, the periodic table, chemical compounds and elementary bonding theory, the mole, chemical reactions, the chemistry of selected elements, gases, solutions, stoichiometry. This course is specifically intended for those who have no background in chemistry. This course is offered at Grenfell Campus only.

AR: attendance is required
CR: the former CHEM 1800
LC: 4
LH: 3
UL: may not be used as one of the Chemistry courses required for a B.Sc. Degree with a Specialization in Environmental Science at Grenfell Campus, nor for a Major or Honours in Chemistry, nor towards fulfilment of the 78 credit hours in science courses required for the B.Sc. degree on the St. John's campus.

1900 Chemistry in Everyday Life is a course that shows the relevance of chemistry in our daily lives. Following an introduction to atomic structure and chemical bonding, the course will focus on some of the following topics: organic chemistry and fuels; redox processes and batteries; acids, bases, and household cleaners; phases and detergents; the chemical components of foods; polymers and plastics; toiletries, and pharmaceuticals.

UL: may not be used as one of the required courses towards a Minor, Major, or Honours in any science degree program

2210 Introductory Inorganic Chemistry is structural chemistry of the solid state. Introduction to molecular orbital and crystal field theories. Chemistry of the s, p, and d block elements.

AR: attendance is required
LH: 3
PR: CHEM 1001 (or CHEM 1031 or CHEM 1051), Mathematics 1000

2300 Introductory Physical Chemistry is introductory chemical thermodynamics and equilibria. Complementary laboratory work with an emphasis on quantitative analysis.

AR: attendance is required
CR: CHEM 2301
LH: 3
PR: CHEM 1001 (or CHEM 1031 or CHEM 1051), Mathematics 1001, Physics 1051 (or Physics 1021)

2400 Introductory Organic Chemistry I (F) is bonding involving carbon; conformations and stereochemistry; introduction to functional groups and nomenclature; properties, syntheses and re-actions of hydrocarbons, alkyl halides and alcohols.

AR: attendance is required
CR: the former CHEM 2420, CHEM 2440, the former CHEM 240A/B
LH: 3
PR: CHEM 1051 or CHEM 1031; or CHEM 1010 and CHEM 1011 with a grade of at least 80% in each; or CHEM 1011 with a grade of at least 85%; or CHEM 1001 with a grade of at least 65%

2401 Introductory Organic Chemistry II (W) is an introduction to the interpretation of infrared, H and C-13 NMR spectroscopy; properties, syntheses and reactions of ethers, simple aromatic compounds, ketones, aldehydes, amines, carboxylic acids and their derivatives; aldol and related reactions.

AR: attendance is required
CR: the former CHEM 2420, CHEM 2440, the former CHEM 240A/B
LH: 3
PR: CHEM 2400

2440 Organic Chemistry for Biologists is an introduction to the principles of organic chemistry with an emphasis on material relevant to biological molecules. The laboratory will introduce techniques and illustrate concepts covered in the course.

AR: attendance is required
CR: CHEM 2400, the former CHEM 2420, the former CHEM 240A/B.
LH: 3
PR: CHEM 1011 (or CHEM 1001 or CHEM 1051)
UL: is designed primarily for Biology Majors and may not be used for credit by Chemistry or Biochemistry Majors and may not serve as a prerequisite for any other Chemistry course.

10.6 Classics

Classics courses are designated by CLAS.

1120 and 1121 Elementary Latin is an introduction to the grammar and syntax of Latin, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.

CR: the former CLAS 120A and 120B
PR: CLAS 1120 is the prerequisite for CLAS 1121

1130 and 1131 Elementary Ancient Greek is an introduction to the grammar and syntax of ancient Greek, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.

CR: the former CLAS 130A and 130B
PR: CLAS 1130 is the prerequisite for CLAS 1131

1100 Introduction to Greek Civilization is a general illustrated survey of the origins and evolution of Ancient Greek Civilization. The course introduces the student to Greek social and political institutions, religion and myth, and achievements in art, philosophy, science and literature, as well as the influence of Ancient Greece on the modern world.

CR: the former CLAS 1000, the former CLAS 2000

1200 Introduction to Roman Civilization is a general illustrated survey of the origins and evolution of Ancient Rome. The course introduces the student to social, political, and legal institutions, the growth of the Roman Empire, Roman art, literature, and religions, as well as Rome's pervasive influence in the modern world.

CR: the former CLAS 1000, the former CLAS 1101, the former CLAS 2001

2010 Greek Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Greece.

CR: the former CLAS 3100, the former CLAS 3101

2015 Roman Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Rome.

CR: the former CLAS 3100, the former CLAS 3102.

2020 History of the Hellenistic World (same as History 2034) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.

2035 History of Classical Greece (same as History 2035) is a survey of Greek History from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century,

B.C.

CR: History 2035, the former CLAS/History 3910, the former CLAS/History 2030

2040 History of Rome (same as History 2040) is a survey of Roman History from the early monarchy to the reign of Constantine with special reference to society and politics in the late Republic and early Empire.

CR: History 2040, the former CLAS/History 3920

2055 Women in Greece and Rome is an examination of the role of women in ancient Greece and Rome from the perspectives of religion, literature, art, society, and politics. Critical assessments of the scholarship and methodologies (including feminist methodologies) relevant to this topic will be included.

2701 History of Ancient Philosophy (same as Philosophy 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Philosophy 2701

2800 Classical Drama I - inactive course.

2801 Classical Drama II - inactive course.

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Religious Studies 3010, the former CLAS/Religious Studies 3121

3020 Roman Religion (same as Religious Studies 3020) is study of the role of religion in the private and public life of the Roman world.

CR: the former CLAS/Religious Studies 3121, Religious Studies 3020

3090 Alexander and the Macedonians investigates the impact of the conquests of Alexander the Great and his Macedonian Successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander's accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.

CR: History 3090

3110 Greek Literature in Translation - inactive course.

3111 Latin Literature in Translation - inactive course.

3130 Greek and Roman Mythology (same as Folklore 3130) is a comparative study of the major myths of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.

CR: Folklore 3130

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics to be discussed include the development of ancient tragedy, its literary, performative and thematic traditions, its representation of social and historical conditions, and its influence on later tragic drama.

CR: the former Classics 2805

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry of ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society.

CR: the former CLAS 2060

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence which informs them. The ancient world's impact on modern Western society will be considered together with the film industry's recasting of the ancient world in response to modern social and historical developments.

4000 Seminar in Greek History and Society will have the topics to be studied announced.

4010 Seminar in Roman History and Society will have the topics to be studied announced.

4020 Seminar in Greek Literature and Culture will have the topics to be studied announced.

4030 Seminar in Roman Literature and Culture will have the topics to be studied announced.

10.7 Computer Science

Computer Science courses are designated by COMP.

1600 Basic Computing and Information Technology (F and W) offers an overview of computers and information technology. It provides students with the knowledge necessary to answer questions, such as: What is a computer

system? How does it work? How is it used? This is done through the use of popular spreadsheet, word processing and database software packages and the Internet. Social issues and implications will also be included.

CR: COMP 2650, COMP 2801

LH: 3

PR: Level III Advanced Mathematics or Mathematics 1090, which can be taken concurrently

1700 Introduction to Computer Science (F and W) lays the foundation for the art and the science of computing. The course contains fundamental and topical issues in computers, languages, programming and applications. This course is designed for potential Computer Science majors without a background in programming, but is also available for non majors.

CO: Mathematics 1090 (or equivalent), or Mathematics 1000

LH: 3

PR: Mathematics 1090 (or equivalent), or Mathematics 1000

10.8 Earth Sciences

Earth Sciences courses are designated by EASC.

1000 Earth Systems is a survey of the structure, function and interrelations of Earth's lithosphere, hydrosphere, atmosphere and biosphere. Topics include an exploration of the physical and chemical properties of planetary materials, forces driving and sustaining Earth systems, and biological modifiers (including humankind) on the Earth today.

LH: 3

1001 Evolution of Earth Systems - inactive course.

1002 Concepts and Methods in Earth Sciences is an introduction to a broad range of concepts concerning the development of the geological record and the Earth; practical methods for collection of field based data; topics in map interpretation and geometric analysis, stratigraphy, paleontology, structure and petrology. The course is presented with an emphasis on the development of practical skills needed to pursue a career in Earth Sciences.

LH: 3

PR: EASC 1000

2150 The Solar System describes the basic astronomy of the Solar System, tracing the search to understand motion of the Sun, Moon and planets in the sky: modern observations of planets, moons, comets, asteroids and meteorites and what they tell us about the origin and evolution of the Solar System. This course is designed for students taking Earth Sciences as an elective.

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences

3811 Paleontology (W) is an outline of the major changes in life forms from Archaean times through the Phanerozoic to the present day, including details of invertebrate and vertebrate faunas and major floral groups; mechanisms and effects of mega- and microevolution in the fossil record; Biology and classification of organisms and summaries of their geological significance in biostratigraphy, paleoecology and rock-building; relationships between major cycles of evolution and extinction to global processes. This course has a laboratory component.

CR: Biology 3811, the former EASC 3801, the former Biology 3800

LH: 3

PR: either Biology 2120 (or Biology 1001 and Biology 1002) and EASC 1002; or Biology 2122 and Biology 2210

10.9 Economics

Economics courses are designated by ECON.

2010 Introduction to Microeconomics I examines scarcity and opportunity cost. Demand and supply. Elasticity. Household demand: marginal utility. Household demand: indifference curves. Production functions. Short-run and long-run cost functions. Perfect competition in the short run and the long run. Monopoly.

2020 Introduction to Macroeconomics covers national income accounting, aggregate income analysis, money, banking and foreign trade.

2550 Economic Statistics and Data Analysis is an analysis of economic statistics and the use of economic data. A course designed to introduce students to the task of economic data collection, description and analysis. Emphasis will be on interpretation and analysis of data using computer software programs.

PR: ECON 2010, ECON 2020, and Statistics 2500 or equivalent.

3000 Intermediate Micro Theory I is the basic microeconomic theory course; consumer demand, indifference curve analysis, theory of production and cost, factor substitution, and the theory of the firm under perfect competition and monopoly.

PR: ECON 2010 and ECON 2020

3001 Intermediate Micro Theory II is a continuation of basic

microeconomic theory; the theory of imperfect competition, theory of factor pricing under various market structures, general equilibrium and welfare economics.

PR: ECON 3000

3010 Intermediate Macro Theory I is aggregate analysis including consumer, investment, government and international sectors, the role of money, determinants of aggregate supply, and the effects of autonomous behavioural changes and fiscal and monetary policies on unemployment, price levels and the balance of payments.

PR: ECON 2010 and ECON 2020

3011 Intermediate Macro Theory II is a consideration of modern theories of macroeconomics, dynamics, empirical evidence and simulation of the national economy. Emphasis on the availability and effectiveness of government policy instruments.

PR: ECON 3010

3030 International Economics: Issues and Problems in a Canadian Context is an intermediate course in international economics. The course covers the theory of comparative advantage, the structure and policy issues of the Canadian balance of payments, the foreign exchange market and the institutional aspects of international commerce.

PR: ECON 2010 and ECON 2020

3050 Economic Forecasting: Methods and Applications aims to present the statistical techniques that are useful for preparing individual business forecasts and long-term business plans by focusing on the application of techniques used by managers in the decision-making process. It involves exploring data patterns, data mining, linear regression, time series, and managing forecasting processes. Knowledge of the basic operations of spreadsheets is recommended.

PR: ECON 2550

3080 Natural Resource and Environmental Economics is application of economic analysis to renewable and nonrenewable natural resource industries such as the fishery, forestry, and mining. Emphasis is given to the criteria for optimal resource use under various market structures and their implications for public policy. Issues of environmental resource management and pollution control will also be covered.

PR: ECON 2010 and ECON 2020

3085 Issues in Ecological Economics aims to explore the dynamic interaction between the economic system and the ecological system that sustains it by using trans-disciplinary theoretical approaches and methodologies. The main focus of this course will be on Ecological Economics concepts such as low and high entropy, biotic and abiotic goods and services, stock-flow resources, carrying capacity, throughput, co-evolution, sustainable scale, use value, and their applications in a problem-solving context.

CO: ECON 2010 and ECON 2020

CR: Environmental Studies 3085, Environmental Studies 4020, and the former Environmental Studies 3010

PR: ECON 2010 and ECON 2020

3150 Money and Banking examines the operation of the money and banking system, with special emphasis on Canadian problems. Monetary theory will be treated in relation to income theory and foreign trade.

PR: ECON 2010 and ECON 2020

3550 Mathematical Economics I examines linear algebra and differential calculus, with applications to economics.

PR: Mathematics 1000 or equivalent with a "B" standing, or Mathematics 2050 and ECON 2010 and ECON 2020

3551 Mathematical Economics II covers integral calculus, difference and differential equations, with applications to Economics.

PR: ECON 3550

4550 Econometrics I covers estimation of the general linear regression model with emphasis on fundamental theory and examples from published empirical research.

PR: ECON 2550, 3000 and 3010.

4551 Econometrics II covers further problems in econometric theory and technique; multicollinearity, autocorrelation, nonlinear estimation, and the identification and estimation of systems of equations. Published empirical research will be discussed and each student will be expected to perform an original empirical study.

PR: ECON 4550

10.10 English Language and Literature

One of English 1000, 1050, the former 1100 and one of English 1001, 1051, 1110 are prerequisites for all other courses.

A student cannot receive credit for more than one of English 1000, 1050, 1080, the former 1100 or for more than one of 1001, 1051, 1101, 1102, 1103, and 1110.

A student cannot receive credit for more than one of English 1020, 1030 or 1110.

A student cannot receive credit for more than 6 credit hours at the first year level. This includes unspecified transfer credits.

No students shall register in any course having an initial digit "3" unless they have successfully completed at least 6 credit hours in courses having an initial digit "2".

No students shall register in any course having an initial digit "4" unless they have successfully completed at least 6 credit hours in courses having an initial digit "3".

10.10.1 English Core Courses

1000 Introduction to English I is an introduction to English literature and to the use of the English language with a particular emphasis on composition.

1001 Introduction to English II is a continuation of the studies begun in English 1000.

PR: English 1000, English 1050, the former English 1100

1110 Comprehension, Writing and Prose Style is an introduction to the analysis of prose and to writing for various purposes, including exposition.

CR: English 1020, English 1030, English 2010,

PR: English 1000, English 1050, English 1080, the former English 1100

2005 Literary Survey I (The beginnings to 1660) introduces students to the major writers by detailed study of selected texts. The course will include such authors as Chaucer, Mallory, Shakespeare, Spenser, Bacon, Webster, Donne and works such as Beowulf, the Old English Elegies and Gawaine and the Green Knight. Recommended for English specialization students that English 2005 be taken first in the English 2005-2006-2007 sequence.

CR: English 2000, English 2110

2006 Literary Survey II (1660-1837) introduces students to the major writers by detailed study of selected texts. The course will include such authors as Dryden, Pope, Swift, Johnson, Fielding, Blake, Wordsworth, Austen, Byron, Keats and Shelley. Recommended for English specialization students that English 2006 be taken second in the 2005-2006-2007 sequence.

2007 Literary Survey III (1837 to the present) introduces students to the major writers by detailed study of selected texts. The course will include such authors as Tennyson, Browning, Arnold, Hardy, George Eliot, Dickens, Yeats, T.S. Eliot and Dylan Thomas. Recommended for English specialization students that English 2007 be taken third in the English 2005-2006-2007 sequence.

CR: English 2001, English 2111

3205 Shakespeare Survey is a study of at least eight plays, two from each dramatic mode: comedy, history, tragedy, and romance.

PR: Two second-year English courses

UL: credit may be obtained for only two of English 3200, English 3201, English 3205, and English 3206

3206 Shakespeare and the Classical Tradition is a study of the relationship between Shakespeare and his major classical sources, with a particular focus on the use of classical literature in the Renaissance.

PR: Two second-year English courses

UL: credit may be obtained for only two of English 3200, English 3201, English 3205, and English 3206

3395 The Literary Uses of English from the Earliest Times to the Present is an exploration of the development of the English language, as evidenced by its literary uses.

CR: English 2401

4105 Critical Approaches and Theory is a survey of critical approaches to English Literature, particularly those adopted by twentieth century readers. The course will attempt to give an account of the theories on which these approaches are based and some attention will be paid to the application of different approaches to specific works of literature.

CR: English 4101

4950 Individual Project in English is an individual project of a creative, or a critical, or a research character on a topic which is subject to the approval of the Program Chair. The topic will be prepared under the supervision of a designated faculty member or members.

CR: English 4990

10.10.2 Dramatic Literature

2350 Introduction to Drama I is a survey of the major plays in the history of western drama from the Greeks to the end of the eighteenth century.

CR: English 2350

2351 Introduction to Drama II is a survey of the major plays in the history of western drama from the 19th Century to the present.

CR: English 2002

3021 English Drama to 1580 is a study of the development of English drama from the Middle Ages to 1580. The course may also consider the popular arts, such as folk plays and mummery.

3171 Anglo-Irish Drama is a study of representative Anglo-Irish drama by such authors as Wilde, Shaw, Yeats, Synge, Lady Gregory, O'Casey, Behan, Friel and Molloy.
CR: English 3170, English 3180

3181 Drama of the Restoration and Eighteenth Century is a study of major dramatic texts from 1660 to the end of the eighteenth century.

3275 Modern Drama (1830-1930) is a study of western drama and performance during the period 1830-1930, with a focus on theatrical and dramatic texts and movements, as well as artistic, social, political, technological, and philosophical influences.
CR: the former English 3300, English 4300

4302 Contemporary British Drama is a study of representative dramatic works of contemporary British drama.

4305 Contemporary Drama is a study of modern and post-modern western drama and performance from 1930 to the present, with a focus on theatrical and dramatic texts and movements, as well as artistic, social, political, technological and philosophical influences. Recommended previous course: English 3275.
CR: English 4301, the former English 3301

4307 Contemporary Canadian Drama is a study of contemporary drama and performance in Canada, focussing on texts representative of Canada's cultural and regional diversity.
CR: English 3156

4308 20th Century American Drama - inactive course.

4317 Elizabethan-Jacobean Drama is a survey of Shakespeare's dramatic rivals and the Elizabethan and Jacobean repertoires.
CR: English 3022
PR: English 3200 or English 3201

4836-4844 Special Topics in Drama is supervised study in specialized areas of dramatic literature. Course topic, design, and requirements to be determined through consultation by the student with the instructor.
PR: permission of the instructor

10.10.3 Canadian Literature

2146 Canadian Prose after 1949 is a study of the outstanding works of Canadian prose from 1949 to the present.
CR: English 2150, English 2151, the former English 3146
PR: two first-year English courses

2155 Newfoundland Literature is a study of Newfoundland literature with emphasis on representative writers since 1949.
CR: English 3155

2156 Canadian Short Stories is a study of Canadian short stories which aims to give the student a heightened appreciation of individual short stories, and some sense of the range of Canadian accomplishment in the genre.

3145 Canadian Fiction to 1949 is a study of outstanding works of Canadian fiction from the beginnings to 1949.

3147 Canadian Poetry to 1949 is a study of representative Canadian poetry from the pre-confederation period to 1949.

3148 Canadian Poetry After 1949 is a study of Canadian poetry from 1949 to the present, with emphasis on the work of major poets and an examination of the various styles and theories of poetry developed during the period.
CR: English 4850

3149 Canadian Prose is a study of selected works of Canadian prose, covering both fiction and non-fiction.

4307 Contemporary Canadian Drama course description can be found in the dramatic literature list above.
CR: English 3156

4825-4835 Special Topics in Canadian Literature is a variety of topics to be offered as resources permit.

10.10.4 Modern Literature

2215 American Literature to 1900 is a study of the historical origins and development of nineteenth century American Literature, concentrating on a selection of works within their political, social and artistic contexts.
CR: English 2214

2242 Science Fiction is a survey of Science Fiction from its earliest days to the present. Subjects that will be considered include the evolution of the genre, the relations among humans, technology and multinational capitalism, and the significance of memory and space.

CR: English 2811
PR: successful completion of a first-year English sequence

2243 Introduction to Humour in Literature begins with a survey of humour theories from antiquity to the present, and proceeds to a study of various forms and strategies of humour through a selection of works in English. Students will study texts exploring the roles that humour plays in relation to topics such as transgression, iconoclasm, class, sexuality, gender, ethnicity, culture, politics and religion.

CR: English 2121
PR: 6 credit hours in first-year English

2244 The Graphic Novel - Historical, Cultural and Literary Contexts (same as Social/Cultural Studies 2244) examines the historical, cultural and literary impact of the Graphic Novel; investigates its continuing development; and introduces students to significant works within the genre.

CR: English 3842, Social/Cultural Studies 2244
PR: 6 credit hours first-year English; one of Folklore 1000, Anthropology 1031, or Sociology 2000

2705 Modern World Literature in Translation is a study of modern world literature in English translation, with focus on writers of the twentieth century who have attained international stature.

2805 Women's Writing to 1900 is a study of writing by women in the British Isles and North America from the Middle Ages to 1900, including such items as letters and journals as well as fiction, poetry, and drama.
CR: English 3810, English 3830 This credit restriction replaces the note in earlier calendars and is retroactive to September 1, 1993.

2870 Children's Literature is an introduction to literature written for children and young people. Beginning with an examination of the history of children's literature in the British Isles and North America, the course will focus on twentieth century and contemporary works, touching on a broad range of genres, audiences, and reading levels.

2905 Introduction to Creative Writing will introduce students to three main areas of creative writing: poetry, prose fiction, and creative non-fiction (travel writing, autobiography, journalism). Much of the emphasis will be on writing as a medium of communication. For this reason, some of the instruction will be the workshop system in which students act as each other's readers and audience.
PR: 6 credit hours in first-year English

3215 20th Century American Literature is study of American poetry and fiction from 1900 to 1960.
CR: English 4260, English 4261, English 4270

3216 20th Century British and Irish Literature is a study of British and Anglo-Irish poetry and fiction from 1900 to 1960.

3810 20th Century Non-Fiction Writing by Women is a study of twentieth century topical writing by women, including writing about social, political, and artistic and literary questions. Non-traditional as well as traditional genres will be studied.
CR: English 2805, English 3830 This credit restriction replaces the note in earlier calendars and is retroactive to September 1, 1993.
PR: English 2805 or permission of the instructor

3905 Creative Writing is a workshop course for aspiring writers of poetry and/or fiction. Limited enrolment. Applicants will be required to submit a sampling of their previous and current work.
PR: permission of the instructor
UL: credit may be obtained for only two of English 3900, English 3901, and English 3905

4245 Contemporary Fiction in English is an in-depth study of a selection of recent short fiction and novels in English. The focus will be on recent developments in American, British, Irish and Commonwealth fiction (excluding Canadian).

4246 Contemporary Poetry in English is an in-depth study of contemporary poetry in English. The focus will be on major poets and developments in the U.S.A., Britain, Ireland and the Commonwealth (excluding Canada) since 1945.

4905 Advanced Creative Writing is a workshop course for creative writers who have demonstrated considerable talent and skill in poetry and/or prose fiction. Limited enrolment.
PR: permission of the instructor

10.10.5 English Courses for Non-Major Students

2010 Comprehension Writing and Prose Style (I) will chiefly emphasize

the development of (a) the capacity to understand and appreciate the varieties of prose through close analysis of a wide range of examples, and (b) the ability to write expository and other kinds of prose.

CR: English 1110

3110 Greek Literature in Translation (same as Classics 3110) is representative readings in English of the principal literary forms of Classical Greece. The literary achievement of the Greeks and their contributions to Western letters and culture.

CR: Classics 3110

3111 Latin Literature in Translation (same as Classics 3111) is representative readings in English of the principal literary forms of Republican and Imperial Rome. The literary achievement of the Romans and their contribution to Western letters and culture.

CR: Classics 3111

10.10.6 Intensive English

011F Core Intensive English Program covers reading through a variety of types of texts, vocabulary development, writing development, and academic listening and note-taking skills.

10.11 Environmental Science

For existing Memorial University of Newfoundland courses, the numbers remain the same. For new courses in Environmental Science, the following four-digit scheme is used:

1st digit = Year

2nd digit = Parent Discipline:

0 = Multidisciplinary

1 = Biology

2 = Chemistry

3 = Earth Science

4 = Physics

9 = Project

3rd digit = Subdiscipline:

(Biology): 1 = Botany 1 = Analytical 5 = Research

(Chemistry): 2 = Zoology 2 = Inorganic 8 = Science Writing

(Multidisciplinary): 3 = Ecology 3 = Physical 6 = Environmental 4 = Organic

4th digit = Numerical Sequence.

Courses specifically designed for the environmental science program(s) are given the designation "**Envs**". Thus, for example, in the Winter semester of the 2nd year, Environmental Chemistry is offered, with a course number = **Envs 2261**.

Environmental Science courses are designated by ENVS.

10.11.1 Environmental Biology

3110 Taxonomy of Flowering Plants is a study of the biodiversity of flowering vascular plants (Magnoliophyta) through the practical identification of Newfoundland families, genera, and species. Related taxonomic and biogeographical principles will be stressed.

CR: Biology 3041

LH: 3 laboratory periods of integrated practice and theory

OR: Students must submit a collection of flowering plants identified to the species level. Detailed instructions should be obtained from the instructor in the spring/summer prior to the commencement of this course.

PR: Biology 2010 or equivalent

3130 Freshwater Ecology is the study of freshwater ecosystems (lakes, rivers, streams, peatlands). Included are abiotic components, community structures, energy flow, biogeochemical cycles, and the evolution of natural and altered aquatic ecosystems. Emphasis will be placed on field and laboratory studies of the ecology of freshwater organisms and systems in western Newfoundland.

LH: 3

PR: Biology 2010, Biology 2122, Biology 2600; one of Chemistry 1001 or Chemistry 1011

3131 Impacted Terrestrial Ecosystems is an examination of ecological and evolutionary responses by organisms in terrestrial ecosystems to human-derived and natural perturbations. Advanced conceptual, empirical and experimental approaches will be used, with an emphasis on sampling local habitats.

CR: Biology 3610

LH: 3

PR: Biology 2600; and two of Biology 2010, Biology 2122, Biology 2210 or the permission of the instructor and Program Chair

4132 Analytical Ecology states that the assessment of environmental impacts on higher-level ecological systems requires a critical analysis of scientific reports, along with the ability to evaluate ecological terminology and concepts and associated statistical methodologies. Students in this course will critically read and analyse recent scientific literature in Environmental Biology, with selected topics at the community, ecosystem and landscape level, and examine related univariate and multivariate statistical procedures

LH: three-hour laboratory/discussion group

PR: Biology 2600, Statistics 2550 (or equivalent), with 6 credit hours from clause c. of the Environmental Science Core. It is recommended that students complete at least 80 credit hours before registering for this course.

4133 Conservation Biology will bring together the principles of ecology and conservation Biology at an advanced level. Current issues and techniques will be discussed with an aim towards understanding how populations of native flora and fauna can be managed for long-term conservation in the face of habitat degradation and loss.

CR: Biology 4650 and Geography 4650

LH: three-hour laboratory/discussion group

PR: two of ENVS 3110, 3130, and 3131; or permission of instructor

4140 Environmental Science Field Course is a course providing practical experience in the observation, collection, identification and quantification of organisms and the various environmental parameters which affect them in pristine and disturbed habitats. Combinations of freshwater, marine and terrestrial habitats will be studied using techniques from various scientific disciplines. The actual combination of habitats, organisms, and techniques will vary from year to year.

PR: Biology 2600, Statistics 2550, with a minimum of 80 credit hours from Environmental Science Program (or equivalent) and permission of the instructor and Program Chair.

10.11.2 Environmental Chemistry

2261 Survey of Environmental Chemistry is an introduction to environmental problems, underlying chemistry and approaches to pollution prevention. Stratospheric chemistry and the ozone layer. Ground level air pollution. Global warming and the Greenhouse Effect. Toxic organic chemicals (TOCs), including herbicides, pesticides. Toxicology of PCBs, dioxins and furans. Chemistry of natural waters. Bioaccumulation of heavy metals. Energy production and its impact on the environment, including nuclear energy, fossil fuels, hydrogen.

PR: Chemistry 1001 or Chemistry 1031 or Chemistry 1051 or Chemistry 2440 or the permission of the instructor and Program Chair

3210 Environmental Analytical Chemistry I is treatment of data, error analysis, wet methods of analysis of laboratory and field samples. Volumetric methods for acidity, alkalinity and hardness; chemical and biological oxygen demand (COD and BOD). Gravimetric methods for sulphate and phosphates. Theory and application of specific ion electrodes analysis of metal ions, dissolved gases and halide ions. Turbidimetric and nephelometric measures of water quality. Spectrophotometric analysis of trace metal ions.

LC: not more than seven hours per week

LH: not more than seven hours per week

PR: Chemistry 2300 (or 2301) and Chemistry 2210

3211 Environmental Analytical Chemistry II is theory and application of spectroscopic methods of analysis (including error analysis) of environmentally important compounds. Spectrophotometric, FTIR, light scattering, chromatographic (GC, GC/MS, HPLC), fluorescence, phosphorescence, atomic absorption and electroanalytical methods will be studied. Synthetic laboratory samples and field samples will be examined by these techniques.

LC: Not more than seven hours per week

LH: Not more than seven hours per week

PR: ENVS 3210 (or equivalent)

3260 Industrial Chemistry is chemical principles used in the manufacture of inorganic and organic chemical products; electrochemical, petrochemical, polymer, pulp and paper, agricultural, cement, cosmetics, detergent and paint industries. Processes, specific pollutants of current interest: inorganic (e.g. mercury, nitrogen oxides and sulfur oxides gases, lead etc.) and organic (e.g. PCBs, chlorinated hydrocarbons, freons, pesticides/herbicides). Industrial sources and analytical methods of detection will be studied.

PR: Chemistry 2210, Chemistry 2401, and ENVS 2261 (ENVS 2261 may be taken concurrently) or permission of the instructor and Program Chair

3261 Atmospheric Chemistry is electronic, vibrational and rotational spectroscopy. Rates and mechanisms of gas phase reactions (particularly photochemical). Thermodynamics of the atmosphere. Formation, evolution and structure of the Earth's atmosphere. Chemical and physical properties of the atmospheric gases. Global element cycles. The stratosphere and ozone variability. The ionosphere. Atmospheric pollutants. Problems of the

"greenhouse" gases. Aerosol chemistry. Wet and dry deposition.

PR: Chemistry 2300 (or 2301), Chemistry 2210 or the permission of the instructor and Program Chair

4230 Aquatic Chemistry I is thermodynamics and kinetics of model systems. Acids and bases (including buffer intensity and neutralizing capacity), dissolved gases, precipitation and dissolution. Metal ions in aqueous solution. Redox control in natural waters. Pourbaix diagrams. Regulation of chemical composition of natural waters, pollution and water quality.

LC: not more than seven hours per week

LC: not more than seven hours per week

PR: ENVS 3211 and one of Chemistry 2400 or Chemistry 2440 or permission of the instructor and Program Chair

4239 Aquatic Chemistry II - inactive course.

4240 Organic Chemistry of Biomolecules is structure and properties of carbohydrates, proteins, lipids, steroids, DNA and RNA. The chemistry of the cell in relation to its toxicology; effects of bioactive agents on cells, organelles, tissues and whole organisms. Natural products including those from the rain forest and marine environments. The role of metal ions in biomolecules. Examples of biosynthesis. Chemistry and mechanisms of mutagenesis and carcinogenesis.

PR: Chemistry 2401 or Chemistry 2440 or permission of the instructor and Program Chair

4249 Environmental Organic Chemistry focuses on anthropogenic sources of organic chemicals and pollutants in the environment. Concepts of organic chemistry (synthesis, structure, physical properties, chirality, industrial organic processes), biological chemistry (enzymes, oxidative pathways) and physical chemistry (equilibria, partitioning) extended and applied to mass transport through soil, water and air. Kinetics and mechanisms of chemical, photochemical and biological degradation and conversion of organics. Structure-reactivity relationships for organic chemicals and degradation intermediates in the environment.

PR: ENVS 4240, ENVS 3261, ENVS 4230 or the permission of the instructor and Program Chair

10.11.3 Other Environmental Science

1000 Introduction to Environmental Science is an introduction to the study of the environment. Environmental principles, issues and problems will be described and placed in a historical and societal context.

2360 Geological Hazards and Natural Disasters will introduce students to the geological aspects of the natural environment and the impacts that natural geological processes and phenomena may have on humanity. The impact of geological hazards and natural disasters on human society and behaviour will be examined through case studies.

PR: 15 credit hours or more

2369 Introduction to Soils provides a broad background knowledge about soils. Topics covered include: the origin of soils; physical, biochemical, and engineering aspects of soils; influence on humans and their food production; soil pollution and degradation; and management and conservation of soils.

PR: Earth Science 1000 or Geography 1000

2370 Global Environmental Change is a survey of the Earth as a dynamic system. Discussion of interacting cycles that define the Earth's environment. Material cycles and energy concepts. Evolution of the atmosphere in response to lithospheric, biospheric and hydrospheric changes. Major global environmental changes from Earth's formation to present. Emphasis on self-regulating ability of the Earth system.

PR: 30 credit hours or more

2371 Oceanography is historical review of science of oceanography. Earth and Earth systems (including plate tectonics). Marine sediments and sedimentary environments. Chemical and physical properties of seawater. The atmosphere and the oceans, ocean circulation. Waves and tides, coastal environments, distribution of organisms. Applied oceanography.

PR: 30 credit hours or more

2430 Energy and the Environment considers energy, energy conversion, heat transfer, the laws of thermodynamics, nuclear processes and radiation. Practical problems such as the energy shortage, human influences on climate, resource extraction, nuclear power etc. will be discussed.

PR: Mathematics 1081 or Mathematics 1000; Physics 1021 or co-requisite Physics 1051

2450 Meteorology is an application of physics and mathematics to the study of the atmosphere. Atmospheric motion on the global, synoptic, meso- and micro-scales. An introduction to atmospheric radiation and thermodynamics, clouds and precipitation. Vertical soundings and the analysis and interpretation of surface and upper-air weather maps.

CO: Physics 1051 or prerequisite Physics 1021

PR: Physics 1021 or co-requisite Physics 1051

3072 Comparative Marine Environments will investigate the physical,

chemical, geological and biological characteristics of the major marine environments from the coastal zone to the abyss and from the equator to the poles. The objective of the course will be an integrated study of the parameters that define the various environments. Emphasis will be placed on the interaction of organism and environment. The influence of the environment on the form, function and behaviour of organisms and the influence of the organism in modification of the physical environment will be stressed.

PR: ENVS 2371

3470 Transport Phenomena is fundamentals of fluid flow. Conservation laws for mass, momentum, and energy. Dimensional analysis. Turbulence. Confined fluid flows. Fundamentals of heat transfer. Conduction, convection, and radiation. Diffusion, dispersion, and osmosis. Applications to transport of pollutants at the microscopic and macroscopic scale.

PR: Mathematics 1001, Physics 1020 and Physics 1021 or Physics 1050 and Physics 1051

4000 Environmental Science Seminar reviews current topics in environmental science and discusses in a seminar format. Seminars will be presented on current research and environmental issues by faculty, students and guest speakers from universities, government and industry.

PR: Environmental Science students who have completed 80 credit hours or more, to include Biology 2600, Statistics 2550 and one of Chemistry 2440, Chemistry 2401, Chemistry 2210, or Chemistry 2300 (or 2301).

4069 Fundamentals of Soil Systems is the physics, chemistry and Biology of soil, including inorganic soil components, chemistry of organic soil matter, soil equilibria, sorption phenomena on soils, ion exchange processes, kinetics of soil processes, redox chemistry of soils, soil acidity, saline and sodic soils, organic pollutants, trace and toxic elements in soils, soil organisms, organic matter cycling, nutrient cycling and fertility, soil conservation and sustainable agriculture.

LC: not more than six hours per week

LH: not more than six hours per week. The laboratory will cover a number of key physical, chemical and biological properties and procedures used in soil analyses. One or more field trips will be scheduled during laboratory sessions

PR: Biology 2600, Earth Sciences 1000, one of Chemistry 2210, Chemistry 2300, Chemistry 2301, Chemistry 2401, or Chemistry 2440, and 6 credit hours selected from ENVS 2261, 2360, 2370, 2371, 2430, 2450, 3072, 3470, or Environmental Studies 2000. It is recommended that students complete at least 80 credit hours before registering for this course.

4131 Environmental Restoration and Waste Management focuses on procedures aimed at restoring and rehabilitating ecosystems, with an examination of the interdisciplinary scientific basis underlying these procedures. The efficacy of management options, e.g. biomanipulation, microbial degradation and chemical treatments, involved in restoration and waste management will be evaluated. Applications and practical case studies of both aquatic and terrestrial ecosystems will be covered.

PR: Biology 2600, one of Chemistry 2210, Chemistry 2300, Chemistry 2301, Chemistry 2401, or Chemistry 2440, and 6 credit hours selected from ENVS 2261, 2360, 2370, 2371, 2430, 2450, 3072, 3470, or Environmental Studies 2000. It is recommended that students complete at least 80 credit hours before registering for this course.

4479 Groundwater Flow is groundwater in the hydrologic cycle. Principles of fluid flow through permeable media. Hydraulic properties of soil and rock formations. Groundwater at the local and regional scale. The unit basin model. Groundwater as a transport agent of chemicals and microbes. Groundwater resources, reservoir characterisation, and quality assessment. Groundwater contamination.

PR: ENVS 3470 or the permission of the instructor and Program Chair

4910-4930 Special Topics in Environmental Science are special topics courses in Environmental Science normally taken by students beyond the second year.

4950 Research Project in Environmental Science is a course, with the guidance of a faculty member, where students will conduct a scientific study based upon original research or a critical review of extant data in an appropriate area. Students are required to submit a report and give a presentation. This project fulfils the Core requirement for a fourth-year individual project in the area of specialization.

PR: permission of Program Chair

4951 Honours Project in Environmental Science I is a course, under the guidance of a designated supervisor (or supervisors), where the student will prepare a thesis proposal including a comprehensive literature review of the subject of their Honours thesis. Students will present the results of their work in both written and oral form.

PR: restricted to Environmental Science students who have been accepted into the Honours option

4959 Honours Research Project in Environmental Science II is a continuation of ENVS 4951 specifically for Honours students. Under the supervision of faculty member(s), students will carry out an original research project in environmental science. Students will present both a thesis and

seminar on their research.

PR: ENVS 4951 and admission to the honours program

10.12 Environmental Studies

New Course Numbering

For existing Memorial University of Newfoundland courses the numbers remain the same. For new courses in Environmental Studies the following scheme is used.

1st digit = year

2nd digit = Program Concentration

0 = common to both concentrations

1 = Environmental Perspectives Concentration

2 = Outdoor Environmental Pursuits Concentration

9 = Project

Environmental Studies courses are designated by EVST.

1000 An Introduction to Environmental Studies is an introduction to a variety of major issues in environmental studies through an examination of a range of case studies including both local problems, such as the impact of outdoor recreation activities on the environment, and global threats, such as stratospheric ozone depletion.

2000 Introduction to Mapping, Remote Sensing, and Geographical Information Systems is an introduction to maps, global positioning systems, remote sensing, and geographic information systems. Applications to a broad range of environmental issues will be discussed.

LC: 3

LH: 3

PR: Geography 1000 or Earth Sciences 1002

2210 Outdoor Environmental Pursuits I is the theoretical rationale and practical skills needed to demonstrate basic proficiency in several of the following activities: minimal impact camping, wilderness cooking, hiking, kayaking, canoeing, navigating with map and compass, outdoor safety, search and rescue, and group management. The major focus of this course will be the practical application of learned skills.

AR: attendance is required

CO: basic first aid and CPR course

OR: 3 hours of practicum per week

2220 Outdoor Environmental Pursuits II is the theoretical rationale and practical skills needed to demonstrate basic proficiency in several of the following activities: cross-country skiing, telemark skiing, downhill skiing, snowshoeing, winter camping, and winter survival techniques. The major focus of this course will be the practical application of learned skills.

AR: attendance is required

OR: 3 hours of practicum per week

3000 Issues in Environmental Economics is an analysis of current issues concerning the effects of the economic activities of production and consumption on the natural environment. The concepts of scarcity, abundance, demand, supply, opportunity cost, trade-offs, externalities, marginal benefits and marginal costs will be utilized in examining environmental problems. The social and economic implications of various approaches will also be analysed.

OR: Economics 2010

3001 Environmental and Resource Management: Applications of Geographic Information Systems is applied GIS knowledge and skills in environmental and resource management. The topics cover GIS data sources, data conversions, database design, spatial analysis and decision support systems. Examples of GIS applications in the private and public sectors will be provided.

LH: 3

PR: EVST 2000

3085 Issues in Ecological Economics aims to explore the dynamic interaction between the economic system and the ecological system that sustains it by using trans-disciplinary theoretical approaches and methodologies. The main focus of this course will be on Ecological Economics concepts such as low and high entropy, biotic and abiotic goods and services, stock-flow resources, carrying capacity, throughput, co-evolution, sustainable scale, use value, and their applications in a problem-solving context.

CO: Economics 2010 and Economics 2020

CR: Economics 3085, the former EVST 3010, and EVST 4020

PR: Economics 2010 and Economics 2020

3210 Expedition will consist of one or more extensive expeditions into wilderness areas. A variety of applied topics related to environmental issues, outdoor leadership, and outdoor survival will be covered using an experiential approach. Expedition: Two weeks (Summer term).

AR: attendance is required

PR: EVST 2210 and EVST 2220

4000 Environmental Impact Assessment will include an analysis of the different methods of assessing the impacts that investment projects or decision-making processes have on the environment. Environmental Impact Assessments (EIAs) vary with individual projects and are a vital tool to use in integrated planning of development proposals, policies and programs. Emphasis will be given to assessing the socio-economic impact of development projects.

4010 Seminar in Environmental Studies is a senior seminar in which selected environmental issues will be examined from several disciplinary perspectives.

OR: seminars three hours per week

PR: permission of the Environmental Studies Program Chair

4020-4039 Special Topics in Environmental Studies has a range of special topics in Environmental Studies. This course is normally taken by students beyond the second year.

4950 Independent Research Project is a course, under the supervision of a faculty member, where each student will carry out an approved project in environmental studies and prepare a major paper based on independent research.

PR: permission of the Environmental Studies Program Chair

10.13 Folklore

Folklore 1000 (or 2000) is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060 and those courses cross-listed with other subject areas.

Folklore courses are designated by FOLK.

1000 Introduction to Folklore is the role that tradition plays in communication, art and society will be discussed through an examination of folklore materials from Newfoundland and the English-speaking world. Readings and "listensings" will emphasize the use of folklore in context, e.g., the proverb in speech and the folksong in childrearing. Students will be urged to analyse the traditions in their own lives through special assignments.

CR: FOLK 2000

1050 Folklore Studies is an examination of specific folklore studies illustrating important themes and approaches in folkloristics. These will include antiquarian, nationalistic, diffusionist, historic-contextual, functional, structural, and performance analyses as typified in selected readings from the works of leading folklorists.

There is no prerequisite for this course. However, students should note that they will need to take FOLK 1000 (or FOLK 2000) before they can advance to other courses.

2100 Folklore Research Methods - An Introduction is designed to provide the basic introduction to the research resources, tools and methods regularly employed in the area of Folklore. On the one hand, the course will examine what types of Library and Archive resources can be useful to the folklorist and, on the other hand, it will explore how folklorists in fieldwork situations should handle people, and how they can capture for posterity a record of the interviews that they have conducted and the events that they have observed. It is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses.

2230 Newfoundland Society and Culture (same as Sociology/Anthropology 2230) is the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.

CR: Sociology/Anthropology 2230

2300 Newfoundland Folklore (same as Anthropology 2300) is survey of the various types of Folklore: tale, song, rhyme, riddle, proverb, belief, custom, childlore and others, with stress on their function in the Newfoundland community culture. Individual collection and analysis of materials from the students' home communities, supplemented by data from the this University's Folklore and Language Archive.

CR: Anthropology 2300 and the former FOLK 3420

PR: FOLK 1000 or FOLK 2000, or Anthropology 1031

2401 Folklife Studies is an examination of the traditional cultures of Europe and North America with special reference to Newfoundland. A selection of the following areas will be covered: settlement patterns, architecture, work and leisure patterns in the folk community, calendar customs, rites of passage, folk religion, folk medicine, language and folk culture, folk costume, foodways and folk art.

CR: the former FOLK 3500

2500 Folk Literature (same as Anthropology 2500) is an examination of the major genres of folk literature: folk narrative, folk poetry and song, folk drama, and the traditional generic forms within folk speech. An introduction to the textual, comparative and contextual methods of analysis. The literature discussed will be international in scope.

CR: Anthropology 2500 and any of the former FOLK 3400, English 3400,

Sociology/Anthropology 3400
PR: FOLK 1000 or FOLK 2000, or Anthropology 1031

2600 Regional Folklore - inactive course.

3130 Greek and Roman Mythology (same as Classics 3130) is a comparative study of specific myths and folktales of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.
CR: Classics 3130

3200 Folksong is an introduction to the full range of traditional verse, song and music. Stress primarily on the songs of Canada, the United States and the British Isles, with attention to Newfoundland parallels. Examination of traditional vocal and instrumental styles as well as verse forms. Some reference to non-Western musical traditions. A knowledge of music is not a prerequisite.
CR: the former FOLK 2430

3300 Folk Drama is a survey of the main forms of traditional drama found in Great Britain and North America with reference to related European and non-western traditions. The origins, history and regional variations of these forms will be considered together with questions of social function, performance and aesthetics. The history of research in the area of folk drama will be examined along with related methodological and theoretical issues.

3450 Language and Play is an examination of such forms as the rhyme, riddle, proverb and proverbial saying, game, etc. Emphasis on problems of function and classification. Material will be chiefly from the British and North American traditions. Collecting will be encouraged.

3601-3620 Special Topic in Folklore will have topics to be studied announced by the Division.

3850 Material Culture is an examination of various interpretive theories of objects as cultural products. Problems of defining the artifact will be discussed, as well as the strengths and limitations of using objects in historical and ethnographic research. Questions discussed include form, design, decoration, diffusion, and the role of the creator of the object. Besides folkloristic work on material culture, a variety of interdisciplinary approaches will be considered. Emphasis will be on the material folk culture of Newfoundland and its European antecedents.
CR: Archaeology 3850

3920 Folklore and Education is intended to familiarize students with the function of Folklore in the educational process. Emphasis will be on cultural transmission, cultural learning and child training practices (including mechanisms of social control.) The relationship of formal to informal education will be examined with particular reference to Newfoundland.
CR: the former FOLK 3030 or FOLK 4475

3930 Folklore and Popular Culture is an examination of the transitional processes involved in the development of folk societies to mass cultures with regard to folklore and the products of popular culture. In addition, sensory and technological media theories will be scrutinized and evaluated in conjunction with cultural comparisons of the qualities and functions of: folksong, disc recordings and the radio; folktales, television melodrama and popular film; folk art and popular "techno-art" forms.
CR: the former FOLK 2400

4300 Folklore of Canada is an examination of a variety of Canadian folklore from historical, geographical and cultural perspectives. Emphasis will be placed upon the application of theories of Canadian culture to folklore studies. Questions of the role of folklore and folklife with respect to identity, ethnicity, multiculturalism, national literature, regionalism and similar issues will be considered.
CR: the former FOLK 1020

4440 Music and Culture (same as Anthropology 4440, Music 4040, the former Music 4440) is traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.
CR: Anthropology 4440, Music 4040, the former Music 4440

4480 Folklore and Oral History is a seminar which deals with the uses of oral sources, particularly those which have a traditional dimension, for the study of history. It will discuss the methods developed by Vansina, Dorson and others for evaluating the historical meaning of oral traditions in literate and non-literate cultures. The uses of oral testimony in the study of traditional modes of life and work such as fishing and farming will be considered. The use of oral traditions in the study of social and political history will also be discussed.
CR: History 4480

10.14 French

Three consecutive credit courses in French language are available at the first-year university level, providing a complete overview of basic oral and written French. New students may choose to register initially in French 1500 or 1501; a diagnostic test is offered to assist students with initial course selection or to confirm that initial course selection is appropriate. Students with a limited background in French should register for French 1500 and continue with 1501. Students with a strong background in high-school French should bypass 1500 and begin their university study with 1501, especially if they intend to proceed beyond the first-year level. Very well prepared students may apply to the Division for permission to enter 1502 directly. Bypassing one or more of these courses may enable students to include a larger number of advanced electives in their degree program. French 1500, 1501 and 1502 require three hours of instruction per week and two additional hours of language laboratory work or conversation class, or both.

French courses are designated by FREN.

1500 Introduction à la langue française, niveau universitaire I cours pour débutants et pour ceux don't les connaissances du français sont très faibles. La permission de s'inscrire à ce cours ne sera pas accordée à ceux qui ont complété le Français 3202 (Immersion française au High School). Voir ci-dessus la note.

CR: l'autre des cours Français 1010 et 1011 (désormais supprimés)

1500 Introductory University French I is a course for beginners and for students whose background in French is very weak. Permission to register for this course will not be given to students who have completed Français 3202 (High School French immersion). See Note above.

CR: the former FREN 1010 or 1011

1501 Introduction à la langue française, niveau universitaire II Voir ci-dessus la note.

CR: et Français 1050 (désormais supprimé)

PR: High School French 3200 ou permission du chef du département. Les étudiants qui ont complété un programme d'immersion devraient consulter le chef du département avant de s'inscrire à ce cours.

1501 Introductory University French II See Note above.

CR: the former FREN 1050

PR: High School French 3200 or permission of the Head of the department. Ex-immersion students should consult the Head of the Department before registering for this course.

1502 Introduction à la langue française, niveau universitaire III Voir ci-dessus la note.

CR: et Français 1051 (désormais supprimé)

PR: 1501, ou la permission du chef de la division

1502 Introductory University French III See Note above.

CR: the former FREN 1051

PR: 1501, or by permission of the head of the division

2100 Français intermédiaire I rédaction, grammaire et pratique orale.

PR: Français 1502

2100 Intermediate French I is composition, grammar and practice in oral skills.

PR: FREN 1502

2101 Français intermédiaire II continuation du travail de rédaction, de grammaire et de communication orale.

PR: Français 2100

2101 Intermediate French II is further work in composition, grammar and oral skills.

PR: FREN 2100

2300 Phonétique introduction pratique à la phonétique du français. Emploi des symboles de l'alphabet phonétique, transcription phonétique et phonétique corrective.

PR: Français 1502 ou équivalent

2300 Phonetics is a practical introduction to French phonetics, including the International Phonetic Alphabet and phonetic transcription as well as corrective phonetics.

PR: FREN 1502 or equivalent

2601 Apprentissage de la lecture les étudiants exploreront des stratégies de lecture qui faciliteront la compréhension de textes divers. Ce cours sera normalement enseigné en français.

CR: Les étudiants ayant complété Français 2550 peuvent suivre Français 2601 ou Français 2602, mais pas les deux. Les étudiants ayant complété Français 2551 peuvent suivre Français 2601 ou Français 2602, mais pas les deux. Les étudiants ayant complété Français 2550

et Français 2551 ne peuvent suivre ni Français 2601 ni Français 2602.

PR: Français 1502 ou Français 2159, ou équivalent

2601 Reading Skills will explore reading strategies in a variety of texts in French. This course will normally be taught in French.

CR: Students who have successfully completed FREN 2550 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed FREN 2551 may take either FREN 2601 or FREN 2602, but not both. Students who have completed both FREN 2550 and FREN 2551 may not take either FREN 2601 or FREN 2602.

PR: FREN 1502, or FREN 2159 or equivalent

2602 Lecture de textes intégraux les étudiants exploreront des stratégies de lecture qui faciliteront la compréhension de textes intégraux. Ce cours sera normalement enseigné en français.

CR: Les étudiants ayant complété Français 2550 peuvent suivre Français 2601 ou Français 2602, mais pas les deux. Les étudiants ayant complété Français 2551 peuvent suivre Français 2601 OU Français 2602, mais pas les deux. Les étudiants ayant complété Français 2550 et Français 2551 ne peuvent suivre ni Français 2601 ni Français 2602.

PR: Français 1502, ou Français 2159 ou équivalent

2602 Reading Complete Texts will explore reading strategies in a variety of complete texts in French. This course will normally be taught in French.

CR: Students who have successfully completed FREN 2550 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed FREN 2551 may take either FREN 2601 or FREN 2602, but not both. Students who have completed both FREN 2550 and FREN 2551 may not take either FREN 2601 or FREN 2602.

PR: FREN 1502, or FREN 2159 or equivalent

2900 A Survey of Francophone Cultures places emphasis on oral comprehension and expression. This course is a prerequisite for FREN 3650-3651-3653.

CR: the former FREN 2500

PR: FREN 1502 or equivalent. Students who have obtained less than 70% in FREN 1051 are, however, advised to complete FREN 2100 before attempting this course.

3100 Grammaire et analyse de textes révision des catégories nominale et verbale du français (morphologie, nombre, genre, temps, aspect, mode, voix). Analyse grammaticale et stylistique des textes avec un accent particulier sur l'emploi du verbe en français. Travaux d'expansion lexicale.

PR: Français 2101 ou Français 2160 et au moins un autre cours de français de niveau 2000

3100 Grammar and Textual Analysis is revision of the French noun and verb systems (morphology, number, gender, tense, aspect, mood, voice). Grammatical and stylistic textual analysis with special emphasis on the use of verbs in French. Vocabulary enrichment.

PR: FREN 2101 or FREN 2160 and at least one other 2000-level course in French

3101 Stylistique et analyse de textes rôle et fonction des parties du discours; exploitation sémantique (synonymie, polysémie); tropes et figures de style. Analyse grammaticale et stylistique de textes avec un accent particulier sur ces phénomènes. Travaux d'expansion lexicale.

PR: Français 2101 ou Français 2160 et au moins un autre cours de français de niveau 2000

3101 Stylistics and textual analysis is role and function of the parts of speech in French; semantic enrichment (synonymy, polysemy); tropes and figures of speech. Grammatical and stylistic textual analysis with special emphasis on these phenomena. Vocabulary enrichment.

PR: FREN 2101 or FREN 2160 and at least one other 2000-level course in French

10.15 Gender Studies

Gender Studies courses are designated by GNDR.

2000 An Interdisciplinary Introduction to Gender Studies (same as the former Women's Studies 2000) is an interdisciplinary introduction to the major concepts, issues and debates of Gender Studies.

CR: the former Women's Studies 2000

2001 Women and Science (same as the former Women's Studies 2001) is an investigation of: historical and contemporary contributions of women scientists, especially Canadians; different sciences and how they study women; and feminist and other perspectives on gender and science.

CR: the former Women's Studies 2001

3000-3010 Special Topics in Women's Studies (same as the former Women's Studies 3000 - 3010) has a range of special topics in Gender Studies.

CR: the former Women's Studies 3000 - 3010

4000 Contemporary Feminist Issues same as the former Women's

Studies 4000) is an interdisciplinary seminar in Gender Studies that identifies emerging debates in contemporary feminism and analyses complex and contentious issues and how they intersect and disrupt social constructions of gender.

CR: the former Women's Studies 4000

OR: 3 hour seminar per week

PR: students must normally have completed GNDR 3005 or the former Women's Studies 3005 or GNDR 3025 and 15 credit hours in other courses applicable to the Gender Studies Major and Minor programs before taking GNDR 4000. In exceptional cases, students without these prerequisites may be accepted, with the approval of the instructor of GNDR 4000 and the Head of the Department.

10.16 Geography

Geography courses are designated by GEOG.

1000 Introduction to Geography I is an introduction to Geography incorporating concepts, skills and techniques used by the geographer to understand the Earth as the home of man. The major emphasis of the course is placed on man-environmental ecological systems. The course will include seminars and practical work.

CR: the former GEOG 1010

1001 Introduction to Geography II is a continuation of introduction to basic concepts and techniques in the field of Geography. This course emphasizes Geography as a social science and introduces the sub-fields of political, economic, cultural and urban Geography. The course will include seminars and practical work.

CR: the former GEOG 1011

2001 Cultural Geography is an examination of the basic themes of cultural Geography.

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

2102 Physical Geography: The Global Perspective is a study of form, process, and change in natural systems at and near the surface of Earth, viewed as human environment. Emphasis is on global and regional scales in the systematics study of climate, water, landforms and vegetation.

LH: 3

PR: GEOG 1000 or GEOG 1050, or the former GEOG 1011

2302 Issues in Economic Geography are basic issues and ideas in economic geography. The development of a regional economy will be related to underlying economic, cultural and physical factors.

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

2425 Natural Resources is an introduction to the concepts of natural resources, environment and conservation: the nature and distribution of natural resources; methods of use, allocation and development of natural resources and the role of various physical, social, economic, political and technological factors influencing decision-making about resources.

CR: the former 3325

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001

3222 Research Design and Quantitative Methods in Geography is an introduction to principles of research design, and to the use of quantitative techniques. This course provides students with a basic understanding of data collection, entry, and analysis and presentation skills most commonly used by geographers. Practical, computer-based exercises are an essential part of the course. It is strongly recommended that this course be completed before registration in a 4000-level geography course.

CR: the former GEOG 2220

LH: 3

PR: GEOG 1050, or the former GEOG 1011, or GEOG 1001 and at least 9 credit hours from GEOG 2001, GEOG 2102, GEOG 2195, GEOG 2302, GEOG 2425.

3900-3909 Special Topics in Geography will have topics to be studied announced.

PR: permission of the instructor and the Head of the Department

10.17 History

With the exception of 4000-level cross-listed courses, students are required to take 12 credit hours in History (in addition to History 1100/1101) or have permission of the Chair of the Historical Studies Program before enrolling in any 4000-level History course.

History courses are designated by HIST.

1100 Introduction to History is an introduction to the study and writing of history which will emphasize the concepts of history through a thematic approach to the history of western civilization from ca. 1500 to ca. 1815. (Offered only at Grenfell Campus.)

CR: HIST 1000

1101 Introduction to History is an introduction to the study and writing of history which will emphasize the concepts of history through a combination

of research and writing within a thematic approach to the history of western civilization from ca. 1815 to the present. (Offered only at Grenfell Campus.) Students in their first year normally take HIST 1100 and HIST 1101
CR: HIST 1001

2034 History of the Hellenistic World (same as Classics 2020) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.
CR: same as Classics 2020

2035 History of Classical Greece (same as Classics 2035) is a survey of Greek history from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century B.C.
CR: Classics 2035, HIST/Classics 2030 since 1985-86 or the former HIST/Classics 3910

2040 History of Rome (same as Classics 2040) is a survey of Roman history from the early monarchy to the reign of Constantine, with special reference to society and politics in the late Republic and early Empire.
CR: Classics 2040, HIST/Classics 3920

2100 Empires of the North Atlantic, 1500-1820 will examine European expansion across the Atlantic to North America, the attempt to take possession of that continent through commercial investment and colonies, and the way in which European colonies were transformed into new societies.

2120 The History of Canadian-American Relations, 1783 to the Present is a survey of the major themes in the history of Canadian-American relations, from the American Revolution to the present. Emphasis will be placed on economic, social, political and cultural developments.

2200 Canadian History to Confederation, 1867 is a survey of Canadian History to Confederation, 1867.

2210 Canada Since 1867 is survey of Canadian History since Confederation.

2300 Introduction to Modern European History: 1500-1789 is an introduction to the main issues and problems in early modern European History with an emphasis on the political, social, economic and cultural developments from the sixteenth through the eighteenth century.

2310 Europe in the Nineteenth Century: 1789-1914 is a survey of the economic, social, political and cultural developments of Europe from 1789-1914.

2320 Medieval Europe to 1050 is a survey of the economic, social, political and cultural developments of the early Middle Ages.
CR: the former HIST 2030

2330 Medieval Europe, 1050 to the Reformation is a survey of the economic, social, political and cultural developments of Europe in the high and late Middle Ages.
CR: the former HIST 2030

2500 The Twentieth Century I is a study of the world-wide impact of the main events and developments in the age of global interdependence.
CR: the former HIST 3700

2510 Twentieth Century II is an historical analysis of the main issues in the contemporary world since 1945.
CR: the former HIST 3710

2700 Art History Survey I (same as Visual Arts 2700) is the history of art from pre-historic times to the Renaissance.
CR: Visual Arts 2700

2701 Art History Survey II (same as Visual Arts 2701) is the history of art from the Renaissance to the 20th century.
CR: Visual Arts 2701

3030 Environmental History examines the history of human relationships to the natural environment. The focus of the course is the history of environmental changes caused by humans, and the reciprocal influence of the natural environment on human cultures and societies. Case Studies will introduce patterns of ecological change associated with broad historical transformations such as colonialism, military conflict, the development of world economies, etc.

3050 History of Warfare to 1789 is a survey of major developments in the history of warfare from the earliest times to 1789 with particular emphasis on changes in the nature and conduct of warfare, the evolution of military thinking, the organization of military and naval forces, the impact of technological change, the emergence of professionalism and the relationship between societies and armed forces.

3060 History of Modern Warfare since 1789 is an examination of those major developments which have affected the nature and conduct of warfare in the period since 1789, with particular emphasis on the evolution of military thinking, the impact of technology on organization and planning, the role of air power, the civil-military relationship, professionalism in the armed forces, and the changing nature of warfare: the emergence of total war, global war, guerilla warfare, and limited warfare.

3090 Alexander and the Macedonians investigates the impact of the conquests of Alexander the Great and his Macedonian Successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander's accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.
CR: Classics 3090

3110 History of Newfoundland to 1815 is the growth of settlement and the manner in which a 'migratory' fishery carried on from England and Ireland changed into a 'sedentary' fishery carried on by residents of Newfoundland.

3120 Modern Newfoundland Since 1815 is the establishment and development of political institutions, changes in economic structure and the growth of populations.

3135 France in the Americas: 1500-1815 investigates the French presence mainly in New France, but also Newfoundland, Florida, Louisiana, the Caribbean, Acadia, Ile Royale, and Brazil, from the earliest voyages of exploration to the Anglo-French struggle for North America. This topic will be studied within the greater framework of the transplantation of a European society onto a different continent, delving also into various subject themes such as French-aboriginal relations, politics, and government, women and gender, and society in France and New France.

3250 Migration History of North America is a survey of migration to and within North America from the seventeenth to the twentieth century.

3320 Early Modern France, 1500-1789 is French History from 1500 to 1789, with a focus on such themes as the Renaissance, political and social change, gender history and the Enlightenment.
CO: 6 credit hours that have the initial digit '2'
PR: 6 credit hours that have the initial digit '2'

3330 France: 1750-1852 is the study of France from the decline of the Old Regime to the end of the Second Republic.

3440 History of the British Empire and Commonwealth since 1815 is the transition from British Empire to Commonwealth of Nations.

3445 Witchcraft and the Witch-Hunts in Early Modern Europe is a history of witchcraft, demonology, and witch-hunts from 1400 to 1750, focusing on such themes as gender, the body and medical knowledge, religious dissidence, and popular culture.

3450 British History: 1485-1714 is the emergence of Britain under the Tudors and early Stuart monarchs.

3460 British History Since 1714 is British History from the accession of the Hanoverians to the welfare state.

3490 History of Ireland Since the Great Famine is a survey of Irish history from the mid-nineteenth century to the present.
CR: the former HIST 3470

3520 The Early Ethnohistory of North America's Native People (same as Anthropology 3520) is the North American native response to early European contact and initial settlement. Particular attention will be paid to cultural change resulting from the adoption of European goods, participation in the fur trade, the introduction of European disease, and the adaptation to a permanent European presence.
CR: Anthropology 3520

3525 The Later Ethnohistory of North America's Native People (same as Anthropology 3525) is Indian and Inuit cultural history of the Eighteenth and Nineteenth centuries, including the fur trade, resistance and accommodation to European expansion, the emergence of revitalization movements, demographic changes, and population shifts. Special emphasis will be placed on the ethnohistory of the native peoples of what is now Canada and northern United States.
CR: Anthropology 3525

3675 Navies and Societies Since 1650 is an examination of the rise of modern navies since 1650 that places navies and naval decisions within broader national and international political, economic and social contexts.
CR: the former HIST 3822

3700 Art History: The Italian Renaissance (same as Visual Arts 3700) is an overview of the art and architecture of Renaissance Italy with an emphasis upon the historical context in which art was produced.
CR: Visual Arts 3700

3701 Art History: The Renaissance Outside Italy (same as Visual Arts 3701) is the Renaissance outside Italy from the late Fourteenth century and

the international style through the 16th century.
CR: Visual Arts 3701

3770 Women in Western Society and Culture (II) are selected themes in the history of women in the modern period with a focus on cultural attitudes toward women, demographic trends affecting women, the impact of changing economic roles, and the development of feminism.
CR: the former HIST 3761

3840 Historical Methods is an introduction to the methods and practices of history in the modern era. This course is compulsory for Honours students and recommended for Majors, including those intending to apply for graduate studies. For Historical Studies students at Grenfell Campus this course is required for all majors and minors.
CR: the former HIST 4801

PR: 12 credit hours in History including HIST 1100/1101 or permission of the instructor

4101 The Renaissance in Europe, 1400-1550 is a seminar on the Renaissance in Europe, particularly in Italy and northern Europe, focusing especially on its intellectual and cultural aspects but also the social and gender history of the topic.

4230 Special Topics in Newfoundland History I are specialized studies in the History of Newfoundland.

4231 Special Topics in Newfoundland History II are specialized studies in the History of Newfoundland.
CR: the former Political Science 4731

4254 Special Topics in Canadian History: A History of Social Welfare is a study of the broad theme of the state and social welfare in Canada. It examines the origins of modern forms of social control as evidenced in the nineteenth century prison, the lunatic asylum, and the poorhouse. As well, it compares Canadian and British and American social welfare institutions and policies, and traces their historical evolution into the twentieth century.

4320 Special Topics in European History: The British Empire, 1688 to the Present has a range of special topics.

4410-4430 Historical Problems are specialized studies in historical problems.

4560-4570 Special Topics in Social and Intellectual History are specialized studies in social and intellectual history.

4730 Art History: Modern Art I (same as Visual Arts 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.
CR: Visual Arts 4730
PR: 6 credit hours in art history or permission of the chair of the Visual Arts Program

4731 Art History: Modern Art II (same as Visual Arts 4731) is an examination of the various cultural and social forces between 1850 and 1914 which shaped the rise of the Modern movement.
CO: 6 credit hours in art history or permission of the chair of the Visual Arts Program
CR: Visual Arts 4731
PR: 6 credit hours in art history or permission of the chair of the Visual Arts Program

4821 Reading Course (F and W) is a directed reading course for Honours and selected students including those intending to apply for graduate studies. Readings will be taken from a list of significant works in History, the Humanities, and the Social Sciences.
PR: permission of the Program Chair

4950 Independent Project in Historical Studies will have students complete an independent research project under the supervision of a faculty member or members. Topics must have the approval of the Program Chair of History.
PR: HIST 3840 and nine other History courses

10.18 Human Kinetics and Recreation (HKR)

Human Kinetics courses are designated by HKR.

3555 Outdoor Recreation Management is an overview of outdoor recreation practices in Newfoundland and Canada. This course will examine the management of resources, conservation education and practices, development for public use or exclusion; legislation related to management of risk; viability of facilities; national and provincial agencies; private commercial ventures; and future trends in management. Management strategies will form a major part of the course.
CR: the former RECR 3555 and the former PHSD 3550

3565 Tourism/Commercial Recreation will examine behavioural factors influencing tourism; promotion of commercial recreation attractions;

provincial strategies in travel and tourism; problems of leisure travel; stability of entrepreneurial ventures in tourism; and research and planning strategies relevant to commercial ventures.

CR: the former RECR 3565 and the former PHSD 3560

4555 Leadership and Supervision in Recreation is need, selection, training and supervision of leaders in recreation. Certification, standards and professional organizations. Evaluation of leadership - materials and methods used. Practical exposure to roles of both leader and supervisor through seminar and related fieldwork.

CR: the former RECR 4555 and the former PHSD 4550

4575 Recreation Ethics, Issues and Trends will explore contemporary trends and issues identified by governments and recreation practitioners and the way in which these issues influence the delivery of leisure services.

CR: the former RECR 4575 and the former PHSD 4570

10.19 Humanities

Humanities courses are designated by HUMN.

1001 Humanities and the Contemporary World is a study of the relevance of humanities disciplines and texts to contemporary cultural forms and practices such as movies, popular music, television, comic books, graphic novels, professional sports, etc. The course will also focus on the mastery of composition skills. The course is a designated writing (W) course.

1002 Six Texts That Changed the World is a study of six humanities texts which have helped to shape Western Civilization. The course is a designated writing (W) course.

PR: HUMN 1001

2001 Humanities in the Ancient World is a study of major cultural developments and achievements in art, literature, religion, philosophy, and science in the ancient Mediterranean during the period 4000 BCE to 400 CE. The course explores the great ancient civilizations of the Near East, Greece, and Rome and their influence on the shaping of Western culture and society. The course is a designated writing (W) course.

PR: HUMN 1001 and 1002

2002 Thought and Society in the Medieval World this course examines the development of medieval civilization through the consideration of thought, art, spirituality and politics. Medieval culture will be examined largely through primary texts centered on a series of key themes and historical-cultural watersheds. These texts will be contained in a course pack designed for this course. The course is a designated writing (W) course.

PR: HUMN 1001 and 1002

2010 Themes in Humanities (Interdisciplinary Seminar) is a seminar course in which themes have common interest to the Humanities will be discussed from the perspective of the various disciplines. The course is a designated writing (W) course.

CR: the former HUMN 3000

PR: HUMN 1001 and 1002

3001 Humanities in the Early Modern Period is a study of the major cultural developments and achievements in art, literature, religion, philosophy, and science in Western Europe during the period 1450-1650. The course is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3002 Humanities in the Modern World examines emerging conceptions of the modern self and its expression in philosophy, science, political revolution and constitution, visual art and literature during the period 1650-1850. The course is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3010 The Nature of Interpretation in Humanities introduces students to central concepts and debates concerning the sorts of interpretation that distinguish Humanities as a discipline. Students gain familiarity with contemporary and historical approaches. The course is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3020 Humanities and the Environment is an examination of the human understanding of the natural world from the perspectives of the literary arts, the visual arts, and music and religion. It is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours in at the 2000-level

3021 East Meets West - Asian Traditions and the Humanities is an examination of the influence of Asian currents of thought in the West in literature, philosophy, the visual arts, music and popular culture. This is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours in at the 2000-level

3100-3109 Special Topics in Humanities has a range of special topics in Humanities.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

4001 Humanities Postmodern is a study of major developments in the evolution of culture, thought, arts, science, and beliefs in the Western world from the nineteenth century to the present day. The course is a designated writing (W) course.

PR: 12 credit hours in Humanities with at least 3 credit hours at the 3000-level

4010 Authors, Events, and Texts is a seminar course in which themes having common interest to the Humanities will be discussed from the perspectives of the various disciplines. This course focuses on close readings of its subject matter and is distinct from theme-oriented courses in Humanities. The course is a designated writing (W) course.

CR: the former HUMN 4000

PR: 24 credit hours in Humanities including HUMN 3010

4020-4029 Special Topics has a range of special topics in Humanities.

4950 Independent Project (Directed Research) will complete an independent research project under the supervision of a faculty member or members. Topics must have the approval of the Program Chair of Humanities.

PR: 24 credit hours in Humanities including HUMN 3010

10.20 Mathematics and Statistics

At most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1051, 1080, 1081, 1090, 1150, 1151.

Mathematics courses are designated by MATH and Statistics courses are designated by STAT.

102F, 103F and 104F Mathematics Skills Program are non-credit courses intended for those students who either have a weak background in mathematics or are returning to the subject after some years. The program enables students to master mathematical operations such as those involving whole numbers, fractions, decimals, percents, integers, exponents, linear equations, algebraic and rational expressions, formulas, graphs, systems of linear equations, basic trigonometry, exponents and radicals, and quadratics.

1000 Calculus I is an introduction to differential Calculus including logarithmic, exponential and trigonometric functions.

CR: MATH 1081

LH: 1.5

PR: MATH 1090 or a combination of placement test and high school Mathematics scores acceptable to the Department

1001 Calculus II is an introduction to integral Calculus with applications. In addition to three lectures per week there will be a one and one-half hour problem lab.

CR: the former Engineering 1411 and the former Engineering 2413

PR: MATH 1000 or MATH 1081

1050 Finite Mathematics I covers topics which include sets, logic, permutations, combinations, and elementary probability.

CR: the former MATH 1150. With the exception of those already admitted at the time of registration in this course to a Bachelor of Education program that requires this course, students who already have obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for this course nor can they receive credit for it

LC: 4

PR: a combination of placement test and high school mathematics scores acceptable to the Department, or MATH 103F

1051 Finite Mathematics II covers topics which include elementary matrices, linear programming, elementary number theory, mathematical systems and geometry.

CR: the former MATH 1151. With the exception of those already admitted at the time of registration in this course to a Bachelor of Education program that requires this course, students who already have obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for this course nor can they receive credit for it.

LH: 1.5

PR: a combination of placement test and high school mathematics scores acceptable to the Department, or MATH 103F

1090 Algebra and Trigonometry (F and W) provides students with the essential prerequisite elements for the study of an introductory course in calculus. Topics include algebra, functions and their graphs, exponential and logarithmic functions, trigonometry, polynomials, and rational functions.

CR: MATH 1000, MATH 1001, MATH 1080, or MATH 1081

LH: 3

PR: a combination of placement test and high school Mathematics scores acceptable to the Department or MATH 104F

UL: credit will not be given for MATH 1090 if any of MATH 1000, MATH 1001, the former MATH 1080, or the former MATH 1081 have been completed

2000 Calculus III is a study of the differential calculus of functions of two variables, an introduction to convergence of infinite sequences and series.

CR: the former Engineering 1411, the former Engineering 1412, the former Engineering 2412, the former Engineering 2413

LH: 1.5

PR: MATH 1001

2050 Linear Algebra I includes the topics of Euclidean n -space, vector operations in 2- and 3-space, complex numbers, linear transformations on n -space, matrices, determinants, and systems of linear equations.

CR: the former Engineering 2402

PR: A combination of placement test and high school Mathematics scores acceptable to the Department or 3 credit hours in first year Mathematics courses.

2051 Linear Algebra II includes the topics of real and complex vector spaces, basis, dimension, change of basis, eigenvectors, inner products, and diagonalization of Hermitian matrices.

PR: MATH 1000 and MATH 2050

2090 Mathematics of Finance covers the following topics: simple and compound interest and discount, forces of interest and discount, equations of value, annuities and perpetuities, amortization schedules and sinking funds, bonds and other securities, contingent payments.

PR: MATH 1001

2130 Technical Writing in Mathematics is a project oriented course combining mathematical investigation and technical writing. By using computer programming, graphical and typesetting tools, students will explore mathematical concepts and will produce technical reports of professional quality. The latter will combine elements of writing and graphics to convey technical ideas in a clear and concise manner.

PR: MATH 1001 and (Computer Science 1510 or 1710 or 2710 or 2602 or permission of the Head of Department).

2320 Discrete Mathematics are basic concepts of mathematical reasoning, sets and set operations, functions, relations including equivalence relations and partial orders as illustrated through the notions of congruence and divisibility of integers, mathematical induction, principles of counting, permutations, combinations and the Binomial Theorem.

CR: the former Computer Science 2740

PR: MATH 1001 or MATH 2050

2500 Statistics for Business and Arts Students is descriptive statistics (including histograms, stem-and-leaf plots and box plots), elementary probability, discrete random variables, the binomial distribution, the normal distribution, sampling distribution, estimation and hypothesis testing including both one and two sample tests, paired comparisons, chi-square test, correlation and regression. Related applications.

CR: STAT 2510, STAT 2550, Psychology 2910, Psychology 2925 and the former Psychology 2900.

LH: 1.5

PR: MATH 1000 or 6 credit hours in first year courses in Mathematics or registration in at least semester 3 of a Bachelor of Nursing program or permission of the Head of Department.

2550 Statistics for Life Science Students is an introduction to basic statistics methods with an emphasis on applications to life sciences and, in particular, to biology. Material includes descriptive statistics, elementary probability, binomial distribution, normal distribution, sampling distribution, estimation and hypothesis testing (both one and two sample cases), chi-square test, one way analysis of variance, correlation and simple linear regression.

CR: STAT 2500, STAT 2510, Psychology 2910, Psychology 2925 and the former Psychology 2900.

LH: 1.5

OR: Statistical computer package will be used in the laboratory, but no prior computing experience is assumed

PR: MATH 1000 or the former MATH 1081

3000 Real Analysis I (F and W) is proof techniques, structure of \mathbb{R} , sequences, limits, continuity, uniform continuity, differentiation.

CR: the former MATH 2001

LH: 1

PR: MATH 2000

3202 Vector Calculus deals with functions of several variables. Lagrange multipliers, vector valued functions, directional derivatives, gradient, divergence, curl, transformations, Jacobians, inverse and implicit function theorems, multiple integration including change of variables using polar, cylindrical and spherical co-ordinates, Green's theorem, Stokes' theorem, divergence theorem, line integrals, arc length.

CR: Physics 3810
PR: MATH 2000 and MATH 2050

3260 Ordinary Differential Equations I is direction fields, equations of first order and first degree, higher order linear equations, variation of parameters, methods of undetermined coefficients, Laplace transforms, systems of differential equations. Applications include vibratory motion, satellite and rocket motion, pursuit problems, population models and chemical kinetics.

CR: the former Engineering 3411
PR: MATH 2000

3320 Abstract Algebra is an introduction to groups and group homomorphisms including cyclic groups, cosets, Lagrange's theorem, normal subgroups and quotient groups, introduction to rings and ring homomorphisms including ideals, prime and maximal ideals, quotient rings, integral domains and fields.

PR: MATH 2320

3330 Euclidean Geometry is classical Euclidean geometry of the triangle and circle. The inversion transformation, including the theorem of Feuerbach. Elliptic and hyperbolic geometries.

PR: MATH 2051 or 2320

3340 Introductory Combinatorics includes Topics such as distributions, the binomial and multinomial theorems, Stirling numbers, recurrence relations, generating functions and the inclusion-exclusion principle. Emphasis will be on applications.

PR: MATH 2320

3370 Introductory Number Theory is perfect numbers and primes, divisibility, Euclidean algorithm, greatest common divisors, primes and the unique factorization theorem, congruences, cryptography (secret systems), Euler-Fermat theorems, power residues, primitive roots, arithmetic functions, Diophantine equations, topics above in the setting of the Gaussian integers.

PR: MATH 2320

3410 Mathematical Statistics I is basic probability concepts, combinatorial analysis, conditional probability, independence, random variable, distribution function, mathematical expectation, Chebyshev's inequality, distribution of two random variables, binomial and related distributions, Poisson, gamma, normal, bivariate normal, t, and F distributions, transformations of variables including the moment-generating function approach.

OR: one and a half hour tutorial period weekly
PR: MATH 2000

10.21 Philosophy

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Division.

Philosophy courses are designated by PHIL.

1200 Principles of Philosophy (same as the former PHIL 2200) is a general introduction to the study of Philosophy both as a contemporary intellectual discipline and as a body of knowledge. The course covers the main divisions, fundamental questions and essential terminology of Philosophy through a reading of classical texts (It is a required course for further courses in Philosophy programs. It is intended for students in first year who have completed one semester of university education).

CR: the former PHIL 2200

1600 Philosophy of Human Nature is an approach to philosophical thinking by way of analysis and critique of theories of human nature, classical and modern, and the world views associated with them.

CR: former PHIL 1001

2210 Logic is an introduction to traditional and modern logic open in any year to all students wishing acquaintance with basic logical skills.

2220 Principles of Human Knowledge are various concepts of knowledge - empirical, rational, transcendental, systematic. Their metaphysical grounds and implications. The concept of scientific knowledge; real and abstract entities; objectivity and subjectivity.

2551 Health Ethics examines concepts of health and illness and their ethical implications.

CR: the former PHIL 2803

2561 Environmental Ethics examines concepts of nature and their ethical implications.

CR: the former PHIL 2809

2581 Philosophy of Film introduces some of the central philosophers, topics and themes in the philosophy of film. Topics and themes include: the nature of film image, the relationship between film and "reality", the social/political role and function of film and the nature and value of the

documentary. The course will also consider the representation of broader philosophical idea in film. A film or films will accompany each section.

2701 History of Ancient Philosophy (same as Classics 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Classics 2701

2702 History of Modern Philosophy is survey of the development of western Philosophy since the seventeenth century.

CR: the former PHIL 3700, the former PHIL 3701, and PHIL 2702

3400 Political Philosophy is leading philosophical ideas concerning the origin and justification of political institutions.

3610 Philosophy and Literature is a study of the interrelationship of thought and imagination in philosophical and literary forms of writing.

3730 Plato is selections from the works of the Greek "lovers of wisdom" - the first philosophers - particularly Plato.

3740 Aristotle is the works and legacy of perhaps the most influential systematic thinker of all time.

3860 Hegel is selections from Hegel's system with emphasis on the nature of dialectical and speculative philosophy and its enormous influence in the present time.

3940 Existentialism is the philosophy and literature of Existentialism from Kierkegaard, Nietzsche and Dostoevsky to Sartre, de Beauvoir and Camus.

CR: PHIL 3940

4250 Seminar in Metaphysics and Epistemology

4700 Seminar in Special Authors and Texts will have topics to be studied announced by the Department.

10.22 Physics

Physics courses are designated by PHYS.

1020 Introductory Physics I is a non-calculus based introduction to mechanics.

CO: Mathematics 1090

CR: PHYS 1050

LH: 3

PR: Level III Advanced Mathematics or Mathematics 1090. It is recommended that students have completed at least one of level II and level III high school physics courses, however this course may be completed by someone who has no physics background provided some extra effort is made.

1021 Introductory Physics II is a non-calculus based introduction to fluids, wave motion, light, optics, electricity and magnetism.

CO: Mathematics 1000

LH: 3

PR: PHYS 1020 or PHYS 1050 and Mathematics 1000.

1050 General Physics I: Mechanics is a calculus based introduction to mechanics. The course will emphasize problem solving.

CO: Mathematics 1000

CR: PHYS 1020

LH: 3

PR: Mathematics 1000, which may be taken concurrently

1051 General Physics II: Oscillations, Waves, Electromagnetism is a calculus based introduction to oscillations, wave motion, physical optics and electromagnetism.

CO: Mathematics 1001

LH: 3

PR: PHYS 1050 or PHYS 1021 or PHYS 1020 (with a minimum grade of 65%) and Mathematics 1001.

2056 General Physics VI: Modern Physics (W) is special relativity, quanta of light, atomic structure and spectral lines, quantum structure of atoms and molecules, nuclei and elementary particles.

CO: Mathematics 1001 and PHYS 1051

CR: PHYS 2750

LH: 3

PR: Mathematics 1001, PHYS 1050 (or PHYS 1020 and PHYS 1021), and PHYS 1051.

2065 Experimental and Computational Physics is laboratory techniques, including experimental method and design. Data analysis, including application of statistics to experimental physics. Numerical analysis using Maple, and an introduction to modelling in physics. Topics are introduced through experiments, complementary lectures, and library research of some of the great experiments of physics.

CO: Mathematics 2050

LH: 3

PR: PHYS 1051 (or the former PHYS 2054), Mathematics 1001, and

Mathematics 2050. Students who have completed PHYS 1020/1021 will be allowed to register for PHYS 2065 with the permission of the Instructor and the Program Chair.

2151 Stellar Astronomy and Astrophysics (W) is atomic structure and spectra. The sun: radiation, energetics, magnetic field. Stars: distance, velocity, size, atmospheres, interiors. Variable stars, multiple stars, clusters and stellar associations. Stellar evolution, interstellar matter, structure of the Milky Way Galaxy. Exterior galaxies, quasi-stellar objects, pulsars. Cosmology.

PR: six credit hours in Mathematics at the first year level

2553 Introduction to Analog and Digital Electronics covers the basics of the analog and digital electronics; direct current circuits, capacitors and inductors, alternating currents, test equipment and measurement, transducers, diodes and transistors, introduction to operational amplifiers, digital basics, digital circuitry and digital analog I/O. This course is a combined lecture/laboratory course with two three-hour sessions scheduled per week.

PR: PHYS 1021 or 1051 and Mathematics 1000 or equivalent

3060 Electricity and Magnetism is point charges; Coulomb's law; electrostatic field and potential; Gauss' law; conductors; magnetostatics; Ampere's law; Biot-Savart law; dielectric and magnetic materials; electrostatic and magnetostatic energy; Lorentz force; time varying fields; Faraday's law; Lenz's law; Maxwell's equations.

CO: Mathematics 3260

LH: 3

PR: PHYS 1051 and Mathematics 3260

3160 Stellar and Galactic Astronomy is the physics and mathematics of stars and galaxies. Orbits and the two-body problem, radiation and matter, theory of stellar atmospheres, structure and evolution of stars. Galaxies: Morphology and kinematics. Milky Way kinematics and structure, large-scale star formation, the distribution of interstellar matter in galaxies. Starburst and active galaxies. An introduction to cosmology.

CR: PHYS 3150 and PHYS 3151

PR: PHYS 2056, 2151 and Mathematics 2000. PHYS 3220 is recommended.

3220 Classical Mechanics I is kinematics and dynamics of a particle. Moving reference systems. Celestial mechanics. Systems of particles.

CO: Mathematics 3260

PR: PHYS 2820 and Mathematics 3260

3820 Mathematical Physics II examines the functions of a complex variable; residue calculus. Introduction to Cartesian tensor analysis. Matrix eigenvalues and eigenvectors. Diagonalization of tensors. Matrix formulation of quantum mechanics. Quantum mechanical spin. Vector differential operators in curvilinear coordinate systems. Partial differential equations of Mathematical Physics and boundary value problems; derivation of the classical equations, separation of variables; Helmholtz equation in spherical polar coordinates.

PR: Mathematics 3260, and PHYS 3810 (Mathematics 3202)

10.23 Political Science

Political Science courses are designated by POSC.

1000 Introduction to Politics is an introduction to basic concepts in the study of politics, power, law, public policy and government, touching on major areas of political ideologies, institutions, and current domestic and international political issues. Suitable for students in all disciplines seeking an introduction to Political Science.

1010 Canadian Political Problems explores some of Canada's most pressing and interesting political issues. This course profiles important political problems facing federal and provincial politicians and society. Suitable for students in all disciplines who have an interest in Canadian politics and who wish to develop a basic awareness of Canadian government.

1020 Issues in World Politics explores some of the world's most pressing and interesting political issues. This course profiles important political problems, such as a power struggle within a particular country, a controversial topic that affects an entire continent, or a major crisis that has implications for inhabitants around the world. Suitable for students in all disciplines who have an interest in international politics.

2200 Introduction to International Politics is an examination of the "building blocks" of international politics including determinants, means, processes and ends. Emphasis is on the post-1945 period.

2300 Introduction to Comparative Politics is an introduction to comparative politics and techniques of comparative analysis across political jurisdictions. This course focuses on the differences between, and similarities among, a variety of countries and systems of government.

2500 Introduction to Political Behaviour is an introduction to classics and controversies in the understanding of political behaviour. Topics include

political culture and individual behaviour, public opinion, voting and elections, political participation, psychological dimensions of activism, and social movements.

2600 Introduction to Public Policy and Administration outlines major concepts in, and issues relating to, the fields of public policy and administration. Examines and assesses government organization and decision-making. Topics may also include social, economic and health policy.

CR: the former POSC 3540

2800 Introduction to Canadian Politics and Government is an introduction to the structure and operations of institutions of Canadian government and the nature of political actors. Topics to be examined may include the constitution, federalism, parliament, political parties, political culture and elections.

CR: the former POSC 2710

3550 Politics and the Environment is an examination of the environmentalist movement, interest groups, and green parties; the impact of environmentalism on conventional parties and public opinion; and the dynamics of support for and opposition to the achievement of environmentalist objectives.

3731 Environmental Policy is an examination of the formation, implementation, and impact of public policies concerning the environment including an examination of different policy approaches and the problems of environmental regulation.

10.24 Psychology

Psychology 1000 and Psychology 1001 are prerequisites for all Psychology courses.

1000 and 1001 Introduction to Psychology is an introduction to Psychology as a biological and social science. Topics shall include research methodology, physiological processes, perception, learning, memory and cognition, human development, animal behaviour, emotion, motivation, consciousness, personality and individuality, psychological disorders and treatment, and social psychology.

PR: Psychology 1000 is a prerequisite for Psychology 1001

2925 Research Methods and Data Analysis in Psychology I will cover basic research methods and supporting statistical concepts and techniques. Basic methods will include observational techniques, correlational studies, and surveys. Supporting statistical concepts will include populations and samples, measures of central tendency and variability, basic probability, correlation, simple linear regression and validity and reliability. Supporting statistical techniques will include producing tables and graphs, and the calculation and interpretation of measures of central tendency, variability, probabilities, correlation, and simple linear regression. Students will also learn how to write a description of a simple study in basic APA style, and how to use a statistical package to analyse surveys and calculate correlation. Basic ethical principles in conducting research will be introduced. This course includes a weekly laboratory.

CR: Psychology 2910, Statistics 2500, Statistics 2510, Statistics 2550, and the former Psychology 2900

2950 Research Methods and Data Analysis in Psychology II will cover basic experimental methods and supporting statistical concepts and techniques. Basic designs will include one factor designs (independent and repeated measures). Supporting statistical concepts will include statistical sampling distributions (t and F), internal and external validity, hypothesis testing, and simple interactions. Supporting statistical techniques will include independent and repeated measures t-tests, one-factor independent and repeated measures ANOVA, and selected multiple comparisons techniques. Students will also learn how to write a description of an experiment in APA style, how to critically analyse a report of an experiment, how to use and interpret a statistical package to analyse experimental data, and how to conduct literature searches.

CR: the former Psychology 2901, Statistics 2501, and Statistics 2560

LH: a weekly laboratory

PR: Psychology 2925 or equivalent

3950 Research Methods and Data Analysis in Psychology III will cover advanced research methods, including survey methods, and supporting statistical concepts and techniques. Designs will include single factor designs and multi-factor designs with both random and fixed factors. Supporting statistical concepts will include analysis of variance (ANOVA) from a linear model perspective, statistical power, and multiple regression, including model building. There may be a general introduction to multivariate statistical techniques. Ethical issues in research will be discussed in detail. Students will be required to design and carry out at least one research project from the design to the writeup stage, including an ethics review.

CR: Psychology 3900, Statistics 3520, the former Psychology 3520

LH: a weekly laboratory

PR: Psychology 2950 or equivalent

10.24.1 Survey Courses

2025 Survey of Developmental Psychology is a survey of the cognitive, social, and personality development of people. Development will be tracked from the prenatal stage to old age. Topics to be studied shall include: research methodology, genetics, prenatal development, environmental effects during prenatal development, attachment, emotional development, language development, intelligence, cognitive development, socialization, sex-roles and gender identity, adolescence, adulthood and aging.

CR: Psychology 2010 and Psychology 2011

2125 Survey of Social Psychology is a survey of how the behaviour of individuals is influenced by others. Topics to be studied shall include: methodology and ethics, social cognition, social perception, attitude formation and change, interpersonal attraction, social influence, group processes and leadership. Additional topics may include: aggression, prosocial behaviour, sex and gender, environmental effects, organizational behaviour, health, stress and psychology and the law.

CR: Psychology 2100 and Psychology 2120

2225 Survey of Learning is a survey of learning phenomena and learning theories. Topics to be studied shall include: the evolutionary context of learning, habituation and sensitization, imprinting, Pavlovian conditioning, instrumental learning, generalization and discrimination in learning and neural mechanisms of learning.

CR: Psychology 2240 and the former Psychology 2250

2425 Survey of Cognitive Psychology is a survey of how humans process and retain information. Topics to be studied shall include: perception and pattern recognition, attentional processes and memory. The influence of stored information on selected behaviours will be considered. Selected behaviours may include language processing, concept formation, problem solving, decision making and practised and skilled performance.

CR: Psychology 2440 and Psychology 3450

2625 Survey of Personality is a survey of the theories of personality and relevant selected areas of research in the area of personality. Issues related to the application of this information to understanding abnormal behaviour will also be discussed. Theoretical systems covered will include: psychodynamic theory, behaviourism and cognitive-behavioural theory, humanism, traits and dispositions, social learning theory, psychological constructivism, information processing and biological theories of personality.

CR: Psychology 2610, the former Psychology 2620, and the former Psychology 2200.

2825 Survey of Biological Psychology is a survey of the biological bases of behaviour. Topics to be studied shall include: the structure and function of the nervous system, sensory structures and sensory coding, homeostasis, emotions, circadian rhythms and sleep, sexual behaviour, psychopharmacology, consciousness and language, behavioural evolution and behaviour genetics.

CR: Psychology 2810 and the former Psychology 2850

10.24.2 Contemporary Issues Courses

3025 Contemporary Issues in Developmental Psychology examines in depth one or more areas of research within developmental psychology. Some topics that may be examined include cognitive development, social development, developmental psychopathology, and child eyewitness testimony.

PR: Psychology 2025 and Psychology 2925

3040 Contemporary Issues in the Psychology of Death and Dying uses psychological research, theory, and clinical experience to study death, dying and bereavement throughout the life cycle. Some selected topics include understanding death, the process of dying, care of the dying, medical ethics, suicide, and the psychological impact of life-threatening conditions. In addition, trauma, grief, and bereavement in children, adolescents, and adults are explored.

PR: Six credit hours in 2000 level psychology courses

3125 Contemporary Issues in Social Psychology examines in depth one or more areas of research within social psychology. Some topics that may be examined include the psychology of prejudice, criminal behaviour, social influence, and aggression.

PR: Psychology 2125 and Psychology 2925

3126 Contemporary Issues in the Psychology of Women explores the psychology of women from varying cultural perspectives, such as racial, sexual orientation, age and class. Topics include the history of women in psychology, women's development across the life span, women and social relationships, and violence against women.

PR: Six credit hours in 2000 level psychology courses

3225 Contemporary Issues in Learning examines in depth one or more areas of research in learning and cognition. Topics may include associative learning, instrumental conditioning, discrimination learning, category formation, memory, navigation, social cognition and learning, intelligence, concepts of time and number, self-awareness and communication and

language.

PR: Psychology 2225 and Psychology 2925

3226 Contemporary Issues in the Psychology of Education is an introduction to the application of psychology to issues in education in a variety of settings. It examines the theoretical and applied aspects of learning and cognitive development; motivation; personal and social development; and evaluation, measurement, and assessment.

PR: Six credit hours in 2000 level psychology courses

3325 Contemporary Issues in Sensation and Perception examines the functioning of human sensory systems and how physical stimuli are transformed into signals that can be understood by the nervous system. In both human and animal models how the brain receives and processes information from the visual, auditory, gustatory, olfactory, and somatosensory systems may be examined. Basic psychophysics may also be examined.

PR: Psychology 2925 and Psychology 2425 or Psychology 2825

3425 Contemporary Issues in Memory and Cognition uses current psychological theories and research to examine aspects of human memory and cognition. Topics may include, but are not limited to, perception and pattern recognition, attentional processes, knowledge representation, working and long term memory, language, problem solving, decision making, expert performance, and abnormalities in cognition.

PR: Psychology 2425 and Psychology 2925

3525 Contemporary Issues in Emotion introduces the biological, cognitive, and social influences on emotions. Attention is given to unconscious (automatic) processes, nonverbal emotional expressions, and understanding specific emotions. Contemporary research may be highlighted in such areas as the effects of hormones, emotional intelligence, the consequences of problems in emotional development, or emotions in therapy.

PR: Psychology 2925 and any Survey Course in Psychology from the Grenfell Campus Psychology Program

3625 Contemporary Issues in Personality examines in depth one or more areas of research with personality psychology. Some topics that may be examined include stress and health, psychoanalysis, psychology of motivation, and personality in work organizations.

PR: Psychology 2625 and Psychology 2925

3626 Contemporary Issues in Abnormal Psychology explores the definition of abnormal behaviour, clinical assessment, classification, and diagnosis. The core theoretical perspectives on psychological disorders are examined. For each disorder the diagnostic criteria, etiology, treatment, and prognosis is presented. This course enhances the students' ability to think critically about issues pertaining to mental health and illness.

CR: Psychology 3640, Psychology 3650, and the former Psychology 3600
PR: Psychology 2625 and Psychology 2925

3627 Contemporary Issues in Psychotherapy introduces students to the major theories, concepts and practices of contemporary approaches to psychotherapy. It includes the exploration of ethical and professional issues in professional practice.

PR: Psychology 2625 and Psychology 2925

3628 Contemporary Issues in Psychological Testing and Measurement explores the development and application of tests and techniques for psychological assessment. A review of test construction and evaluation examines methods of item analysis, reliability, validity, and test norms. The major domains of applied psychological assessment are examined. Ethical issues in psychological assessment are presented throughout the course.

PR: Psychology 2950 and any one of Psychology 2025, Psychology 2425, Psychology 2625.

3725 Contemporary Issues in Animal Behaviour includes one or more areas of research in animal behaviour and/or evolutionary psychology. Topics may include history of animal behaviour and/or evolutionary psychology, genetic analysis of behaviour, evolutionary theory and natural selection, development of behaviour, sensation and perception, orientation, foraging, antipredator behaviour, learning, cognition, sociality and dispersion, sexual reproduction and sexual selection, parental care and mating systems, altruism, aggression, communication and social dominance.

PR: Psychology 2925 and Psychology 2825 or Psychology 2225

3825 Contemporary Issues in Physiological Psychology includes one or more areas of research in neuroscience and/or behavioural neuroscience. Topics may include neurophysiology and neuroanatomy, methodology including brain imaging, developmental disorders, sensory-perceptual and motor systems, physiological basis of attention, memory, language, emotion and spatial behavior, alterations of consciousness, neurological disorders, plasticity, recovery and rehabilitation and neuropsychological assessment.

PR: Psychology 2825 and Psychology 2925

10.24.3 Senior Courses

4910 Systems of Psychology is a study of paradigms and explanations in contemporary psychology in the context of their historical antecedents.

PR: at the St. John's campus, 30 credit hours in Psychology courses required in the majors program and admission to a Major in Psychology or Behavioural Neuroscience or, at the Grenfell campus, 30 credit hours in Psychology courses including Psychology 3950

4925 Senior Seminar in Psychology is weekly seminars for faculty and senior students in Psychology. Current issues in academic and professional psychology shall be discussed.

PR: 30 credit hours in Psychology including Psychology 3950 or permission of the Chair of Psychology

4950 Independent Project in Psychology is under the supervision of a Faculty member where students will independently carry out approved projects and prepare reports of their findings.

CR: Psychology 4951

PR: 30 credit hours in Psychology including Psychology 3950 or permission of the Chair of Psychology

4951 Honours Project in Psychology I is under the supervision of a Faculty member and each student will independently review an area of psychology and prepare a thesis proposal for further investigation.

CR: Psychology 4951

PR: 30 credit hours in Psychology including Psychology 3950 or permission of the Chair of Psychology and admission to the Honours program in Psychology

4959 Honours Project in Psychology II is a continuation of Psychology 4951. Under the supervision of a Faculty member, each student will independently carry out an approved project which will result in an honours thesis.

PR: Psychology 4951 or the permission of the Chair of Psychology and admission to the Honours program in Psychology

10.24.4 Non-Restricted Courses

2150 Introduction to Forensic Psychology will provide an in-depth overview of the relationship between psychology and the law. A variety of topics will be discussed and critically evaluated, including the use and misuse of psychology-based investigative methods such as offender and geographic profiling, detection of deception, investigative interviewing, eyewitness testimony, jury decision-making, corrections and treatment, risk assessment, and criminal responsibility.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

2800 Drugs and Behaviour is an examination of the neurophysiology of drug action, the measurable effect of drugs on experimentally controlled behaviour, and a survey of information available on common self-administered drugs and their immediate and long-term effects.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

3533 Sexual Behaviour covers the most important aspects of human sexuality with a psychology theory and research framework. The course will examine the biological, behavioural and socio-cultural bases of the human sexual response. Topics include sexual interaction and communication, contraception, sexually transmitted infections, reproduction, sexual orientation, transgender and intersex, variations in sexual behaviour, sex and gender, sexual dysfunction and therapy, and sexual coercion.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

10.25 Religious Studies

Unless otherwise specified, Religious Studies courses do not have prerequisites. Students who register in a 3000- or 4000-level course are encouraged, however, to make sure that they have adequate preparation for that course, preferably by having completed a first- or second-year course in the field.

Religious Studies courses are designated by RELS.

1000 The Religions of the World is an introduction to the basic beliefs and practices of the world's great religions.

CR: the former RELS 2010

1032 Introduction to Asian Religions and Culture is a broadly based survey course introducing students to the religions, culture, and societies of Asia. Traditions explored may include those of India (Hinduism, Buddhism, Sikhism, Jainism), China (Daoism, Confucianism, Buddhism), Japan (Shinto, Zen Buddhism), and Korea.

2013 Introduction to Christianity is a study of the Christian tradition, its development and variety. The course will include an examination of the beliefs and practices of both Eastern and Western Christianity and a study of

the main differences among the major Western denominations.

2050 Introduction to the Old Testament is an introduction to the historical background, literary structure, and content of the Old Testament. Emphasis will be placed on the authorship and dating of the various texts that comprise the Old Testament, as well as on major themes, figures, and events. This course may qualify as a Research/Writing course. Consult each semester's registration materials for the R/W designation.

2051 Introduction to the New Testament is an introduction to the history and literary structure of the documents comprising the New Testament. Emphasis will be placed on the major themes found in these documents and on the distinctiveness of approach of the individual writers.

2350 Religious Institutions (same as Anthropology 2350) is a comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.

CR: Anthropology 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

2400 Introduction to Buddhism is a study of the history of the Buddhist tradition in India and China, the development of the main lines of Buddhist thought, and the nature of the Chinese transformation of Buddhism.

CR: the former RELS 3400

2410 Introduction to Hinduism involves a study of the religious thought and history of India, the literature of Hinduism, the major thinkers in Hindu philosophy, and the role of Hinduism in the culture and society of India.

CR: the former RELS 3410

2610 Introduction to Religious Ethics is an introduction to religious ethics through the systematic study of selected writers and issues in biomedicine, human sexuality, and social justice. Possible topics for discussion include euthanasia, abortion, poverty, and unemployment.

CR: the former RELS 2600 and the former RELS 2601

3010 Greek Religion (same as Classics 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Classics 3010 and the former RELS/Classics 3121

3020 Roman Religion (same as Classics 3020) is a study of the role of religion in the private and public life of the Roman world.

CR: Classics 3020 and the former RELS/Classics 3121

3200 Jesus: His Life and Teaching is a study of the ministry and thought of Jesus of Nazareth as contained in the Gospels and other New Testament writings. Attention will be given to the methods and conclusions of recent scholarship as applied to his principal teachings and to the study of the historical Jesus.

3210 Paul and His Writings is a study of the Pauline writings and an appraisal of the contribution to Christianity of his mission and theology on the basis of New Testament and other relevant material. Particular attention will be given to such related themes as salvation, reconciliation, grace, and justification.

3310 Judaism at the Beginning of the Christian Era will explore the developments in Jewish thought, institutions, beliefs, and practices during the time when Greek and Jewish cultures encountered one another and in which Jesus of Nazareth lived.

CR: the former RELS 3220

3401 Zen, Buddhist Meditation, and Buddhist Psychology examines the relationship between meditation and theories of human psychology in Buddhism from its origins to its formulation in Zen.

3820 Religion and the Arts (same as Visual Arts 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture and dance.

CR: Visual Arts 3820

3831 Religious Themes in Contemporary Songwriting is a study of religious themes in contemporary songwriting through the in-depth examination of the work of a selection of contemporary songwriters. The course will explore how religious questions and themes are handled in contemporary song and explore how song as an artistic medium expresses religious meaning. Songwriters to be explored may include the following: Bob Dylan, Bob Marley, Joni Mitchell, Leonard Cohen, Van Morrison, Tori Amos, Nick Cave, Alanis Morissette, Julie Miller, the Louvin Brothers, the Stanley Brothers, Hank Williams, etc.

3880 Spirituality and the Earth is an examination of the attitudes of various religious traditions to the environment. Special attention will be paid to Native American spirituality.

PR: 3 credit hours in Religious Studies beyond the first-year level or departmental permission

10.26 Science

Science courses are designated by SCI.

3000 Concepts, Methods and Issues in Science I is the origin of the universe; formation of matter and its nature; origin of the solar system; evolution of the earth and its biosphere; theories of origins of life; mechanisms of evolution and speciation.

PR: at least 45 credit hours

UL: may not be used towards fulfilment of the 78 Science credit hours required for the Bachelor of Science Degree

3001 Concepts, Methods and Issues in Science II is genetic and molecular engineering; behavioural biology: genetic determinism versus environmentalism; artificial intelligence. The paradoxes of the quantum world; the scientific method; science and pseudoscience.

PR: completion of at least 45 credit hours

UL: may not be used towards fulfilment of the 78 Science credit hours required for the Bachelor of Science Degree

4000 Senior Science Seminar is a review of current topics in science discussed in a seminar format. Seminars will be presented by faculty, students and guest speakers. This will be a designated Writing Course.

PR: Permission of the Program Chair. This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4950 Senior Project requires students to work either individually or in pairs on developing a poster presentation on specific scientific topics of current interest. This will require a detailed proposal, followed by the necessary relevant research in appropriate journals and Internet sources. Participants in this course will organize a mini-conference, to be held at the end of semester, at which these posters will be presented. Where appropriate, students will be encouraged to integrate knowledge from at least two different scientific disciplines in the development of this project. This will be a designated Writing Course.

PR: This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4951 Honours Project I is the preparation of a project proposal under the guidance of a faculty supervisor, including a comprehensive bibliographical review, with the aim of producing a well-annotated Bibliography. This will be a designated Writing Course.

PR: Permission of the Program Chair. This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4959 Honours Project II is a continuation of SCI 4951. Under the supervision of a Faculty Advisor, students will prepare an Honours Thesis. The preparation of this will entail some original research, and will require the student to integrate knowledge from at least two disciplines. This will be a designated Writing Course.

PR: SCI 4951 and permission of the Program Chair

10.27 Social/Cultural Studies

Social/Cultural Studies courses are designated by SCCU.

2244 The Graphic Novel - Historical, Cultural and Literary Contexts (same as English 2244) examines the historical, cultural and literary impact of the Graphic Novel; investigates its continuing development; and introduces students to significant works within the genre.

CR: English 3842, English 2244

PR: 6 credit hours first-year English; one of Folklore 1000, Anthropology 1031, or Sociology 2000

4000 Interdisciplinary Seminar in Social/Cultural Studies is conducted through faculty presentations, assigned readings and group discussions and students will learn how to engage and evaluate the broad debates within Anthropology, Folklore and Sociology. Rather than focus on narrow substantive material from the disciplines, this seminar will emphasize the larger shifts and challenges which have led to new topics and methods of analysis within the social sciences.

PR: completion of 90 credit hours or more and admission to Social/Cultural Studies

4100 Issues in Cultural Studies represents an examination of the concept of culture, as it is presently used within Anthropology, Folklore and Sociology. Particular attention will be paid to the area of Cultural Studies, and the ways in which that approach has re-energized an interest in the role of culture in modern society.

PR: completion of 90 credit hours or more and admission to Social/Cultural Studies

4950 Independent Project in Social/Cultural Studies is under the supervision of a faculty member and students will independently carry out approved projects of direct relevance to social and cultural phenomena, and prepare reports of their findings.

PR: SCCU 4000

10.28 Sociology

Sociology 1000 or Sociology 2000 are prerequisites for all further Sociology courses except Sociology 2250 and those cross-listed with Anthropology. Credit is not given for both Sociology 1000 and Sociology 2000. Before taking 3000-level courses, students should have taken at least 6 credit hours in courses below the 3000 level. Courses at the 4000 level will normally be taken by students who have previously taken at least 9 credit hours in courses at the 3000 level.

The following courses, cross-listed with Anthropology and identified by the prefix "S/A", are also taught at the introductory level: 2200, 2210, 2220, 2230, 2240, 2260, 2270, 2280, and 2350. A minimum of two of these courses is prerequisite to further cross-listed courses. These courses are open to be taken as first courses or may be taken to follow up a Sociology introductory course.

Sociology courses are designated by SOCI.

2000 Introduction to Sociology is an introduction to the concepts, principles, and topics of Sociology. This course is restricted primarily to first-year students.

CR: SOCI 2000

2100 Social Inequality introduces the subject of social inequality and stratification, examines social inequality in historical perspective, reviews major theories about social inequality, and considers key social developments in contemporary societies in the area of social inequality.

2120 Technology and Society is an examination of the role of technology in society. Topics may include the emergence of modern technological society, the impact of new technologies on social organization and culture and the institutionalization of science and the production of scientific knowledge. The course also explores the ideological functions of science and technology in advanced industrial societies as well as the question of "the domination of nature".

2200 Communities (S/A) is an interdisciplinary examination of the concept of Community. Readings will include community studies from North America and Europe.

2210 Communication and Culture (S/A) is an examination of verbal and non-verbal systems of communication, and the influence of language on human cognition.

2230 Newfoundland Society and Culture (S/A) (same as Folklore 2230) is the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.

CR: Folklore 2230

2240 Canadian Society and Culture (S/A) is a descriptive and analytic approach to the development of Canadian society and culture.

2250 Changing World is sociological analysis of contemporary world issues and social problems.

2260 War and Aggression (S/A) is critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.

2270 Families (S/A) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

2280 The City (S/A) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

2350 Religious Institutions (S/A) (same as Religious Studies 2350) is comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.

CR: Religious Studies 2350

2610 Socialization is an examination of the social and social psychological processes by which individuals become members of human groups.

CR: the former SOCI 4610

3040 Introduction to the Methods of Social Research has as its' objectives (1) to introduce basic concepts underlying research in the social sciences, and (2) to make students familiar with some techniques that are useful in the analysis of a wide range of sociological data and that represent a good foundation for later study of more advanced techniques.

3140 Social Movements (S/A) is an examination of social movements which challenge prevailing social institutions and cultural values. Social movements considered may include religious cults and sects, millenarian movements, attempts at utopian and communal living, feminism, labour and revolutionary movements.

3150 Classical Social Theory is an introduction to the work of major 19th- and early 20th-century social theorists including Marx, Durkheim, Weber and Freud.

3160 Contemporary Social Theory is an exploration of selected topics from issues in contemporary social theory, including theories of feminism, the state, the environment, culture, organization, and communication.

PR: SOCI 3150

3210 Persistence and Change in Rural Society (S/A) assesses the social and cultural significance of the rural experience in the face of expanding urbanism. Topics may include (a) the nature of rural society in Canada, (b) similarities between Canadian and European rural society, c) utopian and anarchist movements in rural life, and (d) reaction of agricultural populations to external influence.

3290 Deviance is major sociological theories and methodological techniques central to the study of deviance and crime are outlined and evaluated. The distribution, attributes and explanations of a variety of forms of deviance are examined, which may include violence, sexual deviance, delinquency, addiction, mental disorder, theft, organized crime, political deviance and corporate deviance.

3314 Gender and Society (S/A 3314) is an examination of biological, psychological, social and cultural aspects of gender, with an emphasis upon contemporary directions of change in sex roles.

3395 Criminal Justice and Corrections provides an introduction to the operation of the Canadian criminal justice system. Topics to be examined may include the origin, nature and utilization of criminal law, policing, adult and juvenile courts, sentencing, correctional institutions, and community based corrections (probation, parole, community service). Criminal justice policy formulation and application are also discussed.

PR: SOCI 3290

3731 Sociology of Culture is a comparative examination of major contemporary sociological texts on the relationship between culture, broadly understood as symbolic systems, and social structure.

4071 Social and Cultural Aspects of Health and Illness covers topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine. Open to those without normal prerequisites by permission of the Instructor.

4072 Social and Cultural Aspects of Death (S/A) will cover topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the Instructor.

10.29 Sustainable Resource Management

Sustainable Resource Management courses are designated by SRMG.

2000 Sustainable Resource Management I: Marine and Terrestrial Environments is an introduction to the interdisciplinary field of sustainable resource management, including marine and terrestrial environments. The course focuses on sustainable practices rather than profit or resource extraction optimization. First Nations' perspectives will also be considered.

PR: Geography 1000 or Geography 1050

2001 Sustainable Resource Management II: Industry-Specific Approaches develops the topics presented in Sustainable Resource Management 2000 with reference to specific industries such as the fishery, forests, mining, oil and gas, soils, and water. This course traces the importance of resources in their historical context both locally and globally.

PR: SRMG 2000

3000 Regional Planning and Management is an introduction to the concepts and processes of regional planning, development, and management. The course addresses planning history and dominant historical contributions to regional, urban, and rural morphology. Planning theory, planning practice, and management strategies are studied.

PR: SRMG 2000 and SRMG 2001

3001 Environmental Planning and Management focuses on balancing economic growth and environmental objectives. Environmental risk analysis, environmental auditing, and First Nations' perspectives will also be studied.

PR: SRMG 3000

3002 Biodiversity focuses on the three dimensions of biodiversity (genetic diversity, species diversity, and ecosystem diversity) and their relationships. Biodiversity will be addressed from an interdisciplinary perspective as genes, species, and ecosystems are of economic and biological interest.

PR: Biology 1001, SRMG 2000, and SRMG 2001

4000 Remote Sensing, Image Interpretation, and Resource Management builds on topics introduced in Environmental Studies 2000 and Environmental Studies 3001. The course addresses the use of remotely-sensed images to track the location, health, and variety of natural resources such as forests, crops, and migratory populations. The lab component of the course employs GIS, GPS, satellite imagery, and aerial photography to address research concerns such as oil spills, forest fire management, iceberg tracking, ocean temperature monitoring, mining exploration, and oil and gas development.

LH: 3

PR: Environmental Studies 2000 and Environmental Studies 3001

4001 Renewable and Non-Renewable Energy Resources presents an interdisciplinary approach to renewable and non-renewable energy resources and their management. The course examines the existing industrial economy's dependence on fossil fuels and studies renewable energy resources such as wind, solar, and geothermal.

PR: SRMG 2000

4002 Risk Assessment and Management is an introduction to risk assessment and management as interdisciplinary processes.

PR: Environmental Studies 4000

4003 Environmental Law is an introduction to laws protecting the environment in Canada and elsewhere. The course examines environmental rules and activities through the study of legal precedents and contexts. Laws and policies of the federal, provincial, and local levels of government (including those pertaining to First Nations) are addressed insofar as they affect the environment. Case studies are employed.

PR: Environmental Studies 1000 and SRMG 2000

4010 Research Seminar in Sustainable Resource Management is the senior seminar in which selected sustainable resource management topics are examined from an interdisciplinary perspective. The seminars are presented on current research and environmental issues by faculty, students, and guest speakers from universities, government, and industry.

PR: Enrolment in the final year of the Sustainable Resource Management program or permission of the program Chair.

4901-4910 Special Topics in Sustainable Resource Management will have topics to be studied announced.

PR: SRMG 2000 and SRMG 2001

4950 Independent Research Project requires that students carry out an approved project on a topic in Sustainable Resource Management and prepare a major paper under the supervision of a faculty member. Students will undertake both a systematic literature review and independent research.

PR: Permission of the Sustainable Resource Management Chair

10.30 Theatre

Theatre courses are designated by THEA.

1000 and 1001 Introduction to the History of Theatre I and II are historical surveys of the art of the theatre. The history of theatre will be studied in terms of the evolution of performance and of the physical theatre from their origins in a variety of social rituals and contexts through to their present plurality of forms. At the same time, the nature and function of the various components of theatrical performance (acting, directing, design, etc.) will be analysed in terms of period philosophical, social, cultural, political and religious contexts. These courses are open to non-theatre students.

1010 Introduction to Acting is an appreciation of the fundamentals of the craft of acting. Basic exercises in voice, movement, relaxation and concentration, improvisation and script analysis will introduce the student to the imaginative and physical skills required by an actor. This is a basic course for both Acting and Stagecraft majors.

AR: attendance is required

OR: 6 hours of studio per week

1020 Introduction to Stagecraft is an appreciation of the basic vocabulary and techniques of the various technical and organizational structures and practices of staging plays. Areas of concentration will include scenic and costume construction, basics in lighting, painting, props, sound and stage management. This is a basic course for both Acting and Stagecraft majors.

AR: attendance is required

OR: 6 hours of studio per week

1110 Acting I is an introductory course for those majoring in acting. Emphasis on voice, speech, movement and text analysis. Various learning methods will be employed, from sensitivity exercises to improvisation and creative imagination exercises. Participation in in-class performance is required.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 1000, THEA 1010, and THEA 1020 and admission to the Theatre Major

1120 Stagecraft I is an introductory course for those majoring in stagecraft. Emphasis on the fundamentals of scenic carpentry, wardrobe, sound,

lighting, crewing, painting and stage management.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 1000, THEA 1010, and THEA 1020

2010 and 2011 Acting II are second level courses for Acting Majors. Emphasis is on speech, text analysis and scene study. Various techniques and texts will be employed to root the student in the fundamental process of acting. A beginning approach to understanding the body as an instrument and the techniques required to use the instrument.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 1001 and THEA 1110. THEA 2010 is a prerequisite for THEA 2011 and admission to the Acting Major

2020 and 2021 Stagecraft II are second level courses for the Stagecraft Major. Emphasis is on the fundamentals of drafting, stage management and props development.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 1001 and THEA 1120. THEA 2020 is a prerequisite to THEA 2021

2080 and 2081 Production Acting is in each case work for Acting Majors in a theatre department production.

AR: attendance is required

CH: 4 credit hours each

OR: 12 hours of studio per week

PR: THEA 1110

2090 and 2091 Production Stagecraft is in each case work for Stagecraft Majors, in a departmental production in a supporting capacity (i.e. assistant stage manager, wardrobe assistant, etc.).

AR: attendance is required

CH: 4 credit hours each

OR: 12 hours of studio per week

PR: THEA 1120

3010 and 3011 Acting III are intermediate level courses for the Acting Major. Continued emphasis on speech, voice production, text analysis, etc.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 2010 and THEA 2011, THEA 2080 and THEA 2081

3020 and 3021 Stagecraft III are intermediate courses for Stagecraft Majors. Continued emphasis on carpentry, painting, lighting, sound, wardrobe, stage management, etc.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 2020 and THEA 2021, THEA 2090 and THEA 2091

3060 and 3061 Master Classes I and II (Stagecraft) are courses for stagecraft students with a guest artist in a particular area of specialization.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 2020 and THEA 2021. THEA 3060 is a prerequisite for THEA 3061

3070 and 3071 Master Classes I and II (Acting) are courses for Acting students with a guest artist in a particular area of specialization.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 2010 and THEA 2011. THEA 3070 is a prerequisite for THEA 3071

3080 and 3081 Production-Acting is in each case work, for Acting Majors on a department of theatre production.

AR: attendance is required

CH: 4 credit hours each

OR: 16 hours of studio per week

PR: THEA 2010 and THEA 2011, THEA 2080 and THEA 2081

3090 and 3091 Production-Stagecraft is in each case work, for Stagecraft Majors on a departmental production in a significant capacity (i.e. stage manager, crew chief, head of props, etc.).

AR: attendance is required

CH: 4 credit hours each

OR: 16 hours of studio per week

PR: THEA 2020 and THEA 2021, THEA 2090 and THEA 2091

3605 Music Theatre Workshop - inactive course.

4001 Theatre Institute at Harlow is a full semester's work, utilizing both the Harlow Campus and Grenfell Campus, comprising a "thesis production" involving fourth-year acting and stagecraft students in major responsibilities. A practical component in Theatre Criticism utilizing the resources of the Harlow Campus proximity to London and Stratford. A series of Master Classes, Workshops, Field Trips and Guest Lectures offered by members of the theatre profession in England. A project in a selected area of theatre history.

AR: attendance is required

CH: 10

PR: THEA 4010 or THEA 4011, THEA 4060 or THEA 4070, THEA 4080 or THEA 4090, THEA 4030, THEA 4040

4010 Acting IV is an advanced course for acting majors. Concentration on advanced scene study on texts illustrating period styles or genres of plays.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 3010 and THEA 3011, THEA 3080 and THEA 3081

4020 Stagecraft IV is an advanced course for Stagecraft Majors with individual concentration on specific technical skills.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 3020 and THEA 3021, THEA 3090 and THEA 3091

4030 Theory of Directing and Design is an examination and analysis of the nature and practice of directing and design from a theoretical and aesthetic perspective. A lecture/seminar course involving script analysis to examine the interpretive and imagistic processes of directors and designers.

OR: seminar 3 hours per week

PR: THEA 3010 and THEA 3011 or THEA 3020 and THEA 3021, Visual Arts 2700 and Visual Arts 2701, and 18 credit hours in Dramatic Literature courses

4040 Directed Studies are student projects in playmaking, performance, directing, design or technical presentations supervised by faculty. In consultation with the faculty, the student will submit a proposal for a project on which he/she wishes to work. These projects will be presented in public.

OR: 6 hours of studio per week

PR: THEA 3010 and THEA 3011 or THEA 3020 and THEA 3021 and admission to the Theatre Major

4060 Master Class III (Stagecraft) is advanced work with a guest artist in a particular area of specialization.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 3060 and THEA 3061

4070 Master Class III (Acting) is advanced work with a guest artist in a particular area of specialization.

AR: attendance is required

OR: 6 hours of studio per week

PR: THEA 3070 and THEA 3071

4080 Production-Acting is work for Acting Majors on a theatre department production.

AR: attendance is required

CH: 4

OR: 20 hours of studio per week

PR: THEA 3010 and THEA 3011, THEA 3080 and THEA 3081

4090 Production-Stagecraft is work for Stagecraft Majors on a departmental production in a significant and leading capacity (i.e. designer, stage manager, technical director, etc.).

AR: attendance is required

CH: 4

OR: 20 hours of studio per week

PR: THEA 3020 and THEA 3021, THEA 3090 and THEA 3091

10.31 Tourism

Tourism courses are designated by TRSM.

10.31.1 Core Program Course Descriptions

1000 Principles of Tourism introduces students to the history of tourism and leisure, and the development of the field of tourism studies. This will include consideration of foundational concepts such as culture and nature, research on the needs and gratifications of tourists, and studies of the functions of tourism.

CR: HKR 3565

1100 Perspectives in Tourism is an examination of tourism and the ideals, beliefs, institutions, and experiences that contribute to culture. The course will emphasize the application of the humanities and social sciences to such areas as heritage, tradition and history. The student will gain an understanding of, and appreciation for, the importance of literary, aesthetic, philosophical and religious traditions.

PR: TRSM 1000

2000 Tourism and Sustainability investigates the concept of sustainability and focuses on the importance of sustainable tourism initiatives, covers measuring the demand for tourism, the role of government and industry stakeholders in the tourism planning process, and a consideration of how tourism planning strategies are developed, implemented, evaluated, and controlled. In addition, there will be an examination of the principles that structure the tourism industry.

PR: TRSM 1000 and TRSM 1100

2201 Tourism Marketing explores marketing processes, concepts and methods, with special interest in the initiation, development and management of new tourist enterprises. Other topics include: societal marketing philosophy, the marketing mix as it relates to tourism, market research, consumer behaviour, branding and services marketing, and the implications of transportation systems on tourism activities, services marketing, sustainable tourism marketing, and e-marketing.

CR: Business 1210 and HKR 3565

PR: TRSM 1000 and TRSM 1100

3010 Issues in Ecotourism will, through the use of cases, examine philosophical, historical and contemporary issues and challenges in resource recreation and ecotourism. Opportunities for tourism activity based on special or unique ecological considerations and other forms of alternative tourism are examined, as are issues around the sustainability, impacts, risk management, programming, tour operation, ethics, development, marketing and parks management.

PR: TRSM 3100. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

3100 Resource Valuation and Tourism Activity Impact Assessments considers contemporary issues in the allocation of scarce natural and cultural resources demanded by tourism activity, and the determinants of the demand and supply for tourism recreation. Students will examine the impacts of those tourism and leisure activities upon natural systems (e.g., cultural, ecological, socio-cultural, etc.) and economies, (local, regional, etc.). Visitor impacts will also be considered.

PR: Statistics course, Economics 2010 and Economics 2020. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies

3800 Colloquium in Tourism Management (Applied Interpretation) will have during this course, three tourism practitioners from the region and beyond will hold seminars. The meetings are organized as "master classes," with direct interaction between the students and the outside experts. Depending on the practitioners, the specific focus of the tourism management may include reference to Ecology, Botany, Marine Aquatic contexts, Bird Watching, Field Guiding, Wildlife, Geography, Geology, Protected Sites, Museums and Cultural Interpretation, and Arts Programming.

PR: TRSM 3100. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

3900 Global Issues and Tourism highlights the importance of responding to world issues in tourism, and considers issues around socio-political-environmental factors influencing tourism, the impact of new social movements on tourism, the demographics and psychographics of travellers, the promotion of culture and territories, and the globalization of tourism.

PR: Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4010 Community and Cultural Issues in Tourism is a case-based course examines cultural diversity and developing sensitivities around an appreciation of one's own and other culturally-bound leisure and tourism activities. Students will build skills in areas such as inclusive planning, communication and negotiation, the changing nature of international tourism, identifying synergies and potential links with global partners (e.g., NL and Ireland).

PR: Students must have completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4900-4910 Special Topics in Tourism is a case-based course focussing on the application of major tourism theories and concepts to modern tourism industry issues. Potential areas of consideration include transportation issues in tourism, visitor management, rural tourism, urban tourism, health tourism and therapeutic recreation, island tourism, critical regionalism, maximizing the year-round potential of tourism, and contemporary research in tourism.

PR: TRSM 1000 and TRSM 1100. Students must have completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4950 Senior Project in Tourism will have students, under the guidance of a faculty member, complete an independent research project and produce a report. Topics must have the approval of the Program Chair of Tourism Studies.

PR: Students must have completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

10.31.2 Electives Course Descriptions

2300 Hospitality Management introduces students to the organization and structure of resorts, hotels, restaurants, and cruise ships. Areas of consideration include business ethics, service contracts, areas of management responsibility such as strategic planning, the evaluation of financial, environmental and human resources considerations.

PR: TRSM 1000 and TRSM 1100

2301 Events Management provides an introduction to the principles and practices of event/festival management. The material will include the development of event attractions and facilities, and consideration of specific implications of planning in the areas of finance, human resources, environment, marketing, and quality management. In addition, special consideration is given to the infrastructure requirements, volunteers, sponsorship, fund raising, event planning, marketing and economic and tourism impacts of festivals and other events.

PR: TRSM 1000 and TRSM 1100

2305 Arts Administration and Exhibition Management aims to present and apply various approaches in tourism and cultural theory in the context of contemporary cultural performance and exhibition. Students will learn principles of arts administration, as well as current debates in museology and cultural representation.

PR: TRSM 1000 and TRSM 1100

3210 Interpretation of Natural Resources - inactive course.

3211 Interpretation of Cultural Resources - inactive course.

3220 Conservation Planning - inactive course.

3230 Parks and Protected Areas examines the history and geography of national parks and other publicly protected lands, and considers the impact of human interaction with landscapes. Additionally, the course will focus on tourism planning and management in national parks and protected areas, and investigate guidelines for best practice in tourism operations.

CR: HKR 3555

PR: TRSM 1000 and TRSM 1100. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

3240 Cultural Heritage Development considers built, natural and cultural resources for heritage tourism destinations on a variety of scales from World Heritage Sites to countryside and rural tourism attractions. Issues around the international context of heritage, interpretation, and packaging of cultural heritage products, regional identities and environments and the importance of small and medium sized enterprises are examined.

PR: TRSM 1000 and TRSM 1100. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4020 Seminar in Rural and Remote Tourism provides an overview of tourism as it intersects with rural development theory, processes and planning. In addition, the course examines various social, environmental, cultural and economic problems, consequences and opportunities within a rural/peripheral area context (e.g., visitor attraction and accommodation, special transport issues).

PR: Students must completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

10.32 University

1010 The University Experience introduces students to the different modes of enquiry that one finds in the University, the interrelatedness of knowledge and the role of the University in society. It also provides students with tools and techniques of study and research that can lead them to academic success and fulfilling career.

10.33 Visual Arts

Visual Arts courses are designated by VART.

10.33.1 1st Year

1000 Introduction to Two-Dimensional Media is an introduction to two-dimensional media (design, drawing and painting) that will provide students with both studio experience and an increased sensitivity to aesthetic concerns. Students will investigate design principles through an exploration of visual fundamentals. The course will also cover basic drawing, including drawing from life and will introduce the study of colour through the use of a variety of media. These concepts will be explored through lecture and/or studio experiences. Students are not expected to have previous drawing or art experience.

AR: attendance is required

OR: 3 hours of studio per week

1001 Introduction to Process Based Media is an introduction to process-based media that will provide students with both studio experience and an increased sensitivity to aesthetic concerns. Students will be shown the fundamental concepts of a variety of process-based media with selections being made from the media of printmaking, sculpture and photo media (photography, digital imaging, performance, video). These concepts will be explored through lecture and/or studio experiences. Students are not expected to have previous art experience.

AR: attendance is required
OR: 3 hours of studio per week

1500 Drawing I is the fundamentals of drawing with study of line, tone, shape, volume, form, texture, space. Emphasis on drawing the human figure and studio practice.

AR: attendance is required
CO: VART 1510 and VART 1520
CR: the former VART 100A/B
OR: 6 hours of studio per week

1501 Drawing II is a continuation of work begun in Drawing I.

AR: attendance is required
CO: VART 1511 and VART 1521
CR: the former VART 100A/B
OR: 6 hours of studio per week
PR: VART 1500

1510 Two-Dimensional Design and Media I is the exploration of two-dimensional surface, spatial organization and media through studio practice.

AR: attendance is required
CO: VART 1500 and VART 1520
CR: the former VART 110A/B
OR: 6 hours of studio per week

1511 Two Dimensional Design and Media II is a continuation of work begun in Two Dimensional Design and Media I

AR: attendance is required
CO: VART 1501 and VART 1521
CR: the former VART 110A/B
OR: 6 hours of studio per week
PR: VART 1510

1520 Three-Dimensional Design and Media I is the exploration three-dimensional form, spacial organization and media through studio practice.

AR: attendance is required
CO: VART 1500 and VART 1510
CR: the former VART 120A/B
OR: 6 hours of studio per week

1521 Three Dimensional Design and Media II is a continuation of work begun in Three Dimensional Design and Media I.

AR: attendance is required
CO: VART 1501 and VART 1511
CR: the former VART 120A/B
OR: 6 hours of studio per week
PR: VART 1520

10.33.2 2nd Year

2000 Second Year Drawing I is development of drawing skills with emphasis on the human figure and studio problems.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2001 Second Year Drawing II is a continuation of the work begun in VART 2000.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2000

2100 Introductory Painting I is painting media applied to problems of spatial structure, light, colour, volume and surface relationships.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2101 Introductory Painting II is a continuation of the work begun in VART 2100.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2100

2200 Introductory Sculpture I is development of accurate and expressive control of three-dimensional media.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART

1520 and VART 1521

2201 Introductory Sculpture II is a continuation of the work begun in VART 2200.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2200

2300 Introductory Printmaking I - inactive course.

2301 Introductory Printmaking II - inactive course.

2310 Introductory Printmaking: Relief is an intensive exploration of Relief Printmaking concepts and techniques using wood and lino.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2311 Introductory Printmaking: Intaglio is an intensive exploration of Intaglio Printmaking concepts and techniques. Also includes monoprint and collograph experience.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2320 Introductory Printmaking: Serigraphy is an intensive exploration of Serigraphic Printmaking concepts and techniques.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2321 Introductory Printmaking: Lithography is an intensive exploration of Lithographic Printmaking concepts and techniques.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2400 Introductory Photography I is basic techniques of black and white photography including negative exposure, film development and print production.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2401 Introductory Photography II is a continuation of the work begun in VART 2400.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2400

2600 Introductory Digital Imaging I is an introduction to the computer as an art-making tool. Computer basics. Creation acquisition, manipulation and output of digital images using several applications.

AR: attendance is required
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521

2601 Introductory Digital Imaging II is a continuation of the work begun in VART 2600. Students will learn to create original artworks directly on the computer and how to incorporate images from other sources using a colour scanner. The ethics, aesthetics and theory of digital image-making for artists will also be addressed.

AR: attendance is required
PR: VART 2600

2900-2909 Special Topics in Visual Arts is a range of introductory topics that might include: Textile Practices, Japanese Woodblock, Introduction to Time Based Media.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521, VART 2700, VART 2701, and permission of the Program Chair

10.33.3 3rd Year

3000 Intermediate Drawing I is further development of drawing skills.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2001

3001 Intermediate Drawing II is a continuation of the work begun in VART 3000.

AR: attendance is required
OR: 6 hours of studio per week

PR: VART 3000

3100 Intermediate Painting I is continued development of painting stressing personal expression and critical awareness.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2101

3101 Intermediate Painting II is a continuation of VART 3100.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 3100

3200 Intermediate Sculpture I is continued development of skills in sculpture media.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2201

3201 Intermediate Sculpture II is a continuation of VART 3200.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 3200

3300 Intermediate Printmedia I is projects in Printmedia. In consultation with the instructor students will select the medium or combination of media in which to work.

AR: attendance is required
CR: the former VART 3310 and 3220
OR: 6 hours of studio per week
PR: 6 credit hours from any of VART 2310, 2311, 2320, 2321

3301 Intermediate Printmedia II is projects in Printmedia. In consultation with the instructor students will select the medium or combination of media in which to work.

AR: attendance is required
CR: the former VART 3311 and VART 3321
OR: 6 hours of studio per week
PR: VART 3300

3350 Directed Studies in Printmaking is a professional work/study experience in Printmaking. The student will undertake his or her own projects in Printmaking. In addition, he/she will assist the Director and/or Master printer at St. Michael's Printshop in the day to day operations of the studio. The student will be required to write a paper on an aspect of Printmaking as it pertains to St. Michael's Printshop. Normally this course is available during Spring Session only (May to mid-August) so that students can experience the complete summer activities scheduled at St. Michael's.

PR: 6 credit hours chosen from VART 2310, VART 2311, VART 2320, or VART 2321, and permission of the Program Chair

3400 Intermediate Photography I is critical evaluation of photographs. Continued development of photographic skills, use of colour and larger camera formats.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 2401

3401 Intermediate Photography II is a continuation of VART 3400.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 3400

3500 Combined Media I is thematic projects in combined media. In consultation with the instructor students will select the combination of media in which to work.

AR: attendance is required
OR: 6 hours of studio per week
PR: permission of the Program Chair or 48 credit hours in Visual Arts courses

3501 Combined Media II is a continuation of VART 3500.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 3500

3510 Digital Multi-Media I is an exploration of computer based multi-media production on the computer involving 2-D and 3-D graphics, animation, video, sound and text.

AR: attendance is required
PR: VART 2601

3511 Digital Multi-Media II is a continuation of the work begun in VART 3510. Students will learn how to create original artworks directly on the computer and how to incorporate still images, moving images, sound and text using a colour scanner, video camera, video cassette recorder, midi devices, etc. The ethics, aesthetics and theory of digital multi-media production for artists will also be addressed.

AR: attendance is required
PR: VART 3510

3900-3929 Special Topics in Visual Arts is a range of intermediate topics that might include: Ideas of Landscape, Word and Image, Installation, Performance, Art and the Environment, Non-Silver Photographic Processes, Book Arts.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521, VART 2700, VART 2701, and permission of the Program Chair

10.33.4 4th Year

4900-4929 Special Topics in Visual Arts is a range of senior topics that might include: Photo Journalism, Art and Politics, Community Practices, Environmental Practices.

AR: attendance is required
OR: 6 hours of studio per week
PR: VART 1500 and VART 1501, VART 1510 and VART 1511, VART 1520 and VART 1521, VART 2700, VART 2701, and permission of the Program Chair

4950 Independent Projects in Studio I will have students, under the supervision of a faculty member, produce an independent body of exploratory work and a related written artist statement and description of the progress and development of their work, and attend meetings with their faculty advisor. Students are required to submit work for evaluation at three critiques during the semester, and present a body of work and written documents to their advisor at the end of semester.

AR: attendance is required
PR: 54 credit hours of studio courses

4951 Independent Project in Studio II will have students, under the supervision of a faculty member, produce an independent body of consistent work, and attend meetings with their faculty advisor. Students are required to submit work for evaluation at three critiques during the semester, and present a body of work and written documents to their advisor at the end of semester.

AR: attendance is required
PR: VART 4950

10.33.5 Art History

The prerequisite for all 3000-level courses is VART 2701 or History 1101 or permission of the Chair, Visual Arts.

No students shall register in any course having an initial digit "4" unless they have successfully completed at least 6 credit hours in Art History courses or by permission of the Chair, Visual Arts.

2700 Art History Survey I (same as History 2700) is the history of art from pre-historic times to the Renaissance.

CR: History 2700

2701 Art History Survey II (same as History 2701) is the history of art from the Renaissance to the twentieth century.

CR: History 2701

3620 Philosophy of Art is an introduction to aesthetics; applications in Visual Arts, music and drama.

CR: Philosophy 3620

3700 Art History: The Italian Renaissance (same as History 3700) is an overview of the art and architecture of Renaissance Italy with an emphasis upon the historical context in which art was produced.

CR: History 3700

3701 Art History: The Renaissance Outside Italy (same as History 3701) is the Renaissance outside Italy from the late fourteenth century and the International style through the 16th century. As with the Italian Renaissance the art and architecture will be discussed in its historical context.

CR: History 3701

3702-3721 Art History: Special Topics has a range of special topics which might include: Early Renaissance Art, Art of the Later Renaissance, Canadian Art to 1900, 20th C. Canadian Art, American Art to 1900, History Context and Modern Users.

3820 Religion and the Arts (same as Religious Studies 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture, and dance.

CR: Religious Studies 3820
PR: Religious Studies 2810 or permission of the Department of Religious Studies

4700-4729 Art History: Special Topics has a range of senior topics which might include: British Art and Architecture, Modern Art, Modern Art II, Aesthetics, 17th and 18th Century Art, 19th Century Art, Research Project in Modernism.

4730 Art History: Modern Art I: Precursors to Modernism (same as History 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.

CO: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

CR: History 4730

PR: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

4731 Art History: Modern Art II: Early Modernism (same as History 4731) is an examination of the various cultural and social forces between 1850 and

1914 which shaped the rise of the Modern movement.

CO: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

CR: History 4731

PR: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

4740 Current Issues in Art - inactive course.

4741 Art Criticism - inactive course.

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 School Description

The School of Human Kinetics and Recreation offers undergraduate and graduate degrees in kinesiology, physical education, and recreation. The School's programs prepare students to meet societal needs for professionals who are able to initiate and manage health and lifestyle-enhancing programs. The School encourages a close working relationship among students, faculty, and staff, and with local and national sport, health, and professional organizations. Co-operative education programs provide for the integration of academic and professional knowledge. A full-time academic program officer within the School assists students with decisions related to their academic program. The School prides itself on the extent to which senior undergraduate and graduate students are engaged in teaching, research, and scholarly activity. Many graduates of the School are leaders in the fields of physical education, sport, kinesiology, health, and recreation.

Additional information regarding the School of Human Kinetics and Recreation is available at www.mun.ca/hkr/.

Students must meet all regulations of the School in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

3 Description of Programs

All courses of the School are designated by the abbreviation HKR.

3.1 General Degrees

The School of Human Kinetics and Recreation offers six general degrees in three program areas. For specific details on each degree refer to the appropriate **Program Regulations - General and Honours Degrees**.

3.1.1 Kinesiology Degrees

Kinesiology degrees are designed to prepare graduates for careers in ergonomics, fitness, health and wellness, and lifestyle professions. The kinesiology degree programs consist of School courses in addition to a flexible choice of electives. The two kinesiology degrees are:

- **Bachelor of Kinesiology (Co-operative):** is comprised of 120 credit hours and three work terms and is taken on a full-time basis.
- **Bachelor of Kinesiology:** is comprised of 120 credit hours and can be taken on a full-time or part-time basis.

3.1.2 Physical Education Degrees

Physical Education degrees are designed to prepare graduates for careers in teaching and related areas. There are two physical education degrees with teaching and general options available within each degree.

The teaching option contains courses in the fundamentals of physical education as well as courses in curriculum planning, teaching methods, and pedagogy relevant to physical education curricula for various grade levels. Within the teaching option students will be placed in an educational setting for some of the course work. Following completion of a physical education degree - teaching option, a student wishing to teach in a school setting normally completes an intermediate/secondary degree program offered by the Faculty of Education. For information regarding admission requirements to the intermediate/secondary programs refer to the **Faculty of Education** section of this Calendar.

The general option is designed to provide basic professional preparation. The general option of the program consists of courses common to the teaching option plus a flexible choice of electives, without the requirement for curriculum and methods courses.

The two physical education degrees are:

- **Bachelor of Physical Education (Co-operative):** is comprised of 120 credit hours and three work terms and is taken on a full-time basis. This program is offered in the teaching and general options.
- **Bachelor of Physical Education:** is comprised of 120 credit hours and can be taken on a full-time or part-time basis. This program is offered in the teaching and general options.

3.1.3 Recreation Degrees

Recreation degrees are designed to provide students with the opportunity to develop professional competencies in recreation and leisure service management. There are two recreation degrees in the School of Human Kinetics and Recreation with community recreation and therapeutic recreation options available within each degree. In community recreation the students will also gain an understanding of the social, physical, psychological, cultural, economic, and political issues that influence recreation and leisure participation, delivery, and management. The therapeutic recreation option is designed to provide professional preparation for the practice of therapeutic recreation. The two recreation degrees are:

- **Bachelor of Recreation (Co-operative):** is comprised of 120 credit hours and three work terms and is taken on a full-time basis.
- **Bachelor of Recreation:** is comprised of 120 credit hours and can be taken on a full-time or part-time basis.

3.2 Honours Degrees

Honours degrees signify superior academic achievement with specific course work in kinesiology, physical education, and recreation programs. To graduate with honours, application must be made on the prescribed form which is available from the School or the Office of the Registrar. For further information on honours degrees see **Program Regulations - General and Honours Degrees**.

3.3 Work Terms in Co-operative Programs

Students registered for work terms are also governed by the *Co-operative Student Handbook*. Prior to registering for the first work term, students must successfully complete the course Professional Development Seminars.

3.3.1 General Information

- During work terms students are brought into direct contact with the kinesiology, physical education, and recreation professions, exposed to the work place setting, expected to assume ever-increasing responsibility in employment situations as their education advances, and introduced to experiences beyond the scope of those which could be provided in the classroom.
- Students are responsible for finding suitable work placements. The Co-operative Education Office of the School provides resources to assist in this process.
- In addition to a work term, students may register for up to 6 credit hours, although they are advised to consult the School's Academic Program Officer.
- Students are not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies and with the recommendation of the Co-operative Education Office of the School. Students who drop a work term without permission, or who fail to honour an agreement to work with an employer, will be assigned a grade of FAL (fail) for that work term.
- Students who conduct themselves in such a manner as to cause their termination from the job, will be assigned a grade of FAL (fail) for that work term.
- Students are expected to maintain professional ethics, including confidentiality.

3.3.2 Work Term Reports

- A work term report, on a topic approved by the Co-operative Education Office of the School, must be submitted for each work term. The report must be approved by the employer and submitted by the student to the Co-operative Education Office of the School on or before the appropriate deadline in the University Diary.
- Late work term reports will not be evaluated unless prior permission for a late work term report has been granted by the Co-operative Education Office of the School.

3.3.3 Evaluation of Work Terms

- Two components are considered in work term evaluation: on-the-job performance and the work term report. Each component is evaluated separately and equally. The overall evaluation of work terms will result in the assignment of one of the following letter grades: PWD (pass with distinction), PAS (pass) or FAL (fail).

4 Admission/Readmission Regulations for the School of Human Kinetics and Recreation

In addition to meeting the **UNIVERSITY REGULATIONS** students must meet the **Admission/Readmission Regulations for the School of Human Kinetics and Recreation**.

4.1 General Information

1. Entry to programs offered by the School is competitive for a limited number of placements. Meeting the minimum requirements for admission does not guarantee acceptance into the program. The final decision on admission rests with the Admissions Committee of the School.
2. Admission or readmission to the University does not necessarily constitute admission or readmission to any program.
3. Up to three positions per year in the School of Human Kinetics and Recreation may be designated for applicants of aboriginal ancestry who have met the admission requirements of the program. Applicants must send a letter of request at the time of application and provide documentation of aboriginal ancestry.

4.2 Application Forms and Deadlines

1. All programs of the School commence in the Fall semester. The deadline for application for admission is March 1.
2. The deadline for application for readmission, for students who were previously admitted to a School program, is June 1 for the Fall semester, October 1 for Winter, and February 1 for Spring.
3. Application forms are available in person from the School's General Office and the Office of the Registrar or through the School's website at www.mun.ca/hkr. Applications forms may also be obtained by writing the School of Human Kinetics and Recreation, Memorial University of Newfoundland, St. John's, NL, A1C 5S7 or the Office of the Registrar, Admissions Office, Memorial University of Newfoundland, St. John's, NL, A1C 5S7.
4. Applicants applying to more than one program must submit separate application forms and supporting documentation for each

program.

5. All applications for admission or readmission must be submitted to the Office of the Registrar. A complete application includes an application to the University (for those who have not attended Memorial University of Newfoundland in the two preceding semesters), an application to the School, an autobiographical statement, and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
6. In addition to these requirements, students applying to the physical education programs must:
 - submit a current first aid certificate, and
 - complete the School's swim test. Students applying from outside St. John's should call the School's General Office at (709) 864-8130 to contact the swim test co-ordinators to arrange for testing. In lieu of the School swim test, a level 8 Red Cross or other credential satisfactory to the School may be accepted. Students unable to complete the swim test requirement before beginning their program must successfully complete this requirement by the end of October of their first semester of admission to the program. Failure to do so will result in the student being required to withdraw from the program at the end of their first semester.

4.3 Admission Requirements to School Programs

Applicants may apply for admission to School programs under the **Categories Of Applicants, Admission Criteria and Other Information** outlined under **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)**. In addition to meeting these regulations, applicants in the following categories, other than those applying for admission to the Bachelor of Recreation degree program, must meet the additional requirements as indicated below.

4.3.1 High School Applicants

- High school applicants to the kinesiology degree programs must have completed:
 - Level III Laboratory Science with a grade of at least 70%, and either
 - Level III Advanced Mathematics, or Level III Academic Mathematics with a grade of at least 70%, or Level III Academic Mathematics and a score on the Mathematics Placement Test acceptable to the Department of Mathematics and Statistics. For further information on the Mathematics Placement Test contact the Department of Mathematics and Statistics.

4.3.2 Memorial University of Newfoundland Applicants

- To be eligible for consideration for admission to all programs, other than the Bachelor of Recreation degree program, students who are attending or have previously attended this University must have a cumulative average of 60% or an average of 65% on their last 30 credit hours.
- Overall academic performance is an important criterion in reaching decisions on applications for admission, and will be considered, in the selection process.
- Applicants to the non co-operative Bachelor Recreation degree program must have at least two years of relevant work experience, or equivalent, that is deemed acceptable by the Admissions Committee of the School of Human Kinetics & Recreation.
- Students who are attending or have previously attended this University are not required to submit a copy of their transcript with their application(s).

4.3.3 Transfer Applicants

- Applicants seeking admission through transfer from accredited post-secondary institutions must have achieved a minimum overall average of 60% to be considered for admission.
- Transfer applicants to the non-co-operative Bachelor of Recreation degree program must have at least two years of relevant work experience, or equivalent, that is deemed acceptable by the Admissions Committee of the School of Human Kinetics & Recreation.
- A student's placement within a program, and requirements needed to complete the program, will be determined on an individual basis at the time of admission. No applicant will be granted placement beyond Academic Term 4.
- Transfer applicants must request that an official transcript showing any completed courses and current registrations be forwarded to the Office of the Registrar. Final transcripts must be submitted upon receipt of final grades.

4.4 Other Information

1. The School will notify applicants in writing regarding an admission decision to a School program.
2. Students admitted to a program at any level beyond Academic Term 1, without successfully completing all courses required up to that level, must successfully complete those courses prior to the end of their last academic term. Successful completion shall mean a minimum grade of 50% in every non-HKR course and a minimum grade of 60% in every HKR course.
3. Students who have been admitted to one program offered by the School and who wish to change to another program within the School must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with all other applications.
4. Students admitted full time to a program and who decline the offer of admission or who fail to register for courses during the Fall term of admission will be considered withdrawn from the program. Such students, if they subsequently wish to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with other applications.
5. Students admitted part time to a program and who decline the offer of admission or who fail to register for courses and to successfully complete at least 6 credit hours applicable to the degree during each academic year will be considered withdrawn from the program. Such students, if they subsequently wish to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with other applications.
6. In the case where students have been required to withdraw from the Bachelor of Recreation (Co-operative) Programs, the Admissions Committee of the School may consider this circumstance as grounds to deny admission to applicants to the Bachelor of Recreation degree program.

5 Program Regulations - General and Honours Degrees

5.1 Bachelor of Kinesiology (Co-operative)

- The full-time 120 credit hour Bachelor of Kinesiology (Co-operative) requires 69 HKR credit hours, 51 non-HKR credit hours, and three work terms.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in **Table 1 Bachelor of Kinesiology (Co-operative)**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Work terms shall be taken in the term and sequence as set out in **Table 1 Bachelor of Kinesiology (Co-operative)**.

Table 1 Bachelor of Kinesiology (Co-operative)

Winter Academic Term 7	HKR 4702 HKR 4703	6 credit hours from HKR courses at the 2000 level or above (Honours degree candidates must include HKR 4610 in their program in place of this elective) 6 credit hours from non-HKR courses at the 2000 level or above other than those listed under Required Courses

5.2 Bachelor of Physical Education (Co-operative)

5.2.1 Teaching Option

- The full-time 120 credit hour Bachelor of Physical Education (Co-operative) - Teaching Option requires 69 HKR credit hours, 51 non-HKR credit hours, three work terms, and a first aid certificate and a CPR certificate both of which must be current at the time of graduation.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in **Table 2 Bachelor of Physical Education (Co-operative) - Teaching Option**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- The three work terms shall be taken in the term and sequence as set out in **Table 2 Bachelor of Physical Education (Co-operative) - Teaching Option**.
- Students must complete 24 credit hours in an acceptable Academic Discipline or Minor. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. In choosing the Academic Discipline students must select from and follow the **Academic Discipline** requirements of the **Faculty of Education Bachelor of Education (Intermediate/Secondary), Admission Regulations**. No more than 6 credit hours at the 1000 level may be included in the 24-credit-hour Academic Discipline. At least 3 credit hours at the 3000 level or higher must be included in the 24-credit-hour Academic Discipline.

Table 2 Bachelor of Physical Education (Co-operative) - Teaching Option

Term	Required Courses	Elective Courses
Fall Academic Term 1	English 1080 or equivalent HKR 2000 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/Minor subject
Winter Academic Term 2	English 1110 or equivalent HKR 2300 3 additional credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/Minor subject Students who complete only Mathematics 1000 must include an additional 3 credit hours from a non-HKR course in their program
Fall Academic Term 3	HKR 1123 HKR 2210 HKR 2310 Statistics 2500 or equivalent Psychology 1000	3 credit hours from Academic Discipline/Minor subject 3 credit hours from a HKR course at the 2000 level or above other than those listed under Required Courses

Fall Work Term 3	HKR 499W	
Winter Academic Term 7	HKR 4210 First aid and CPR certification, both of which must be current at time of graduation, must be submitted to the School's Academic Program Officer.	9 credit hours from Academic Discipline/Minor subject 6 credit hours from HKR courses at the 2000 level or above other than those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives)

5.2.2 General Option

- The full-time 120 credit hour Bachelor of Physical Education (Co-operative) - General Option requires 69 HKR credit hours, 51 non-HKR credit hours, three work terms, and a first aid certificate and a CPR certificate both of which must be current at the time of graduation.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in **Table 3 Bachelor of Physical Education (Co-operative) - General Option**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- The three work terms shall be taken in the term and sequence as set out in **Table 3 Bachelor of Physical Education (Co-operative) - General Option**.
- Students must complete 24 credit hours in an acceptable Academic Discipline or Minor. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. In choosing the Academic Discipline students must select from and follow the **Academic Discipline** requirements of the **Faculty of Education Bachelor of Education (Intermediate/Secondary), Admission Regulations**. No more than 6 credit hours at the 1000 level may be included in the 24-credit-hour Academic Discipline. At least 3 credit hours at the 3000 level or higher must be included in the 24-credit-hour Academic Discipline.

Table 3 Bachelor of Physical Education (Co-operative) - General Option

Term	Required Courses	Elective Courses
Fall Academic Term 1	English 1080 or equivalent HKR 2000 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/Minor subject
Winter Academic Term 2	English 1110 or equivalent HKR 2300 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/Minor subject Students who complete only Mathematics 1000 must include an additional 3 credit hours from a non-HKR course in their program
Fall Academic Term 3	HKR 1123 HKR 2210 HKR 2310 Statistics 2500 or equivalent Psychology 1000	3 credit hours from Academic Discipline/Minor subject 3 credit hours from HKR courses at the 2000 level or above other than those listed under Required Courses
Winter Academic Term 4	HKR 2220 HKR 2320 HKR 3320 HKR 3340 Psychology 1001	3 credit hours from Academic Discipline/Minor subject
Spring Work Term 2	HKR 299W	
Fall Academic Term 5	HKR 3210 HKR 3300 HKR 3310	3 credit hours from Academic Discipline/Minor subject 6 credit hours from HKR courses at the 2000 level or above other than those listed under Required Courses
Winter Work Term 2	HKR 399W	
Spring Academic Term 6	HKR 2004 HKR 3220 HKR 3400 HKR 4220 HKR 4420 HKR 4600	
Fall Work Term 3	HKR 499W	
Winter Academic Term 7	HKR 4210 First aid and CPR certification, both of which must be current at time of graduation, must be submitted to the School's Academic Program Officer.	9 credit hours from Academic Discipline/Minor subject 6 credit hours from HKR courses at the 2000 level or above other than those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives)

5.3 Bachelor of Recreation (Co-operative)

- The full-time Bachelor of Recreation (Co-operative) requires 120 credit hours and three work terms.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in **Table 4 Bachelor of Recreation (Co-operative)**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- The three work terms shall be taken in the sequence as set out in **Table 4 Bachelor of Recreation (Co-operative)**.
- A minor is optional in the Bachelor of Recreation (Co-operative) program. Students following the therapeutic recreation option may opt to choose a minor of at least 24 credit hours in Psychology. Students following the community recreation option may opt to choose a minor of at least 24 credit hours in English, Math, or Psychology. In completing the minor, students must follow the minor program regulations listed under the appropriate faculty or school.

Table 4 Bachelor of Recreation (Co-operative)

Term	Required Courses	Elective Courses
Fall Academic Term 1	English 1080 or equivalent HKR 2000 HKR 2515 or HKR 2585 Psychology 1000 Sociology 1000 (or equivalent)	
Winter Academic Term 2	Business 1000 English 1110 or equivalent HKR 2300 HKR 2505 Psychology 1001	
Fall Academic Term 3	GEOG 1050 HKR 1123 HKR 2311 HKR 2585 or HKR 2515 HKR 3535 or HKR 3575/HKR 3785 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours in a non-HKR course
Winter Academic Term 4	Gender Studies 1000 HKR 3340/HKR 3685 HKR 4555 or HKR 4585 3 credit hours chosen from Mathematics 1050 or 1051 or 1000 3 credit hours in Sociology at the 2000-level	3 credit hours in a non-HKR course Students who complete only Mathematics 1000 must include an additional 3 credit hours from a non-HKR course in their program
Spring Work Term 1	HKR 299W	
Fall Academic Term 5	HKR 3575/3785 or HKR 3535 Statistics 2500	6 credit hours from HKR courses 6 credit hours in non-HKR courses
Winter Work Term 2	HKR 399W	
Spring Academic Term 6	HKR 2545 HKR 3400 HKR 3555 HKR 3565 HKR 4600	3 credit hours from HKR courses
Fall Work Term 3	HKR 499W	
Winter Academic Term 7	HKR 4575 or 4685 HKR 4585 or 4555	6 credit hours from HKR courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives) 6 credit hours in non-HKR courses

5.4 Bachelor of Kinesiology

- The full-time and part-time 120 credit hour Bachelor of Kinesiology requires 69 HKR credit hours and 51 non-HKR credit hours.
- Students admitted full time shall normally complete the 120 credit hours in the academic terms in the sequence and course load as set out in **Table 5 Bachelor of Kinesiology**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Students admitted part time should consult with the School's Academic Program Officer regarding course sequence.

Table 5 Bachelor of Kinesiology

Term	Required Courses	Elective Courses
Fall Academic Term 1	Chemistry 1010 or Chemistry 1050 English 1080 or equivalent HKR 2000 Mathematics 1000 Psychology 1000	
Winter Academic Term 2	Chemistry 1011 or Chemistry 1051 English 1110 or equivalent HKR 2300 Psychology 1001 Physics 1020 or Physics 1050	
Spring	Open	
Fall Academic Term 3	Biology 2040 HKR 2310 HKR 2340 Statistics 2550	6 credit hours from non-HKR courses other than those listed under Required Courses
Winter Academic Term 4	HKR 2320 HKR 2600 or Biochemistry 2600 HKR 3320 HKR 3340	3 credit hours from HKR courses at the 2000 level or above 3 credit hours from non-HKR courses at the 2000 level or above other than those listed under Required Courses
Spring Academic Term 5	HKR 2703 HKR 3400 HKR 4330 HKR 4420 HKR 4600	3 credit hours from non-HKR courses at the 2000 level or above other than those listed under Required Courses
Fall Academic Term 6	HKR 3300 HKR 3310 HKR 3410	6 credit hours from HKR courses at the 2000 level or above 3 credit hours from non-HKR courses at the 2000 level or above other than those listed under Required Courses
Winter Academic Term 7	HKR 4702 HKR 4703	6 credit hours from HKR courses at the 2000 level or above (Honours degree candidates must include HKR 4610 in their program in place of one of these electives) 6 credit hours from non-HKR courses at the 2000 level or above other than those listed under Required Courses

5.5 Bachelor of Physical Education

5.5.1 Teaching Option

- The full-time and part-time 120 credit hour Bachelor of Physical Education - Teaching Option requires 69 HKR credit hours, 51 non-HKR credit hours, and a first aid certificate and a CPR certificate both of which must be current at the time of graduation
- Students admitted full time shall normally complete the 120 credit hours in the academic terms in the sequence and courses load as set out in **Table 6 Bachelor of Physical Education - Teaching Option**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Students admitted part time should consult with the School's Academic Program Officer regarding course sequence.
- Students must complete 24 credit hours in an acceptable Academic Discipline or Minor. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. In choosing the Academic Discipline students must select from and follow the **Academic Discipline** requirements of the **Faculty of Education Bachelor of Education (Intermediate/Secondary)**. **Admission Regulations.** No more than 6 credit hours at the 1000 level may be included in the 24-credit-hour Academic Discipline. At least 3 credit hours at the 3000 level or higher must be included in the 24-credit-hour Academic Discipline.

Table 6 Bachelor of Physical Education - Teaching Option

Term	Required Courses	Elective Courses
Fall Academic Term 1	English 1080 or equivalent 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090 HKR 2000	3 credit hours from Academic Discipline/ Minor Subject
Winter Academic Term 2	English 1110 or equivalent HKR 2300 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/ Minor Subject Students who complete only Mathematics 1000 must include an additional 3 credit hours from a non-HKR course in their program
Fall Academic Term 3	HKR 2210 HKR 2310 Psychology 1000 Statistics 2500 or equivalent	3 credit hours from Academic Discipline/ Minor Subject 3 credit hours from HKR courses at the 2000 level or above other than those listed under Required Courses
Winter Academic Term 4	HKR 2220 HKR 2320 HKR 3320 HKR 3340 Psychology 1001	3 credit hours from Academic Discipline/ Minor Subject
Spring Academic Term 5	HKR 2004 HKR 3220 HKR 3400 HKR 4220 HKR 4420 HKR 4600	
Fall Academic Term 6	HKR 3110 HKR 3210 HKR 3300 HKR 3310	3 credit hours from Academic Discipline/ Minor Subject
Winter Academic Term 7	HKR 4210 First aid and CPR certification, both of which must be current at time of graduation, must be submitted to the School's Academic Program Officer.	9 credit hours from Academic Discipline/ Minor Subject 6 credit hours from HKR courses at the 2000 level or above other than those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives)

5.5.2 General Option

- The full-time and part-time 120 credit hour Bachelor of Physical Education - General Option requires 69 HKR credit hours, 51 non-HKR credit hours, and a first aid certificate and a CPR certificate both of which must be current at the time of graduation.
- Students admitted full time shall normally complete the 120 credit hours in the academic terms in the sequence and course load as set out in **Table 7 Bachelor of Physical Education - General Option**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Students admitted part time should consult with the School's Academic Program Officer regarding course sequence.
- Students must complete 24 credit hours in an acceptable Academic Discipline or Minor. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. In choosing the Academic Discipline students must select from and follow the **Academic Discipline** requirements of the **Faculty of Education Bachelor of Education (Intermediate/Secondary), Admission Regulations**. No more than 6 credit hours at the 1000 level may be included in the 24-credit-hour Academic Discipline. At least 3 credit hours at the 3000 level or higher must be included in the 24-credit-hour Academic Discipline.

Table 7 Bachelor of Physical Education - General Option

Term	Required Courses	Elective Courses
Fall Academic Term 1	English 1080 or equivalent HKR 2000 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/Minor Subject
Winter Academic Term 2	English 1110 or equivalent HKR 2300 3 credit hours in a laboratory science (either Biology, Chemistry, or Physics is recommended) 3 credit hours in Mathematics chosen from Mathematics 1000 or 1050 or 1051 or 1090	3 credit hours from Academic Discipline/Minor Subject Students who complete only Mathematics 1000 must include an additional 3 credit hours from a non-HKR course in their program
Fall Academic Term 3	HKR 2210 HKR 2310 Statistics 2500 or equivalent Psychology 1000	3 credit hours from Academic Discipline/Minor Subject 3 credit hours from HKR courses at the 2000 level or above other those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives)
Winter Academic Term 4	HKR 2220 HKR 2320 HKR 3320 HKR 3340 Psychology 1001	3 credit hours from Academic Discipline/Minor Subject
Spring Academic Term 5	HKR 2004 HKR 3220 HKR 3400 HKR 4220 HKR 4420 HKR 4600	
Fall Academic Term 6	HKR 3210 HKR 3300 HKR 3310	3 credit hours from Academic Discipline/Minor Subject 6 credit hours from HKR courses at the 2000 level or above other those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives)
Winter Academic Term 7	HKR 4210 First aid and CPR certification, both of which must be current at time of graduation, must be submitted to the School's Academic Program Officer.	9 credit hours from Academic Discipline/Minor Subject 6 credit hours from HKR courses at the 2000 level or above other those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives)

5.6 Bachelor of Recreation

- The full-time and part-time Bachelor of Recreation is comprised of 120 credit hours as set out in **Table 8 Bachelor of Recreation - Course and Credit Hour Requirements**.
- A minor is optional in the Bachelor of Recreation program. Students following the therapeutic recreation option may opt to choose a minor of at least 24 credit hours in Psychology. Students following the community recreation option may opt to choose a minor of at least 24 credit hours in English, Math, or Psychology. In completing the minor, students must follow the minor program regulations listed under the appropriate faculty or school.
- Students admitted part-time should consult with the School's Academic Program Officer regarding course sequence.

Table 8 Bachelor of Recreation

Required Courses	HKR Electives	Non-HKR Electives
Business 1000 English 1080 English 1110 or equivalent Gender Studies 1000 Geography 1050 HKR 2000, 2300, 2311, 2505, 2515, 2545, 2585, 3340 or 3685, 3400, 3535, 3555, 3565, 3575 or 3785, 4555, 4575 or 4685, 4585, 4600 Mathematics 1000 or any 6 credit hours in Mathematics at the 1000 level Psychology 1000 Psychology 1001 Sociology 1000 (or equivalent) 3 credit hours in a Sociology course at the 2nd year level Statistics 2500	15 credit hours in HKR courses other than those listed under Required Courses (Honours degree candidates must include HKR 4610 in their program in place of one of these electives) Students who complete only Mathematics 1000 must include an additional 3 credit hours from a non-HKR course in their program. As needed, students must complete additional non-HKR courses to satisfy the 120 credit hour requirement for the degree.	18 credit hours in non-HKR electives.

5.7 Honours Degrees

- An honours degree signifies superior academic achievement.
- An application for admission to any of the honours degrees is not required. Rather, students indicate on the prescribed application for graduation form that they wish to be considered for an honours degree.
- To receive an honours degree, a candidate shall:
 - meet the requirements of the general degree;
 - successfully complete HKR 4600 and HKR 4610 with a minimum grade of 80% in each course
 - obtain an overall average of 80% or better on all HKR courses for the degree; and
 - obtain an overall average of 70% on the non-HKR credit hours required for the degree.
- A candidate for the honours degree who does not fulfill these conditions but fulfills the requirements for the general degree shall be awarded the general degree.
- A candidate may, with the approval of the Committee on Undergraduate Studies, repeat or substitute up to three courses in order to meet the requirements of clause 3 above. In counting repeats, each attempt at the same course will count as one course towards the maximum. That is, the same course, repeated three times, would place a student at the maximum and no additional repeats or substitutions would be allowed.
- Candidates are not permitted to repeat or substitute work terms for the purpose of meeting the academic requirements for honours degrees.
- A candidate who, for academic reasons, has been required to withdraw from a program offered by the School will not be eligible for the honours degree.

6 Promotion Regulations

6.1 General Information

- In addition to meeting the promotion regulations for the School of Human Kinetics and Recreation all students must meet the general academic regulations (undergraduate). For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.
- Success in the programs depends on meeting the requirements of both academic terms and work terms.
- To be promoted a student must, in addition to obtaining the requisite grades and average, complete and deliver all work term reports as required.

6.2 Promotion Status

- A student's promotion status at the end of each term will be in one of the following four categories:

6.2.1 Clear Promotion

Clear Promotion means a student can proceed to the next term without restrictions.

- Students completing an academic term will receive a Clear Promotion by obtaining an overall average of at least 60%, with a numeric grade of at least 60% in each HKR course, and a numeric grade of at least 50% in each non-HKR course.
- Students completing a work term will receive a Clear Promotion by obtaining a PAS (pass) or a PWD (pass with distinction) in the work term.
- Students completing courses in addition to a work term must obtain a PAS (pass) or a PWD (pass with distinction) in the work term and an overall average of at least 60%, with a numeric grade of at least 60% in each HKR course, and at least 50% in each non-

HKR course

6.2.2 Probationary Promotion

Probationary Promotion designates less than a Clear Promotion but requires an overall average of at least 60%, with a numeric grade of at least 50% in each course, and not more than one HKR course with a numeric grade below 60%.

- A student with Probationary Promotion at the end of Academic Term 1 may be permitted to enter Academic Term 2 but must have Clear Promotion by the end of Academic Term 2.
- A student with Probationary Promotion from any academic term may continue to the subsequent work term under the condition that entry into the next academic term is not allowed until the student's status is changed to Clear Promotion.
- A student with Probationary Promotion at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.
- To change Probationary Promotion to Clear Promotion the student must satisfy the School that he or she is competent in the subject of the HKR course in which the student has failed to achieve 60%. This will normally entail re-examination, after which the student will be declared to have passed or failed a test of competency in the subject concerned. No numerical grade will be assigned in the re-examination, and the original grade submitted for the course will not be changed.
- Re-examination may be written, oral, practical or a combination of formats and will be at a time determined by the School.
- Only one re-examination is permitted per course. Failure to submit to the re-examination or failure in the re-examination will result in denial of promotion. If the student is subsequently readmitted to the School, he or she must repeat or replace the course in which re-examination was unsuccessful.
- A maximum of two re-examinations is permitted in a student's degree program. If a student is awarded a grade of less than 60% in a third HKR course, the student will be required to repeat or replace the course.
- It is the responsibility of the student to arrange for re-examination before the end of the first week of the student's next academic term. If re-examination is not arranged in accordance with this time frame, the student will be required to repeat or replace the course.
- The School may recommend that the student complete remedial studies before re-examination.

6.2.3 Probationary (A) Promotion

Probationary (A) Promotion designates failure to successfully complete the required components of HKR 2210, 2220, 3210, 3220, 4210 and 4220 in a given term.

- Probationary (A) Promotion will be given upon the recommendation of the course instructor/Co-ordinator and/or the Committee on Undergraduate Studies and only for extreme circumstances, duly authenticated.
- A student with Probationary (A) Promotion in any term will be permitted to enter subsequent terms and will receive a letter grade of INC (incomplete) in the course. A final numeric grade will not be received until the required components of each course have been successfully completed. Academic Council will grant this status, taking into account the specific factors involved in each case. This status is not automatic, as failure to successfully complete all required components of each course would normally result in a failing grade.
- To change Probationary (A) Promotion to Clear Promotion, a student must successfully complete the activity course(s), with a minimum grade of 60%, within one academic year of the date on which the original grade(s) of Incomplete was (were) recorded.
- A student with Probationary (A) Promotion at the end of the final academic term will not be recommended for graduation until the student has successfully completed all required components of all courses, and the student's status is changed to Clear Promotion.

6.2.4 Promotion Denied

Promotion Denied indicates Clear Promotion is not achieved each term or following probation.

- A student with Promotion Denied status will be required to withdraw from the School. Students with Promotion Denied status may apply for readmission to the program after two semesters. A student will normally be readmitted into the term from which promotion was denied.
- A student who is denied promotion for failing a work term may be considered for readmission after the lapse of two semesters, at which time the student will be required to complete a further work term with satisfactory performance before being admitted to any further academic term in the School. A work term may be repeated only once, and not more than two work terms may be repeated in the entire program.
- A student who has been denied promotion as a result of having failed a work term and who, in the opinion of the School, can benefit from a remedial program, may be permitted an extension of time not to exceed the end of the registration period of the subsequent semester to complete the requirements of the work term.
- A student who is denied promotion as a result of grades received in HKR and non-HKR courses will be required to repeat all HKR courses in which they obtained a numeric grade of less than 60% in that term. A non-HKR course may be replaced by a course acceptable in the student's program.
- A student with Promotion Denied status at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.

6.3 Other Information

- The Committee on Undergraduate Studies will determine each student's promotion status at the end of each term and will make its recommendations to Academic Council.
- Academic Council may promote a student notwithstanding the promotion regulations given above. A decision of this nature will be made only for reasons acceptable to Academic Council and in the case of a student thought likely to succeed in future terms.
- A student shall be permitted only one readmission to the School.
- Students may be required to withdraw from their program at any time, if, in the opinion of the School, they are unlikely to benefit from continued attendance.

7 Waiver of School Regulations

Every student has the right to request waiver of School regulations. Students wishing waiver of University academic regulations should refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

7.1 General Information

- The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity so warrant in the judgment of the Committee on Undergraduate Studies of the School.
- All requests, other than requests for waiver of a prerequisite or co-requisite of a School course, must be submitted to the Committee on Undergraduate Studies of the School for consideration. Waiver of a School course prerequisite or co-requisite may be granted by the course instructor.
- Students requesting a waiver of a School regulation, other than requests for waiver of a prerequisite or co-requisite of a School course, must submit their request in writing to the Chair of the Committee on Undergraduate Studies on the prescribed form which is available from the School's general office. Medical and/or other documentation to substantiate the request must be provided.
- Any waiver granted does not reduce the total number of credit hours required for the degree.
- In addition, regardless of any waiver granted, students enrolled in a co-operative program must successfully complete a minimum of two work terms.

8 Appeal of Regulations

Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Regulations**.

9 HKR Courses Available to Students Not Enrolled in a Program Offered By the School

9.1 Regulations for Students Not in a Program Offered By the School

- Students not in a program offered by the School may register for a maximum of 15 credit hours only from the following list if space is available.
- Students who have been required to withdraw from a program offered by the School may not register for any HKR course.
- Students not in a School program will be required to drop any HKR course(s) in excess of 15 credit hours and may be subject to academic and financial penalties.

9.2 HKR Courses

1000 Fitness and Wellness
 1001 Resistance Training for Health and Activity
 2000 Introduction to Kinesiology, Physical Education and Recreation
 2002 Coaching
 2300 Growth and Development
 2310 Human Anatomy
 2311 Anatomy and Physiology for non-HKR Students
 2320 Primary Human Physiology
 2515 Social Psychology of Leisure
 2585 Recreation and Persons with Disabilities
 2600 Introduction to Human Nutrition
 2601 Physical Activity, Obesity, and Weight Control
 3360 Care and Prevention of Athletic Injuries
 3400 Social Determinants of Health and Physical Activity
 3410 Sociology of Sport
 3490 Women in Sport and Physical Activity
 3535 Legal Aspects of Leisure and Recreation Services
 3595 Women and Leisure
 4330 Social Psychology of Sport, Physical Activity and Recreation

10 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

All courses of the School are designated by HKR. The abbreviations KIN, PHSD, and RECR indicate former Kinesiology, Physical Education, and Recreation courses.

1000 Fitness and Wellness (formerly PHSD 1000) is an introduction to the concepts of fitness and wellness, and the relationships among physical activity, fitness, wellness, quality of life, and longevity.

CR: the former PHSD 1000

UL: not applicable towards any of the degrees offered by the School

1001 Resistance Training for Health and Activity (formerly KIN and PHSD 1001) is an introduction to resistance training exercises, programs, and principles. This will necessitate both theoretical classes and practical laboratories that will involve testing and participation in resistance training activities. A portion of the assessment will also be based on regular attendance (at student convenience) for another hour of resistance training per week certified by the attending fitness consultant.

CR: HKR 2340; the former KIN and PHSD 1001; the former HKR, KIN, and PHSD 4320

LH: 2

UL: not applicable towards any of the kinesiology or physical education degrees offered by the School

1123 Professional Development Seminars are offered during the Fall semester prior to a student's first work term. These seminars introduce the co-operative education process and prepare the student for work terms. These seminars are graded PAS or FAL based on attendance and participation.

AR: attendance is required
CH: 0
LC: as scheduled

2000 Introduction to Kinesiology, Physical Education and Recreation (formerly KIN, PHSD, and RECR 2000) introduces the philosophical, scientific, socio-cultural, historical concepts, and influences in kinesiology, physical education, and recreation.

CR: the former KIN, PHSD, and RECR 2000; HKR 2001

2001 Introduction to Physical Education for Education Students provides students a general overview of the role that physical education and active living play in the overall development of primary and elementary students, and in the creation of positive learning environment in schools. This course is intended for students in the primary/elementary program offered by the Faculty of Education.

CR: HKR 2000, the former KIN, PHSD, and RECR 2000

PR: admission to the Bachelor of Education (Primary/Elementary) offered by the Faculty of Education

UL: not applicable towards any of the degrees offered by the School

2002 Coaching (formerly KIN and PHSD 2002) introduces the various methods, principles, and theories used to coach developing athletes in various sport settings. Factors such as the coach's role, planning, analysing and developing skills, sport safety, and physical preparation will be presented with an emphasis on attaining competency in these areas.

CR: the former KIN and PHSD 2002; the former PHSD 421A/B

2004 Enhancing Performance in Physical Activity (formerly PHSD 2004) gives an overview of the various models, principles, and theories used to explain and predict ways in which athletes and exercisers conduct themselves in various sport settings. Selected intervention techniques to enhance performance will be presented.

CR: the former PHSD 2004

2005 Personal Stress Management is designed to provide students with an introduction to stress and to explore the relationship between exercise, fitness and physical activity and stress management. It describes how to reorganize one's life by presenting a systematic analysis of stress and coping mechanisms appropriate to different stages of life. The stress coping mechanisms will be presented with an emphasis on application. Completion of this course does not qualify students as stress management counsellors. Students interested in this field are advised to contact the Department of Psychology for information on careers in counselling.

CO: Psychology 1000 and 1001

PR: Psychology 1000 and 1001

2100 Introduction to Organization and Administration (formerly PHSD and RECR 2100) introduces the basic administrative functions in a work setting in physical education and/or recreation. The laboratory sessions will assist students to develop skill in the basic computer applications relevant to these functions.

CR: the former PHSD and RECR 2100

LH: 2

2210 Physical Activities Course: Movement Concepts (formerly PHSD 2210) employs the conceptual approach to teaching physical activity and facilitated through various forms of dance (e.g., creative, folk). Concepts, skills, and strategies will be emphasized.

AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0

CR: the former PHSD 2210

LC: as scheduled

LH: as scheduled

2220 Physical Activities Course: Gymnastics and Aquatics (formerly PHSD 2220) may employ a number of teaching methods. Emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0

CR: the former PHSD 2220

LC: as scheduled

LH: as scheduled

PR: HKR 2210

2300 Growth and Development (formerly PHSD 2120, and KIN and PHSD 2300) is an introductory study of human growth and developmental factors and their influence on the learning of motor skills.

CR: the former PHSD 2120; KIN and PHSD 2300

2310 Human Anatomy (formerly KIN and PHSD 2310) is a study of the structure of the human body with emphasis on selected systems (endocrine, neural, muscular, skeletal, cardiovascular, respiratory).

CR: the former KIN and PHSD 2310

LH: 2

2311 Introduction to Anatomy and Physiology is designed to provide

students with general overview of the anatomy and physiology of the human body. Students will explore skeletal, muscular, neural and cardiorespiratory systems in addition to a very brief introduction to cell structure and 'cellular' muscle function.

CR: HKR 2310, HKR 2320

UL: not applicable towards any of the kinesiology or physical education degrees offered by the School

2320 Primary Human Physiology (formerly KIN and PHSD 2320) is a study of bodily functions with emphasis of selected systems (endocrine, neural, muscular, cardiovascular, respiratory).

CR: the former KIN and PHSD 2320

LH: 2

2340 Fitness Leadership (formerly KIN and PHSD 4320) prepares professionals in the administrative, interpretive, instructional, interpersonal, and pedagogic competencies required for and associated with fitness testing, prescription, teaching, and leadership.

CR: HKR 1001, the former KIN and PHSD 1001; KIN and PHSD 4320

2410 Historical and Comparative Physical Education - inactive course.

2420 Doping in Sport - inactive course.

2505 Recreation Programming and Evaluation (formerly RECR 2505) introduces the student to a variety of methodologies, skills, and materials for planning, developing, implementing, and evaluating professional recreation programs for diverse populations in a variety of settings.

CR: the former RECR 2505

2515 Social Psychology of Leisure (formerly RECR 2515) introduces the personality and social factors that shape how people experience leisure. Course materials will focus on life cycle theory, intrinsic and extrinsic motivation, perceived freedom, constraints theory, and other social psychological theory related to leisure.

CR: the former RECR 2515

2545 Introduction to Outdoor Recreation and Education (formerly RECR 2545) gives an overview of the foundational principles of outdoor education and recreation as they pertain to philosophy, wilderness ethics, professional preparation, movement through wildlands, environmental hazards, navigation, and safety. Students will participate in a sampling of outdoor education and recreation activities during the course.

CR: the former RECR 2545

PR: HKR 2505

2585 Foundations of Therapeutic Recreation is designed to examine a variety of aspects of therapeutic recreation from both a practical and theoretical perspective. Topics will include the history, philosophies, and theories underlying therapeutic recreation, therapeutic recreation models, essential skills for the therapeutic recreationist and ethical considerations for therapeutic recreation. Diverse groups (e.g. adults, youth, disadvantaged and disabled) and settings (e.g. community, schools, institutions, and workplace) suitable for therapeutic recreation will be discussed.

2600 Introduction to Human Nutrition (formerly KIN 2600; same as Biochemistry 2600) gives an overview of human nutrition with an emphasis on topics of current interest. Students will gain an understanding of nutrition in the context of health maintenance across the life span. Topics covered will include nutrition during pregnancy, nutrition for infants, Canadian Recommended Nutrient Intake/Dietary Reference Intake, weight loss and weight gain, nutraceuticals, and ergogenic aids.

CR: the former KIN 2600; Biochemistry 2600

2601 Physical Activity, Obesity, and Weight Control explores the relationship between physical activity, obesity, and morbidity. Emphasis will be placed on the incidence and prevalence of obesity, environmental and genetic factors affecting obesity, and mechanisms of weight and body composition modification.

2703 Introduction to Human Factors (formerly KIN 2703) is an introduction to the field of human factors, the field that studies aspects of human movement, health, safety, and performance in the workplace. This will include an introduction to the methods of detection, evaluation, and the physiological changes arising from hazards (e.g. inappropriate levels of noise, vibration, and illumination) in the workplace. The course will also examine overuse injuries in workplace studied in the context of basic biomechanics and function of the musculo-skeletal system.

CO: HKR 2320 and Physics 1020

CR: the former KIN 2703

PR: HKR 2310, Chemistry 1010 and 1011 or Chemistry 1050 and 1051

299W Work Term 1 (formerly KIN, PHSD, and RECR 001W) offers an opportunity for students to learn, develop, and practice high standards of professional behaviour and performance in the work environment. A student is required to submit a personal job diary and a work term report which should, at a minimum, reflect a clear understanding of job events and work place expectations and show reasonable competence in written communication skills.

CH: 0

CR: the former KIN, PHSD, and RECR 001W
LC: 0
PR: HKR 1123

3002 Advanced Coaching - inactive course.

3110 Curriculum Development and Teaching Methods (formerly PHSD 2110, 3110, and 311A/B) gives an overview, through a blend of theory and practical experience, of curriculum development and teaching methods as they apply to primary/elementary level physical education

CH: 6
CO: HKR 3300
CR: the former PHSD 2110, 3110, 311A/B
LH: 9
PR: HKR 2000, 2210, 2300, 2310, 2320 and 3340

3210 Physical Activities Course: Group Exercise, Net/Wall and Health Related Fitness (formerly PHSD 3210) covers activities such as volleyball, tennis, badminton, plus a selection of other net & wall games. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0

CR: the former PHSD 3210
LC: as scheduled
LH: as scheduled
PR: HKR 2210

3220 Physical Activities Course: Summer Outdoor Activities and Target/Striking Activities (formerly PHSD 3220) covers activities such as golf, archery, softball, and track and field. Outdoor activities include canoeing, orienteering, lightweight camping, over-night canoe trip, and introduction to rock climbing. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0

CR: the former PHSD 3220
LC: as scheduled
LH: as scheduled
PR: HKR 2210, HKR 3210

3221 Wilderness First Aid for Outdoor Leaders provides a minimum standard for outdoor professionals, guides and instructors who work in a wilderness setting. Course content extends beyond urban-based first aid programs to include elements inherent in leading groups in the outdoors and guiding wilderness adventures. Special emphasis is placed on prevention of injuries, accident scene management, leadership, leader responsibility and liability, advanced first aid kits, wound management and managing the trauma victim. CPR is included in this course.

3300 Motor Learning (formerly PHSD 2120, and KIN and PHSD 3300) gives an overview of motor learning and performance variables and their application to the teaching of physical skills, and will investigate motor control issues related to skill instruction.

CR: the former PHSD 2120; KIN and PHSD 3300
LH: 2
PR: HKR 2300

3310 Physiology of Exercise (formerly KIN and PHSD 3310) covers the physiological responses of the metabolic, neuromuscular, and cardiorespiratory systems at rest and during acute and chronic activity.

CR: the former KIN and PHSD 3310
LH: 3
PR: HKR 2310 and 2320; or Biochemistry 311A and 311B; or Nursing 1002 and 1012; or the former Pharmacy 3201 and 3202

3320 Introduction to Biomechanics (formerly KIN and PHSD 3320) is the analysis of human movement; the mechanics of motion and the general application of kinesiology.

CO: HKR 2320
CR: the former KIN and PHSD 3320
LH: 2
PR: HKR 2310 It is strongly recommended that students successfully complete Physics 1020 prior to enrolling in this course

3330 Health Issues I (formerly KIN and PHSD 3330) covers issues in personal and community health related to infectious illness, degenerative illness, heredity, and nutrition.

CR: the former KIN and PHSD 3330

3340 Adapted Physical Activity (formerly KIN, PHSD, and RECR 3340) presents an overview of current practices, philosophies, and issues related to physical activity and recreation for persons with disabilities. Knowledge and understanding of various disabling conditions and consequent needs of persons with disabilities, including health, safety and fitness, and how these needs may be met in terms of physical activity will be emphasized.

CR: HKR 3685, the former KIN, PHSD, and RECR 3340

3350 Health Issues II - inactive course.

3360 Care and Prevention of Athletic Injuries (formerly KIN and PHSD 3360) is a basic introduction to the field of athletic therapy and sports medicine. The content focuses on the prevention and care of sports injuries and covers topics such as preventive screening, safe environments, on the spot assessment and First Aid, legal responsibility, and supportive taping/wrapping.

CR: the former KIN and PHSD 3360
PR: HKR 2310 and a Basic First Aid Course

3400 Social Determinants of Health and Physical Activity provides students with a social, political, economic, environmental, and cultural perspective on health and health inequalities. A concentrated look at contemporary health issues using the social determinants of health model will equip students with critical skills necessary to consider health issues beyond physical pathologies.

3410 Sociology of Sport (formerly KIN and PHSD 3410; same as Sociology 3410) is an analysis of functions of sport in Canadian and North American society. Areas include social organization of sport, sport and social processes, sport and social problems, socialization and stratification of sport, and violence in sport.

CR: the former KIN and PHSD 3410; Sociology 3410

3485 Therapeutic Recreation Service Delivery focuses on issues related to the delivery of therapeutic recreation services. In particular, the following topics will be addressed: documentation in therapeutic recreation; client assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, task and activity analysis, planning change-oriented programs, writing behavioural objectives, etc.); program and client evaluation; written plans of operation.

PR: HKR 2585 and HKR 2505

3490 Women in Sport and Physical Activity (formerly PHSD 3490, and PHSD and RECR 3590) provides students with an opportunity to critically examine, understand and appreciate women's involvement in and contributions to the areas of sport and physical activity. The student will be expected to analyse, synthesize, and evaluate a wide range of historical, cultural, philosophical, and socio-psychological issues that have shaped the nature and scope of women's participation in sport and physical activity.

CR: the former PHSD 3490; PHSD and RECR 3590

3505 Adventure Programming (formerly RECR 3505) introduces the theory and practice of adventure programming. Topics covered in the course will include briefing, activity selection, sequencing, group development, and risk management. The use of adventure programming with a variety of populations will be explored. Skill development in adventure activity facilitation and processing is stressed throughout the course.

CR: the former RECR 3505
PR: HKR 2505 or permission of the instructor

3515 Outdoor Recreation and Persons with Disabilities - inactive course.

3525 Canadian Recreation Delivery Systems (formerly PHSD 3520, RECR 3525, and PHSD 4520) introduces recreation and sport delivery systems in Newfoundland and Canada. The course will examine the various agencies that administer recreation and sport at municipal, provincial, and national levels.

CR: the former PHSD 3520; RECR 3525; PHSD 4520
PR: HKR 2000

3535 Legal Aspects of Leisure and Recreation Services (formerly RECR 3535) provides students with an opportunity for in-depth study of legal issues related to the operation of leisure services and facilities. Issues of tort and contract liability, employment related legal aspects, human rights and freedoms, and administrative procedures involved in property acquisition, law enforcement, and risk management are the topics of this course.

CR: the former RECR 3535

3545 Outdoor Recreation Leadership (formerly RECR 3545) acquaints students with the breadth, depth, and scope of outdoor recreation leadership including a detailed examination of theories, principles, and practices. The course provides opportunities for individual students to develop, practice, and receive feedback on their outdoor leadership skills. The course includes a required field experience in outdoor recreation leadership.

CR: the former RECR 3545
PR: HKR 2505 or HKR 3220

3555 Outdoor Recreation Management (formerly PHSD 3550 and RECR 3555) gives an overview of outdoor recreation practices in Newfoundland and Canada. This course will examine the management of resources, conservation education and practices, and development for public use or exclusion; legislation related to management of risk; viability of facilities; national and provincial agencies; private commercial ventures; and future trends in management. Management strategies will form a major part of the course.

CR: the former PHSD 3550; RECR 3555

3565 Tourism/Commercial Recreation (formerly PHSD 3560 and RECR 3565) examines behavioural factors influencing tourism; promotion of commercial recreation attractions, provincial strategies in travel and tourism, problems of leisure travel, stability of entrepreneurial ventures in tourism, and research and planning strategies relevant to commercial ventures.

CR: the former PHSD 3560; RECR 3565

3575 Community Development and Recreation (formerly RECR 3575) introduces various theoretical perspectives on community organization and development, as well as methods available to the recreation practitioner to facilitate the development of recreation services in communities. This course examines, in particular, recreation services delivery which involves community residents and groups in recreation program decision-making and implementation.

CR: HKR 3785, the former RECR 3575

3595 Women and Leisure (formerly PHSD and RECR 3590, and RECR 3595) provides students with an opportunity to critically examine, understand and appreciate women's involvement in and contributions to leisure. The student will be expected to analyse, synthesize, and evaluate a wide range of historical, cultural, philosophical, and socio-psychological issues that have shaped the nature and scope of women's participation in leisure.

CR: the former PHSD and RECR 3590; RECR 3595

PR: Sociology 1000 or the former Sociology 2000

3685 Assessment and Documentation in Therapeutic Recreation presents an overview of current practices, philosophies, and issues related to recreation and leisure for persons with disabilities. Knowledge and understanding of various disabling conditions and needs of persons with disabilities from a therapeutic recreation perspective. Students will focus on communication skills necessary to carry out these tasks successfully. This requires the ability to actively listen, document with correct terminology, and interpret data to plan for treatment services.

CR: HKR 3340

PR: HKR 2585

3785 Community Development and Recreation in Therapeutic Recreation Settings introduces various theoretical perspectives on community organization and development, as well as methods available to the therapeutic recreation practitioner to facilitate the development of recreation services in communities. Various issues such as poverty, ethnicity, and disability will be addressed. This course employs an ecological perspective in examining therapeutic recreation service delivery which involves community residents and groups in recreation program decision-making and implementation. The interconnectedness between leisure education, recreation and health and community development is discussed.

CR: HKR 3575

399W Work Term 2 (formerly KIN, PHSD, and RECR 002W) offers an opportunity for students to further expand and develop professional knowledge and skills, while demonstrating the ability to accept increased responsibility and challenge in the work place. A student is expected to demonstrate competence in written communication skills through the maintenance of a personal job diary and the submission of a formal report demonstrating the student's ability to effectively gather, analyse, organize, and present information regarding a specific aspect of the work term position.

CH: 0

CR: the former KIN, PHSD, and RECR 002W

LC: 0

PR: HKR 1123 and successful completion of 299W

4210 Physical Activities Course: Winter Outdoor Activities and Leadership (formerly PHSD 4210) includes outdoor activities such as winter travel methods emphasizing cross-country skiing, snowshoeing, navigational skills, winter survival/camping, and overnight winter camping. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0

CR: the former PHSD 4210

LC: as scheduled

PR: HKR 2210, HKR 3220

4220 Physical Activities Course: Territorial Games (formerly PHSD 4220) includes activities such as soccer and rugby, basketball, ice hockey, water polo, team handball and other territorial games. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0

CR: the former PHSD 4220

LC: as scheduled

LH: as scheduled

PR: HKR 2210

4300 Human Motor and Perceptual Motor Disorders addresses the etiology, epidemiology or neuropathology of perceptual motor and motor disorders. Students will study a variety of developmental, progressive, traumatic and age-related movement disorders.

CR: Psychology 4810

PR: HKR 2300, HKR 3300, or consent from the instructor

4310 Evaluation (formerly KIN and PHSD 4310) includes program evaluation and measurement of the components of physical performance in addition to statistical treatment and interpretation of data.

CR: the former KIN and PHSD 4310

LH: 2

PR: Statistics 2500 or equivalent

4330 Social Psychology of Sport, Physical Activity and Recreation (formerly KIN and PHSD 4330) introduces the psychological factors that influence participation in sport, exercise, physical activity and recreation and the psychological effects derived from participation.

CR: the former KIN and PHSD 4330

4420 Issues (formerly KIN and PHSD 4420) explores, through research and discussion, trends and issues basic to the profession including areas in physical education, health, fitness, and lifestyle industries.

CR: the former KIN and PHSD 4420

PR: successful completion of a minimum of 78 credit hours

4485 Leisure Education in Therapeutic Recreation Settings is designed to provide students with the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals. The course will address the following three broad areas: a) concepts and models of leisure education; b) content related to specific skills required for leisure involvement (leisure awareness, social skills development, friendship development, stress management, assertiveness, decision making, etc.) and c) instructional and interactional techniques used in leisure education.

PR: HKR 2585 and HKR 2505

4515 Principles and Practices of Social Recreation - inactive course.

4525 Planning for Recreation (formerly RECR 4525) focuses on the strategic planning process and how it can be used within recreation organizations. The course is designed to introduce students to various planning theories and to provide students with opportunities to develop skills in strategic and other planning processes.

CR: the former RECR 4525

4535 Camp Administration and Programming - inactive course.

4545 Facility Planning, Design and Management (formerly PHSD 4540 and RECR 4545) focuses on the major considerations in selecting site, size, type and usage of the more popular facilities as well as the problems in design, layout and function, standards, and modifications.

CR: the former PHSD 4540; the former RECR 4545

4555 Leadership and Supervision in Recreation (formerly PHSD 4550 and RECR 4555) focuses on need, selection, training, and supervision of leaders in recreation. Certification, standards and professional organizations. Evaluation of leadership materials and methods used. Practical exposure to roles of both leader and supervisor through seminar and related fieldwork.

CR: the former PHSD 4550; RECR 4555

4565 Recreation Promotion and Marketing - inactive course.

4575 Recreation Ethics, Issues and Trends (formerly PHSD 4570 and RECR 4575) explores contemporary trends and issues identified by governments and recreation practitioners and the way in which these issues influence the delivery of leisure services.

CR: HKR 4685, the former PHSD 4570, the former RECR 4575

4585 Financing Recreation Services (formerly RECR 4585) provides opportunities for in-depth study of financing leisure services in a variety of settings. The primary learning objectives are to achieve an understanding of revenue sources, financial management, and budgeting, the concepts of equity from a justice, social, and economic perspective, and the ability to use various techniques in the allocation of resources, the pricing of services, and ascertaining the costs of providing services.

CR: the former RECR 4585

4600 Introduction to Research (formerly KIN, PHSD, and RECR 4600) introduces research methodologies currently employed in kinesiology, physical education or recreation.

CR: the former KIN, PHSD, and RECR 4600

PR: Statistics 2550 or equivalent

4605 Research Methods in Recreation and Leisure II - inactive course.

4610 Research Project (formerly KIN, PHSD, and RECR 4610) is a detailed study for honours students in Kinesiology, Physical Education and Recreation, directed by a faculty member of the School, of a selected topic in the field of kinesiology, physical education or recreation.

CR: the former KIN, PHSD, and RECR 4610
 PR: a minimum of 80% in HKR 4600 and one of Statistics 2500 or Statistics 2550

4625 Theoretical Perspectives of Recreation and Leisure (formerly RECR 4625) is an in-depth overview and analysis of current theoretical perspectives/paradigms related to the leisure experience. A parallel purpose is to examine psychological, sociological, and social-psychological constructs that contribute to a contemporary, interdisciplinary understanding of recreation and leisure.

CR: the former RECR 4625

4635 Multicultural Perspectives of Recreation and Leisure - inactive course.

4685 Professional Issues in Therapeutic Recreation is designed to facilitate an in-depth exploration and analysis of philosophical issues and interdisciplinary theories and to discuss how they relate to therapeutic recreation practice and research. The course will be conducted as a seminar and students will be responsible for reading course materials and leading discussions on various topics. The ultimate goal of the course is to prepare the student to enter the profession confident in his/her ability to provide exemplary TR services.

CR: HKR 4575, the former PHSD 4570, the former RECR 4575

PR: HKR 2505 and HKR 2585

4700 Advanced Fitness Training and Assessment (formerly KIN 4700) prepares students to assess, prescribe, demonstrate, supervise, educate, and counsel apparently healthy individuals across the lifespan on information related to physical activity/exercise, fitness and health. The successful completion of this course will allow students to apply for a certification as a Professional Fitness and Lifestyle Consultant from the Canadian Society of Exercise Physiology.

CR: the former KIN 4700

LH: 2

PR: HKR 2340

4701 Environmental Physiology (formerly KIN 4701) examines human behavioural, autonomic and metabolic responses to extreme environments. This will include the study of human responses seen during changes from normal ambient temperature and pressure, to those experienced in the environments encountered during undersea diving, space travel, altitude, and other similar environments.

CR: the former KIN 4701

PR: HKR 2320

4702 Advanced Exercise Physiology (formerly KIN 4702) prepares students to acquire the knowledge necessary to understand, analyse, and integrate information and experiences related to physiological adaptations occurring with acute and chronic activity and disuse.

CR: the former KIN 4702

LH: 2
 PR: HKR 3310

4703 Occupational Ergonomics and Sport Biomechanics (formerly KIN 4703) focuses on the contrast between biomechanical analyses of workplace tasks and athletic movement. Students will conduct a detailed biomechanical analysis of a given movement, in the workplace or for a given sport, with regard to both the probability of injury and optimization of performance.

CR: the former KIN 4703

LH: 2

PR: HKR 2703, 3320, and Physics 1020

4720 Directed Study (formerly KIN 4720) requires approval of Dean of the School and the course instructor. Permission to register must be obtained in the term preceding enrolment.

CR: the former KIN 4720

4785 Internship in Therapeutic Recreation provides the student with an opportunity to develop the skills to become a competent practitioner utilizing the therapeutic recreation process, assessment, treatment planning, implementation/facilitation and evaluation. This practical experience will be carried out under the supervision of an approved Therapeutic Recreation professional. The internship will consist of 14-16 full-time consecutive weeks (35-40 hours per week for a minimum total of 560 hours). This course will normally be taken in the students' last co-op work term placement or last semester of their degree program.

CR: HKR 299W, HKR 399W, HKR 499W

4910 Directed Study (formerly PHSD 4910) requires approval of Dean of the School and the course instructor. Permission to register must be obtained in the term preceding enrolment.

CR: the former PHSD 4910

4915 Directed Study (formerly RECR 4915) requires approval of Dean of the School and the course instructor. Permission to register must be obtained in the term preceding enrolment.

CR: the former RECR 4915

499W Work Term 3 (formerly KIN, PHSD, and RECR 003W) offers an opportunity for students, who have sufficient academic grounding and work experience, to exercise greater independence and responsibility in their assigned work. A student must demonstrate a high level of competency in communications skills through the submission of a formal report on a topic related to the work term or through a formal presentation on an aspect of the work term using the latest in computer technology and applications.

CH: 0

CR: the former KIN, PHSD, and RECR 003W

Director

Kennedy, K., B.N., M.Ed. *Memorial*

Assistant Director

Healey, E.M., B.Voc.Ed., M.Ed. *Memorial*

Administrative Staff

Clairmont, G., Administrative Secretary

Drawing on the rich educational resources of the University and the community at large, the Division of Lifelong Learning provides innovative learning opportunities that are responsive to the needs of traditional and non-traditional learners, throughout the province and beyond.

Additional information regarding the Division of Lifelong Learning is available at www.mun.ca/lifelonglearning/.

1 The Memorial University of Newfoundland Code

The attention of all members of the University Community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Certificate Programs

The Division of Lifelong Learning offers certificate programs in Business Administration, Career Development, Criminology, Library Studies, Municipal Administration, Newfoundland Studies, Public Administration, Records and Information Management, and Regional Policy and Development. These programs are offered by and are under the academic control of the appropriate faculties and schools.

Certificate courses are specially designed courses relating to specific areas of study for which no equivalent degree credit course exists and are not applicable towards an existing diploma or degree program.

A student is required to meet **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)** for entry to Memorial University of Newfoundland.

A student may receive up to three exemptions for equivalent course work completed through another program or at another institution. If a student has previously obtained credit from Memorial University of Newfoundland for any of the courses on a certificate program, s/he will not be required to repeat these courses. To receive exemptions for certificate credit courses, a student must make a written request with supporting documents (transcripts and course descriptions) to the Program Developer, Certificate Programs, Division of Lifelong Learning for consideration by the Advisory Committee for the certificate.

2.1 Admission Requirements

A student who wishes to complete certificate programs must be admitted to the University as an undergraduate student and comply with the **General Academic Regulations (Undergraduate)**.

2.2 Regulations for a First Certificate

A Memorial University of Newfoundland certificate is awarded to a student who completes certificate program requirements.

1. Every candidate for a certificate shall comply with all the course requirements governing the award of that certificate.
2. Candidates shall complete at this University a minimum of 9 credit hours of the total number of credit hours required for a certificate.
3. No candidate will be awarded a certificate unless s/he has obtained an average of 2 points or better on the total number of credit hours required for the certificate.

2.3 Regulations for a Second Certificate

A student who has completed a certificate program and wishes to complete a second certificate must:

1. comply with all course requirements governing the award of that certificate; and
2. complete at least 9 credit hours beyond those required for the first certificate. The courses which comprise these credit hours must be applicable to the certificate sought.

3 Program Regulations

3.1 Certificate in Business Administration

The Certificate in Business Administration is widely recognized by business and industry. It is designed for management-entry level employees who are interested in career development. Courses completed on the Certificate program can be applied toward the Diploma and the Degree of Bachelor of Business Administration.

A student who has a particular interest in Accounting, Marketing, Human Resources and Labour Relations, Small Business/Entrepreneurship or Information Systems should consult with the Division regarding choice of elective courses.

3.1.1 Regulations for the Certificate in Business Administration

To be eligible for the Certificate in Business Administration a student must have:

1. Completed the following 30 credit hours: Business 1000, 1101, 1210, 3310, 4000, Either 4320 or 4330 and 12 credit hours in Business electives,
2. At least two years of full-time work experience or equivalent.
3. At least two years during which the student has not been in full-time attendance at a secondary or post-secondary institution.
4. Course prerequisites for all Business courses shall apply to the Certificate in Business Administration. Students should note, for example, that the prerequisites for BUSI 1210 are English 1110 or 1021, BUSI 1000, Economics 2010, and Economics 2020. It should also be noted that some courses are not offered every semester.

3.2 Certificate in Career Development

The Certificate in Career Development is designed for persons working in the career development field who wish to consolidate and deepen their knowledge base. The program will provide a grounding in career development theory and practice for those wishing to enter the field. The practicum will give new entrants to the field valuable work experience and will allow existing practitioners the opportunity to reflect on and improve their practice.

3.2.1 Regulations for the Certificate in Career Development

A student will be required to complete a total of ten courses as follows:

1. Career Development 1000, 1100, 1200, 1210, 1220, 1300, and 3000; and
2. three elective courses chosen from the following list: Career Development 2000, 2001, 2100, 2200, or 2300.

3.3 Certificate in Criminology

The Certificate in Criminology is designed for members of the community who have a special interest in the structure and administration of criminal justice. The program is of particular interest to persons engaged in law enforcement, corrections and rehabilitation.

3.3.1 Regulations for the Certificate in Criminology

To be eligible for the Certificate in Criminology a student must complete the following:

1. Fifteen credit hours including Psychology 1000; Sociology 1000, 3290, 3395; and one of Political Science 1000, 1010, 2800.
2. Six credit hours chosen from the following where a maximum of 3 credit hours can be in one subject area:
Archaeology 2492; Political Science 2100, 2800, 3610, 3820; Psychology 2012, 2100, 2800, 3533, 3640; the former Social Work 2510, the former Social Work 3510, 3721, 4612, 5112; Sociology 2100, 2230, 2250, 3120.
In some cases, a student may substitute one optional course not listed above, that has relevance to their area of speciality and to the field of criminology. A student may submit his/her request, in writing, to the Assistant Director, Certificate Programs, Division of Lifelong Learning. The Advisory Committee will consider the request. Permission to substitute must be obtained prior to the student enrolling in or completing the course.
3. Two of Criminology 1302, 1303, 3301. A student should be aware that Criminology 3301 is not offered on a regular basis. A student may enroll in this course several times as content changes, however it may be applied to the certificate only once.

3.4 Certificate in Library Studies

The Certificate in Library Studies is for persons working in a library who wish to be more accomplished providers of library services. The program will benefit personnel in school, public, university, medical, legal, and special interest libraries.

3.4.1 Regulations for the Certificate in Library Studies

To be eligible for the Certificate in Library Studies a student must complete the following:

1. Business 2000 or Business 2010; Library Studies 1601, 1602, 1603, 1606, 1609; and
2. four courses chosen from Library Studies 1604, 1605, 1610, 1611, 2606, 3600, 3601-3609.
In some cases, a student may substitute one elective course that has relevance to his/her area of speciality and the field of library studies. A student may submit his/her request in writing to the Program Developer, Division of Lifelong Learning for consideration by the Advisory Committee.

3.5 Certificate in Municipal Administration

The Certificate in Municipal Administration is intended for employees of municipalities, and other interested parties, who wish to develop skills used in the administration of municipal services.

3.5.1 Regulations for the Certificate in Municipal Administration

To be eligible for the Certificate in Municipal Administration a student must complete the following:

1. Municipal Administration 1701, 1702, 2703, 2704, 2705, 2706; and
2. two courses chosen from Business 2000, 3310, 4320, 4330; Municipal Administration 2707.

3.6 Certificate in Newfoundland Studies

The Certificate in Newfoundland Studies is designed for those who wish to expand their knowledge of Newfoundland and Labrador. The program will be useful to persons involved in community, rural and northern development; cultural affairs, tourism, education and archival and library services.

3.6.1 Regulations for the Certificate in Newfoundland Studies

To be eligible for the Certificate in Newfoundland Studies a student must complete 24 credit hours in at least four different subject areas chosen from the following:

1. Anthropology 3290 and Archaeology 3290, 3850; Economics 2070, 3070; Education 3571; English 3155; Folklore 2300, 2230; Geography 3290, 3490; History 3110, 3120; Linguistics 2210; Political Science 3880; Religious Studies 3900, 3901; S/A 2220, 2230.
2. A maximum of 6 credit hours may be chosen from the following:
Anthropology 4280 and Archaeology 4280; Business 2000; Economics 3080; Folklore 2401, 3860, 4310, 4400; Geography 4690; History 4230, 4231; Linguistics 4220; Political Science 3890, 4650.

3.7 Certificate in Public Administration

The Certificate in Public Administration is intended for public sector employees and any others who wish to further their understanding of the administration of public policy and public programs.

3.7.1 Regulations for the Certificate in Public Administration

To be eligible for the Certificate in Public Administration a student must complete the following:

1. Business 2000, 3310; Political Science 2600, 2800, 3610, 3810; and
2. six credit hours chosen from each of two of the following groups A, B, C for a total of 12 credit hours.
 Group A courses: Business 1000, 1101, 2101, 4320, 4330.
 Group B courses: Political Science 1000, 1010, 3600, 3820, 3870, 3890, 4630, 4680
 Group C courses: Any 6 credit hours in arts, science or business electives.

3.8 Certificate in Records and Information Management

The Certificate in Records and Information Management provides continuing education to those working in the records, archival and information management fields and certification in a developing profession in which practitioners have limited access to relevant upgrading.

3.8.1 Regulations for the Certificate in Records and Information Management

To be eligible for the Certificate in Records and Information Management a student must complete the following:

1. Business 2000, 3700; Computer Science 2801 or 2650 (or equivalent); Mathematics 1080 (or equivalent); Records Management 1000, 1001, 1100, 2000; and
2. two courses chosen from Business 5700, 6700; Political Science 3540, 3741; Municipal Administration 1701, 2705.

3.9 Certificate in Regional Policy and Development

The Certificate in Regional Policy and Development is for those who want to expand their knowledge and skills in regional policy and development. The program will benefit those engaged in municipal, provincial or federal government departments; regional economic development boards, the voluntary sector; and social enterprises. The program requires the completion of 32 credit hours as specified below.

3.9.1 Regulations for the Certificate in Regional Policy and Development

A student must apply for admission to the Certificate in Regional Policy and Development program by completing the Declaration/Change of Academic Program Form. This form may be obtained at www.mun.ca/regoff/registration/Declare_Change_Academic_Program.pdf or in person at the Office of the Registrar.

To be eligible to receive the Certificate in Regional Policy and Development a student must complete the following:

1. Business 1600, Geography 3350, Geography 4320;
2. twelve credit hours chosen from the following six subject areas. No more than 3 credit hours from any one subject may be used. A student is responsible for ensuring that all existing departmental prerequisites have been met, where applicable, for the courses listed below:
 - a. Business 1000, 1101, 3310, 4330;
 - b. Economics 3080, 4080, 4085, 4120;
 - c. Geography 2302, 2425, 3701, 4405;
 - d. Political Science 2600, 3280, 3600, 3650;
 - e. Sociology 2230, 3210;
 - f. Social Work 1710 and;
3. Regional Policy and Development 1800, 2800, and 3000.

4 Certificate Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Certificate courses are specially designed courses relating to specific areas of study for which no equivalent degree credit course exists and are not applicable towards an existing diploma or degree program.

4.1 Career Development

Courses in the Certificate in Career Development are designated by CADV.

1000 Career Development I
CH: 0

1100 Assessment in Career Development I
CH: 0

1200 Interpersonal Communications

CH: 0

1210 The Nature of the Helping Relationship
CH: 0

1220 Group Facilitation
CH: 0

1300 The Nature of Work, the Workforce and the Workplace
CH: 0

2000 Career Development II
CH: 0

2001 Career Development for Special Populations
CH: 0

2100 Assessment in Career Development II
CH: 0

2200 Program Design, Implementation, and Evaluation
CH: 0

2300 The Emerging Economy
CH: 0

3000 Practicum in Career Development
CH: 0

4.2 Criminology

1302 Criminal Procedure and the Administration of Criminal Justice examines the flow of criminal matters through the criminal justice system. Topics include the investigation into criminal complaints, search and seizure, arrest, release (bail), elections and pleas, preliminary inquiries, trials, sentencing, appeals and the ultimate disposition.

CH: 0

1303 Corrections in the Criminal Justice System examines the role of corrections in the Canadian criminal justice system which seems to be in constant change. These changes will be reviewed, updated and evaluated as we look at the two-dimensional role of corrections in justice: correctional institutions (prisons) and the community/after-care functions. Includes a review of new Canadian legislation affecting the above areas, as well as an examination of sentencing options and the Canadian pardon system.

CH: 0

3301 Selected Topics in Criminology will be determined by the Division of Lifelong Learning.

CH: 0

4.3 Library Studies

1601 Introduction to Libraries introduces students to the organization, functions, and services in various types of libraries. The course will also cover some aspects of the history of libraries, ethical considerations in library work (freedom of information and access, copyright), and collection development.

CH: 0

1602 Technical Processing explains the theory and practice of the various aspects of technical processing: acquisitions, cataloguing, classification, serials and circulation.

CH: 0

1603 Reference examines reference services, the reference interview and search strategies. Reference sources, materials and research methods will be examined.

CH: 0

1604 Adult Services covers library services directed towards adults, with an emphasis on the genres of fiction and non-fiction works, the promotion of literacy and leisure reading, and reference tools.

CH: 0

1605 Children's Services looks at fiction and information books appropriate for children from birth to teenage years. Coverage will include library publicity and the promotion of books through children's programming.

CH: 0

1606 Introduction to Library Technology is intended for those interested in how technology is shaping library services and collections. Topics include an introduction to computer hardware, network topography, HTML, Integrated Library Systems, proxy servers, electronic journal procurement, electronic indexes, and evolving user interfaces. It also looks at the way technology has changed the workflow in libraries and the impact that this has had on library organization and staffing.

CH: 0

1609 Managing Libraries is an introduction to the management function in the library setting, including job descriptions, policies and procedures, legal aspects, budgeting, organizational structure and interrelationships, and public relations.

CH: 0

1610 Library Services for Business and Industry focuses on the provision of library services to business and industry, with emphasis on specific strategies for providing information to business and industry users, the role of in-house information services and libraries, and the interaction between the library, management, and administration in business and industry settings.

CH: 0

1611 Multimedia Operations in the Library Setting covers current trends in the information revolution, and their effect on communications in the library setting. Students will be introduced to applications of multimedia to library work, including audiovisual resources, desktop publishing and other software, computer networking, and the creation of promotional materials. The course is intended to be a hands-on introduction to these applications.

CH: 0

2606 Advanced Topics in Library Technology offers an overview of popular technologies like blogs, wikis, web search engines, relational databases, wireless networks, personal computing devices, and XML, with an emphasis on their application in the world of libraries. The course provides a basic understanding of library-specific protocols and standards including the NISO Circulation Interchange Protocol (NCIP), Radio

Frequency Identification (RFID), Electronic Data Interchange (EDI), Unicode, and cataloguing schemas for digital objects.

CH: 0

PR: Library Studies 1606

3600 Directed Research/Project - inactive course.

3601-3609 Special Topics in Library Studies examines specific courses developed to meet particular needs, new topics, and current trends in library studies work.

CH: 0

PR: any two Library Studies courses below the 3000 level

4.4 Municipal Administration

1701 Introduction to Municipal Accounting - inactive course.

1702 Introduction to Local Government - inactive course.

2703 Municipal Law - inactive course.

2704 Municipal Financial Administration - inactive course.

2705 Municipal Administration - inactive course.

2706 Municipal Planning and Community Development - inactive course.

2707 Selected Topics in Municipal Administration - inactive course.

4.5 Records Management

1000 Introduction to Records Management - inactive course.

1001 System and Functions in Records Management - inactive course.

1100 Introduction to Archival Science - inactive course.

2000 Records Classification Systems - inactive course.

4.6 Regional Policy and Development

Courses in the Certificate in Regional Policy and Development are designated by RPD.

1800 Community and Regional Policy and Development introduces the student to the interdisciplinary and multi-stakeholder nature of regional policy and development. The course will provide the student with a contextual framework to integrate existing knowledge and experiences as well as future studies within the field. The student will learn to utilize practical tools and approaches to overcome regional policy and development challenges.

CH: 5

UL: applicable only towards the Certificate in Regional Policy and Development

2800 Regional Policy and Planning examines public policy and planning relating to regional development at the sub-provincial, local or other functional region levels, with an emphasis on the interactions between levels of government and between government and non-government policy players in the ever-broadening spectrum of governance. It includes proactive programs intended to impact sectors, regions and labor markets, and it includes the unintended impacts governments can have as they consider the myriad of interests and pressures that influence decision making in a democracy. This course includes the incremental evolution of public policy through conventions and practices; through government statements and 'positions'; and through the ideologically-informed platforms of parties that form governments, and of the industry, labor and non-governmental organization positions on related issues that form public discourse.

PR: RPD 1800

UL: applicable only towards the Certificate in Regional Policy and Development

3000 Community Field Placement is a one semester period of practical community-based work designed to provide experience in policy analysis, strategic planning, researching and evaluating opportunities, proposal writing, project management or other topics related to regional policy and development. Students will work in an environment that is interdisciplinary and has multiple stakeholders with competing interests. Students will learn to apply the skills they have acquired in the completion of certificate program course work to real-life regional policy and development challenges.

PR: Successful completion of all other course work towards the Certificate in Regional Policy and Development, or approval from the Division of Lifelong Learning.

UL: applicable only towards the Certificate in Regional Policy and Development

5 Diploma in Information and Communications Technology

The Diploma in Information and Communications Technology is designed to provide individuals already possessing a post-secondary diploma or degree in any field with the knowledge and skills required to work in today's high technology environment. The program will benefit individuals from a wide variety of backgrounds, including business, education, technical, and administrative.

The program is offered in a collaborative learning environment with a problem-solving focus. The instructors are experienced and industry-certified by Microsoft and Cisco. The Division of Lifelong Learning is the Cisco Regional Academy for Newfoundland and Labrador; Cisco is a world leader in networking for the Internet.

Two options are available for completion of the Diploma in Information and Communications Technology:

1. Option 1. is taken on a full-time basis and is comprised of three semesters and consists of 32 credit hours and one work term.
2. Option 2. is comprised of 35 credit hours and can be taken full-time in three semesters or part-time in seven semesters.

5.1 Program Objectives

The program focus is on four areas: E-Commerce, networking, programming, and databases.

Graduates of the program will:

1. Enhance their academic and other credentials with practical technology skills.
2. Obtain skills and knowledge that will prepare them to work effectively within a high technology environment.
3. Demonstrate the ability to work as part of a team.
4. Develop skills required to analyse an organization's information and communications technology needs and design a customized solution.

5.2 Admission Requirements

Applicants to the Diploma in Information and Communications Technology normally must have successfully completed a three-year diploma or degree from an accredited post-secondary institution and attained a minimum of 65% on the last 15 courses completed. Admission to the program is limited and competitive. Application to the program must be made in writing to the Division of Lifelong Learning on the appropriate form, and must include an official transcript of post-secondary marks. Applications must be submitted by June 1 for Fall semester, October 1 for Winter semester, and February 1 for Spring semester. Applications received after these deadlines will be considered only if a place is available. In addition, students who have not registered for courses at Memorial University of Newfoundland for either of the two immediately preceding semesters must also complete an application for admission/readmission to the University.

Selection of candidates will be based on academic performance and on other criteria considered suitable for an information technology professional, including but not limited to evidence of the ability to cope with a demanding schedule or demonstrated mathematical ability.

Candidates pursuing Option 2. will be required to have at least one year of full-time work experience or equivalent.

5.3 Program Requirements

The Diploma in Information and Communications Technology consists of the set curriculum outlined below. All courses are specifically designed for the Diploma in Information and Communications Technology only, and are not applicable towards any other existing degree or diploma program. Courses are normally offered sequentially in an accelerated format. Students enrolled in Option 1. will be required to complete a work term component. A work term is not available under Option 2., however, a substantial project (INFO 4500) will be required of each participant prior to completion of the program. Students completing the program on a part-time basis must do so within three calendar years from the date of admission to the program. Students completing the program on a full-time basis must do so within four semesters from the date of admission to the program.

5.4 Evaluation, Continuance and Transfer

The passing grade for each course is 65%. A pass must also be awarded for the work term. Evaluation may include, but not be limited to, any or all of the following: projects, assignments, examinations, and class participation.

Students who obtain a numerical grade of less than 65% in no more than two of the Diploma in Information and Communications Technology courses will be given a probationary promotion and will be required to repeat the course(s) in the next semester in which it (they) is (are) offered.

The foregoing notwithstanding, students will be required to withdraw from the Diploma in Information and Communications Technology program if:

1. a final numerical grade of less than 65% is obtained in more than two courses, or
2. a final numerical grade of less than 65% is obtained in a repeated course, or
3. a final numerical grade of less than 50% is obtained in any one course.

Students may be considered for readmission by the Admissions Committee, Division of Lifelong Learning.

Students who choose to drop a course(s) are strongly encouraged to consult with the Division of Lifelong Learning to ensure their program can be completed within the specified time.

Students may be permitted to transfer between options at the end of semester one with approval from the Division of Lifelong Learning.

5.5 Work Term

Students accepted into Option 1. of the program will complete the work term component during the third semester of the Diploma in Information and Communications Technology program. The dates for starting and finishing the work term are shown in the University Diary. To be eligible for the work term, students must have successfully completed all other courses in the program. Successful completion of the work term requirement is a prerequisite to graduation from the Diploma in Information and Communications Technology.

General management of the work terms is the responsibility of the Division of Lifelong Learning. It is responsible for assisting potential employers to become involved in the program, for the continual development of employment opportunities, for arranging student-employer interviews, for counselling of students, for visiting students on their work assignments and for the evaluation of the work term. Students are also encouraged to seek out suitable work term placements.

Students and employers choose each other through the placement competition process. Employers interview students, and both the

students and employers express their preferences. Placement is not guaranteed but every effort is made to ensure that appropriate employment is made available.

Students accepted into the Diploma in Information and Communications Technology, Option 1., give permission to the Division of Lifelong Learning to supply their resumes and transcripts to prospective employers.

Salaries paid to students are determined by employers and are based upon their internal wage structures. However, students should not expect the income from work terms to make them completely self-supporting.

Students may obtain their work term placements outside the competition. Such work terms must be confirmed by the employer, and be approved by the Division of Lifelong Learning before the first day on which the student commences work.

A student may, with the permission of the Division of Lifelong Learning, be self-employed during a work term provided that the student and the Division of Lifelong Learning agree at the start of the work term on the information to be provided to the Division so that it can evaluate the student's work during the term.

A student who is unable to obtain a work term or work in approved self employment within four weeks from the start of the work term will be expected to undertake work under contract to a client within a faculty, another entity of the University, a company, municipality, non-profit organization, or the like. The contract work may be part-time, or occupy only a portion of a semester, and may allow the student to earn an income in other ways. The contract, whether paid or unpaid, must be approved by the Division of Lifelong Learning.

When neither an approved full-time work term nor an approved contract has been obtained, the Committee on Undergraduate Studies may approve a program which provides these students with technical and professional experience expected in the work term. The program must be such that the development, including the development of the students' communication skills, through the program can be monitored and assessed by the Division of Lifelong Learning with criteria equivalent to those used for full-time work term positions.

A work term report must be submitted. This report will be assigned by the Division of Lifelong Learning. Evidence of the student's ability to gather material relating to the job, analyse it effectively and present it in a clear, logical and concise form, will be required in the report. Late reports will not be evaluated, unless prior permission for a late report is given.

The evaluation of the work term is the responsibility of the Division of Lifelong Learning. Two components are considered in work term evaluation: on-the-job performance and the work term report. Each component is evaluated separately.

Evaluation of the work term will result in the assignment of one of the following recommendations:

PASS WITH DISTINCTION: Indicates excellent performance in both the work report and work performance. The student is commended for his/her outstanding performance in each of the required components; pass with distinction has been awarded to each of the work report and work performance.

PASS: Indicates that performance meets expectations in both the work report and work performance. The student fully meets the requirements of a passing work report and completely satisfactory work term performance.

FAIL: Indicates failing performance in the work report and/or work performance.

On-the-job performance is assessed by the Division of Lifelong Learning in conjunction with the employer.

If a student fails to achieve a passing grade from a work term, the student will normally repeat that work term in a work situation approved by the Division of Lifelong Learning. A given work term may be repeated only once during the program.

Students who fail to honour an agreement to work with an employer, or who drop a work term without prior approval of the Division of Lifelong Learning, or who conduct themselves in such a manner as to cause their discharge from the job, will normally be awarded a failed work term.

Permission to drop a work term does not constitute a waiver of diploma requirements, and students who obtained such permission must complete an approved work term in lieu of the one dropped.

5.6 Awarding of Diploma

Once all course requirements have been successfully completed, application for awarding of the Diploma must be made in writing on the appropriate form to the Office of the Registrar, Memorial University of Newfoundland.

5.7 Course Load

Full-time students in semester one will complete 16 credit hours.

Full-time students in semester two will complete 16 credit hours.

Full-time students may register for an additional 3 credit hour course while on the work term.

5.8 Course Descriptions

All courses, unless otherwise noted, consist of laboratory and classroom sessions.

Courses in the Diploma in Information and Communications Technology program are designated by INFO.

1000 Computer Technology provides an overview of computer technology and introduces computer basics. Students will become familiar with the basic parts of computer systems and their functions while learning troubleshooting techniques and distinguishing between hardware and software problems. Configuring hardware through the operating system and component failure will be discussed. Understanding of these topics will be enhanced by dismantling and assembling a computer. This course is a prerequisite for all other courses in this program.

CH: 1

2100 Operating Systems I is a study of basic operating systems. Features and benefits of the Windows and Unix environments will be discussed in detail.

CH: 2

CR: the former INFO 3111 and INFO 3110

PR: INFO 1000

2200 Networking Systems I is a study of the most commonly used networking systems. Topics include fundamentals of LAN theory; LAN protocols; network topologies; network security; basic network communication options; and network management.

CH: 2

PR: INFO 2100

2300 Internet Applications is a study of the Internet and its applications. Topics will include advanced searching techniques, programming languages used in developing applications for the World Wide Web, and creating and maintaining WWW sites.

CH: 1

PR: INFO 1000

2600 Introduction to Wireless LANs focuses on the design, planning, implementation, operation, and troubleshooting of Wireless LANs and bridging.

CH: 1

PR: INFO 2100

3200 Networking Systems II is a continuation of the more advanced

features of networking systems.

CH: 2

PR: INFO 2200

3301 Introduction to Programming is an introduction to the fundamentals of structured programming. Topics include: algorithms, program structures, software design methodology, language constructs, data file basics, and abstract data types.

CH: 2

CR: the former INFO 3300

PR: INFO 2100

3310 Windows Programming is a study of the fundamental elements of programming in a Windows environment. Topics will include: building a Windows Graphical Interface and the introductory concepts of object-oriented programming.

CH: 2

PR: INFO 3330

3315 Introduction to Databases is the study of the effective use of databases, including design and implementation, and their use in addressing a business data problem.

CH: 1

CR: the former INFO 3400

PR: INFO 1000

3320 Programming with Databases is a study of applications basics, basic data types, understanding objects and collections, coding for events, writing RDBMS, controlling programs, testing and debugging the application, run-time errors, and distributing the application.

CH: 2

PR: INFO 3310 and INFO 3315

3330 Object Oriented Programming is an introduction to object-oriented programming. Topics include: encapsulation, information hiding, inheritance and polymorphism.

CH: 2

PR: INFO 3301

3350 Introduction to SQL provides an overview of data server technology and SQL programming language. Topics include creating and maintaining database objects including storing, retrieving and manipulating data. The course will teach how to write SQL script files to generate report-like output.

CH: 2

PR: INFO 3315

3360 Relational Database Administration provides a firm foundation in basic database administrative tasks. The course offers a conceptual understanding of database architecture and how the architectural structures work and interact. Topics include creating an operational database and properly managing its various structures in an effective and efficient manner.

CH: 2

PR: INFO 3350

3370 Relational Database Forms and Reports will teach developing and deploying applications using forms and reports. Topics include customizing

forms through user input items and controlling data access through the creation of event-related triggers for connectivity to an SQL server.

CH: 2

PR: INFO 3360

3431 E-commerce and Intranet is an examination of the elements that define e-commerce and Intranet applications. Major elements are the concept, design and construction of web-based data applications involved in both commerce transaction processing and internal resource databases.

CH: 2

CR: the former INFO 3430

PR: INFO 2300

3440 Integrated Business Solutions is an introduction to the techniques involved in analysing a company's information technology needs, and designing a customized solution.

CH: 1

PR: INFO 3431

3450 Networking Systems III is an advanced study of switching techniques and wide area networks.

CH: 3

PR: INFO 3200

3460 Network Security includes an introduction to network security and overall security processes with emphasis on security policy design, installation, configuration, and maintenance.

CH: 2

PR: INFO 2100 and 2600

4500 Case Study / Student Project is a comprehensive analysis of an assigned case. A written report will be required. Skills and knowledge developed throughout the program will be utilized in solving business-related problems. Using a case approach, students will work in teams to evaluate a company's IT resources and prepare a proposal for a solution that will meet the company's needs. A plan will be generated with suitable phases for implementing the solution. Evaluation will be based on effectiveness of the solution, demonstrated understanding of methodology and available technology, and the clarity, conciseness, and logic of the presentation style.

CH: 3

PR: Admission to Option 2 and successful completion of all other course work, or approval of the Director of the Division of Lifelong Learning, or delegate.

460W Work Term provides opportunities for students in the program to apply theories and skills learned in the classroom to workplace settings. As one component of the work term the student is required to complete a work report which should: analyse an issue/problem related to the student's work environment; demonstrate an understanding of the structure of a professional report; and show competence in written communication and presentation skills.

CH: 0

PR: Admission to Option 1 and successful completion of all other course work.

6 Personal and Professional Development

The Division of Lifelong Learning offers more than 150 courses/seminars/workshops per semester in general interest and professional development and more than 350 course titles available through e-learning. These offerings are non-credit in nature and there are no formal admission requirements. Program areas include communications, business, computer technologies, languages, marine, writing, the arts, and courses for children and youth. Instructors are drawn from the University and the community and are usually recognized for their achievements in their fields of instruction.

These offerings are an excellent continuing education service. They serve as a valuable introduction to the university setting for persons interested in pursuing diploma or certificate studies. General interest and professional development courses are generally offered on-campus during the Fall, Winter, and Spring semesters.

The Division also administers diploma and certificate programs that are outside of the mandates of other academic units. Certificate programs are short (6 to 10 courses) ranging from being comprised of all degree credit courses to being comprised of all certificate credit courses, or some combination of the two. Certificate programs are offered in business administration, municipal administration, public administration, criminology, Newfoundland studies, and library studies. Certificate programs are available through distance education.

The Division offers customized corporate education and training to help business, industry, and public sector agencies achieve their business objectives. It works with clients to identify their professional development needs, customize the appropriate training and materials, and deliver and evaluate the seminars and workshops.

Further information on courses or programs administered by the Division of Lifelong Learning may be obtained by contacting the Division in writing to the Division of Lifelong Learning, Memorial University of Newfoundland, St. John's, NL A1C 5S7, or by telephone to (709) 864-7979, or by fax to (709) 864-8486, or by e-mail at lifelong.learning@mun.ca, or through the website at www.mun.ca/lifelonglearning.
