

ATLANTIC ALGEBRA CENTRE

“Combinatorial Theory of Groups and Hopf Algebras”

Mini-conference associated with the
SCIENCE ATLANTIC
Mathematics, Statistics and Computer Science Conference 2012

October 14, 2012
Sackville, NB, Canada

First announcement

Mini-conference “Combinatorial Theory of Groups and Hopf Algebras” is organized by Atlantic Algebra Centre (Director – Yuri Bahturin) as a follow-up of Science Atlantic Mathematics, Statistics and Computer Science Conference 2012 to be held at Mount Allison University in Sackville, NB, on October 12 - 13, 2012. There will be approximately 10 talks during the mini-conference. Because of the time constraints, the conference will start early in the morning on Sunday, October 14 and ends in the afternoon of the same day. The schedule of the conference will include three plenary talks, several mid-size talks and shorter presentations.

The plenary talks will be given by Alexander Olshanskii of Vanderbilt University, Olga Kharlampovich of City University of New York and Alexei Myasnikov of Stevens Institute of Technology. The details of these talks will be announced later.

Please write to Atlantic Algebra Centre (aac at mun.ca) if you are willing to participate in the mini-conference. Please indicate your affiliation, and if you are willing to speak, the title and a short abstract of your talk. If you are a full time student in a university of Atlantic Canada, you may apply for some support from AAC. For this, we will need a recommendation of your supervisor.

The Science Atlantic Mathematics, Statistics and Computer Science Conference 2012 provides an interesting program on the previous days. Please visit the web site of the Conference for the complete information at <http://scienceatlantic.ca/ocs/mscs/index.php/2012/mscs2012>.

To participate in the program of the Science Atlantic Mathematics, Statistics and Computer Science Conference 2012, you will need to register on the above web site. You will also find other important information, especially about the accommodation, which should be reserved well in advance.
