

HUMAN BIOSCIENCES

Listed below is a suggested sequence of courses for a Major or Honours in Human Biosciences. Information is also provided for the Minor. Students should complete the required prerequisite First Year courses with at least a 60% overall average prior to declaring their major. These prerequisites include at least one Critical Reading and Writing (CRW) course that is an English course.

*For students who take CHEM 1010 in the Fall and CHEM 1050 in the Winter, it is strongly recommended that CHEM 1051 be completed before beginning second year. Students are able to register for CHEM 2400 while doing CHEM 1051 (if necessary).
** Students completing MATH 1090 in the Fall should complete MATH 1000 in the Winter.

HONOURS INFORMATION	Students in Honours standing must have a minimum grade of "B" or an average of 75% in all required Human Biosciences courses <small>(as specified under clause 2 of <i>Graduation Requirements, Academic Standing in the Degree Regulations</i> for the Honours Degree of Bachelor of Science; this also excludes first year courses)</small>		
CONCENTRATION <i>for Majors / Honours students only</i> (choose 15 credit hours) ^C Students may select courses in one of the following concentrations which will be noted on the student’s transcript. These courses may be used for electives or HUBI 3xxx / 4xxx courses listed above.

MINOR (stipulated course prerequisites also apply to a minor in Human Biosciences)			
For a minor in Human Biosciences, students must complete: a. Human Biosciences 2001, 2002, 2003, 2004. b. Twelve credit hours in Human Biosciences courses 3xxx or 4xxx.			

Note: (1) The University Calendar defines the requirements for your degree. It is your responsibility to ensure you are following the requirements as per the Calendar.
(2) Electives must be completed to give a total of at least **78** credit hours in science courses and a total of **120** credit hours in order to receive a degree.
