EDUCATION

Memorial University of Newfoundland and Labrador

Joint BS and BA

St. John's, NL

Expected Graduation Date: May 2024

- Currently pursuing a Joint Bachelor of Arts and Bachelor of Science in Economics and Statistics.

WORK EXPERIENCE

The Fund, Memorial University of Newfoundland and Labrador

Analyst

St. John's, NL

September 2023- Present

- Conduct financial market analysis to produce investment proposals for Memorial University's student-led investment portfolio. A long-term, value-focused fund with assets under management exceeding CA\$325,000.
- Generate Discounted Cash Flow models to produce current and predict future values of various companies.

Dept. of Economics, Memorial University of Newfoundland and Labrador

Research Assistant, Stephen Jarislowsky Chair

St. John's, NL

September 2023- Present

- Assist Dr. Tony Fang in his research into the recruitment and retention of immigrants and international students in Newfoundland and Labrador.
- Publish summary reports of employer interviews, surveys and other statistical sampling on improving labour force participation and labour market outcomes of under-represented groups in the provincial 'Natural Resources' sector.

House of Assembly, Government of Newfoundland and Labrador

Page, Office of The Speaker

St. John's, NL

April 2022- Present

- Assist the Speaker, Members of the House of Assembly, Law Clerks and other Table Officers when the House is in session.
- Collect motions, member and ministerial statements and deliver them to the House Clerk. Upload petitions, motions, bills and (if passed) acts to the House of Assembly archive: Hansard.
- Handle written and verbal communication between Members, Ministers and the Speaker.

Department of Finance, Government of Newfoundland and Labrador

Student Economic Analyst, Economics and Statistics Division

St. John's, NL

May 2023- September 2023

- Analyzed trends including employment, earnings, GDP and other economic indicators in the provincial 'High-Technology' sector, between 1990 and 2022, for an extensive report that will be published in the Provincial Government's 2024 budget.
- Authored a brief economic outlook report of the potential 'Wind-Hydrogen' industry in the province, that will be published in the Provincial Government's Fall 2023 Economic Update.
- Proofed and published several notes and bulletins related to population projections, oil production, retail sales, urban housing starts, new motor vehicle sales, consumer price index and labor market trends in Newfoundland and Labrador.
- Updated the 'Current State of the Economy' document regularly, with new data released by Statistics Canada, various banks, Canada Mortgage and Housing Corporation (CMHC) and Canada-Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB). This document was sent directly to the Minister and Deputy Minister of Finance.

Glenn Roy Blundon Centre, Memorial University of Newfoundland and Labrador

Exam Invigilator

St. John's, NL

September 2019- April 2022

- Invigilated 80 hours in examinations per semester, including one-on-one and group settings, to further Memorial's mission of making education accessible to all.
- Performed Reader/Scribe duties for students facing barriers related to mobility, ways of learning, vision and hearing, mental health and wellness.

Office of Public Engagement, Memorial University of Newfoundland and Labrador

Operations Management Assistant

St. John's, NL

October 2019- April 2020

- Analysed business requirements from administrators, editors, and publishers of Newfoundland Quarterly to update user database from Smartsheet to a specialised Database Management System.
- Generated cost-benefit analysis reports on various vendors providing Subscription Management Softwares to find an appropriate fit for the requirements of the Office of Public Engagement.
- Evaluated all projects funded by the Office of Public Engagement between 2014 and 2019 by contacting recipients of the OPE Accelerator Grant, to analyse trends in project success and sustained impact to assess future funding requests.
- Concluded that educational projects in rural Newfoundland and Labrador and environmental conservation projects had the highest rate of continued impact of over 60% and 80% respectively.
