Chemistry Departmental Seminar 490 B

Saturday, March 23, 2019, 9:00 a.m.
Room C4011 (Chemistry/Physics Building)

Each participant, listed below, will give a 15 minute presentation on the topic of their Honours project followed by a 5 minute question period.

Ryan Warren (G. Bodwell)

"Progress Towards the Synthesis of a Sinusoidal Pyrenophane"

Christopher Qiu (Y. Zhao)

"DFT Investigations of the Mechanism of C-Si/B-Br Exchange Reaction"

Dean Nash (P. Warburton)

"The Effects of Electron Donating and Withdrawing Groups on the Hydrolytic Deamination of Cytosine: A Computational Analysis."

Kirkland Lockyer (G. Bodwell)

"Progress Towards the Synthesis of (4s,5s)-4,5-dihydroxy[8](2,7)pyrenophane"

Shae-Lynn Lahey (C. Rowley)

"Membrane Permeability of Gasotransmitters"

Alejandro Forigua (E. Merschrod)

"Vibrational and Crystallographic Study of Calcium Phosphates (Ca/P)"

Katie Brown (E. Merschrod)

"Mapping Vitamin A in the Retina"
