

FALL 2018
COURSE OUTLINE AND COURSE GUIDE – WORK TERM 2

CRITICAL DATES:

Monday, August 20, 2018	Fall Work Term Begins. Complete Work Term Confirmation online in MyMUNLife
Friday, September 7, 2018	Deadline for submission of Work Term Objectives
Friday, October 5, 2018	Deadline for submission of Work Report Outline
Wednesday, December 19, 2018	Fall Work Term ends and deadline for submission of the evaluation forms and communication component documents. Note: if mailing the forms/report, the postmark date will be recorded as the received date.
Thursday, January 3, 2019	Academic courses begin for Winter Semester

STATEMENT OF EXPECTATIONS OF STUDENT CONDUCT

Like Professional Engineers, engineering students are expected to behave in a professional manner at all times. Students are encouraged to conduct themselves in a manner consistent with the PEG-NL code of ethics. MUN has two sets of rules to address inappropriate behaviour by students, one pertains to academic offences and the other to non-academic offences. Both sets of rules can be found in the University Calendar under Regulations. It is strongly recommended that students read and follow these rules because the penalties can be severe, the severest being expulsion from the University.

IMPORTANCE OF WORK TERM CONFIRMATION FORM

The Co-op Office depends on your Work Term Confirmation Form to confirm that you have arrived safely at work and for all means of contact while you are on your work term. It is **extremely important** that you complete this form online in MyMUNLife. If you have limited access to the internet, you may submit it via email or fax. Without it, we cannot enter your placement information in our database and you and your employer will be missed in the distribution of critical information. **Please see that this form is completed within a couple of days of starting work.** If any of the information changes during the term, please notify your Academic Staff Member (ASM) – Co-operative Education.

USE OF THE INTERNET THROUGH ACCESS PROVIDED BY EMPLOYERS

As you are aware, many organizations provide Internet access to their employees as well as to their work term students. These organizations often have specific policies governing Internet usage, including policies

for personal use. All aspects of Internet usage would normally be explained during your orientation to the job, typically during the first few days at work.

You may be required to sign statements in which you agree to follow the organization's policies in this area. It is particularly important to understand all clauses that you sign and agree to follow, as well as to fully understand their guidelines and procedures regarding personal use of the Internet. You can also expect that the employer will monitor your usage of the Internet over the duration of the work term.

If employers do not address this issue during initial orientation, we strongly suggest that you ask your supervisor for specific guidance.

If you have any questions or require additional information on this issue, please contact one of the ASMs.

COURSE DESCRIPTION: ENGINEERING 002W

Engineering Work Term 2 requires students, under supervision, to contribute positively to the engineering and problem solving processes practised in the work environment. They are expected to set objectives, take direction, work independently as required, learn professional behaviours, and function as effective team members. An ability to investigate work-related concepts should be demonstrated. Students should become better familiarized with the use of engineering tools, data analysis, prioritization of assignments, and effective communication of technical information.

LEARNING OUTCOMES/ SKILLS EXPECTATIONS

The learning outcomes for Work Term 2 are identified below. These are skills that students are expected to develop throughout the work term, and will be evaluated at the end of the semester. The Work Term 2 expectations for these skills are described. Note that the expectations generally increase with each work term.

Initiative: Take independent action in completing assigned tasks, and show motivation in seeking new work

Organization and Planning: Prioritize work assignments based on their importance, and plan and use time efficiently and productively to complete work

Quality of Work: Produce good quality work with few errors, checking own work with minimal assistance

Productivity: Independently learn new material to consistently complete an assigned amount of work on time

Written Communication: Communicate ideas and information in writing clearly, concisely, and in an organized way, with some review and editing required

Verbal Communication: Verbally express ideas and information clearly, concisely, and in an organized way, with minimal clarification required; comfortable speaking to small group

Work Independently: Work independently on assigned tasks and projects, taking direction and seeking assistance as required

Teamwork: Be an effective team member by working collaboratively and cooperatively with others and assuming responsibility for tasks

Problem Solving: Contribute to engineering problem analysis and solution generation

Project, Change, and Risk Management: Demonstrate understanding of project management techniques and incorporate into work as instructed

Safety, Society, and Environment: Understand the purpose of safety procedures, and demonstrate safe work practices

Ethics and Integrity: Demonstrate knowledge of ethical standards, ethical issues, and ethical decision-making, and display honesty and fairness in interactions with others

Diversity, Inclusion, and Equity: Appreciate and identify diversity, inclusion, and equity-related implications in the workplace, demonstrating respect for individual differences

Adaptation to Organization's Rules and Policies: Recognize, understand, and follow an organization's rules and policies, with minimal guidance

Response to Supervision: Openly accept direction and feedback and respond positively, incorporating feedback into work as required

Dependability: Gain the trust of others by being reliable and consistent in completing work and in meeting commitments, while demonstrating a very good work ethic

PLAGIARISM

Plagiarism is a serious academic offence at Memorial University. Cases involving suspected plagiarism in a student's work term communication component will be addressed as per the Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies, stated in the University Regulations section of the Memorial University Calendar.

WORK TERM EVALUATION

The work term will be evaluated on the basis of the communications and performance components, as described below.

Note that the evaluation for each of the communications component and the work term performance will appear on the transcript.

1) Communications Component

One of the best tools available to faculty to ensure that students approach the work term with awareness, and not just consider it another job, is the requirement for the communications component. Through the experience of preparing a technical report or presentation and having it evaluated, strong communication skills that will be very beneficial for the student's future, are developed.

The communications component for Work Term 2 is a descriptive technical report. Students are also expected to keep a Job Diary and have it available for review during monitoring, but it need not be submitted. Additional documents or presentations may be required by the employer. The descriptive technical report should describe a technical process, project, procedure or investigation

chosen from the student's work environment. Guidelines for the preparation of a descriptive technical report are provided in Appendix K of the Engineering Student Co-op Handbook at <http://www.mun.ca/coop/programs/engineering/>. The report should be submitted or postmarked no later than the last official day of the work term as shown in the University Calendar.

The written report is intended to develop the following skills:

- the ability to research the subject appropriately, to conduct the necessary analysis, and to effectively substantiate conclusions and recommendations;
- the ability to summarize findings and communicate, in writing or orally, in a professional manner; and
- the ability to apply concepts learned in the academic environment to learning objectives in the work environment.

Work Report Evaluation

The work report will be evaluated by an ASM or delegate. Evaluation will result in one of the following classifications:

a) ***Outstanding*** - the report quality is exceptional; there is clear evidence of the following:

- comprehensive knowledge of the subject matter and principles treated in the report
- high degree of originality and independence of thought
- superior ability to organize and critically analyze information
- outstanding ability to communicate
- good document planning
- outstanding effort put into report production

To be considered Outstanding the report should have:

- all required sections of the report complete, including letter of submittal, summary and references
- very few spelling, grammar and word processing errors
- a professional presentation
- technical content verified by employer

b) ***Above Expectations*** - the report should be of good quality with evidence of:

- substantial knowledge of the subject matter
- moderate degree of originality and independence of thought
- good ability to organize and analyze information
- ability to communicate clearly and fluently
- good document planning
- substantial effort put into report production

c) ***Satisfactory*** - the report should meet minimum requirements with evidence of:

- acceptable knowledge of the subject matter
- some ability to organize and analyze information
- ability to communicate adequately

- acceptable document planning
 - acceptable effort put into report production
- d) ***Marginal Pass*** - the report should, as a minimum, demonstrate evidence of:
- adequate knowledge of the subject matter
 - adequate ability to organize and analyze information
 - adequate ability to communicate
 - adequate document planning
 - adequate effort put into work report production
- e) ***Fail*** - the report is unacceptable showing evidence of one or more of:
- inadequate knowledge of the subject matter
 - failure to complete required work
 - inability to organize and analyze information
 - inability to communicate
 - inability to plan the production of descriptive technical report
 - inadequate effort put into report production

2) **Work Term Performance**

The key ingredient to a successful work term is the student's ability or openness to learn and/or further develop work related skills. These skills are listed in the Learning Outcomes / Skills Expectations section above.

Within the first three weeks of the work term, the student in consultation with his/her supervisor will establish performance and personal objectives for the work term. This should also include identification of skills necessary for the student to develop in order to perform the duties and responsibilities of his/her position. The objective is that through the process, the student will acquire new skills which will be reflected in the workplace.

Performance Evaluation

The work term performance will be based upon an ASM's assessment of the employer's evaluation, information gathered from contact with the student, employer, and others in the workplace, and timely receipt of all work term documentation by established deadlines. The ability to plan to meet deadlines is essential to a professional engineer.

Evaluation of the work performance will result in one of the following classifications:

- a) Outstanding
- b) Above Expectations
- c) Satisfactory
- d) Marginal Pass
- e) Fail

A student receiving a grade of "Marginal Pass" will be identified for follow-up and close monitoring in subsequent work terms.

3) Overall Work Term Evaluation

The overall evaluation of each work term will be based upon the written document or equivalent and work term performance and will result in one of the following grades recommended:

- a) ***Pass with Distinction*** - To receive a recommendation of ***PASS WITH DISTINCTION*** a student needs to obtain an evaluation of **OUTSTANDING** in both the communications and work performance components of the work term.
- b) ***Pass*** - To receive a recommendation of ***PASS*** a student must achieve an evaluation of **MARGINAL PASS** or better in the communication component and in the performance component of the work term.
- b) ***Fail*** - A student receiving a ***FAIL*** in either or both the communication and performance components of the work term will receive a recommendation of ***FAIL***.

All evaluation documents are due at the end of the work term as listed in the critical dates. You should keep copies of these for your personal records, and mail the originals.

CONTACT DURING THE TERM

On most of your work terms, you will be interviewed on-site by an ASM or faculty member. The Co-op Office combines this activity with an ongoing program of marketing co-operative education to potential employers. Since these on-site visits are scheduled throughout the term, if questions arise early in the work term, you should contact the Co-op Office.

The Work Term confirmation information entered in MyMUNLife by students during the first week of work will allow us to communicate with you and your supervisor during the term. If you feel it will be helpful to your ASM when he/she comes to your office, please include a location sketch.

WORK TERM AWARDS

We encourage all students to give their best effort to all aspects of the work terms, which usually present many opportunities to examine the role and contribution of professional engineering to society. The chance to compare theory from the classroom with practice in the field can be very rewarding.

Work Term awards are an incentive for students to give their best effort each semester and are a way for employers to recognize their students. Employers are encouraged to nominate exceptional students in a variety of awards each semester.

Please refer to the Engineering Student Co-op Handbook for details on awards that may be relevant to you.

CONFIDENTIAL REPORTS

ASMs have the responsibility for recommending promotion decisions to Faculty Council, including the mark for the technical report. When sensitive or proprietary information is involved, the **non-disclosure** form should be completed. Students should discuss their work report topics with their supervisors early in the term and determine if any of the material is confidential.

LATE REPORTS & DOCUMENTS

As students progress through the Engineering program they learn that meeting deadlines is part of the role of a professional engineer. In the case of reports and to some extent other work term documents, students should realize there are really two clients involved - the employer and the university, with responsibilities to both. Students are often challenged to meet the expectations of both these clients and this is a further measure of their ability to manage time and resources.

Faculty depends on evaluation input from supervisors, with the last two weeks of work being a convenient time for the completion of these documents. You should make an effort to discuss your report and performance during that time. The timely submission of all work term documents is taken into consideration in the performance evaluation. Receipt of the report and evaluation documents allows the Engineering Co-operative Education Office to complete overall evaluations and meet the Registrar's deadline for submission of grades.

It is suggested that you submit a final version of the report to your supervisor at least two weeks before the work report deadline. After the report is checked and cleared for propriety information you should mail, or deliver it to us. The absolute deadline is the published end date of the work term, after which reports are considered **late**.

EXIT INTERVIEWS

Students are strongly encouraged to spend two successive work terms with each employer. We have found that the student and the employer gain the most from the co-operative education experience with back-to-back work terms. It also helps to demonstrate that you can develop a sense of commitment to an employer.

At the end of the work term, you should endeavour to arrange an exit interview with your employer in order to review the work term and discuss prospects for your next work term. This would normally include both your supervisor and a representative of the employer's human resources staff.
