

# Department of Economics: Visiting Speaker Series

## "Can Energy Resource Exports Propel Canada into Being a World Economic Leader?"

The talk will be a brief history of the last energy price cycle, highlighting what we have learned about Canada's appetite for regions to advance their interests through energy exports. Dr. Emery will talk about the challenges of managing the success so it can last. He will speculate on whether energy resources will be an engine of growth in the future or something that will be limited in its potential with the politics of decarbonization.

Friday, Nov. 4, 2016

3:00pm – 4:30pm

Room A2065

Arts and Administration Building

This event is presented by the Department of Economics.

**DR. HERB EMERY**

**UNIVERSITY OF NEW BRUNSWICK**

*An advisor to federal and provincial policymakers, Dr. Herb Emery focuses his research on the development of the Canadian economy and the persistence of long-standing regional disparities. Aside from understanding the economic fundamentals of growth in a small open economy, Dr. Emery's work incorporates political, historical, cultural and other institutional factors that have shaped Canadian development processes.*
