

## Blue Box Seminar Series

Department of Geography

PRESENTS:

### *“Digitalization and the new geography of mining”*

#### *Synopsis*

*“Digitalization is the use of digital technologies (computers, related software, the Internet, etc.) to change a business model and provide new revenue and value-producing opportunities.*

*In the **mining** sector, digitalization is affecting where, how, and by whom work is done, and therefore a new geography of mining is emerging. The seminar will explore this new geography and its implications with a particular focus on experience in Australia and Canada.”*

#### **Dr. Keith Storey**

Honorary Research Professor, Department of Geography,  
Memorial University

**Friday, November 24, 15:00-16:00 h, SN-2025**
