

Weekly Plumbed Eyewash and Shower Station Inspection Form

Weekly Inspection Procedure:

- 1. Ensure area around units are free of obstructions;
- 2. Ensure eyewash/shower sign is affixed in plain view above unit;
- 3. Visually inspect the eyewash and shower to ensure that there are no broken parts, leakage etc;
- 4. Activate the eyewash station and verify the flow of water is even and, if applicable, the removal of caps or shields located over the eyewash outlets does not require a separate motion once the unit is activated;
- 5. Verify the eyewash unit remains activated without use of operator's hand during the inspection;
- 6. Activate shower unit(s) at least weekly. Ensure that the water flow is effective and continuous.
- 7. Operate eyewash and shower units for a period long enough to verify operation and ensure that flushing fluid is available.
- 8. Once inspection is complete sign and date;
- 9. Maintenance issues? Note on form and contact:

HSC: Contact 864-6424 or email: pdjones@mun.ca
