

DO YOU KNOW WHAT THE NEW SYMBOLS MEAN?

HAVE YOU LEARNED ABOUT WHMIS 2015?

The Workplace Hazardous Materials Information System (WHMIS) is a comprehensive system for safe management of hazardous chemicals.

WHMIS has two key parts:

1. Classification of chemicals
2. Communication of chemical hazard information
 - Labels on containers
 - Safety data sheets
 - Education about WHMIS and controlled products

In 2015, WHMIS was updated as part of the Globally Harmonized System (GHS) created by the United Nations. There are new symbols and requirements.

Has your training been updated?
