### STUDENT EVALUATIONS OF TEACHING

In this class we worked together, teacher and students, to learn from each other. This class was exactly what I needed to gain the energy to stay in school. I have a new outlook on learning. I also learned that there are some instructors at the University of Minnesota that are excited about what they teach.

This class overall was excellent and I learned some very important leadership stuff. I would recommend this class to anyone who wants to become a better leader whether for outdoor activities or as a leader in general.

I have learned an awful lot in this class and the nice thing is, is that with some of your experiential teaching methods, everything came so easy. I have problems with my attention span so usually a class can't keep my attention long enough for me to learn anything, but you did.

I have loved the opportunity and experience of leading that I have received. I have become a more confident leader who is aware of all of the parts of effective leadership.

I want to thank you for your energy, and intense interest in both the material and your students. You will serve as a teaching model for myself and others for years to come.

TA is a great instructor, she has an excellent rapport with all her students. She's always enthusiastic and helpful; very accommodating and flexible to different student's learning styles.

I want to thank the Memorial University for providing instructors like TA Loeffler. I liked her teaching manner. The class was better than many classes because it was presented with a hands on approach.

This class will stand out as an example of experiential education and effective teaching in my mind for future application. I appreciated that students could take the assignments and challenge themselves to any level.

The professor was excellent. She used anecdotes, challenging group projects and practical assignments to get her points across. She promoted an atmosphere conducive to every type of learner.

I can honestly say that this probably--no most definitely--one of the best courses I have taken in this program. We learned more in this course than in any other. You have an excellent philosophy on teaching and a unique style of teaching and you genuine care about students.
