Cisco Unified IP Phone Guide for Cisco Unified Communications Manager 8.0 (SCCP and SIP)

Softkey Definitions

**Common Phone Tasks**
- View online help on the phone: Press ?.
- Place a call: Go off-hook before or after dialing a number.
- Redial a number: Press Redial. Or press the Navigation button while on-hook to see your Placed Calls log.
- Switch to the handset during a call: Pick up the handset.
- Switch to the speaker or headset during a call: Press 1 or 2, then hang up the handset.
- Mute your phone: Press 0.
- Use your call logs: Press EditDial to choose a call log. To dial, highlight a listing and go off-hook.
- Edit a number: Press EditDial, << or >>.
- Hold/resume a call: Press Hold or Resume.
- Transfer a call to a new number: Press Transfer, enter the number, then press Transfer again.
- Place an intercom call: Press intercom button, enter a number if necessary, and speak after you hear the tone.
- Start a standard (ad hoc) conference call: Press more > Confrn, dial the participant, then press Confrn again.

**Quick Reference**

- **AbbrDial**: Dial using a speed dial index number
- **Answer**: Answer a call
- **Back**: Return to previous Help topic
- **Barge**: Add yourself to a call on a shared line
- **CallBack**: Receive notification when a busy extension becomes available
- **Cancel**: Cancel an action or exit a screen without applying changes
- **cBarge**: Add yourself to a call on a shared line and establish a conference
- **CFwdALL**: Set up/cancel call forwarding
- **Clear**: Delete records or settings
- **Close**: Close the current window
- **ConfrnList**: View conference participants
- **Confrn**: Create a conference call
- **Delete**: Remove characters to the right of the cursor when using EditDial
- **Details**: Open the Details record for a multiparty call in the Missed Calls and Received Calls logs
- **Dial**: Dial a phone number
- **DND**: Turn on/off Do Not Disturb (DND)
- **EditDial**: Edit a number in a call log
- **EndCall**: Disconnect the current call or the current intercom call
- **Erase**: Reset settings to their defaults
- **Exit**: Return to the previous screen
- **GPickUp**: Answer a call that is ringing in another group or on another line

Finding Additional Information

You can access the most current Cisco Unified IP Phone documentation on the World Wide Web at this URL:
You can access the Cisco website at this URL:
http://www.cisco.com/
You can access the most current Licensing Information at this URL:

Accessing Cisco Unified IP Phone 7900 Series eLearning Tutorials

(SCCP phones only)

Cisco Unified IP Phone 7900 Series eLearning tutorials use audio and animation to demonstrate basic calling features. You can access eLearning tutorials online (for several phones) from your personal computer. Look for the eLearning tutorial (English only) for your phone in the documentation list at the following location:

Note Although an eLearning tutorial may not be available for your specific Cisco Unified IP Phone, refer to any of the Cisco Unified IP Phone 7900 Series eLearning tutorials for an overview of common IP phone features and functionality.

Safety and Performance Information

Refer to these sections for information about the impact of power outages and other devices on your Cisco Unified IP Phone.

Power Outage

Your accessibility to emergency service through the phone is dependent on the phone being powered. If there is an interruption in the power supply, Service and Emergency Calling Service dialing will not function until power is restored. In the case of a power failure or disruption, you may need to reset or reconfigure equipment before using the Service or Emergency Calling Service dialing.
Using External Devices
When you use external devices with the Cisco Unified IP Phone, Cisco recommends the use of good-quality external devices, such as headsets, that are shielded against unwanted radio frequency (RF) and audio frequency (AF) signals.

Depending on the quality of these devices and their proximity to other devices such as mobile phones or two-way radios, some audio noise may still occur. In these cases, Cisco recommends that you take one or more of these actions:

- Move the external device and the cables away from the source of the RF or AF signals.
- Use shielded cables for the external device, or use cables with a better shield and connector.
- Shorten the length of the external device cable.
- Apply ferrites or other such devices on the cables for the external device.

Cisco cannot guarantee the performance of the system because Cisco has no control over the quality of external devices, cables, and connectors. The system will perform adequately when suitable devices are attached using good quality cables and connectors.

Caution
In European Union countries, use only external speakers, microphones, and headsets that are fully compliant with the EMC Directive [89/336/EC].

Cisco Product Security Overview
This product contains cryptographic features and is subject to United States and local country laws governing import, export, transfer and use. Delivery of Cisco cryptographic products does not imply third-party authority to import, export, distribute or use encryption. Importers, exporters, distributors and users are responsible for compliance with U.S. and local country laws. By using this product you agree to comply with applicable laws and regulations. If you are unable to comply with U.S. and local laws, return this product immediately.

Further information regarding U.S. export regulations may be found at http://www.access.gpo.gov/bis/ear/ear_data.html.

Accessibility Features
The Cisco Unified IP Phone 7900 Series provides accessibility features for the vision impaired, the blind, and the hearing and mobility impaired.

For detailed information about the features on these phones, see Accessibility Features for the Cisco Unified IP Phone 7900 Series.

You can also find more information about accessibility at this Cisco website:
http://www.cisco.com/web/about/responsibility/accessibility/index.html
Connecting Your Phone

Your system administrator will likely connect your new Cisco Unified IP Phone to the corporate IP telephony network. If that is not the case, refer to the graphics and table below to connect your phone.

1 DC adaptor port
2 AC-to-DC power supply
3 AC power cord
4 Network port
5 Access port
6 Handset port
7 Headset port
8 Footstand button
9 Auxiliary port
Removing the Hookswitch Clip (Required)
Some phones ship with a clip to secure the hookswitch. Before you use your phone, remove the hookswitch clip (if present) from the cradle area. With the clip removed, the hookswitch lifts slightly when you pick up the handset.

Adjusting the Handset Rest (Optional)
Cisco recommends adjusting the handset rest, particularly when wall mounting the phone, as this will ensure that the receiver will not readily slip out of the cradle. See the table below for instructions.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Set the handset aside and pull the square plastic tab from the handset rest.</td>
</tr>
<tr>
<td>2</td>
<td>Rotate the tab 180 degrees.</td>
</tr>
<tr>
<td>3</td>
<td>Slide the tab back into the handset rest. An extension protrudes from the top of the rotated tab. Return the handset to the handset rest.</td>
</tr>
</tbody>
</table>

Adjusting the Footstand (Optional)
To change the angle of the phone base, adjust the footstand while pressing the footstand button.
Registering with TAPS

After your phone is connected to the network, your system administrator may ask you to auto-register your phone using TAPS (Tool for Auto-Registered Phones Support). TAPS may be used for a new phone or to replace an existing phone.

To register with TAPS, pick up the handset, enter the TAPS extension provided by your system administrator, and follow the voice prompts. You may need to enter your entire extension, including the area code. After your phone displays a confirmation message, hang up. The phone will re-start.

Using a Headset

You can use a wired headset with your Cisco Unified IP Phone. If you use a Cisco Unified IP Phone 7962G or 7942G, you can use a wireless headset in conjunction with the wireless headset remote hookswitch control feature.

Headset Support

Although Cisco Systems performs limited internal testing of third-party headsets for use with the Cisco Unified IP Phones, Cisco does not certify or support products from headset (or handset) vendors.

Cisco recommends the use of good quality external devices, for example, headsets that are screened against unwanted radio frequency (RF) and audio frequency (AF) signals. Depending on the quality of these devices and their proximity to other devices such as mobile phones and two-way radios, some audio noise or echo may still occur. An audible hum or buzz may be heard by either the remote party or by both the remote party and the Cisco Unified IP Phone user. Humming or buzzing sounds can be caused by a range of outside sources: for example, electric lights, electric motors, or large PC monitors. See Using External Devices, page 3, for more information.

Note

In some cases, hum may be reduced or eliminated by using a local power cube or power injector.

These environmental and hardware inconsistencies in the locations where Cisco Unified IP Phones are deployed means that there is not a single headset solution that is optimal for all environments.

Cisco recommends that customers test headsets in their intended environment to determine performance before making a purchasing decision and deploying en masse.

Audio Quality Subjective to the User

Beyond the physical, mechanical and technical performance, the audio portion of a headset must sound good to the user and to the party on the far end. Sound quality is subjective and Cisco cannot guarantee the performance of any headsets. However, a variety of headsets from leading headset manufacturers have been reported to perform well with Cisco Unified IP Phones. See manufacturer’s sites for details.

For Cisco Unified IP Phone 7962G or 7942G: To find information about wireless headsets that work in conjunction with the wireless headset remote hookswitch control feature on your phone, see: http://www.cisco.com/en/US/partner/prod/voicesw/ucphone_headsets.html
An Overview of Your Phone

Cisco Unified IP Phones are full-feature telephones that provide voice communication over the data network that your computer uses, allowing you to place and receive phone calls, put calls on hold, transfer calls, make conference calls, and so on.

In addition to basic call-handling features, your phone can provide enhanced productivity features that extend your call-handling capabilities. Depending on the configuration, your phone supports:

- Access to network data, XML applications, and web-based services.
- Online customizing of call features and services from your Cisco Unified CM User Options web pages.
- A comprehensive online help system that displays information on the phone screen.

Understanding Buttons and Hardware

To identify buttons and hardware on your phone, refer to the graphics and table below.
Cisco Unified IP Phone 7942G

Cisco Unified IP Phone 7941G and 7941G-GE
<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
<th>For more information, see...</th>
</tr>
</thead>
</table>
| 1    | Programmable buttons | Depending on configuration, programmable buttons provide access to:  
- Phone lines (line buttons) and intercom lines  
- Speed-dial numbers (speed-dial buttons, including the BLF speed-dial feature)  
- Web-based services (for example, a Personal Address Book button)  
- Call features (for example, a Privacy, Hold, or Transfer button)  
Buttons illuminate to indicate status:  
- Green, steady—Active call or two-way intercom call  
- Green, flashing—Held call  
- Amber, steady—Privacy in use, one-way intercom call, DND active, or logged into Hunt Group  
- Amber, flashing—Incoming call or reverting call  
- Red, steady—Remote line in use (shared line, BLF status or active Mobile Connect call) |

**Understanding Lines and Calls**

To avoid confusion about lines and calls, refer to these descriptions:

Lines—Each line corresponds to a directory number or intercom number that others can use to call you. Your phone can support up to six lines, depending on your phone and configuration. To see how many lines you have, look at the right side of your phone screen. You have as many lines as you have directory numbers and phone line icons.

Calls—Each line can support multiple calls. By default, your phone supports four connected calls per line, but your system administrator can adjust this number according to your needs. Only one call can be active at any time; other calls are automatically placed on hold.
### Understanding Line and Call Icons

Your phone displays icons to help you determine the call and line state.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Line or Call State</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Phone Off-Hook" /></td>
<td>On-hook line</td>
<td>No call activity on this line.</td>
</tr>
<tr>

</table>
Understanding Phone Screen Features

This is what your main phone screen may look like with an active call.

1 Primary phone line Displays the phone number (directory number) for your primary phone line. When several feature tabs are open, the phone number and the time and date alternate display in this area.

2 Programmable button indicators Programmable buttons can serve as phone line buttons, intercom line buttons, speed-dial buttons, phone service buttons or phone feature buttons. Icons and labels indicate how these buttons are configured. For an icon reference, see “Phone Screen Icons” in the Quick Reference Card at the front of this guide.

3 Softkey labels Each displays a softkey function for the corresponding softkey button.

4 Status line Displays audio mode icons, status information, and prompts.

5 Call activity area Displays current calls per line, including caller ID, call duration, and call state for the highlighted line (standard view). See Understanding Lines and Calls, page 12, and Viewing Multiple Calls, page 26.

6 Phone tab Indicates call activity.

7 Feature tabs Each indicates an open feature menu. See Understanding Feature Buttons and Menus, page 15.

Cleaning the Phone Screen

Use only a soft, dry cloth to wipe the phone screen. Do not use any liquids or powders on the phone, as they can contaminate phone components and cause failures.
Understanding Feature Buttons and Menus

Press a feature button to open or close a feature menu.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Open or close a feature menu</td>
<td>Press a feature button:</td>
</tr>
<tr>
<td></td>
<td>[Phone Service] Services</td>
</tr>
<tr>
<td></td>
<td>[Directory] Directories</td>
</tr>
<tr>
<td></td>
<td>[Setting] Settings</td>
</tr>
<tr>
<td></td>
<td>[Help]</td>
</tr>
<tr>
<td>Scroll through a list or menu</td>
<td>Press the <strong>Navigation</strong> button.</td>
</tr>
<tr>
<td>Go back one level in a feature menu</td>
<td>Press <strong>Exit</strong>. Pressing Exit from the top level of a menu, closes the menu.</td>
</tr>
<tr>
<td>Switch between open feature menus</td>
<td>Press a feature tab. Each feature menu has a corresponding tab. The tab is visible when the feature menu is open.</td>
</tr>
</tbody>
</table>

Accessing the Help System on Your Phone

Your phone provides a comprehensive online help system. Help topics appear on the phone screen.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>View the main menu</td>

Understanding Feature Availability

Depending on your phone system configuration, features included in this Phone Guide may not be available to you or may work differently on your phone. Contact your support desk or system administrator for information about feature operation or availability.

You can access many features either by using a softkey or by pressing a line button. You can configure some features but your system administrator controls most of them.

Here are some details about using softkeys and line buttons to access features:

<table>

Understanding SIP vs. SCCP

Your phone can be configured to work with one of two signaling protocols: SIP (Session Initiation Protocol) or SCCP (Skinny Call Control Protocol). Your system administrator determines this configuration.

Call features can vary depending on the protocol. This Phone Guide indicates which features are protocol-specific. To learn which protocol your phone is using, you can ask your system administrator or you can choose > Model Information > Call Control Protocol on your phone.
Basic Call Handling

You can perform basic call-handling tasks using a range of features and services. Feature availability can vary; see your system administrator for more information.

Placing a Call—Basic Options

Here are some easy ways to place a call on your Cisco Unified IP Phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
<th>For more information, see...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Place a call using the handset</td>
<td>Pick up the handset and enter a number.</td>
<td>An Overview of Your Phone, page 8</td>
</tr>
<tr>
<td>Place a call using the speakerphone</td>
<td>Press and enter a number.</td>
<td>Using a Handset, Headset, and Speakerphone, page 51</td>
</tr>
<tr>
<td>Place a call using a headset</td>
<td>Press and enter a number. Or if is lit, press New Call and enter a number.</td>
<td>Using a Handset, Headset, and Speakerphone, page 51</td>
</tr>
<tr>
<td>Redial a number</td>
<td>Press Redial to dial the last number, or press the Navigation button (with the phone idle) to see your Placed Calls.</td>
<td>Using Call Logs, page 56</td>
</tr>
</tbody>
</table>
| Place a call when another call is active (using the same line) | 1. Press Hold.  
2. Press New Call.  
3. Enter a number. | Using Hold and Resume, page 23                                         |
| Dial from a call log              | 1. Choose > Missed Calls, Received Calls, or Placed Calls.  
2. Select the listing or scroll to it and go off-hook. | Using Call Logs, page 56                |

Tips

- You can dial on-hook, without a dial tone (pre-dial). To pre-dial, enter a number, then go off-hook by lifting the handset or pressing Dial, or

- When you pre-dial, your phone tries to anticipate the number you are dialing by displaying matching numbers (if available) from your Placed Calls log. This is called Auto Dial. To call a number displayed with Auto Dial, press the number, or scroll to it and go off-hook.
• If you make a mistake while dialing, press << to erase digits.
• If parties on a call hear a beep tone, the call may be monitored or recorded. Ask your system administrator for more information.
• Your phone may be set up for international call logging, which is indicated by a “+” symbol on the call logs, redial, or call directory entries. See your system administrator for more information.

### Placing a Call—Additional Options

You can place calls using special features and services that may be available on your phone. See your system administrator for more information about these additional options.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
<th>For more information, see...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Place a call while another call is active (using a different line)</td>
<td>1. Press for the new line. The first call is automatically placed on hold. 2. Enter a number.</td>
<td>Using Hold and Resume, page 23</td>
</tr>
<tr>
<td>Speed dial a number</td>
<td>Do one of the following:  • Press (a speed-dial button).  • Use the Abbreviated Dial feature.  • Use the Fast Dial feature.</td>
<td>Speed Dialing, page 36</td>
</tr>
<tr>
<td>Dial from a corporate directory on the phone</td>
<td>1. Choose &gt; Corporate Directory (name can vary). 2. Enter a name and press Search. 3. Highlight a listing and go off-hook.</td>
<td>Using Call Logs, page 56</td>
</tr>
<tr>
<td>Dial from a corporate directory on your personal computer using Cisco WebDialer</td>
<td>1. Open a web browser and go to a WebDialer-enabled corporate directory. 2. Click the number that you want to dial.</td>
<td>Using Cisco WebDialer, page 74</td>
</tr>
<tr>
<td>Use CallBack to receive notification when a busy or ringing extension is available</td>
<td>1. Press CallBack while listening to the busy tone or ring sound. 2. Hang up. Your phone alerts you when the line is free. 3. Place the call again. Note The CallBack feature is disabled on a Call Chaperone user’s Cisco Unified IP Phone when the calls are being chaperoned.</td>
<td>Your system administrator</td>
</tr>

<tr>
<td>Make a call from a mobile phone using Mobile Voice Access</td>
<td>1. Obtain your Mobile Voice Access number and end-user PIN from your system administrator.</td>
<td>Managing Business Calls Using a Single Phone Number, page 49.</td>
</tr>
<tr>
<td></td>
<td>2. Dial your assigned Mobile Voice access number.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3. Enter your mobile phone number (if requested) and PIN.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>4. Press 1 to make a call to an enterprise IP phone.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>5. Dial a desktop phone number other than your desktop phone number.</td>
<td></td>
</tr>
</tbody>
</table>
### Answering a Call

You can answer a call by lifting the handset, or you can use other options if they are available on your phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
<th>For more information, see...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Place a call using Fast Dial</td>
<td><strong>Note</strong> Before using this option, your system administrator must configure this feature and assign a service URL to the line button. Contact your system administrator for more information. After configuration, follow these steps: 1. Press the Fast Dial line button. 2. To find and select an entry, scroll to or press the index number. The system dials the specified number.</td>
<td>Configuring Fast Dials on the Web, page 65</td>
</tr>
<tr>
<td>Place a call using your PAB</td>
<td><strong>Note</strong> Before using this option, your system administrator must configure this feature and assign a service URL to the line button. Contact your system administrator for more information. 1. Press the PAB line button. 2. Access the contact and select the number. The system dials the specified number.</td>
<td>Using Your Personal Address Book on the Web, page 64</td>
</tr>
</tbody>
</table>

---

**Answering with a headset**

- Press ✆, if unlit. Or, if ✆ is lit, press Answer or 📞 (flashing).
- **Note** The ringing line is selected automatically. Contact your system administrator for the options to select the primary line each time.

If you are using a wireless headset, refer to the wireless headset documentation.

- Using a Handset, Headset, and Speakerphone, page 51
<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
<th>For more information, see...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Answer with the speakerphone</td>
<td>Press ( \mathbb{A} ), Answer, or (flashing).</td>
<td>Using a Handset, Headset, and Speakerphone, page 51</td>
</tr>
<tr>

</tr>
<tr>
<td>Auto-connect calls</td>
<td>Use AutoAnswer.</td>
<td>Using AutoAnswer with a Headset or Speakerphone, page 53</td>
</tr>
<tr>
<td>Retrieve a parked call on another phone</td>
<td>Use Call Park or Directed Call Park.</td>
<td>Storing and Retrieving Parked Calls, page 38</td>
</tr>
<tr>
<td>Use your phone to answer a call ringing elsewhere</td>
<td>Use Call Pickup.</td>
<td>Picking Up a Redirected Call on Your Phone, page 37</td>
</tr>
<tr>
<td>Answer a priority call (SCCP phones only)</td>
<td>Hang up the current call and press Answer.</td>
<td>Prioritizing Critical Calls, page 46</td>
</tr>
<tr>
<td>Answer a call on your mobile phone or other remote destination</td>
<td>Set up Mobile Connect and answer your phone. When you enable Mobile Connect and answer the call on your mobile phone, and have up to four IP Phones or Softphone configured as shared lines, the additional phones stop flashing.</td>
<td>See Managing Business Calls Using a Single Phone Number, page 49.</td>
</tr>
</tbody>
</table>

**Tip**

- If parties on a call hear a beep tone, the call may be monitored or recorded. Ask your system administrator for more information.
- A Call Chaperone user cannot answer an incoming call when the calls are being chaperoned.
Ending a Call

To end a call, hang up. Here are some more details.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hang up while using the handset</td>
<td>Return the handset to its cradle. Or press EndCall.</td>
</tr>
<tr>
<td>Hang up while using the headset</td>
<td>Press 📞. Or, to keep headset mode active, press EndCall.</td>
</tr>
<tr>
<td></td>
<td>Cisco Unified IP Phones 7962G and 7942G support a wireless headset.</td>
</tr>
<tr>
<td></td>
<td>If you are using a wireless headset, refer to the wireless headset documentation for instructions.</td>
</tr>
<tr>
<td>Hang up while using the speakerphone</td>
<td>Press 📞 or EndCall.</td>
</tr>
<tr>
<td>Hang up one call but preserve another call on the same line</td>
<td>Press EndCall. If necessary, remove the call from hold first.</td>
</tr>
</tbody>
</table>

Using Hold and Resume

You can hold and resume calls. When you put a call on hold, the Hold icon 📞 appears on the right in the call information area and the corresponding line button flashes green 📞. With a shared line, when you place a call on hold, the line button flashes green and the phone displays the hold icon. When another phone places a call on hold, the line button flashes red and the phone displays the remote hold icon.

If the Hold Reversion feature is enabled for your phone, a call that you put on hold reverts back to ringing after a certain period of time. The “reverting” call remains on hold until you resume it or until Hold Reversion times out.

Your phone indicates the presence of a reverting call by:
- Alerting you at intervals with a single ring (or flash or beep, depending on your phone line setting).
- Briefly displaying a “Hold Reversion” message in the status bar at the bottom of the phone screen.
- Displaying the animated Hold Reversion icon 📞 📞 next to the caller ID for the held call.
- Displaying a flashing amber line button 📞 (depending on the line state).

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Put a call on hold</td>
<td>1. Make sure the call you want to put on hold is highlighted.</td>
</tr>
<tr>
<td></td>
<td>2. Press Hold.</td>
</tr>
<tr>
<td>Remove a call from hold on the current line</td>
<td>1. Make sure that the appropriate call is highlighted.</td>
</tr>
<tr>
<td></td>
<td>2. Press Resume.</td>
</tr>
</tbody>
</table>
### Tips

- Engaging the Hold feature typically generates music or a beeping tone.
- If you receive an alert for an incoming call and a reverting call at the same time, by default your phone will shift the focus of the phone screen to display the incoming call. Your system administrator can change this focus priority setting.
- If you use a shared line, Hold Reversion rings only on the phone that put the call on hold, not on the other phones that share the line.
- Your system administrator determines the duration between Hold Reversion alerts.
- The Hold feature is disabled on a Call Chaperone’s Cisco Unified IP Phone when the calls are being chaperoned.

### Using Mute

With Mute enabled, you can hear other parties on a call but they cannot hear you. You can use Mute with the handset, speakerphone, or a headset.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Remove a call from hold on a different line | 1. Press the appropriate line button: green or red (flashing). Doing so may cause a held call to resume automatically:  
   - If there is a reverting call on the line, that call will resume.  
   - If there is more than one reverting call on the line, the oldest reverting call will resume.  
   - If a non-reverting held call is the only call on the line, it will resume.  
   2. If necessary, scroll to the appropriate call and press Resume.  |
| Toggle Microphone on    | Press 🎤.                                                               |
| Toggle Microphone off   | Press 🎤.                                                               |
Switching Between Multiple Calls

You can switch between multiple calls on one or more lines. If the call that you want to switch to is not automatically highlighted, use the Navigation button to scroll to it.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switch between connected calls on one line</td>
<td>1. Make sure the call that you want to switch to is highlighted.</td>
</tr>
<tr>
<td></td>
<td>2. Press Resume.</td>
</tr>
<tr>
<td></td>
<td>Any active call is placed on hold and the selected call is resumed.</td>
</tr>
<tr>
<td>Switch between connected calls on different lines</td>
<td>Press for the line that you are switching to.</td>
</tr>
<tr>
<td></td>
<td>If a single call is holding on the line, the call automatically resumes.</td>
</tr>
<tr>
<td></td>
<td>If multiple calls are holding, highlight the appropriate call and press Resume.</td>
</tr>
<tr>
<td>Switch from a connected call to answer a ringing call</td>
<td>Press Answer, or if the call is ringing on a different line press (flashing).</td>
</tr>
<tr>
<td></td>
<td>Any active call is placed on hold and the selected call is resumed.</td>
</tr>
</tbody>
</table>

Switching an In-Progress Call to Another Phone

You can switch in-progress calls between the desktop phone and your mobile phone or other remote destination.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switch an in-progress call on your desktop phone to a mobile phone</td>
<td>1. Press the Mobility softkey and select Send call to mobile.</td>
</tr>
<tr>
<td></td>
<td>2. Answer the in-progress call on your mobile phone.</td>
</tr>
<tr>
<td></td>
<td>The desktop phone line button turns red and handset icons and the calling party number appear on the phone display. You cannot use same phone line for any other calls, but if your desk phone supports multiple lines, you can use another line to make or receive calls.</td>
</tr>
<tr>
<td>Switch an in-progress call from a mobile phone to your desktop phone</td>
<td>1. Hang up the call on your mobile phone to disconnect the mobile phone, but not the call.</td>
</tr>
<tr>
<td></td>
<td>2. Press Resume on your desk phone within 4 seconds and start talking on the desk phone.</td>
</tr>
</tbody>
</table>
Viewing Multiple Calls

Understanding how multiple calls are displayed on your phone can help you organize your call-handling efforts.

In standard viewing mode, your phone displays calls as follows for the highlighted line:

- Calls with the highest precedence and longest duration display at the top of the list.
- Calls of a similar type are grouped together. For example, calls that you have interacted with are grouped near the top, and calls on hold are grouped last.

You can use these additional methods to view multiple calls on multiple lines:

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Switch an in-progress call from a mobile phone to a desk phone sharing the same line (Session Handoff) | 1. While on your mobile phone, press the access code for the Session Handoff feature (for example, *74). See your system administrator for a list of access codes.  
2. Hang up the call on your mobile phone to disconnect the mobile phone, but not the call.  
3. Press the Answer softkey on your desk phone within 10 seconds and start talking on the desk phone. The number of seconds to answer the call on your desk phone is set by your system administrator. The other Cisco Unified devices that share the same line display a Remote in Use message. The number of seconds to resume the call depends on the configuration set by the system administrator. |

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| View calls on another line              | 1. Press 🔗.  
2. Immediately press the line button 🔗. |

| Switch to call overview mode            | Press 🔗 for the highlighted line.  
The phone switches to call overview mode, displaying one call per line. The displayed call is either the active call or the held call with the longest duration.  
To return to standard viewing mode, press 🔗, then immediately press the line button. |
**Transferring Calls**

Transfer redirects a connected call. The *target* is the number to which you want to transfer the call.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Transfer a call without talking to the transfer recipient | 1. From an active call, press **Transfer**.  
2. Enter the target number.  
3. Press **Transfer** again to complete the transfer or **EndCall** to cancel.  
**Note** If your phone has on-hook transfer enabled, complete the transfer by hanging up. |
| Talk to the transfer recipient before transferring a call (consult transfer) | 1. From an active call, press **Transfer**.  
2. Enter the target number.  
3. Wait for the transfer recipient to answer.  
4. Press **Transfer** again to complete the transfer or **EndCall** to cancel.  
**Note** If your phone has on-hook transfer enabled, complete the transfer by hanging up. |
| Redirect a call to a voice message system | Press **iDivert**. For more information, see **Sending a Call to a Voice Message System**, page 28. |

**Tips**

- If on-hook transfer is enabled on your phone, you can either hang up to complete the call, or press **Transfer** and then hang up.
- If on-hook transfer is *not* enabled on your phone, hanging up without pressing **Transfer** again places the call on hold.
- You cannot use **Transfer** to redirect a call on hold. Press **Resume** to remove the call from hold before transferring it.
- The Transfer feature is disabled on a Call Chaperone’s Cisco Unified IP Phone when the calls are being chaperoned.
Sending a Call to a Voice Message System

You can use iDivert to send an active, ringing, or on-hold call to your voice message system. Depending on the type of call and your phone configuration, you can also use iDivert to send the call to another party’s voice message system.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Send an active, ringing, or on-hold call to a voice message system | Press iDivert. One of two things occurs:  
  • The call is transferred to your voice message system.  
  • Your phone screen displays a menu that allows you to choose between your voice message system or the voice message system of the original called party. Choose an option to redirect the call. |

**Tips**

- If the call was originally sent to someone else’s phone, iDivert allows you to redirect the call either to your own voice message system or to the original called party’s voice message system. Your system administrator must make this option available to you.

- If the call was sent to you directly (not transferred or forwarded to you), or if your phone does not support the option described above, using iDivert redirects the call to your voice message system.

- If your phone displays a menu that disappears before you make your selection, you can press iDivert again to re-display the menu. You can also ask your system administrator to configure a longer timeout value.

- When you switch an in-progress call from your mobile phone to Cisco Unified devices that share the same line (Session Handoff), the iDivert feature is disabled on the Cisco Unified devices. The iDivert feature returns when the call ends.

Forwarding Calls to Another Number

You can use call forwarding features to redirect incoming calls from your phone to another number. Your system administrator may allow you to choose from two types of call forwarding features:

- **Unconditional call forwarding (Call Forward All)**—Applies to all calls that you receive.

- **Conditional call forwarding (Call Forward No Answer, Call Forward Busy, Call Forward No Coverage)**—Applies to certain calls that you receive, according to conditions.
You can access Call Forward All on your phone or from your Cisco Unified CM User Options web pages; conditional call forwarding features are accessible only from your User Options web pages. Your system administrator determines which call forwarding features are available to you.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Set up Call Forward All on your primary line</td>
<td>Press CFwdALL or Forward All and enter a target phone number.</td>
</tr>
<tr>
<td>Cancel Call Forward All on your primary line</td>
<td>Press CFwdALL or Forward All.</td>
</tr>
<tr>
<td>Verify that Call Forward All is enabled on your primary line</td>
<td>Look for:</td>
</tr>
<tr>
<td></td>
<td>• The call forward icon above your primary phone number: ☎️</td>
</tr>
<tr>
<td></td>
<td>• The call forwarding target number in the status line.</td>
</tr>
</tbody>
</table>
| Set up or cancel call forwarding remotely, or for a non-primary line | 1. Log in to your User Options web pages. (See Accessing Your User Options Web Pages, page 63.)  
2. Access your call forwarding settings (See Controlling Line Settings on the Web, page 70.) |

**Note** When call forwarding is enabled for any line other than the primary line, your phone does not provide you with any confirmation that calls are being forwarded. Instead, you must confirm your settings in the User Options web pages.

**Tips**

- Enter the call forward target number exactly as you would dial it from your phone. For example, enter an access code or the area code, if necessary.
- You can forward your calls to a traditional analog phone or to another IP phone, although your system administrator may restrict the call forwarding feature to numbers within your company.
- Call forwarding is phone line specific. If a call reaches you on a line where call forwarding is not enabled, the call will ring as usual.
- Your system administrator can enable a call forward override feature that allows the person receiving your forwarded calls to reach you. With override enabled, a call placed from the target phone to your phone is not forwarded, but rings through.
- Your phone may reject your attempt to set up Call Forward All directly on the phone if the target number that you enter would create a call forwarding loop or would exceed the maximum number of links permitted in a call forwarding chain.
- When you switch an in-progress call from your mobile phone to Cisco Unified devices that share the same line (Session Handoff), the Call Forward feature is disabled on the Cisco Unified devices. The Call Forward feature returns when the call ends.
Using Do Not Disturb

You can use the Do Not Disturb (DND) feature to turn off only the ringer on your phone or to turn off all audible and visual notifications of incoming calls. Your system administrator enables DND for your phone.

When DND and Call Forward All are both enabled on your phone, calls are forwarded and the caller does not hear a busy tone.

DND interaction with other types of calls includes:

- DND does not affect intercom calls or non-intercom priority calls.
- If both DND and auto-answer are enabled, only intercom calls will be auto-answered.
- When you switch an in-progress call from your mobile phone to Cisco Unified devices that share the same line (Session Handoff), the DND feature is disabled on the Cisco Unified devices. The DND feature returns when the call ends.

### If you want to... | Then...
---|---
**Turn on DND** | Press DND or Do Not Disturb. “Do Not Disturb” displays on the phone, the DND lights, and the ring tone is turned off.
**Turn off DND** | Press DND or Do Not Disturb.
**Customize DND settings** | If your system administrator configured DND settings to appear on the User Options page, follow these steps:

1. Log in to your User Options web pages. See Accessing Your User Options Web Pages, page 63.

2. From the drop-down menu, choose User Options > Device.

3. Set the following options:
   - Do Not Disturb—Set to enable/disable DND.
   - DND Option—Choose either Call Reject (to turn off all audible and visual notifications) or Ringer Off (to turn off only the ringer).
   - DND Incoming Call Alert (applies to either DND option set)—Set the alert to beep only, flash only, disable the alert, or choose “None” (to use the “Alert” setting configured by your system administrator).
Making Conference Calls

Your Cisco Unified IP Phone allows you to talk simultaneously with multiple parties in a conference call.

Using Conference Features

You can create a conference in various ways, depending on your needs and the features that are available on your phone.

- Conference—Enables you to create a standard (ad hoc) conference by calling each participant. Use the Confrn softkey or the Conference button. Conference is available on most phones.
- Join—Enables you to create a standard (ad hoc) conference by combining existing calls. Use the Join softkey or button.
- cBarge—Enables you to create a standard (ad hoc) conference by adding yourself to a call on a shared line. Press a line button or use the cBarge softkey or button. cBarge is only available on phones that use shared lines.
- Meet-Me—Enables you to create or join a conference by calling a conference number. Use the MeetMe softkey or button.

Using Conference

Conference allows you to call each participant. Conference is available on most phones.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Create a conference | 1. From a connected call, press Confrn or Conference. (You may need to press the more softkey to see Confrn.)  
2. Enter the participant’s phone number.  
3. Wait for the call to connect.  
4. Press Confrn or Conference again to add the participant to your call.  
5. Repeat to add additional participants. |
| Add new participants to an existing conference | Repeat the steps listed above.  
Your system administrator determines whether non-initiators of a conference can add or remove participants. |
| See a list of participants or remove participants | See Viewing or Removing Conference Participants, page 34. |
Using Join

Join allows you to combine two or more existing calls to create a conference in which you are a participant.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Create a conference by joining together existing calls that are on a single phone line | 1. From an active call, highlight another call that you want to include in the conference and press Select. Selected calls display this icon.
2. Repeat this step for each call that you want to add.
3. Press Join. (You may need to press the more softkey to see Join.) |
| Create a conference by joining together existing calls that are on multiple phone lines | 1. From an active call, press Join. (You may need to press the more softkey to see Join.)
2. Press the green flashing line button for the call(s) that you want to include in the conference.
   One of the following occurs:
   • The calls are joined.
   • A window opens on your phone screen prompting you to select the call(s) that you want to join. Highlight the call(s) and press Select, then press Join to complete the action.
| Note | If your phone does not support Join for calls on multiple lines, transfer the calls to a single line before using Join. |
| See a list of participants or remove participants | Press ConfList or Conference List. (You may need to press the more softkey first.) See Viewing or Removing Conference Participants, page 34. |

Tips

• If you frequently join more than two parties into a single conference, you may find it useful to first select the calls that you want to join, then press Join to complete the action.
• When Join completes, caller ID changes to “Conference.”
• You may be able to combine multiple conference calls by using the Join or DirTrfr softkeys. Check with your system administrator to see if this feature is available to you.
• A Call Chaperone user can conference only the first caller. Subsequent callers can be conferenced by the other participants in the conference.
Using cBarge

You can create a conference by using cBarge to add yourself to a call on a shared line.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Create a conference by barging a call on a shared line</td>
<td>Press the line button for the shared line. In some cases, you must highlight the call and press cBarge to complete the action. See Using Barge to Add Yourself to a Shared-Line Call, page 40 for more information.</td>
</tr>
<tr>
<td>See a list of participants or remove participants</td>
<td>See Viewing or Removing Conference Participants, page 34.</td>
</tr>
</tbody>
</table>

Using Meet-Me

Meet-Me conferencing allows you to start or join a conference by calling the conference number.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Start a Meet-Me conference | 1. Obtain a Meet-Me phone number from your system administrator.  
2. Distribute the number to participants.  
3. When you are ready to start the meeting, go off-hook to get a dial tone, then press MeetMe.  
4. Dial the Meet-Me conference number. 
Participants can now join the conference by dialing in. 
Note Participants hear a busy tone if they call the conference before the initiator has joined. In this case, participants must call back. |
| Join a Meet-Me conference | Dial the Meet-Me conference number (provided by the conference initiator). 
Note You will hear a busy tone if you call the conference before the initiator has joined. In this case, try your call again. |
| End a Meet-Me conference | All participants must hang up. 
The conference does not automatically end when the conference initiator disconnects. |

Tip

If you call a secure Meet-Me conference number from a non-secure phone, your phone displays the message, “Device Not Authorized.” For more information, see Making and Receiving Secure Calls, page 44.
Viewing or Removing Conference Participants

During a standard (ad hoc) conference, you can view a list of participants and remove participants.

<table>
<thead>
<tr>
<th>Task</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>View a list of conference participants</td>
<td>Press <strong>ConfList</strong> or <strong>Conference List</strong>. Participants are listed in the order in which they join the conference with the most recent additions at the top.</td>
</tr>
<tr>
<td>Get an updated list of conference participants</td>
<td>While viewing the conference list, press <strong>Update</strong>.</td>
</tr>
<tr>
<td>See who initiated the conference</td>
<td>While viewing the conference list, locate the participant listed at the bottom of the list with an asterisk (*) next to the name.</td>
</tr>
<tr>
<td>Remove any conference participant</td>
<td>While viewing the conference list, highlight the participant's name and press <strong>Remove</strong>.</td>
</tr>
<tr>
<td>Drop the last participant added to the conference</td>
<td>While viewing the conference list, press <strong>RMLstC</strong> or <strong>Remove Last Participant</strong>.</td>
</tr>
<tr>
<td>Verify that a conference call is secure</td>
<td>Look for the <strong>Conference</strong> icon after “Conference” on the phone screen.</td>
</tr>
<tr>
<td>Verify that a participant is calling from a secure phone</td>
<td>Look for the <strong>Secure</strong> icon beside the participant’s name on the phone screen.</td>
</tr>
<tr>
<td>Add more participants</td>
<td>See <strong>Using Conference, page 31</strong>.</td>
</tr>
</tbody>
</table>

Placing or Receiving Intercom Calls

You can make an intercom call to a target phone that auto-answers the call in speakerphone mode with mute activated. The one-way intercom call allows you to deliver a short message to the recipient. If the recipient’s handset or headset is in use, the audio is sent to the device in use. Any current call activity that your recipient is engaged in continues simultaneously.

The target destination receives an intercom-alert tone and can then choose to:

- Listen to the caller with microphone muted (you can hear the caller, but the caller cannot hear you).
- End the intercom call by pressing the **EndCall** softkey with the intercom call in focus. Do this if you do not want to hear the message.
- Talk to the caller by pressing the active intercom button and using either the handset, headset or speaker. The intercom call becomes a two-way connection so that you can converse with the caller.

When using the intercom feature, be aware of the following:

- From an intercom line, you can only dial other intercom lines.
- You can use only one intercom line at a time.
- When your active call is being monitored or recorded, you can receive or place intercom calls.
• You cannot place an intercom call on hold.

**Note** If you log into the same phone on a daily basis using your Cisco Extension Mobility profile, ensure that your system administrator assigns the phone button template that contains intercom information to this profile and assign the phone as the default intercom device for the intercom line.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Place an intercom call to a</td>
<td>Press (intercom target line) and, after you hear the</td>
</tr>
<tr>

</tr>
<tr>
<td></td>
<td>these ways:</td>
</tr>
<tr>
<td></td>
<td>• Listen to the message in one-way audio.</td>
</tr>
<tr>
<td></td>
<td>• Speak to the caller by pressing (active intercom line).</td>
</tr>
<tr>
<td></td>
<td>• Press EndCall with the intercom call in focus.</td>
</tr>
</tbody>
</table>
Advanced Call Handling

Advanced call-handling tasks involve special features that your system administrator may configure for your phone depending on your call-handling needs and work environment.

Speed Dialing

Speed dialing enables you to enter an index number, press a button, or select a phone screen item to place a call. Depending on configuration, your phone can support several speed-dial features:

- Speed-dial buttons
- Abbreviated Dialing
- Fast Dials

Note
- To set up speed-dial buttons and Abbreviated Dial, you must access your User Options web pages. See Accessing Your User Options Web Pages, page 63.
- To set up Fast Dials, you must access the Personal Directory feature. See Using Personal Directory on Your Phone, page 59.
- Alternately, your system administrator can configure speed-dial features for you.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
2. To place a call, press (a speed-dial button).  
**Note** If your phone supports the Busy Lamp Field (BLF) speed-dial feature, you can see if the speed-dial number is busy before dialing. See Using BLF to Determine a Line State, page 43. |
2. To place a call, enter the Abbreviated Dialing code and press AbbrDial. |
| Use Fast Dial | 1. Create a Personal Address Book entry and assign a Fast Dials code. See Using the Personal Directory on the Web, page 64.  
2. To place a call, access the Fast Dial service on your phone. See Using Personal Directory on Your Phone, page 59. |
# Picking Up a Redirected Call on Your Phone

Call PickUp allows you to answer a call that is ringing on a coworker's phone by redirecting the call to your phone. You may use Call PickUp if you share call-handling tasks with coworkers.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Answer a call that is ringing on another extension within your call pickup group | 1. Press the **PickUp** softkey or button. (You may have to go off-hook to display the softkey.)  
If your phone supports auto-pickup, you are now connected to the call.  
2. If the call rings, press **Answer** to connect to the call. |
| Answer a call that is ringing on another extension outside of your call pickup group | 1. Press the **GPickUp** softkey or the **Group PickUp** button. (You may have to go off-hook to display the softkey.)  
2. Enter the group pickup number.  
If your phone supports auto-pickup, you are now connected to the call.  
3. If the call rings, press **Answer** to connect to the call. |
| Answer a call that is ringing on another extension in your group or in an associated group | 1. Press the **OPickUp** softkey or the **Other PickUp** button. (You may have to go off-hook to display the softkey.)  
If your phone supports auto-pickup, you are now connected to the call.  
2. If the call rings, press **Answer** to connect to the call. |
| Answer a call that is ringing on a particular extension (line number) | 1. Press the **GPickUp** softkey or the **Group PickUp** button. (You may have to go off-hook to display the softkey.)  
2. Enter the line number with the call that you want to pick up. For example, if the call that you want to pick up is ringing on line 12345, enter 12345.  
If your phone supports auto-pickup, you are now connected to the call.  
3. If the call rings, press **Answer** to connect to the call. |

**Tips**

- If multiple calls are available for pickup, your phone picks up the oldest call first (the call that has been ringing for the longest time).
- If you press **GPickUp** or **Group PickUp** and enter a line number, your phone picks up the ringing call on that particular line (if available).
- If you have multiple lines and want to pick up the call on a non-primary line, first press the desired line, then press a Call PickUp softkey or button.
• Depending on how your phone is configured, you may receive an audio and/or visual alert about a call to your pickup group.

• If you use the BLF Pickup feature on your phone, see Using BLF to Determine a Line State, page 43.

### Storing and Retrieving Parked Calls

You can park a call when you want to store the call so that you or someone else can retrieve it from another phone in the Cisco Unified Communications Manager system (for example, a phone at a coworker’s desk or in a conference room).

You can park a call by using these methods:

• **Call Park**—Use the **Park** softkey to store the call. Your phone displays the call park number where the system stored your call. You must record this number and then use the same number to retrieve the call.

• **Directed Call Park**—Use the **Transfer** softkey to direct the call to an available directed call park number that you dial or speed dial. To retrieve the call from a directed call park number, dial the park retrieval prefix, then dial or speed dial the same directed call park number. You can use a Directed Call Park button to speed-dial the directed call park number and to monitor whether a directed call park number is occupied or available.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| **Store an active call using Call Park** | 1. During a call, press **Park**. (You may need to press the **more** softkey to see **Park**.)
2. Note the call park number displayed on your phone screen.
3. Hang up. |
| **Retrieve a parked call** | Enter the call park number from any Cisco Unified IP Phone in your network to connect to the call. |
| **Direct and store an active call at a directed call park number** | 1. During a call, press **Transfer**.
2. Press the Directed Call Park with the park-unoccupied icon to speed dial the directed call park number.
   A Directed Call Park (flashing) with park-occupied icon indicates the directed call park number is not available.
3. Press **Transfer** again to finish storing the call. |
| **Retrieve a parked call from a directed call park number** | From any Cisco Unified IP Phone in your network, enter the park retrieval prefix and dial the directed call park number. Or after entering the park retrieval prefix, press the (flashing) with to connect to the call. |
Tips

- You have a limited time to retrieve a parked call before it reverts to ringing at the original number. See your system administrator for details.
- Your system administrator can assign Directed Call Park buttons to available line buttons on your Cisco Unified IP Phone or on your Cisco Unified IP Phone Expansion Module, if available and supported by your phone.
- You can dial directed call park numbers if you do not have Directed Call Park buttons. However, you will not be able to see the status of the directed call park number.

Logging Out of Hunt Groups

If your organization receives a large number of incoming calls, you may be a member of a hunt group. A hunt group includes a series of directory numbers that share the incoming call load. When the first directory number in the hunt group is busy, the system hunts for the next available directory number in the group and directs the call to that phone.

When you are away from your phone, you can prevent hunt group calls from ringing your phone by logging out of hunt groups.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Log out of hunt groups to temporarily block hunt group calls</td>
<td>Press HLog or Hunt Group. Your phone screen displays, “Logged out of Hunt Group.”</td>
</tr>
<tr>
<td>Log in to receive hunt group calls</td>
<td>Press HLog or Hunt Group. When logged in, the Hunt Group button is lit.</td>
</tr>
</tbody>
</table>

Tip

Logging out of hunt groups does not prevent non-hunt group calls from ringing your phone.

Using a Shared Line

Your system administrator may ask you to use a shared line if you:

- Have multiple phones and want one phone number
- Share call-handling tasks with coworkers
- Handle calls on behalf of a manager
Understanding Shared Lines

Remote-in-Use Icon
The remote-in-use icon appears when another phone that shares your line has a connected call. You can place and receive calls as usual on the shared line, even when the remote-in-use icon appears.

Sharing Call Information and Barging
Phones that share a line each display information about calls that are placed and received on the shared line. This information may include caller ID and call duration. (See the Privacy section for exceptions.) When call information is visible in this way, you and coworkers who share a line can add yourselves to calls using either Barge or cBarge. See Using Barge to Add Yourself to a Shared-Line Call, page 40.

Privacy
If you do not want coworkers who share your line to see information about your calls, enable the Privacy feature. Doing so also prevents coworkers from barging your calls. See Preventing Others from Viewing or Barging a Shared-Line Call, page 42.

Note
The maximum number of calls that a shared line supports can vary by phone.

Using Barge to Add Yourself to a Shared-Line Call
You can use barge features (cBarge or Barge) to add yourself to calls on your shared line. (Calls must be non-private calls. See Using a Shared Line, page 39.)

Understanding Barge Features

cBarge and Barge
Depending on how your phone is configured, you can add yourself to a non-private call on a shared line using either cBarge or Barge:

- cBarge converts the call into a standard conference, allowing you to add new participants. (See Making Conference Calls, page 31 for information about standard conferences.)
- Barge allows you to add yourself to the call but does not convert the call into a conference or allow you to add new participants.
Single-button and Multi-touch Barge

Your system administrator determines whether the barge feature on your phone operates as a single-button or multi-touch feature.

- Single button barge allows you to press a line button to barge a call (if only one call is on the line).
- Multi-touch barge allows you to view call information before barging.

Using Barge Features

The table below describes how to use barge features (cBarge or Barge) to add yourself to a call on a shared line.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>See if the shared line is in use</td>
<td>Look for the remote-in-use icon next to a red line button.</td>
</tr>
<tr>
<td>Add yourself to a call on a shared line</td>
<td>Press the red line button for the shared line.</td>
</tr>
<tr>
<td></td>
<td>One of the following occurs:</td>
</tr>
<tr>
<td></td>
<td>- You are added to the call.</td>
</tr>
<tr>
<td></td>
<td>- A window opens on your phone screen prompting you to select the call</td>
</tr>
<tr>
<td></td>
<td>that you want to barge. Press Barge or cBarge to complete the action.</td>
</tr>
<tr>
<td></td>
<td>(You may need to press the more softkey to display Barge or cBarge.)</td>
</tr>
<tr>
<td>View conference participants (if you used cBarge)</td>
<td>See Viewing or Removing Conference Participants, page 34.</td>
</tr>
</tbody>
</table>

Tips

- When you barge a call, other parties may hear a beep tone announcing your presence. With cBarge, other parties hear a brief audio interruption and the phone screen changes to display conference details.
- If a phone that is using the shared line has Privacy enabled, call information and barge softkeys will not appear on the other phones that share the line.
- If a phone that is using the shared line has Privacy disabled and is configured with Private Line Automated Ringdown (PLAR), the barge and cBarge features will still be available.
- You will be disconnected from a call that you have joined using Barge if the call is put on hold, transferred, or turned into a conference call.
Preventing Others from Viewing or Barging a Shared-Line Call

If you share a phone line, you can use the Privacy feature to prevent others who share the line from viewing or barging (adding themselves to) your calls.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prevent others from viewing or barging calls on a shared line</td>
<td>1. Press Private.</td>
</tr>
<tr>
<td></td>
<td>2. To verify that Privacy is on, look for the Privacy-enabled icon next to an amber line button.</td>
</tr>
<tr>
<td>Allow others to view or barge calls on a shared line</td>
<td>1. Press Private.</td>
</tr>
<tr>
<td></td>
<td>2. To verify that Privacy is off, look for the Privacy-disabled icon next to an unlit line button.</td>
</tr>
</tbody>
</table>

**Tips**

- If the phone that shares your line has Privacy enabled, you can make and receive calls using the shared line as usual.
- The Privacy feature applies to all shared lines on your phone. Consequently, if you have multiple shared lines and Privacy is enabled, coworkers cannot view or barge calls on any of your shared lines.
Using BLF to Determine a Line State

Busy Lamp Field (BLF) features allow you to view the state of a phone line that is associated with a speed-dial button, call log, or directory listing on your phone. If you use BLF Pickup, you can answer a ringing call for the line that you are monitoring. Your system administrator determines which BLF features are configured for your phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>See the state of a line listed in a call log or directory</td>
<td>Look for one of these BLF indicators next to the line number:</td>
</tr>
<tr>
<td></td>
<td>![Icon] Line is in-use.</td>
</tr>
<tr>
<td></td>
<td>![Icon] Line is idle.</td>
</tr>
<tr>
<td></td>
<td>![Icon] Line is in Do Not Disturb state.</td>
</tr>
<tr>
<td></td>
<td>![Icon] BLF indicator unavailable for this line.</td>
</tr>
<tr>
<td>See the state of a speed-dial line</td>
<td>Look for one of these BLF indicators next to the line number:</td>
</tr>
<tr>
<td></td>
<td>![Icon] Line is in-use.</td>
</tr>
<tr>
<td></td>
<td>![Icon] Line is idle.</td>
</tr>
<tr>
<td></td>
<td>![Icon] Line is in Do Not Disturb state.</td>
</tr>
<tr>
<td></td>
<td>![Icon] (flashing)—Line is ringing (BLF Pickup only).</td>
</tr>
<tr>
<td></td>
<td>![Icon] BLF indicator unavailable for this line.</td>
</tr>
<tr>
<td>Use BLF Pickup to answer a call ringing on a coworker’s phone</td>
<td>Press the BLF Pickup button ![Icon] while the line is ringing. The call is redirected to the next available line on your phone. (If you want to specify a line, first press a line button and then press the BLF button.)</td>
</tr>
<tr>
<td></td>
<td>If your phone supports auto-pickup, the call connects automatically. Otherwise, the call rings on your phone for you to answer.</td>
</tr>
<tr>
<td></td>
<td><strong>Note</strong> If you press the BLF Pickup button when the monitored line is <em>not</em> ringing, your phone will speed dial the line number.</td>
</tr>
</tbody>
</table>

**Tips**

- Your phone may play an audible indicator to alert you when a call is ringing on the monitored line (BLF Pickup only).
- BLF Pickup answers the oldest ringing call first (if the line that you are monitoring has more than one ringing call).
Making and Receiving Secure Calls

Depending on how your system administrator configured your phone system, your phone may support making and receiving secure calls.

Your phone can support these types of calls:

- **Authenticated call**—The identities of all phones participating in the call have been verified.
- **Encrypted call**—The phone is receiving and transmitting encrypted audio (your conversation) within the Cisco Unified Communications network. Encrypted calls are also authenticated.
- **Protected call**—The phone is receiving and transmitting encrypted audio (your conversation) with another phone. A protected call provides a similar level of security as an encrypted call, but adds additional security. If the call is protected at both ends, a security tone plays at the beginning of the conversation. Some features, such as conference calling, shared lines, Extension Mobility, and join across lines are not available when protected calling is configured. Protected calls are also authenticated.
- **Non-secure call**—At least one of the participating phones or the connection does not support these security features, or the phones cannot be verified.

Your system administrator also determines if your phone needs the VPN Client feature enabled and sets it up as needed, based on whether or not your phone is used outside the corporate network. If it is enabled and the VPN Client mode is enabled on the phone, you are prompted for your credentials as follows:

- If your phone is located outside the corporate network—You are prompted at login to enter your credentials based on the authentication method that your system administrator configured on your phone.
- If your phone is located inside the corporate network—
  - If Auto Network Detection is disabled, you are prompted for credentials, and a VPN connection is possible.
  - If Auto Network Detection is enabled, you cannot connect through VPN so you are not prompted.

You can access the VPN Configuration settings by pressing the **Settings** button and choosing **Security Configuration > VPN Configuration**. To exit this menu, press the **Exit** softkey.

After the phone starts up and the VPN Login screen appears, enter your credentials based on the configured authentication method:

- Username and password—Enter your username and the password that your system administrator gave you.
- Password and certificate—Enter the password that your system administrator gave you. Your username is derived from the certificate.
- Certificate—If the phone uses only a certificate for authentication, you do not need enter authentication data. The VPN Login screen displays the status of the phone attempting the VPN connection.
With the authentication methods that require a password, use the << softkey to backspace and correct the password.

**Note** If power is lost or the phone is reset, all stored credentials are removed.

To establish the VPN connection, press the **Submit** softkey. To disable the VPN login process, press the **Cancel** softkey.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check the security level of a call or conference</td>
<td>Look for a security icon in the top right corner of the call activity area, next to the call duration timer:</td>
</tr>
<tr>
<td></td>
<td>Authenticated call or conference</td>
</tr>
<tr>
<td></td>
<td>Encrypted call or conference</td>
</tr>
<tr>
<td></td>
<td>Non-secure call or conference</td>
</tr>
<tr>
<td>Verify that the phone on the other end of the connection is also secure</td>
<td>Look for the encrypted lock icon and listen for a security tone at the beginning of the call. When encrypted calling is configured on your phone, the lock icon is displayed. However, the conversation is protected only when the security tone plays at the beginning of a call, indicating that the call is protected on both ends of the call. If your call is connected to a non-protected phone, the secure tone is not played.</td>
</tr>
<tr>
<td>Determine if secure calls can be made in your company</td>
<td>Contact your system administrator.</td>
</tr>
</tbody>
</table>

**Note** There are interactions, restrictions, and limitations that affect how security features work on your phone. For more information, ask your system administrator.

**Note** A device engaged in a call is either trusted or untrusted as determined by Cisco. Lock or shield icons are not displayed on a Cisco Unified IP Phone screen when a call is to or from an untrusted device, even though the call might be secure.
Tracing Suspicious Calls

If you are receiving suspicious or malicious calls, your system administrator can add the Malicious Call Identification (MCID) feature to your phone. This feature enables you to identify an active call as suspicious, which initiates a series of automated tracking and notification messages.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Notify your system administrator about a suspicious or harassing call</td>
<td>Press <strong>MCID or Malicious Call ID</strong>. Your phone plays a tone and displays the message, “MCID successful.”</td>
</tr>
</tbody>
</table>

Prioritizing Critical Calls

(SCCP phones only)

In some specialized environments, such as military or government offices, you may need to make and receive urgent or critical calls. If you have the need for this specialized call handling, your system administrator can add Multilevel Precedence and Preemption (MLPP) to your phone.

Keep these terms in mind:
- *Precedence* indicates the priority associated with a call.
- *Preemption* is the process of ending an existing, lower priority call while accepting a higher priority call that is sent to your phone.

<table>
<thead>
<tr>
<th>If you...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Want to choose a priority (precedence) level for an outgoing call</td>
<td>Contact your system administrator for a list of corresponding precedence numbers for calls.</td>
</tr>
<tr>
<td>Want to make a priority (precedence) call</td>
<td>Enter the MLPP access number (provided by your system administrator) followed by the phone number.</td>
</tr>
<tr>
<td>Hear a special ring (faster than usual) or special call waiting tone</td>
<td>You are receiving a priority (precedence) call. An MLPP icon on your phone screen indicates the priority level of the call.</td>
</tr>
</tbody>
</table>
When you make or receive an MLPP-enabled call, you will hear special ring tones and call waiting tones that differ from the standard tones.

If you enter an invalid MLPP access number, a verbal announcement will alert you of the error.

An MLPP-enabled call retains its priority and preemptive status when you:
- Put the call on hold
- Transfer the call
- Add the call to a three-way conference
- Answer the call using PickUp

MLPP overrides the Do Not Disturb (DND) feature.

<table>
<thead>
<tr>
<th>If you...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Want to view priority level of a call</td>
<td>Look for an MLPP icon on your phone screen:</td>
</tr>
<tr>
<td></td>
<td>• Priority call</td>
</tr>
<tr>
<td></td>
<td>• Medium priority (immediate) call</td>
</tr>
<tr>
<td></td>
<td>• High priority (flash) call</td>
</tr>
<tr>
<td></td>
<td>• Highest priority (flash override) or Executive Override call</td>
</tr>
<tr>
<td>Higher priority calls are displayed at the top of your call list. If you do not see an MLPP icon, the priority level of the call is normal (routine).</td>
<td></td>
</tr>
<tr>
<td>Want to accept a higher-priority call</td>
<td>Answer the call as usual. If necessary, end an active call first.</td>
</tr>
<tr>
<td>Hear a continuous tone interrupting your call</td>
<td>You or the other party are receiving a call that must preempt the current call. Hang up immediately to allow the higher priority call to ring through.</td>
</tr>
</tbody>
</table>

**Tips**

- When you make or receive an MLPP-enabled call, you will hear special ring tones and call waiting tones that differ from the standard tones.
- If you enter an invalid MLPP access number, a verbal announcement will alert you of the error.
- An MLPP-enabled call retains its priority and preemptive status when you:
  - Put the call on hold
  - Transfer the call
  - Add the call to a three-way conference
  - Answer the call using PickUp
- MLPP overrides the Do Not Disturb (DND) feature.

**Using Cisco Extension Mobility**

Cisco Extension Mobility (EM) allows you to temporarily configure a Cisco Unified IP Phone as your own. Once you log in to EM, the phone adopts your user profile, including your phone lines, features, established services, and web-based settings. Your system administrator must configure EM for you. The Extension Mobility ChangePIN feature allows you to change your PIN from your Cisco Unified IP Phone.
### If you want to... | Then...
---|---
Log in to EM | 1. Choose > EM Service (name can vary).
   2. Enter your user ID and PIN (provided by your system administrator).
   3. If prompted, select a device profile.
Log out of EM | 1. Choose > EM Service (name can vary).
   2. When prompted to log out, press Yes.
Change your PIN using the Change Credentials service | 1. Choose > Change Credentials.
   2. Enter your User ID in the User ID field.
   3. Enter your PIN in the Current PIN field.
   4. Enter your new PIN in the New PIN field.
   5. Enter your new PIN again in the Confirm PIN field.
   6. Press Change.
   You will see a PIN Change Successful message.
   7. Press Exit.
Change your PIN using the ChangePIN softkey | 1. Choose > EM Service.
   2. Press ChangePIN.
   3. Enter your PIN in the Current PIN field.
   4. Enter your new PIN in the New PIN field.
   5. Enter your new PIN again in the Confirm PIN field.
   6. Press Change.
   You will see a PIN Change Successful message.
   7. Press Exit.

### Tips
- EM automatically logs you out after a certain amount of time. Your system administrators establishes this time limit.
- Changes that you make to your EM profile from your Cisco Unified CM User Options web pages take effect immediately if you are logged in to EM on the phone; otherwise, changes take effect the next time you log in.
- Changes that you make to the phone from your User Options web pages take effect immediately if you are logged out of EM; otherwise, changes take effect after you log out.
- Local settings controlled by the phone are not maintained in your EM profile.
Managing Business Calls Using a Single Phone Number

Intelligent Session Control associates your mobile phone number with your business IP phone number. When you receive a call to your remote destination (mobile phone), your desk phone does not ring; only your remote destination rings. When an incoming call is answered on the mobile phone, the desk phone displays a Remote in Use message.

During a call you can also use any of your mobile phone features. For example, if you receive a call on your mobile number, you can answer the call from either your desk phone or you can handoff the call from your mobile phone to your desk phone.

If you want to... | Then...
---|---
Transfer your incoming mobile active call to desk phone | Use the various features of your mobile phone (for example, *74). Contact your system administrator for a list of access codes.

With Mobile Connect and Mobile Voice Access installed, you can use your mobile phone to handle calls associated with your desktop phone number.

When you enable Mobile Connect, your desktop and remote destinations receive calls simultaneously.

When you answer the call on your desktop phone, the remote destinations stop ringing, are disconnected, and display a missed call message.

When you answer the call on one remote destination, the other remote destinations stop ringing, are disconnected, and a missed call message is shown on the other remote destinations.

If you want to... | Then...
---|---
Configure Mobile Connect | Use the User Options web pages to set up remote destinations and create access lists to allow or block calls from specific phone numbers from being passed to the remote destinations. See Setting Up Phones and Access Lists for Mobile Connect, page 72.

Answer a call using your mobile phone | See Answering a Call, page 21.

Switch an in-progress call between your desk phone and mobile phone | See Switching an In-Progress Call to Another Phone, page 25.

Put a call that has been picked up on your mobile phone on hold | 1. Press the Enterprise Hold (name may vary) softkey. The other party is placed on hold.

2. On your mobile phone, press the Resume (name may vary) softkey. See Switching an In-Progress Call to Another Phone, page 25.

Connect to Mobile Voice Access | 1. From any phone, dial your assigned Mobile Voice Access number.

2. Enter the number you are calling from, if prompted, and your PIN.
**If you want to...** | **Then...**
---|---
Turn on Mobile Connect from your mobile phone | 1. Dial your assigned Mobile Voice Access number.<br>2. Enter your mobile phone number (if requested) and PIN.<br>3. Press 2 to activate Mobile Connect.<br>4. Choose whether to turn on Mobile Connect for all configured phones or just one:<br>   - All phones—Enter 2.<br>   - One phone—Enter 1, then the remote destination you want to add, followed by #.

Make a call from your mobile phone | See Placing a Call—Additional Options, page 19.

Turn off Mobile Connect from your mobile phone | 1. Dial your assigned Mobile Voice Access number.<br>2. Enter your mobile phone number (if requested) and PIN.<br>3. Press 3 to disable Mobile Connect.<br>4. Choose whether to turn off Mobile Connect for all configured phones or just one:<br>   - All phones—Enter 2.<br>   - One phone—Enter 1, then the remote destination you want to add, followed by #.

Turn on or off Mobile Connect access to all your remote destinations from your desk phone | 1. Press Mobility to display the current remote destination status (Enabled or Disabled).<br>2. Press Select to change the status.<br>3. Press Exit.

**Tips**

- When calling Mobile Voice Access, you must enter the number you are calling and your PIN if any of the following are true:
  - The number you are calling from is not one of your remote destinations.
  - The number is blocked by you or your carrier (shown as “Unknown Number”).
  - The number is not accurately matched in the Cisco Unified Communications Manager database; for example, if your number is 510-666-9999, but it is listed as 666-9999 in the database, or your number is 408-999-6666, but it is entered as 1-408-999-6666 in the database.

- If you incorrectly enter any requested information (such as mobile phone number or PIN) three times in a row, the Mobile Voice Access call disconnects, and you are locked out for a period of time. Contact your system administrator if you need assistance.
Using a Handset, Headset, and Speakerphone

You can use your phone with these audio devices: a handset, headset, or speakerphone.
The phone is off-book when the handset is lifted or another audio device is in use.
The phone is on-hook when the handset is in its cradle and other audio devices are not in use.

Using a Handset

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use the handset</td>
<td>Lift it to go off-hook; replace it in the cradle to go on-hook. The ringing line is selected automatically. Ask your system administrator about options to always select the primary line.</td>
</tr>
<tr>
<td>Switch to the speakerphone or headset during a call</td>
<td>Press (\text{①}) or (\text{②}), then hang up the handset.</td>
</tr>
<tr>
<td>Adjust the volume level for a call</td>
<td>Press (\text{③}) during a call or after invoking a dial tone. Press (\text{Save}) to preserve the volume level for future calls.</td>
</tr>
</tbody>
</table>

Using a Headset

Your phone supports four- or six-wire headset jacks for wired headsets. Cisco Unified IP Phones 7962G and 7942G also support wireless headsets. For information about purchasing headsets, see Using a Headset, page 6.
You can use a headset with all of the controls on your phone, including \(\text{①}\) and \(\text{②}\). However, if you use a wireless headset, refer to the wireless headset documentation for instructions.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toggle headset mode on and off</td>
<td>Press (\text{③}).</td>
</tr>
<tr>
<td>Switch to a handset</td>
<td>Lift the handset.</td>
</tr>
<tr>
<td>Adjust the volume level for a call</td>
<td>Press (\text{③}) during a call or after invoking a dial tone. Press (\text{Save}) to preserve the volume level for future calls.</td>
</tr>
</tbody>
</table>
If you use AutoAnswer, see Using AutoAnswer with a Headset or Speakerphone, page 53.

**Using a Wireless Headset**
Cisco Unified IP Phones 7962G and 7942G support wireless headsets. Refer to the wireless headset documentation for information about using the wireless headset’s remote features. Also, check with your system administrator to be sure your phone is enabled to use a wireless headset with the wireless headset remote hookswitch control feature.

**Using Wideband with your Headset**
If you use a headset that supports wideband, you may experience improved audio sensitivity if you enable the wideband setting on your phone (this setting is disabled by default). To access the setting, choose > User Preferences > Audio Preferences > Wideband Headset.
If the Wideband Headset setting shows as dimmed, then this setting is not user controllable.
Check with your system administrator to be sure your phone system is configured to use wideband. If the system is not configured for wideband, you may not detect any additional audio sensitivity even when using a wideband headset. To learn more about your headset, refer to the headset documentation or ask your system administrator for assistance.

**Using a Speakerphone**
Many of the actions you can take to dial a number or answer a call will automatically trigger speakerphone mode, assuming that the handset is in its cradle and is not lit.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toggle speakerphone mode on or off</td>
<td>Press .</td>
</tr>
<tr>
<td>Switch to a handset</td>
<td>Lift the handset.</td>
</tr>
</tbody>
</table>
| Adjust the volume level for a call | Press during a call or after invoking a dial tone.  
                                     | Press Save to preserve the volume level for future calls. |
**Using AutoAnswer with a Headset or Speakerphone**

When AutoAnswer is enabled, your phone answers incoming calls automatically after a few rings. Your system administrator configures AutoAnswer to use either the speakerphone or a headset. You may use AutoAnswer if you receive a high volume of incoming calls.

<table>
<thead>
<tr>
<th>If you...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use AutoAnswer with a headset</td>
<td>Keep headset mode active (in other words, keep [headset icon] illuminated), even when you are not on a call.</td>
</tr>
<tr>
<td></td>
<td>To keep headset mode active, do the following:</td>
</tr>
<tr>
<td></td>
<td>• Press <strong>EndCall</strong> to hang up.</td>
</tr>
<tr>
<td></td>
<td>• Press <strong>New Call</strong> or <strong>Dial</strong> to place new calls.</td>
</tr>
<tr>
<td></td>
<td>If your phone is set up to use AutoAnswer in headset mode, calls are automatically answered only if [headset icon] is illuminated.</td>
</tr>
<tr>
<td></td>
<td>Otherwise, calls ring normally and you must manually answer them.</td>
</tr>
</tbody>
</table>

| Use AutoAnswer with the speakerphone | Keep the handset in the cradle and headset mode inactive ([headset icon] unlit). |
|                                      | Otherwise, calls ring normally and you must manually answer them.          |

**Tip**

AutoAnswer is disabled when the Do Not Disturb feature is active.
## Changing Phone Settings

You can personalize your Cisco Unified IP Phone by adjusting the ring tone, background image, and other settings.

### Customizing Rings and Message Indicators

You can customize how your phone indicates an incoming call and a new voice mail message. You can also adjust the ringer volume for your phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| **Change the ring tone per line** | 1. Choose 📞 > User Preferences > Rings.  
2. Choose a phone line or the default ring setting.  
3. Choose a ring tone to play a sample of it.  
4. Press Select and Save to set the ring tone, or press Cancel. |
| **Adjust the volume level for the phone ringer** | Press 📞 while the handset is in the cradle and the headset and speakerphone buttons are off. The new ringer volume is saved automatically.  
**Note** Check with your system administrator to see if a minimum ringer-volume setting was configured. |
| **Change the ring pattern per line (flash-only, ring once, beep-only, etc.)** | 1. Log in to your Cisco Unified CM User Options web pages. (See Accessing Your User Options Web Pages, page 63.)  
2. Access your call ring pattern settings. (See Controlling Line Settings on the Web, page 70.)  
**Note** Before you can access this setting, your system administrator may need to enable it for you. |
| **Change the way the audible voice message indicator sounds on your phone** | 1. Log in to your User Options web pages. (See Accessing Your User Options Web Pages, page 63.)  
2. Access your message indicator settings. (See Controlling Line Settings on the Web, page 70.) |
| **Change the way that the voice message light on your handset works** | 1. Log in to your User Options web pages. (See Accessing Your User Options Web Pages, page 63.)  
2. Access your message indicator settings. (See Controlling Line Settings on the Web, page 70.)  
**Note** Typically, the default system policy is to indicate a new voice message by displaying a steady light on the handset light strip.
Tip
You can customize your phone to have up to six distinctive ring tones. In addition, you can have a default ring tone.

## Customizing the Phone Screen

You can adjust the characteristics of your phone screen.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Change the phone screen contrast | 1. Choose > User Preferences > Contrast.  
2. To make adjustments, press Up, Down or .  
3. Press Save, or press Cancel.  
**Note** If you accidentally save a very light or very dark contrast and cannot see the phone screen display, see Troubleshooting Your Phone, page 78. |
| Change the background image | 1. Choose > User Preferences > Background Images.  
2. Scroll through available images and press Select to choose an image.  
3. Press Preview to see a larger view of the background image.  
4. Press Exit to return to the selection menu.  
5. Press Save to accept the image or press Cancel.  
**Note** If you do not see a selection of images, then this option has not been enabled on your system. |
| Change the language on your screen | 1. Log in to your User Options web pages. (See Accessing Your User Options Web Pages, page 63.)  
2. Access your user settings. (See Controlling User Settings on the Web, page 69.) |
| Change the line text label | 1. Log in to your User Options web pages. (See Accessing Your User Options Web Pages, page 63.)  
2. Access your line label settings. (See Controlling Line Settings on the Web, page 70.) |
Using Call Logs and Directories

This section describes how you can use call logs and directories. To access both features, use the Directories button.

Using Call Logs

Your phone maintains call logs that contain records of your missed, placed, and received calls. Your system administrator determines if missed calls are logged on your phone in the missed calls directory for a given line appearance on your phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>View your call logs</td>
<td>Choose &gt; Missed Calls, Placed Calls, or Received Calls. Each stores up to 100 records.</td>
</tr>
</tbody>
</table>
| Display details for a single call record | 1. Choose > Missed Calls, Placed Calls, or Received Calls.  
2. Highlight a call record.  
3. Press Details. Doing so displays information such as called number, calling number, time of day, and call duration (for placed and received calls only). |
| Erase all call records in all logs | Press , then press Clear. |
| Erase all call records in a single log | 1. Choose > Missed Calls, Placed Calls, or Received Calls.  
2. Highlight a call record.  
3. Press Clear. (You may need to press the more softkey to display Clear.) |
| Erase a single call record   | 1. Choose > Missed Calls, Placed Calls, or Received Calls.  
2. Highlight a call record.  
3. Press Delete. |
### Dial from a call log (while not on another call)

1. Choose menu > Missed Calls, Placed Calls, or Received Calls.
2. Highlight a call record.

**Note** If the Details softkey appears, the call is the primary entry of a multiparty call. See the Tips section below.

3. If you need to edit the displayed number, press EditDial followed by << or >>. To delete the number, press EditDial followed by Delete. (You may need to press the more softkey to display Delete.)
4. Go off-hook to place the call.

### Dial from a call log (while connected to another call)

1. Choose menu > Missed Calls, Placed Calls, or Received Calls.
2. Highlight a call record.

**Note** If the Details softkey appears, the call is the primary entry of a multiparty call. See the Tips section below.

3. If you need to edit the displayed number, press EditDial followed by << or >>. To delete the number, press EditDial followed by Delete. (You may need to press the more softkey to display Delete.)
4. Press Dial.
5. Choose a menu item to handle the original call:
   - Hold—Puts the first call on hold and dials the second.
   - Transfer—Transfers the first party to the second and drops you from the call. (Press Transfer again after dialing to complete the action.)
   - Conference—Creates a conference call with all parties, including you. (Press Conf or Conference again after dialing to complete the action.)
   - EndCall—Disconnects the first call and dials the second.

### See if the line in the call log is busy before placing a call to that line

Look for Busy Lamp Field indicators. See **Using BLF to Determine a Line State**, page 43.

### Place a call from a URL entry in a call log (SIP phones only)

1. Choose menu > Missed Calls, Placed Calls, or Received Calls.
2. Highlight the URL entry that you want to dial.
3. If you need to edit the entry, press EditDial.
4. The icon appears to indicate that you can begin editing characters in the URL entry.
5. Press Dial.
Tips

- (SCCP and SIP phones) Your phone may be set up for international call logging, which is indicated by a “+” symbol on the call logs, redial, or call directory entries. See your system administrator for more information.
- (SCCP phones only) To view the complete call record of a multiparty call (for example, of call that has been forwarded or transferred to you), highlight the call record and press Details. The Details record shows two entries with the name and number for each missed or received multiparty call:
  - First entry—Last completed multiparty call
  - Second entry—First completed multiparty call

Directory Dialing

Depending on configuration, your phone can provide corporate and personal directory features:

- Corporate Directory—Corporate contacts that you can access on your phone. Your system administrator sets up and maintains your Corporate Directory.
- Personal Directory—If available, personal contacts and associated speed-dial codes that you can configure and access from your phone and Cisco Unified CM User Options web pages. Personal Directory is comprised of Personal Address Book (PAB) and Fast Dials:
  - PAB is a directory of your personal contacts.
  - Fast Dials allows you to assign codes to PAB entries for quick dialing.

Using Corporate Directory on Your Phone

You can use a corporate directory to place calls to coworkers.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dial from a corporate directory (while not on another call)</td>
<td>1. Choose &gt; Corporate Directory (exact name can vary).</td>
</tr>
<tr>
<td></td>
<td>2. Use your keypad to enter a full or partial name and press Search.</td>
</tr>
<tr>
<td></td>
<td>3. To dial, select the listing, or scroll to the listing and go off-hook.</td>
</tr>
</tbody>
</table>
Tip
Use the numbers on your keypad to enter characters on your phone screen. Use the Navigation button on your phone to move between input fields.

## Using Personal Directory on Your Phone

The Personal Directory feature set contains your Personal Address Book (PAB) and Fast Dials. This section describes how to set up and use Personal Directory on your phone. Alternately, see Using the Personal Directory on the Web, page 64.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Access Personal Directory (for PAB and Fast Dial codes) | 1. Choose PAB > Personal Directory (exact name can vary).  
2. Enter your Cisco Unified Communications Manager user ID and PIN, then press Submit. |
| Search for a PAB entry | 1. Access Personal Directory, then choose Personal Address Book.  
2. Enter search criteria and press Submit.  
3. You can choose Previous or Next to move through listings.  
4. Highlight the PAB listing that you want and press Select. |
<table>
<thead>
<tr>
<th><strong>If you want to...</strong></th>
<th><strong>Then...</strong></th>
</tr>
</thead>
</table>
| **Dial from a PAB entry** | 1. Search for a listing.  
2. Highlight the listing and press Select.  
3. Press Dial. (You may need to press the more softkey to see Dial.)  
4. Enter the participant’s phone number.  
5. Highlight the number that you want to dial and press OK.  
6. Press OK again to dial the number. |
| **Delete a PAB entry** | 1. Search for a listing.  
2. Highlight the listing and press Select.  
3. Press Delete.  
4. Choose OK to confirm the deletion. |
| **Edit a PAB entry** | 1. Search for a listing.  
2. Highlight the listing and press Edit to modify a name or email address.  
3. If necessary, choose Phones to modify a phone number.  
4. Press Update. |
| **Add a new PAB entry** | 1. Access Personal Directory, then choose Personal Address Book.  
2. Access the Search page by choosing Submit. (You do not need to input search information first.)  
4. Use your phone keypad to enter a name and email information.  
5. Choose Phones and use the keypad to enter phone numbers. Be sure to include any necessary access codes such as a 9 or 1.  
6. Choose Submit to add the entry to the database. |
| **Assign a Fast Dial code to a PAB entry** | 1. Search for a PAB entry.  
2. Highlight the listing and press Select.  
4. Highlight the number that you want to dial and press Select.  
5. Highlight the Fast Dial code that you want to assign to the number and press Select. |
### If you want to...  
### Then...

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
3. Highlight a Fast Dial code that is unassigned and press Select.  
4. Press Assign.  
5. Enter a phone number.  
6. Press Update. |
2. You can choose Previous or Next to move through listings.  
3. Highlight the listing that you want and press Select. |
| Place a call using a Fast Dial code | 1. Search for a Fast Dial code.  
2. Highlight the listing you want and press Select.  
3. Press Dial.  
4. Choose OK to complete the action. |
| Delete a Fast Dial code | 1. Search for a Fast Dial code.  
2. Highlight the listing you want and press Select.  
3. Press Remove. |
| Log out of Personal Directory | 1. Choose > Personal Directory (exact name can vary).  
2. Choose Logout. |

### Tips
- Your system administrator can provide you with the user ID and PIN that you need to log in to Personal Directory.
- Personal Directory automatically logs you out after a certain amount of time. This time limit can vary. Ask your system administrator for more information.
- Use the numbers on your keypad to enter characters on your phone screen. Use the Navigation button on your phone to move between input fields.
- (SCCP and SIP phones) Your phone may be set up for international call logging, which is indicated by a “+” symbol on the call logs, redial, or call directory entries. See your system administrator for more information.
# Accessing Voice Messages

To access voice messages, press the Messages button ☑️.

**Note**
Your company determines the voice-message service that your phone system uses. For the most accurate and detailed information about your service, refer to the documentation that came with it.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Set up and personalize your voice message service | Press ☑️ and follow the voice instructions.  
  If a menu appears on your screen, choose an appropriate menu item. |
| Check for your new voice messages | Look for:  
  - A steady red light on your handset. (This indicator can vary. See Customizing Rings and Message Indicators, page 54.)  
  - A flashing message waiting icon ☑️ and text message on your phone screen.  
  **Note** The red light and message waiting icon display only when you have a message on your primary line, even if you receive voice messages on other lines.  
  Listen for:  
  - A stutter tone from your handset, headset, or speakerphone when you place a call.  
  **Note** The stutter tone is line-specific. You hear it only when using the line with the waiting message. |
| Listen to your voice messages or access the voice-messages menu | Press ☑️.  
  Depending on your voice-message service, doing so auto-dials the message service or provides a menu on your screen.  
  If you are connecting to a voice-message service, the line that has a voice message is selected by default. If more than one line has a voice message, the first available line is selected.  
  To connect each time to the voice-message service on the primary line, contact your system administrator for the options. |
| Send a call to a voice message system | Press iDivert. For more information, see Sending a Call to a Voice Message System, page 28. |
Using the User Options Web Pages

Your Cisco Unified IP Phone is a network device that can share information with other network devices in your company, including your personal computer. You can use your computer to log in to your Cisco Unified CM User Options web pages, where you can control features, settings, and services for your Cisco Unified IP Phone. For example, you can set up speed-dial buttons from your User Options web pages.

Accessing Your User Options Web Pages

This section describes how to log in and select a phone device.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this...</th>
</tr>
</thead>
</table>
| Log in to your User Options web pages | 1. Obtain a User Options URL, user ID, and default password from your system administrator.  
2. Open a web browser on your computer, enter the URL, and log on.  
3. If prompted to accept security settings, click Yes or Install Certificate.  
The Cisco Unified Communications Manager User Options main web page displays. From this page you can choose User Options to access User Settings, Directory features, a Personal Address Book, and Fast Dials. Or, to access phone-specific options, select a device (see below). |
| Select a device after logging in | 1. After you have logged in to your User Options web pages, choose User Options > Device.  
The Device Configuration page displays.  
2. If you have multiple devices assigned to you, choose the appropriate device (phone model, Extension Mobility profile, or Remote Destination profile) from the Name drop-down menu.  
Note Toolbar buttons located at the top of the Device Configuration page are specific to the selected device type. |
| Select a configuration option after logging in | 1. After you have logged in to your User Options web pages, choose User Options to access User Settings, Directory, Personal Address Book, Fast Dials, and Mobility Settings.  
2. To return to the Device Configuration page from another page, choose User Options > Device. |
Configuring Features and Services on the Web

The topics in this section describe how to configure features and services from your User Options web pages after logging in. See Accessing Your User Options Web Pages, page 63.

Using the Personal Directory on the Web

The Personal Directory feature set that you can access on your computer consists of:

- A Personal Address Book (PAB)
- Fast Dials
- Cisco Unified Communications Manager Address Book Synchronizer

Note: You can also access PAB and Fast Dials from your phone. See Using Personal Directory on Your Phone, page 59.

Using Your Personal Address Book on the Web

This section describes how to use your PAB from your User Options web pages.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Add a new PAB entry</td>
<td>1. Choose User Options &gt; Personal Address Book.</td>
</tr>
<tr>
<td></td>
<td>2. Click Add New.</td>
</tr>
<tr>
<td></td>
<td>3. Enter information for the entry and click Save.</td>
</tr>
</tbody>
</table>

Assign a line button for your PAB

Note: Before you can assign a line button for your PAB, your system administrator must configure the phone to display services. Contact your system administrator for more information.

1. Choose User Options > Device.
2. Click Service URL.
3. From the Button drop-down list box, choose the Personal Address Book service.
4. Enter a phone label for the button and then click Save.
5. To refresh the phone configuration, click Reset and then Restart.

You can now press the line button to access the PAB codes.

| Search for a PAB entry          | 1. Choose User Options > Personal Address Book.                                                |
|                                 | 2. Specify search information and click Find.                                                   |
## Configuring Fast Dials on the Web

This section describes how to assign Fast Dials from your User Options web pages.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
</table>
| Edit a PAB entry  | 1. Search for a PAB entry.  
                  | 2. Click a name or nickname.  
                  | 3. Edit the entry as needed and click Save. |
| Delete a PAB entry| 1. Search for a PAB entry.  
                  | 2. Select one or more entries and click Delete Selected. |

### If you want to... Then do this after you log in...

| Assign a Fast Dial code to a PAB entry | 1. Create a PAB entry. See Using Your Personal Address Book on the Web, page 64.  
                                           | 2. Choose User Options > Fast Dials.  
                                           | 3. Click Add New.  
                                           | 4. To find the appropriate PAB entry, use the Search Options area.  
                                           | 5. In the Search Results area, click a phone number.  
                                           | 6. Change the Fast Dial code, if desired, and click Save. |
| Assign a Fast Dial code to a phone number (without using a PAB entry) | 1. Choose User Options > Fast Dials.  
                                           | 2. Click Add New.  
                                           | 3. Change the Fast Dial code, if desired.  
                                           | 4. Enter a phone number and click Save. |
| Assign a line button for Fast Dial | Note Before you can assign a line button for Fast Dial, your system administrator must configure the phone to display services. Contact your system administrator for more information.  
                                           | 1. Choose User Options > Device.  
                                           | 2. Click Service URL.  
                                           | 3. From the Button drop-down list box, choose the Fast Dial service.  
                                           | 4. Enter a phone label for the button and then click Save.  
                                           | 5. To refresh the phone configuration, click Reset and then Restart.  
                                           You can now press the line button to access the Fast Dial codes. |
                                           | 2. Specify the search information and click Find. |
### Tips
- You can create up to 500 Fast Dial and PAB entries.
- You can create a new Fast Dial entry without using a PAB entry. These Fast Dial entries are labeled “raw” in the User Options web pages and do not display a configurable text label.

### Using the Address Book Synchronization Tool
You can use the Address Book Synchronization Tool ( TABSynch ) to synchronize your existing Microsoft Windows Address Book (if applicable) with your PAB. Entries from your Microsoft Windows Address Book will then be accessible on your Cisco Unified IP Phone and User Options web pages. Your system administrator can give you access to TABSynch and provide detailed instructions.

### Setting Up Speed Dials on the Web
Depending on configuration, your phone can support several speed-dial features:
- Speed-dial buttons
- Abbreviated Dialing
- Fast Dials

#### Note
For help using speed-dial features, see **Speed Dialing, page 36.**
Setting Up Phone Services on the Web

Phone services can include special phone features, network data, and web-based information (such as stock quotes and movie listings). You must first subscribe to a phone service before accessing it on your phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
</table>
| **Set up speed-dial buttons** | 1. Choose User Options > Device.  
  2. Choose a phone from the Name drop-down menu.  
  3. Click Speed Dials.  
  4. Enter a number and label for a speed-dial button (programmable button) on your phone.  
  5. Click Save.  
  **Note** Your phone uses the ASCII Label field. |
| **Set up Abbreviated Dialing** | 1. Choose User Options > Device.  
  2. Choose a phone from the Name drop-down menu.  
  3. Click Speed Dials.  
  4. Enter a number and label for an Abbreviated Dialing code.  
  5. Click Save. |
| **Set up Fast Dials** | See Configuring Fast Dials on the Web, page 65.  
You can also set up Fast Dials on your phone. See Using Personal Directory on Your Phone, page 59. |

Subscribe to a service

| Add a service to an available   | 1. Choose User Options > Device.  
| programmable phone button       | 2. Choose a phone from the Name drop-down menu.                                                 
|                                 | 3. Click Service URL.                                                                           |
|                                 | **Note** If you do not see this option, ask your system administrator to configure a service URL button for your phone. |
|                                 | 4. Choose a service from the Button Service drop-down list.                                     
|                                 | 5. If you want to rename the service, edit the label fields.                                     |
|                                 | **Note** Your phone uses the ASCII Label field if the phone does not support double-byte character sets. |
|                                 | 6. Click Save.                                                                                   
|                                 | 7. Click Reset to reset your phone (necessary to see the new button label on your phone).        |
Controlling User Settings on the Web

User settings include your password, PIN, and language (locale) settings.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access a service on your phone</td>
<td>Select a service using one of the following buttons:</td>
</tr>
<tr>
<td></td>
<td>Programmable phone button:</td>
</tr>
<tr>
<td></td>
<td>( ) &gt; Services</td>
</tr>
<tr>
<td></td>
<td>Feature buttons:</td>
</tr>
<tr>
<td></td>
<td>Messages</td>
</tr>
<tr>
<td></td>
<td>Services</td>
</tr>
<tr>
<td></td>
<td>Directories</td>
</tr>
<tr>
<td></td>
<td><strong>Note</strong> The services available for your phone depend on the phone system configuration and the services you subscribed to. Ask your phone system administrator for more information.</td>
</tr>
<tr>
<td></td>
<td><strong>Note</strong> If only one service is configured, the service opens by default. If more than one service is configured, select an option from the menu on the screen.</td>
</tr>
</tbody>
</table>

### Change your password

1. Choose User Options > User Settings.
2. In the Browser Password area, enter information.
3. Click Save.

### Change your PIN

1. Choose User Options > User Settings.
2. In the Phone PIN area, enter information.
3. Click Save.

### Change the language (locale) for your User Options web pages

1. Choose User Options > User Settings.
2. In the User Locale area, choose an item from the Locale drop-down list.
3. Click Save.

### Change the language (locale) for your phone screen

1. Choose User Options > User Settings.
2. Choose an item from the User Locale drop-down list.
3. Click Save.
**Tip**
Your PIN and password allow you to access different features and services. For example, use your PIN to log in to Cisco Extension Mobility or Personal Directory on your phone. Use your password to log in to your User Options web pages and Cisco WebDialer on your personal computer. For more information, ask your system administrator.

**Controlling Line Settings on the Web**
Line settings affect a specific phone line (directory number) on your phone. Line settings can include call-forwarding, voice message indicators, ring patterns, and line labels.

You can set up other line settings directly on your phone:
- Set up call forwarding for your primary phone line—see Forwarding Calls to Another Number, page 28.
- Change rings, display, and other phone-model specific settings—see Changing Phone Settings, page 54.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
</table>
| Set up call forwarding per line | 1. Choose User Options > Device.  
2. Choose a phone from the Name drop-down menu.  
3. Click Line Settings.  
4. If you have more than one directory number (line) assigned to your phone, choose a line from the Line drop-down menu.  
5. In the Incoming Call Forwarding area, choose call forwarding settings for various conditions.  
6. Click Save.                                                                                     |
| Change the voice message indicator (lamp) setting per line | 1. Choose User Options > Device.  
2. Choose a phone from the Name drop-down menu.  
3. Click Line Settings.  
4. If you have more than one directory number (line) assigned to your phone, choose a line from the Line drop-down menu.  
5. In the Message Waiting Lamp area, choose from various settings.  
**Note** Typically, the default message waiting setting prompts your phone to display a steady red light from the handset light strip to indicate a new voice message.  
6. Click Save.                                                                                     |
<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
</table>
| Change the audible voice message indicator setting per line | 1. Choose User Options > Device.  
2. Choose a phone from the Name drop-down menu.  
3. Click Line Settings.  
4. If you have more than one directory number (line) assigned to your phone, choose a line from the Line drop-down menu.  
5. In the Audible Message Waiting Indicator area, choose from various settings.  
**Note** Typically, the default message waiting setting prompts your phone to display a steady red light from the handset light strip to indicate a new voice message.  
6. Click Save. |
| Change or create a line text label that appears on your phone screen | 1. Choose User Options > Device.  
2. Choose a phone from the Name drop-down menu.  
3. Click Line Settings.  
4. If you have more than one directory number (line) assigned to your phone, choose a line from the Line drop-down menu.  
5. In the Line Text Label area, enter a text label.  
6. Click Save.  
**Note** Your phone uses the ASCII Label field if the phone does not support double-byte character sets. |
Setting Up Phones and Access Lists for Mobile Connect

When using Cisco Mobile Connect, you must add your mobile and other phones that you want to use to make and receive calls using the same directory numbers as your desk phone. These phones are called remote destinations. You can also define access lists to restrict or allow calls from certain numbers to be sent to your mobile phone.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
</table>
| Create an access list | 1. Choose User Options > Mobility Settings > Access Lists.  
2. Click Add New.  
3. Enter a name to identify the access list and a description (optional).  
4. Choose whether the access list will allow or block specified calls.  
5. Click Save.  
6. Click Add Member to add phone numbers or filters to the list.  
7. Select an option from the Filter Mask drop-down list box. You can filter a directory number, calls with restricted caller ID (Not Available), or calls with anonymous caller ID (Private).  
8. If you select a directory number from the Filter Mask drop-down list box, enter a phone number or filter in the DN Mask field. You can use the following wild cards to define a filter:  
   - X (upper or lower case)—Matches a single digit. For example, 408555123X matches any number between 4085551230 and 4085551239.  
   - !—Matches any number of digits. For example, 408! matches any number starts with 408.  
   - #—Used as a single digit for exact match.  
9. To add this member to the access list, click Save.  
10. To save the access list, click Save. |
Add a new remote destination

1. Choose User Options > Mobility Settings > Remote Destinations.
2. Click Add New.
3. Enter the following information:
   - Name—Enter a name for the mobile (or other) phone.
   - Destination Number—Enter your mobile phone number.
4. Select your remote destination profile from the drop-down list box. Your remote destination profile contains the settings that apply to remote destinations that you create.
5. Select the Mobile Phone check box to allow your remote destination to accept a call sent from your desktop phone.
6. Select the Enable Mobile Connect check box to allow your remote destination to ring simultaneously with your desktop phone.
7. Choose one of the following options in the Ring Schedule area:
   - All the time—Choose this option if you do not want to impose day and time restrictions on ringing the remote destination.
   - As specified below—Choose this option and select from the following items to set up a ring schedule based on day and time:
     - Select a check box for each day of the week you want to allow calls to ring the remote destination.
     - For each day, select All Day or select the beginning and ending times from the drop-down lists.
     - Select the time zone from the drop-down list box.
8. Choose one of the following ringing options:
   - Always ring this destination.
   - Ring this destination only if the caller is in the allowed access list that you select.
   - Do not ring this destination if the caller is in the blocked access list that you select.
9. Click Save.

Note: The ring schedule drop-down list boxes include only the access lists that you have created.

If you want to... Then do this after you log in...

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then do this after you log in...</th>
</tr>
</thead>
</table>
| Add a new remote destination | 1. Choose User Options > Mobility Settings > Remote Destinations.  
2. Click Add New.  
3. Enter the following information:  
   - Name—Enter a name for the mobile (or other) phone.  
   - Destination Number—Enter your mobile phone number.  
4. Select your remote destination profile from the drop-down list box. Your remote destination profile contains the settings that apply to remote destinations that you create.  
5. Select the Mobile Phone check box to allow your remote destination to accept a call sent from your desktop phone.  
6. Select the Enable Mobile Connect check box to allow your remote destination to ring simultaneously with your desktop phone.  
7. Choose one of the following options in the Ring Schedule area:  
   - All the time—Choose this option if you do not want to impose day and time restrictions on ringing the remote destination.  
   - As specified below—Choose this option and select from the following items to set up a ring schedule based on day and time:  
     - Select a check box for each day of the week you want to allow calls to ring the remote destination.  
     - For each day, select All Day or select the beginning and ending times from the drop-down lists.  
     - Select the time zone from the drop-down list box.  
8. Choose one of the following ringing options:  
   - Always ring this destination.  
   - Ring this destination only if the caller is in the allowed access list that you select.  
   - Do not ring this destination if the caller is in the blocked access list that you select.  
9. Click Save. |
## Using Cisco WebDialer

Cisco WebDialer allows you to make calls on your Cisco Unified IP Phone to directory contacts by clicking items in a web browser. Your system administrator must configure this feature for you.

<table>
<thead>
<tr>
<th>If you want to...</th>
<th>Then...</th>
</tr>
</thead>
</table>
| Use WebDialer with your User Options directory | 1. Log in to your User Options web pages. See [Accessing Your User Options Web Pages, page 63](#).  
2. Choose User Options > Directory and search for a coworker.  
3. Click the number that you want to dial.  
4. If this is your first time using WebDialer, set up preferences on the Make Call page and click Dial. The call is now placed on your phone. (See the last row in this table to learn how to suppress this page in the future, if desired.)  
5. To end a call, click **Hangup** or hang up from your phone. |
| Use WebDialer with another online corporate directory (not your User Options directory) | 1. Log in to a WebDialer-enabled corporate directory and search for coworkers.  
2. Click the number that you want to dial.  
3. When prompted, enter your user ID and password.  
4. If this is your first time using WebDialer, set up preferences on the Make Call page and click Dial. The call is now placed on your phone. (See the last row in this table to learn how to suppress this page in the future, if desired.)  
5. To end a call, click **Hangup** or hang up from your phone. |
| Log out of WebDialer | Click the logout icon in the Make Call or Hang Up page. |
### If you want to... | Then...
---|---
Set up, view, or change WebDialer preferences | Access the Make Call page. After you click the number that you want to dial, the page appears the first time you use WebDialer and contains these options:
- Preferred language—Determines the language used for WebDialer settings and prompts.
- Use preferred device—Identifies the Cisco Unified IP phone (calling device) and directory number (calling line) that you will use to place WebDialer calls:
  - If you have one phone with a single line, the appropriate phone and line are selected automatically, or you can choose a phone and/or line.
  - If you have more than one phone, it will be specified by device type and MAC address.
  (To display the host name on the phone, choose > Network Configuration > Host Name.)
If you have an Extension Mobility profile, you can select your Extension Mobility logged-in device from the calling device menu.
- Do not display call confirmation—If selected, prompts WebDialer to suppress the Make Call page. This page appears by default after you click a phone number in a WebDialer-enabled online directory.
## Understanding Additional Configuration Options

Your system administrator can configure your phone to use specific button and softkey templates along with special services and features, if appropriate. This table provides an overview of some configuration options that you may want to discuss with your phone system administrator based on your calling needs or work environment.

<table>
<thead>
<tr>
<th>If you...</th>

</tbody>
</table>
| Share phones or office space with coworkers | Consider using:  
- Call Park to store and retrieve calls without using the transfer feature.  
- Call Pickup to answer calls ringing on another phone.  
- A shared line to view or join coworkers’ calls.  
- Cisco Extension Mobility to apply your phone number and user profile to a shared Cisco Unified IP Phone. | Ask your system administrator about these features and see:  
- Advanced Call Handling, page 36  
- Using a Shared Line, page 39  
- Using Cisco Extension Mobility, page 47 |
| Answer calls frequently or handle calls on someone’s behalf | Ask your system administrator to set up the AutoAnswer feature for your phone. | See Using AutoAnswer with a Headset or Speakerphone, page 33. |
| Need to make video calls (SCCP phones only) | Consider using Cisco Unified Video Advantage, which enables you to make video calls using your Cisco Unified IP Phone, your personal computer, and an external video camera. | Contact your system administrator for additional assistance and see the Cisco Unified Video Advantage Quick Start Guide and User Guide. |
| Determine the state of a phone line associated with a speed-dial button, call log, or directory listing on your phone | Ask your administrator to set up the Busy Lamp Field (BLF) feature for your phone. | See Using BLF to Determine a Line State, page 43. |
| Want to temporarily apply your phone number and settings to a shared Cisco Unified IP Phone | Ask your system administrator about the Cisco Extension Mobility Service. | See Using Cisco Extension Mobility, page 47. |
# Troubleshooting Your Phone

This section provides troubleshooting information for your Cisco Unified IP Phone.

## General Troubleshooting

This section provides information to help you troubleshoot general problems with your phone. For more information, see your system administrator.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| You cannot hear a dial tone or complete a call | One or more of the following factors may apply:  
- You must log into the Extension Mobility service.  
- You must enter a client matter code (CMC) or forced authorization code (FAC) after dialing a number. (SCCP phones only)  
- Your phone has time-of-day restrictions that prevent you from using some features during certain hours of the day. |
| The Settings button is unresponsive | Your system administrator may have disabled on your phone. |
| The softkey that you want to use does not appear | One or more of the following factors may apply:  
- You must press more to reveal additional softkeys.  
- You must change the line state (for example, go off-hook or have a connected call).  
- Your phone is not configured to support the feature associated with that softkey. |
| Barge fails and results in a fast busy tone | You cannot barge an encrypted call if the phone you are using is not configured for encryption. When your barge attempt fails for this reason, your phone plays a fast busy tone. |
| You are disconnected from a call that you joined using Barge | You will be disconnected from a call that you have joined using Barge if the call is put on hold, transferred, or turned into a conference call. |
**Viewing Phone Administration Data**

Your system administrator may ask you to access administration data on your phone for troubleshooting purposes.

<table>
<thead>
<tr>
<th>If you are asked to...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access network configuration data</td>
<td>Choose [ ] &gt; Network Configuration and select the network configuration item that you want to view.</td>
</tr>
<tr>
<td>Access status data</td>
<td>Choose [ ] &gt; Status and select the status item that you want to view.</td>
</tr>
<tr>
<td>Access phone model information</td>
<td>Choose [ ] &gt; Model Information.</td>
</tr>
</tbody>
</table>

### Symptom Explanation

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>CallBack fails</td>
<td>The other party may have call forwarding enabled.</td>
</tr>
<tr>
<td>The phone shows an error message when you attempt to set up Call Forward All</td>
<td>Your phone may reject your attempt to set up Call Forward All directly on the phone if the target number that you enter would create a Call Forward All loop or would exceed the maximum number of links permitted in a Call Forward All chain (also known as a maximum hop count). Ask your system administrator for details.</td>
</tr>
<tr>
<td>The phone screen display appears too light or too dark to read</td>
<td>If you accidentally save a very light or very dark phone screen contrast, you may not be able to see the phone screen display. Do the following procedure to adjust the contrast.</td>
</tr>
<tr>
<td></td>
<td>For Cisco Unified IP Phones 7961G, 7961G-GE, 7941G, and 7941G-GE:</td>
</tr>
<tr>
<td></td>
<td>1. Choose [ ]</td>
</tr>
<tr>
<td></td>
<td>2. Press 1, 3 on the keypad.</td>
</tr>
<tr>
<td></td>
<td>3. Press [ ] until you can see the phone screen display.</td>
</tr>
<tr>
<td></td>
<td>4. Press Save.</td>
</tr>
<tr>
<td></td>
<td>For Cisco Unified IP Phones 7962G and 7942G:</td>
</tr>
<tr>
<td></td>
<td>1. Choose [ ]</td>
</tr>
<tr>
<td></td>
<td>2. Press 1, 4 on the keypad.</td>
</tr>
<tr>
<td></td>
<td>3. Press [ ] until you can see the phone screen display.</td>
</tr>
<tr>
<td></td>
<td>4. Press Save.</td>
</tr>
</tbody>
</table>
Using the Quality Reporting Tool

Your system administrator may temporarily configure your phone with the Quality Reporting Tool (QRT) to troubleshoot performance problems. You can press QRT or Quality Reporting Tool to submit information to your system administrator. Depending on configuration, use the QRT to:

- Immediately report an audio problem on a current call.
- Select a general problem from a list of categories and choose reason codes.

<table>
<thead>
<tr>
