April 7th-8th & April 21st, 2021 | Virtual Meeting

Iain Reeve
Associate Director, Immigration
The Conference Board of Canada

Iain joined the Conference Board of Canada in 2020 as the Associate Director, Immigration Research. He is responsible for managing the Board’s immigration research agenda, engaging the National Immigration Centre membership, and contributing to public and policy debates about immigration in Canada and beyond. Before joining the Conference Board, Iain worked at Immigration, Refugees, and Citizenship Canada, spent time as a research consultant, and worked in the labour sector in British Columbia.

Iain has a PhD and MA in Political Studies from Queen’s University. His dissertation work was a comparison of provincial and federal approaches to immigrant selection and settlement policy and programs in Canada. His broader research interests included Canadian political and public policy institutions, fiscal federalism and the division of powers, and the comparison of international approaches to immigration and diversity. In recent years, Iain has become increasingly interested in research on the economic outcomes of newcomers to Canada, and the role of immigration in Canadian economic and labour market policy.

Manikantan P Chandrasekharan
Rural Employment Initiative Participant
Sault Ste. Marie

My name is Manikantan P Chandrasekharan (Mani). I was born in a coastal town in the state of Tamil Nadu on India's southern tip named Kanyakumari (Cape Comorin). I completed my bachelor's degree in Manufacturing Engineering from BMS college of Engineering in Bangalore, India and my post-graduation in Computer Integrated Manufacturing from Nanyang Technological University, Singapore.

After completing my post-graduation, I returned to India and joined Autoliv, leader in automotive safety systems. After the spinoff, I was moved to Veoneer, leader in automotive safety electronics. In the same year, I decided to complete my course on Project Management and was certified as a Project Management Professional by Project Management Institute.

The advantages of better education for my children, better work-life balance, better air to breathe, multi-cultural environment and better prospects for me and my wife led to my decision to move to Canada. I then started my process of applying for permanent residency through express entry. I received my ITA in January of 2019 and my CoPR in June 2019 and I did my soft-landing in Toronto in July 2019.

After finding a residence to stay in Mississauga with the help of my friends, I decided to bring my family to join me, and they arrived in August 2019. My wife could get a job immediately and she started to work at a senior living community as a recruiter. I landed in a Project Management job in an automotive company in February 2020.

I had approached the Newcomer Center of Peel (NCP) in October 2019 and they explained me of the opportunities that existed in the Rural and Northern community of Ontario. They also gave me the opportunity to participate in a job fair organized by them wherein I could meet various prospective employers and government representatives who gave insights of their community and job opportunities. I also learnt that the cost of living was much lesser in comparison with bigger cities like Mississauga. This led to my decision to move to the Northern community.

NCP shared my resume to City of Sault Ste Marie and Mr. Paul from the city helped me in forwarding my resume to my current employer Heliene. After joining Heliene in March 2020, I received help from Sault Career Community center to find an accommodation. The city also helped me by providing free bus pass for 12 rides and other goodies by which I felt most welcoming. My family moved to Soo in June 2020.
We found a school for my children closer to our residence. My family enjoys exploring various trails and beaches that are in close proximity to Soo. Although the winter is harsh in the north, the air with much lesser pollution, smaller time to commute has encouraged us to stay in Soo.

In my opinion in-order to attract more talents, the city could consider the settlement of the whole family instead of just a member of the family. For example, in my case, after moving to Soo, my wife still could not get an opportunity that matches her profile, we did not get any assistance on referring to a family doctor and help in getting admission to a school for my children.

**Master of Business Administration, 2015 – 2016**  
Swiss Montreux Business School, [Switzerland]

I am overcoming the challenges of settlement in Canada and this is something I went through with deep personal experience.

I am sure I can give a lot of motivation, support, and enthusiasm to those who are coming to our community and to Canada as well. I can inspire and fill with positive promising energy other newcomers and immigrants.
