

# IN YOUR ELEMENT NETE TSHIN E MINUPUIN ITLUAGIJANNI

The historic creation of the Labrador Campus of Memorial University in January 2022 ushered in a new era of university education in Labrador—education that reflects the peoples and places of Labrador, and celebrates the strengths of the past and present, while imagining new, flourishing futures.

We take our inspiration and guidance from the lands, waters, histories, and cultures of Labrador and the North, and work in partnership with Innu and Inuit in Labrador to design programs, co-create research, and share governance.

## Vision

The Labrador Campus of Memorial University will become a leading, thriving, and flourishing centre of education, research, community connections, and knowledge creation by and for Labrador and the North.

## Values

We are committed to positively impacting Labrador, the North, and society through our educational programs, research, scholarship, knowledge creation, teaching and learning, and commitments to and relationships with Innu, Inuit, and other Indigenous communities, governments, organizations, and knowledge holders.

## THE LABRADOR CAMPUS IS HOME TO:

### The School of Arctic & Subarctic Studies

The academic core of the Labrador Campus, offering and developing Northern-focused, Indigenous-led, and place-based undergraduate, graduate, and post-graduate degrees and diplomas.

### The Pye Centre for Northern Boreal Food Systems

An 80-acre research, education, community, and wellness farm located in Happy Valley-Goose Bay focused on supporting and enhancing Northern food systems and food security.

## Current Programs

### GRADUATE PROGRAMS IN ARCTIC & SUBARCTIC FUTURES

---

Combination of land-based and virtual learning, with Master's (coursework), Master's (thesis), PhD, and Diploma options. Flexible and stackable, with full-time and part-time options. Recognition of prior learning, professional experience, and cultural expertise are considered for admittance.

### BACHELOR OF SCIENCE IN NURSING

---

Four-year undergraduate degree, entirely in Labrador.

### DIPLOMA IN NORTHERN PEOPLES, LANDS, & RESOURCES

---

Undergraduate diploma focused on the intersection of peoples, places, and resource development in the North.

### ENGINEERING ONE

---

First year Engineering in Labrador, with a Certificate in Northern Technological Stewardship.

## Programs Under Development

### UNDERGRADUATE DEGREE IN ARCTIC & SUBARCTIC PEOPLES & PLACES

---

Made-in-Labrador interdisciplinary, land-based, and experiential program. Taught in modular format by faculty, Elders, and knowledge holders.

### PARTNER OPPORTUNITIES WITH OTHER FACULTIES & SCHOOLS THROUGHOUT MEMORIAL UNIVERSITY

---

Diverse programs to support Northern learners in education, health, and business, for example.

## Continued Growth

- Development and delivery of both unique made-in-Labrador programs and partnerships with other campuses to deliver diverse programs in Labrador.
- Expansion of staff and faculty to support growing mandates.
- Growth of diverse and multi-generational student population.
- Expansion and strengthening of partnership-based, Northern-led research and training.
- Focus on North-to-North learning and research opportunities.
- Enrichment and growth of community-focused public events and contributions.
- Planning for a new Indigenous-designed campus complex in Happy Valley-Goose Bay.
