

Tony and Kathy Duarte Award

This award was established by generous donations from family, friends and colleagues of Antonio (Tony) Duarte and Henriqueta (Kathy) Duarte, a husband and wife who worked for many years with Memorial University of Newfoundland. Tony was Supervisor of Laboratories for the Engineering Department. Kathy was a Lecturer in Spanish language for the Department of French and Spanish. They both loved working at Memorial University and built many lasting friendships among their colleagues. This Award reflects the special connection that Tony and Kathy had with Memorial. Valued at a portion of the income on the endowment, it will be granted annually on a rotating basis to students in the Faculty of Engineering and Applied Science and the Department of Modern Languages, Literatures and Cultures. In years where the award is granted to students in the Faculty of Engineering and Applied Science, recipients may be in any year of study in any undergraduate engineering program, and preference will be given to those that demonstrate interest in the application of engineering solutions to real world social inequality problems (e.g., clean water, affordable housing, environmental remediation, etc.). In years where the award is granted to students in the Department of Modern Languages, Literatures and Cultures, recipients may be in any year of study in the undergraduate Spanish program. In both instances, preference will be given to a student with demonstrated financial need. The recipient must meet the minimum academic requirements for an award as defined by the University. This award will be granted by the Senate Committee on Undergraduate Scholarships, Bursaries and Awards on the recommendation of the Dean, Faculty of Engineering and Applied Science or the Head, Department of Modern Languages, Literatures and Cultures as appropriate.
