

$$\Sigma \left\{ \sqrt{\quad} + \pi + \int \right\} = \$\$\$$$

MATH = SUCCESS

The 82 occupations listed in the diagram below will be forever unavailable to students who do not work hard enough to get the appropriate level of preparation from their high school mathematics courses. Many of these professions use mathematics every day, but those that do not require that students have a good grounding in math so that they can learn the skills required to do these jobs.

- a, b university entrance math courses required
- c university entrance math courses recommended
- d senior level high school math courses required
- e senior level high school math courses recommended

Original concept by Lorna Wiggon adapted and reprinted without permission of the Mathematics Department, Toronto Board of Education.
