

MATHEMATICS 419A/B
APPLIED MATHEMATICS HONOURS PROJECT

The calendar description for this course is virtually self-explanatory. An honours student will normally be expected, in consultation with the head or undergraduate officer, to settle upon a supervisor before the fall of his/her final year. The student will generally be registered in MATH 419A in the Fall and MATH 419B in the Winter of his/her last year.

Calendar description. 419A and 419B Applied Mathematics Honours Project is a two-semester linked course (six credit hours) that requires the student, with supervision by a member of the department, to prepare a dissertation in an area of Applied Mathematics. In addition to a written project, a one hour presentation will be given by the student at the end of the second semester.

Prerequisite: Registration in an honours or joint honours program in applied mathematics.

Note: Credit cannot be obtained for MATH 419A/B and the former 4199.
