

MATHEMATICS 439A/B
PURE MATHEMATICS HONOURS PROJECT

The calendar description for this course is virtually self-explanatory. An honours student will normally be expected, in consultation with the head or undergraduate officer, to settle upon a supervisor before the fall of his/her final year. The student will generally be registered in MATH 439A in the Fall and MATH 439B in the Winter of his/her last year.

Calendar description. 439A/B Pure Mathematics Honours Project is a two-semester linked course (six credit hours) that requires the student, with supervision by a member of the department, to prepare a dissertation in an area of Pure Mathematics. In addition to a written project, a one hour presentation will be given by the student at the end of the second semester.

Prerequisite: Registration in an Honours or Joint Honours program in Pure Mathematics.

Note: Credit can be awarded for only one of MATH 439A/B and MATH 4399.
