

## **About Kierrep**

Kierrep is an online staffing solution designed to guide caregivers on getting the proper certifications, verify employability readiness and provide mobility when needed so that homecare agencies can hire verified and mobile caregivers in their city faster.

## **Position: Web Developer Intern**

As a web developer intern, you will work directly with and provide feedback to the founder for the redesigning of web application to expand services and accommodate more sign-ups. This position offers valuable hands-on experience in understanding website design and development, and with guidance from the founder, your role will involve understanding product design, testing existing code, and formatting graphics for web use in the web development project.

## **Responsibilities Include:**

- Test, recommend improvements, and give feedback on existing technology.
- Write well-designed, testable, efficient code by using best web development practices.
- Design website layout/user interface, sign-ups, document upload portals and database using standard HTML/CSS/Javascript/SQL practices.
- Create and maintain clean code documentation.
- Provide technical support related to web-based systems.

## **Qualifications:**

- Interest in web platform development, product design or related field.
- Good knowledge of web development, web design and scripting languages and frameworks such as Javascript, HTML and CSS.
- Knowledge of AWS or related database services and management and SQL programming language.

- Excellent written and verbal communication skills.
- Team spirit and intercultural awareness.
- Detail-oriented with strong analytical and problem-solving skills.
- Ability to work independently and collaboratively in a team-oriented environment.

**Placement details:**

- The duration of this placement is **80 hours/semester**
- Location: **Remote**
- Upon completing your placement, you will receive an **\$825** honorarium.
- Deadline to apply: **September 30<sup>th</sup>, 2023.**
