Peer 2 Peer (P2P)

Peer support is a very effective means of improving employee mental health and wellness. It can range from providing a bridge between an employee with a problem and the people who can help, or simply lending an ear after a bad day.

Peer 2 Peer is comprised of a team of trained employee volunteers from across our organization. Their role is to support employees through their shared experiences as healthcare workers as well as other identified similarities such as mental illness, domestic violence, parenting issues, etc.

Employees can access P2P through Eastern Health's **Employee Virtual Assistant (EVA)** at www.checkwitheva.ca.
