

MRF 2016

Principal Investigator	Name of Grant	Title	Amount
Diana De Carvalho	Research & Development Grant	A novel prediction paradigm for the identification of sitting-induced low back pain developers	\$20,000
Sheila Drover	Research & Development Grant	Immunomodulation of triple negative breast cancer cells with small kinase inhibitors- mechanisms and relevance	\$20,000
Curtis French	Research & Development Grant	Assessment of the role of FOXL1 in the generation of otosclerosis	\$20,000
Robert Gendron	Research & Development Grant	Mapping of toxic retinoids in neovascular retinopathy by tip enhanced raman spectrometry (TERS)	\$20,000
Christopher Kovacs	Research & Development Grant	The role of parathyroid hormone-related protein (PTHrP) in regulating maternal calcium homeostasis during pregnancy	\$20,000
John McGuire	Research & Development Grant	Novel drug class for treating arthritis and stroke	\$20,000
Dake Qi	Research & Development Grant	Macrophage migration inhibitory factor (MIF) is a potential pharmacological target to treat metabolic syndrome	\$20,000
Qi Yuan	Research & Development Grant	A rat model of tauopathy testing the locus coeruleus origin hypothesis of Alzheimer's Disease	\$20,000
Ken Kao	Cox Award	Assessment of PYGO2 immunohistochemistry in the diagnosis of prostatic adenocarcinoma	\$28,000
Peter Daley	Project Grant	Fecal microbiota transplantation for primary therapy in Clostridium Difficile diarrhea – a placebo-blinded randomized clinical trial	\$20,000
Ross Feldman	Project Grant	Aldosterone as a regulator of prostate cancer growth and metastatic spread	\$20,000
