## MESSAGE FROM THE CHAIR

Thank you for considering a psychiatry residency at Memorial University. We are proud of our program and our graduates. We have had great success with entry into fellowship programs and many have gone on to faculty positions across North America.

Our program prides itself on the development of leadership potential, while ensuring a strong academic and clinical base leading to success wherever the journey takes you.

## MESSAGE FROM THE ADMINISTRATIVE RESIDENTS

Our residency training program offers unique and rewarding experiences to residents training in psychiatry who are looking for diverse learning opportunities in both rural and urban settings. Our staff to resident ratio provides a valuable learning environment and the size of our program fosters collegiality and mentorship that strengthens the training experience.

Our residents represent a diverse group of individuals from all over the world and Newfoundland provides a beautiful and scenic home.

We know that you will have a fulfilling experience at Memorial with the opportunity to become a great psychiatrist.

## THE NEWFOUNDLAND AND LABRADOR EXPERIENCE

We pride ourselves on being some of the most hospitable, accommodating and friendly people in the world.

Take in all that Newfoundland and Labrador has to offer. Rugged coastline, breathtaking terrain and historic architecture will make you feel right at home.

## WHO WE ARE

Memorial University is the only university in the province of Newfoundland and Labrador. It began as a College in 1925 but acquired full status as a university in 1949. It has campuses in St. John's, Corner Brook and the United Kingdom with a current enrollment of over 18,000 full-time and part-time students.

The Discipline of Psychiatry at Memorial University is a five year program offering a broad and solid foundation in general psychiatry, as well as a subspecialty program in child/adolescent psychiatry.

We are large enough to offer a diverse range of clinical experiences, but small enough to allow for easy communication and collaboration amongst faculty and residents.

Our academic curriculum has been tailored to reflect the resident level of training and the Royal College Objectives of Training in Psychiatry.

There are also opportunities for longitudinal experiences in research, medical education and administrative psychiatry for residents who have an interest in pursuing these roles.
