KEY TO A HEALTHY NATION

RHAP is a partnership between Wits Centre for Rural Health, the Rural Doctors Association of Southern Africa and SECTION27. RHAP's vision is "Rural Health - Key to a Healthy Nation". We believe we can only have a healthy nation if rural health care is central to planning and decision-making at national and decentralised levels. The organisational mission of the Rural Health Advocacy Project is "Connecting Practice, Policy and Partners". We aim to be a leading resource in the field of rural health advocacy that facilitates the translation of rural health needs and health care solutions into policy and decision-making.
