

Ocean Mural

Grades: K-5

Materials

- Animal pictures with fact card
- Crayons/colouring pencils
- Safety Scissors
- Tape
- A laminated ocean mural

Topic: Students will learn about different types of animals and the habitat they are adapted to.

Description

This game is meant to educate students on habitats of marine life. Students will be provided with animal pictures that they can colour and cut out. Each animal will have a brief description of what they eat and habitat preferences. The demonstrator will help the students figure out where to tape the animals onto the mural according to the animal's preferences. This activity can be followed by a comparison of habitats or discussion of adaptations to habitats.
