

Physics -  
You'll be amazed  
where it takes you!

Sashika (B.Sc.) saves  
lives by applying physics  
problem-solving skills  
to diagnoses.

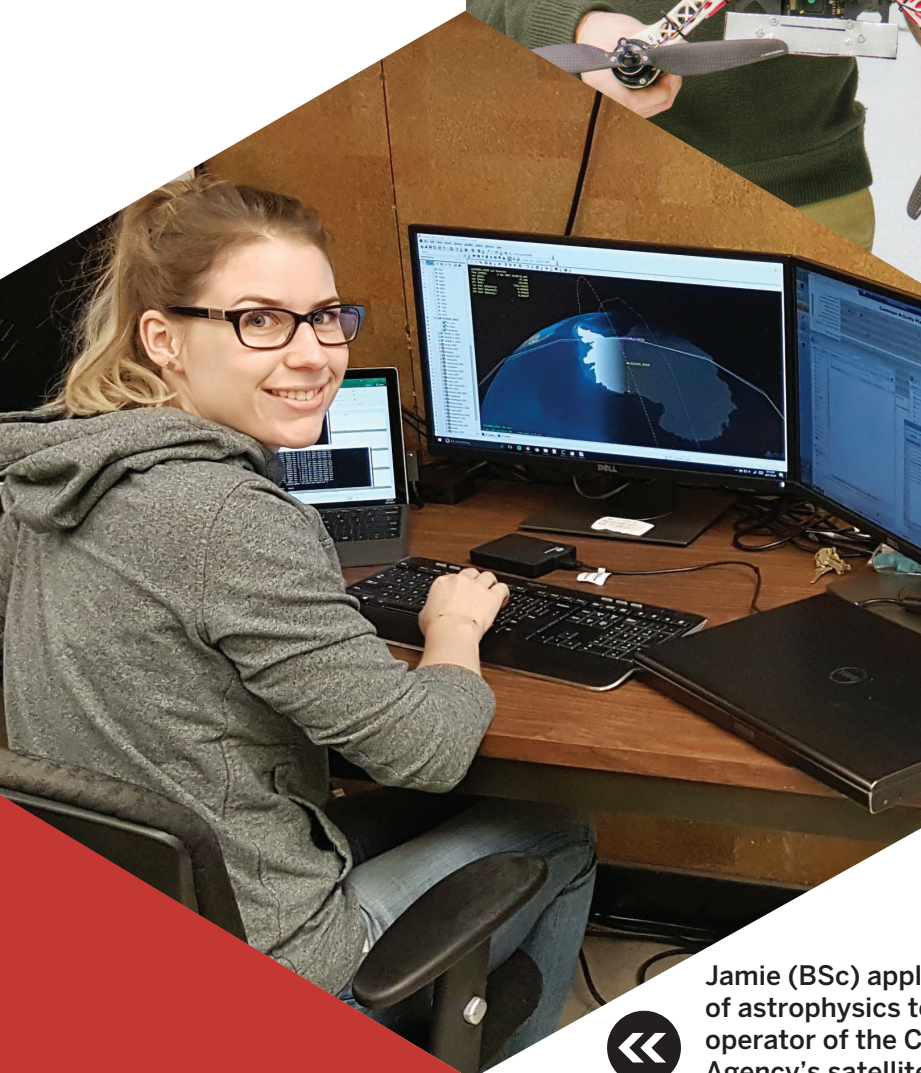

Andrew (MSc) and  
Ahmad (PhD) are  
betting that physics  
will show them how to  
power drones without  
wires or batteries.

Tania (PhD) uses  
her expertise in  
particle astrophysics  
to investigate neutrinos  
at the South Pole.

Jamie (BSc) applies her knowledge  
of astrophysics to her job as an  
operator of the Canadian Space  
Agency's satellite, CASSIOPE.

Queen's lead guitarist,  
Brian (PhD), used physics to  
simulate in a studio the "We Will  
Rock You" stomp-stomp-clap sound  
of thousands of people.
