

# It's all in the timing

Understanding the past through radiocarbon and archaeology

**Date:** February 6, 2012

**Time:** 7:00 p.m.

**Location:** IIC 2001

Have you ever wondered how archaeologists piece together the puzzles of the past? Uncovering artifacts during an archaeological excavation is just the beginning of the story. Dr. Elisabetta Boaretto from the Weizmann Institute of Science will describe how scientists and archaeologists can work together to build a better understanding of ancient materials and the people who used them.
