1  Note

The contents of this calendar set forth the intentions of the University at the time of publication, with respect to the matters contained therein. THE UNIVERSITY EXPRESSLY RESERVES THE RIGHT TO DEViate FROM WHAT APPEARS IN THE CALENDAR WITHOUT NOTICE, including both the content and scheduling therein, in whole or in part, and including, without limiting the generality of the foregoing, the right to revise the content of, and to cancel, defer, reschedule or suspend, in whole or in part, the scheduling of particular periods of instruction, courses, or programs, and the academic program of the University, and to alter, accelerate or defer fees and charges, and to do any or all of the above either in order to serve what the University considers to be the best interests of the academic or student community or of the University itself, or because of any circumstance or occurrence, whether occurring by or through the willful act or negligence of the University, its agents, servants and employees, or otherwise and whether or not beyond the reasonable or other control of the University, and without limiting the generality of the foregoing, as a result of circumstances or occurrences including financial resources, natural catastrophe or disaster, the health, safety and well-being of the employees or students of the University, labour disagreements or disputes, slow-downs, work-stoppages, and strikes. THE UNIVERSITY DOES NOT ACCEPT, AND HEREBY EXPRESSLY DISCLAIMS, ANY OR ALL RESPONSIBILITY OR LIABILITY to any person, persons or group, for any loss, injury, damages or adverse effect, either direct or indirect, consequential or otherwise, arising out of any one or more of such deviations, The University hereby disclaims liability to any person who may suffer loss as a result of reliance upon any information contained in this calendar.

The rights and obligations of parties subject to the Calendar and the rules and regulations of Memorial University of Newfoundland shall be governed by the laws of the Province of Newfoundland and Labrador. Any action or proceeding against Memorial University of Newfoundland shall be brought in the Province of Newfoundland and Labrador.

Each and every of the subsequent provisions contained in this Calendar, and the relationship, both legal and otherwise, between the University, and its students, is expressly subject to and governed by the above provisions.

The Office of the Registrar will assist students with any questions or problems which might arise concerning the interpretation of academic regulations. It is, however, the responsibility of students to see that their academic programs meet the University’s regulations in all respects.

2  The Memorial University of Newfoundland Code

All members of the Memorial University of Newfoundland Community, which includes students, faculty, and staff, shall treat others with respect and fairness, be responsible and honest, and uphold the highest standards of academic integrity.

3  Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

4  Glossary of Terms Used in This Calendar

In this calendar “Grenfell Campus” or “Grenfell ” refers to Grenfell Campus, Memorial University of Newfoundland and “Marine Institute” refers to the Fisheries and Marine Institute of Memorial University of Newfoundland. “University”, when capitalized, refers to Memorial University of Newfoundland.

Academic standing: is an enrolment status normally determined each semester by a regular evaluation procedure used to assess whether or not students are meeting the standards prescribed for continuing in the University and/or their programs.

Academic unit: refers to a centre, department, division, faculty, program or school, other than an administrative unit, as the context requires.

Academic year: runs from September 1 to August 31.

Accelerated course: is a course that is offered in a shorter time frame than a semester or session.

Administrative unit: refers to an office, division or centre, other than an academic unit, as listed in the Offices of the University section of the Calendar.

Appeal: is the challenge of, or the request for review of, a judgment regarding the application of regulations.

Assignment: is an evaluative exercise including but not limited to assigned work, term papers and projects.

Certificate: is an academic designation awarded for the completion of a specified program of study which is of shorter duration than a degree or diploma.

Challenge for credit: is the request for consideration of academic credit resulting from experience or knowledge gained elsewhere for which transfer credit cannot be awarded.

Co-requisite course: is a course which may be taken concurrently with or successfully completed prior to the course for which it is required.

Course: is a unit of work in a particular subject normally extending through one semester or session, the completion of which normally carries credit toward the fulfillment of the requirements of certain degrees, diplomas or certificates.

Course number: courses are designated by four characters. The first character signifies the level of the course. Where all four characters are numeric, the last three are used by academic units to indicate various information such as course sequence and area of study.
General Information

Where the last character is alphabetic, the letter:
A or B identifies a linked course. No credits or points are given until the "B" part is completed.
C identifies an English course that does not carry credit towards a degree, dipломa or certificate.
F identifies a foundation course that is intended to remedy a specific academic weakness and does not carry credit towards a degree, diploma or certificate.
L identifies a period of university-level learning involving residency outside of Canada, normally through the Faculty of Humanities and Social Sciences.
T identifies an undergraduate teaching internship offered by the Faculty of Education.
W identifies a course in either a work term in a co-operative program or a special project in certain of the professional schools and faculties and may or may not be assigned credit hours.
X identifies a course which represents an entire semester's work and carries at least 15 credit hours.

Courses offered outside of the normal time frame:
are those with different start and/or end dates than those of the semester or session.

Credit hour:
is the measure used to reflect the relative weight of a given course toward the fulfilment of appropriate degree, diploma, certificate, major, minor, or other program requirements. A weight of 1 credit hour normally means that the course meets for lectures one hour per week for the duration of a semester or two hours per week for the duration of a session. Unless otherwise indicated, a course normally has a credit value of 3 credit hours.

Credit-restricted courses:
are courses which are closely related but not equivalent. Credit is limited to one of the credit-restricted courses. Normally, credit-restricted courses cannot be substituted, one for the other, to satisfy program requirements.

Cross-listed courses:
are courses which are listed under two or more academic units and which can be taken for credit from one unit only. Cross-listed courses can be substituted, one for the other, to satisfy program requirements.

Degree:
is an academic designation awarded for the completion of a specified program of study which is of longer duration than a diploma or certificate.

Diploma:
is an academic designation awarded for the completion of a specified program of study which is of shorter duration than a degree and longer duration than a certificate.

Equivalent courses:
are those which are determined to be equal for credit determination, although the subject area or course number will differ. These are normally identified with the phrase "Same as".

Examination:
is an evaluative exercise including but not limited to tests, quizzes or mid-terms, final or supplementary examinations.

Foundation course:
is a course intended to remedy a specific academic weakness and is identified by the letter "F" as the last character of the course number. A foundation course does not carry credit towards a degree, diploma or certificate.

GPA:
is the abbreviation for grade point average.

Head of academic unit:
includes but is not limited to co-ordinator, dean, department head, division head, associate vice-president academic, vice-president, or equivalent.

In-class work:
is any part of the evaluation in a course which is to be completed by the student in a supervised setting, at a time and location designated by the University.

Inactive courses:
are courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year.

Last week of the lecturing period in a semester or session:
consists of the final five days of lectures, including statutory holidays on days when lectures would otherwise be held, in a semester or session.

Lecturing period:
is a designated period of lectures within a semester or session as defined by the University Diary.

Linked course:
is a course comprising two components and is normally identified by the letter "A" or "B" as the last character of the course number. No credits or points are given until the "B" part is completed.

Major:
is a subject or field of study which a student normally specializes in during the course of degree studies.

Minor:
is a subject or field of study which a student normally pursues secondary to a major during the course of degree studies.

Online course:
is a for credit university course delivered entirely over the Internet. Examinations may be written at exam sites or online. Students access course materials and participate in course activities through Memorial University of Newfoundland's learning management system at online.mun.ca.

Prerequisite course:
is a course which must be successfully completed prior to commencing the course for which it is required.

Program:
is a series of courses, the successful completion of which, if all requirements are met, qualifies the candidate for a degree, diploma or certificate.

Registration:
is the process of selecting, enrolling in, and being assessed fees for courses.
**General Information 2017-2018**

**Registration period:**
is, in any semester, the period extending from the first day of registration to two weeks following the first day of lectures, as stated in the University Diary. In any session, it is the period extending from the first day of registration to one week following the first day of lectures, as stated in the University Diary.

**Repeatable course:**
is a course that may be taken for credit in several semesters to a maximum number of credit hours. All such courses shall have specified both the number of credit hours assigned per semester and the maximum number of credit hours to be awarded.

**Semester:**
is a period of approximately fourteen consecutive weeks during which there are at least twelve weeks of lecture. Normally the Fall semester commences in early September, the Winter semester in early January, and the Spring semester in early May.

**Session:**
is a period of approximately seven consecutive weeks in the Spring semester during which there are at least six weeks of lecture. The first half of Spring semester is designated as Intersession; the second half of Spring semester is designated as Summer session.

**Student-Web/Student Self-Service:**
is a suite of e-business student services including registration and the provision of personalized student information.

**Take-home work:**
is any part of the evaluation in a course which is to be completed by the student without supervision or a designated location, normally subject to a due date determined by the University.

**Transcript:**
is the complete and unabridged report of a student's academic record.

**Transfer credit:**
is academic credit granted for work completed at an institution other than Memorial University of Newfoundland.

**Waiver:**
is the permission granted by the appropriate authority for exemption from a particular program requirement and/or a particular university regulation.

6   Governing Bodies and Staff

6.1  The Board of Regents 2017-2018

www.mun.ca/regents

Officers of the Board
Iris Petten, St. John’s, Chair of the Board
Glenn Collins, Interim Executive Director
Tina Scott, Secretary to the Board

Ex-Officio Members
The Chancellor
The President and Vice-Chancellor
The Provost and Vice-President (Academic)

Members Appointed by the Lieutenant-Governor in Council
Steve Belanger, St. John’s
Robert Bishop, St. John’s
Mark Bradbury, St. John’s
Max Rice, St. John’s
Trevor Stagg, Stephenville

Members Elected by the Memorial University of Newfoundland Alumni Association
Colleen Galgay-Johnston, St. John’s
Katharine Hickey, St. John’s
John Hogan, St. John’s
Kim Keating, St. John’s
Denis Mahoney, St. John’s
George Tucker, St. John’s

Student Members Appointed by the Lieutenant-Governor in Council
Jaime Giraldo, Grenfell Campus Students’ Union
Zachary Green, Marine Institute Students’ Union
Rebecca Stuckey, Graduate Students’ Union

6.2  The Senate 2016-2017

www.mun.ca/senate

Ex-officio Members
Dr. Gary Kachanoski: President and Chairman
Dr. Susan Dyer Knight: Chancellor
Dr. Noreen Golman: Provost and Vice-President (Academic)
Dr. Ray Gosine: Vice-President (Research) pro tempore
Mr. Glenn Blackwood: Vice-President (Marine Institute)
Dr. Ivan Emke: Vice-President (Grenfell Campus) pro tempore
Dr. Cecilia Reynolds: Deputy Provost (Students) and Associate Vice-President (Academic) Undergraduate Studies
Dr. Kirk Anderson: Dean, Faculty of Education
Dr. Lisa Bishop: Interim Dean, School of Pharmacy
Dr. Heather Carnahan: Dean, School of Human Kinetics and Recreation
Ms. Susan Cleyle: University Librarian
Dr. Mary Courage: Interim Dean, Faculty of Science
Dr. Alice Gaudine: Dean, School of Nursing
Donna Hardy Cox: Dean, School of Social Work
Dr. Todd Hennessy: Dean, School of Fine Arts (Grenfell Campus)
Dr. Greg Naterer: Dean, Faculty of Engineering and Applied Science
Dr. Lynne Phillips: Dean, Faculty of Humanities and Social Sciences

Elected Members
Dr. Dr. Michele Piercey-Normore: Dean, School of Science and Environment (Grenfell Campus)
Ms. Jennifer Porter, University Registrar (Interim) and Secretary of the Senate
Dr. Laura Robinson: Dean, School of Arts and Social Science (Grenfell Campus)
Ms. Bonnie Simmons: Centre for Innovation in Teaching and Learning
Dr. Margaret Steele: Dean, Faculty of Medicine
Dr. Aimée Surprenant: Dean, School of Graduate Studies
Dr. Ian Sutherland: Dean, School of Music
Dr. Wilfred Zerbe: Dean, Faculty of Business Administration

6.3 University Officers and Staff

Visitor
Hon. F.F. Fagan, CM, ONL, B.A., M.B.A. Memorial; Lieutenant-Governor of Newfoundland and Labrador

Chancellor
S. Dyer Knight, CM, ONL, RN, B.Mus., B.Mus.Ed., LL.D. Memorial

7 Offices of the University

7.1 Aboriginal Affairs, Office of
www.mun.ca/aboriginal_affairs

Special Advisor to the President on Aboriginal Affairs
Andersen, C., B.A., M.A., M.B.A. Memorial

The Office of Aboriginal Affairs provides coordination and leadership on Aboriginal matters at the University. The Office oversees and helps to coordinate internal, multi-campus activities related to Aboriginal education and research, and serves as the main point of contact on Aboriginal affairs both within the University and between the University and the broader community. The Office is supported by an Aboriginal Advisory Committee whose members are representative of the Labrador Institute, the Grenfell Campus, the Marine Institute and the St. John’s Campus.

7.2 Alumni Affairs and Development, Office of
www.munalum.ca

Executive Director
Blackwood, P., B.Sc.(Hons.) Memorial, M.Sc., Ph.D. Western Ontario

Associate Director - Development

Assistant Director - Alumni Affairs
Cadigan, L., B.A., B.Comm. Memorial

Communications Co-ordinator, Managing Editor Luminus Magazine
Penney, D., B.A., B.Ed. Memorial, M.A. Ryerson/York University

The Office of Alumni Affairs and Development exists to foster connections between alumni and the University. In addition, the Office offers opportunities for alumni to connect with each other. The Office develops services and benefits, manages events, communicates University and alumni-related news and works with alumni and friends who are interested in giving to the University.

7.3 Chief Information Officer, Office of the (OCIO)
www.mun.ca/cio

Chief Information Officer
Smith, S., CIP., B.A.(Hons.) Memorial

Director, Information Management and Protection
Randell, A., B.Comm.(Co-op) Memorial

Manager, Strategy, Planning & Liaison
Arnott, S., PMP, B.Sc. Memorial, M.M.Sc. Waterloo

The mandate of the Office of the Chief Information Officer (OCIO) is to promote and support an environment that enables students, faculty and researchers to access and utilize technology, data and information to generate knowledge and contribute to it in ways that benefit the University, and the community as a whole. The mandate also aims to ensure that administrative systems and processes which support the University are maximized through the collaborative and effective use of technology and information management best practice.
7.4 Chief Risk Officer, Office of the (OCRO)

www.mun.ca/ocro

Chief Risk Officer
Parsons, K., B.Sc. Dalhousie, LL.B. Saskatchewan, CRM Toronto

The Office of the Chief Risk Officer (OCRO) develops and implements frameworks and systems to manage risk across the entire scope of the University, all in a manner that enables the University to fulfill its mission and strategic goals. The OCRO reports directly to the Vice-President (Administration & Finance). The units that report to the OCRO include Campus Enforcement and Patrol (CEP), Enterprise Risk Management, and Environmental Health and Safety.

7.4.1 Campus Enforcement and Patrol (CEP)

www.mun.ca/cep

Associate Director
Alexander, K., CEM., RSW

Assistant Manager- Investigations
Rideout, F.

Team Commanders
Standford, N.
Whelan, J.

Campus Enforcement and Patrol (CEP) falls under the portfolio of the Office of the Chief Risk Officer. The activities of the services are well established through policies, directives and best practices. CEP’s primary responsibilities are the safety and security of the University community. CEP is dedicated to maintaining the Campus as a safe and pleasant place to live, work, and study. Campus Enforcement and Patrol is on duty 24 hours a day, seven days a week and patrol the Campus property. The services of CEP are available to all faculty, staff, students, and visitors.

7.4.2 Enterprise Risk Management

www.mun.ca/risk
www.mun.ca/emergency

Risk and Insurance Coordinator
Janes, D., B.Sc., B.Ed., M.Sc. Memorial, CRM

Analysts
Delaney, M., B.B.A. Memorial, CRM
Lacey, C., B.B.A. Memorial, CRM
Tobin, H., B.A. Memorial, AEM

Enterprise Risk Management (ERM) falls under the portfolio of the Office of the Chief Risk Officer. ERM provides strategic pan-university oversight on behalf of Risk Management; Emergency Management; Insurance, Claims and Administration; and Memorial University of Newfoundland’s centralized Incident Reporting System (MIMS). The staff provides analytical risk assessments, consultation, emergency management and assessment and care coordination, and best practise recommendations to the pan-university community.

7.4.3 Environmental Health and Safety (EHS)

www.mun.ca/health_safety

Associate Director
Battcock, B., B.Tech. Memorial

Chemical Safety Management Coordinator
Whelan, K., CRSP

Environmental Health and Safety Advisors
Collins, J., B.B.A. Memorial
Gosse, D.
St. Croix, P.

Field Services Coordinator
Bailey, M.

Industrial Hygienist
Taylor, K., M.Sc. McGill, CRSP

Radiation Safety/Bio-safety Officer
Hobbs, R., M.Sc, Ph.D. Memorial

Environmental Health and Safety (EHS) falls under the portfolio of the Office of the Chief Risk Officer. EHS provides oversight for the planning, directing and management of Memorial University of Newfoundland's Health and Safety Management System. In meeting the University's goal of providing a safe and healthy environment which supports teaching, research and University life, EHS provides advice to the University community on health and safety matters. EHS monitors the University's performance to identify opportunities for continued improvement and provide members of the University with the information and skills needed to carry out their work and studies safely.
7.5 Deputy Provost (Students) and Associate Vice-President (Academic) Undergraduate Studies, Office of

www.mun.ca/currentstudents

Deputy-Provost (Students) and Associate Vice-President (Academic) Undergraduate Studies
Reynolds, C., B.A., M.A., Ph.D. *University of Toronto*

The Deputy Provost (Students) and Associate Vice-President (Academic) Undergraduate Studies provides leadership to create and maintain integrated, effective pan-university supports for students. The Deputy Provost also works with the University's undergraduate and graduate student organizations to ensure the interests of students are represented in University decision-making processes and committee activities.

The following units are included in the Deputy Provost’s portfolio: Ancillary Operations; Office of the Registrar; Student Life; Student Residences; and the Student Wellness and Counselling Centre.

The Deputy Provost also oversees the administration of the *Student Code of Conduct*, which outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. For more information about the *Student Code of Conduct*, see www.mun.ca/student/sscm/conduct/.

7.5.1 Ancillary Operations

www.mun.ca/ancillary

Director
Coffin, R., B.A. Memorial

Ancillary Operations encompasses a variety of operations at Memorial University of Newfoundland, including the Bookstore, Campus Card, Lockers, Liquor Services, Vending, Food Services, and the University Centre. These operations serve to support the university community and enhance the experience of students, staff, faculty and guests.

7.5.2 Registrar, Office of the

www.mun.ca/regoff

www.mun.ca/advice

www.mun.ca/scholarships

www.mun.ca/undergrad

University Registrar
to be determined

The Office of the Registrar provides academic support services and systems to prospective and current students. From initial contact, to application, academic advising, registration and graduation, the Office of the Registrar strives to implement continuous improvements to these services and systems. Together with offices at Grenfell Campus and the Marine Institute, the Office of the Registrar serves the University community, including those involved in online learning.

The Academic Advising Centre (AAC) assists students who are at various stages of their academic careers.

Scholarships, Bursaries and Awards administers the undergraduate Scholarships and Awards Program for the University and distributes out-of-province Financial Aid.

Student Recruitment is responsible for the recruitment of undergraduate students from local, national, and international markets. Recruitment efforts include school visits, career fairs, online and social media engagement, and other activities focused on students and their influencers.

7.5.3 Student Life

www.mun.ca/student

www.mun.ca/aro

www.mun.ca/blundon

www.mun.ca/cdel

www.mun.ca/chaplaincy

Director
Massey, J., B.A.(Hons.) *King’s College London*, M.A. *University of Illinois, Champaign-Urbana*, Ph.D. *Queen’s*

Student Life is dedicated to supporting and encouraging students to connect, engage and belong during their time at Memorial University of Newfoundland. Dedicated to student achievement and success, this collection of units on the St. John's Campus includes: Aboriginal Resource Office; Career Development and Experiential Learning; Glenn Roy Blundon Centre for Students with Disabilities; Student Experience Office; and Student Support and Crisis Management.

7.5.4 Student Residences

www.mun.ca/hfcs

Director
Belbin, B., M.Ed. *Memorial*

Student Residences provides both on and off-campus housing services and resources for students, as well as summer accommodations for students and visitors. Residences located on campus include traditional residence halls (Paton College), suite style (Macpherson College), Burton’s Pond Apartments, and the Battery Facility Graduate Accommodations. Supports and programming for students living in residence are provided through Residence Life.
7.5.5 Student Wellness and Counselling Centre

www.mun.ca/counselling/home/
www.mun.ca/health

Associate Professor and Director
Cornish, P., B.Sc. Trent University, M.A., Ph.D. Saskatchewan

Family physicians, nurses, psychologists, counsellors and a psychiatrist are available to provide rapid access interprofessional primary health care and to assist students in taking responsibility for their own health and well-being. Programs and supports include the diagnosis and treatment of physical and psychological illness, support for study skills development, career assessment and counselling, the activation and maintenance of wellness and the promotion of health education. The centre also serves as a training site for advanced students in a number of helping and mental health professions.

7.6 Facilities Management, Department of

www.mun.ca/facman

Director, Operations & Maintenance

Director, Engineering & Construction
Bowden, K., B.Sc., B.Eng., B.A. Memorial, P. Eng.

Director, Administrative Services
Rose, W.

The founders of Memorial University of Newfoundland dedicated the University itself as a living memorial to those who served in the two world wars. Guided by this heritage and mission, the Department of Facilities Management embraces its responsibility to maintain, protect, and further develop the University’s major infrastructure. The Department’s team is committed to the pursuit of excellence in all of its operations including facilities engineering and development, central utilities, energy systems and controls, custodial services, building services and grounds, sustainability, administrative services and space planning and administration.

7.7 Faculty Relations, Office of

www.mun.ca/facultyrelations

Director of Faculty Relations
McCarthy Mandville, M., Q.C., B.A.(Ed.) Memorial, L.L.B. Dalhousie

Associate Director of Faculty Relations
Wyse, A., B.A.(Hons.), M.A. Memorial, M.P.A. University of Western Ontario

Assistant Director of Faculty Relations
McKinnon, I., B.Comm.(Co-op), M.E.R. Memorial

Manager of Academic Recruitment, Support and Immigration
Kielly, T., B.A. Memorial, RCIC

Advisor, Academic Labour Relations
Pittman, T., M.B.A., M.E.R. Memorial

The Office of Faculty Relations is responsible for the negotiation and administration of the following collective agreements for faculty, per course instructors, teaching assistants, and postdoctoral fellows:

1. Memorial University of Newfoundland and Memorial University of Newfoundland Faculty Association (MUNFA), October 30, 2014 to August 31, 2017.
2. Memorial University of Newfoundland and Lecturers’ Union of Memorial University of Newfoundland on behalf of Per Course Instructors, Memorial University of Newfoundland, March 27, 2014 - August 31, 2016.
4. Memorial University of Newfoundland and Lecturers’ Union of Memorial University of Newfoundland on behalf of Postdoctoral Fellows of Memorial University of Newfoundland, January 15, 2014 - August 31, 2016.

As well, the Office of Faculty Relations addresses labour relations matters arising out of the collective bargaining relationships with MUNFA, LUMUN (Per Course Instructors and Postdoctoral Fellows), and TAUMUN, including grievance and arbitration proceedings and Labour Relations Board matters. In addition, the Office of Faculty Relations:

1. is involved in all aspects of the employment of academic staff. The Office makes per course, extra teaching, and contractual academic appointments less than one year;
2. sets the starting salaries of all academic personnel, and determines eligibility for leaves;
3. provides advice, assistance, and education in all matters involving faculty, including the recruitment process, promotion and tenure, discipline, sabbatical, and administrative leave eligibility, and all collective agreement matters;
4. provides employment support, orientation opportunities for new faculty, and educational opportunities for academic administrators; and
5. is involved in policy development, implementation and administration.
7.8 Financial and Administrative Services, Department of
www.mun.ca/finance

Director
Collis, D., B.Comm. Memorial, CPA, CA

Associate Director
Pike, G., B.Comm.(Hons.) Memorial, CPA, CMA

Manager, Print and Mail Services
Cranford, B.

Barker, R., B.Comm. Memorial, M.B.A. Virginia Polytechnic Institute & State University, CHRP

Manager - Payroll
Martin, K., B.Comm., CPA, CA, CPM

Manager - Strategy, Policy and Planning Initiatives
Wooley, E., B.Comm., M.E.R. Memorial

The Department of Human Resources is more than payroll, pensions and benefits. The Department of Human Resources provides the foundation to advance and maintain a strong institutional culture that values the contributions of all within the organization. This culture is based on clear values that are accepted and put into practice by all: the principles of respect, recognition, support, equity and fairness, effective leadership, recruitment and retention, learning and development, work-life balance (including health and wellness) and career opportunity. Human Resources works to provide optimal service delivery to clients and ensure best practices in internal processes through measurement. Through a long-term strategy in Human Resources, Memorial University of Newfoundland continues to implement the people development strategy (mentoring, succession, coaching, leadership and career development), transfer knowledge to new employees, meet employment equity targets, improve employee satisfaction, and enhance connections prior to and into retirement.

7.11 Information Access and Privacy Office (IAP)

www.mun.ca/iap

University Access and Privacy Advisor
Thorne, R., B.A. Memorial, CIPP/C

Access and Privacy Analysts
Joy, C., CIAPP-P
Noseworthy, M., B.A. Memorial, LL.B. Dalhousie

The Information Access and Privacy Office (IAP) was created in November 2005 to assist the University in complying with the provincial Access to Information and Protection of Privacy Act, 2015 (ATIPPA) and other applicable privacy legislation, as well as developing best practices in information access and privacy matters.

The IAP Office provides strategic and day-to-day advice on access and privacy, conducts privacy impact assessments and reviews of projects and programs, manages requests for access to information under the ATIPPA, 2015 and delivers access and privacy training. Further information may be obtained through the website at www.mun.ca/iap.

7.12 Information Technology Services (ITS)

www.mun.ca/its

Director
Greene, S., B.Sc., M.Ed. Memorial

Associate Director, Client Relationships
Dawson, B., B.Sc.(Hons.), B.Ed., M.A.S. Memorial

Manager, Compliance and Business Continuity
Shaw, M., B.Sc., B.Ed. Memorial

Manager, Networks and Communications
Farrell, T., B.Sc. Memorial

Manager, Technical Support
Bryant, D., B.Sc., M.Eng. Memorial

The mandate of Information Technology Services (ITS) is to lead the Planning, Design, Building and Support of the Core Information and Communications Technologies required to meet the strategic objectives of Memorial University of Newfoundland. In consultation with the Campus community, ITS is responsible to foster and support appropriate practices in information technology infrastructure, application development and management, business analysis, security, data, software and processes to create an effective and integrated environment.

Core Information and Communications Technologies are those systems and services available to the entire campus or which are pan-university operational systems. Included are:

- Landline and mobile telephony
- Technology (internal, external, public networks and data centres)
- Development, management and operation of enterprise applications
- Centralized email, web services and collaborative tools
● Information Technology security management
● IT project management and consulting
● Service desk, IT purchasing and desktop support services
● Student computing (Portal, Information Commons, D2L, Labnet)

7.13 Institutional Analysis and Planning, Centre for (CIAP)
www.mun.ca/ciap

Director
Chancey, P.F., B.Sc., B.Comm., M.Ed. Memorial

Manager
Pippy, S.E., B.Sc.(Hons.), M.Sc. Memorial

Senior Institutional Analysts
Leake, R.M., B.B.A.(Hons.), M.B.A. Memorial, C.G.A.
Somerton, C.D., M.A. Memorial

Senior Planning Analyst
Kinsella, R.E., B.A.(Hons.) Mount Allison, M.A.S.P. Memorial

The Centre for Institutional Analysis and Planning (CIAP) is responsible for the collection, analysis and dissemination of information and facilitation of decision-support and planning initiatives at Memorial University of Newfoundland.

7.14 Internal Audit, Office of
www.mun.ca/internalaudit

University Auditor
Dove, J., B.B.A. Acadia, CPA, CA, CIA

Senior Internal Auditor
Steele, R., B.Comm. St. Mary’s, CPA, CGA, CIA

The Office of Internal Audit provides independent and objective assurance and consulting activity that is guided by a philosophy of bringing a systematic and disciplined approach to evaluate and improve the effectiveness and efficiency of the University’s risk management, control, and governance processes. The Office of Internal Audit works collegially with the Office of the Chief Risk Officer, reports functionally to the Audit and Risk Committee of the Board of Regents, and administratively to the President and Vice-Chancellor.

7.15 Marketing and Communications, Division of
www.mun.ca/marcomm

Executive Director
Collins, V., B.A. Memorial

Associate Director (Communications)
Dyke, P., B.J.(Hons.) University of King's College, ABC, CRMP

Associate Director (Marketing)
Hulan, J., B.A. Memorial

Manager, Communications
Sorensen, D., B.A.(Hons.), M.A. Memorial

Manager, Digital Communications and Content Management
Whelan, M., B.P.R. Mount Saint Vincent, M.B.A. Memorial

Marketing Manager
Harvey, J., B.Comm. Co-op, M.B.A. Memorial

Manager, Web Content Services
Whittle, P., B.Comm., B.A.(Hons.), M.A. Memorial

Manager, Creative
Morgan, A., B.F.A. Concordia

Manager, Finance and Administration
Kelly, H.

The Division of Marketing and Communications (MarComm) is dedicated to serving the University's internal and external marketing and communications needs, as well as to responding to the community's needs for information about Memorial University of Newfoundland. MarComm provides communications and marketing counsel and strategy, news services including the Gazette and today.mun.ca, as well as media relations and issues management (including emergency communications coordination). The Division also has expertise in institutional marketing, university event management (including Convocation), photography (including a university photo bank), graphic design, co-ordination of promotional projects, institutional web management and web content development. MarComm can provide advice on protocol, reputation management, government relations and special event planning.
7.16 **President, Office of the**

7.20 Sexual Harassment Office

www.mun.ca/sexualharassment

Sexual Harassment Advisor
Shortall, R., B.Sc.(Hons.), M.S.W. Memorial, B.S.W. University of British Columbia

The Sexual Harassment Office implements the Sexual Harassment Policy and its related University-Wide Procedures for Sexual Harassment Concerns and Complaints aimed at providing a method for the resolution of sexual harassment concerns and complaints (including sexual assault) which may arise at Memorial University of Newfoundland. The Sexual Harassment Policy prohibits sexual harassment by any member of the University community. Any member may address a concern or make a complaint of sexual harassment against another member of the University community. Memorial University of Newfoundland is committed to providing an environment that is respectful and inclusive – thus free of sexual harassment. The services of the Sexual Harassment Office are available to all campuses of Memorial University of Newfoundland. A copy of the Policy and its related University-Wide Procedures for Sexual Harassment Concerns and Complaints is available at www.mun.ca/policy/site/category.php.

Supply
Barnes, C., Supply Supervisor

The Department of Technical Services is wholly responsible for developing and maintaining specialized equipment to support research activities. This Department maintains and repairs laboratory equipment, specialized machinery and scientific instruments. With highly trained staff and modern facilities, Technical Services offers expertise in electronics, circuit board development, networking, computer repairs, fume hood certification, biological safety cabinet certification, scientific glassblowing, Computer Numerical Control (CNC) machining, scale model making, mechanical fabrication, and Selective Laser Sintering (SLS). The Department also operates a cryogenics facility to supply liquid nitrogen and liquid helium required by the scientific community at Memorial University of Newfoundland. The employees of Technical Services work closely with researchers to develop and build custom apparatus and prototypes.

www.mun.ca/research

Vice-President (Research) Pro Tempore

Associate Vice-President (Research) Pro Tempore
Abrahams, M., B.Sc.(Hons.) Western, M.Sc. Queen's, Ph.D. Simon Fraser

The Office of the Vice-President (Research) is responsible for promoting and enhancing the university’s broad range of research activities. Specific priorities for the Vice-President (Research) include: Providing leadership in the execution of the University’s Strategic Research Framework, and the Strategic Research Intensity Plan, and the Technology Transfer and Commercialization Strategy, supporting researchers across all academic disciplines; encouraging the full range of research at Memorial University of Newfoundland, including fundamental and applied research and creative scholarly activities; building partnerships with other universities, research organizations, government and the private sector, locally, nationally and internationally; increasing research funding to Memorial University of Newfoundland and other research organizations in the province; and enhancing the dissemination, application and commercialization of research results generated at Memorial University of Newfoundland.

8 General Information

Memorial University of Newfoundland is the only university in Newfoundland and Labrador. It has campuses in St. John's and in Corner Brook, as well as Harlow, England.

8.1 The Beginning

Memorial University College was established as a memorial to the Newfoundlanders who had lost their lives on active service during the First World War; it was later rededicated to also encompass the province's war dead of the Second World War. The College opened its doors on the old Parade grounds in St. John's to a total student body of 55 on September 15, 1925.

8.2 University Status

The elevation of the College to the full status of a university was one of the priorities of the first post-Confederation Government. At the initial session of our Provincial House of Assembly, July 13, 1949, the intention of the Government of the day was conveyed by the then Lieutenant-Governor, the Honourable Sir Albert Walsh, in these words from the Speech from the Throne:

“It is considered that Newfoundland should have her own degree-conferring University and you will be invited to consider legislation which would confer upon the Memorial University College the status of a university. It is planned to widen and improve the functions, and thus increase the public usefulness of this institution created originally in honour of our illustrious dead of the First World War.”

Royal assent was given the Bill creating The Memorial University of Newfoundland on August 13, 1949, exactly one month to the day from the opening of the House. The Board of Regents and the Senate were inaugurated in May 1950, and the first Convocation of the University was held on June 3, 1950, when the first degrees were awarded.
8.3 A Period of Expansion

With university status, Memorial University of Newfoundland entered a period of rapid growth that was to continue into the 70s. In 1949-1950, there were 713 students in the new university; in 1961-1962, when the university moved to its present St. John's campus, the student enrolment had reached 1,745 full-time and 152 part-time. Ten years later, 1971-1972, the student population, including full- and part-time students in degree programs, was 10,980. During this time there were equally dramatic changes in the variety and extent of available academic programs. In the early years of the university, there were two faculties (Arts and Science, and Education). While the academic structure was quite similar in 1961, when the university moved to its new campus on Elizabeth Avenue in St. John's, areas of instruction, course offerings and degrees awarded had all increased.

In 1966 the Board of Regents approved the establishment of a small residential campus in the quaint, historic town of Harlow, Essex, located approximately midway between London and Cambridge. The first Memorial University students came to Harlow in 1969 for education and engineering one-semester internships in Harlow schools and factories. Harlow Campus went through extensive modernisation in 2002 to meet the needs of today's undergraduate and graduate students. For more information, visit www.mun.ca/harlow.

In 1975 the University of Newfoundland established a regional campus in Corner Brook. The campus was named Sir Wilfred Grenfell College in 1979 honouring the memory of the medical missionary who pioneered medicine in Northern Newfoundland and along the coast of Labrador. In 2010 the campus in Corner Brook was renamed Grenfell Campus, Memorial University of Newfoundland. Since its opening, Grenfell has evolved from a junior college offering first- and second-year courses to providing entire degree programs in the areas of arts, fine arts, science, business administration, resource management and nursing. The first degrees, in the disciplines of theatre and visual arts, were introduced in 1988. Grenfell Campus currently offers 18 undergraduate and one graduate degree programs. For more information, visit www.grenfell.mun.ca.

In 1992 the Maritime Institute, located on the edge of the North Atlantic, became the Fisheries and Marine Institute of Memorial University of Newfoundland. Founded in 1964, the Marine Institute offers a range of certificate, diploma, undergraduate and graduate degree programs in the ocean and marine sectors and is involved in research and technology transfer. For more information, visit www.mi.mun.ca.

Today, Memorial University of Newfoundland offers more than 100 undergraduate and graduate degree programs through six faculties -- Humanities and Social Sciences, Science, Education, Medicine, Engineering and Business Administration; six schools -- Graduate Studies, Nursing, Human Kinetics and Recreation, Social Work, Music and Pharmacy; and the academic units at the Marine Institute and Grenfell Campus. Information regarding enrolment statistics can be found in the Fact Book at www.mun.ca/ciap/fact_book.php. The University's three frameworks -- teaching and learning, research and public engagement -- guide the University's development.

The teaching and learning community at Memorial University of Newfoundland connects learners and educators to each other, the broader community and the world, in the service of knowledge generation and exchange, and the advancement of society. For more information, visit blog.citl.mun.ca/teachingandlearning.

Faculty and students actively participate in research and development. Memorial University of Newfoundland is one of the most important research facilities in Atlantic Canada and has developed numerous research programs and facilities that are among the most advanced in the world. For more information and a complete listing of research facilities, visit www.mun.ca/research.

Memorial University of Newfoundland is also one of the most publicly engaged universities in the country, undertaking projects that benefit both the university and the community. The University encourages and provides support for public engagement through faculties, units and centres that offer programming to help facilitate public engagement, through funding for public engagement, and through the Public Engagement Framework. For more information, visit www.mun.ca/publicengagement.

8.4 The Campuses

Memorial University of Newfoundland, positioned on the edge of the North Atlantic, is one of the largest universities on Canada's East Coast and the only university in the Province of Newfoundland and Labrador. There are three campus locations in the province and one abroad.

8.4.1 St. John's

www.mun.ca

Spanning approximately 220 acres, Memorial University of Newfoundland's largest campus is home to extensive facilities that support a full range of academic programs in a modern, urban setting. Memorial University of Newfoundland offers access to the best in research, teaching and learning, and public engagement, providing world-class opportunities and contributing expertise and insight both locally and globally.

On the campus to the south of Prince Philip Drive are the Arts and Administration, Science, Chemistry-Physics, Education (G.A. Hickman), Mathematics (Henrietta Harvey), Physical Education, Biotechnology, Facilities Management and Music (M.O. Morgan) buildings; as well as the Queen Elizabeth II Library, Bruneau Centre for Research and Innovation, Paton College and Macpherson College residence complexes, Burton's Pond Apartments, Campus Childcare Centre, and The Works recreation complex, comprising the Aquanea, Field House and other sports and recreation facilities on campus. Spanning Prince Philip Drive is the University (Smallwood) Centre, containing student services and student union operations, as well as recreation and dining facilities.

North of Prince Philip Drive are the Health Sciences Centre, incorporating the Faculty of Medicine, the School of Nursing, the School of Pharmacy and Eastern Health; the Engineering (S.J. Carey), Earth Sciences (Alexander Murray), Business Administration, and C-CORE (Captain Robert A. Bartlett) buildings, St. John's College, Coughlan College, Queen's College and Spencer Hall. Slightly further north is the Memorial University of Newfoundland Botanical Garden.

The Ocean Sciences Centre is located to the west at Logy Bay. In 2013 the University acquired the former Battery Hotel property in St. John's and planning for the facility is ongoing. The Battery will be established primarily as a public engagement facility to further connect the University with the community. The first residence rooms for graduate students at the Battery opened in September 2015. For more information visit www.mun.ca.

8.4.2 Fisheries and Marine Institute

www.mi.mun.ca

The Fisheries and Marine Institute, headquartered on Ridge Road in St. John's, is Canada's leading centre of education, training, applied research and technology transfer for the ocean industries. As a campus of Memorial University of Newfoundland, the Marine Institute offers undergraduate and graduate degrees, advanced diplomas, diplomas of technology, certificates in such fields as marine transportation, food and water quality, naval architecture, aquaculture, underwater vehicles, ocean mapping, marine environmental, marine studies, technology management, and maritime management.
The Institute has a number of state-of-the-art centres and units, including the Offshore Safety and Survival Centre (OSSC), the Safety Emergency and Response Training Centre (SERT), the Centre of Marine Simulation (CMS), the Centre for Aquaculture and Seafood Development (CASD), MI International, the Centre for Sustainable and Aquatic Resources (CSAR), the Community Based Education Delivery Unit (CBED), the Centre for Fisheries Ecosystems Research (CFER) and the Centre for Applied Ocean Technology (CTec). These areas lead the institute in applied research and technology transfer and also provide training to a variety of industry clients. For more information, visit www.mi.mun.ca.

8.4.3 Grenfell Campus
www.grenfell.mun.ca

Grenfell Campus, Memorial University of Newfoundland, stands on a 185-acre site with a spectacular view of the city of Corner Brook and the Bay of Islands. With a student population of about 1,250, Grenfell Campus offers a personalized education through a wide variety of interdisciplinary experiences. Students may choose from undergraduate degrees in arts, business administration, fine arts, education, nursing, science or resource management. Grenfell also offers a master of arts degree in environmental policy and a master of science degree in boreal ecosystems and agricultural sciences.

Located on University Drive, Grenfell Campus comprises five academic buildings. The Arts and Science Building houses administrative offices, academic classrooms and labs, recreational facilities, a bookstore, the campus's original student residence, and one of the largest astronomical telescopes in Atlantic Canada. The Fine Arts Building features facilities for theatre and visual arts programs. The Library and Computing Building contains Ferriss Hodgett Library, a computer lab and lecture hall facilities. The Forest Centre houses office, classroom, lab and lecture space, as well as the Atlantic Division offices of the Canadian Forest Service (Natural Resources Canada). Annexed to the Forest Centre is a boreal ecosystem research facility, which supports research in agricultural, environmental and boreal sectors.

In addition to the original dormitory-style residence, student housing has been expanded to include eight chalet-style apartment buildings and a residence complex; about half the student population at Grenfell resides on campus. The GCSU Student Centre, an annex to the Arts and Science Building, provides dining and recreational space for the student population, as well as office space for the Grenfell Campus Student Union. For more information, visit www.grenfell.mun.ca.

8.4.4 Harlow Campus
www.mun.ca/harlow

Harlow Campus is the international campus of Memorial University of Newfoundland, one of only two universities in Canada with campus facilities in the United Kingdom. Professional schools and academic departments at Memorial University of Newfoundland use Harlow Campus in Essex, UK, to deliver ongoing and specialized one-time programming, internships and experiential learning. The campus provides technologically equipped meeting facilities and residence accommodations for up to 51 people.

Harlow Campus consists of a group of converted 19th century and older buildings. The main building is The Maltings (once used to dry grain), which now houses the administration offices and accommodations for residents. It also contains a dining room, library and computer suite, common room, laundry room and the Lord Taylor lecture room. Other campus buildings include Cabot House, St. John’s House, St. John’s Cottage, and 44-46 Market Street. Faculty-led courses are offered at Harlow at varying times. Visit www.mun.ca/harlow for more information.

8.5 Vision, Mission, and Core Values of the University

In 2013 the University adopted:

Vision
Memorial University will be one of the most distinguished public universities in Canada and beyond, and will fulfil its special obligations to the people of Newfoundland and Labrador.

Mission
Memorial University is an inclusive community dedicated to innovation and excellence in teaching and learning, research, scholarship, creative activity, service and public engagement. Memorial welcomes and supports students and scholars from all over the world and contributes knowledge and expertise locally, nationally and internationally.

Core Values

- Excellence
  Encouraging and promoting excellence through innovation and creativity, rigour and pragmatism.
- Integrity
  Being honest and ethical in all interactions, maintaining the highest ethical standards in teaching, research, public engagement and service.
- Collegiality
  Engaging others with respect, openness and trust in pursuit or a common purpose, having regard for individuals, ideals and the institution as a whole.
- Inclusiveness and Diversity
  Embracing and acting on responsibility to guarantee diversity and equity.
- Responsiveness
  Being receptive to individuals and communities.
- Accountability
  Accepting responsibility for achievement of common goals and objectives.
- Freedom and Discovery
  Supporting the freedom to pursue knowledge that is based on individual and collective intelligence, curiosity, ingenuity and creativity.
- Recognition
  Acknowledging, tangibly, all aspects of university enterprise including teaching and learning, research, scholarship, creative activity and public engagement.
- Responsibility to Place
  Valuing and fulfilling the special obligations to the people of Newfoundland and Labrador by supporting and building capacity for
excellence that:
- addresses needs and opportunities for Newfoundland and Labrador;
- engages the university community on matters of national and international significance;
- produces and delivers academic programs of national and international calibre; and
- recognizes the dynamic opportunities presented by a multi-campus institution.

**Responsibility to Learners**
Recognizing students as a first priority and providing the environment and support to ensure their academic and personal success.

**Interdisciplinary Collaboration**
Supporting overarching themes in all pursuits that cut across academic units and address significant opportunities and challenges for which Memorial is particularly well positioned to build nationally and internationally recognized capacity.

**Sustainability**
Acting in a manner that is environmentally, economically and socially sustainable in administration, academic and research programs.

### 8.6 Presidents of Memorial University College

- **1925 - 1933** John Lewis Paton
- **1933 - 1949** Dr. Albert G. Hatcher

### 8.7 Presidents of the University

- **1949 - 1952** Dr. Albert G. Hatcher
- **1952 - 1966** Dr. Raymond Gushue
- **1966 - 1967** M.O. Morgan (pro tempore)
- **1967 - 1973** The Rt. Hon. the Lord Taylor of Harlow
- **1973 - 1981** Dr. M.O. Morgan
- **1981 - 1990** Dr. Leslie Harris
- **1990 - 1999** Dr. Arthur W. May
- **1999 - 2007** Dr. Axel Meisen
- **2007 - 2009** Dr. H.E.A. (Eddy) Campbell (Acting)
- **2009 - 2010** Dr. C. Loomis (pro tempore)
- **2010 - Present** Dr. G. Kachanoski

### 8.8 Chancellors of the University

- **1961 - 1968** The Rt. Hon. Lord Thomson of Fleet
- **1971 - 1979** Dr. G. Alain Frecker
- **1979 - 1988** Dr. Paul G. Desmarais
- **1994 - 2008** Hon. Dr. John C. Crosbie
- **2008 - 2012** Dr. Rick J. Hillier
- **2012 - Present** Dr. Susan Dyer Knight

### 8.9 Chairs of the Board of Regents (Established May, 1950)

- **1950 - 1954** Hon. Sir Albert Walsh
- **1954 - 1968** Dr. Edmund J. Phelan
- **1968 - 1974** Hon. Dr. Gordon A. Winter
- **1974 - 1982** Hon. Dr. Frederick Russell
- **1982 - 1991** Dr. Charles White
- **1991 - 1997** Dr. Janet Gardiner
- **1997 - 2002** Dr. Edward Roberts
- **2002 - 2003** Chris Decker
- **2003 - 2004** Dr. Georgina Hedges (pro tempore)
- **2004 - 2006** Lorne Wheeler
- **2005 - 2007** Dr. Georgina Hedges (pro tempore)
- **2007 - 2008** Gilbert Dalton
- **2008 - 2012** Dr. Robert Simmonds
- **2012 - Present** Iris Petten

### 8.10 University Constitution

The Constitution of the University is embodied in an Act of the House of Assembly of Newfoundland entitled An Act Respecting the Memorial University of Newfoundland, Chap. 231, Revised Statutes of Newfoundland (as amended). The Act delineates the authority and the functions of the University and its parts, as follows:

There shall be a university which shall be called the Memorial University of Newfoundland, consisting of a Chancellor, Convocation, Board of Regents, Senate, Faculty Councils and the Faculties and which shall be a body politic and corporate. No other university having corporate powers capable of being exercised within Newfoundland shall be known by the same name, nor shall any other university have power to grant degrees.

The University shall have full power and authority from time to time and at all times to establish and maintain such faculties, colleges, schools, institutions, departments, chairs and courses as to the Board of Regents may seem meet, and to give instructions and training; to grant degrees, including honorary degrees, diplomas and certificates of proficiency; to provide facilities for the prosecution of original research in every branch of knowledge and learning and to conduct and carry on such research work; and generally, to promote and carry on the work of a university in all its branches.

### 8.10.1 The Board of Regents

The management, administration and control of the property, revenue, business and affairs of the University are vested in a Board of
Regents, consisting of:

1. three ex-officio members
   a. the Chancellor of the University
   b. the President of the University
   c. the Vice-President of the University who is the Pro Vice-Chancellor;

2. six members elected by the Alumni Association of the University;

3. seventeen members appointed by the Lieutenant-Governor-in-Council; and

4. four members appointed by the Lieutenant-Governor-in-Council being full-time students of the University who
   a. meet the requirements set out in the regulations, and
   b. are recommended to the Lieutenant-Governor-in-Council by the board following the recommendation to the board of one candidate each from the following student unions:
      i. the Memorial University of Newfoundland Students' Union,
      ii. the Graduate Students' Union,
      iii. the Marine Institute Students' Union, and
      iv. the Grenfell Campus Students' Union.

8.10.2 The Senate

Matters of an academic character are in general charge of the Senate of the University, consisting of the following:

1. The Chancellor of the University;

2. ex-officio members who shall be
   a. the President of the University, who shall be the chairman thereof,
   b. the Vice-President (Academic) of the University, who shall be the deputy chairman thereof,
   c. the Deputy Minister of Education or a representative of the Deputy Minister,
   d. the Vice-President of the Grenfell Campus,
   e. the Deans of the Faculties of the University,
   f. the Dean of Graduate Studies,
   g. the University Librarian,
   h. the University Registrar, and
   i. such other persons holding office within the University or in any of the campuses or institutions affiliated with the University chosen in such number and manner as may be approved by the Board;

3. such members from the academic staff of the Faculties and Professional Schools of the University, exclusive of any person who is a member by virtue of paragraph 2., elected in such number and manner as may be approved by the Board, but the number elected under this paragraph shall be not less than twice the number of members named or chosen under paragraph 2.; and

4. thirteen members from the students in attendance at the University, including at least one student from the Marine Institute, one graduate student and one student from Grenfell Campus with all members to be chosen in a manner approved by the Board.

8.10.3 Convocation

Convocation of the University, as provided in the Act, is composed of the Chancellor, the President, the Senate, the Board of Regents, all persons who are graduates of the Memorial University College, all persons holding academic appointments with the University whose names are added to the roll of the Convocation by the Registrar of the University from time to time upon instructions from the President, and all persons who have become graduates of the University. The functions of Convocation are chiefly elective, but it may also consider all questions affecting the well-being and prosperity of the University and make representations from time to time on such questions to the Senate, which shall consider the same and return to the Convocation its conclusions thereon.

8.10.4 Affiliation

The Act provides that, subject to the approval of the Lieutenant-Governor-in-Council, the University may affiliate with any college or institution established in the province for the promotion of Arts and Science, or for instruction in Law, Medicine, Nursing, Education, Engineering, Agriculture or in any other useful branch of learning, and to dissolve any such affiliation. The institution which has become affiliated with the University under this provision is Queen's College, St. John's.

8.11 Queen's College

8.11.1 Faculty of Theology

Queen's College, founded in 1841, is an Associate Member of The Association of Theological Schools in the United States and Canada and is affiliated with Memorial University of Newfoundland. It has a Faculty of Theology which offers courses in theology and in professional training for ministry. Under Legislative authority it confers the degrees of Master of Divinity, Master of Theological Studies, Master of Theology, and Bachelor of Theology and grants a Diploma in Theology and Ministry and an Associate in Theology.

Further information may be obtained by contacting the College in writing to The Registrar, Queen's College, St. John's, NL, A1B 3R6, or by telephone to (709) 753-0116, (877) 753-0116 (toll free), by fax to (709) 753-1214, by e-mail to queens@mun.ca or through the website at www.queenscollegenl.ca.

8.12 Academic Dress

The academic dress for matriculated undergraduates of the University shall be similar to the Scholar's gown of the University of Oxford. It shall be worn whenever the President so directs.

The gowns of the Bachelors shall be of black stuff. The gowns of the Masters shall be of black stuff or silk. The gowns of the Doctors shall be of fine scarlet cloth or silk, or of black stuff or silk.

The pattern of the Bachelor's gown shall be similar to that of the Oxford Bachelor's gown. The pattern of the Master's gown and the
Doctor's black gown shall be similar to that of the Oxford Master's gown, except that the Doctor's gown shall have an edging of black silk braid at the opening of the sleeve. The Doctor's scarlet gown shall be similar to that of the Oxford Doctor of Divinity's gown.

The hoods of the Bachelors shall be made of black stuff, the hoods of the Masters of black silk, and the hoods of the Doctors of scarlet silk. They shall be full in shape and lined with the University colours of claret and white. The hoods of the Bachelors shall be trimmed with white fur, the tippets with velvet in the colours distinctive of the Faculty or Degree. The hoods and tippets of the Masters shall be edged with velvet in the colours distinctive of the Faculty or Degree. The hoods and tippets of the Doctors shall be edged with silk in the colours distinctive of the Faculty or Degree; however, the hood of the Doctor of Philosophy shall be of claret silk, lined and edged with claret silk.

The University hood, worn by official representatives of Memorial University of Newfoundland participating in ceremonies, shall be made of black stuff, and lined and edged with claret and white silk.

The distinctive colours for the degrees shall be:

- B.A., B.A. (Policie Studies), M.A., M.G.S. - White
- B.Eng., M.Eng., M.E.M. - Orange
- B.M.S., B. Tech, M.M.M., M.M.S.(Fisheries Resource Management), M.T.M. - Navy Blue
- B.Mus., M.Mus. - Pink
- B.N., M.N. - Coral
- B.R.M. - Citron
- B.Sc.(Pharmacy), M.Sc.(Pharmacy) - Clover
- B.S.W., M.S.W. - Ruby Gem
- M.D., M.P.H., M.Sc.(Medicine), M.H.E. - Green
- M.A.Ed. (Education Francophone Literatures and Cultures), M.E.R. - Chocolate Brown
- M.Phil., Ph.D. - Claret
- M.W.S. - Purple

The caps of Bachelors and Masters shall be black and of the square shape, with black tassel. The caps of the Doctors shall be similar to the Oxford Doctor's bonnet.

The academic dress for the Officers of the University shall be as follows:

- Chancellor - a silk gown heavily embroidered with gold braid
- Vice-chancellor - a silk gown embroidered with gold braid
- Pro vice-chancellor - a silk gown embroidered with gold braid
- Registrar and other Officers of the University - gowns of a pattern approved by Senate

8.13 The University Library

www.library.mun.ca

The University Library consists of the Queen Elizabeth II Library, the Health Sciences Library, the Dr. C.R. Barrett Library, Fisheries and Marine Institute, and the Education Library & Commons all in St. John's, and the Ferriss Hodgett Library in Corner Brook. These five units together have a collection equivalent to 2.5 million volumes and more than 26,000 current journal subscriptions. This collection serves as the major information resource for the University as well as the Province. All units of the library system may be used by all students, faculty and staff, as well as the community at large.

Academic Integrity 100A/B, a course offered by the University Library, introduces students to the concept of academic integrity and the important role it plays at Memorial University of Newfoundland. Students complete online modules on a variety of topics including: understanding the meaning of academic integrity and its associated university regulations; how to complete university work with academic integrity; and how to avail of supports to ensure academic integrity. Normally, 100A is completed by week 7 of a student's first semester and 100B is completed prior to the end of the student's second semester. This course is mandatory for first year full-time undergraduate students. Registration in subsequent semesters is dependent upon successful completion of this course. This course is offered only online and has a credit hour value of 0.

8.13.1 Queen Elizabeth II Library

The Queen Elizabeth II library was opened for service in January 1982. It is an impressive structure of 200,000 square feet on five levels. It has a seating capacity of 2,000 and can hold 2.6 million physical volumes. The Information Services Division, located on the main floor (second level), provides assistance to people wishing to make use of the library's resources and services. This division provides reference and computer-assisted bibliographic search services. Library tours and individual or group instruction in the use of the library and its resources may be arranged for students through this division. The Commons part of Information Services is located on the library's main floor. The Commons is a partnership between Computing and Communications, the Queen Elizabeth II Library, and the Writing Centre. The Commons provides access to print, electronic, and technology resources with the support and expertise needed to help users in the use of these resources. The wall space in the Commons is called First Space and is used to highlight the work of the fine arts students of Memorial University of Newfoundland. The Government Documents Section contains a depository collection of Canadian government documents together with an extensive collection of material from the United States and other countries and international organizations. Document Delivery provides interlibrary loan and services to off-campus students. The Library's Centre for Newfoundland Studies collects all published material pertaining to Newfoundland and Labrador, as well as manuscript materials. The Music Resource Centre, located in the School of Music, contains scores, sound recordings, and listening equipment.

8.13.2 Health Sciences Library

The Health Sciences Library is located on the ground floor of the Health Sciences Centre on the north campus of the University. It is a designated Canadian MEDLINE Centre which provides access to computer-assisted searches of the world's biomedical literature on demand in support of clinical, teaching, and research interests. The Health Sciences Library has a collection of over 40,000 books on medicine, nursing, dentistry, pharmacy and allied health subjects and subscribes to more than 1700 paper and electronic journals. It maintains an audio-visual collection of over 1500 titles, which includes videotapes, slides, microfiche/film and audio cassettes.
8.13.3 Dr. C.R. Barrett Library
The Dr. C.R. Barrett Library is located on the main floor of the Fisheries and Marine Institute. It offers a comprehensive range of library and audio-visual services to students, faculty, and staff at the Fisheries and Marine Institute, the College of North Atlantic Engineering Technology Centre and to the Newfoundland and Labrador marine industries.

The library collection supports study and research in fisheries and aquaculture, marine engineering, nautical science, and the aquatic environment. The collection also includes significant holdings in engineering.

Library holdings include 50,000 books and technical reports, 400 current magazine and newspaper subscriptions, print and electronic reference sources, 1,400 films and videos, maps and pamphlets. The collection includes 4,500 ship drawings.

8.13.4 Education Library and Commons
The Education Library and Commons are located in the Faculty of Education, G.A. Hickman Building on the second and fifth floors respectively. With seating for 100, the library's reading room, study centres, and comfortable seating area are all collaborative spaces.

Individual study carrels, computer carrels, and an interactive whiteboard workspace complete the public areas.

Library collections include 15,000 current and superseded curriculum resources authorized for use in Newfoundland and Labrador schools, and 20,000 children's literature print books and electronic resources. Specialized collections, including the textbook archive, and a test library of assessment instruments, are restricted for use by students and faculty completing coursework and research with these materials.

The Teaching & Learning Commons is a technology-rich collaborative learning space designed with contemporary classroom computer equipment and modular furniture. Assistance is available for faculty, staff and students requiring technical help. With seating for 60, the flexible spaces, group work, and presentation practice areas are well appointed with hardware and software specific to the needs of Faculty of Education undergraduate and graduate students.

8.13.5 Ferriss Hodgett Library
The Ferriss Hodgett Library is located on levels 2 and 3 of the Library & Computing Building, Grenfell Campus, with seating for 203 users and includes group study rooms, audio-visual and computer carrels. The Library holds over 100,000 books and 450 current subscriptions, along with collections of audiovisual materials, government documents, microforms, periodicals, and access to many electronic journals. A full range of public services is available including reference assistance, orientation tours and interlibrary loans, as well as access to electronic information resources, Internet, spreadsheet, word processing, and presentation software.

9 Dentistry, Occupational Therapy, and Physiotherapy

9.1 General Information

Because admission requirements vary significantly in different institutions and from one health science to another (e.g., Dentistry, Dental Hygiene, Occupational Therapy), interested students are advised to plan carefully and early.

The Career Planning Centre, located in the University Centre in room UC4002, can provide advice or, in some instances, arrange for students to contact other sources of more detailed information. The Centre maintains considerable information on careers in the various health fields, including guides and university calendars outlining where the programs of study are available and their entrance requirements. Interested students should consult these materials as early as possible, preferably before the Orientation Week interview and first-year registration.

9.2 Dentistry

After having consulted the Career Planning Centre, students who require further advice about dentistry prerequisites should consult the appropriate university.

9.3 Occupational Therapy

Students interested in pursuing a career in Occupational Therapy may arrange an appointment with Patricia Moores, who has been designated by Memorial University of Newfoundland as a liaison person for the School of Occupational Therapy at Dalhousie University. Further information may be obtained by writing Ms. Patricia Moores, Memorial University of Newfoundland, Room 2765, Health Science Centre, St. John's, NL A1B 3V6, or by telephone to (709) 777-7105.

9.4 Physiotherapy

Physiotherapy career information is available at the Career Planning Centre. Students requiring additional assistance or advice may arrange an appointment with Kim Furlong. Ms. Furlong has been designated by Memorial University of Newfoundland as a liaison person with Dalhousie University School of Physiotherapy and as a source of advice concerning other Physiotherapy Programs in Canada. Further information may be obtained by writing Kim Furlong, Memorial University of Newfoundland, Room 2765, Health Sciences Centre, St. John's, NL A1B 3V6, or by telephone to (709) 777-7080, or e-mail Kim.furlong@mun.ca.

10 Centre for Innovation in Teaching and Learning (CITL)

www.citl.mun.ca

Interim Director
Wells, R., B.Sc.(Hons.), M.Ed. Memorial

Associate Directors
Simmons, B., B.Comm., M.B.A. Memorial

The Centre for Innovation in Teaching and Learning (CITL) leads the delivery of Memorial University of Newfoundland's online education offerings, the provision of educator development, and the use of educational technologies in teaching and learning both online and on campus. Through its activities CITL serves students on all of the University's Campuses, and connects students across the Province, country and around the world who have limited educational opportunities, or who seek flexibility in education delivery. The Department also enhances, promotes and supports an e-learning vision throughout the Institution. CITL provides Faculties and Schools with the e-learning expertise and knowledge needed to provide an engaging and responsive learning environment in the classroom and online. A Memorandum of Understanding with the Department of Education's Centre for Distance Learning and Innovation (CDLI), which delivers
distance education to K-12 students, allows CITL to share knowledge and information and prepare the incoming university student for online learning.

10.1 Online Learning
CITL offers close to 500 online undergraduate and graduate courses to over 23,000 course registrants annually. Courses are available in many disciplines with complete undergraduate and graduate degrees available online. These include bachelor degrees in business (Bachelor of Business Administration), maritime studies (Bachelor of Maritime Studies), and technology (Bachelor of Technology); master degrees are offered in education (Master of Education (Information Technology) and Master of Education (Post-Secondary)), human kinetics and recreation (Master of Physical Education), nursing (Master of Nursing), maritime management (Master of Maritime Management), technology management (Master of Technology Management (Engineering/Applied Science Technology) and Master of Technology Management (Aquaculture Technology)), and marine studies (Master of Marine Studies (Fisheries Resource Management)). Courses are delivered online and utilize a variety of learning technologies including synchronous and asynchronous virtual classrooms, collaborative tools, blogs, lecture capture, and videoconferencing. For a comprehensive listing of all online and mixed-mode programs visit www.citl.mun.ca/learning/programs.php.

10.2 Client Services
CITL provides support on campus at multiple service points (G.A. Hickman Building, ED1032, Science Building, SN2104, S.J. Carew Building, EN3012), Grenfell Campus, Ferris Hodgitt Library, the Commons in the Queen Elizabeth II Library and the Teachers' Legacy Rotunda). Online and telephone support is also available seven days a week. When the St. John's Campus is closed unexpectedly, regular online service hours remain in effect with staff providing remote client support. CITL can assist with: accessing online course components; accessing and using educational technologies, including DesireLearn and Online Rooms; technical support for hardware/software configuration, embedded multimedia, and creating/editing course blogs; and accessing online student resources. CITL also supports and administers mid-term, final and deferred examinations for online courses. Additionally, to best serve new and returning online students, CITL maintains regular and scheduled contact throughout the online experience to effectively engage and retain students. Further information on CITL services may be obtained by telephone to (709) 864-8700, or toll free to (866) 435-1396, or through the website at www.citl.mun.ca.

10.3 Course Development and Educational Technology
As an academic support unit, CITL works in coordination with Memorial University of Newfoundland's faculties and schools to identify and develop courses and programs for online delivery. Design and development professionals are paired with content experts from the respective faculties and schools to develop, manage and deliver the University's online offerings. In all its functions, CITL encourages and supports innovative teaching practices through the effective application of instructional technologies both online and on campus. A wide range of professional services in video production, multimedia development, instructional design, and classroom technology are available through CITL and aim to provide faculty with pedagogical enhancements and ultimately increase student engagement. Inquiries may be made by telephone to (709) 864-8700 or (866) 435-1396 (toll free).

10.4 Educator Development
CITL supports the University's faculty members, per course instructors, postdoctoral fellows, instructional staff members, and graduate students by providing educator development opportunities that enhance knowledge and skills in teaching. The team supports a collaborative, responsive, and pragmatic approach to developing services and programs related to teaching and learning using a blended format. Among the services provided are professional development experiences and programs for teaching development; individual and small group consultations; and assistance with teaching dossier preparation. Support is given for awards applications as well as other activities and initiatives that recognize excellence in university teaching. Further information on educator development services may be obtained by telephone (709) 864-3028, by fax (709) 864-7941, or by email to educatordev@mun.ca.

11 Students' Unions

11.1 Memorial University of Newfoundland Students' Union (MUNSU)
The Memorial University of Newfoundland Students' Union Act (1968) incorporated the Students' Union (MUNSU) as the official students' union representing undergraduate students at the University's St. John's campus.

The Students' Union provides a range of advocacy work to improve the lives of its members and increase accessibility of post-secondary education. It lobbies all levels of government and other decision-making bodies and organizes campaigns around these and other issues which are important to the membership. It also provides services to improve the quality of student life: the Attic (Copy Centre, Convenience, and Postal Service), Health and Dental Insurance, SafeDrive / WalkSafe, the Student Handbook/Dayplanner, Breezeway Bar, CHMR-FM radio, and others. The cost of services are partially funded by Students' Union fees paid by each undergraduate student upon registration. MUNSU assists students on an individual basis to resolve student aid issues as well as academic-based problems and appeals. Through the office of the Director of Advocacy, problems with appeals, assessments, repayment, and general complaints in these areas are addressed. Students who have more serious issues may be referred to the MUNSU legal aid service for one free consultation. These sessions are not considered extended legal counsel.

MUNSU has established and provides funding for a number of Resource Centres on campus: Women's Resource Centre (WRC), International Students' Centre (ISC), Lesbian-Bisexual-Gay-Transgender Resource Centre (LBGT-MUN), MUN DISC (Disability Information and Support Centre), Students Older than Average (SOTA), Student Parents Resource Centre, and the Aboriginal Students' Centre. The Students' Union also operates over 200 student clubs organized around a wide range of academic and extracurricular activities.

The Students' Union is a member local of the Canadian Federation of Students (CFS) representing over half a million students across Canada. Further information may be obtained from the website at www.munsu.ca.

11.1.1 Students' Union Fee
All full-time and part-time undergraduate and graduate students of the University pay compulsory fees to their respective students' unions (MUNSU or GSU) and all students, upon registration, automatically become members of either MUNSU, the undergraduate students' union, or GSU, the graduate students' union.
11.2 Grenfell Campus Student Union (GCSU)
Information regarding the Grenfell Campus Student Union (GCSU) is available at www.gcsuonline.ca.

11.3 Marine Institute Student Union (MISU)
Information regarding the Marine Institute Student Union (MISU) is available at www.misuonline.ca.

11.4 The Graduate Students’ Union (GSU)
The Graduate Students’ Union (GSU) at Memorial University of Newfoundland is an organization run for graduate students by graduate students. Founded in 1967, the GSU is one of Canada’s oldest independently incorporated graduate student governments. Every graduate student at the University becomes a member of the GSU upon registration. Presently, the graduate student body consists of over 3000 full and part-time students, thereby comprising more than 10% of the total student population at Memorial University of Newfoundland.

The Graduate Students’ Union has two main functions: 1) to represent and protect the interests of the graduate students at all levels of university governance, and 2) to help enhance the quality of graduate student life at Memorial University of Newfoundland. Graduate student fees provide the GSU with an annual operating budget. These fees are used to run the GSU office, help finance social and academic events for graduate students, provide conference aid for students presenting at conferences, and to cover other operating expenses.

The Graduate Students’ Union is run by a Board of Directors consisting of the five GSU Executive officers and one student representative from each academic unit with a graduate program. Additionally, graduate students who sit on various university committees regularly attend. The Board meets once a month to assist the Executive in guiding the development and direction of the organization. The Board meetings also give students a chance to raise concerns from their individual departments and in return, to receive advice or suggestions on problem solving. These meetings are the main line of communication between the Executive officers and the graduate student population at the University. It is for this reason, that the GSU needs an active and interested Board of Directors. Graduate students who are interested in getting involved are always welcome, and should speak to their department representative, or contact the GSU office.

The Graduate Students’ Union is located in Feild Hall on the north side of campus. Operated by the GSU, Feild Hall is comprised of four floors: the top two floors for a graduate student residence, one floor for departmental graduate student offices and GSU offices, and the ground floor for Bitters - Restaurant and Lounge, the pub owned and operated by the GSU.

The Graduate Students’ Union general office is located on the second floor of Feild Hall in room GH 2007. Office hours are posted outside the office door, on the answering service, and the website. You can reach the GSU by phone to (709) 864-4395, by fax at (709) 864-3395, by email to gsu@gsumun.ca, or by writing to Graduate Students’ Union, Feild Hall, GH2007, 216 Prince Philip Drive, St. John’s, NL, A1B 3R5. Further information about the GSU can be obtained from the website at www.gsumun.ca/.

12 Special Divisions and Separately Incorporated Entities

12.1 Canadian Centre for Fisheries Innovation (CCFI)
www.ccfi.ca

Board of Directors
Gregory, G. (Chair), Fisheries Consultant, St. John’s, NL
Abrahams, Dr. M., Faculty of Science, Memorial University of Newfoundland
Bonnell, C., School of Fisheries, Marine Institute of Memorial University of Newfoundland
Irvine, G., Lobster Council of Canada, Halifax, NS
Lane, M., Newfoundland Aquaculture Industry Association, St. John’s, NL
Linstead, G., Labrador Fishermen’s Union Shrimp Co. Ltd., Lance au Loup, NL
Miller, A., Baader North America, Kansas City, US
Pryor, M., Aquaculture Consultant, St. John’s, NL
Shea, R., Marine Institute
Snow, P., High Liner Foods, Lunenburg, NS
Sullivan, B., Ocean Choice International, St. John’s, NL
Verge, R., Canadian Centre for Fisheries Innovation, St. John’s, NL
Wareham, A., Icewater Seafoods, Arnold’s Cove, NL
Watkins, B., Fish Harvester, Cottlesville, NL

Management and Administrative Staff
Managing Director

Executive Assistant
Horan, C., B.A. Memorial

Industrial Liaison Officer

Located at the Fisheries and Marine Institute, the Canadian Centre for Fisheries Innovation is owned by Memorial University of Newfoundland. The Centre provides scientific research and technical services to the fishery and aquaculture. Working closely with the faculty and staff of the region’s universities and technical institutes, the Centre provides expert assistance in the areas of aquaculture, harvesting and processing, with the aim of enhancing the industry’s productivity and profitability. CCFI’s activities also include resource conservation research, equipment development and marine biotechnology. The Centre’s services are available to anyone in the fishery or aquaculture industry who wishes to overcome obstacles or meet opportunities through science and technology.

CCFI is an organization structured to meet the needs of the industry quickly and efficiently. The Industrial Liaison Officer collaborates directly with clients to develop and execute industrially relevant research and development projects.

Mandate
The organization works with industry clients to identify needs. It then collaborates with scientific and technical faculty and staff to devise solutions to meet those needs. CCFI works to ensure that the initiatives are organized, on time and directed to address the specific needs of the industry clients. The Centre also funds these projects, when required.
The Centre's research and development undertakings cover all areas of importance to the fishery and aquaculture industry:
1. Environmentally Sustainable Harvesting
2. Energy Efficiency
3. Utilization of Fish Wastes
4. Resource Assessment and Surveys
5. Improved and More Efficient Fishing Platforms
6. Human Resource/Technology Applications
7. Alternative Fish and Shellfish Species for Aquaculture
8. Efficiency and Profitability in Aquaculture
9. Resolving Environmental Issues in Aquaculture

With strong representation from industry, the Board of Directors oversees the direction and mandate of the Centre to ensure that its work is always relevant to the needs of the fishery.

12.2 C-CORE

www.c-core.ca

Board of Directors
Oake, D., (Chair), President, Invenio Consulting Inc.
MacLeod, M., President & CEO, C-CORE
Bursey, T., Vice-President, Corporate Services & CFO, Council of Canadian Academies
Clarke, D.N., Partner, McInnes Cooper Barristers & Solicitors
Gosine, R., Associate Vice-President (Research) pro tempore, Memorial University of Newfoundland
Henley, S., Vice-President Canada, Subsea 7
Janke, B., Vice-President, East Coast, Suncor Energy Inc.
Keating, J., Executive Vice-President, Corporate Services & Offshore Division, Nalcor Energy
McDonald, P., President, Altair Holdings Inc.
Naterer, G., Dean, Faculty of Engineering and Applied Science & Professor of Mechanical Engineering, Memorial University of Newfoundland
Perry, J., COO, Newfoundland Power
Sellers, S., Technical Manager, Hebron Project, ExxonMobil

Officers of the Corporation
Brown, M., M.Sc. Eng. University of Alberta, P.Eng.; Vice-President, Oil & Gas
Kennedy, S.C., B.Comm., C.M.A. Memorial, Vice-President, Corporate Services
MacLeod, M., B.Sc. LaSalle, M.Sc. Stanford; President & CEO
Phillips, R., B.Sc. Bristol, M.Phil., Ph.D. Cambridge, P.Eng.; Cross appointment with Faculty of Engineering and Applied Science
Power, D., B.Eng., M.Eng. Memorial, P.Eng; Vice-President, Remote Sensing
Healey, R., Corporate Secretary

Management Team
Brown, M., M.Sc. Eng. University of Alberta, P.Eng.; Vice-President, Oil and Gas
Kennedy, S., B.Comm, Memorial, CMA; Vice-President, Corporate Services
MacLeod, M., B.Sc. LaSalle, M.Sc. Stanford, President & CEO
Ralph, F., B.Eng., M.Eng., Ph.D. Memorial, P.Eng.; Chief Operating Officer

C-CORE is a separately incorporated corporation of Memorial University of Newfoundland that creates value in the private and public sectors by undertaking applied research and development, generating knowledge, developing technology solutions and driving innovation.

Established in 1975 to address challenges facing oil & gas development offshore Newfoundland & Labrador and other ice-prone regions, C-CORE is now a multi-disciplinary R&D organization with world-leading capability in:
1. Remote Sensing
2. Ice Engineering
3. Geotechnical Engineering

With unparalleled harsh environment expertise, C-CORE is active on every continent, providing research-based advisory services and technology solutions to national and international clients in the natural resource, energy, security and transportation sectors.

C-CORE focuses on long-term value by investing in research, equipment and competence development, and continuously growing capability and capacity. Throughout the past generation, C-CORE has supported over 1000 undergraduate, graduate and post-doctoral students on their path to become the highly qualified personnel needed to drive global innovation, and has served as an incubator for 18 new technology companies.

Headquartered in St John's, NL, with offices in Ottawa and Halifax, C-CORE maintains a close collaborative relationship with Memorial University of Newfoundland, sharing and augmenting its extensive facilities, diverse academic expertise and research portfolio.

From a staff of some 65 scientists, engineers and other professionals, project teams are assembled based on client need, drawing on internal expertise across disciplines, as well as national/international academic, institutional and corporate partnerships, in order to support increasingly safe and sustainable operations in challenging environments around the globe.

C-CORE’s in-house facilities include mechanical, electrical and soils laboratories; high-security high-capacity computing facilities; and a 5.5m-radius, 200G payload capacity Actidyne centrifuge (the largest in Canada and the only one in North America designed to model cold region phenomena), with adjoining model preparation laboratory and earthquake simulator; mechanical, electrical and soils laboratories.

C-CORE hosts two major research centres:
1. CARD (Centre for Arctic Resource Development) is a centre for medium to long term research and development aimed at advancing safe, responsible and cost-effective development of hydrocarbon resources in Arctic and other ice-prone regions.
2. LOOKNorth (Leading Operational Observations and Knowledge for the North) is a national Centre of Excellence for Commercialization and Research (CECR) dedicated to validating and commercializing monitoring technologies that support safe and

Staff
Harris Walsh, K., Education Specialist
Kirby, B., Coordinator, Interprofessional Education
Reid, A., Research Coordinator

The Centre was established in September 1999 in response to a growing emphasis on interprofessional health care. Centre oversight is provided through a Governing Council comprising: the Deans of the Faculties of Education and Medicine and the Schools of Human Kinetics and Recreation, Nursing, Pharmacy and Social Work; the Director of the Student Wellness and Counselling Centre; or their representatives.

The Centre’s mission is to provide leadership in interprofessional education (IPE) and research that will improve the access, quality, safety and efficiency of health and social care provided to the public. Key activities of the Centre include:

1. development of interprofessional education curriculum for both learners and practitioners;
2. development of evaluation tools and frameworks for interprofessional education and collaborative practice;
3. research initiatives and networks related to interprofessional education and collaborative practice;
4. faculty development related to interprofessional education and collaborative practice; and
5. development of leaders in interprofessional education and collaborative practice.

All members of the University community including faculty, staff, and students are invited and encouraged to be engaged in the activities of the Centre. Academic Staff Members may hold an appointment as either a Faculty Scholar or Faculty Associate of the Centre. Faculty Scholars are appointed by the Governing Council on the recommendation of the respective Dean or Director based on their active engagement in academic development and scholarly activity related to the field of interprofessional collaboration and education. Faculty Associates actively participate in curriculum development or instruction of interprofessional education programs coordinated by the Centre. They are reviewed and approved by the Governing Council on an annual basis.

Further information may be obtained by contacting the Centre in writing to the Centre for Collaborative Health Professional Education, Memorial University of Newfoundland, Health Sciences Centre H1650, St. John’s, NL Canada, A1B 3V6, or by telephone at (709) 864-2985, or by fax at (709) 864-4988, or through the website at www.med.mun.ca/cchpe.

12.4 Centre for Earth Resources Research (CERR)

Director
Hanchar, J.M., B.S. Memphis, M.S. Vanderbilt, Ph.D. Rensselaer Polytechnic Institute

Research Group
The Centre draws on the research expertise of faculty and research staff members in the Department of Earth Sciences as well as other specialists inside and external to the University. For a complete listing of faculty, see Earth Sciences entry.

Scope and Objectives
The CERR was established in 1983 to provide for the co-ordination and promotion of earth resources research and associated work related to the origin, discovery, development, exploitation, and environmental aspects of earth resources. The Centre promotes, initiates, and co-ordinates research within the earth resources disciplines on the national and international scenes. Researchers interact, when appropriate, with the industrial and government sectors and introduce other organizations to the potential benefits of further research and development in earth resources. The special facilities of the Centre complement the development of graduate and undergraduate programs in earth sciences and related disciplines at Memorial University of Newfoundland. A further function of the Centre is to contribute to the training of competent people in solving earth resources problems and to encourage personnel exchanges with industry and government. The Alexander Murray Building houses the Centre, and has laboratories for teaching and basic and applied research.
Organization
The Centre is an integral part of the Department of Earth Sciences. The active research of faculty members contributes to programs in the Centre. Increasing collaboration is under way with government and industry in research projects that emphasize earth resources. The work of the Centre addresses problems and opportunities related to mineral resources, petroleum resources, exploration technology, environmental geoscience, and generic research. The Centre works closely with other local, national, and international research institutes. CERR hosts the geoscience component of the University's Oil and Gas Development Partnership.

12.5 Centre for Risk, Integrity and Safety Engineering (C-RISE)
www.mun.ca/engineering/crise

Director
Khan, F., B.Sc. (Eng.) AMV, M.Eng., I.I.T. Roorkee, Ph.D. Pondicherry, P.Eng.; Professor and Vale Research Chair; Head, Department of Process Engineering, Faculty of Engineering and Applied Science

Research Theme Leads
Hawboldt, K., B.Sc. Saskatchewan, M.Sc., Ph.D. Calgary, P.Eng.; Professor, Faculty of Engineering and Applied Science
Ahmed, S., B.Sc., M.Sc. BUET, Ph.D. Alberta, P.Eng.; Assistant Professor, Faculty of Engineering and Applied Science
Imtiaz, S., B.Sc., M.Sc. BUET, M.Sc. Calgary, Ph.D. Alberta, P.Eng.; Associate Professor, Faculty of Engineering and Applied Science
Veitch, B., B.Eng., M.Eng. Memorial, Dr.Tech., Lic.Tech. Helsinki, P.Eng.; Husky Energy Chair in Oil and Gas Research; Professor, Faculty of Engineering and Applied Science
Zhang, Y., B.Eng., M.Eng. Tianjin, Ph.D. National University of Singapore, P.Eng.; Associate Professor, Faculty of Engineering and Applied Science

Research Collaborators
Faculty of Engineering and Applied Science: Qiu, W., Venkatesan, R., James, L., Iqbal, T., Chen, B., Nakhla, S., Lye, L., Dhar, A., Hawladar, B., Mann, G., Shirokoff, J.
Faculty of Humanities and Social Sciences: Neis, B.
Faculty of Science: Variyat, A., Alam, J., Merschrod, E., Gilliarad, P.
Faculty of Medicine: Gadag, V.
School of Human Kinetics and Recreation: MacKinnon, S.

Located in the Faculty of Engineering and Applied Science, the Centre for Risk Integrity and Safety Engineering (C-RISE) is a leading interdisciplinary centre of excellence on safety, integrity and sustainability of industrial processes and systems, with particular focus on process operations in harsh environments. The areas of expertise and activities are:
- Safety engineering;
- Risk engineering;
- Occupational and process safety;
- Fault diagnosis and early warning systems;
- Asset Integrity modelling and management; and
- Environmental modeling and management.

C-RISE engages highly qualified experts and brings together faculty and researchers from engineering and applied science, mathematics, sociology, business, medicine and others to pursue innovative and cross-disciplinary safety, risk and reliability based research and development. The Centre fosters collaboration among faculty and researchers in these various units as well as other experts, nationally and internationally.

Further information can be obtained by writing to the Centre for Risk, Integrity and Safety Engineering (C-RISE), Memorial University of Newfoundland, Bruneau Centre for Research and Innovation, IIC 1001, St. John’s, NL, A1C 5S7, or by e-mail at crise@mun.ca, or to the Director at fikhan@mun.ca, or through the website at www.mun.ca/engineering/crise.

12.6 Centre for Social Enterprise
www.mun.ca/socialenterprise

Manager
Helwig, N., B.A. McGill, M.B.A. Strathclyde

The Centre for Social Enterprise is a collaboration between the Faculty of Business Administration and the School of Social Work. Memorial University of Newfoundland’s Centre for Social Enterprise acts as a catalyst to nurture social entrepreneurs and strengthen social enterprises in Newfoundland and Labrador through three strategic pillars:
- Research Centre
- Supporting Teaching and Learning Programs
- Social Enterprise Incubator

The Centre works within the social entrepreneurial ecosystem to create linkages among students, faculty, community, and company leaders for networking and mentorship opportunities. It’s a platform to support creative linkages between academic disciplines to nurture innovation in social entrepreneurship.

Further information can be obtained by writing to the Centre for Social Enterprise, Faculty of Business Administration, BN-4016, Memorial University of Newfoundland, St. John’s, NL, A1B 3X5, or by e-mail at socialenterprise@mun.ca, or by telephone to (709) 864-6740, or through the website at www.mun.ca/socialenterprise.

12.7 Folklore and Language Archive (MUNFLA)
www.mun.ca/folklore/munfla

Folklore Transcriber
Lawrence, R.

Honorary Research Associate (Language and Folklore)
Widdowson, Dr. J.D.A.

Memorial University of Newfoundland Folklore and Language Archive (MUNFLA) is Canada's foremost repository for recorded and collected items of Newfoundland and Labrador folklore, folklife, language, oral history and popular culture. Established in 1968, it is one of the oldest archives at Memorial University of Newfoundland. The Archive is an integral part of the teaching and research activities of the Department of Folklore at the graduate and undergraduate levels. It is a member of the Association of Newfoundland and Labrador Archives and the Canadian Council of Archives.

The Archive contains diverse materials, donated by more than 12,000 contributors, covering topics such as custom and belief, childlore, material culture and work techniques, song, music, dance, tale, legend, personal experience narrative, poetry, riddles and conundrums, proverbs and foodways. Special holdings include the field notebooks of Maud Karpeles who compiled *Folk Songs from Newfoundland* (1971); E. R. Seary's collection of research materials on family names; the folklore collections of Herbert Halpert and John Widdowson; the extensive Newfoundland and Labrador song collections of Kenneth S. Goldstein and MacEdward Leach; Lawrence R. Smith's linguistic materials on Labrador Inuktitut and Southern Avalon dialect; 12,000 Canadian Broadcast Corporation recordings; the Lorne Russwurrm international collection of country music; and Franco-NL materials from the Centre d'Études Franco-Terreneuvienes. Overall, the collection contains 40,000 audio tape recordings, 13,500 commercial recordings, 21,500 photographs, 2,000 printed documents, 16,000 manuscripts, 1000 video tape recordings, 96,000 Folklore survey cards, and 4500 questionnaire responses.

Further information can be obtained by writing Memorial University of Newfoundland Folklore and Language Archive, Department of Folklore, ED-4038, G. A. Hickman Building, St. John's, NL Canada A1B 3X8, or by e-mail at munfla@mun.ca, or by telephone at (709) 864-8401, or by fax at (709) 864-4718, or through the website at www.mun.ca/folklore/munfla.

As the outreach unit of Memorial University of Newfoundland’s Faculty of Business Administration, the Gardiner Centre is focused on developing management and leadership skills, expanding business knowledge and facilitating organizational growth. Whether clients are existing or aspiring supervisors, managers, executives or entrepreneurs, the Gardiner Centre has programs to advance their business and leadership knowledge and skills. Through training, events or solutions, the Gardiner Centre connects clients with the expertise and experience of the Faculty’s instructors and other business leaders and educators.

The Gardiner Centre’s facilities, located on the fourth floor of the Faculty of Business Administration building, provide an interactive adult learning environment which is designed to provide clients with everything they need to ensure a relaxing, retreat-like atmosphere, conducive to learning.

Further information may be obtained by contacting the Gardiner Centre by telephone at (709) 864-7977 or through the website at www.mun.ca/gardinercentre.

12.9 GENESIS Group Inc.

www.genesiscentre.ca/

President and CEO
Simms, M., B.B.A. *Memorial*

GENESIS Group Inc. is a separately incorporated entity of Memorial University of Newfoundland and is governed by a board of directors representing industry, academia, and government. The Genesis Group is located on the third floor of the Bruneau Centre for Research and Innovation. The Genesis Centre is a support network to help knowledge-based businesses/entrepreneurs create high-growth enterprises. The Centre mobilizes the province's business community and a network of world class mentors to help the entrepreneurs develop comprehensive business plans, raise equity capital and secure global market access.
Further information may be obtained by contacting the GENESIS Group Inc. by telephone at (709) 864-2625 or through the website at www.genesiscentre.ca/.

The Leslie Harris Centre of Regional Policy and Development is tasked with coordinating and facilitating the University’s educational, research and outreach activities in the areas of regional development and public policy. The Harris Centre works with all faculty, staff, and students as well as all units within the University and serves as a reliable point of access for all stakeholders seeking to work with the University in activities related to regional development and public policy. The Centre interprets regional as all communities and regions in Newfoundland and Labrador, and policy and development includes all issues that affect the ability of communities and regions to be prosperous and sustainable. The Harris Centre seeks to connect faculty, staff and students with opportunity for practical application in Newfoundland and Labrador while representing the integrity and independence of University research, teaching and outreach. The Centre also provides support for communications, operations, and administration to the Office of Public Engagement and its reporting units.

Further information may be obtained by contacting The Harris Centre by telephone at (709) 864-3143, by e-mail at harriscentre@mun.ca, or through the website at www.mun.ca/harriscentre/.

The Harris Centre is home to Memorial University of Newfoundland's online connecting tool, Yaffle. Further information may be obtained at www.yaffle.ca.

Simmonds, C.S., Manager, B.Sc.(Hons.), Ph.D. Memorial
The Health Research Unit was established in 1991 as a unit of the Faculty of Medicine within the Division of Community Health. It makes available the professional skills, expertise and information resources of the Division to other faculty, government departments, non-government agencies and organizations, and the community.

The purpose of the Health Research Unit is to improve the health of the Newfoundland and Labrador community-at-large through research focussed on the prevention of disease and the protection and promotion of health.

Research Themes
1. Measurement of health status in community/workforce populations;
2. Assessment of the health care system;
3. Development and management of health information systems;
4. Design and analysis of health surveys and audits; and
5. Evaluation of health and social programs

The Health Research Unit may be contacted by telephone at (709) 864-6656 or through the website at www.med.mun.ca/hru/.

12.12 Institute of Social and Economic Research (ISER)

www.mun.ca/iserv

Board of Directors
Dean of Humanities and Social Sciences - virtute officii
Rankin, Dr. L., Department of Archaeology, Director
Boon, Dr. S., Department of Gender Studies
Davis, Dr. R., Department of Anthropology
Deal, Dr. M., Department of Archaeology
Field, Ms. C., QE II Library
Korneski, Dr. K., Department of History
Keeling, Dr. A., Department of Geography
Tenkorang, Dr. E., Department of Sociology
Tye, Dr. D., Department of Folklore

Purpose And Mandate
The purpose of the Institute shall be to undertake, sponsor, and publish research within such disciplines and in such parts of the world as are deemed of relevance to Newfoundland and Labrador and the broader Atlantic world. Without limiting the generality of the above, research pertaining directly to social and economic development in Newfoundland and Labrador shall be of special importance.

Organization
The Institute is an integral part of, and not an autonomous appendage, of the University. It is so organized that all its officers serve the University in other capacities and it is ultimately responsible to the President and Board of Regents of the University. The management of its affairs is vested in an Executive Committee, while the day-to-day responsibilities are in the hands of the Director. Since September 2006, the Executive Committee has also served as the Board of Directors of the J.R. Smallwood Foundation for Newfoundland and Labrador Studies.

Fellowships
In general, ISER fellowships function to supplement and stimulate research interests of faculty and graduate students working within the research mandate of ISER. Terms and conditions of ISER fellowships may be obtained in writing to ISER, Institute of Social and Economic Research, Memorial University of Newfoundland, St. John’s, Newfoundland and Labrador, A1C 5S7, or by telephone at (709) 864-8156, or by email at iser@mun.ca, or through the website at www.mun.ca/iserv/.

ISER Books
The Institute publishes research falling within the ISER mandate - more than 160 titles to date. Many of the books originate in research undertaken by ISER itself. Some notable ISER books, however, have originated outside the Institute. Authors are invited to submit completed manuscripts that fall within ISER’s mandate. Further information may be obtained in writing to ISER Books, Memorial University of Newfoundland, St. John’s, Newfoundland and Labrador, A1C 5S7, or by telephone at (709) 864-3453, or my email at iser-books@mun.ca, or through the website at www.mun.ca/iserv/.

12.13 Internationalization Office

www.mun.ca/international

Director
Knutson, S., B.Ed. Concordia, M.Ed. Memorial

Manager, Internationalization Office - Student Life
Walsh, L., B.A., M.Ed. Memorial

Purpose And Mandate
The Internationalization Office is, in general, concerned with:
1. implementing the Strategic Internationalization Plan 2020;
2. supporting the international experiences of students at home and abroad;
3. providing program information and advice to faculty and staff and act as the central contact with Universities Canada, the Canadian Bureau for International Education, and other similar bodies; and
4. pursuing new opportunities for international business development with the private sector and other educational institutions.

Further information may be obtained by contacting the Internationalization Office by telephone at (709) 864-2330 or through the website at www.mun.ca/international/ or by mail to Internationalization Office, 323 Prince Philip Drive, G.A. Hickman Building, Room ED4007, Memorial University of Newfoundland, St. John’s, NL, Canada A1B 3X8.
12.14 The J.R. Smallwood Foundation for Newfoundland and Labrador Studies
www.mun.ca/smallwood

Board of Directors
Dean of Humanities and Social Sciences - virtute officii
Rankin, Dr. L., Department of Archaeology, Director
Boon, Dr. S., Department of Gender Studies
Davis, Dr. R., Department of Anthropology
Deal, Dr. M., Department of Archaeology
Field, Ms. C., QE II Library
Keeling, Dr. A., Department of Geography
Korneski, Dr. K., Department of History
Tenkorang, Dr. E., Department of Sociology
Tye, Dr. D., Department of Folklore

Purpose And Mandate
The Smallwood Foundation was established with funds transferred in trust from the J.R. Smallwood Heritage Foundation. The Foundation administers the income from such funds for the promotion and support of research focussing on Newfoundland and Labrador. The board supports research proposals in the humanities and social sciences from both inside and outside the university community.

Organization
Effective September 1, 2006, the Executive Committee of ISER also serves as the Board of Directors of the J.R. Smallwood Foundation. In accordance with its mandate, the board awards grants to individual scholars and organizations which have clearly defined objectives and which serve to develop the academic understanding and general appreciation of the province's society, history and culture. Full details of grant categories and application procedures are available on the Foundation's web site at www.mun.ca/smallwood/.

Further information may be obtained by telephone at (709) 864-8156 or in writing to The Director, J.R. Smallwood Foundation for Newfoundland and Labrador Studies, Memorial University of Newfoundland, St. John's, NL, A1C 5S7.

12.15 Labrador Institute
www.mun.ca/labradorinstitute

Director
Cunsolo, A., Ph.D. Guelph

Associate Director
MacDonald, M., Ph.D. Memorial

Labrador Associate
Sparkes, R., Ed.D. University of Maine

Manager of Administration and Finance
Best, D., Masters Certificate Project Management York University

Program Coordinators
Mills, M., M.A. University of Toronto
Pottle-Fewer, K., M.Ed. Memorial

Operations, Facilities and Logistics Coordinator
Oxford, K., Diploma in Practical Nursing Nova Scotia Community College

Faculty
Clement, M., Ph.D. University of Guelph; Cross appointment with Marine Institute
Moore, S., Ph.D. Lakehead University; Cross appointment with Faculty of Education
Neilson, S., Ph.D. Memorial; Cross appointment with Faculty of Humanities and Social Sciences

Research Associates
Abedin, J., Ph.D. University of Aberdeen, UK
Fonkwe, M., Ph.D University of Würzburg, Germany

Purpose And Mandate
The Labrador Institute of Memorial University of Newfoundland was established by the University to stimulate, coordinate, and support major University projects and programs designed to promote the well-being of the people of Labrador and to expand the Labrador knowledge base. Its locations in Happy Valley-Goose Bay and Labrador City afford it a perspective on regional and Indigenous needs and issues that direct the operations of the Institute. The Institute identifies opportunities in research where the capabilities of the University may enhance our knowledge of Labrador and address concerns of the community, and puts forward educational needs for continuing human resource and cultural development.

The Institute is the main contact point for the University in Labrador and maintains communications with Indigenous and community groups and the Faculties and Schools of the University to ensure that there is a timely response to research and educational opportunities.

The Institute facilitates and coordinates the activity of personnel at the University as they undertake cultural, research, and educational activities. It partners with Faculties and Schools to solicit funds for research and the delivery of educational programs, and with other social, cultural and educational institutions in Labrador. A Labrador based archive provides a reference collection of publications and films on Labrador and other northern regions for public use.

The Labrador Institute works with the Office of Research which acts as the agent within the University to receive and disburse Northern Scientific Training Program grants received from the Department of Indian Affairs and Northern Development. The Institute also serves as the University’s representative on the Association of Canadian Universities for Northern Studies and supports the University’s membership in the University of the Arctic.

The Institute is not a regulatory body but it is available to advise on the normal process of grant applications by individuals. The Institute recommends that notice or copies of such applications be filed with the Institute to obviate duplication of effort within the University. It is the Institute's intent to collect and disseminate all pertinent copies of research conducted by or through the University.
Organization
The Director of the Labrador Institute reports to the Vice-President (Academic).
Further information may be obtained by contacting the Institute in writing to the Labrador Institute, P.O. Box 490, Station B, Happy Valley-Goose Bay, NL, A0P 1E0, or by telephone at (709) 896-6210, or by fax at (709) 896-2970.

12.16 Maritime History Archive
www.mun.ca/mha
Chair, Board of Directors
Handcock, Dr. W.G. [Retired]

Board Members
Burton, Dr. V., Department of History
Fischer, Prof. L., Department of History
Hart, A. [Retired]
Staveley, Dr. M., Department of Geography [Retired]
Wareham, H., Archivist

In 1986 the Maritime History Archive was established as a separate unit within the Faculty of Humanities and Social Sciences as a result of reorganization of the Maritime History Group. Its functions include the acquisition, organization, and preservation of materials relating to the history of sea-based activities and societies, with a special emphasis on the North Atlantic Basin.

Since the mid-1970’s the Public Record Office, London, England has transferred 22,000 ft. of original documentation in the series "Agreements on Account of Crew" for the period of 1863-1938, 1951-1976 to the Maritime History Archive. These documents represent an incomparable source for the study of the movements and manning of British Empire vessels throughout the world. Combined with collections relating to fisheries, commerce, and other sea-based activities, the crew agreements have made the Maritime History Archive an internationally known resource centre for the study of maritime history.

The Archive is housed in the Mathematics Building and is open to the public Monday through Friday, 9 a.m. to 1 p.m. and 2 p.m to 4:00 p.m. A research service (for a fee) to undertake small research projects and answer queries pertaining to its subject area is also available.

12.17 The Maritime Studies Research Unit (MSRU)
www.mun.ca/msru
Chair
Burton, V., History

Members
Baehre, R., History, Grenfell Campus
Bradley, D., Maritime History Archive

Pope, P.E., Archaeology and History
Power, N., Sociology
Walsh, V., Maritime History Archive
Wareham, H., Maritime History Archive

The Maritime Studies Research Unit (MSRU) is a research unit within the Faculty of Humanities and Social Sciences, whose purpose is to foster interdisciplinary research on maritime studies, understood as the interpretation of human behaviour in marine and coastal environments, in the past and to the present day. The Unit furthers this objective with workshops, colloquia, publications, and research projects and by providing advice and support to other units within the University. Membership in the MSRU is open to faculty and staff of Memorial University of Newfoundland with research interests in maritime studies. Other scholars with parallel interests, including graduate students in the University's Faculty of Humanities and Social Sciences, are eligible for associate membership. Currently, the MSRU has associate members in Canada, England, Nigeria, Scotland and the United States.

12.18 Memorial Centre for Entrepreneurship (MCE)
www.mce.mun.ca

Director
Villaume, F., M.Eng. École Nationales Supérieure des Arts et Métiers, France, M.Sc. Laval

Programs Catalyst
Goossens, D., B.Sc., MIS Universiteit Hasselt, M.B.A. Memorial

Deans
Naterer, G.F., B.Math., M.A.Sc., Ph.D. Waterloo, FCSME, FASME, FEIC, P.Eng.; Professor; Dean, Faculty of Engineering and Applied Science
Zerbe, W.J., B.A., M.A., Ph.D. British Columbia; Professor; Dean, Faculty of Business Administration

The Memorial Centre for Entrepreneurship (MCE) is a campus-wide Centre of Memorial University of Newfoundland in St. John’s promoting entrepreneurship, supporting students, faculty and staff in the development of their startup idea and contributing to the development of an attractive entrepreneurial ecosystem.

MCE is the starting point for any Memorial University of Newfoundland student, faculty or staff member interested in entrepreneurship. The Centre offers mentorship, networking, training, and funding.

Further information can be obtained on the website at www.mce.mun.ca or by e-mail to mce@mun.ca.
12.19 Memorial University of Newfoundland Botanical Garden

www.mun.ca/botgarden

Director
Shipp, K., B.A.(Hons.) Toronto, M.A. University of Western Ontario

Academic Director
Goodyear, N., B.Sc.(Hons.) McGill, M.Sc., Ph.D. Guelph

Staff
Bishop, M.A., Research Liaison
Boland, J.T., Research Horticulturist
Cooper, J., Gift Shop Manager/Membership Co-ordinator
Gillard, C., Environmental Educator
Halliday, S., Special Projects Co-ordinator
Langmead, C., Grounds Maintenance Foreman
Madden, A.M., Interpretation Co-ordinator
Marshall, R., Visitor Services Assistant
Walsh, T.G., Nursery Manager
White, C.P., Head Gardener
Williams, A., Assistant Gardener

Memorial University of Newfoundland Botanical Garden, Mount Scio Road, comprises ten acres of cultivated gardens and 100 acres of natural habitat that includes the 14-acre Oxen Pond. The main objectives are to undertake and provide opportunities for biological, ecological, and horticultural education and research for the University, the general public, school children and other organized groups while stimulating public interest and enjoyment of the Newfoundland and Labrador flora, fauna and environment.

An interpretative program is designed to provide information on native plants, animals, and horticulture to community groups and the general public, including a curriculum based school program. A field centre houses indoor displays, a library, a lecture room, and the Garden Café. Numerous interpreted nature trails are maintained through a variety of natural habitats. Cultivated areas include the rock garden, peat beds, woodland beds, cottage garden, heritage garden, wildlife garden, shade garden, vegetable garden, Asian Garden, and herbaceous border.

Research activities include rare plant conservation, site restoration, invasive species, medicinal, cosmetic and ornamental plant research and development.

The Memorial University of Newfoundland Botanical Garden is available for university classes and research year-round. It is open to the public daily from May through November. Further information may be obtained through the website at www.mun.ca/botgarden/.

12.20 MUN (UK) Ltd.

www.mun.ca/harlow

Board of Directors
Dr. G. Kachanoski, President and Vice- Chancellor, Chair
Dr. N. Golfman, Provost/ Vice-President (Academic) and Pro Vice- Chancellor
Mr. J. Andrews, Chief Operating Officer, Bournemouth University - Talbot Campus
Ms. M. Egan, Managing Director, Sinclair Barnes Limited
Dr. W. Lawton
Mr. D. Linfield

General Manager
Ms. S. Wright

Finance Manager
Mr. S. Hatchett

Harlow Campus is the international campus of Memorial University of Newfoundland, one of only two universities in Canada with campus facilities in the United Kingdom. MUN (UK) Ltd. directs the operations of Harlow Campus in Essex, United Kingdom. Harlow Campus is run by a general manager who operates the Campus for students in academic (credit) and professional development (non-credit) programs. All programs are developed and overseen through Memorial University of Newfoundland’s Office of the Provost and Vice-President (Academic).

Specific enquires about academic programs offered at the Harlow Campus should be directed to the head of the appropriate academic unit or the Office of the Provost and Vice-President (Academic), Memorial University of Newfoundland, St. John’s, NL, A1C 5S7, by telephone at (709) 864-8246, by fax at (709) 864-2074, or by email at vpa@mun.ca.

General enquires about the Harlow Campus should be directed to Ms. Sandra Wright, General Manager, Harlow Campus, The Maltings, St. John’s Walk, Harlow, Essex CM17 OAJ, UK., by telephone at 011 44 1279 455902, by fax at 011 44 1279 455921, or by e-mail at sandra.wright@mun.ca.

For details on Harlow Campus, visit www.mun.ca/harlow.

12.21 Newfoundland and Labrador Centre for Applied Health Research (NLCAHR)

www.nlcahr.mun.ca

Director
Bornstein, S., B.A. Toronto, M.A., Ph.D. Harvard

Manager, Awards, Finance, IT and Adminstration
White, T., B.A. Memorial

Coordinator, Communications, Partnerships, and Research Exchange Groups
Baker, R., B.A. Memorial

Research Assistants
Mackey, S., B.A. M.P.H. Memorial
Speed, D., B.A. Brock University, M.A., Ph.D. Memorial
The Newfoundland and Labrador Centre for Applied Health Research (NLCAHR) was established in September 1999 as a joint venture of the Department of Health and Community Services, the Health Care Corporation of St. John’s and Memorial University of Newfoundland. Since its inception, the Centre has provided support for applied health research in the Province through its grant and awards programs, its knowledge transfer activities and its capacity development services.

NLCAHR's mission is to contribute to the effectiveness and efficiency of the health and community service system of Newfoundland and Labrador and to the physical, social, psychological health and well-being of the Province's population by supporting the development and the use of applied health research in this province.

The Centre's work revolves around three principal goals:

1. to help build human capacity and organizational resources for undertaking and supporting high-quality applied health research in the Province;
2. to increase the amount and impact of high-quality applied health research undertaken on the priority research themes of Newfoundland and Labrador; and
3. to help increase the effective use of research evidence in the Province's health and community services system.

NLCAHR fosters and supports inter-disciplinary collaboration and serves as a bridge between researchers and decision-makers in government, the provincial healthcare system and community organizations. The Centre funds health research through annual peer-reviewed research grant competitions; supports research training by awarding fellowships at the master's, doctoral, and postdoctoral levels; and runs a number of other programs to encourage and support applied health researchers in Newfoundland and Labrador. The Centre's flagship knowledge exchange program, the Contextualized Health Research Synthesis Program (CHRSP), is a collaborative effort of researchers and health system leaders that seeks to identify urgent issues involving health services and health technologies that are of pressing interest to Newfoundland and Labrador. CHRSP teams work to identify the highest quality research on these issues and to interpret it in light of the unique geographic, economic, demographic and other characteristics of this province.

The research supported by the Centre is broad in scope and includes research in the areas of health services delivery and evaluation, health economics and policy, healthcare utilization and systems, community and population health, health-related social sciences, and applied clinical research focussing on the process of delivering care rather than therapeutics or diagnostics.

Further information may be obtained by contacting the Centre in writing to the Newfoundland and Labrador Centre for Applied Health Research, Suite 300, 95 Bonaventure Avenue, St. John's, NL, A1B 2X5, or telephone at (709) 777-6993, or fax at (709) 777-6734, or e-mail at nlcahr@mun.ca, or through the website at www.nlcahr.mun.ca.

The Newfoundland Quarterly, a journal established in 1901, focuses on the arts, culture, history, industry, and people of Newfoundland and Labrador. The journal is published by Memorial University of Newfoundland, under the auspices of the Office of Public Engagement. The Newfoundland Quarterly can be contacted by telephone at (709) 864-2426, or by email at nfqsub@mun.ca, or through the website at www.mun.ca/nq.

12.23 Ocean Engineering Research Centre (OERC)

www.mun.ca/engineering/research/facilities/centres/oerc/

Director
Molyneux, W.D., B.Sc., M.A.Sc. British Columbia, Ph.D. Memorial, P.Eng., Fellow RINA; Associate Professor, Ocean and Naval Architectural Engineering

Engineering Technologist
Clarke, T.

Scope And Objectives
The Ocean Engineering Research Centre (OERC) is an integral part of the Faculty of Engineering and Applied Science at Memorial University of Newfoundland and has contributed to the success of the Faculty's research and academic programs.

The overall goal of the OERC is to generate research activity that has high potential for impact. The OERC draws upon faculty expertise and its relationships with industry, other research institutes, and branches of government to create networks of people who share common goals. The scope of applied research and consulting activities carried out by members of the OERC is broad, including ocean engineering related to the offshore, marine transportation, and fishing industries. In addition to faculty experience, the OERC operates a
58 metre long towing tank with wave generation capabilities.

Organization
The St. John’s marine research community is vibrant and collaborative. Within the University the Centre maintains ties with C-CORE (by joint appointments of faculty and collaborative projects), with the Ocean Science Centre and the Fisheries and Marine Institute. Similar ties are maintained with the Institute for Ocean Technology (IOT) of the National Research Council (NRC), which is located adjacent to the Faculty of Engineering and Applied Science on the University campus. The Centre collaborates with and serves various small and large private sector firms with ocean engineering interests. The Centre works with Oceanic Consulting Corporation to provide marine performance evaluation services to the world's oceans industries. An alliance between the University, NRC and Marineering Limited of St. John's, Oceanic uses the ocean engineering capabilities and facilities of the University and NRC to support clients and projects around the world.

12.24 Ocean Sciences Centre (OSC)
www.mun.ca/osc
www.mun.ca/osc/jbarb/
www.mun.ca/osc/CDRF/index.php

Director
Fletcher, G.L., B.Sc. British Columbia, Ph.D. California; Professor Emeritus; Head, Department of Ocean Sciences

Facilities and Business Manager, Dr. Joe Brown Aquatic Research Building (JBARB)
Boyce D., B.Sc., M.Sc. Memorial

Manager, Cold-Ocean Deep-Sea Research Facility (CDRF)
Hill S., B.Sc. University of Toronto, M.Sc. University of Guelph

The Ocean Sciences Centre (OSC) is a major facility for marine research on the Atlantic coast, and is one of Canada’s largest marine laboratories. It houses the Department of Ocean Sciences, the Joe Brown Aquatic Research Building and the newly constructed Cold-Ocean and Deep-Sea Research Facility (CDRF). The OSC provides Canadian and international scientists and students access to the flora and fauna of the northwest Atlantic Ocean and is uniquely suited for shore-based studies of cold-ocean processes and subarctic, Arctic and deep-sea organisms. The facility provides all the necessary elements to conduct first-rate marine science, including high quality seawater, equipment to collect and maintain aquatic organisms, boats and vehicles to access field sites, laboratory space with running seawater, cutting-edge analytical and molecular biological instruments, and support staff. A strategic goal of the OSC is to carry out world-class research that focuses on organisms and processes in cold oceans, and to provide high quality educational and training opportunities, particularly at the graduate level.

Located at Logy Bay, 10 km from the St. John's campus, the OSC has an excellent unpolluted sea water supply that is the lifeline of the centre. There are 57 laboratories of varying size, some of which have flowing seawater and others which are dedicated for analytical chemistry, biochemistry, physiology, histology, molecular biology (genetics and genomics) and microscopy. There are eight cold rooms for controlled physiological experiments and common-use rooms for fish sampling, microscopy/ image analysis, high-speed centrifugation, and radiolab analyses. Field Services maintains a variety of Scuba gear for coldwater year-round diving, benthic trawls and drags, seines, plankton nets, Niskin bottles, CTD, underwater video camera and a portable air compressor and generator. The unit operates a 4 m zodiac, 7 m Boston Whaler and 5 ton multi-purpose vehicle with aeration and recirculating seawater holding tanks (2500 L) suitable for transporting live specimens long distances.

The Dr. Joe Brown Aquatic Research Building (JBARB) provides state-of-the-art facilities and world class staff with expertise to support research, training, pre-commercial production, and small-scale commercial trials in marine aquaculture. A critical component of the 1400 square meters facility is a seawater system designed to deliver high quality, temperature controlled, flow through water. Separate tanks and rooms are available for broodstock conditioning, paired mating, hatchery rearing, first feeding/nursery operations, grow-out and physiological investigations on marine finfish. The JBARB carries out research in collaboration with Memorial University of Newfoundland, and government and industry partners. The aquaculture potential of various fish and invertebrate species (Atlantic cod, Atlantic salmon, Arctic char, Steelhead trout, cunners, flounder, oysters, mussels, sea stars, etc.) is being evaluated through the study of broodstock biology, physiology and genomics, and the development of larval rearing techniques.

The Cold-Ocean Deep-Sea Research Facility (CDRF), provides researchers with access to state of the art infrastructure and equipment for the study of freshwater and marine organisms, especially those from the cold waters of the Arctic and North Atlantic oceans. The CDRF uniquely provides a local seawater line for a continuous flow-through water supply to an AQC3 certified biocontainment facility. The facility is newly equipped with histology, microscopy and cell culture equipment. Together, these tools are used to study the biology and mitigation of disease in commercial fisheries species Pressure vessels, the only ones of their kind in Canada, are used for original research on deep-sea life and equipment.

Research Themes
- physiology, biochemistry and molecular biology
- marine biotechnology
- biological and chemical oceanography
- behavioural and population ecology
- aquaculture and fisheries

12.25 Research Grant and Contract Services (RGCS)
www.mun.ca/research

Director
Miller, D., B.Sc.(Hons.), M.Sc., MCIC Memorial

Associate Director (Pre-Award)
Perchard, C., B.Comm Memorial

Associate Director (RPM)
Belanger, D.

Manager, Administration and Finance
Samson, J., B. Voc. Ed. Memorial
Manager Grants
Barnes, D.

Research Grant and Contract Services (RGCS) perform pre- and post-award administration in a “one-stop shop” approach. The pre-award component focuses on the review and approval of research grants and contracts, while the post-award component provides project management and administrative support for large scale research programs.

The operational and financial administration of the Research Project Management (RPM) Division as well as liaison with the Interdisciplinary Committee on Ethics in Human Research (ICEHR Office) is also a part of the RGCS mandate.

RGCS is the primary point of contact for all research funding applications except the Canada Research Chairs (CRC) and Canada Foundation for Innovation (CFI) programs. CREAT, CRC and CFI Services is responsible for the above mentioned programs.

Individuals seeking more information about Research Grant and Contract Services, should contact the Director by emailing rgcs@mun.ca, by telephone at (709) 864-4791, by fax (709) 864-4612 or in-person at the Bruneau Centre for Research and Innovation, room IIC2015, or through the website at www.mun.ca/research.

12.26 The Works/Memorial University Recreation Complex Incorporated (MURC)

www.theworksonline.ca

Board of Directors
Thistle, B., Chairperson
Donovan, M., Vice Chair

Other members of the volunteer Board include representatives from the student body, the University, and the community at large.

Director/General Manager
Neil, C., Director/General Manager

Staff
Beson, M., Manager of Finance
Coffey, K., Manager of Maintenance
Crane, J., Manager of Aquatics/Recreation
Ivey, J., Manager of Fitness and Student Services

The Works
The Works is a separately incorporated entity with a volunteer Board of Directors. The Works operates the Field House, Aquarena and other recreation facilities on the St. John’s campus. The facilities offer a variety of fitness, aquatics and recreation programs for all ages.

The Works offers services for members of the University, including students, faculty, and staff and also the community at large.

Further information may be obtained by contacting The Works by telephone at the Field House (709) 864-4422, or the Aquarena at (709) 864-3798, or through the website at www.theworksonline.ca.
1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

3 Fees and Charges

The fees and charges indicated herein are as of the date of publishing. The University reserves the right to make changes to the regulations, fees and charges listed below. Any questions concerning fees and charges for the Cashier's Office in St. John's should be directed in writing to the Cashier's Office, Memorial University of Newfoundland, Arts and Administration Building, A1023, St. John's, NL, A1C 5S7, or by e-mail at cashiers@mun.ca, or by telephone at (709) 637-6286, or through the website at www.mun.ca/finance. Any questions concerning fees and charges for the Bursar's Office in Corner Brook should be directed in writing to the Bursar's Office, Grenfell Campus, University Drive, Corner Brook, NL, A2H 6P8, or by telephone at (709) 637-6286, or through the website at www.grenfell.mun.ca/bursar.

3.1 Information Governing Payment of Fees and Charges

3.1.1 General Regulations

1. Tuition fees, residence fees, student union fees and health/dental insurance are due once a student registers regardless of the method of registration, and must be paid by the fee deadline to avoid a late payment penalty.

2. Students who are using a scholarship, bursary, Canada Student Loan, or other award for the payment of fees may be permitted to have their tuition fees outstanding until they have received the award or Canada Student Loan.

3.1.2 Methods of Payment

1. Telephone and on-line banking: information on the use of telephone or on-line banking systems can be obtained from local branches of banks.

2. Cash/Debit card: must be paid in person at the Cashier's Office in St. John's or the Bursar's Office in Corner Brook.

3. Cheque: may be mailed, or delivered in person, to the Cashier's Office in St. John's or Bursar's Office in Corner Brook, or placed in the night deposit slot at the Cashier's Office in St. John's. A dishonoured charge will be made for each cheque tendered to the University and not honoured by the bank. A student with a dishonoured cheque record must pay fees by cash, certified cheque or money order.
   - Dishonoured cheque charge: $25

4. Credit card: MasterCard is the only accepted card. Payment using this method must be done via the web at www.mun.ca.

5. Payroll deductions: graduate students receiving funding through the University payroll system may elect to pay their tuition and other charges by payroll deduction. The policy and form for payroll deductions are available at the School of Graduate Studies, the Cashier's Office, and at www.mun.ca.

6. Student Aid: students paying fees from a Canada Student Loan will have the amount owing signed out automatically from their loans.

7. Tuition voucher: students receiving a tuition voucher must present the tuition voucher and pay the balance of their fees to the Cashier's Office by the published deadlines to avoid being assessed a late payment fee.

3.1.3 Penalties for Noncompliance with Payment of Fees and Charges

1. Students who, without approval, pay their fees later than the deadlines specified in the University Diary will be assessed a late payment fee.
   - Late payment fee (assessed by the Director of Financial and Administrative Services): Maximum of $75

2. Students who have not paid all fees or arranged for fee payment with the Director of Financial and Administrative Services prior to the first day of lectures, as stated in the University Diary, may have their registration cancelled at the discretion of the University. Such students will then be required to reregister after all fees are paid and after the first day of lectures, as stated in the University Diary, but no later than the end of the regular registration period.

3. Outstanding accounts, including accounts outstanding pending the receipt of a scholarship, bursary, or similar award, must be paid in full by cash, money order, or certified cheque. Students with outstanding accounts will:
   - be ineligible to register for courses for a subsequent semester;
   - not be permitted into residence;
   - not be issued an academic transcript;
   - not be awarded a degree, diploma or certificate.

4. Accounts outstanding on the last day of examinations in a semester/session will be charged interest at the prime interest rate less 1.8% per annum. Such interest will apply effective the first day of lectures in that semester.
3.2 Application and Admission Fees

Unless otherwise noted, these application and admission fees are non-refundable.

3.2.1 Undergraduate Students

1. General Application Processing Fee: this fee is payable with each application for admission or readmission to the University.
   - Undergraduate students who have never attended a post-secondary institution or who have previously attended Memorial, excluding medical students: $60
   - Undergraduate students who have attended a post-secondary institution outside of Newfoundland or who are non-Canadian applicants, excluding medical students: $120
   - Medical students: $75

2. Fees in addition to General Application Processing Fee
   - Challenge for credit is charged at one half of the fee associated with the credit hour value of each course

3. Admission Fees in addition to General Application Processing Fee
   - Bachelor of Technology: $300
   - Bachelor of Maritime Studies: $300

4. Application Fee in addition to General Application Processing Fee
   - School of Pharmacy
     Canadian applicants: $125
     International applicants: $175

5. Penalties for Noncompliance with Payment of Application and Admission Fees
   - Late fees: all late fees are payable when assessed.
   - Late application fee
     Up to one week after deadline: $30
     Each subsequent week to final date for receipt of applications: $10

3.2.2 Graduate Students

1. Application Processing Fee: payable with each application for admission to the University.
   - Application Processing Fee for Canadian Applicants: $60
   - Application Processing Fee for non-Canadian Applicants: $120

3.3 Tuition and Related Fees

3.3.1 Undergraduate Students (other than Medical Students)

1. Unless otherwise specified, tuition fees are charged according to the credit hour value associated with the registered course(s). Courses are 3 credit hours unless otherwise indicated.

2. For the purposes of calculating tuition:
   - the credit hour value of each of the A and B components of a linked course shall be equivalent to one half of the credit hour value of the B component (see Glossary of Terms Used in the Calendar);
   - the credit hour value of F courses and non-degree courses (i.e. certificate programs) shall be three; and
   - the credit hour value of courses with "W" in the final position of the course number, excluding co-operative education work terms, shall be three. Consult the course description to confirm credit value for a course.

3. Fees for citizens of Canada and permanent residents
   - Fee per credit hour: $85
   - Co-operative education work terms: $323
   - Maritime Studies/Technology Management 410A/B: $1,154
   - Computer Science 3700 (per semester): $154

4. Fees for international students
   - Fee per credit hour: $293.34
   - Co-operative education work terms: $1,020
   - Maritime Studies/Technology Management 410A/B: $1,779
   - Computer Science 3700 (per semester): $533.32

5. Tuition refunds based on withdrawal from course(s)
   - Students dropping courses within two weeks following the first day of lectures in any semester will not be liable for tuition fees for those courses. Students dropping courses after that time will receive tuition fee refunds on a prorated basis. Any student who drops a course from two weeks to three weeks following the first day of lectures in any semester shall have 50% of the tuition refunded. Any student who drops a course from three weeks to four weeks following the first day of lectures in any semester shall have 25% of the tuition refunded. No tuition will be refunded for courses dropped after four weeks following the first day of lectures in any semester. For the actual dates relating to these refunds, see the University Diary.
   - In the case of sessions, accelerated courses and courses offered outside of the normal time frame of a semester or session, the tuition refund drop periods will be prorated accordingly.
3.3.2 Undergraduate Students (Medical Students)

1. Fees for citizens of Canada and permanent residents
   - Annual tuition fee (September 1 - $4,125, January 1 - $4,125): $8,250
2. Fees for international students
   - Annual tuition fee: $30,000

3.3.3 Graduate Students

1. Fees are payable at the time of registration. All graduate students must be registered in each semester of the three-semester academic year throughout the period of their program until all academic requirements for the degree have been met and they have been deemed eligible to graduate by the School of Graduate Studies. Final dates in each semester for notification of completion of academic requirements, in order to be deregistered from Graduate Registration 9000/Medicine 9900 without incurring liability for continuance fees, are included in the University Diary.

There is a minimum fee for all graduate degrees. The amount of this fee for both Canadian and international students will depend on the semester fees in effect during his or her period of registration. Semester fees are subject to review at least annually. They are:

</tbody>
</table>

1. M.D.-Ph.D. program:
   - M.D. component - standard M.D. fees for four years
   - Ph.D. component - standard Ph.D. fees plus continuance fees, if required, during the active Ph.D. component

2. At the time of first registration, each master's candidate must select a payment plan. The fee payable in the first and subsequent semesters will depend upon the payment plan selected. Once selected, the payment plan will remain in effect for the duration of the student's period of registration, and cannot be changed. Payment Plan C is available for selected programs only.

3. A student who completes his or her program in a period of time shorter than that covered by the selected payment plan will, in his or her final semester be required to pay the difference between the product of the semester fee in effect in that final semester and the number of times which a fee should have been paid in accordance with the payment plan selected, and the actual amount paid.

4. A student whose program extends beyond the period covered by the selected payment plan will be assessed the appropriate program continuance fee for each additional semester of registration. Continuance fees will be charged until the program is complete.

5. The program continuance fees per semester for citizens of Canada and permanent residents entering prior to September 2004 are:
   - Masters candidate: $334
   - Graduate Diploma candidate: $162
   - Doctoral candidate: $570

6. The program continuance fees per semester for citizens of Canada and permanent residents, and international students entering September 2004 or later are:
   - Masters candidate: 8.15% of the total program fee for Plan A
   - Graduate Diploma candidate: 8.15% of the total program fee
   - Doctoral candidate: 8.15% of the total program fee

7. Any doctoral student engaged in a double degree program through a cotutelle agreement will be required to register at both Memorial University of Newfoundland and the cooperating institution for the duration of his/her program. Tuition fees are payable at only the ‘home institution’ i.e. the institution to which the doctoral student was initially admitted, as specified in the cotutelle agreement.

8. The semester fees listed above cover only the courses (if any) prescribed for the program by the academic unit and approved by the Dean of Graduate Studies. A student taking courses which are not part of the approved program must pay for them separately in accordance with the fee schedule for undergraduate courses.

9. A graduate student who is permitted by the Dean of Graduate Studies to transfer from a diploma program to an affiliated master's program or from a master's program to a doctoral program before the former is completed will be required to pay the difference between the fees for the two programs, based on the semester fee in effect during each semester of the new program. This additional payment shall be made over the duration of the remaining semesters for which program fees are owed, or over three semesters, whichever is greater.

10. A graduate student who wishes to withdraw from his or her graduate program must inform the Dean of Graduate Studies, in writing, within three weeks after the first day of lectures in the semester. Failure to do so will result in the student being held responsible for the fees due to the end of that semester. Administrative fee for approved retroactive requests for leave of absence or withdrawal from program: $25

11. Special Fees: In addition to the semester fees, the following programs charge a special fee:
   - Doctor of Philosophy in Management
     $12,000: $1,000 to be paid in each of twelve consecutive semesters
- Master of Applied Science in Computer Engineering (Plan A)
  Canadian: $15,302 (non-refundable) - to be paid $9,981 in semester 1 and $5,321 in semester 2
  International: $20,282 (non-refundable) - to be paid $12,969 in semester 1 and $7,313 in semester 2
- Master of Applied Science in Environmental Systems Engineering and Management (Plan A)
  Canadian: $11,602 (non-refundable) - to be paid $7,761 in semester 1 and $3,841 in semester 2
  International: $16,282 (non-refundable) - to be paid $10,569 in semester 1 and $5,713 in semester 2
- Master of Applied Science in Oil and Gas Engineering (Plan A)
  Canadian: $11,602 (non-refundable) - to be paid $7,761 in semester 1 and $3,841 in semester 2
  International: $16,282 (non-refundable) - to be paid $10,569 in semester 1 and $5,713 in semester 2
- Master of Education (Information Technology)
  $2,550: $1,275 charged in semester 1 and $1,275 charged in semester 4
- Master of Engineering Management (Plan A)
  Canadian: $11,602 (non-refundable) - to be paid $7,761 in semester 1 and $3,841 in semester 2
  International: $16,282 (non-refundable) - to be paid $10,569 in semester 1 and $5,713 in semester 2
- Master of Public Health
  $1,460: charged $730 in semester 1 and $730 charged in semester 2
- Master of Science in Management
  Canadian: $5,250 - to be paid $2,625 in semester 1 and $2,625 in semester 2
  International: $10,250 - to be paid $5,125 in semester 1 and $5,125 in semester 2

3.3.4 Post-Graduate Residents and Interns
- Registration fee per annum: $500

3.3.5 Centre for Innovation in Teaching and Learning (CITL)
1. For distance education courses, there are administrative fees which are charged in addition to the tuition fees for these courses. These fees cover the cost of course materials (excluding textbooks), rental of video and audio tapes and management of web courses.
   - Administrative fees (per credit hour for Newfoundland and Labrador addresses): $17
   - Administrative fees (per credit hour for out of province addresses): $34
   - Change of examination location fee: $50
   - Deferred examination fee: $65

3.4 Residence (Housing) and Meals Fees and Charges

3.4.1 St. John's Campus
For additional information on residences see the section of the Calendar dealing with Student Housing.
1. General Residence Fees: this fee will not be refunded and will not be credited to the student's account.
   - Residence application fee: $20 per semester
2. Residence deposit: $500
3. Residence fees during semesters: the fees and charges below are per semester, per person, unless otherwise noted. For further information, contact Student Housing and Food Services.
   - Paton College
     Double: $1,947
     Single: $2,202
   - Meal Plans
     Fall
     14 Meal Plan: $2,415 per semester
     19 Meal Plan: $2,515 per semester
     Freedom Meal Plan: $2,515 per semester
     Winter
     14 Meal Plan: $2,505 per semester
     19 Meal Plan: $2,610 per semester
     Freedom Meal Plan: $2,610 per semester
   - Burton's Pond Apartments
     Single: $2,408
     Family Unit (per semester, per apartment): $4,188
   - Macpherson
     Single: $2,591
   - Battery Facility
     Graduate Students: $700 - $725 per month
4. Residence fees between semesters: students who request to stay in residence between semesters may be accommodated providing space is available and notice is given in writing to Student Housing and Food Services. Students are required to pay the full charge on receipt of notification of acceptance.
   Room rates (per night, per person)
University Regulations 2017-2018

5. Penalties for noncompliance with payment of fees and charges
   - Students with outstanding fees will not be permitted into residence without approval from the Director of Financial and Administrative Services.
   - Students not returning to residence must cancel a room assignment by the established deadline date. Failure to do so will result in a cancellation charge.
     Cancellation charge: $500

3.4.2 Grenfell Campus
The fees and charges below are per semester, per person, unless otherwise noted.
1. General residence fees: this fee will not be refunded and will not be credited to the student's account.
   - Residence application fee: $20
2. Residence deposit: charged to all students who are applying to live in residence. The deposit is creditable and may be refunded when all conditions pertaining to it are met.
   - Residence deposit: $500
   - Cancellation fee for all students who fail to cancel residence/chalet rooms by the deadline for Fall and Winter semester: $500.00
3. Residence fees based on per semester basis
   - Arts and Science Residence Hall (standard): $1,711
   - Arts and Science Residence Hall (bachelor): $1,851
   - Residence Complex (standard): $1,821
   - Chalet Apartment (standard): $1,953
   - Chalet Apartment (family): $3,007
4. Residence fees between semesters: students who need to stay in residence between semesters may be accommodated providing space is available and reasonable notice is given in writing to Student Housing. Students are required to pay the full charge on receipt of notification of acceptance.
   Room rates (per night, per person)
   - Arts and Science Residence: $16.45
   - New Residence Complex: $17.51
   - Chalet: $18.78

3.5 Student Organization Fees
Student organization fees are collected by the University as a service to the student body. They are payable prior to, or at the time of, registration.

3.5.1 St. John's Campus
All fees are per semester and are compulsory unless otherwise noted.
1. Undergraduate students (full-time)
   - General fees
     Student Union fee: $46.16
     Canadian Federation of Students' fee (not collected Spring semester): $4.49
     Canadian Federation of Students - Newfoundland and Labrador fee (not collected Spring semester): $4.49
     Media Fee: $4
     Health/Dental Plans
     Students who have alternative health and dental coverage may opt out of the plan(s) by completing a Waiver of Participation form at www.munsu.ca. The deadline to opt out of the health and dental plans for any given academic year is two weeks after the first day of lectures in September. Only students who were not full time, not enrolled, or a work-term student in the Fall semester, may opt out in the Winter semester. The deadline will be two weeks after the first day of classes.
     Student Health Plan: $81
     Dental Plan: $65
2. Undergraduate students (part-time)
   - Student Union fee: $19.00
   - Canadian Federation of Students - Provincial (not collected Spring semester): $4.49
   - Canadian Federation of Students - Federal (not collected Spring semester): $4.49
   - Media fee: $4
3. Graduate students
   - Union fee: $30.85
   - Canadian Federation of Students - Provincial (not collected Spring semester): $4.49
   - Canadian Federation of Students - Federal (not collected Spring semester): $4.49
   - Health/Dental Plans
     Students who have alternative health and dental coverage may opt out of the plan(s). The deadline to opt out of the health and dental plans is three weeks after the start of class.
     Drug and Health Insurance Plan fee (per annum): $410.96
     Dental Insurance Plan fee (per annum): $260.90
4. Post-graduate residents and interns
• Union fee (per annum): $5

5. Nursing students (fee collected in the Fall semester)
   • Canadian Nursing Students' Association fee (full-time students, per annum): $10
   • Canadian Nursing Students' Association fee (part-time students, per annum): $5

3.5.2 Grenfell Campus
1. Undergraduate Students (full-time)
   • Health/Dental Plans
     Students who have alternative health and dental coverage may opt out of the plan(s) by completing a Student Health Opt Out at Quick Links on the Grenfell Campus home page at www.swgc.mun.ca. The deadline to opt out of the health and dental plans is two weeks after the first day of lectures in September or January.
     Student Health Plan: $87.66
     Dental Plan: $55.50
   • Student Union fee: $65
   • SUB. Fund: $5
   • Canadian Federation of Students - Newfoundland and Labrador fee (not collected Spring semester): $4.49
   • Canadian Federation of Students' fee (not collected Spring semester): $4.49

2. Undergraduates (part-time)
   • Student Union fee: $27.50
   • SUB. Fund: $5
   • Canadian Federation of Students - Newfoundland and Labrador fee (not collected Spring semester): $4.49
   • Canadian Federation of Students' fee (not collected Spring semester): $4.49

3. Graduate students
   • Union fee: $30.85
   • Canadian Federation of Students - Provincial (not collected Spring semester): $4.49
   • Canadian Federation of Students - Federal (not collected Spring semester): $4.49

3.5.3 International Student Health Insurance (varies from year to year)
1. All students (undergraduate and graduate) studying on a student visa at Memorial University of Newfoundland will be required, as a condition of registration, to purchase health insurance. Such students should check with the International Student Advisor for the current rate.

3.6 Fees and Charges Pertaining to Appeals

3.6.1 Challenge for Credit Fee
   • Fee: one half of the fee associated with the credit hour value of the course

3.6.2 Supplementary Examination Fee
   • Fee: $50

3.6.3 Reread of Final Examination Fee
   • Fee: $50

3.7 Miscellaneous Fees and Charges

3.7.1 Campus Renewal Fee

3.7.1.1 Undergraduate Students
Unless otherwise specified, Campus renewal fees are charged according to the credit hour value associated with the registered course(s). Courses are 3 credit hours unless otherwise indicated.
   • Fee per credit hour: $16.67 to a maximum of $250 per semester, including courses in diploma and certificate programs
   • Co-operative education work terms: $250 per semester

3.7.1.2 Graduate Students
   • Fee per semester: $167

3.7.2 Student Services Fee
   • Per semester: $50

3.7.3 Recreation Fee (The Works)
Students must pay a recreation fee which will be adjusted according to the Consumer Price Index (CPI) on September 1 of each year.
   • Fee (St. John's Campus and Fisheries and Marine Institute)
   • Per semester: $59.76
   • Per session: $29.38
3.7.4 Student Parking Fees
Students may purchase permits on a semester or per annum basis.
- Per semester: $13.80
- Per annum: $41.40

3.7.5 Transcript Fee
- Per transcript: $10

3.7.6 Books and Supplies
- Students should be prepared to meet an expenditure to cover the cost of textbooks and supplies each semester. Students should consult their professors before purchasing any new or used textbooks or laboratory manuals.

3.7.7 Damages or Destruction to University Property
- Unwarranted damages or destruction to University property will be charged to the responsible party or parties, and are payable when assessed.

3.8 Appeal of Fees and Charges Regulations
Appeal of Fees and Charges Regulations apply to Undergraduate Students (other than Medical Students), 5. only. It is intended to recognize and be sensitive to students who experience devastating, unforeseen and/or catastrophic events during the semester and therefore withdraw from a course or courses. Students are permitted to appeal for refund of tuition associated with dropped course(s) only, not for refund of incidental fees including, but not limited, to medical/dental coverage, MUNSU fees, recreation fees, etc.

3.8.1 Responsibilities in the Tuition Refund Appeals Process
The University has established financial regulations, procedures and deadlines through its governing bodies for the guidance of students. Students are expected to take into account their personal and academic circumstances, in order to meet university financial regulations, procedures, and to satisfy financial requirements and deadlines.

3.8.1.1 Students' Responsibilities in the Tuition Refund Appeals Process
It is incumbent upon students to:
- be aware of and adhere to all financial regulations, requirements and published deadlines, especially the refund schedule published in the University Diary;
- familiarize themselves with published tuition refund appeals procedures;
- submit tuition refund appeals and all supporting documentation no later than one month after the official release of grades for the semester of the dropped course(s); and
- provide appropriate authenticating materials.

3.8.1.2 The University's Responsibilities in the Tuition Refund Appeals Process
It is incumbent upon the University to:
- make available to students advice and guidance regarding options, deadlines, required documentation, and tuition refund appeal route by way of written notification, the University website, personal appointment or other forms of communication;
- direct students to the appropriate office for information on tuition refund appeals;
- attend to tuition refund appeals efficiently and ensure parties receive fair, consistent and ethical treatment;
- supply students with reasons for decisions to deny a tuition refund appeal; and
- maintain parties' right to confidentiality.

3.8.2 Guidelines for the Tuition Refund Appeals Process
1. Transparency should guide all steps of the tuition refund appeal process. In the case of an appeal, the parties should have access to all documents submitted.
2. The principles of fairness should be applied in appeal procedures and decisions.
3. Information submitted in support of an appeal will be kept confidential.

3.8.3 General Information and Procedures for Tuition Refund Appeals
1. A tuition refund appeal must be filed no later than one month after the official release of grades for the semester of the dropped course(s).
2. Any tuition refund appeal should be made in writing, by the student, clearly stating the basis for the appeal and should be directed to the Committee Coordinator, Tuition Refund Appeals Committee, c/o The Cashier's Office, Memorial University of Newfoundland, St. John's, NL A1C 5S7.
3. Successfully dropping a course academically does not guarantee that a tuition refund appeal will be successful. Academic difficulty in a course and/or missing a published refund deadline is not sufficient grounds for an appeal.
4. For assistance in the tuition refund appeals process, students are advised to consult with the Committee Coordinator.
5. In preparing an appeal a student may consult advisors or facilitators. Such advisors or facilitators may include a faculty advisor, staff advisor, a counselor, a representative from the Memorial University of Newfoundland Students' Union (MUNSU) or other individual who is willing to undertake the role of student advisor or facilitator.
6. The Tuition Refund Appeals Committee may decide to deny or uphold an appeal. If it upholds an appeal, the Committee may prorate the tuition refund depending upon the student's length of participation in the course(s) and other factors.
7. The decision of the Tuition Refund Appeals Committee is final.
3.8.4 Information Required for Medical Certificates
Please refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Information Required for Medical Certificates from Health Professionals.

4 Admission/Readmission to the University (Undergraduate)

4.1 Admission/Readmission Information
This section applies to all undergraduate applicants except those applying to the Faculty of Medicine.

Applicants seeking admission to the Faculty of Medicine should refer to the Faculty of Medicine regulations for information.

The application for admission or readmission to the University is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twkbwbis.P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

Applicants seeking admission to a particular faculty or school may be required to submit additional supplementary documents beyond those required for general applications for admission to the University. Applicants should refer to appropriate faculty or school regulations for procedures, deadlines, admission requirements and further information.

1. Applications for admission/readmission should be submitted by the deadline dates listed in the University Diary. Applications received later than the stated deadline dates will be processed as time and resources permit.

2. Each application must be accompanied by the appropriate application processing fee. An additional application processing fee is required from non-Canadian applicants or applicants transferring from post-secondary institutions outside of Newfoundland and Labrador. Neither fee is refundable nor will it be credited to the applicant's financial account under any circumstances. Information regarding fees and charges can be found at the Fees and Charges.

3. Applicants who have previously attended Memorial University of Newfoundland and have not registered for courses for the past three consecutive semesters (Fall, Winter, Spring) are required to submit a new Application for Admission/Readmission together with the appropriate application processing fee.

4. The admission criteria required of each category of applicant is specified under Categories of Applicants, Admission Criteria and Required Documentation.

5. Admission to some courses, programs and/or the University may be limited by the University when it deems the facilities and resources available to it are not adequate to provide for additional students. Consequently possession of the minimum requirements does not guarantee that an applicant will be granted admission to a course, a program and/or the University.

6. Applicants who meet the University's general admission requirements may not necessarily meet the pre-requisites for registration in all first-year courses. Course registration may require the achievement of a minimum grade or score in a specific high school subject or in a specific placement or other standardized examination. For information on first-year English course placement for students who have been required to prove English proficiency for general admission purposes, see the regulations outlined under English Language Proficiency Requirements below. For information on course placement and pre-requisites for first-year mathematics and other subjects, consult the respective faculty and school sections of this Calendar.

7. The University may set its own matriculation examinations either in separate subjects or in all those required for matriculation, and may refuse admission to any applicant failing to attain a satisfactory standard in these examinations.

8. The University reserves the right to refuse admission to any applicant.

9. Applicants may be required to provide medical evidence of their fitness to pursue university studies.

4.2 English Language Proficiency Requirements
As English is the primary language of instruction at this University, all applicants seeking admission to Memorial University of Newfoundland must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to provide proof of proficiency in the English language based on one of the following forms.

4.2.1 English Language Secondary Institution
Applicants are required to have successfully completed the equivalent of three years of full-time instruction in an English language secondary institution as recognized by Memorial University of Newfoundland including successful completion of appropriate course(s) in English at the Grade 12 or equivalent level. English as a Second Language (ESL) courses are not acceptable for meeting this requirement. The University may, as deemed appropriate by the University Committee on Admissions, further proof of English proficiency through one of the standardized tests below.

4.2.2 English Language Post-Secondary Institution
Applicants who have attended a recognized post-secondary institution where English is the language of instruction must have successfully completed the equivalent of 30 credit hours. These 30 credit hours must include 6 transferable credit hours in English courses. For information on transfer credit refer to Transfer Credit.

4.2.3 Memorial University of Newfoundland's Intensive English Program
Applicants are required to successfully complete Memorial University of Newfoundland's Intensive English Program (IEP) assessment with an acceptable score, as noted below under Standardized Tests, on the CAEL administered by the University. Information regarding Memorial University of Newfoundland's IEP can be found in the Faculty of Humanities and Social Sciences or the Grenfell Campus sections of the Calendar.

4.2.4 Standardized Tests
Applicants proving English Proficiency through one of the following forms may be required to write a placement test prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to English Language Placement Test, Faculty of Science Mathematics Course Descriptions, and Grenfell Campus Mathematics Course Descriptions. The official results of the following standardized tests must be forwarded to Memorial University of Newfoundland directly from an authorized test reporting centre.
4.2.4.1 Test of English as a Foreign Language (TOEFL)
A minimum score of 79 with at least 20 in each of Reading and Writing, and no less than 17 in Listening and Speaking is required on the internet-based TOEFL. Information regarding the TOEFL program is available from the Educational Testing Service (ETS). TOEFL/TSE Services, online at www.ets.org/toefl/, from U.S. embassies or consulates, or from offices of the U.S. Information Services.

4.2.4.2 International English Language Testing System (IELTS)
A minimum overall band score of 6.5, with at least band 6 in each of Writing and Reading. Information regarding the IELTS may be obtained from the IELTS Subject Officer, University of Cambridge Local, Examinations Syndicate via www.ielts.org.

4.2.4.3 Canadian Academic English Language (CAEL) Assessment
Minimum band scores between 50 and 60 in each of the four skills tested (Reading, Writing, Listening, Speaking), with at least two band scores of 60 are required on the CAEL Assessment. Information regarding the CAEL Assessment may be obtained from the CAEL Assessment Office at www.caeltest.ca.

4.2.4.4 Cambridge English for Speakers of Other Languages (ESOL)
A minimum grade of “B” or, for those who have completed this test since January 2015, an Overall Cambridge English Scale score of 176 in the Certificate of Advanced English (CAE) or a minimum grade of “C” in the Certificate of Proficiency in English (CPE) are required. Information regarding these examinations may be obtained from University of Cambridge ESOL Examinations via www.cambridgeesol.org.

4.2.4.5 Canadian Test of English for Scholars and Trainees (CanTEST)
Minimum band scores of 4.5 in the listening comprehension and reading comprehension sub-tests and a score of 4 in writing are required on the CanTEST. Information regarding this examination may be obtained from the Language Testing Service of the University of Ottawa online at www.canatest.ottawa.ca/index.php.

4.2.4.6 Michigan English Language Assessment Battery (MELAB)
A minimum score of 85 is required on the MELAB. Information on the MELAB testing program may be obtained from the University of Michigan and Cambridge Collaboration Organization (CaMLA) online at www.cambridgemichigan.org/melab.

4.2.4.7 Pearson Test of English Academic (PTE Academic)
A minimum score of 58 in each of the reading, writing, listening, and speaking components of the PTE Academic is required. Information about the PTE Academic is available online at www.pearsonpte.com.

4.2.5 English Language Placement Test
1. With the exception of applicants who demonstrate English language proficiency under English Language Proficiency Requirements, English Language Secondary Institution and English Language Proficiency Requirements, English Language Post-Secondary Institution, all applicants will be required to write a placement test in English language. This test must be taken prior to the commencement of classes to determine the appropriate English course for which an applicant should register.
2. Students who are registered for courses at the St. John’s Campus or by Distance/Online Learning whose first language is not English and whose performance in the placement test in English language indicates that appropriate placement is in a first-year English credit course will normally be placed in English 1020.
3. Students who are registered for courses at the St. John’s Campus or by Distance/Online Learning and whose performance in the placement test in English language indicates that appropriate placement is in English 102F or, for those who have completed this test since January 2015, an Overall Cambridge English Scale score of 176 in the Certificate of Advanced English (CAE) or a minimum grade of “C” in the Certificate of Proficiency in English (CPE) are required. Information regarding these examinations may be obtained from University of Cambridge ESOL Examinations via www.cambridgeesol.org.
4. Students who are registered for courses at the Grenfell Campus should consult with the Office of the Registrar at Grenfell Campus.

4.2.6 Other
Other forms of proof of English language proficiency, acceptable to the University Committee on Admissions, may be considered.

4.3 Categories of Applicants, Admission Criteria and Other Information
The categories of applicants applying for admission/readmission as well as the admission criteria and other related information are listed below. Before a final admissions decision can be reached all required documents must be received. All documents must be official and be forwarded directly to the Admissions Office, Office of the Registrar from the appropriate institution(s) or source(s). Photocopied documents are not acceptable unless duly certified.

4.3.1 Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador

4.3.1.1 Admission Criteria
The courses below are courses designed for students who intend to seek post-secondary education at the University or other institutions whose programs demand levels of proficiency equivalent to those required by the University. Applicants shall have completed Graduation Requirements for High school as set down by the Department of Education and obtained credits in the following subjects with an overall average of not less than 70% compiled from the grades received in those courses at the 3000 level.

- **English:** English 3201 (2 credits); or the former combination of Language 3101 (1 credit) and one of Thematic Literature 3201(2 credits) or Literary Heritage 3202 (2 credits).
- **Academic or Advanced Mathematics:** One of Mathematics 2200, 2201, 2204, or 2205 and one of Mathematics 3200, 3201, 3204, or 3205 (valued at 2 credits each).
- **Laboratory Science:** Four credits in Laboratory Science (i.e. Biology, Chemistry, Earth Systems, Physics), including at least two credits at the 3000 level chosen from one of Biology 3201, Chemistry 3202, Earth Systems 3209, or Physics 3204 (valued at two credits each). The remaining two credits may be selected from 2000-level courses in the above-noted subject areas or from Science 1206.
- **Social Science/Modern or Classical Language:** Two credits at the 3000 level in a Social Science area or in a Modern or Classical Language post-secondary institution.
4.3.2 Applicants Who Have Followed the High School Curricula of Other Provinces of Canada

4.3.2.1 Admission Criteria

- Applicants from other provinces of Canada are required to have successfully completed Grade XII in the University Preparatory Program (in the case of Quebec students, Secondary V Certificate) with a passing mark in each of the following Grade XII academic or advanced-level subjects and an overall average of not less than 70% compiled from the grades received in the courses selected:
  - English
  - Mathematics
  - Laboratory Science (1 of Biology, Chemistry, Earth Science, Geology or Physics)
  - Social Science/Modern Classical Language
  - Elective

- For further information concerning specific provinces, applicants may contact the University by writing to the Admissions Office, Office of the Registrar, Memorial University of Newfoundland, St. John's, NL, A1C 5S7, or by e-mail at admissions@mun.ca or through the website at www.mun.ca.

4.3.2.2 Other Information

- Early Acceptance: Applicants in their final year of high school who meet the course requirements specified in Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador, may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are released by the appropriate authorities, that the applicant has successfully met the requirements for admission as specified above in Admission Criteria. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.

- Advanced Placement: Applicants completing Advanced Placement courses through the Advanced Placement Program offered by the College board should refer to Transfer Credit Advanced Placement (AP).

- English Language Proficiency Requirements will apply to all applicants.

4.3.3 Applicants Who Have Followed the College of the North Atlantic Comprehensive Arts and Science Transition Program

4.3.3.1 Admission Criteria

Students who do not meet the requirements for admission to Memorial University of Newfoundland under one of the two categories above but who do hold a high school diploma may be eligible for admission under this category. Students applying under this category must successfully complete all qualification requirements for the award of the Comprehensive Arts and Science (CAS) Transition Year Certificate from the College of the North Atlantic. A full outline of this program is available in the College of the North Atlantic Calendar which is available online at www.cna.nl.ca.

This does not preclude the application of selective admission criteria for particular faculty/school programs. Students may wish to consider the course requirements for their intended program of study at Memorial University of Newfoundland when selecting CAS Transition Year courses for completion of the Transition Year Certificate program.

4.3.3.2 Early Acceptance

Applicants who have completed, or who are completing, a slate of courses which meets the Admission Criteria as described above for applicants completing the College of the North Atlantic CAS Transition Year program may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the College of the North Atlantic, that the applicant has successfully met the minimum requirements for admission as specified above in Admission Criteria. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked.

4.3.3.3 Other Information

- English Language Proficiency Requirements will apply to all applicants.
4.3.4 Applicants for Concurrent Studies

4.3.4.1 Admission Criteria
- Applicants in or about to enter their final year of high school with a superior academic record (i.e. normally an overall average of 85% or above in completed English, Math and Science courses at the 2000 or 3000 level) may apply to enrol in university courses. The applicant for concurrent studies must be enrolled in a high school and completing a slate of courses that meets the course requirements for admission to the University as specified in Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador.
- Applicants will be required to submit a letter requesting enrolment in a specific course and provide a list of final year registrations; an official high school transcript; and a letter from the high school principal or guidance counsellor clearly supporting admission for concurrent studies.
- Applicants must submit a completed application for admission/readmission together with the appropriate fee. For further information refer to Fees and Charges.
- Normally, enrolment for concurrent studies students will be limited to 3 credit hours in a given semester. Fees and deadlines are the same as for regularly admitted students. University credit will be awarded after successful completion of the course(s) and successful completion of the requirements for admission to the University.
- Normally, eligibility to enrol is limited to the Fall and Winter semesters.
- Concurrent studies students will be automatically considered for general admission to the University for the Fall semester of the following academic year. The requirements for admission to the University, as specified in Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador, will apply. Additional faculty application and admission requirements may apply.

4.3.4.2 Other Information
- English Language Proficiency Requirements will apply to all applicants.

4.3.5 Applicants Who Have Followed the Adult Basic Education Program (ABE)

4.3.5.1 Admission Criteria
Applicants shall have completed the Level III Adult Basic Education Certificate (ABE) with the approved combination of thirty-six credits set down by the Department of Education and successfully completed, with an overall average of not less than 70%, the following courses as outlined below:
- **Communication Skills:** IC 3112 and IC 3321 OR English 3101A, 3101B, and 3101C
- **Mathematics:** One of the following groups:
  - Mathematics: IM 3115, 3211, 3212, 3213, and 3216 OR
  - Mathematics: IM 3218, 3219, and 3221 OR
- **Science:** One of the following patterns:
  - Biology: IBT 3113, 3115, 3211, 3212A/B, 3214, and 3316 OR
  - Biology: 2101A, 2101B, 2101C, 3101A, 3101B, and 3101C
  - Chemistry: ICH 3111, 3112, 3113, 3114, 3116, 3117, 3118, and 3215 OR
  - Chemistry: 2102A, 2102B, 2102C, 3102A, 3102B, and 3102C
  - Geology: IS 3212
  - Physics: IP 3111, 3112, 3213, 3215, and 3216 OR
  - Physics: 2104A, 2104B, 2104C, 3104A, 3104B, and 3104C

4.3.5.2 Other Information
- English Language Proficiency Requirements will apply to all applicants.

4.3.6 Applicants for Mature Student Status

4.3.6.1 Admission Criteria
- An applicant, 21 years of age or older within one month after the beginning of the semester or the session to which admission is being sought, who has not fulfilled the admission criteria outlined in any of the above categories may be admitted to the University with the approval of the University Committee on Admissions.
- Applicants for mature student status will be required to submit proof of age; two letters of reference from persons competent to assess the candidate's ability to proceed with university studies; a letter from the applicant outlining the grounds for requesting special consideration; and high school marks and marks from post-secondary institutions, if applicable.
- Applicants will be required to submit a completed application for admission/readmission together with the appropriate fee. For further information refer to Fees and Charges.
- Applicants for mature student status may be required to show through an interview that they possess the potential to proceed with university studies.
- Since admission as a mature student is not on the grounds of age alone, the University Committee on Admissions reserves the right to refuse admission to any applicant.

4.3.6.2 Other Information
- English Language Proficiency Requirements will apply to all applicants.

4.3.7 Applicants for Visiting Student Status
An applicant who wishes to enrol as a student at Memorial University of Newfoundland for a limited period of time and who does not
wish to be admitted to a program for the purpose of completing a degree at this University may apply for admission under the Visiting Student category. This category includes, but is not limited to, students who are in good standing at their current or most recently attended post-secondary institution and who either:

- wish to complete one or more courses for the purpose of transferring the resulting credit to their home institutions; or
- wish to come to Memorial University of Newfoundland to complete an unpaid research internship under the supervision of a Memorial University of Newfoundland faculty member; or
- have been offered provisional acceptance to a Memorial University of Newfoundland graduate-level program subject to the completion of specific pre-requisite courses.

### 4.3.7.1 Application and Admission Criteria

- Applicants will be required to submit a completed Undergraduate Application for Admission/Readmission together with the appropriate fee. For further information refer to [Fees and Charges](#).
- Applicants for admission as visiting students will be required to supply one of either (1) a final official transcript from the most recent institution attended, (2) a Letter of Permission (LOP) from their current or former institution, or (3) a letter of recommendation from the School of Graduate Studies confirming the courses that are pre-requisites for admission to a graduate-level program.
- Visiting students enrolling at Memorial University of Newfoundland under an approved exchange agreement or as visiting interns will also be required to submit a letter of recommendation from the head of the academic unit that will host the student confirming that the nature and duration of the student’s visit and the courses for which the student will register.
- Visiting students are normally eligible to register at Memorial University of Newfoundland under this category for a maximum of two semesters and registration eligibility is subject to course availability and completion of course pre-requisites. For courses at a level beyond first year in particular, consultation with the academic unit offering course(s) of interest for the purpose of verifying registration eligibility, prior to submission of an application, is strongly encouraged.
- In order to obtain access to University resources and, where applicable a study permit, visiting research interns will be required to register for each semester of their visit for one of either (1) UGRD 5900 if they are visitors at the undergraduate student level or (2) GRAD 9900 if they are visitors at the graduate student level. Registration for one of these courses will be conducted by using a Course Change Form.
- Visiting research interns will be exempt from tuition fees. However, all visiting research students will be required, as a condition of registration, to participate in the University’s mandatory health insurance plan and enrol in the University’s recreation program.

### 4.3.7.2 Other Information

- English Language Proficiency Requirements and the regulations outlined under Admission/Readmission to the University will apply to all applicants.
- All visiting students are subject to all other applicable Memorial University of Newfoundland regulations as published in the University Calendar.

### 4.3.8 Applicants Who Are Senior Citizens

#### 4.3.8.1 Admission Criteria

- An applicant, 60 years of age or older within one month after the beginning of the semester/session to which admission is being sought, may be admitted to the University as a senior citizen, upon submission of a birth certificate or other proof of age.

### 4.3.9 Applicants Who Have Followed the High School Curriculum of Another Country or a Recognized Standardized Curriculum

The criteria below apply to applicants who have completed a high school program and diploma under a curriculum sanctioned by a ministry of education or government jurisdiction other than the ministry of education of a province or territory of Canada or under an organization that offers internationally-recognized standardized examinations. Applicants shall have completed the requirements for a recognized high school diploma or senior secondary certificate following completion of university-preparatory courses at, as a minimum, either the senior secondary or grade 12 level in the following five subject areas: Mathematics, English, Laboratory Science (Biology, Chemistry, Earth Systems/Geology, or Physics), Social Science or Modern or Classical Language, and an Elective. The courses in each subject area shall have been of a depth and breadth that prepares students to continue studies in the related subject areas at the undergraduate university level. An overall minimum average grade among the five required subjects is required.

#### 4.3.9.1 International Baccalaureate (IB)

- Applicants seeking admission on the basis of the International Baccalaureate Organization's IB Diploma program may be admitted upon award of the IB Diploma with a minimum total score of 24. See [Transfer Credit](#) regulations and www.mun.ca/regoff for details regarding the University’s IB transfer credit eligibility and IB score conversion policies.

#### 4.3.9.2 American-based High School Curriculum

- Applicants completing an American-based high school program are required to provide official transcripts reflecting a minimum overall average of “B” or better in the required five grade 12 subjects.

#### 4.3.9.3 United Kingdom (UK) or UK-patterned Curriculum

- Applicants are required to have completed the General Certificate of Education (GCE) with at least five subjects. These must include at least three Advanced Subsidiary (“AS”) Level subjects or two Advanced (“A”) Level subjects with grades of “C” or better or, for applicants completing the Higher-Level subjects of the Scottish Leaving Certificate, at least two subjects at the Higher-Level with grades of “C” or better. Exceptional candidates may be admitted based upon Ordinary (“O”) Level results. Applicants should refer to [Transfer Credit](#) for information concerning transfer credit eligibility.

#### 4.3.9.4 France and French-Patterned Curriculum

- Applicants are required to complete and supply a certified copy of the Diplôme du Baccalauréat General (Diploma of General Baccalaureate) with a minimum grade of 12 in the required subject areas.
4.3.9.5 West Africa (Nigeria, the Gambia, Ghana, Liberia, and Sierra Leone)
- Applicants are required to complete the West African Examinations Council (WAEC) Senior School Certificate with a minimum grade of C6 in the required subjects. Applicants from Nigeria may also be considered based upon completion of National Examinations Council (NECO) examination results with a minimum grade of C6 in the required subjects.

4.3.9.6 Caribbean (Anguilla, Antigua and Barbuda, Barbados, Belize, British Virgin Islands, Cayman Islands, Dominica, Grenada, Guyana, Jamaica, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago, and Turks and Caicos Islands)
- Applicants are required to hold a Caribbean Examinations Council Secondary Education Certificate (C ESC) with a minimum grade of 2 in the required subject areas and a minimum of two 2-unit subjects on the Caribbean Advanced Proficiency Examination (CAPE) examinations. Applicants who have completed Caribbean Advanced Proficiency Examination (CAPE) examinations may be eligible for transfer credit at the undergraduate level.

Further details regarding admission criteria by country are provided online at www.mun.ca/regoff. Applicants may also contact the Admissions Office, Office of the Registrar by e-mail at admissions@mun.ca.

4.3.9.7 Other Information
- Early Acceptance: Applicants in their final year of high school who have completed, or who are completing, a slate of courses which meets the course requirements as specified under Applicants Who Have Followed the High School Curriculum of Another Country or a Recognized Standardized Curriculum may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the appropriate authorities, that the applicant has met the minimum requirements for admission as specified under Applicants Who Have Followed the High School Curriculum of Another Country or a Recognized Standardized Curriculum. Applicants who fail to meet all requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.
- Applicants from other countries should submit official matriculation certificates at least two months prior to the commencement of the semester to which they are seeking admission. Certificates in a language other than English or French should be accompanied by notarized English translations.
- Applicants from other countries may be required to submit with their application, a statement of satisfactory financial resources.
- English Language Proficiency Requirements will apply to all applicants.

4.3.10 Applicants Transferring From Other Recognized Universities or Colleges

4.3.10.1 Admission Criteria
- The admission of applicants from other recognized universities or colleges will be subject to the regulations for Admission/Readmission to the University in addition to General Academic Regulations, Regulations for Continuance and Readmission. In order to allow sufficient time for assessment of possible transfer credit, applicants should refer to Transfer Credit for information on the transfer credit application and evaluation process and requirements.

4.3.10.2 Other Information
- In addition to the non-refundable application processing fee, an additional fee is required of all applicants who apply for admission from post-secondary institutions outside of Newfoundland and Labrador and/or non-Canadian applicants. Neither fee is refundable nor will it be credited to the applicant's financial account in any circumstances. For further information refer to Fees and Charges.
- Students applying for transfer from other recognized universities or colleges shall submit their High School Diploma and official transcript(s) from all universities and colleges attended. All documents must be forwarded directly to the Admissions Office, Office of the Registrar from the appropriate institution(s). These documents must be certified and official and received in the Office of the Registrar not later than two months prior to the first day of lectures in any semester, as stated in the University Diary. An application is not considered complete until these documents have been received.
- Applicants transferring from other universities or colleges should also see Transfer Credit.
- English Language Proficiency Requirements will apply to all applicants.

4.3.11 Applicants Who Are Requesting Special Admission
Where circumstances warrant, applicants not meeting the regulations for Admission/Readmission to the University may be admitted to Memorial University of Newfoundland with the approval of the University Committee on Admissions.

4.3.11.1 Admission Criteria
- Applicants must submit a completed application for admission/readmission together with the appropriate fee. For further information refer to Fees and Charges.
- Applicants must submit a letter to the Committee outlining the grounds for requesting special consideration and provide a letter from a school principal, guidance counsellor, employer or other responsible person substantiating those grounds.
- In order to allow sufficient time for reasonable and consistent consideration of special cases, supporting letters must be received at least one week prior to the beginning of the semester to which admission is being sought.

4.3.11.2 Other Information
- English Language Proficiency Requirements will apply to all applicants.

4.4 Transfer Credit
Applicants wishing to be considered for advanced standing or transfer credit must submit, in addition to the Application for Admission/Readmission, an Application for Transfer Credit Evaluation which can be obtained online or in-person from the Office of the Registrar. Official transcript(s) and calendar descriptions and/or outlines of courses claimed for credit are also required and should be sent directly to Memorial University of Newfoundland from the institution attended.

In order to allow sufficient time for evaluation, these documents should be received at least two months prior to the commencement of the registration period for the semester to which the applicant is seeking admission. It is the student's responsibility to provide the pertinent documents, and until they are received, the Office of the Registrar is unable to commence an evaluation or to advise students...
of their standing at this University. The award of transfer credit is subject to the following regulations:

- When transfer credit is awarded for work completed at another institution, only equivalent Memorial University of Newfoundland course(s) and credit(s) are recorded on the Memorial University of Newfoundland transcript. Grades received from other institutions are not recorded nor included in averages.
- Applicants who have not received the results of a transfer credit evaluation prior to the assigned registration time for the semester in which they propose to begin studies should contact the Admissions Office for further assistance.
- Memorial University of Newfoundland will consider for transfer credit courses for which credit has been granted through a Prior Learning Assessment and Recognition process by another recognized university or college.
- Award of credit will be subject to University Regulations and evaluation and recommendation by the appropriate academic unit(s).
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

Outlined below are the various categories for which transfer credit may be considered.

4.4.1 College Board Advanced Placement (AP)

- Award of credit for AP courses will be subject to the achievement of a minimum grade of 3 in each subject claimed for credit (in certain subjects a minimum grade of 4 may be required).

4.4.2 Enriched Courses and Ontario Grade XIII/OAC

- Certain Grade XII enriched courses and certain Ontario Grade XIII/OAC subjects may be recognized for introductory (normally first year) credits, where applicable, that the subjects claimed for credit are recommended as equivalent to Memorial University of Newfoundland courses by the relevant University academic unit(s). In addition, the applicant must have obtained an overall average in these courses of not less than 65% with a passing grade in each subject claimed for credit. Applicants who have not obtained the overall average requirement of 65% in these courses will be required to have obtained a mark of not less than 65% in individual subjects claimed for credit.

4.4.3 Advanced or Higher Levels

- The “Advanced Level” subjects of the General Certificate of Education will generally be accepted for credit to a maximum of 12 credit hours in each subject provided that a minimum grade of ‘D’ in each subject claimed for credit has been obtained.
- The “Higher Level” subjects of the Scottish Leaving Certificate will generally be accepted for credit at the first year level.

4.4.4 International Baccalaureate Diploma

- Memorial University of Newfoundland will consider for transfer credit the “Higher Level” subjects and certain “Standard” or “Subsidiary” level subjects, provided that the subjects claimed for credit are recommended as equivalent to Memorial University of Newfoundland courses by the relevant University academic unit(s), and the candidate has achieved a minimum grade of 4 in individual subjects claimed for credit. In certain subjects a minimum grade of 5 may be required.

4.4.5 Member Institutions of Universities Canada

- All university-level course work completed by transfer students during the first two years of university study taken at universities/colleges that are ordinary members of Universities Canada will be recognized for transfer credit. In the first instance, the evaluation of such course work for appropriate credit will be conducted by University academic units. In instances where appropriate credit cannot be granted by academic units or where no University academic unit exists at this University for the evaluation of particular transfer credits, the Office of the Registrar will award the appropriate unspecified credits in an unspecified discipline.
- Applicants who have completed course work beyond the first two years of university study may be considered for further transfer credit subject to evaluation and recommendation by the appropriate academic unit(s) and University Regulations.

4.4.6 Other Universities, Colleges and Institutes

- Memorial University of Newfoundland may recognize for transfer credit certain courses offered by the College of the North Atlantic, the Fisheries and Marine Institute of Memorial University of Newfoundland, and certain other community colleges, technical colleges, institutes and CEGEPs.
- Memorial University of Newfoundland may recognize for transfer credit certain courses offered by other recognized universities or university colleges.

4.4.7 Caribbean Advanced Proficiency Exams

- Memorial University of Newfoundland may recognize for transfer credit certain courses completed through the Caribbean Advanced Proficiency Examinations. These examinations will generally be accepted for credit to a maximum of 12 credit hours for each 2 unit course and 6 credit hours for each 1 unit course.

4.5 Prior Learning Assessment and Recognition (PLAR)

Memorial University of Newfoundland recognizes that learning may occur outside a formal institutional setting through professional or personal experience or through participation in unaccredited learning. Students of Memorial University of Newfoundland may be eligible for the award of credit for informal or non-formal learning in specific circumstances. Where PLAR is offered, it is available only to those students who have applied for admission or who are currently registered at the University. PLAR at Memorial University of Newfoundland is subject to the following regulations and procedures:

- The recognition of informal learning, assessed on the basis of recognized professional achievement, may exist in the form of program admission, advanced placement, or academic credit in selected programs. Students are advised to consult the regulations governing programs of interest in the appropriate section of the University Calendar for further information.
- The recognition of learning that has not been recognized through the award of credit, for the purposes of determining pre-requisite waiver eligibility, may be approved by academic units on the basis of interviews or a review of unofficial documents. Students are advised to contact the academic unit offering the course(s) involved for further advice.
- Assessment of learning in the form of written or practical challenge examinations may be offered at the discretion of academic units. Recognition of learning assessed through challenge examinations is subject to the regulations outlined below.
4.5.1 Challenge for Credit

Where challenge for credit is offered, it is available under the following conditions:

1. Applications to challenge for credit are available online at www.mun.ca/regoff/forms.php or in-person at the Office of the Registrar. Completed applications must be submitted to the Office of the Registrar and must receive approval from the head of the academic unit offering the course(s). The academic unit may require documentary material from the student and/or an interview before making its decision whether or not to accept the challenge. The academic unit involved will be responsible for deciding the scheduling and appropriate method of evaluation, which may consist of a variety of possible modes of evaluation including written, practical and oral.

2. A student who has applied for transfer credit evaluation may not apply to challenge for credit until the transfer credit evaluation has been completed.

3. Memorial University of Newfoundland will consider for credit courses that have been granted credit through a challenge for credit process by another recognized university or college. Award of credit will be subject to University Regulations and evaluation and recommendation by the appropriate academic unit(s).

4. For the purpose of satisfying the regulations governing residence requirements for a first degree and residence requirements for a second degree under General Academic Regulations (Undergraduate), a successful challenge for credit shall be considered the equivalent of a transfer credit and shall be recorded on the transcript as a pass (PAS). Challenge grades are not included in averages. For further information refer to Residence Requirements for a First Degree and Residence Requirements for a Second Degree.

5. The appropriate fee must be paid at the time of application. For further information refer to the refer to Fees and Charges. If the application is accepted for consideration, the fee is not refundable nor is the student permitted to withdraw the challenge.

5 Academic Advising

During their period of study at the University, students are expected to make some very important academic decisions, the consequences of which can significantly affect the course of their academic careers. While the responsibility for making these decisions rests with students individually, they are not expected to make such decisions without access to sound academic advice.

Students should seek advice on matters such as course selection, registration, dropping/adding course registrations, selecting/changing an academic program, entrance requirements for degree programs and interpretation of university regulations. It is especially true that students in the early stages of their degree program should seek academic advice.

Students who are considering enrolling at the University or who are in their first year of study at the University or who have not declared an academic program can obtain academic advice from the following sources: those students attending the St. John's Campus should contact the Academic Advising Centre, Office of the Registrar, located in the Science Building room SN 4053, at (709) 864-8801; those students attending the Grenfell Campus should contact the Manager, Academic Advising at the Office of the Registrar, located in the Arts and Science Building in room AS 270, at (709) 637-6298.

Students beyond their first year who have declared their major or have been accepted to a School or Faculty can obtain academic advice from a faculty adviser assigned by their School/Faculty/Department. Students should contact the head of the relevant academic unit to be assigned a faculty adviser.

Students are also encouraged to approach their professors for academic advice or for referral to the appropriate source of advice. While it is the responsibility of students to see that their academic programs meet regulations in all respects, academic advice is provided as a service of the University.

6 General Academic Regulations (Undergraduate)

Memorial University of Newfoundland is governed by the principles of fairness, academic integrity and the timely provision of information and by regulations whose purpose is to ensure fair and equitable treatment for the entire University community. Some regulations deal with the normal workings of the University (continuance, registration deadlines, etc.) and pertain to all undergraduate students. Other regulations, however, especially those concerned with classification of degrees and academic conduct, apply to certain students in certain specific situations.

The Office of the Registrar will assist students with any questions or problems which arise concerning the interpretation of regulations. It is, however, the responsibility of the student to see that his or her program meets University regulations in all respects. Every student has the right to request waiver of General Academic Regulations (Undergraduate). In addition, every student has the right to appeal decisions resulting from a request for waiver of General Academic Regulations (Undergraduate). For further information refer to Waiver of Regulations and Appeal of Decisions.

Descriptions and regulations for individual programs can be found in the appropriate academic unit section of this Calendar. The terminology is explained in the Glossary of Terms Used in This Calendar.

6.1 Classification of Students

1. Full-time students
   a. Students who have been admitted to this University and who are registered for the duration of any semester in at least 9 credit hours or at least 5 credit hours in a session are deemed full-time students.
   b. Notwithstanding the above and the regulations governing the Marine Institute technology diploma programs, students who have been declared as pre-Bachelor of Technology or pre-Bachelor of Maritime Studies are deemed full-time students if they are registered for either: three non-degree courses and a minimum of 3 degree credit hours, or two non-degree courses and a minimum of 6 degree credit hours.
   c. Students who are registered for the duration of any semester in a co-operative education work term, the internship required of the Computer Industry Internship Option (CIIO), or the Structured Practice Experiences required of the School of Pharmacy will be deemed full-time students.
   d. Provided they had been admitted to the University, the members of the Executive of the Memorial University of Newfoundland Students' Union (MUNSU), the Grenfell Campus Student Union (GCSU) and the Marine Institute Student Union (MISU) shall be deemed, for the purpose of membership on University committees, the Senate and the Board of Regents, to be full-time students during their tenure.

2. Part-time students are students who have been admitted to the University and who are registered for fewer than 9 credit hours in any semester or fewer than 5 credit hours in any session.
3. **First-year students** are students who have earned fewer than 18 credit hours.
4. **Second-year students** are students who have earned from 18 to 47 credit hours inclusive.
5. **Third-Year Students** are students who have earned from 48 to 77 credit hours inclusive.
6. **Fourth-Year Students** are students who have earned from 78 to 107 credit hours inclusive.
7. **Fifth-Year Students** are students who have earned not fewer than 108 credit hours.

### 6.2 Degree and Departmental Regulations

Every student seeking a bachelor’s degree shall comply with all the course requirements governing the award of that degree.

#### 6.2.1 Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science

1. A student completing a degree program in the Faculty of Humanities and Social Sciences or in the Faculty of Science will normally follow the degree regulations in effect in the academic year in which the student first completes a course(s) at Memorial University of Newfoundland. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program.
2. In the case of departmental regulations for a major or minor, a student will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000 level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program.

#### 6.2.2 Year of Degree and Departmental Regulations - All Other Faculties and Schools

1. A student registered in any program, other than programs in the Faculty of Humanities and Social Sciences, programs in the Faculty of Science, the Bachelor of Business Administration program offered by the Faculty of Business Administration, or in the Bachelor of Maritime Studies or Bachelor of Technology programs offered by the Fisheries and Marine Institute will normally follow regulations in effect in the academic year in which the student first completes a course(s) in the faculty or school following formal admission to that program. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program.
2. A student completing a Bachelor of Business Administration will normally follow the degree regulations in effect in the academic year in which the student first earns a total of 12 credit hours in Business courses at the 1000-level. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program.
3. A student who has been admitted to and who is currently completing courses in one of the Fisheries and Marine Institute diploma programs that meets the admission criteria to the Bachelor of Technology program may simultaneously complete the requirements for the Bachelor of Technology program. Under those circumstances, for the purpose of meeting Degree and Departmental Regulations, Year of Degree and Departmental Regulations - All Other Faculties and Schools, students will normally follow the degree regulations in effect in the academic year in which the student first completes an undergraduate degree course in the Maritime Studies/Technology Management (MSTM) subject area. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in the program.
4. For the purpose of meeting Degree and Departmental Regulations, Year of Degree and Departmental Regulations - All Other Faculties and Schools, a student who is completing the Bachelor of Maritime Studies/Bachelor of Technology will normally follow the degree regulations in effect in the academic year in which the student first completes a course(s) in the program following formal admission to that program. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in the program.
5. A student in the Bachelor of Commerce (Co-operative) program, the International Bachelor of Business Administration program, or in the Faculty of Education, Faculty of Engineering and Applied Science, School of Nursing, Faculty of Medicine, School of Pharmacy or School of Social Work, who fails to obtain promotion or is not registered for full-time studies for more than one semester and is readmitted to full-time studies in the faculty or school will normally follow regulations in effect at the time of readmission.
6. A student in the School of Music who is required to withdraw from the Bachelor of Music degree program for academic reasons, or who has withdrawn from the principal applied study course will normally follow regulations in effect at the time the student is readmitted to the School. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program.

#### 6.2.3 Further Credentials

1. Students may obtain more than one undergraduate degree at this University but not in the same major subject. Students are also encouraged to consider proceeding to more advanced studies at the honours or graduate level.
2. A student will not be awarded the same bachelor’s degree more than once by this University (e.g., if a student has been awarded a Bachelor of Arts degree from this University the student will not be awarded a second Bachelor of Arts degree from this University).
3. A student who has completed a Bachelor’s degree from this University may complete the requirements for another major or minor. A notation indicating the completion of the requirements for the additional major or minor will be included on the student’s academic record.
4. For further information refer to Residence Requirements - Second Degree.

#### 6.2.4 Time Limits

1. Notwithstanding these regulations, the University may place limits on the time permitted to complete a program under any given set of regulations. In addition, detailed scheduling of courses and/or practical experience, e.g., work terms, internships, field placements, may be changed as the University deems appropriate or necessary.

### 6.3 Residence Requirements

#### 6.3.1 General Information

1. Residence requirements are met by attendance at classes on a campus and/or by the number of credit hours completed at this University.
6.3.2 First Degree
1. For a first bachelor's degree students shall have completed a minimum of 24 credit hours through attendance at classes on the campus of a recognized university or university college. Distance education courses may be used to satisfy the requirements of this clause only for the degrees of Bachelor of Business Administration, Bachelor of Business Administration (Honours), Bachelor of Maritime Studies, Bachelor of Nursing (Post-RN) and Bachelor of Technology.

2. Students shall complete at this University the last 30 credit hours required for the degree. There are exceptions to this requirement as follows:
   - Where special circumstances warrant, and only if at least half the courses required for the degree are completed at this University, the appropriate committee on undergraduate studies may permit students to complete, at another recognized institution, not more than 15 of the last 30 credit hours or equivalent required for the degree. The courses which comprise those credit hours must be approved by the appropriate academic unit.
   - Courses taken at universities and/or colleges which are included in formal institutional exchange agreements with this University are not subject to the requirements of this clause.
   - Courses taken at Francophone universities, as required under specific degree program regulations, are not subject to the requirements of this clause.

3. Students who have taken courses in the subject of their major at another university are required to complete at least 12 credit hours in that subject at this University.

6.3.3 Second Degree
A student who has already completed a bachelor's degree may undertake a second bachelor's degree, but not in the same major, subject to the condition outlined below:
1. Every student for a second bachelor's degree, with the exception of students completing the Bachelor of Technology or Bachelor of Maritime Studies degrees, shall complete at least 30 credit hours at this University beyond those required for the first degree. These credit hours must be applicable to the degree sought. Students who have completed a first degree at this University may be permitted to take at another university up to 6 of the 30 credit hours required in this clause.

2. Students completing the Bachelor of Technology or Bachelor of Maritime Studies as a second degree must complete all required courses in their stream of study and the work completed as required for admission to the Bachelor of Technology/Bachelor of Maritime Studies degree. These credit hours must be applicable to the degree sought.

6.4 Special/Selected Topics Courses
When a block of courses has been approved under a general heading such as selected topics, special areas, directed readings or like heading, each new course offered from that block of courses shall be approved in advance by the Faculty/School Undergraduate Studies Committee. To ensure an orderly use of the courses and non-duplication between course numbers, titles and contents, the Committee shall require the same quality and type of information as is needed for the approval of any single course.

6.5 Registration
6.5.1 General Information
1. Students register using the Student Web/Self-Service at www.mun.ca/regoff.
2. No student may register after the end of the registration period. In the case of accelerated courses and courses offered outside the normal time frame of a semester or session the registration period will be prorated with respect to all associated deadlines.
3. The University reserves the right to require a student to withdraw without academic prejudice from a course, courses, or program in which the student is improperly registered.

6.5.2 Student Responsibility
1. Students are strongly encouraged to seek academic advice before registering.
2. The responsibility for taking all steps necessary for registering and ensuring that a student's registration is appropriate, correct, and proper rests solely with the student. The University will make every effort, through its various academic counselling and advising services, to ensure that students are informed of the suitability and accuracy of their registrations.
3. Students must register for courses at or after the assigned registration time and before the end of the registration period as defined in the University Diary.

6.5.3 Registration Priority
1. The University uses a registration priority system that assigns the date and time that students register. Priority for registration is determined by a combination of three factors: closeness to graduation (i.e., number of credit hours completed); a student's academic achievement (i.e., GPA); and a student's program of study (i.e., degree, major, minor).
2. Academic units may reserve spaces in course sections for students in a particular degree, major, minor, or the like.
3. For further information on registration priority consult the Undergraduate Registration Procedures.

6.5.4 Adding Courses
6.5.4.1 General Information
- Specific deadlines for adding courses in any semester or session are stated in the University Diary. In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for adding courses will be prorated accordingly.
- No course will be considered to have been added until the Registrar has received official notification and certified the add.
- Attending classes or informing an instructor of the intent to add a course does not constitute an official adding of a course.
- Only under special circumstances may a course(s) be added after the end of the registration period. For information contact the Office of the Registrar.
- Before the end of the registration period a student may, upon formal notification to the Registrar, change the course(s) for which the
6.5.5 Course Weight/Course Load

Course load is the sum of course weights. In a session the course load is double. For the purposes of determining course load, each course is weighted with the credit hour value associated with that course, unless otherwise specified as follows:

- The course weight of each of the A and B components of a linked course shall be equivalent to one half of the credit hour value of the B component.
- The course weight of courses with C or F as the last character shall be three.
- The course weight of courses with W as the last character will vary according to individual program requirements.

1. Semester Course Load: The normal course load in a semester shall be 15 credit hours, except where academic regulations require more than that number. No student shall register for more than 15 credit hours or more credit hours than required by degree regulations in a semester except with the written permission of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus.

2. Session Course Load: The normal course load in a session shall be 6 credit hours. No student shall register for more than 6 credit hours in a session except with the written permission of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus.

6.5.6 Dropping Courses

6.5.6.1 General Information

- Specific deadlines for dropping courses in any semester or session are stated in the University Diary. In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for dropping courses without academic prejudice will be prorated accordingly.
- No course will be considered to have been dropped until the Registrar has received official notification and certified the drop.
- Ceasing to attend classes, or informing an instructor of the intent to drop a course, does not constitute an official dropping of a course.
- A student who drops all courses in any given semester will be considered to have withdrawn from the University for that semester. A student who has withdrawn from the University, before the start of classes in any semester, is deemed to be not registered for that semester. For information regarding applying for readmission to the University refer to Admission/Readmission to the University (Undergraduate).
- In the event that a student drops a co-requisite course, the student will be required to drop the course for which that course is a co-requisite.
- Before the end of the registration period a student may, upon formal notification to the Registrar, change the course(s) for which the student was originally registered by adding and/or dropping a course(s).

6.5.6.2 Dropping Courses Without Academic Prejudice

- Until the end of the second week following the first day of lectures in any semester, a student may, upon formal notification to the Registrar, drop a course without academic prejudice. A course dropped under these circumstances will not be entered on the student's record.
- From the beginning of the third week to the end of the seventh week following the first day of lectures in any semester, a student may, upon formal notification to the Registrar, drop a course without academic prejudice. A grade of DR will be assigned in these circumstances and will be entered on the student's record.
- From the beginning of the eighth week following the first day of lectures in any semester to the last day to add courses in the following semester, a student who is prevented from completing the requirements of a course by illness, bereavement, or other acceptable cause, duly authenticated in writing, may drop a course without academic prejudice. This may occur only with the approval of both the course instructor and the head of the academic unit of the student's program or in the case of students who have not declared a program, the head of the academic unit of the course in question. A grade of DR will be assigned in these circumstances and will be entered on the student's record.

6.5.6.3 Dropping Courses Retroactively

An academic transcript is a complete and accurate reflection of a student’s academic record. Once the final exam is written the course will be considered to be completed and, normally, no retroactive drop will be possible. A poor grade is not, in and of itself, acceptable grounds for dropping a course retroactively. On rare occasions, a student may request to drop a course retroactively (i.e. beyond the last day to add courses in the semester following the one in which the course was taken). Normally, such requests will be considered only for courses that were not completed as a result of circumstances beyond the student’s control such as illness, bereavement, or other acceptable cause, duly authenticated. If a request for a retroactive drop is approved, a grade of DEX (Drop due to Exceptional Circumstances) will be assigned in these circumstances and entered on the student's record. Requests shall be submitted to the Office of the Registrar no later than five years following the last day of examinations for the semester in which the course was taken. Requests must include the following information:
- name,
- current address and telephone number,
- Memorial University of Newfoundland email address,
- student ID number,
- course(s) requested to drop retroactively,
- explanation of why course(s) could not be dropped during regular time frame for dropping,
- grounds for the request,
- supporting documentation, and
- documentation from the course instructor regarding grading scheme and final grade.

6.5.6.4 Work Terms

Students registered for a co-operative education work term should refer to the appropriate academic unit section of this calendar with respect to regulations regarding work terms.
6.5.6.5 Tuition Fee Implications
- A student who drops a course within two weeks following the first day of lecture in any semester will not be liable for tuition fees for that course. Tuition fee refunds for dropping courses after that period will be prorated in accordance refer to Fees and Charges. - Tuition Refunds Based on Withdrawal From Course(s). Further Information can be found at Fees and Charges.
- In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for dropping courses without financial liability will be prorated accordingly.

6.5.7 Withdrawing from the University

6.5.7.1 General Information
- A student who drops all courses in any given semester will be considered to have withdrawn from the University for that semester. A student who has withdrawn from the University, before the start of classes in any semester, is deemed to be not registered for that semester. For information regarding applying for readmission to the University refer to Admission/Readmission to the University (Undergraduate).
- A withdrawal is not official until the Registrar has received official notification and certified the changes.
- Ceasing to attend classes, or informing an instructor of the intent to drop a course, does not constitute an official withdrawal.

6.5.7.2 Withdrawing from the University Without Academic Prejudice
- Until the end of the second week following the first day of lectures in any semester as stated in the University Diary, a student may, upon formal notification to the Registrar, withdraw from the University without academic prejudice. Courses dropped under these circumstances will not be entered on the student's record.
- From the beginning of the third week to the end of the seventh week following the first day of lectures in any semester as stated in the University Diary, a student may, upon formal notification to the Registrar, withdraw from the University without academic prejudice. The letter grade DR will be assigned to all courses in these circumstances.
- From the beginning of the eighth week following the first day of lectures in any semester to the last day to add courses in the following semester as stated in the University Diary, a student who is prevented from completing the semester by illness, bereavement, or other acceptable cause, duly authenticated in writing, may withdraw from the University without academic prejudice. This may occur only with the approval of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus and upon formal notification to the Registrar. The letter grade DR will be assigned to all courses in these circumstances.
- In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for withdrawing from the University will be prorated accordingly.
- Students who withdraw from the University for medical reasons for one or more semesters may not be permitted to re-enter unless they can provide medical evidence, satisfactory to the Director of Student Health Service, of fitness to pursue studies.

6.5.7.3 Withdrawing from the University Retroactively
An academic transcript is a complete and accurate reflection of a student’s academic record. Once the student has written one or more final exams, the semester will be considered to be completed and, normally, no retroactive withdrawal will be possible. Poor grades are not, in and of themselves, acceptable grounds for withdrawing retroactively. On rare occasions, a student may request to withdraw from the University retroactively (i.e. beyond the last day to add courses in the semester following the one in which the courses were taken). Normally, such requests will be considered only for courses that were not completed as a result of circumstances beyond the student’s control such as illness, bereavement, or other acceptable cause, duly authenticated. If a request for a retroactive withdrawal is approved, a grade of DEX (Drop due to Exceptional Circumstances) will be assigned in these circumstances and entered on the student's record. Requests shall be submitted to the Office of the Registrar no later than five years following the last day of examinations for the semester in which the courses were taken. Requests must include the following information:
- name,
- current address and telephone number,
- Memorial University of Newfoundland email address,
- student ID number,
- semester(s) for which retroactive withdrawal is requested,
- explanation of why course(s) could not be dropped during regular time frame for dropping,
- grounds for the request,
- supporting documentation, and
- documentation from the course instructors regarding grading scheme and final grade.

6.5.7.4 Work Terms
Students registered for a co-operative education work term should refer to the appropriate academic unit section of this calendar with respect to regulations governing withdrawing from work terms.

6.5.8 Completing a Course
1. When it is prescribed that students, once registered, must complete a particular course, it is understood that they shall, when required, attend lectures given in the course, perform laboratory projects, and exercises that may be assigned and any other written or oral exercises prescribed, write or otherwise answer tests and examinations given in the course throughout the semester or session, including any final examinations, and shall obtain an overall passing grade in the course in accordance with the prescribed evaluation procedures.

6.5.9 Auditing of Courses
1. Individuals auditing courses must have met the University's admission or readmission requirements as stated in Admission/Readmission to the University (Undergraduate).
2. In order to audit any course, an individual must receive permission from the instructor in that course and the head of the academic unit in which the course is offered. Permission cannot be given until the number of registrations is known. Factors to be considered shall include class size, impact on students registered for credit, and other matters judged relevant by the academic unit.
3. Individuals auditing courses shall limit their participation to that deemed appropriate by the instructor.
4. Auditors are not permitted to write formal examinations or have their work formally assessed.
5. Audited courses will not be considered as meeting prerequisites, admission, or course requirements for any undergraduate programs, nor will audited courses be listed on the individual's transcript of University studies.

### 6.6 Attendance

1. Attendance regulations must be approved by the Senate and will be allowed only in cases where the academic unit has demonstrated that attendance is necessary for safety reasons, for teaching practical skills, or for attaining other clearly specified objectives. This may include an attendance regulation that may, by itself, cause a student who contravenes the regulation to fail or be dropped from a course.
2. The course where an attendance regulation is to be enforced must have the statement "attendance required" included in the calendar description.

### 6.7 Evaluation of Student Work

#### 6.7.1 Method of Evaluation

1. The method of evaluation in any course shall be determined by the academic unit subject to all University regulations.

#### 6.7.2 Course Syllabus

1. Before the end of the first week of lectures in any semester or session, the course syllabus shall be made known to students. The course syllabus shall include:
   - the method of evaluation,
   - any required prerequisites or co-requisites,
   - any required textbooks or other resources which must be purchased,
   - information about the availability of the instructor for consultation (in-person and, where appropriate, by other means of communication) outside of class,
   - a statement of Memorial University of Newfoundland’s commitment to accommodation of students with disabilities, and
   - a statement regarding academic integrity, including a reference to the entry on Academic Misconduct in this Calendar.
2. The following shall be included in the explanation of the method of evaluation:
   - the allocation of marks for all parts of the evaluation, e.g., assignments, laboratory projects, presentations, tests, mid-term examinations, final examinations;
   - wherever possible, an explanation of the alternate evaluation which will be offered to students who are unable to complete a part of the evaluation due to acceptable cause, as described under Exemptions from Parts of the Evaluation; and
   - with the exception of the final examination, and in accordance with Scheduling of Parts of the Evaluation below, the probable dates of all in-class parts of the evaluation, and the probable dates on which all take-home parts of the evaluation are due.
3. The course syllabus shall be provided in paper form to students present in class, or in electronic form via a University approved email account or learning management system.
4. As early as possible following the start of lectures in each semester or session, and no later than the end of the first week of lectures, the course instructor shall file a copy of the course syllabus with the appropriate academic unit.
5. Methods used for notification of grades earned in all parts of the evaluation and for the return of graded evaluative instruments will be in keeping with the Access to Information and Protection of Privacy Act (Government of Newfoundland and Labrador).

#### 6.7.3 Scheduling of Parts of the Evaluation

1. Every effort should be made to adhere to the dates given on the course syllabus. Deviations from these dates of one calendar week or less are subject to the restrictions listed in clauses 2 to 5. Longer deviations are permitted only as described under Changing the Method of Evaluation.
2. No laboratory examinations totalling more than one laboratory period in length shall be given in any laboratory course in any week during a lecturing period in any semester or session. Such examinations shall be administered in the laboratory time period assigned for that course section. The application of this clause in the Faculty of Engineering and Applied Science, the Faculty of Medicine and the School of Pharmacy is subject to interpretation by the appropriate committee on undergraduate studies. The Senate Committee on Undergraduate Studies may grant a waiver of this clause for laboratory examinations in individual courses in a given semester or session upon recommendation of the appropriate committee on undergraduate studies. Such waivers will be considered only if it can be shown that such laboratory examinations do not conflict with regularly scheduled meetings of another course for any student involved.
3. Any other in-class work shall not extend beyond the class period assigned to that course section in any week during a lecturing period in any semester or session. The application of this clause in the Faculty of Engineering and Applied Science and the Faculty of Medicine is subject to interpretation by the appropriate committee on undergraduate studies. The Senate Committee on Undergraduate Studies may grant a waiver of this clause for in-class work in individual courses in a given semester or session upon recommendation of the appropriate committee on undergraduate studies. Such waivers will be considered only if it can be shown that such in-class work does not conflict with regularly scheduled meetings of another course for any student involved.
4. No form of evaluation shall take place or be due during the last two weeks of the lecturing period in any semester or the last week of the lecturing period in any session, with the exception of oral exams and presentations, laboratory exams and reports, grading on participation, and take-home work which has been made available to students prior to this part of the lecturing period. Courses taught outside the regular time frame are exempt from the application of this regulation. In exceptional circumstances, the undergraduate studies committee of the appropriate faculty or school may, upon the recommendation of the head of an academic unit, grant a waiver of this regulation with the proviso that the total value of all parts of the evaluation thereby permitted shall not exceed 20% of the final mark in that course. At the end of each semester, the Senate Committee on Undergraduate Studies must be notified of waivers granted.
5. No evaluation of any nature shall be held or due between the last day of lectures and the start of the formal examination period in any semester or session. The application of this clause to the Faculty of Education (with respect to accelerated courses), the Faculty of Medicine, the School of Human Kinetics and Recreation (with respect to accelerated courses and courses offered outside the normal time frame during the Spring semester) and the School of Nursing is subject to interpretation by the appropriate committee on undergraduate studies.
6. In the event of an officially declared emergency which results in the cancellation or interruption of in-class work previously scheduled
University Regulations 2017-2018

and notified to be held in the final class period of the third last week of lectures of a semester or the second last week of lectures of a session, teaching units may reschedule such work in the next regularly scheduled class or as early as possible in the second last week of lectures of a semester or the last week of lectures of a session. In no circumstances can the rescheduled work be held in the last week of lectures of a semester.

6.7.4 Changing the Method of Evaluation
1. The method of evaluation, as made available to the class in the first week of lectures, shall be changed only if:
   • exceptional circumstances warrant the change; and
   • the head of the academic unit approves the proposed change; and
   • accommodation is made for students who demonstrate to the course instructor that they are disadvantaged by the change.

6.7.5 Exemptions from Parts of the Evaluation
1. For information and procedures regarding exemptions from final examinations, refer to Exemptions From Final Examinations and Procedures for Applying to Write Deferred Final Examinations.

2. A student is, at times, prevented from completing a part of the evaluation by illness or medical conditions of less than five calendar days’ duration. In such cases, a student may apply for an alternate evaluation by declaring to the relevant instructor that the student has experienced such an illness or medical condition. This declaration should be made via telephone or in writing through the student’s University approved e-mail account. The declaration should be made in advance of the original date on which an in-class part of the exam is to be held or a take-home part of the evaluation is due, wherever possible, but no later than 48 hours after the original date of the part of the evaluation. If an application is made by telephone, written confirmation must then be received by the relevant instructor within seven calendar days of the original date of the part of the evaluation. If the declaration is made by telephone, written confirmation must then be received by the relevant instructor within seven calendar days of the original date of the part of the evaluation.

3. A student who is prevented from completing a part of the evaluation by illness of at least five calendar days’ duration, bereavement or other acceptable cause, duly authenticated in writing, may apply for an alternate evaluation. This application should be made in advance of the original date on which an in-class part of the evaluation is to be held or a take-home part of the evaluation is due, wherever possible, but no later than 48 hours after the original date of the part of the evaluation. If application is made by telephone, written confirmation must then be received by the head of the appropriate academic unit within seven calendar days of the original date of the part of the evaluation. The following supporting documentation is required:
   • For illness or medical conditions, medical documentation from a health professional is required. Students should provide the health professional with a copy of the Student Medical Certificate.
   • For bereavement or other acceptable cause, official documents or letters that support the reason for the request (e.g. death certificate, letter from employer, etc.) are required.

4. The alternate evaluation may consist of the deferral of in-class work, the extension of the deadline for take-home work, an alternative allocation of marks, or another appropriate accommodation as determined by the course instructor. A student who is dissatisfied with the accommodation offered by the instructor may consult with the head of the appropriate academic unit.

6.7.6 Correction and Return of Student Work
1. Provided that students submit work by the due date outlined in the method of evaluation, instructors shall mark and return work that is worth a total of at least 20% of the final grade before the last day to drop courses without academic prejudice. This excludes practicums, placements, internships, theses, and courses where a single piece of work is used to determine the entire mark for the course. In exceptional circumstances, a waiver of this clause may be granted to an individual section of a course in a given semester upon application by the course instructor. For courses at the 1000- and 2000-level, such a waiver may be granted by the Senate Committee on Undergraduate Studies. For all other courses, such a waiver may be granted by the undergraduate studies committee of the appropriate faculty or school; at the end of each semester, the Senate Committee on Undergraduate Studies shall be notified of waivers granted.

2. Instructors shall mark and return all work in a timely manner. In courses where evaluation includes a final examination, instructors shall make all reasonable efforts to mark and return all work before the beginning of the examination period, provided that students submit this work by the due date specified in the method of evaluation.

6.8 Final Examinations

6.8.1 Scheduling of Final Examinations
1. Final examinations, if any, whether of the normal two-hour duration or longer, shall be held in each course at the end of the semester or session during which it was given in accordance with the schedule of examinations published by the Office of the Registrar. The application of this clause to the Bachelor of Education (Intermediate/Secondary) and all degree programs offered by the School of Human Kinetics and Recreation is subject to interpretation by the appropriate committee on undergraduate studies.

2. Normally, course sections offered during the day will have their final examinations, if any, scheduled in the day, and course sections offered in the evening will have their final examinations, if any, scheduled in the evening. When a student is unable, for good reason, to write a final examination scheduled outside the provisions of this clause, the student will be entitled to write a deferred examination. For further information refer to Exemptions From Final Examinations and Procedures for Applying to Write Deferred Final Examinations.

3. When an academic unit determines that there will be a common final examination for day and evening sections of a course, students must be so informed in the course syllabus.

4. Where possible, academic units should inform the Office of the Registrar when they submit their class schedules if it is anticipated that a common final examination will be required for day and evening sections of a course, so that this information can be publicized in the class schedule for the appropriate semester or session. Academic units should indicate whether the examination is to be held during the day or the evening.

6.8.2 Exemptions From Final Examinations and Procedures for Applying to Write Deferred Final Examinations
1. A student who is prevented from writing a final examination by acceptable cause may apply, with supporting documents, to have the course graded based on the work completed or have the final examination deferred.

2. For a student who is prevented from writing a final examination as described under Scheduling of Final Examinations, the application to defer this examination should be made in writing to the head of the appropriate academic unit (or delegate). It should
be submitted as soon as possible after the release of the final examination schedule, and in any case no later than two weeks before the end of the semester or session.

3. A student who is scheduled to write three final examinations which begin and end within a twenty-four-hour period may request to write a deferred examination. Normally, only the second examination in the twenty-four-hour period may be deferred. The application to defer this examination should be made in writing to the head of the appropriate academic unit (or delegate). It should be submitted as soon as possible after the release of the final examination schedule, and in any case no later than two weeks before the end of the semester or session.

4. For a student who is prevented from writing a final examination by illness, bereavement or other acceptable cause, duly authenticated in writing, the application to defer this examination should be made via telephone or in writing through the student's University approved e-mail account to the head of the appropriate academic unit (or delegate) and the course instructor. This application should be made in advance of the examination wherever possible, but no later than 48 hours after the original date of the examination. If application is made by telephone, written confirmation must then be received by the head of the appropriate academic unit (or delegate) within seven calendar days of the original date of the examination. The following supporting documentation is required:
   - For illness or medical conditions, medical documentation from a health professional is required. Students should provide the health professional with a copy of the Student Medical Certificate.
   - For bereavement or other acceptable cause, official documents or letters that support the reason for the request (e.g. death certificate, letter from employer, etc.) are required.

5. The decision regarding the request of the student to have a course graded based on the work completed or have the final examination deferred, including information on the appeals route open to the student in the case of a negative decision, must be communicated in writing by the head of the appropriate academic unit (or delegate) to the student and to the Registrar within seven calendar days of the receipt of the student's complete application. For further information refer to Appeal of Decisions.

6. In those cases where the academic unit accepts the extenuating circumstances the student may be permitted to write a deferred examination or, with the consent of both the academic unit and the student, the grade submitted may be based on term work completed alone. An interim grade of ABS will be assigned by the academic unit in the case of a student granted a deferred examination. This grade will be replaced by the final grade which must be received by the Registrar within seven calendar days following the start of classes in the next semester or session.

7. A student who is prevented from writing a deferred final examination by illness, bereavement, or other acceptable cause, duly authenticated in writing, may apply, with supporting documents, to have the deferred final examination further deferred. This application should be made via telephone or in writing through the student's University approved e-mail account to the head of the appropriate academic unit (or delegate) and the course instructor. This application should be made in advance of the examination wherever possible, but no later than 48 hours after the original date of the examination. If application is made by telephone, written confirmation must then be received by the head of the appropriate academic unit (or delegate) within seven calendar days of the original date of the examination. The examination will be postponed to a time not later than the last date for examinations in the semester following that in which the student was enrolled in the course. The following supporting documentation is required:
   - For illness or medical conditions, medical documentation from a health professional is required. Students should provide the health professional with a copy of the Student Medical Certificate.
   - For bereavement or other acceptable cause, official documents or letters that support the reason for the request (e.g. death certificate, letter from employer, etc.) are required.

### 6.8.3 Access to Final Examination Scripts

1. A student has a right to see his or her final examination script. However, the script is the property of the University and the University retains full possession and control of the script at all times. This regulation upholds the authority and judgement of the examiner in evaluation.

2. To access a final examination script, a student must make a written request to the head of the academic unit in which a course is offered. This request is subject to the following conditions:
   - Any such request must be made following release of examination results for the semester or session in which the course was taken and within one month of the official release of grades by the University.
   - The final examination script must be viewed in the presence of the course instructor or other person delegated by the head of the academic unit. Both the instructor and the student have the right to be accompanied by a registered student or a member of the faculty or staff of the University.
   - The final examination script must not be taken away or tampered with in any way.

3. All final examination scripts shall be retained by the academic unit for a minimum of one academic year.

### 6.8.4 Rereading of Final Examination Scripts

1. A student may apply to have a final examination script reread whether or not the student has obtained a passing grade in that course.

2. A student is encouraged to request to access the final examination script prior to submitting a request to have the final examination reread. For further information refer to Access to Final Examination Scripts.

3. A student who wishes to have a final examination script reread must make application in writing to the Office of the Registrar within one month of the official release of grades by the University. When a rereading is requested, the University will make every reasonable attempt to have the rereading conducted by a faculty member(s) other than the original marker(s). Students are advised to refer to relevant academic units for policies and procedures governing rereads of examinations.

4. An appropriate fee per course must be paid at the time of application. For further information refer to Fees and Charges - Reread of Final Examination Fee. If the final letter grade in the course is raised after rereading or if the final numeric grade increases by at least 5%, then the fee is refunded. If the final letter grade in the course is unchanged or lowered, and if the final numeric grade increases by less than 5% or is unchanged or lowered, then the fee is forfeited.
6.9 Grading

6.9.1 Letter Grades, Numeric Grades and Points Per Credit Hour

The academic standing of each student will be based upon the course(s) for which the student was registered as of seven weeks following the first day of lectures in any semester. The final evaluation submitted to the Registrar shall consist of one of the following letter grades with the appropriate numeric grade and points awarded for each credit hour as follows:

<table>
<thead>
<tr>
<th>Letter Grades</th>
<th>Numeric Grades</th>
<th>Points Per Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>80-100%</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>65-79%</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>55-64%</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>50-54%</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>below 50%</td>
<td>0</td>
</tr>
<tr>
<td>PWD (pass with distinction) - indicates excellent performance</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>PAS (pass) - indicates performance meets expectations</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>FAL (fail) - indicates failing performance</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>DEX (drop) – drop without academic prejudice (exceptional circumstances)</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>DR (drop) - drop without academic prejudice</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>ABS (absent) - absent for acceptable cause</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>INC (incomplete) - incomplete pending final grade</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>AEG (aegrotat)</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
<tr>
<td>REX (re-examination)</td>
<td>no numeric grade</td>
<td>not applicable</td>
</tr>
</tbody>
</table>

6.9.2 Descriptions of Letter Grades

- **“A”** indicates excellent performance with clear evidence of:
  - comprehensive knowledge of the subject matter and principles treated in the course,
  - a high degree of originality and independence of thought,
  - a superior ability to organize and analyse ideas, and
  - an outstanding ability to communicate.

- **“B”** indicates good performance with evidence of:
  - substantial knowledge of the subject matter,
  - a moderate degree of originality and independence of thought,
  - a good ability to organize and analyse ideas, and
  - an ability to communicate clearly and fluently.

- **“C”** indicates satisfactory performance with evidence of:
  - an acceptable grasp of the subject matter,
  - some ability to organize and analyse ideas, and
  - an ability to communicate adequately.

- **“D”** indicates minimally acceptable performance with evidence of:
  - rudimentary knowledge of the subject matter,
  - some evidence that organizational and analytical skills have been developed, but with significant weaknesses in some areas, and
  - a significant weakness in the ability to communicate.

- **“F”** indicates failing performance with evidence of:
  - an inadequate knowledge of the subject matter,
  - failure to complete required work,
  - an inability to organize and analyse ideas, and
  - an inability to communicate.

6.9.3 Good Writing

1. Students at all university levels should have reasonably sophisticated and effective communication skills and are expected to demonstrate proficiency in logical organization, clarity of expression and grammatical correctness. Good writing is expected of students in all courses. Upon graduation students should be capable of expressing complicated ideas clearly and concisely and should be able to develop arguments in a logical manner. When, in the judgement of the instructor, a student persistently fails to display a reasonable standard of writing, the instructor may consider this when assigning a final grade.

2. Good writing is characterized by the following qualities:
   - **Content**
     - critical insight and freshness of thought,
     - clear and penetrating ideas,
     - perceptive, pure grasp of subject,
     - intelligent use of primary and secondary sources, and
     - a sense of completeness about the handling of the topic.
   - **Organization**
     - effective introduction and conclusion,
main idea is clear and logical development follows, smooth transitions, and good use of details.

- **Style**
  appropriate, accurate, precise and idiomatic diction, and sentences varied in kind, length and effect.

- **Mechanics**
  consistently correct spelling, accurate use of punctuation, grammatically correct sentences, and well organized paragraphing.

### 6.9.4 Linked Course
1. A linked course is a course comprising two components and is normally identified by the letter “A” or “B” as the last character of the course number. No credits or points are assigned to the “A” part of a linked course. No credits or points are given until the “B” part is completed. Credits and points will be awarded upon successful completion of the B part and will be attributed to the B part only.

### 6.9.5 Incomplete Grades
1. A student who, for extenuating circumstances, is unable to complete the requirements of a course may, with the approval of the appropriate academic unit, be granted a letter grade of incomplete (INC) in the course. This grade shall be valid for only one week following the start of classes in the next academic semester or session as stated in the *University Diary*. In the event that a numeric grade has not been received by the Registrar by this deadline the INC shall be changed to the letter grade F with a numeric grade 0%.

2. A student unable to complete the requirements of a course by the end of one week following the start of classes in the next academic semester or session as stated in the *University Diary*, may be permitted an extension of time not exceeding the last date for examinations in the semester following that in which the student was enrolled in the course. Such an extension may be granted by the head of the appropriate academic unit at the request of the student. In the event that a numeric grade has not been received by the Registrar by this new deadline the INC shall be changed to the letter grade F with a numeric grade 0%. In special circumstances, students registered for a Social Work Internship may be given an extension not exceeding two semesters. Students registered in one of Human Kinetics and Recreation 2210, 2220, 3210, 3220, 4210 or 4220 may be given an extension not exceeding three semesters, by the Academic Council of the School of Human Kinetics and Recreation.

### 6.9.6 Calculation of Averages

Only courses evaluated using final grades with associated numeric grades and points are included in the calculation of all averages. In calculating current averages the grades obtained in the A part of linked courses shall be included, while the grades obtained in foundation courses and work terms shall be excluded. Credit received as a result of transfer credit and challenge for credit are not included in the calculation. These calculations may be expressed as averages or grade point averages.

1. **Current average**: is a method of expressing a student's performance for the semester. The current average is based on final grades. The current average is calculated by computing the sum of the numeric grade in each course multiplied by the course weight and dividing that sum by the total of the course weights.

2. **Cumulative average**: is a method of expressing a student's performance over his or her academic career recorded since the beginning of the 1980-81 academic year. Where any given course, or an equivalent or cross-listed course, is attempted two or more times and is not repeatable, only the best attempt is included in the average. The cumulative average is calculated by computing the sum of the numeric grade in each course multiplied by the credit hour value and dividing that sum by the total number of credit hours attempted.

3. **Current grade point average**: is a method of expressing a student's performance for the semester. The points associated with each letter grade are multiplied by the course weight. The current grade point average is calculated by dividing the total number of grade points earned by the total of the course weights.

4. **Cumulative grade point average**: is a method of expressing a student's performance over his or her academic career recorded since the beginning of the 1980-81 academic year. Where any given course, or an equivalent or cross-listed course, is attempted two or more times and is not repeatable, only the best attempt is included in the average. For each course used in the calculation, the points associated with each letter grade are multiplied by the course credit hour value. The cumulative average is calculated by dividing the total number of points earned by the total number of credit hours attempted.

### 6.9.7 Aegrotat Status
1. Students in their final semester or session before graduation, who have been absent from a final examination where one has been scheduled or who have been prevented from completing the semester’s or session’s work, for reasons which qualify them to write a deferred examination, may, in exceptional circumstances, be given credit for the course on the recommendation of the Senate Committee on Undergraduate Studies.

2. Application for aegrotat status, with full details duly authenticated, must be made to the Registrar, indicating each course for which the application is being made, within one week after the last day of final examinations.

### 6.10 Dean’s and Vice-President’s List

#### 6.10.1 General Information

Memorial University of Newfoundland acknowledges the academic success of its students in various ways. One of these is by naming students to the appropriate dean’s or vice-president's list. Annually, every academic unit will name to its list a maximum of 10% of its students, selected on the basis of academic performance in the nominating period.

#### 6.10.2 Procedure and Criteria
1. At the end of the Winter semester, academic units will nominate students to the appropriate list based on academic performance in the three preceding semesters, Spring, Fall, and Winter.

2. Students on the dean’s and vice-president’s list will be selected based on the following minimum criteria:
6.11 Continuance and Readmission

These regulations will be applied at the end of each semester to any student who is registered in a course load of at least 9 credit hours on the last day for adding courses in a semester or session, including a student who later drops courses and changes status to that of a part-time student.

6.11.1 Eligibility for Continuance

6.11.1.1 Academic Criteria for Continuance in the University

At the end of each semester, in order to be eligible for continuance in the University, a student is required either:

- to obtain a current average of 50% in the courses for which the student is registered on the last day for dropping courses without academic prejudice, or
- to have obtained a cumulative average of at least 55%.

6.11.1.2 Academic Criteria for Continuance in Programs of Study

Most academic units have separate promotion or advancement criteria for continuation of students in specific programs of study. Students are advised to check the regulations of the appropriate academic unit for details. The appropriate committee on undergraduate studies may, at any time, require a student to withdraw for academic reasons.

6.11.1.3 Other

- Students who meet the academic criteria for continuation in the University but who have not registered for courses for three or more consecutive semesters are required to apply for readmission to the University in accordance with the Admission/Readmission to the University (Undergraduate) regulations.
- These regulations notwithstanding, the continuance of any student at this University is subject to all University regulations.

6.11.2 Academic Warning

1. Any student who, for the first time, fails to meet the requirements outlined under Eligibility for Continuance - Academic Criteria for Continuance in the University will be given an academic warning.

2. Certain conditions may be set for students who have been given an academic warning. Any conditions will be set by the head of the appropriate academic unit and will be administered in conjunction with the Registrar. These conditions may include, but are not limited to the following:
   - restrictions on course load,
   - enrollment in courses designed to improve academic competence,
   - involvement with programs designed to enhance success in university studies, such as those which teach time management, study, or similar skills,
   - regular meetings with a faculty advisor.

6.11.3 Ineligibility for Readmission

1. Any student who has previously been given an academic warning and who again fails to meet the requirements, as outlined under Eligibility for Continuance - Academic Criteria for Continuance in the University, at this or another recognized university or college, will not be eligible for readmission to the following two semesters.

2. Any student who has previously been given an academic warning and who fails, for the second time, to meet the requirements, as outlined under Eligibility for Continuance - Academic Criteria for Continuance in the University, at this or another recognized university or college, will not be eligible for readmission to the following three semesters. To be considered for readmission after this period, the student will need the recommendation of the head of the appropriate academic unit, or, in the case of a student with an undeclared program of study, a senior faculty advisor.

3. Any student who fails, for the third time, to meet the requirements, as outlined under Eligibility for Continuance - Academic Criteria for Continuance in the University, at this or another recognized university or college, will not be considered for readmission only on appeal following a period of withdrawal of at least six semesters. This appeal will be considered by the Senate Committee on Undergraduate Studies only on the recommendation of the head of the appropriate academic unit, or, in the case of a student with an undeclared program of study, a senior faculty advisor.

4. In very exceptional circumstances, a student who has been required to withdraw under Eligibility for Continuance - Academic Criteria for Continuance in the University may be permitted to return to the University without serving the full period of dismissal. However, this is possible only once a student has served at least one-half of the required dismissal period. An appeal for readmission will only be considered in the case of health issues, bereavement and/or other acceptable cause, duly authenticated. Requests shall be submitted to the Office of the Registrar no later than June 15 for readmission to Fall semester, October 15 for readmission to Winter semester, and February 15 for readmission to Spring semester.

Requests must include the following information:
- name,
- current address and telephone number,
- Memorial University of Newfoundland email address,
- student ID number,
- semester to which student is seeking readmission
- grounds for the request, and
- supporting documentation.

5. Certain conditions may be set for students who are readmitted after a period of ineligibility. These conditions are outlined under Academic Warning.

6. Academic units reserve the right to deny readmission where a student has been determined to have engaged in unprofessional conduct. The code of ethics of the appropriate profession will serve as the guidelines when making this determination. However, should there not be an appropriate code of ethics, the following standard will apply: unprofessional conduct is that conduct which involves a breach of the duties required by professional ethics.

7. The University reserves the right to deny a student readmission where, in the opinion of the Senate Committee on Undergraduate Studies, following appropriate professional consultation, there is a reasonable likelihood that the student's health or behaviour could endanger the lives, health, or safety of other persons on-campus or off-campus where such a location pertains to University studies. If the University denies a student readmission, the student must be advised of the nature of the case, must be provided with an opportunity to answer the case, and must be advised of the right to appeal before the penalty imposed takes effect. For information regarding the appeal procedure refer to Appeal of Decisions.

8. These regulations notwithstanding, the readmission of any student at this University is subject to all University regulations.

6.12 Academic Misconduct

6.12.1 Principles

Within the University community there is a collective responsibility to maintain a high level of scholarly integrity. A student is expected to adhere to those principles which constitute proper academic conduct. Academic misconduct cannot be condoned or even appear to be condoned. A student has the responsibility to know which actions, as described under Academic Offences, could be construed as dishonest or improper. A student is reminded that for further guidance on proper scholarly behaviour the student should seek advice from the student's instructors and faculty advisors.

6.12.2 General Information

1. These procedures shall apply to all academic offences relating to undergraduate studies involving, but not limited to, those students who either have been or who are enrolled at Memorial University of Newfoundland. Notification of an allegation of academic misconduct will be forwarded to the last known mailing address of the student as noted on the files at the Office of the Registrar, and/or to the official University email address of the student. The University reserves the right to implement action under these procedures where an allegation has been made against a student but where reasonable efforts to contact the student are unsuccessful.

2. Meetings and interviews stipulated in this regulation will be held in person, or at a distance using telephone or other interactive technologies.

3. A student who wishes to attend classes, laboratories or other educational activities while an investigation under these procedures is being carried out, can do so only with the written permission of the academic unit concerned. Permission to do so will only be granted with the understanding that if the allegation of academic misconduct is proven and the penalty involves either suspension or expulsion, credit will not be granted for work completed prior to a finding of guilt. This provision excludes students charged with an offence under the Code of Student Conduct. For information regarding the Code of Student Conduct contact the Office of Student Life.

4. Although a student can continue in a program of studies, if eligible, while an investigation under these procedures is being carried out, the University does not accept liability for any consequences to the student's progress. However, the University may take these consequences into account, as appropriate and to the extent feasible, in cases where charges are dropped or the student is not found guilty. The consequences arising from an investigation and any negative decision rendered may include retroactive effects on grades or promotion within a program.

5. A student accused of academic misconduct may consult advisors or facilitators. Such advisors may include a representative from a Memorial University of Newfoundland student union, an international student advisor, a faculty advisor, a University counselor or a faculty member who is familiar with the regulations and who is willing to undertake the role of advisor whether resolution is sought through Procedures for Resolution of Alleged Academic Offences at the Unit Level or Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies.

6. Where an allegation of academic misconduct relates to research and the Tri-Agency Framework: Responsible Conduct of Research, as amended from time to time, the Framework applies. These procedures shall be applied in a manner consistent with the minimal requirements of the Framework.

7. Where an allegation of academic misconduct relates to research involving United States Public Health Service (USPHS) funds, these procedures shall be applied in a manner consistent with the minimal requirements of the U.S. Office of Research Integrity or other appropriate offices of the U.S. Department of Health and Human Services, including U.S. Federal Regulation 42 CFR Parts 50 and 93, as amended from time to time, and the 'Statement on Dealing with Allegations of Research Misconduct Under USPHS Research-related Activities for Foreign Institutions.'

6.12.3 General Procedure

1. When a member of the University community (faculty, staff, student) has grounds for belief that an academic offence has been committed there should be an attempt between the parties concerned to resolve allegations of minor offences. If the alleged offence is not deemed to be minor by the accuser, or resolution proves impossible, or one party is dissatisfied with the resolution, the matter shall be reported, without delay, to the head of the appropriate academic or administrative unit. If resolution is achieved and it is agreed that an academic offence has been committed, then the offence, together with the penalty applied, shall be reported to the head of the academic or administrative unit.

2. Where resolution is not achieved, and if in the judgment of the head of the academic or administrative unit, the alleged offence warrants resolution at the unit level, the individuals involved will be advised to attempt to resolve the matter through Procedures for Resolution of Alleged Academic Offences at the Unit Level. In the event that no resolution is possible through these procedures between the individual parties, the head of the academic or administrative unit will institute proceedings through the Senate Committee on Undergraduate Studies.

3. If, in the judgment of the head of the academic or administrative unit, the alleged offence against University regulations is such as to warrant resolution through the Senate Committee on Undergraduate Studies, the head of the academic or administrative unit will refer the matter to the Secretary of the Senate Committee on Undergraduate Studies, and Procedures for Resolution of Alleged
Academic Offences by the Senate Committee on Undergraduate Studies will be implemented.

4. In all cases, it is the responsibility of the academic or administrative unit to ensure that fairness and impartiality are achieved in the treatment of students.

6.12.4 Academic Offences

1. In the following section the plural shall be deemed to include the singular.

2. Academic offences shall be deemed to include, but shall not be limited to, the following:
   - **Cheating on examinations or any other tests, theses, assignments, work term reports, projects, laboratory assignments, laboratory reports or internship reports:** This includes copying from another student's work or allowing another student to copy from one's own work; consulting with any unauthorized person during an examination or test; possessing unauthorized aids; using unauthorized aids; or knowingly recording or reporting false empirical or statistical data. The work referred to includes examinations, theses, assignments, work term reports, projects, laboratory assignments, laboratory reports, internship reports, or any other tests which are to be used in judging the student's performance in a course or program of study, or on any special tests which the University may offer.
   - **Impersonating another student or allowing oneself to be impersonated:** This includes the imitation of a student or the entrance into an arrangement with another person to be impersonated for the purposes of taking examinations or tests or carrying out laboratory or other assignments.
   - **Plagiarism:** Plagiarism is the act of presenting the ideas or works of another as one's own. This applies to all material such as essays, laboratory assignments, laboratory reports, work term reports, design projects, seminar presentations, statistical data, computer programs, research results and theses. The properly acknowledged use of sources is an accepted and important part of scholarship. Use of such material without acknowledgment is contrary to accepted norms of academic behaviour. Information regarding acceptable writing practices is available through the Writing Centre at www.mun.ca/writingcentre.
   - **Theft of examination papers or other material:** This includes obtaining by any improper means examination papers, tests, or any other such material.
   - **Use and/or distribution of stolen material:** This includes the use of material which the student knows to have been improperly obtained and/or the distribution of such material.
   - **Submitting false information:** This includes falsifying academic forms or records, submitting false credentials, medical or other certificates, or making a false, misleading or incomplete declaration to the University.
   - **Submitting work for one course or work term which has been or is being submitted for another course or work term at this or any other institution without express permission to do so:** This includes the presentation of an essay, report or assignment to satisfy some or all of the requirements of a course when that essay, report, or assignment has been previously submitted or is concurrently being submitted for another course without the express permission of the professor(s) involved.
   - **Prevention or obstruction of access to works or materials provided by the University needed by others for academic purposes.**
   - **Attempt of bribery, and/or threat of blackmail to influence the award of any credit, grade, honour or academic decisions.**
   - **Failure to follow relevant University/Faculty/School guidelines on ethics.**
   - **Failure to follow the Memorial University of Newfoundland Code.**

6.12.5 Procedures for Resolution of Alleged Academic Offences at the Unit Level

6.12.5.1 General Information

These procedures will not be applied to cases involving alleged offences on final examinations, any other evaluative instruments worth 40% or more of the final grade, allegations of impersonation or allegations of submission of forged documents. Such alleged offences are governed by the Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies.

6.12.5.2 Explanation of Procedures

If, upon receiving a report of an alleged academic offence, the head of the academic or administrative unit decides that an attempt should be made to resolve the matter at the unit level the following procedures shall apply:

1. Normally within one week of notification, the head of the appropriate academic or administrative unit shall request a meeting with the accuser and the accused and at the meeting the head shall state the allegation, review the Procedures for Resolution of Alleged Academic Offences at the Unit Level and the range of applicable penalties, and arrange a second meeting between the accuser and the accused only.

2. At the second meeting the accuser and accused shall endeavour to obtain a mutually satisfactory resolution of the matter.

3. The accuser and accused shall report jointly to the head of the academic or administrative unit on the result of their second meeting.

4. If the report is of a resolution which the head of the academic or administrative unit considers to be fair and equitable the matter shall be considered closed. If the head of the academic or administrative unit considers the reported resolution to be unfair and/or inequitable the head of the academic or administrative unit will endeavour to obtain an alternative satisfactory resolution directly with the parties.

5. Should all reasonable efforts to obtain a resolution at the unit level fail, the head of the academic or administrative unit will refer the case to the Secretary of the Senate Committee on Undergraduate Studies and shall inform the accuser and the accused accordingly. From this stage onward Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies will apply.

6. At any stage of the Procedures for Resolution of Alleged Academic Offences at the Unit Level, the student may ask that his or her case be referred to the Secretary of the Senate Committee on Undergraduate Studies, and thereafter the Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies will apply.

7. Should the accused be found guilty, a brief description of the offence and the penalty(ies) applied shall be forwarded by the head of the academic or administrative unit to the Office of the Registrar.

6.12.5.3 Failure to Appear or Respond

1. If at any stage of the Procedures for Resolution of Alleged Academic Offences at the Unit Level, the accused fails to respond
to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.

2. If at any stage of the Procedures for Resolution of Alleged Academic Offences at the Unit Level, the accuser fails to appear at a scheduled meeting to defend an allegation, without reasonable cause, the action will be dismissed.

6.12.5.4 Penalties in the Case of Resolution at the Unit Level

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining the severity of penalties. The range of penalties and their determination are:

1. **Resubmission**: of work with appropriate reduction in grade: will allow a student to complete and submit the work a second time.

2. **Reprisal**: will be in the nature of a warning by the head of the academic or administrative unit to the student that the student's behavior has been unacceptable to the University.

3. **Reduction of grade**: will apply to an examination, test, or assignment to which an offense is relevant, and will be decided by the head of the academic or administrative unit.

6.12.6 Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies

6.12.6.1 General Information

If the matter cannot be resolved following the Procedures for Resolution of Alleged Academic Offences at the Unit Level, or if, in the opinion of the head of the academic or administrative unit, the allegation involves a major breach of University regulations, or in cases involving alleged offences on final examinations, evaluative instruments worth 40% or more of the final grade, allegations of impersonation or allegations of submission of forged documents, the following Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies shall apply. In the application of these procedures, in the case of students attending Grenfell Campus, the Grenfell Campus Sub-Committee of the Senate Committee on Undergraduate Studies shall assume the role and authority defined below for the Senate Committee on Undergraduate Studies. Should there be an instance where the case cannot be heard by the Senate Committee on Undergraduate Studies or the Grenfell Campus Sub-Committee of the Senate Committee on Undergraduate Studies, but is in the first instance heard by the Senate Committee on Academic Appeals, the Senate Committee on Academic Appeals shall assume the role and authority defined below for the Senate Committee on Undergraduate Studies.

6.12.6.2 Explanation of Procedures

1. If the head of the academic or administrative unit (in the case of departmentalized faculties, the head in consultation with the dean) is satisfied that the student has a serious allegation to answer, that person shall inform the student in writing or at the official University email address of the student, normally within one week, of the nature of the allegation against the student. In addition, the head of the academic or administrative unit shall report to the Secretary, Senate Committee on Undergraduate Studies, c/o Office of the Registrar, who will, normally within one week appoint as an investigator a member of the Senate Committee on Undergraduate Studies other than Committee members from that Faculty or School, student representatives, and ex-officio members of the Senate Committee on Undergraduate Studies. The investigator will interview separately the accuser, the accused and relevant witnesses. At these interviews the investigator, the accuser, the accused and relevant witnesses all have the right to be accompanied by a registered student or a member of the faculty or staff of the University.

2. Upon completion of these interviews, the investigator shall submit a written report of all findings to the Secretary, Senate Committee on Undergraduate Studies, c/o Office of the Registrar. Normally, the report will be submitted within four weeks of appointment as an investigator.

3. The Secretary of the Senate Committee on Undergraduate Studies shall present this report to both the accuser and accused for perusal and comment. Once in receipt of this report, the accuser and accused shall have two weeks in which to submit to the Secretary, Senate Committee on Undergraduate Studies any additional comments on the report that the person wishes to be considered in the deliberations of the Senate Committee on Undergraduate Studies.

4. The Secretary of the Senate Committee on Undergraduate Studies shall present to the Senate Committee on Undergraduate Studies for decision all information received from the investigator as well as comments from the accuser and accused. The investigator shall attend the meeting held to consider the case to answer questions raised by the Senate Committee on Undergraduate Studies and to provide information pertinent to the case, but shall be absent from the voting process.

5. Once a vote is taken, should the accused be found guilty, the Senate Committee on Undergraduate Studies shall take appropriate action in accordance with Penalties in the Case of Resolution by the Senate Committee on Undergraduate Studies.

6.12.6.3 Failure to Appear or Respond

1. If at any stage of the Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.

2. If at any stage of the Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies, the accuser fails to appear at a scheduled interview to defend an allegation, without reasonable cause, the action will be dismissed.

6.12.6.4 Appeals Against Decisions of the Senate Committee on Undergraduate Studies

Appeals against findings of guilt and/or penalties assigned by the Senate Committee on Undergraduate Studies or the Grenfell Campus Sub-Committee can be directed to the Senate Committee on Academic Appeals, c/o The Office of the Registrar in accordance with Appeal of Decisions, The Senate Committee on Academic Appeals.

When considering an appeal against decisions of the Senate Committee on Undergraduate Studies, the Senate Committee on Academic Appeals has the authority to:

- Uphold the decision of the Senate Committee on Undergraduate Studies and, if applicable, the penalty assigned by that Committee.

- Uphold the decision of the Senate Committee on Undergraduate Studies and assign a new penalty, if applicable.

- Reverse the decision of the Senate Committee on Undergraduate Studies and assign a penalty, if applicable.
6.12.6.5 Penalties in the Case of Resolution by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining severity of penalties. Enforcement of penalties resulting from Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies will be overseen by the Registrar. A student who has been found guilty will be issued a Reprimand, which shall be in the nature of a warning to the student that the student’s behavior has been unacceptable to the University. Additionally, a student who has been found guilty will be required to successfully complete specific modules of INTG 100 A/B, Academic Integrity and submit a written reflective evaluation as assigned. In addition to the Reprimand and INTG 100 A/B, the range of penalties and their determination is:

1. **Reprimand:**
   - Of work with appropriate reduction in grade; will allow a student to complete and submit the work a second time.

2. **Reduction of grade:**
   - Will apply to an examination, test, or assignment to which an offence is relevant, or to the entire course, and will be decided by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals.

3. **Rescinding of scholarships, bursaries or other awards:**
   - The recommendation for rescinding of scholarships, bursaries or other awards will be made by the Senate Committee on Undergraduate Studies to the Senate Committee on Scholarships and Awards for a final decision. In the case of a decision by the Senate Committee on Academic Appeals to rescind scholarships, bursaries or other awards, the decision will be forwarded to the Senate Committee on Scholarships and Awards for information. The Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals will notify the student, in writing or by email, of the recommendation or decision.

4. **Probation:**
   - The period of probation will be determined by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals. The impact of being placed on probation is that the commission of any further academic offence during the period of probation may lead to suspension or expulsion.

5. **Suspension:**
   - Will apply to a course, department, faculty, school, or the University. The period of suspension will be determined by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals and shall not exceed six consecutive semesters.

6. **Expulsion:**
   - The recommendation for expulsion from the University will be made by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals to the President of the University for a final decision. Prior to the President’s decision, the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals will notify the accused, in writing or by email, of the recommendation for expulsion from the University. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the President’s final decision concerning expulsion from the University. If the penalty was assigned by the Senate Committee on Undergraduate Studies, any such appeal should be made in writing or by email to the Senate Committee on Academic Appeals, c/o the Office of the Registrar. If the penalty was assigned by the Senate Committee on Academic Appeals, any such appeal should be made in writing or by email to the Executive Committee of Senate, c/o the Office of the Registrar.

7. **Rescinding of degree:**
   - The recommendation for the rescinding of a degree previously awarded by the University will be made by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals to Senate for a final decision. Prior to Senate’s decision the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals will notify the accused, in writing, of the recommendation for rescinding of the degree. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the Senate’s final decision concerning the rescinding of the degree. If the penalty was assigned by the Senate Committee on Undergraduate Studies, any such appeal should be made in writing or by email to the Senate Committee on Academic Appeals, c/o the Office of the Registrar. If the penalty was assigned by the Senate Committee on Academic Appeals, any such appeal should be made in writing to the Executive Committee of Senate, c/o the Office of the Registrar.

### 6.12.7 Transcript Entries Related to Penalties

1. Transcript entries shall relate to the penalty(ies) imposed as follows:

<table>
<thead>
<tr>
<th>Penalty</th>
<th>Transcript Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reprimand</td>
<td>No transcript entry</td>
</tr>
<tr>
<td>Reduction of Grade</td>
<td>Entry of final grade for course</td>
</tr>
<tr>
<td>Probation</td>
<td>&quot;On probation at the University for academic misconduct until [Day, Month, Year]&quot;</td>
</tr>
<tr>
<td>Suspension</td>
<td>&quot;Suspended from the University/Faculty/School/Program/Course for academic misconduct until [Day, Month, Year]&quot;</td>
</tr>
<tr>
<td>Expulsion</td>
<td>&quot;Expelled from the University for academic misconduct effective [Day, Month, Year]&quot;</td>
</tr>
<tr>
<td>Rescinding of Degree</td>
<td>&quot;Degree rescinded for academic misconduct&quot;</td>
</tr>
</tbody>
</table>

2. The transcript entries for "probation" or "suspension" will be removed entirely upon the expiration of the penalty.

### 6.12.8 Disposition of Documentation

1. The disposition of documents relating to allegations under these procedures shall be as follows:
   - In cases where the accused was not found guilty, none of the documentation shall be retained.
   - In the case of a resolution effected through Academic Misconduct - General Procedure or Procedures for Resolution of Alleged Academic Offences at the Unit Level, a brief description of the offence and the penalty(ies) applied shall be forwarded by the head of the academic or administrative unit to and retained by the Office of the Registrar, separate from the student files.
   - In the case of a resolution effected through the Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies, all documentation shall be forwarded to and retained in the Office of the Registrar, separate from the student files.
6.13 Graduation

6.13.1 Application for Graduation - Degrees, Diplomas and Certificates
Students in their graduating year must apply to the Registrar to be admitted to a degree or to be awarded a diploma or certificate. Application must be made through the Student Web/Self-Service at www.mun.ca/regoff. The deadlines for application are listed in the University Diary for the Spring and Fall convocations.

1. No student can be awarded a degree, diploma or certificate unless and until an average of at least 2 points has been obtained on the total number of credit hours required for such degree, diploma or certificate. The degree of Doctor of Medicine is not included in this requirement since all courses comprising the degree are graded on a PAS or FAL basis.

2. It is the duty of the Registrar to certify to the Senate, where appropriate, that students for degrees, diplomas and certificates have met all the regulations and requirements of the University.

6.13.2 Classification of General Degrees
1. General degrees are awarded as “Classified”, “Unclassified” or are not classified, in compliance with such regulations as may be required by the academic unit(s) offering the program(s). Refer to the degree regulations of the academic units for further information.

2. General degrees are awarded in three classes based on the system for granting points set forth in Grading - Letter Grades, Numeric Grades and Points Per Credit Hour, and determined as follows:
   • A student who fails to obtain First-Class Standing but who obtains an average of 2.75 points or better on the total number of credit hours required for the degree shall be awarded the degree with Second-Class Standing provided that all other degree requirements are met.
   • A student who fails to obtain First-Class Standing but who obtains an average of 2 points or better on the total number of credit hours required for the degree shall be awarded the degree with Third-Class Standing provided that all other degree requirements are met.
   • All other students will be awarded the degree with Third-Class Standing, provided that they obtain an average of 2 points or better on the total number of credit hours required for the degree and provided that all other degree requirements are met.

3. When a student obtains credit for more credit hours than are required for the degree, his or her total degree points shall include only those received for the credit hours required. In eliminating from the total points those received for credit hours beyond the requirements of the degree, the credit hour(s) for which the student receives the fewest points shall be disregarded, provided that no credit hour is disregarded that is a requisite for the degree.

4. Where a student receives more than one classified bachelor's degree, the class of each degree will be determined independently by applying the scheme set forth in Classification of General Degrees and provided that in determining the points total for each degree only those credit hours may be counted which are applicable towards the degree concerned.

5. A student who has been granted credit for courses completed at Memorial University of Newfoundland before the introduction of the point system, and/or one who has been given credit for courses completed at another university, will have the class of his or her degree determined by applying the scheme set forth in Classification of General Degrees in proportion to the total of required credit hours completed at Memorial University of Newfoundland since the introduction of the point system.

6. An Unclassified degree will be awarded to a student who has completed at Memorial University of Newfoundland, fewer than one-half of the credit hours required for the degree, or fewer than one-half of the required credit hours since the introduction of the point system. All students shall, however, obtain an average of 2 points or better on the total number of credit hours required for the degree taken at this University since the introduction of the point system.

7. The following degrees are not classified: Bachelor of Education (Intermediate/Secondary), Bachelor of Engineering, Bachelor of Maritime Studies, Bachelor of Music Education, Bachelor of Post-Secondary Education (as a second degree), Bachelor of Science (Pharmacy), Bachelor of Special Education, Bachelor of Technology, Doctor of Medicine, Doctor of Pharmacy, and all degrees offered by the School of Human Kinetics and Recreation.

6.13.3 Classification of Honours Degrees
1. Honours degrees may be classified or not classified in compliance with such regulations as may be required by the academic unit offering the program. Refer to the appropriate degree regulations of the academic units for further information.

2. A student who has been granted credit for courses completed at Memorial University of Newfoundland before the introduction of the point system, and/or one who has been given credit for courses completed at another university, will have the class of his or her honours degree determined in proportion to the total number of required credit hours completed at Memorial University of Newfoundland since the introduction of the point system.

3. An honours degree awarded a student who has completed at Memorial University of Newfoundland, fewer than one-half of the credit hours required for the degree, or fewer than one-half of the required credit hours since the introduction of the point system, may be Unclassified or not classified.

6.13.4 Diplomas and Certificates
1. Diplomas and certificates are not classified.

6.14 Waiver of Regulations
1. All undergraduate regulations notwithstanding, the University reserves the right, in special circumstances, to modify, alter or waive any regulation in its application to individual students where, in the judgment of the head of the appropriate academic unit or the appropriate committee, merit and equity so warrant. In keeping with the principle that decisions to waive regulations should be made as close as possible to the University officer or committee with responsibility for the regulations, requests for waivers, which normally must be made in writing, must be directed as follows:
   • Course Prerequisites or Co-requisites: the head of the academic unit of the course(s) in question.
   • Departmental Regulations: the appropriate committee on undergraduate studies upon the recommendation of the head of the appropriate department.
   • Faculty or School Regulations: the appropriate committee on undergraduate studies. Such waivers shall not reduce the total number of credit hours required for a minor, major, certificate, diploma, or degree program.
   • General Academic Regulations (Undergraduate): the Senate Committee on Undergraduate Studies on the recommendation of
the appropriate committee on undergraduate studies. Such waivers shall not reduce the total number of credit hours required for a minor, major, certificate, diploma, or degree program.

- Scholarships, Bursaries, Awards, Medals and Prizes Regulations: the Committee on Undergraduate Scholarships, Bursaries and Awards on the recommendation or request of the head of the appropriate academic unit.

2. Any student whose request for waiver of regulations has been denied has the right to appeal. With the exception of verbal requests for waiver of Course Prerequisites or Co-requisites, the student will be advised in writing of the reasons for the decision and of the avenue of appeal that may be taken. For information regarding the appeal procedure refer to Appeal of Decisions.

6.15 Appeal of Decisions

6.15.1 General Information

1. Every student has the right to appeal decisions resulting from the application of University regulations.

2. Appeals will be considered in the case of health issues, bereavement and/or other acceptable cause, duly authenticated.

3. For assistance in the appeals process, a student is advised to consult with the Office of the Registrar.

4. In preparing an appeal a student may consult advisors. Such advisors may include a representative from a Memorial University of Newfoundland student union, an international student advisor, a faculty advisor, a counsellor or a faculty member who is familiar with the appeals process and who is willing to undertake the role of student advisor or facilitator.

5. Appeals are made before specific committees that exist at the University to provide an objective review of cases. The appeals process is designed to assist a student at critical points in the student's university career, and to provide an accessible and transparent process for a student. A student should refer also to the Routes of Appeal of Academic Regulations below for information concerning where appeals should be directed.

6. The principles of natural justice shall be applied to the appeals processes and decisions. These principles include, but are not limited to, such practices as all parties to the appeal receiving timely and adequate notice, all parties to the appeal having the opportunity to submit arguments and supporting documentation and all parties to the appeal being made aware of the evidence considered by the committee. No person shall sit in judgment on an appeal if that person has been previously involved in a decision-making process related to the matter under appeal or if that person has any conflict of interest, bias or reasonable apprehension of bias.

7. While the University makes provision for a student to appeal decisions made under University regulations, the academic, financial or other consequences of the appeals process rests with the student.

8. When an appeal is denied, the student shall be advised in writing of the reasons for the decision and if there are further steps that can be taken in the appeals process.

9. A student whose appeal is denied by the Senate Committee on Undergraduate Studies may appeal to the Senate Committee on Academic Appeals. Academic units whose decisions are overturned by the Senate Committee on Undergraduate Studies may appeal to the Senate Committee on Academic Appeals. Decisions of the Senate Committee on Academic Appeals are final and within the University there is no further appeal.

10. Unless the student bringing the appeal requests otherwise, student appeals are heard anonymously by all committees except the Senate Committee on Academic Appeals.

6.15.2 Routes of Appeal of Academic Regulations

1. Normally, the responsibility for making an appeal before the appropriate committee of the University rests with the student.

2. A student who is ineligible to register for courses officially but who wishes to attend classes, laboratories or other educational activities while an appeal is in progress can do so only with the written permission of the academic units offering the courses. Such permission shall not be unreasonably withheld.

3. A student whose request for waiver of regulations has been denied may direct the appeal as described below.

- Course prerequisites or co-requisites: to the appropriate faculty/school committee on undergraduate studies. No further appeal is possible;
- Applications to write Deferred Final Examinations: to the appropriate faculty/school committee on undergraduate studies;
- Program Regulations: to the Senate Committee on Undergraduate Studies, c/o The Office of the Registrar, where the appropriate committee on undergraduate studies denies the request for waiver;
- General Academic Regulations (Undergraduate): to the Senate Committee on Academic Appeals, c/o The Office of the Registrar;
- Decisions of the Senate Committee on Undergraduate Studies: to the Senate Committee on Academic Appeals, c/o The Office of the Registrar;
- Scholarships, Bursaries, Awards, Medals and Prizes Regulations: to the Senate Committee on Academic Appeals, c/o The Office of the Registrar; and
- Decisions of a Faculty/School under Regulations for Readmission and Advancement, 7. of the Faculty of Education; Promotion Regulations, Other Information, bullet four of the School of Human Kinetics and Recreation; Regulations for the Degree of Doctor of Medicine, Promotion, 6. of the Faculty of Medicine; Promotion Regulations, 6. of the School of Nursing; Promotion Regulations, Other Information of the School of Pharmacy; or Academic Requirements and Promotion Regulations, Promotion Status, Other Information, 1., bullet three of the School of Social Work: to the Senate Committee on Academic Appeals, c/o The Office of the Registrar.

6.15.3 Route for Questioning Grades

1. Grades awarded in individual courses cannot be appealed, as the student shall normally have had the opportunity to contest grades immediately after the release of examination results (see Access to Final Examination Scripts and Rereading of Final Examination Scripts). Dissatisfaction with grades is not sufficient grounds for an appeal.

2. Notwithstanding the above, and recognizing that the awarding of grades is an academic matter within the purview of experts in a discipline or subject area, a student who wishes to question the grades awarded in individual courses may consult with the following in the order given:

- the course instructor
- the head of the appropriate academic unit
- the Dean of the appropriate Faculty/School, Associate Vice-President (Academic) of the Grenfell Campus or Vice-President of
6.15.4 Information Required in Letters of Appeal

1. Except in the case of appeals to the Senate Committee on Academic Appeals, appeals must be made in writing, clearly stating the basis for the appeal, and must be directed to the secretary of the appropriate University committee.

2. In the letter of appeal, the student must clearly and fully provide:
   - name,
   - current address and telephone number,
   - Memorial University of Newfoundland e-mail address,
   - student ID number,
   - the decision being appealed,
   - the grounds of appeal, and
   - the resolution being sought.

3. When providing grounds for the appeal, including health issues, bereavement and/or other acceptable cause, a student must present independent evidence to corroborate statements made in the letter of appeal. Preferably, this evidence will come from a professional, such as a health professional, a counsellor, or a professor. However, certificates from other knowledgeable parties may be acceptable.

4. A student shall include with the letter of appeal any submissions the student wishes to make in support of the appeal.

5. In cases where an appeal is based on health issues, the student must produce an original certificate from a health professional in the form of a note or letter. Such a certificate must be sufficiently specific to allow appropriate consideration of the student’s case. The certificate must also clearly state that, in the opinion of the health professional, the problem was serious enough to have interfered with the student's work. A student should refer to the section below, Information Required in Certificates from Health Professionals, for more complete information.

6. A student claiming bereavement as grounds must provide an obituary notice or death certificate, together with evidence of a close personal relationship between the student and the deceased.

7. Privacy and Confidentiality: The committees to which appeals are made do require substantial information about the reasons for the appeals in order to make their decisions. However, the committees also recognize each student's right to privacy and its obligations, under the Access to Information and Protection of Privacy Act, to safeguard a student's personal information.

6.15.5 The Senate Committee on Academic Appeals

1. Appeals shall be initiated by submitting a written Notice of Appeal, c/o The Office of the Registrar, containing the following:
   - name,
   - current address and telephone number,
   - Memorial University of Newfoundland e-mail address,
   - student ID number,
   - a copy of the decision giving rise to the appeal,
   - supporting documentation,
   - a description of the matter under appeal,
   - the grounds of appeal, and
   - the resolution being sought.

   When the Notice of Appeal is from an academic unit:
   - name of the Head of the academic unit,
   - Memorial University of Newfoundland e-mail address,
   - a copy of the decision giving rise to the appeal,
   - supporting documentation,
   - a description of the matter under appeal,
   - the grounds of appeal, and
   - the resolution being sought.

2. The Notice of Appeal should include, in writing, relevant information in support of the appeal.

3. Except with the approval of the Executive Committee of Senate, notices of appeal shall be submitted no later than the last day of classes in the semester following the semester in which the decision under appeal was sent to the student.

4. In accordance with the principles of natural justice, students and academic units are entitled to make an oral presentation.

5. Appeals shall be heard either through written submission only or through an oral presentation, as requested. No inferences shall be drawn from the choice.

6. When an appeal is heard by an oral presentation, a student may be accompanied by an advisor (see Appeal of Decisions, General Information, 4.). A student may participate in person, or at the expense of the University, by way of teleconference, or by such other means approved in advance by the Committee; however, any expenses incurred by the student are the responsibility of the student.

7. Decisions of the Senate Committee on Academic Appeals are final and within the University there is no further appeal.

6.15.6 Information Required in Certificates from Health Professionals

1. A student who requests permission to drop courses; to withdraw from University studies; to have examinations deferred or to obtain other waivers of University, departmental or course regulations based on health issues is required by the University to provide, in support of the request, a certificate from a health professional in the form of a note or letter. Such certificates must be sufficiently specific to allow a proper consideration of a student's case. The University requires that all such certificates must be on letterhead, must be signed by the health professional, must confirm the specific dates on which the student visited the health professional and should include details on the following:
the degree to which the health issue (or treatment, in the case of medication, for example) is likely to have affected the student's ability to study, attend classes, or sit examinations;

- the length of time over which the student's abilities were likely hampered by the condition (e.g., recurring and severe back pain over a two-month period would likely have a more adverse effect on studies than a single episode of back pain requiring bed rest for a week);

- the fitness of the student to resume studies (it is in the student's best interest not to return to studies prematurely).

2. The University respects the privacy of students and will keep confidential all such certificates. A student should request that the health professional retain a copy of such a certificate in case the certificate needs to be verified or reissued at a later date.

7 Certificate Programs

Certificate courses are specially designed courses relating to specific areas of study for which no equivalent degree credit course exists and are not applicable towards an existing diploma or degree program.

A student is required to meet UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate) for entry to Memorial University of Newfoundland.

A student may receive up to three exemptions for equivalent course work completed through another program or at another institution. If a student has previously obtained credit from Memorial University of Newfoundland for any of the courses on a certificate program, the student will not be required to repeat these courses. To receive exemptions for certificate credit courses, a student must make a written request with supporting documents (transcripts and course descriptions).

7.1 Admission Requirements

A student who wishes to complete certificate programs must be admitted to the University as an undergraduate student and comply with the General Academic Regulations (Undergraduate).

7.2 Regulations for a First Certificate

A Memorial University of Newfoundland certificate is awarded to a student who completes certificate program requirements.

1. Every candidate for a certificate shall comply with all the course requirements governing the award of that certificate.

2. Candidates shall complete at this University a minimum of 9 credit hours of the total number of credit hours required for a certificate.

3. No candidate will be awarded a certificate unless an average of 2 points or better on the total number of credit hours required for the certificate has been obtained.

7.3 Regulations for a Second Certificate

A student who has completed a certificate program and wishes to complete a second certificate must:

1. comply with all course requirements governing the award of that certificate; and

2. complete at least 9 credit hours beyond those required for the first certificate. The courses which comprise these credit hours must be applicable to the certificate sought.

8 Non-Academic Regulations

8.1 Discipline

The President may use all means deemed necessary for maintaining discipline. Students found guilty of misbehaviour may be suspended or fined on the authority of the President, or expelled from the University by the President on the authority of the Board of Regents. (See the Code of Student Conduct)

8.1.1 Traffic and Parking Regulations On Campus

Students, employees, service personnel, and other persons having a direct association with the University, Health Sciences Centre, or the Fisheries and Marine Institute wishing to park a vehicle in a designated area on campus must obtain a parking permit. Traffic and parking regulations on campus are enforced by Campus Enforcement and Patrol assisted by the Royal Newfoundland Constabulary.

Application forms for vehicle parking permits, copies of the Traffic and Parking Rules and Regulations, and other information pertaining to traffic and parking on campus, are available at the Campus Enforcement and Patrol Office, Facilities Management Building, Room FM1018, or the Health Sciences Centre, Room H2720, or the Fisheries and Marine Institute, Room C2210. Additional information regarding the Traffic and Parking Rules and Regulations is also available at www.mun.ca/cep/parking.

8.2 Firearms on Campus

Memorial University of Newfoundland prohibits firearms in classrooms on its campuses.
1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University's commitment to maintaining the highest standards of academic integrity.
2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offenses, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

3 Faculty Description

The Faculty of Business Administration is known for innovative, high-quality academic programs, basic and applied research, and responsive community outreach activities, including those provided by the Gardiner Centre. The faculty prepares students to succeed in a competitive work place. Each business program is designed to give students the skills and experience needed to advance their careers. The faculty’s close-knit community provides students with many opportunities to get involved and network with fellow classmates.

Additional information regarding the Faculty of Business Administration is available at www.business.mun.ca. Information about the Gardiner Centre is available at www.busi.mun.ca/gardinercentre.

Students must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to UNIVERSITY REGULATIONS.

3.1 Faculty History

In 1954, the University approved a bachelor of commerce undergraduate degree. Over the next two decades, the Department grew substantially in the size of its student enrolment and program offerings. In 1973, it was renamed the School of Business Administration and Commerce, and the University established the first co-operative undergraduate business program in Canada. In 1981 the School was granted faculty status, reflecting the growth and diversity of its academic programs.

In 2002, the Faculty of Business Administration became the first in Atlantic Canada to be accredited by AACSB International—the Association to Advance Collegiate Schools of Business. AACSB International is one of higher education’s most prestigious and rigorous accrediting bodies, stressing academic excellence and dedication to continuous improvement. This accreditation is the highest distinction offered to business schools both nationally and internationally.

3.2 Academic and Professional Ethics

The Faculty of Business Administration expects its students to adhere to the highest standards of academic and professional integrity. The Faculty has created a Statement and Code of Academic and Professional Integrity, which is posted prominently in the Faculty of Business Administration Building and is distributed annually to all students in the Faculty. The Statement and Code of Academic and Professional Integrity provides guidance and prescriptive standards.

Academic integrity allows students to express their own thoughts, opinions, and values while pursuing academic excellence and striving to achieve their own personal best. It means that they will take responsibility for their learning values, and pursue academic goals with honesty and enthusiasm. Academic integrity refers to submitting/presenting work for credit that represents only the student’s/students’ own work unless otherwise properly acknowledged, documented, and previously authorized by the instructor. This work includes, but is not limited to, exams, assignments, quizzes, individual or group projects or assignments, oral presentations, and work term reports.

Professional integrity requires students to act with honesty, demonstrate accountability, engage in respectful collaboration, and support a culture of inclusiveness and respect. When students are participating in University activities, they shall do so with professional integrity and shall consistently apply the knowledge, skills, and values expressed in the Student Code of Conduct.

UNIVERSITY REGULATIONS, Academic Misconduct - Academic Offenses outlines Academic Offenses. The following are examples of offenses that contravene the Faculty of Business Administration’s guidelines on ethics (Statement and Code of Academic and Professional Integrity) and will be resolved in accordance with UNIVERSITY REGULATIONS, Academic Misconduct:

- including a student’s name or allowing one’s own name to be included on the list of contributors to a group project without having contributed to that work;
- altering a piece of work after it has been graded and submitting it for re-grading;
- taking another’s examinations, assignments, or solutions to examinations or assignments without the owner’s permission; and
- using or divulging confidential information obtained during research or while on Work Terms and/or making use of inappropriately divulged confidential information.

Students in the Faculty of Business Administration are subject to the Student Code of Conduct in all Faculty- or University-related activities including: work terms, exchanges, and case and other competitions. Violations of this standard of professional integrity will be resolved in accordance with the Student Code of Conduct.

3.3 Vision Statement

Our Vision is to enhance our reputation as a leading business school with an international presence and national and provincial relevance.

3.4 Mission Statement

Our Mission is to prepare our students for global success, to engage in scholarship with global reach and local relevance, and to serve as a catalyst for the success of organizations and individuals. In this way we fulfill our special obligation to the people of Newfoundland and Labrador.

1. We provide comprehensive business education that combines theory and practice, inspiring students to become successful and valued members of their professions and communities.
2. We conduct and disseminate high quality basic and applied research that informs understanding of the core disciplines of business and management and enhances organizational practice.
3. We engage with our community to share expertise, advance and apply business knowledge, and develop and deliver best practices.
4 Description of Programs

Students must meet all regulations of the Faculty of Business Administration in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to UNIVERSITY REGULATIONS.

All courses of the Faculty are designated by BUSI.

4.1 Undergraduate Programs

The following undergraduate programs are available:

1. **Minor in Business Administration**: is comprised of eight business courses (24 credit hours) and is available to students who are completing non-Business degree programs which provide for the completion of a minor.

2. **Minor in International Business**: is comprised of eight business courses (24 credit hours) and is available to students who are completing non-Business degree programs which provide for the completion of a minor.

3. **Certificate in Business Administration**: is comprised of 10 courses (30 credit hours) and is designed to meet the needs of individuals who hold full- or part-time employment and wish to complement their work experience with preparation for future opportunities. This certificate may be completed full-time or part-time.

4. **Diploma in Business Administration**: is a 20-course (60 credit hour) program designed to meet the needs of individuals who hold full- or part-time employment and wish to complement their work experience with theoretical business education. This program may be completed in-class, via distance education, or a combination of both.

5. **Bachelor of Commerce (Co-operative)**: is a full-time, 45-course (135 credit hour) program with a structured format. This five-year degree includes three four-month work terms. Students have the opportunity to concentrate in accounting, finance, human resource and labour relations, information systems, international business, marketing, operational research, resource-based industries management, small business/entrepreneurship, or supply chain management.

6. **Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts**: is comprised of 50-courses (150 credit hours), Students in the Bachelor of Commerce (Co-operative) program may simultaneously complete the requirements for a Bachelor of Arts program. Some degree requirements are modified for students pursuing joint degrees.

7. **Bachelor of Commerce (Co-operative) (Honours)**: signifies superior academic achievement.

8. **Bachelor of Business Administration (B.B.A.)**: is a 40-course (120 credit hour) general business program with a flexible course structure. This four-year degree may be completed in-class, via distance education, or a combination of both. It can be completed full- or part-time.

9. **Bachelor of Business Administration (Honours)**: signifies superior academic achievement.

10. **International Bachelor of Business Administration (i.B.B.A.)**: is comprised of 40 courses (120 credit hours) and is designed to produce business professionals with a global perspective. This four year degree differs from traditional business programs in its requirements that graduates must complement the usual set of business skills with an understanding of the international environment, cross-cultural skills, and experience relevant to a particular global region (e.g., Asia, Europe or Latin America).

11. **International Bachelor of Business Administration (i.B.B.A.) (Honours)**: signifies superior academic achievement.

Upon meeting the qualifications for any of the above-noted programs students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

4.1.1 Business Co-operative Education

General management of the work terms in the Co-operative Program is the responsibility of Business Co-operative Education. Through its co-ordinators, it is responsible for assisting potential employers to become involved in the program, for the continual development of employment opportunities, for arranging student-employer interviews, for counselling of students, for visiting students on their work assignments and for the evaluation of the work term.

Students and employers choose each other through the job competition process. Job advertisements are posted and students may apply for up to twelve positions. Employers interview students, and both the students and employers express their preferences for one another.

Students are then placed by Business Co-operative Education to reflect expressed preferences. Placement is not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of students who are required to withdraw from the program, Business Co-operative Education has no responsibility for placement until they have been readmitted to the program.

Salaries paid to co-operative students are determined by employers based upon their internal wage structures, and tend to increase as the student progresses through the program and assumes more responsibility. However, students should not expect the income from work terms to make them completely self-supporting.

Students in the Co-operative Program give permission to prospective employers, in the course of the placement process, to have access to their records, which contain their academic marks and their work term evaluations. After accepting a position, students may not withdraw from a specific job situation unless prior permission is obtained from the Committee on Undergraduate Studies.

4.2 Graduate Programs

Programs leading to the Master of Business Administration (M.B.A.), the Master of Employment Relations (MER), and the Ph.D.(Management) degrees are described in the School of Graduate Studies section of the University Calendar.

5 Program Regulations

1. The Office of the Registrar and the Faculty of Business Administration will assist students with any questions or problems which might arise concerning the interpretation of academic regulations. It is, however, the responsibility of students to see that their academic programs meet the University's regulations in all respects.

2. No student shall obtain more than one undergraduate degree from the Faculty of Business Administration.

3. The Faculty of Business Administration may recommend that transfer credit for certain Business courses be awarded on the basis of successful completion of professional courses that lead to a profession designation (e.g. C.A., C.G.A., C.M.A.). Applications for transfer credit should be made through the Office of the Registrar.

4. The Faculty of Business Administration may approve that credit for certain Business courses successfully completed through
Memorial University of Newfoundland's former Extension Services Division be granted upon application to the Registrar for transfer credit evaluation.

5.1 Regulations for Business Minors

1. Students who are completing a non-Business degree program which provides for the completion of a minor may complete a minor in either Business Administration or International Business.

2. Students who wish to undertake either Business minor program must have completed a minimum of 30 credit hours. Application is made in the space provided on the Declaration/Change of Academic Program Form which must then be approved by the Dean of the Faculty of Business Administration or delegate. The form may be obtained in person at the Office of the Registrar or at www.mun.ca/regoff/registration/Declare_Change_Academic_Program.pdf. Admission into the minor program is selective: at the time of application a student must have a cumulative average of at least 65%.

3. A Minor in Business Administration shall consist of 24 credit hours comprising the following courses: BUSI 1000, 1101, 1210, 3310, 4000, 4500, and two courses chosen from BUSI 1600, 2101, 2210, 3700, 4320 and 4330.

4. A Minor in International Business is offered as a special program of an interdisciplinary nature, consisting of 24 credit hours as follows:
   a. BUSI 1101, 1210, 3310, 5302, Political Science 2200; and
   b. Three further courses from 6040, 6311, 6330, 7005, 6550, 7240, a pre-requisite for one of the preceding courses and/or from cognate courses such as Economics 3030, 4030, Political Science 3210, and 3250, to be chosen through prior consultation with the Coordinator of the International Business program.

5. Course prerequisites for all courses shall apply to both Business minors. Students should note, for example, that the prerequisites for BUSI 4500 are BUSI 1101, Statistics 2500 and Economics 1010 (or the former 2010), and that the prerequisites for BUSI 5302 are BUSI 1000, Economics 1010 (or the former 2010), Economics 1020 (or the former 2020). It should be noted that some courses are not offered every semester.

5.2 Regulations for General Degree of Bachelor of Commerce (Co-operative)

The application for admission or readmission to programs offered by the Faculty of Business Administration is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www.mun.ca/undergrad/apply. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

5.2.1 Admission Modes and Requirements

5.2.1.1 Direct Entry (for High School Students)

Students may apply for admission into first year of the Bachelor of Commerce (Co-operative) program (Terms A/B) directly from high school. Applicants should follow the application instructions at www.mun.ca/undergrad/apply. Terms A/B normally starts in September. Direct entry from high school is subject to the applicant's final acceptance to the University and admissibility into Mathematics 1000, 1090 or 109A/B.

5.2.1.2 Advanced Standing (for Current Memorial University of Newfoundland Students)

1. Students may apply for admission with Advanced Standing into academic terms beyond Terms A/B up to and including Term 4. Students applying for admission to a term beyond Terms A/B must have completed all of the academic courses required in the program up to that term, including the academic courses required in Terms A/B, with grades at least as high as those required to meet promotion requirements. Students applying for admission with advanced standing must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin, normally on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program.

2. Students admitted with advanced standing into Term 4 must complete Business 300W during Term 4, Work Term 1 following Term 4, Work Term 2 following Term 5, and Work Term 3 following Term 7.

3. Admission with Advanced Standing is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce (Co-operative) program.

4. The primary criterion used in reaching decisions on applications for admission with advanced standing is overall academic achievement. Since the Bachelor of Commerce (Co-operative) program is full-time and continuous, the Admissions Committee will review the applicant's transcript for evidence that the applicant has the ability to complete 15-credit hour course loads and achieve grades at least as high as those required to meet promotion requirements on those course loads. Applicants whose transcripts do not demonstrate this ability or whose overall academic records are weak are unlikely to be admitted.

5.2.1.3 Transfers From Other Post-Secondary Institutions

Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. Subject to items 2. and 3. under Advanced Standing (for Current Memorial University of Newfoundland Students) above, transfer students from other universities will be placed in that Term of the program judged by the Admissions Committee of the Faculty to be appropriate considering equivalent credits. Regardless of the Term into which they are admitted, transfer students must complete a minimum of two work terms.

5.2.2 The Curriculum

1. To graduate with the Bachelor of Commerce (Co-operative) degree, every candidate shall successfully complete 135 credit hours over nine academic terms in the Co-operative Program and shall normally be required to successfully complete three work terms. The 135 academic credit hours are distributed as follows: 30 credit hours over the course of Terms A/B and 15 credit hours in each of Terms 1 through 7.

2. Students who have been admitted to the Bachelor of Commerce (Co-operative) program must complete courses in academic terms or “blocks” in the sequence, order and course load as set out in the Table 1 Bachelor of Commerce (Co-operative) Curriculum. Exceptions to this prescribed program, including specified course load, must have the approval of the Admissions Committee or of the Committee on Undergraduate Studies of the Faculty.

3. By the end of the Winter semester of their first year, Terms A/B students must have successfully completed the following 30 credit hours:
a. Six credit hours in English courses which must include English 1110 or 1021;
b. Mathematics 1000;
c. Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020);
d. BUSI 1000;
e. Twelve additional credit hours in non-Business electives. Students who wish to complete the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts [see entry immediately following The Curriculum below] are strongly advised to include courses in a second language and courses in the subject of the intended Major program.

4. The curriculum of courses and work terms beyond the 30 credit hours required in Terms A/B is as follows:
   a. Statistics 2500
   b. Fifty-four credit hours in core Business Administration courses: 1101, 1210, 1600, 2010, 2101, 2210, 2400, 2710, 3310, 3401, 3700, 4000, 4050, 4320, 4330, 4500, 5301, and 7000.
   c. At least 21 credit hours but no more than 36 credit hours in Business electives which must be chosen from Table 3 Business Electives.
   d. At least 12 credit hours but no more than 27 credit hours in non-Business electives.
   e. Three work terms of four months duration each.

Unspecified credits may not be used to fulfill the requirements outlined in a., b., and e. above.

5. Notwithstanding clauses 2. and 4. and bullet three of UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Classification of Students, students do not require special permission to register for courses while on work terms if the courses are in addition to the prescribed program.

12 credit hours in elective courses* |
| **Winter Academic Term 7** | 15 credit hours in elective courses* |

* Of the 48 credit hours in elective courses required in the program from Terms 1 through 7, 21 – 36 credit hours must be chosen from Business electives in Table 3 Business Electives and 12 – 27 credit hours must be non-Business electives.
5.2.3 Regulations for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts

Any student who is admitted into the Bachelor of Commerce (Co-operative) program may simultaneously complete the requirements for a Bachelor of Arts program. Under those circumstances, regulations for the Bachelor of Commerce (Co-operative) program will be relaxed as follows. Notwithstanding clauses 4.c. and 4.d. of The Curriculum under the Regulations for the General Degree of Bachelor of Commerce (Co-operative), students in the Bachelor of Commerce (Co-operative) program who are concurrently completing the Bachelor of Arts degree will be permitted to make the following adjustments to those clauses:

1. clause 4.c. - no fewer than 15 credit hours, but no more than 36 credit hours, in Business electives which must be chosen from Table 3 Business Electives.

2. clause 4.d. - no fewer than 12 credit hours, but no more than 33 credit hours, in elective courses chosen from the Faculty of Humanities and Social Sciences.

These adjustments to the normal curriculum will only be permitted for students who are graduating with the Bachelor of Commerce (Co-operative) degree and the Bachelor of Arts degree at the same convocation. In order to meet all of the requirements of both degree programs at the same time, students who are completing the joint degrees are strongly advised to follow Table 2 Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts).

Notes: 1. The Bachelor of Arts requires completion of a Major Program, a Minor Program, a set of Core Requirements (comprising a Breadth of Knowledge Requirement, a Critical Reading and Writing (CRW Requirement), a Language Study (LS) Requirement, and a Quantitative Reasoning (QR) Requirement), and Elective courses, totalling at least 78 credit hours in courses offered by departments within the Faculty of Humanities and Social Sciences. Majors are also available from the following Departments in the Faculty of Science: Computer Science, Mathematics and Statistics, and Psychology. When the Bachelor of Arts is completed jointly with the Bachelor of Commerce (Co-operative):
   a. Minor program requirements are satisfied by BUSI courses specified in Table 2 Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts) above.
   b. Core requirements for English Critical Reading and Writing (CRW) courses and Quantitative Reasoning (QR) are satisfied by courses completed in Terms A/B or during Terms 1 or 2 of the Bachelor of Commerce (Co-operative) degree. English 1021 does not qualify as a CRW course except for students completing the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts.
   c. It is recommended that the Core Requirement for 6 credit hours in courses in a single language other than English be completed in Terms A/ B of the Bachelor of Commerce (Co-operative) degree program.
   d. Major requirements for the Bachelor of Arts may be satisfied in 36 to 45 credit hours, depending on the department or program chosen. Students are strongly recommended to seek advice from the department or program of their Major to ensure that their proposed degree program is possible within the constraints of course scheduling and prerequisites.

2. Students are advised that, in order to complete the joint degrees within the minimum 150 credit hours, they must complete at least five of the courses required for the Bachelor of Arts as opportunities arise and as courses are offered. These courses may be completed during the Spring
semesters between Terms A/B and Term 1, between Terms 2 and 3, or during any of the three Work Terms (for example, in the evening or by distance), or as sixth courses during any of the academic terms (following submission of a course load waiver).

3. To meet the requirements for the Bachelor of Commerce (Co-operative), not fewer than 15 and not more than 36 credit hours in Business electives must be chosen from joint degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Humanities and Social Sciences. Majors are also available from the following Departments in the Faculty of Science: Computer Science, Mathematics and Statistics, and Psychology. Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the joint degrees.

5.2.4 Minor or Cognate From Another Academic Unit

1. A student enrolled in the Bachelor of Commerce (Co-operative) program may, using all of the non-Business electives required in the curriculum, complete a minor within the Faculty of Humanities and Social Sciences, the Faculty of Science, the School of Music, or offered at Grenfell Campus. Regulations for the minor are given under the Calendar entries for the Faculty of Humanities and Social Sciences, the Faculty of Science, and the School of Music, and under the Calendar entry for Grenfell Campus.

2. A student enrolled in the Bachelor of Commerce (Co-operative) program may pursue a minor (or equivalent) in other non-Business academic units (where minor programs exist) with permission of that academic unit and permission of the Committee on Undergraduate Studies of the Faculty of Business Administration.

5.2.5 Examination and Promotion for the Bachelor of Commerce (Co-operative)

1. The Faculty Council of the Faculty of Business Administration constitutes the examining body for all examinations in Business courses. In addition, the standing of every student will be assessed by the Committee on Undergraduate Studies in accordance with the promotion requirements outlined in Clauses 2., 3., and 9. below.

2. Students in Terms A/B will be considered for promotion to Term 1 at the end of the Winter semester of their first year. At that time, for promotion from Terms A/B, students must have successfully completed the 30 credit hours prescribed in 3. of The Curriculum above, with an overall average on those 30 credit hours of at least 65%. Students who do not satisfy these requirements will be required to withdraw from the program and will not be promoted to Term 1.

3. Students who have been required to withdraw following Terms A/B may be considered for readmission to the program in accordance with the entry under Admission Modes and Requirements above, with the heading Advanced Standing (for Current Memorial University of Newfoundland Students).

A required withdrawal for failure to meet the promotion requirements from Terms A/B will not be reflected on a student's transcript.

3. For promotion from each of Terms 1 through 7, the requirements are the achievement of a passing grade in at least 12 credit hours and an overall average of at least 60% in those courses required in each academic term.

Students in an academic term who do not maintain the appropriate course load as outlined in Clause 2. of The Curriculum, and who do not have the prior approval of the Committee on Undergraduate Studies for a reduced course load, will be required to withdraw from the program and will not be promoted.

Students completing Terms 1 through 7 who fail to achieve these standards will be required to withdraw from the program. A required withdrawal from any of Terms 1 through 7 will be reflected on a student's transcript.

Students who meet the academic promotion requirements above but who fail a core course in any of Terms 1 through 7 will be required to successfully repeat that course prior to graduation. Students who meet the promotion requirements above but who fail an elective in any of Terms 1 through 7 will be required to either successfully repeat that elective or successfully complete an additional elective to replace it prior to graduation.

4. The Committee on Undergraduate Studies of the Faculty of Business Administration may promote a student notwithstanding promotion requirements listed in Clause 3. above. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies, and in the case of a student thought likely to succeed in future terms.

5. Students who have been required to withdraw following any one of Terms 1 through 3 may be considered for readmission after the lapse of one semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Admissions Committee, Faculty of Business Administration, a more meaningful course of study would be appropriate, or they may be considered for readmission to the program in accordance with the entry under Admission Modes and Requirements, Advanced Standing (for Current Memorial University of Newfoundland Students). Students who have been required to withdraw following any one of Terms 4 through 7 may be considered for readmission after the lapse of two semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Admissions Committee, Faculty of Business Administration, a more meaningful course of study would be appropriate.

In order to be considered for readmission, students must formally apply for readmission to the program not later than the deadlines specified in the University Diary for the semester in which they wish to recommence their program.

6. The dates for starting and finishing each work term are shown in the University Diary.

Successful completion of the work term requirements is a prerequisite to graduation.

7. A competition for work term employment is organized by Business Co-operative Education. Students may obtain their own work term jobs outside the competition. Such jobs must be confirmed by letter from the employer and approved by Business Co-operative Education on or before the first day of the work period.

By entering the competition, students give permission for Business Co-operative Education to supply their university transcripts to potential employers.

8. A work report on a topic approved by Business Co-operative Education must be submitted for each work term. This report must be approved by the employer and submitted to Business Co-operative Education on or before the deadline scheduled by Business Co-operative Education. Evidence of the student's ability to gather material relating to the report, analyse it effectively, and present it in a clear, logical and concise form, will be required in the report. Late reports will not be graded unless prior permission for a late report has been given by Business Co-operative Education.

9. The overall evaluation of the work term is the responsibility of Business Co-operative Education. The work term shall consist of two components:

Student performance as evaluated by a co-ordinator, given input from the employer, and a work report graded by a co-ordinator or a member of faculty.

Evaluation of the work term will result in the assignment of one of the following final grades:

a. Pass with Distinction: Indicates EXCELLENT PERFORMANCE in both the work report and work performance. The student is commended for his/her outstanding performance in each of the required components; pass with distinction has been awarded to each of the work report and work performance.
b. **Pass:** Indicates that **PERFORMANCE MEETS EXPECTATIONS** in both the work report and work performance. The student fully meets the requirements of a passing work report and completely satisfactory work term performance.

c. **Fail:** Indicates **FAILING PERFORMANCE** in the work report and/or the work performance.

For promotion from the work term, a student must obtain **PASS WITH DISTINCTION** or **PASS**.

If a student fails to achieve the standards outlined above, the student will be required to withdraw from the program and may be considered for readmission after the lapse of two semesters, at which time the student will be required to complete a further work term with satisfactory performance before being admitted to any further academic term in the Faculty.

10. A student who has been required to withdraw from the program as a result of failing to meet the requirements of either two academic terms or two work terms will not be eligible for readmission to the program.

11. Students are not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies upon the recommendation of Business Co-operative Education. Students who drop a work term without permission, or who fail to honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause their discharge from the job, will normally be awarded a grade of **FAIL** for that work term. Permission to drop a work term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved work term in lieu of the one dropped.

**5.2.6 Regulations for the Honours Degree of Bachelor of Commerce (Co-operative)**

An Honours Degree of Bachelor of Commerce (Co-operative) signifies superior academic achievement.

1. To be considered for an Honours Degree, the candidates must so indicate on the prescribed "Application for Graduation " form. This form may be obtained on-line at the Memorial Self Service at [www.mun.ca/admit/tbwkwbigis_P_WWWLogin](http://www.mun.ca/admit/tbwkwbigis_P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

2. Candidates for the Honours Degree of Bachelor of Commerce (Co-operative) shall comply with all regulations governing the **General Degree of Bachelor of Commerce (Co-operative).**

3. A candidate shall obtain at least a 75% average and a grade point average of at least 3.5 on the courses which comprise the total number of credit hours required for the degree. Candidates are not permitted to repeat or substitute courses for the purpose of meeting these criteria.

4. To be eligible for the Honours degree, a candidate must pass all of the core courses required in Terms 1 through 7 on his/her first attempt.

5. A student who has been required to withdraw from the program as a result of failing to meet the requirements for promotion from academic Terms 1 through 7 or from Work Terms 1, 2, or 3 will not be eligible for a Honours Degree.

6. An applicant for the Honours Degree who fails to fulfill the conditions of Clauses 3., 4., and 5. but fulfills the requirements for a General Co-operative Degree shall be awarded the General Degree of Bachelor of Commerce (Co-operative).

**5.3 Regulations for the Certificate in Business Administration**

1. To be considered for admission to the Certificate in Business Administration, applicants must have at least five years of full-time work experience, or equivalent, that is deemed acceptable by the Admissions Committee of the Faculty of Business Administration.

2. In the case where students have been required to withdraw from one of the Faculty’s other undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.

3. To be eligible for the Certificate in Business Administration, a student must

   a. have been admitted to the Certificate Program;

   b. successfully complete the following 30 credit hours:

      i. Six credit hours in English which must include English 1110 or 1021;

      ii. BUSI 1000, 1101, 1210, 1600, 2010;

      iii. Three of the following: Economics 1010 (or the former 2010), Economics 1020 (or the former 2020), BUSI 2101, 2210, 2400, 2710, 3310, 3401, 3700, 4000, 4320, 4330, and 4500.

   c. achieve an overall average of at least 60% in the courses that comprise the 30 credit hours specified in clause 3.b. A student failing to meet this requirement will be required to repeat one or more courses to raise the overall average to the minimum acceptable level.

4. Every candidate for the Certificate in Business Administration will be required to complete at least 15 credit hours at this University. The courses comprising these credit hours must be applicable to the Certificate in Business Administration.

5. Every candidate for the Certificate in Business Administration who has completed a Bachelor’s degree at this University, or another recognized university or another post-secondary institution, will be required to complete at least 15 credit hours at this University beyond those required for that degree. The courses comprising these credit hours must be applicable to the Certificate in Business Administration.

6. Course prerequisites for all courses shall apply to all courses in the Certificate in Business Administration. Students should note, for example, that Mathematics 1000 is a prerequisite and Statistics 2500 is a co-requisite for BUSI 2400. It should be noted that some courses are not offered every semester.

**5.4 Regulations for the Diploma in Business Administration**

1. To be considered for admission to the Diploma Program in Business Administration, applicants must normally have satisfied the following requirements:

   a. Successful completion of 15 academic credit hours as follows:

      i. Six credit hours in English which must include English 1110 or 1021;

      ii. Mathematics 1000;

      iii. BUSI 1000;

      iv. Three credit hours of non-Business electives.

   Only students with an overall average of at least 60% in the courses comprising the 15 credit hours required will be considered for admission to the program.

   Overall academic performance is an important criterion in reaching decisions on applications for admission, and will be considered, in addition to the average on the five courses required for admission, in the selection process. Students with weak
overall academic records are unlikely to be admitted.

b. At least five years of full-time work experience, or equivalent, that is deemed acceptable by the Admissions Committee of the Faculty of Business Administration.

In the case where students have been required to withdraw from one of the Faculty’s other undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.

2. To be eligible for the Diploma in Business Administration, a student must:

a. have been admitted to the Diploma Program;

b. successfully complete the following 45 credit hours in addition to the 15 credit hours required for admission (a total of 60 credit hours):

i. Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020);

ii. Statistics 2500 or equivalent;

iii. BUSI 1101, 1210, 1600, 2400, 2710, 3310, 4000, and 4500;

iv. Four of the following, one of which must be either BUSI 4320 or 4330: BUSI 2010, 2101, 2210, 3401, 3700, 4050, 4320, and 4330.

c. Achieve an overall average of at least 60% in the courses which comprise the 45 credit hours specified in clause 2. b. A student failing to meet this requirement will be required to repeat a course(s) to raise the overall average to the minimum acceptable level.

d. Successfully complete a comprehensive case analysis with report (BUSI 450W). BUSI 450W will not be required of students who complete BUSI 4050 from the list in 2.b.iv. above.

e. Students planning to pursue their Bachelor of Business Administration (see Regulations for the General Degree of Bachelor of Business Administration (B.B.A.)) are encouraged to note the prerequisites for BUSI 7000 and to plan their courses so that they have completed the prerequisites prior to the semester in which they plan to take BUSI 7000.

3. a. Every candidate for the Diploma in Business Administration will be required to complete at least 30 credit hours at this University. The courses comprising these credit hours must be applicable to the Diploma in Business Administration.

b. Every candidate for the Diploma in Business Administration, who has completed a Bachelor's degree at this University or another recognized university or university college, will be required to complete at least 30 credit hours at this University beyond those required for that degree. The courses comprising these credit hours must be applicable to the Diploma in Business Administration.

5.4.1 Continuance Regulations

1. The Faculty Council of the Faculty of Business Administration constitutes the examining body for all examinations in Business courses. In addition, the standing of every student will be assessed by the Committee on Undergraduate Studies in accordance with the continuation requirements outlined in 2. below.

2. Students must qualify for continuation after each term of study. To continue, students must have an overall average of at least 60% over their last ten courses taken. In the event that a student has more courses than needed in the earliest term used, the courses with the highest grades in that term will be used.

3. Students who fail to achieve the standards outlined in 2. above normally will be required to withdraw from the program. They may be considered for readmission after a lapse of two semesters. In order to be considered for readmission, students must formally apply for readmission.

4. Students who are required to withdraw a second time are not eligible for readmission into the program.

5. The Committee on Undergraduate Studies of the Faculty of Business Administration may allow a student to continue who fails to achieve the standards outlined in 2. above. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies.

5.5 Regulations for the General Degree of Bachelor of Business Administration (B.B.A.)

The application for admission or readmission to programs offered by the Faculty of Business Administration is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www.mun.ca/undergrad/apply. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/admit/twbkwbis.P_WWWLogin. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies.

5.5.1 The Curriculum

1. To be admitted to the B.B.A. program, students should select the B.B.A. program on their online application to the University or on the Declaration/Change of Academic Program Form.

2. To graduate with the B.B.A., candidates must successfully complete the following 120 credit hours with a grade point average on those 120 credit hours of at least 2.5 and a numeric average on those 120 credit hours of at least 60%:

a. Six credit hours of English which must include English 1110 or 1021;

b. Mathematics 1000;

c. Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020);

d. Statistics 2500;

e. Business 1000, 1101, 1210, 1600, 2010, 2101, 2210, 2400, 2710, 3310, 3401, 3700, 4000, 4050, 4320, 4330, 4500, 5301, and 7000. Students are encouraged to note the prerequisites for 7000 (Strategic Management 2) and to plan their courses so that they have completed the prerequisites prior to the semester in which they plan to take 7000.

f. 45 credit hours of electives, of which not more than 21 credit hours may be from Business courses (which must be chosen from Table 3 Business Electives).

5.5.2 Minor or Cognate From Another Academic Unit

1. A student enrolled in the B.B.A. program may complete a minor within the Faculty of Humanities and Social Sciences, the Faculty of Science, the School of Music, or from Grenfell Campus. Regulations for the minor are given under the Calendar entries for the
Faculty of Business Administration 2017-2018

Faculty of Humanities and Social Sciences, the Faculty of Science, the School of Music, and Grenfell Campus.

2. A student enrolled in the B.B.A. program may pursue a minor (or equivalent) in other non-business academic units (where minor programs exist) with permission of that academic unit and permission of the Committee on Undergraduate Studies of the Faculty of Business Administration.

5.6 Regulations for the Honours Degree of Bachelor of Business Administration

An Honours degree of Bachelor of Business Administration signifies superior academic achievement. The difference between a First Class General B.B.A. degree and an Honours B.B.A. degree is that for a First Class B.B.A., a candidate must obtain a grade point average of at least 3.5 on the best 120 credit hours which meet curriculum requirements, and for an Honours B.B.A., a candidate must obtain a grade point average of at least 3.5 on the earliest attempt at courses which meet curriculum requirements.

1. To be considered for an Honours degree, a candidate must so indicate on the University's official Application for Graduation form.

This form may be obtained on-line at the Memorial Self-Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

2. A candidate for the Honours Degree of Bachelor of Business Administration shall:

a. comply with all regulations governing the General Degree of Bachelor of Business Administration, and

b. obtain at least a 75% average and a grade point average of at least 3.5 on the courses prescribed in The Curriculum. Candidates are not permitted to repeat or substitute courses for the purpose of meeting these criteria. In the case of a student who has repeated courses and/or who has completed more than 120 credit hours at the time of application for graduation, applicable courses will be taken in chronological order rather than in order of grade in calculating these averages. This may mean that failed courses will be used in calculating this grade point average even when the courses were later repeated and passed or, in the case of electives, replaced with other courses later in a candidate’s academic career.

3. A declared candidate for an Honours degree who fails to fulfill the conditions of clause 2. but fulfills the requirements for a General degree shall be awarded the General Degree of Bachelor of Business Administration.

5.7 Regulations for the General Degree of International Bachelor of Business Administration (i.B.B.A.)

The application for admission or readmission to programs offered by the Faculty of Business Administration is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

5.7.1 General Regulations

1. The International Bachelor of Business Administration (i.B.B.A.) program requires a total of 120 credit hours with a minimum average of 65% on those 120 credit hours.

2. In this program, students are expected to gain knowledge of and to experience the cultural and business environment of a global region other than their home, or primary region. In order to achieve this bi-cultural knowledge and experience, students must nominate a second global region on which to focus in their program. The choice of the second region will affect the choice of courses to meet the Bi-Cultural Global and Regional Content and the Cross-Cultural Study Experience requirements.

3. The program includes a compulsory, approved, full-time cross-cultural study experience as outlined in the Cross-Cultural Study Experience regulations.

5.7.2 Admission Requirements

1. Normally, admission is offered for the Fall semester. Where circumstances permit, applications will be considered for the Winter and Spring semesters. The deadlines for admission or readmission are specified in the University Diary.

2. Students who are seeking admission for the Fall semester normally must have completed all the courses required for admission by the end of the Winter semester.

3. Applications received after the deadline will be considered only if a space is available in the program.

4. To be eligible for Admission to the i.B.B.A. program an applicant must have successfully completed the Pre-i.B.B.A. program (see The Curriculum, clause 1, below) with an average on those courses of at least 65%, or the equivalent at another recognized post-secondary institution. Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits.

5. Admission is competitive and selective. Therefore, prospective students are encouraged to consider an alternate degree program in the event that they are not accepted into the International Bachelor of Business Administration program.

6. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Selection, therefore, will be based on a student’s overall academic performance in addition to the average on the 30 credit hours required for admission. Students with weak overall academic records are unlikely to be admitted.

7. In the case where an applicant has been required to withdraw from one of the Faculty's other Undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.

5.7.3 The Curriculum

1. The i.B.B.A. program includes the following 30 credit hours that comprise the Pre-i.B.B.A. program:
   a. Six credit hours of English which must include English 1110 or 1021;
   b. Mathematics 1000;
   c. Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020);
   d. BUSI 1000;
   e. Political Science 2200;
   f. Nine additional credit hours in non-BUSI courses. It is strongly recommended that students take into account the Bi-Cultural Global and Regional Content requirement outlined below when choosing these additional 9 credit hours of study.

2. In addition to the Pre-i.B.B.A. program requirements, the curriculum shall consist of the successful completion of:
a. Thirty-nine credit hours consisting of: Statistics 2500 and BUSI courses 1101, 1210, 2010, 2101, 2400, 3310, 3401, 3700, 4000, 4320, 4500, and either 7000 or 7005.

b. Fifteen credit hours of international business related courses, which must include:
   i. BUSI 5302 and either Economics 3030 or BUSI 6550; and
   ii. any three from: BUSI 6311, BUSI 7005 (if not completed to fulfill 2.a.i above), BUSI 7240, BUSI 6550 (if not completed to fulfill 2.b.i. above), BUSI 6040, Economics 4030, or Political Science 3250 or any other approved course with an international focus.

Pre-requisites for all courses shall apply to the i.B.B.A. program. Students should note, for example, that the pre-requisites for BUSI 7000 include BUSI 4050 and BUSI 5301, which are not program requirements for the i.B.B.A.

c. Thirty-six further credit hours, of which at least 12 must be in non-BUSI courses. Students should take into account the Non-Business Elective Courses regulations under the Bi-Cultural Global and Regional Content when choosing these 12 credit hours of non-business electives.

d. It is recommended that students choose their elective courses so that their overall program contains at least one group of four or five courses within a chosen functional area or specialization or minor.

3. Students shall complete an approved Cross-Cultural Study Experience, as outlined below. Courses taken by distance education from Memorial University of Newfoundland may not be used to satisfy the Cross-Cultural Study Experience requirement.

4. For graduation, a student must be enrolled in the i.B.B.A. program, and have completed the 120 credit hours required with a minimum average of 65% on those 120 credit hours.

5.7.4 Bi-Cultural Global and Regional Content

Courses chosen to meet the above requirements must have coherent, bi-cultural, global and regional content as outlined in Regulations for the General Degree of International Bachelor of Business Administration (i.B.B.A.), General Regulations. The choice of regions will affect the choice of non-BUSI elective courses as well as the choice of location and content of the cross-cultural study experience. Students must consult with the Undergraduate Programs Office of the Faculty of Business Administration when selecting courses to satisfy the bi-cultural global and regional content requirement to ensure that the selected courses will fulfill the requirement.

5.7.4.1 Non-Business Elective Courses

1. Students must complete a minimum of 21 credit hours of non-business elective courses with coherent, bi-cultural, global and/or regional content. These courses must include:
   a. at least 6 credit hours with a specific regional perspective of the student’s home, or primary region;
   b. at least 6 credit hours with a specific regional perspective of the student’s second global region. The study of a regional language may be used to meet this requirement; and
   c. students planning to undertake their cross-cultural study experience where English is not the main language must complete 6 credit hours of study of the relevant language prior to undertaking the cross-cultural study experience.

2. The Cross-Cultural Study Experience must be approved by the Undergraduate Programs Office before it can begin.

3. To ensure that students obtain regional perspectives and skills different from those to which they were exposed in their previous education, an approved cross-cultural study experience must include:
   a. at least 9 credit hours with specific regional content;
   b. at foreign language locations, at least 3 of the 9 credit hours above must be study of a regional language; and
   c. at locations where English is the main language, at least 3 of the 9 credit hours identified above must normally be in non-business electives.

4. Notwithstanding the General Regulations above and the Continuance Regulations below, a student may be held back from participating in the Cross-Cultural Study Experience if the student has not completed at least ten courses since admission to the i.B.B.A. program or has not completed a course load of 15 credit hours with a semester average of at least 65% in a single semester. A student who is prevented from starting the Cross-Cultural Study Experience for either of these reasons will be permitted to participate in the Cross-Cultural Study Experience once the student has met these criteria.

5. Students must normally have completed at least 72 credit hours of the program prior to commencement of the Cross-Cultural Study Experience.

6. Students should note that graduation may be delayed if they commence the Cross-Cultural Study Experience in the final semester of their program because of delays in receiving official transcripts from partner institutions.

7. Students must successfully complete either at least 12 credit hours in a single semester, or at least 9 credit hours in each of three semesters, while on the cross-cultural study experience.

8. For the Cross-Cultural Study Experience, courses regarded as having specific regional content would include languages, regional studies and other cross-cultural courses as well as approved courses in Economics and Business.

5.7.5 Minor From Faculty of Humanities and Social Sciences

A student enrolled in the i.B.B.A. program may both meet the requirements of the degree and be able to complete a minor within the Faculty of Humanities and Social Sciences. Regulations for the minor are given under the Calendar entries for the Faculty of Humanities and Social Sciences.

5.7.6 Continuance Regulations

1. The Faculty Council of the Faculty of Business Administration constitutes the examining body for all examinations in Business
courses. In addition, the standing of every student will be assessed by the Committee on Undergraduate Studies in accordance with the continuation requirements outlined in 2. and 3. below.

2. Following entry to the program, i.B.B.A. students must qualify for continuation after each term of study. For continuation, students must have an overall average of 65% over their last ten courses taken. In the event that a student has more courses than needed in the earliest term used, the courses with the highest grades in that term will be used.

Students who fail to achieve these standards will be required to withdraw from the program. They may be considered for readmission after a lapse of two semesters. In order to be considered for readmission, students must formally apply for readmission. A required withdrawal for failure to meet Continuance Regulations in the i.B.B.A. program will be reflected on a student's transcript.

3. Students who are required to withdraw from the program a second time are not eligible for readmission into their program.

4. The Committee on Undergraduate Studies of the Faculty of Business Administration may allow a student to continue who fails to achieve the standards outlined in 2. above. A decision of this nature will be made only for reasons acceptable to the Committee on Undergraduate Studies.

5.8 Regulations for the Honours Degree of International Bachelor of Business Administration

An Honours degree of Bachelor of International Business Administration signifies superior academic achievement.

1. To be considered for an Honours degree, the candidates must so indicate on the University's official Application for Graduation form. This form may be obtained on-line at the Memorial Self Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

2. Candidates for the Honours Degree of International Bachelor of Business Administration shall:
   a. comply with all regulations governing the General Degree of International Bachelor of Business Administration, and
   b. obtain at least a 75% average and a grade point average of at least 3.5 on the 120 credit hours completed for the degree.

3. Candidates are not permitted to repeat or substitute courses for the purpose of meeting the academic standing specified in Clause 2. In the case of a student who has repeated courses and/or who has completed more than 120 credit hours at the time of application for graduation, applicable courses will be taken in chronological order rather than in order of grade in calculating 2.b. above.

4. A declared candidate for an Honours degree who fails to fulfil the conditions of Clause 2 but fulfills the requirements for a General degree shall be awarded the General Degree of International Bachelor of Business Administration.

6 Business Concentrations

Students completing degrees in the Faculty of Business Administration may choose to complete their Business electives in a number of different areas or to concentrate in one of the areas outlined below. In either case, students must complete the required number of BUSI and non-BUSI electives outlined in the program regulations for the degree in which they are enrolled. BUSI electives must be chosen

</table>

Please note that these concentrations are neither binding nor official. Students are not required to complete a concentration and even if they do, it is not reflected on their transcripts or degree parchments.

6.1 Accounting

Students electing an Accounting concentration should complete the following courses:

BUSI 5160, BUSI 5500, BUSI 6100, BUSI 6110, BUSI 6120, BUSI 6130, BUSI 7120, BUSI 7125, and BUSI 7160.

6.2 Finance

Students electing a Finance concentration should complete the following courses:

1. BUSI 5500, BUSI 6100, BUSI 6110, BUSI 6510, BUSI 7010, BUSI 7500, and BUSI 7510; and
2. any two of the following courses: BUSI 6120, BUSI 6130, BUSI 6550, BUSI 7120, BUSI 7150, or Economics 3150.

6.3 Human Resources and Labour Relations

Students electing the Human Resources and Labour Relations concentration should complete the following courses:

1. BUSI 6320 and BUSI 7310 and
2. any six of the following: BUSI 6301, BUSI 6310, BUSI 6311, BUSI 6312, BUSI 6330, BUSI 7315, BUSI 7320, BUSI 7321, BUSI 7322, BUSI 7330, Economics 3360 and any other Human Resources or Labour Relations course (or courses) offered by the Faculty of Business Administration at the 6000 or 7000 level.

6.4 Information Systems

Students electing an Information Systems concentration should complete the following courses:

1. Six of BUSI 5700, BUSI 5701, BUSI 5702, BUSI 5703, BUSI 6700, BUSI 6701, BUSI 7700, and BUSI 7701; and
2. a. either Geography 2195, Geography 3260, and one of Geography 3202, Geography 4202, Geography 4261
b. or three of the following: Computer Science 1710, Computer Science 2500, Computer Science 2710, Computer Science 2760, Computer Science 3710, Computer Science 3715, the former Computer Science 4761, Computer Science 4767.

6.5 International Business

Students electing an International Business concentration should complete the following eight courses, of which at least five should be from the Faculty of Business Administration:

1. BUSI 5302, Political Science 2200 and either BUSI 6550 or Economics 3030; and
2. any five of the following: BUSI 6040, BUSI 6311, BUSI 6330, BUSI 6550, BUSI 7005, BUSI 7240 and other courses with global or regional business content selected in consultation with the Coordinator of the i.B.B.A. program. These may include courses taken as part of an approved Study Abroad program (up to a maximum of 9 credit hours).

6.6 Marketing
Students electing a Marketing concentration should complete the following courses:
1. BUSI 3210, BUSI 5220, and BUSI 7230; and
2. any three of the following: BUSI 5210, BUSI 5217, BUSI 6217, the former BUSI 6218, BUSI 6230, BUSI 6241, BUSI 6250, BUSI 7240, or the former BUSI 7250.

6.7 Operational Research
Students electing a Operational Research concentration should complete the following eight courses:
1. BUSI 5401, BUSI 5402, BUSI 6400, and BUSI 7400; and
2. any four of: Computer Science 1710, Computer Science 2710, Mathematics 1001, Mathematics 2050, and any Business Information Systems course (or courses) at the 5000 level or above.

6.8 Resource-Based Industries Management
Students electing a Resource-Based Industries Management concentration should complete the following courses:
1. BUSI 5000, BUSI 5020, BUSI 5302, BUSI 5500, BUSI 7010, and BUSI 7410; and
2. any three of the following courses: BUSI 5250, BUSI 6040, BUSI 6410, BUSI 6415, BUSI 7322, BUSI 7500, BUSI 7510, Economics 3080, Economics 4090, Engineering 8671, Geography 2425, Geography 3425, Political Science 3210, Political Science 3250, Sociology 4091, and Sociology 4104; at least one of which must be chosen from Economics 3080, Economics 4090, Engineering 8671, Geography 2425, and Geography 3425.

Students completing the Bachelor of Business Administration program must either choose two courses from Economics 3080, Economics 4090, Engineering 8671, Geography 2425, Geography 3425, Political Science 3210, and Political Science 3250, or must complete a non-Business elective in addition to the courses required for their program in order to meet clause 2.f. under Regulations for the General Degree of Bachelor of Business Administration (B.B.A.), The Curriculum.

Students considering choosing to complete Engineering 8671 must consult with the Undergraduate Programs Office, Faculty of Business Administration, regarding prerequisites.

6.9 Small Business/Entrepreneurship
Students electing a Small Business/Entrepreneurship concentration should complete the following courses:
1. BUSI 3610, BUSI 5220, BUSI 5600, BUSI 6605, BUSI 7010, and BUSI 7600; and
2. any three of the following: BUSI 6120, the former BUSI 6220, BUSI 6250, BUSI 6312, BUSI 6610, BUSI 7230, or BUSI 7240.

6.10 Supply Chain Management
Students electing a Supply Chain Management concentration should complete the following courses:
BUSI 5401, BUSI 5402, BUSI 6410, BUSI 6415, BUSI 7410, and BUSI 7415.
7 Business Electives

Only those courses listed below are acceptable as Business electives towards the Bachelor of Commerce (Co-operative), Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, and Bachelor of Business Administration programs.

8 Waiver of Faculty Regulations

Any student has the right to request waiver of Faculty regulations. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations.

9 Appeal of Decisions

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions.

10 Course Descriptions

In accordance with Senate's Policy Regarding Inactive Courses, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the Faculty.

Unless otherwise specified in the course description or awarded as transfer credit, only business courses offered by the Faculty of Business Administration and designated as BUSI are applicable to programs of the Faculty of Business Administration.

All courses of the Faculty are designated by BUSI.

10.1 Service Course Descriptions

2000 Business Communications - inactive course.

2102 Introductory Accounting for Non-Business Students provides full introductory coverage of both financial and managerial accounting. The course focuses on the most widely used accounting theory and practice. CR: BUSI 1101 or BUSI 2101

10.2 Core and Elective Course Descriptions

Enrolment in Business courses is limited and first priority will be given to students registered in the Faculty of Business Administration programs and to Business Minor Candidates who have obtained the approval of the Dean of the Faculty of Business Administration or delegate.

1000 Introduction to Business in Society (formerly BUSI 2001) introduces the basics of business and business corporations in society, in a real-world relevant manner. Particular attention is given to societal stakeholders and to corporations' internal business processes and management functions. Major emphases include corporate social responsibilities and management ethics, and these are recurring themes in other topics such as technology, globalization and people in organizations. The course is a combination of textbook theory and guided learning activities and assignments based on
Faculty of Business Administration 2017-2018

finding and integrating real-world information.

CR: the former BUSI 2001, Business 1010
UL: may be used in place of Business 1010 in programs offered in the Administration at the Grenfell Campus.

1101 Principles of Accounting emphasizes the concepts and issues of introductory financial accounting as they relate to the Canadian conceptual framework, and will also address the strengths and weaknesses of financial reporting at an introductory level. The student will be introduced to the accounting process and analysis of the balance sheet, income statement, and the statement of cash flows.

CR: BUSI 2102, the former BUSI 3100, Business 2100
PR: Mathematics 1090 or 109B or a combination of placement test and high school mathematics scores acceptable to the Faculty

1210 Introduction to Marketing Strategy introduces students to the concepts, analyses, and activities that comprise marketing strategy, and provides practice in assessing and solving strategic problems in marketing. The course is also a foundation for BUSI 2210 Introduction to Marketing Tactics for advanced electives in marketing. Topics include: marketing strategy, environmental analysis, competitive analysis, customer behaviour, marketing research, segmentation, targeting, and positioning.

CR: the former BUSI 1201 or BUSI 2201 or BUSI 3200; Business 2200
PR: English 1110 or 1021, BUSI 1000

1600 Introduction to Entrepreneurship provides students with a basic understanding of entrepreneurship and its vital role in innovation and economic development. The course will explore and critique the entrepreneurship phenomenon while fostering the development of an entrepreneurial mindset and the skills and knowledge necessary for participating in the entrepreneurial process. The course will examine opportunity identification and evaluation, creative problem solving, the ability to recognize entrepreneurial potential, risk-taking, exercising initiative and perseverance, and how to achieve goals, the process of launching new ventures, local and international entrepreneurial ventures, and various paths to firm ownership. This course approaches entrepreneurship as a way of thinking, acting, and structuring business in a manner that enhances organizational setting.

PR: BUSI 1000 or English 1110 or 1021

2010 Business Research and Writing introduces students to research, writing, and reporting processes in business. Through ongoing, multi-stage evaluation, students learn the fundamentals of business research, including analytical thinking and proposal writing involving research using secondary sources. A key focus is the writing process, including grammar, punctuation, structure, flow, and format in common business communications media. Students also develop their oral presentation competence by presenting the results of their research. A highly interactive design encourages student practice and participation.

CR: BUSI 2000, Business 2020
PR: BUSI 1000, and English 1110 or 1021

2101 Managerial Accounting provides an overview of the use of financial data for managerial decision making. The student will be introduced to basic budgeting and analysis techniques for both service-oriented and manufacturing businesses.

CR: BUSI 2102, Business 2110, the former BUSI 4100
PR: BUSI 1101

2210 Introduction to Marketing Tactics introduces students to the concepts, analyses, and activities that comprise marketing tactics, and provides practice in making decisions about tactical problems in marketing. The course is also a foundation for advanced electives in marketing. Topics include: product management, pricing, marketing communications, channels of distribution, implementation, and budgetary organizational setting.

CR: the former BUSI 1201 or BUSI 2201 or BUSI 3200, Business 2250
PR: BUSI 1210

2220 Personal and Business Branding with Social Media develops students’ ability to design and refine on-line personal brands and display brands through social media channels.

CR: the former BUSI 6004, the former BUSI 6042, and the former BUSI 6240; Business 3230

2400 Decision Modeling provides an introduction to: spreadsheet modeling; linear optimization and the related topics of integer, assignment, and transportation models; and decision analysis including payoff matrices, decision trees, and Bayesian revision. All topics will be taught within the context of business applications.

CO: Statistics 2500
CR: the former BUSI 4401
PR: Mathematics 1900

2710 Modeling and Implementing Business Processes introduces techniques for understanding and modeling business processes and implementing them in modern enterprise systems. Course work will be project-based; students will create small-scale business applications, including web-based applications, using current design and development methodologies and tools.

PR: BUSI 1000, and English 1110 or 1021

300W Business Professional Development Seminars expose students to both theoretical and practical aspects of co-operative education in general and the work term in specific prior to the first work term. The seminars will utilize a combination of lectures, workshops, guest speakers, group discussions, and practical exercises to prepare students for their work terms. This course will be evaluated as PAS or FAL based on attendance, participation, and assignments.

AR: attendance is required
CH: 0
UL: as scheduled
PR: admission to the Bachelor of Commerce (Co-operative) Program

3210 Consumer Behaviour (formerly BUSI 5200) deals with concepts related to factors which influence the purchase and consumption behaviour of individuals including culture, social class, reference groups, perception, learning, motivation, personality and lifestyle. The unique aspects of groups other than the consumer will also be considered.

CR: the former BUSI 5200, Business 3240
PR: BUSI 2100 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

3310 Organizational Behaviour (formerly BUSI 2301 and 4300) focuses on the study of individual and group processes in formal organizations. The student is introduced to the nature of work, the systematic approach to the study of behaviour, organizational roles and socialization, motivation, leadership, communication, and group dynamics.

CR: the former BUSI 2301 and the former BUSI 4300; Business 2300
PR: English 1110 or 1021

3401 Operations Management teaches fundamental concepts, methods, tools, and techniques to understand, analyze, and effectively manage as well as improve operations in business organizations. The course covers operations competitiveness and strategy, productivity, forecasting, capacity planning, material requirements planning, waiting lines analysis, project management, inventory management, quality control and its improvement, and supply chain management.

CR: the former BUSI 5400; Business 3410
PR: Statistics 2500, and BUSI 2400 or the former BUSI 2401

3610 Regulatory and Taxation Issues for Small Business (same as the former BUSI 7610) is designed to provide students with a general knowledge base of the various tax and other regulatory issues that should be considered in starting a business. The role that tax plays in decision making will be examined as well as the types of corporate funding to establish a new business through government grants, conventional loans and tax credits as provided under the Income Tax Act. Alternative corporate structures will be examined as well as aspects of employee compensation and business valuations. Practical aspects of starting your own business, such as registration requirements, will also be examined. This course is designed for non-accounting students.

CR: the former BUSI 7610
PR: BUSI 1101

3700 Information Systems examines the operational and strategic importance of information systems in organizations. Topics include: types of systems; business requirements and information systems planning; approaches to acquiring information systems; managing information system resources; and ethics, security and privacy issues in information management.

CR: the former BUSI 3701
PR: BUSI 1000, and English 1110 or English 1021

399W Work Term I (see description in Work Term Descriptions and course title section below.)

4000 Business Law I (formerly BUSI 3000) is a course dealing with the law relating to certain aspects of business activity; includes introductory material on the nature of law and legal processes, together with a detailed study of certain aspects of the law of contract, examination of the general principles of the law of agency as they affect business operations; introduction to selected topics in company and partnership law.

CR: the former BUSI 3000, Business 3030

4050 Strategic Management I introduces students to the strategic management approach. The course builds upon the knowledge and concepts developed in Business 1000 and prepares students for later phases of courses in their programs, especially Business 7000. Through experience and analysis in and of real or reality-based situations and issues, students will develop critical and integrative thinking and information literacy. Activity and action components of the strategic management process are the basis for student learning. The purpose of this course is to recognize the importance of situational analysis and strategy in the management process, including business functional and organizational integrative thinking, and decision making regarding courses of action, resource allocation, and leadership.

CO: BUSI 4000 and 4330
CR: Business 4010
PR: BUSI 1600, BUSI 2010, BUSI 2210, BUSI 2220, BUSI 2400, BUSI 3310, BUSI 3401, BUSI 3700

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
4320 Human Resource Management introduces the student to the design, operation and management of HRM processes, their evaluation, and their contribution to employee and organization effectiveness. The principal processes considered are staffing, development, employment relations, and compensation. Consideration of the influence of relevant organizational and external conditions on HRM is included. The course views the management of human resources as the joint responsibility of line and HRM managers. 
CR: Business 3300 
PR: BUSI 3310 or the former BUSI 2301

4330 Introduction to Labour Relations (formerly BUSI 3320) provides an introduction to the field of industrial and labour relations in Canada, with primary emphasis on the labour-management relationship. Students will be introduced to the basic elements of an industrial relations system, including the participants, their roles and relationships, the social, economic, legal and political environment in which the participants interact, and the process and outcomes of collective bargaining. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations. 
CR: Business 3320 
PR: English 1110 or English 1021

4500 Financial Management I is designed to introduce the student to the role of financial management in business, financial analysis techniques, working capital management, and long-term and short-term financing. 
CR: Economics 3160, the former BUSI 4110, Business 3500 
PR: BUSI 1110, Statistics 2500, and Economics 1010 (or the former 2010)

450W Business Methods in Practice I (see description in Comprehensive Case Analysis Descriptions and course title section below.)

499W Work Term 2 (see description in Work Term Descriptions and course title section below.)

5000 Business Law II is designed to show the student how principles of Law are applied to four areas of Business. The areas dealt with in this course are accounting/finance, marketing, personnel and production. 
CR: Business 4030 
PR: BUSI 4000

5020 Topics In Resource-Based-Industries Management enables students to engage with resource-based industry companies and agencies through an Integrated working knowledge of the sector and its operations. Topics include the oil, mining industries, regulation, social license concerns, human resources issues, procurement, and contracting. The course provides opportunities for student involvement with Industry leaders and events through the use of guest speakers. 
PR: BUSI 4050

5160 Cost Accounting (formerly BUSI 7100) deals with the use of accounting data for decision making. Topics covered include: cost estimation, pricing, joint costs, advanced variance analysis, total quality management, just-in-time, decentralization, transfer pricing, performance evaluations, activity based accounting, and backflush costing. 
CR: the former BUSI 7100 
PR: BUSI 2101 with a grade of at least 60%

5210 Marketing Communications (formerly BUSI 6210) provides a theoretical background on the nature, role and principles of marketing communications; and develops analytical and decision-making skills in planning, executing, evaluating and controlling marketing communications campaigns. 
CR: the former BUSI 6210 
PR: BUSI 2100, and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

5217 Professional Selling provides a detailed introduction to and application of the principles of personal selling. The course introduces the basic concepts of professional selling, including customer analysis, communication skills, effective openings and closings, and customer relations. Selling skills and concepts are developed through the extensive use of sales exercises, role-plays and presentations. 
CR: the former BUSI 6220 
PR: BUSI 2100, BUSI 3210 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

5220 Marketing Research (formerly BUSI 6200) is designed to acquaint the student with the use of marketing research as an aid to management. This is a comprehensive survey of the scope and methods of marketing research. 
CR: the former BUSI 6200, Business 4210 
PR: Statistics 2500, BUSI 3500 or any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

5250 Business and Industrial Marketing (same as the former BUSI 7220 and the former BUSI 7250) presents a comprehensive view of business markets, including industrial, institutional, and government markets. There is a basic understanding of the role and challenges of implementing advanced marketing strategies, how the role of marketing is changing together with the development of new high technology products and services. 
CR: the former BUSI 7220, the former BUSI 7250

PR: BUSI 2100, BUSI 3210 and any of: BUSI 2210 (the former BUSI 2201 or BUSI 3200)

5301 Organizational Theory (formerly BUSI 5300) focuses on the organization, its environment, and its subsystems. From providing a basic understanding of the role and practice of research in organizations, study extends to measures of organizational effectiveness, determinants of structure and design, power and politics, intergroup conflicts and conflict resolution, and organizational development and change. 
CR: the former BUSI 5300, Business 3900 
PR: BUSI 3310 or the former BUSI 2301

5302 International Business (formerly BUSI 7302) is designed to introduce students to the issues of international business; these are the processes of cultural confrontation and compromise; the problems of competitive sovereignty involving multinational corporations and the governments of host countries, the organization, structure, operation and control of diverse international businesses; and, finally, the role of multinational enterprise as a catalyst in economic development and resource employment, in particular, the South-South context. The relevance of international business to study of the Canadian economy is discussed. The course is both conceptual and empirical in content. 
CR: the former BUSI 7302, Business 4040 
PR: BUSI 1000, Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020)

5401 Linear Optimization and Extensions I: Applications is more complex linear optimization models. Emphasis will be on formulation and computer-based sensitivity analysis, applications to other fields of business, cases in linear optimization and related fields. 
PR: BUSI 2400 or the former BUSI 4401, and Statistics 2500

5402 Linear Optimization and Extensions II: Algorithms include the simplex and revised simplex algorithms, sensitivity analysis and duality, goal optimization, advanced formulation of 0/1 models, branch and bound algorithm, network models; assignment, transportation, transshipment, shortest path, critical path, minimal spanning tree, and maximal flow. 
PR: BUSI 2400 or the former BUSI 4401, and Statistics 2500

5500 Financial Management II (formerly BUSI 7140) is an extension of BUSI 4500. Capital investment decision-making using discounted cash flow methodology; investments under certainty; financial structure and leverage; analysis of money and capital markets; further examination of long-term external financing. 
CR: the former BUSI 5140, the former BUSI 7140, Business 3510 
PR: BUSI 4500 or the former BUSI 4110

5530 Public Finance - inactive course.

5600 New Venture Creation (formerly BUSI 5030 and BUSI 7030) covers the business creation process from the idea conception stage to the launch stage. Students learn how to search for, screen and evaluate opportunities, and to plan and assemble the required resources, including the preparation of an actual business plan. Alternatives to new venture creation, such as purchasing an existing business and purchasing a franchise, are also explored. Extensive group work is required. 
CR: the former BUSI 5030, the former BUSI 7030, Business 3600 
PR: BUSI 1101, BUSI 1600, and BUSI 2210

5700 Information Systems Analysis and Design provides students with the skills to identify business problems which may be solved using information technology, determine requirements for information systems (IS) solutions, and develop detailed designs which form the basis for implementing systems. Topics may include: role of the user in systems development, systems development life cycle, requirements analysis and conceptual modelling, structured analysis and design, and trends in systems development methodologies. The importance of CASE tools in modern systems development will be emphasized through hands-on exercises. 
CR: BUSI 3700

5701 Information Systems Development - inactive course.

5702 Business Models and Strategy of Electronic Commerce (formerly BUSI 6027) examines business concepts, social issues, and technology issues related to e-commerce, as well as providing an introduction to current opportunities and challenges in implementing e-commerce solutions. Topics include: business models associated with web-based commerce; security, privacy, and intellectual property issues; payment and distribution systems; internet marketing; and strategic and planning issues. 
CR: the former BUSI 6027 
PR: BUSI 3700

5703 Information Security, Privacy, and Ethics - inactive course.

599W Work Term 3 (see description in Work Term Descriptions and course title section below.

6000-6029 (Excluding 6001, 6004, 6008, 6009, 6010, 6012, 6021, 6022, 6024 and 6027) Special Topics. Students are required to submit a topic to be studied announced by the Faculty.
6010 Strategic Management of Technology and Innovation is designed to explore the strategic management of technology and innovation for improving competitiveness and for business development. This will include market strategy/technological connections, and technical innovation/new product development processes. Technology and technical innovation are viewed as fundamental to strategic competitiveness and business development as important elements of the management of strategic change in the business firm. In approaching technical innovation as strategic implementation, business environmental, organizational capability, human resources and management factors will be stressed. The course will identify and examine the distinct issues which are currently prevalent in international business operations.

PR: BUSI 3700, BUSI 4000, BUSI 4050, BUSI 4320, BUSI 4330, BUSI 4500, and BUSI 5301

6040 International Business Law develops the skills a business student must have in understanding the laws and regulations that exist and relate to international business decision making. The course will equip students with a knowledge and understanding of laws and regulations that currently prevail in international business operations.

PR: BUSI 4000

6041-6060 Special Topics Courses will have the topics to be studied announced by the Faculty.

6100 Intermediate Accounting I continues the study of financial accounting by focussing on specific topics such as current assets, long-term investments, capital assets, intangibles, current liabilities, and long-term liabilities. Emerging issues in accounting will also be covered.

CR: Business 3100
PR: BUSI 1101 with a grade of at least 60%

6110 Intermediate Accounting II is designed to integrate the principles, concepts and skills acquired in previous accounting courses and to enhance the student's applied technical and decision-making capabilities. The course will focus on specific topics related to deferred taxes, employee future benefits, shareholders' equity, and financial statement presentation. The skills acquired in earlier courses will be integrated for purposes of interpreting and analysing financial information.

CR: Business 3110
PR: BUSI 1101 with a grade of at least 60%

6120 Taxation I is a determination of the federal and provincial income tax liability of individuals including succession and estate planning for individuals, and law and form structures under the Income Tax Act.

CR: Business 3120
PR: BUSI 1101 or the former BUSI 3100, and BUSI 4000

6130 Auditing introduces the student to the practice of auditing and to stress the auditor's decision-making process when determining the nature and amount of evidence the auditor should accumulate. Specific topics to be covered include the auditor's legal liability, materiality, internal control, transaction cycles, and audit of information processed through electronic data processing systems.

CR: Business 4130
PR: either BUSI 6100 with a grade of at least 60% or BUSI 6110 with a grade of at least 60%

6217 Salesforce Management examines the elements of an effective salesforce as a key component of the organization's total marketing effort. The course will apply theory relating to salesforce management from a manager's point of view. Topics include sales process, the relationship between sales and marketing salesforce structure, territory design, use of technology to improve salesforce effectiveness, and issues in recruiting, selecting, training, motivating, compensating and retaining salespeople.

CR: the former BUSI 6220
PR: BUSI 2010, BUSI 3210, BUSI 5217 and any of: BUSI 2210 or the former BUSI 2201, the former BUSI 3200

6230 Services Marketing is intended to examine the marketing of services and the role of services in supporting the marketing of tangible products. The distinction between the marketing of tangibles and intangibles will be stressed. The course will identify and examine the distinct issues which are encountered in the marketing of services and will explore appropriate strategies for implementing services marketing programs, primarily in services organizations, including health, transportation, telecommunications, education, etc. Specifically, the course will examine in detail the role of people in delivering services, the importance of service quality as a strategic differentiating tool, and the importance of collaboration between marketing and human resources management in the delivery of services.

CR: Business 3220
PR: BUSI 2010, BUSI 3210, and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

6241 Digital Marketing is designed to acquaint students with Internet and other electronic based marketing efforts. It addresses the use of the Internet as a digital channel and communications medium.

CR: the former BUSI 6004 and the former BUSI 6240
PR: BUSI 2010 and any of: BUSI 2210 or the former BUSI 2201, the former BUSI 3200

6250 Retailing Management (formerly BUSI 7210) provides an integrative examination of the activities involved in marketing goods and services directly to the ultimate consumer. Specifically, the following areas will be explored: the retail environment within a managerial framework; the evolution of retailing within the marketing channel; market analysis and planning; shopping behaviour; image and retail advertising; trading area and site analysis; store layout; shelf space utilization; merchandising; and the future prospects for retailing.

CR: the former 7210
PR: BUSI 2100 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

6301 New Directions in Organizational Behaviour provides an opportunity for students to explore and to develop their interests in topics in a dynamic field. Topics will be selected according to current emphases in the organizational behaviour literature.

PR: BUSI 3310 or the former BUSI 2301, and BUSI 5301

6310 Advanced Human Resource Management reinforces the applied aspects of theory covered in BUSI 6022 by examining in an applied manner (i) the avoidance of lawsuits, arbitration and performance-related problems which could result from the lack of both due process and effective policies and procedures, and (b) processes for the management of contemporary issues in Human Resource Management. Topics include problem solving in the areas of promotion policy, performance appraisal, test validation, training and development, compensation, job evaluation and pay equity, wrongful discharge, discrimination, occupational health and safety, absenteeism, substance abuse and AIDS. Students will examine cases and other material involving worker-management conflict in the above areas and seek to relate these to the legal, ethical and behavioural foundations of Human Resource Management in the larger, unorganized and non-unionized settings.

PR: BUSI 4320

6311 International Human Resources Management develops the skills a business student must have in understanding the practices and processes of international human resource management (IHRM) for a successful managerial career. The course will equip students with a solid knowledge and understanding of human resource functions and practices that currently prevail in global/international business operations.

PR: BUSI 4320

6312 Employee Recruitment and Selection (formerly BUSI 6022) is a critical factor in creating high performance work systems. This course examines the role of selection in HRM, legal issues, measurement, selection criteria, job competencies, testing, and interviewing, and making the employment decision.

CR: the former BUSI 6022, Business 4310
PR: BUSI 4320

6320 Advanced Labour Relations provides advanced level treatment of the field of industrial and labour relations in Canada, with primary emphasis on the labour-management relationship. Emphasis is placed on understanding recent problems/issues in industrial and labour relations and the range of options available for resolving these same subtopics. Topics examined may include: industrial relations theory; labour law reform; union growth and structure; management strategy; the role of third parties; workplace innovations; alternative dispute resolution mechanisms; union organizing; public sector labour relations; comparative industrial relations; etc. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

PR: BUSI 4330 or the former BUSI 3320

6330 International Labour Relations (same as the former BUSI 6024) aims to place Canadian industrial relations in an international context by studying industrial relations in a number of different countries, bearing in mind the challenges faced by practitioners and policy makers arising from globalization and the information age. The review includes a selection of long established industrialized countries as well as later industrializing countries.

CR: the former BUSI 6024
PR: BUSI 4330

6400 Advanced Management Science provides advanced level treatment of the topics(s) in Management Science, such as, waiting lines, stochastic dominance, stochastic dynamic programming, etc. The topic(s) to be covered in any particular year will be chosen by the Instructor and may vary from year to year.

CR: BUSI 5401 or BUSI 5402

6410 Logistics Management will focus on transportation, location, procurement and distribution aspects of logistics management, within local and global settings. A number of classical and latest models related to the focus areas would be introduced, and some real-life case examples discussed. The focus is on models of transportation, transportation management, facility location, procurement and supplier selection, distribution strategies, and global logistics.

PR: BUSI 2400, 3401, Statistics 2500

6415 Supply Chain Management is about the management of the processes, assets, and flows of material and information required to satisfy
customers’ demands. In this course, a few important supply chain drivers will be identified and investigated in details such as inventory, information and pricing. Those drivers determine the performance of a supply chain. The understanding of these key drivers and their inter-relationships with strategy and other functions of the company are really crucial in the management of any supply chain.

CO: BUSI 3401, 3700
PR: BUSI 2400, 3401, 3700, Statistics 2500

6510 Investments (formerly BUSI 6140) is a study of investment securities, risks, markets and mechanics; an appraisal of the economy, the industry and the firm; and portfolio management for personal and institutional investments.

CR: the former BUSI 6140, Business 4510
PR: BUSI 4500 or the former BUSI 4110

6550 International Finance examines the additional risks and profitable opportunities that arise for the firm when it extends its operations into international markets. Specific topics will include the determination of exchange rates, the international monetary system, balance of payments, the foreign exchange market, international money and capital markets, the parity conditions, accounting exposure, economic exposure, transactions exposure, political risk, and global financing. Knowledge of these topics areas will give further understanding with respect to operating within the constraints of the international marketplace.

CR: the former BUSI 6008
PR: BUSI 4500 or the former BUSI 4110

6605 Small Business Consulting introduces students to the nature of business consulting and the challenges associated with growth in small firms. The course draws upon knowledge from various functional areas and emphasizes complex and interdisciplinary applications of this knowledge in a real-world environment. Topics include models of the consulting process, problem-solving, managing the client relationship, research design, document preparation and ethics in consulting. Working in teams students will undertake a problem-solving project for a local organization. Students will not be permitted to register for the course after the first day of classes.

AR: attendance is required
PR: BUSI 4000, BUSI 4050, BUSI 4330, BUSI 5301

6610 Small Enterprise and Regional Development (formerly BUSI 7031) explores the potential and constraints on efforts to foster small enterprise formation and expansion as a means to promote regional economic development in Newfoundland. It primarily examines government initiatives to promote small business as the panacea for depressed regional economies, and reviews changes in the global economy and the organization of production which may enhance small business competitiveness. Both Canadian and international case studies are studied, with theoretical and empirical findings related to the Newfoundland context.

CR: the former BUSI 6009, the former BUSI 7031

6700 Data Management is based on the premise that data is a valuable resource which needs to be managed effectively to provide accurate, complete, timely, relevant, and accessible information to support decision making. Topics may include: enterprise data modelling, logical database design, database management systems, query languages, transaction management and concurrent access, and security.

PR: BUSI 3700 or the former BUSI 6300

6701 Information Technology Management - inactive course.

7000 Strategic Management 2 emphasizes concepts of strategic management and strategy in various contexts and situations covering corporate, divisional, business, and international businesses, and other organizations or organizational systems and their purposeful activities. Through in-depth analysis of reality-based situations and strategic issues, students will develop their contextual and situational orientation, and further develop their applied, investigative critical thinking and information search skills. Further, students will be expected to develop an applied ability in the contextual and situational analysis of corporations/businesses and institutions/purposeful activities, and in corresponding strategic formulation/strategy formulation/strategy planning for strategic implementation. Student learning activities may be based on published business cases, decision-making and group dynamics exercises, business simulations, and information research projects. Learning outcomes also may include research and information search methodologies and information literacy, and good writing.

CO: BUSI 5301
CR: BUSI 4010
PR: BUSI 4000, BUSI 4050, BUSI 4320, BUSI 4330, and BUSI 4500

7005 International Strategic Management (same as the former BUSI 6102) examines corporate strategy and strategic management in enterprises whose interests extend across national boundaries. International business managers and consultants must be able to formulate business strategy in environments that are affected by different politics, cultures, laws, economics, among other factors. The adept international business strategist will have a competitive edge if able to be at home in looking at international issues through the international monetary system, balance of payments, the foreign exchange market, international money and capital markets, the parity conditions, accounting exposure, economic exposure, transactions exposure, political risk, and global financing. Knowledge of these topic areas will give further understanding with respect to operating within the constraints of the international marketplace.

CR: the former BUSI 6012
PR: BUSI 5302

7010 Business and Society examines the inter-relationships among business, government, society and the environment. Topics include: the social-economic business system, business ideologies, social responsibilities of business, business ethics, stakehold and issues management, and selected current issues in business.

CR: Business 4020
PR: BUSI 5301

7110 Accounting Theory - inactive course.

7120 Advanced Financial Accounting covers specific topics such as long-term investments, consolidated financial statements, joint ventures, segmented financial information, and fund accounting.

PR: BUSI 6100 with a grade of at least 60% and BUSI 6110 with a grade of at least 60%.

7125 Accounting Capstone is a capstone course designed to prepare students to pursue a Canadian professional accounting designation. Students will be introduced to foreign currency transactions and translation, corporate income tax issues, and integrated case analysis and will further develop financial reporting, income tax, and auditing competencies.

CO: BUSI 7120
PR: BUSI 6100 with a grade of at least 60%, BUSI 6110 with a grade of at least 60%, BUSI 6120 with a grade of at least 60%, BUSI 6130 with a grade of at least 60%

7150 Taxation II - inactive course.

7160 Advanced Topics in Managerial Accounting introduces the student to an in-depth study of advanced qualitative and quantitative methodology applicable to the managerial accountant. The application of mathematical models and behavioural theories to realistic challenges faced by various fiscal entities will be stressed. Class instruction will include the use of cases and rely heavily on a multidisciplinary approach towards solving the unstructured problem.

PR: BUSI 5160 with a grade of at least 60%

7218 Customer Relationship Management (CRM) (same as the former BUSI 6218) is the evolution and integration of marketing ideas, data, technology, and organizational factors. Relying on the integration of people, processes, and marketing capabilities and facilitated by information technology, effective CRM optimizes the identification, acquisition, growth, and retention of desired customers. The history of CRM and the benefits and challenges of its implementation in business and consumer markets are addressed. The course culminates in the student’s creation of a CRM strategic plan.

CR: the former BUSI 6218
PR: BUSI 2010, BUSI 3210, BUSI 5220, BUSI 5250, the former BUSI 7250, and any of: BUSI 2210, the former BUSI 2201 or the former BUSI 3200

7230 Marketing Management is designed to integrate the principles, concepts and skills acquired in previous marketing courses and to enhance the student’s analytical and decision-making capabilities with regard to developing marketing strategies. The course will focus on: market analysis, marketing planning, the strategic decisions to be made within the framework of the marketing mix (product, price, promotion, and distribution); and the systems related to the marketing program. The use of marketing research and knowledge from other functional areas of the organization (accounting, finance, economics, etc.) will be considered throughout the course.

PR: BUSI 2010, BUSI 3210 or the former BUSI 5200, BUSI 4500, and BUSI 5220

7240 International Marketing provides an understanding of the effects that the international dimension has upon the strategies and management of the marketing efforts of the firm. In particular, the student is introduced to the basic techniques of the various environments that constitute a country analysis. Entry strategies are discussed with an emphasis upon the export process. Finally, the standardization/adaptation question is discussed in the context of each element of the marketing mix.

CR: the former BUSI 6001, Business 4230
PR: BUSI 2010, BUSI 3210, BUSI 5220 and any of: BUSI 2210, the former BUSI 2201, the former BUSI 3200

7310 Seminar in Human Resource Management seeks to integrate policies, procedures and methods covered in BUSI 6310 with other analysis areas which impact upon the management of Human Resource Systems. Stakeholder assumptions about work-force characteristics; management philosophy; business strategy; labour markets; laws and society; task technology and unions will be examined via a combination of cases, readings, research, peer discussion and dialogue with guest speakers.

PR: BUSI 4320
7315 Human Resource Management Training exposes students, through a variety of methods including lecture, discussion, case analysis, research, and the development of a detailed training program, to many topics in the area of human resource management training; including: needs analysis, training design, on and off-the-job training methods, technology and training, training implementation and delivery, transfer of training, and training evaluation.

PR: BUSI 4000 and BUSI 4300

7320 Collective Agreement Administration and Arbitration provides advanced coverage of the substantive and procedural rights of employers, unions and employees under collective agreements, and the means by which disputes over these rights are resolved through the grievance arbitration process. Topics examined include: the legal framework and place of grievance arbitration in the industrial relations system; the nature and scope of the arbitrator’s role; preparation for and conduct of arbitration hearings; arbitral jurisprudence; alternative dispute resolution processes; and the development of a sound labour relations climate. Students will undertake extensive reviews of labour arbitration cases and will examine the impact of jurisprudence on the philosophy and practice of management in the private and public sectors. Students may be exposed to various role playing exercises that are applicable to industrial and labour relations.

PR: BUSI 6021
PR: BUSI 4320

7321 Dispute Settlement in Labour Relations - inactive course.

7322 Labour Law provides an overview of laws regulating the employment relationship in Canada, including the common law, general employment and collective bargaining laws, and the nature and scope of Rights of Rights. Emphasis is placed on the law of collective bargaining in the private sector, including the acquisition and termination of bargaining rights, unfair labour practices, the duty to bargain, industrial conflict and the administration of the collective agreement.

PR: BUSI 4000 and BUSI 4300

7330 Organizational Development - inactive course.

7400 Simulation in Management emphasizes the use of simulation modeling techniques to study and analyze management systems. Generally, simulation is considered as an experimental technique and is used in problem situations whose complexity precludes the use of analytical problem solving techniques. Topics to be covered include: simulation methodology, model building, developing and building simulation models, simulation languages, generation of random numbers, and simulating a business system. Computers and case studies will be used to study various applications in business.

PR: BUSI 5401 or BUSI 5402

7410 Project Management introduces appropriate methodology and theory for selecting, planning and managing projects. This includes the project portfolio selection, the initial creation of a plan in terms of the breakdown of the tasks, construction of the relationships and dependencies inherent in any plan, and controlling the execution of the activities according to the plan as the project proceeds. Emphasis will be placed on resource allocation, leveling and management, critical path analysis, risk analysis, accounting for uncertainties, the role of the project manager and the project team as well as issues related to multi-project management will also be addressed.

PR: BUSI 2400, 3401, Statistics 2500

7415 Managing Business Process Flows employs a logical, rigorous approach to studying the fundamentals of business processes. This approach is based on modeling business processes and its flows, studying causal relationships between the business process and its performance, and formulation implications for managerial action by determining business process drivers and their impact on process management and performance. The focus is on business process flow, capability, productivity, variability, control, improvement, risk sharing and management, coordination and integration.

PR: BUSI 2400, 3401, 3700, Statistics 2500

7500 Advanced Finance (formerly BUSI 7130) examines advanced financial management, financial institutions, investor behavior and discussed. These topics shall vary as financial practices change.

CO: BUSI 6510
CR: the former BUSI 7130
PR: BUSI 5500

7510 Options and Futures (formerly BUSI 7170) is an extension of BUSI 6510 Investments which will introduce the student to the workings of the options and futures markets. Specific topics will include the institutional structure of the markets, option pricing, strategies such as straddles and spread, arbitrage, trading strategies, arbitrage and speculation, risk transference and market efficiency considerations.

CR: the former BUSI 7170
PR: BUSI 6510 or the former BUSI 6140

7600 Current Topics in Entrepreneurship (formerly BUSI 7032) endeavours to address recent research findings in various aspects of entrepreneurship. Students will have the opportunity to pursue issues in entrepreneurship development covering a wide range of topics using publications, journals and conference proceedings.

CR: the former BUSI 7032
PR: BUSI 5600

7700 Strategic Information Systems - inactive course.

7701 Current Topics in Information Systems - inactive course.

10.3 Work Term Descriptions

The following work terms are a requirement of the Bachelor of Commerce Co-operative program only.

The objectives of the Work Term component of the Business Administration Co-operative Program are embodied in the Work Term descriptions below. These descriptions serve to guide the student and employer toward achieving these objectives and to guide Business Co-operative Education and the Faculty of Business Administration in monitoring and evaluating each student's progress.

399W Work Term I follows the successful completion of Academic Term 3. For most students, it represents their first professional work experience in a business environment and as such represents their first opportunity to evaluate their choice of pursuing a career in business administration. Students are expected to learn, develop and practice the high standards of business ethics and performance normally expected in the work environment. (A detailed description of each job is normally posted during the job competition.)

As one component of the work term, the student is required to complete a work report. The work report, as a minimum requirement should
- analyse an issue/problem related to the student's work environment,
- demonstrate an understanding of the structure of a professional report,
- and,
- show reasonable competence in written communication and presentation skills. Students should consult UNIVERSITY REGULATIONS - Good Writing, and the evaluation form provided in the placement package.

Note: Students shall not conduct primary research as part of the Work Report.

PR: BUSI 300W

499W Work Term II follows the successful completion of Academic Term 4. Students are expected to further develop and expand their knowledge and work-related skills and should be able to accept increased responsibility and challenge. In addition, students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems. Students should conscientiously assess the various business opportunities relative to their individual interests.

The Work Report, as a minimum requirement should
- analyse an issue/problem related to the student's work environment and demonstrate an understanding of business concepts relative to the student's academic background,
- demonstrate competence in creating a professional report, and
- show competence in written communication and presentation skills.

Note: Students are permitted to conduct primary research as part of the Work Report, when it is required to achieve the report's research objectives. If primary research is conducted as part of the Work Report, it must be conducted in accordance with all policies and regulations of the University and the Faculty of Business Administration, including Memorial University of Newfoundland's policy on ethics of research involving human participants (www.mun.ca/policy/site/policy.php?id=139).

599W Work Term III follows the successful completion of Academic Term 5. Students should have sufficient academic grounding and work experience to contribute in a positive manner to the management and problem-solving processes needed and practiced in the workplace. Students should become acquainted with their discipline of study, should observe and appreciate the attitudes, responsibilities, and ethics normally expected of business managers and should exercise greater independence and responsibility in their assigned work.

The Communications Component should reflect the growing professional development of the student and, as a minimum requirement, the student will:
- demonstrate an ability to analyse a significant business issue/problem related to the student's experience in the workplace,
- demonstrate a high level of competence in delivering a professional oral presentation, and
- demonstrate a high level of competence in written communications.

The Communications Component for Work Term 3 consists of an Oral Presentation on a workplace-related business issue/problem. The presentation should be of about seven minutes duration followed by a three-minute question period and will normally be given on campus in a formal setting after students have returned to Academic Term. A written Executive Summary is also required. Guidelines for the preparation and delivery of this oral presentation along with deadlines are provided in the Business Co-
10.4 Comprehensive Case Analysis Description

The following course of study is an academic requirement of the Diploma in Business Administration and does not carry academic credit.

450W Business Methods in Practice is a non-credit course in which each student will undertake an analysis of an assigned case. A written report is mandatory. Evidence of the student's understanding of various business methods and the ability to gather material relating to the report, analyse it effectively, and present it in a clear, logical and concise form, will be required in the report.

Academic Disciplines for Bachelor of Education (Intermediate/Secondary) ......................... 107
1 The Memorial University of Newfoundland Code
The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University’s commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct
Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-
academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar. For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

3 Mission Statement
The Faculty of Education is committed to improving the human condition through education. The Faculty is dedicated to leadership and exemplary practice in teaching and learning, research and scholarship, and public engagement in local and global communities. Additional information regarding the Faculty of Education is available at www.mun.ca/educ.

A student must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to UNIVERSITY REGULATIONS.

4 Student Responsibility Clause
The Office of Undergraduate Programs, Faculty of Education, will assist students with questions or problems which may arise concerning their programs. It is, however, the responsibility of students to see that their academic programs meet the Faculty of Education and the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate).

5 Teacher Certification
Teacher Certification is a Provincial responsibility. Students are advised to contact Teacher Certification in writing at Teacher Certification and Records, Department of Education, P.O. Box 8700, St. John's, NL, A1B 4J6, or by visiting the website at www.ed.gov.nl.ca/edu/k12/teaching/certification.html for advice regarding Teacher Certification Regulations.

6 Registration in Education Courses
6.1 For Non-Education Students
Registration in Education courses is normally restricted to those students who have been admitted to a degree or diploma program in the Faculty of Education. A student in first year or a student in other Faculties or Schools who has completed not fewer than 24 credit hours may register for the following courses in Education without acceptance to a program when space is available: 2040, 2050, 2222, 2800, 2803, 3210, 3211, 3565, 3570, 3571, and 3660. Such a student is advised to consult degree or diploma regulations to determine which, if any, of the above courses can be applied to his/her program.

6.2 For Teacher Certification Upgrading and the Post-Secondary Instructors Certificate (as issued by the Government of Newfoundland and Labrador)
A student who has completed a degree program in Education, or equivalent, who wishes to register in Education courses for certification upgrading purposes and a student requiring Education courses for the Post-Secondary Instructors Certificate should contact the Office of Undergraduate Programs at least one month in advance of registration for permission and procedure.

7 Description of Programs
The admission/readmission regulations and the program regulations for each degree and diploma program listed below can be found at Admission/Readmission Regulations for the Faculty of Education and the Program Regulations, respectively.

All courses of the Faculty are designated by ED.

Important Notice
The Bachelor of Education (Native and Northern) program is no longer available for admission. Students previously admitted to the Bachelor of Education (Native and Northern) program and in good standing, must complete all program requirements by December 31, 2019. Students must follow the Calendar regulations for the Academic year in which they were admitted. Memorial University of Newfoundland Calendars by Academic year can be viewed at www.mun.ca/regoff/calendar.php. Students are advised to contact the Office of Undergraduate Programs, Faculty of Education by telephone at (709) 864-3403 or by e-mail at muneduc@mun.ca, for course selection and planning.

7.1 General Degree Programs
The Faculty of Education offers nine general degrees and one diploma program.

1. The Bachelor of Education (Intermediate/Secondary) is a second degree program designed to prepare teachers of grades 7-12. The program is offered in a three semester (12 month), full-time format, and commences in the Fall semester of each year.

2. The Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education is a program designed to prepare both Intermediate/Secondary and Technology Education teachers. The program is offered in a four semester (16 month), full-time format and commences in the Spring of each year. A student in the program will complete courses that address the development of basic skills and competencies in a variety of technological areas and how to apply them through design and problem solving processes in a school classroom/laboratory setting.

3. The Bachelor of Education (Post-Secondary) as a First Degree is designed to prepare students for a variety of instructional and leadership roles in formal and informal post-secondary education, including careers in academic, adult, community, technical and trades, and professional education. The program is available through part-time or full-time study. Students undertaking the program full-time are advised that a course load of 15 credit hours may not be available each semester.

4. The Bachelor of Education (Post-Secondary) as a Second Degree is a second degree program designed to prepare students for a variety of instructional and leadership roles in informal and formal post-secondary education, including careers in academic, adult, community, technical and trades, and professional education. Students in this program come from diverse backgrounds including administrative, academic, adult education, business, health, literacy, policy, student services, and technical and trades professions. The program is available through part-time or full-time study. Students undertaking the program full-time are advised that a course
load of 15 credit hours may not be available each semester.

5. The **Bachelor of Education (Primary/Elementary) as a First Degree** is a full-time, 150 credit hour degree program designed to prepare teachers for kindergarten through grade six. With the appropriate academic planning, a student can commence this Education program in the Fall semester of the third year of studies. A French Immersion Option is available in this program.

6. The **Bachelor of Education (Primary/Elementary) as a Second Degree** is a 72 credit hour program offered at the St. John’s and Grenfell Campuses and is intended for students who have completed an appropriate Bachelor’s degree. This program is offered in a four semester (16 month), full-time format and commences in the Spring semester of each year. A French Immersion Option is available at the St. John’s Campus only.

7. The **Bachelor of Music Conjoint with Bachelor of Music Education** is a 150 credit hour, five-year conjoint degree program offered in partnership with the School of Music. This program is designed for the preparation of K-12 music teachers, and other professionals in positions related to music education.

8. The **Bachelor of Music Education as a Second Degree** is a 45 credit hour degree program for students who have already been awarded a Bachelor of Music. This program is the same as the music education component of the conjoint program. The program is designed to prepare music teachers in all facets of school music education: foundations of music education; primary/elementary, intermediate/secondary classroom music; and choral and instrumental music education. The program consists of 30 credit hours of course work in music education and general foundational education and a 15 credit hour teaching internship.

9. The **Bachelor of Special Education** is a second degree program designed for the preparation of Special Education teachers and is available through part-time or full-time study.

### 7.2 General Diploma Program

The **Diploma in Adult Learning and Post-Secondary Education** explores practices, principles, and theories in the field of adult learning. This diploma program is designed to prepare graduates for instructional and professional roles in adult education settings such as community agencies, not-for-profit organizations, and community development programs.

### 8 Admission/Readmission Regulations for the Faculty of Education

The program regulations for each degree and diploma program listed below can be found at Program Regulations.

In addition to meeting UNIVERSITY REGULATIONS, an applicant must meet the Admission/Readmission Regulations for the Faculty of Education below and the Admission/Readmission Regulations for his/her program of admission/readmission.

1. Admission to degree and diploma programs within the Faculty of Education is limited, selective and highly competitive. Meeting minimum admission requirements does not guarantee acceptance to a program. The Faculty reserves the right to limit the number of spaces available in each program. When the number of eligible applicants exceeds the number of spaces available in a particular program, preference may be given to applicants who are permanent residents of Newfoundland and Labrador.

2. At least three positions per year are available in Education programs for applicants of Aboriginal ancestry who have met the admission requirements. Applicants must submit a letter of request with the Faculty application and provide documentation of Aboriginal ancestry.

3. The application for admission or readmission to programs offered by the Faculty of Education is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis_P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergradapply. Application forms and transcripts from institutions other than Memorial University of Newfoundland must be sent to the Office of the Registrar in accordance with the deadlines specified for each program in the Application Deadline Dates table below. Letters of reference and personal statement as required by the application form must be forwarded directly to the Faculty of Education Undergraduate Admissions Office. Applications received later than the stated deadline dates will be processed as time and resources permit.

4. Admission to programs within the Faculty of Education is determined by a Selections Committee and is based on the criteria listed for each degree/ diploma program. An applicant who is completing courses at this or another institution and for whom final and complete transcripts are not yet available may be granted provisional acceptance to the program to which he/she is applying pending the receipt of final transcripts. This provisional acceptance will remain valid until final transcripts are received. Deadline for receipt of final transcripts is June 15th. A provisionally accepted applicant may be granted a final acceptance upon review of the final transcript by the Selections Committee. The Faculty reserves the right to deny admission to an applicant who, in the opinion of the Selections Committee, is deemed unsuitable for admission to a program.

5. A student who has been admitted to a program in the Faculty of Education requiring a teaching internship is advised that he/she may be assigned to any Provincial school district and is responsible for all travel and accommodation costs associated therewith.

6. A student who has been admitted to a particular degree program offered by the Faculty of Education and who wishes to change to another degree program within the Faculty must submit a new Faculty application online within Memorial Self-Service at www5.mun.ca/admit/twbkwbis_P_WWWLogin that will be considered in competition with other applicants.
7. In special circumstances, the Committee on Undergraduate Studies, on recommendation from the Admissions Committee may, at its discretion, consider an applicant or group of applicants as an exception to the requirements.

8. A student who declines an offer of admission to the Faculty of Education, withdraws from the program, or who does not register for courses during the academic year in which admission is granted must, if he/she wishes to be subsequently considered for admission, submit a new application in competition with other applicants.

9. An unsuccessful applicant has the right to appeal the decision of the Admissions Committee not to offer him/her a place, if it is felt by the applicant that the decision was reached on grounds other than those specified under the Admission/Readmission Regulations for the Faculty of Education. The appeal should be made in writing within twenty-one days of the notification of the decision and should be directed to the Dean of Education. The letter should state clearly and fully the grounds for the appeal. If the Dean of Education, in consultation with the Registrar, judges the grounds to be sufficient, the formal appeals mechanism will be initiated. Normally, appeals will only be considered in the case of procedural error and/or receipt of new information that is relevant to the application. An applicant is advised to refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions section of the University Calendar.

10. The Faculty of Education does not require criminal record checks or other screening procedures as a condition of admission to programs. A student should, however, be aware that such record checks or other screening procedures are required by school districts/schools that host education students. Such agencies will not accept a student without a clear criminal record check or other screening procedure, which would prevent the student from completing a required component of the program. As a result, such a student may not be eligible for promotion or graduation.

It is the responsibility of the student to have such procedures completed as required and at his/her own expense. The Faculty of Education expects a student to provide evidence of a clear criminal record check before he/she is assigned to a school.

The screening procedures of any given agency may change from time to time and are beyond the control of the University.

11. The letter of acceptance to the Bachelor of Education (Intermediate/Secondary), Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education, Bachelor of Music Education as a Second Degree, Bachelor of Education (Primary/Elementary) as a Second Degree, and Bachelor of Education (Post-Secondary) as a Second Degree will give the successful applicant 14 days from the date of the letter of notification in which to confirm acceptance of the placement offer. The signed Accept/Decline Form indicating acceptance of the offer must be accompanied by a deposit of $150 which will be credited towards tuition fees. The deposit will be forfeited if the applicant subsequently declines the offer or fails to register. If no reply is received within 14 days, the offer by the Faculty will be withdrawn and the applicant will be informed of this by letter.

8.1 Bachelor of Education (Intermediate/Secondary)

1. For application deadlines refer to the Application Deadline Dates table. Consideration will be given to the courses for which an applicant is registered at the time of application. An applicant who will have completed all requirements for admission by the end of the Spring semester of the year that admission is being sought will be considered as time and resources permit. An applicant attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Winter semester grades no later than June 15.

2. To be considered for admission to the Bachelor of Education (Intermediate/Secondary) degree program, an applicant must have:
   a. been awarded a Bachelors Degree from a university recognized by Memorial University of Newfoundland;
   b. completed 36 credit hours in a subject listed under Academic Disciplines for Bachelor of Education (Intermediate/ Secondary) below (Business Studies, Newfoundland and Labrador Studies, and Religious Studies cannot be used to satisfy the 36 credit hour requirement);
   c. completed 24 credit hours in a subject listed under Academic Disciplines for Bachelor of Education (Intermediate/ Secondary) below but different from that in b. above; and
   d. achieved an overall average of at least 65% in the courses chosen to meet b. and c. above.

3. Academic Disciplines are deemed to be the disciplines on the following list. Courses from other disciplines deemed by the Admissions Committee to be equivalent to courses in any of the listed Academic Disciplines for Bachelor of Education (Intermediate/Secondary) will be acceptable.

<table>
<thead>

4. When calculating averages in the first and second teachable areas, no more than two 1000-level courses in each of the first and second teachable areas will normally be used.

5. A limited number of program spaces are allocated to each discipline. An applicant who is admitted with a particular Academic Discipline and who wishes to change to a different Academic Discipline must obtain permission of the Office of Undergraduate Programs. Such changes may not be possible in particular areas.

6. An applicant is advised that admission to the program on the basis of academic disciplines is dependent on sufficient numbers of applicants to warrant the offering of applicable methodology courses in those disciplines in any given year.

7. An applicant who is registered in the final semester of the first Bachelor's Degree program during the Winter semester must have satisfied the academic requirements set out in Clause 2. above upon completion of the first degree program.

8. In assessing applications to the Bachelor of Education (Intermediate/Secondary) program, consideration will be given to the following:
   a. average in each of the two academic disciplines;
   b. overall academic performance; and
   c. personal statement and references as outlined on the application to the Faculty.

9. Because of the structured, sequential nature of this program, a student must attend full-time. A student who drops any course which is part of the program will be dropped from the entire program.

10. A student who has been admitted to the program but chooses not to attend in the Fall semester of the year of admission will lose his/her admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be considered in competition with other applicants.

### 8.2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

1. For application deadlines refer to the Application Deadline Dates table. Consideration will be given to the courses for which an applicant is registered at the time of application. An applicant attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades no later than February 1.

2. To be considered for admission to the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education program an applicant must have:
   a. been awarded a Bachelors Degree from a university recognized by Memorial University of Newfoundland;
   b. completed 36 credit hours in a subject listed under Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education in clause 3. below; and
   c. achieved an overall average of at least 65% in the courses chosen to meet b. above.

3. Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education are deemed to be the disciplines on the following list. Courses from other disciplines deemed by the Admissions Committee to be equivalent to courses in any of the listed Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education will be acceptable.

4. When calculating the average in the 36 credit hours required under clause 2. b. above, no more than two 1000-level courses will normally be used.

5. A limited number of program spaces are allocated to each discipline. An applicant who is admitted with a particular Academic Discipline and who wishes to change to a different Academic Discipline must obtain permission of the Office of Undergraduate Programs. Such changes may not be possible in particular areas.

6. An applicant is advised that admission to the program is dependent on sufficient numbers of students to warrant the offering of applicable methodology courses in those disciplines in any given year.

7. An applicant who is registered in the final semester of the first Bachelor's Degree program during the Winter semester must have satisfied the academic requirements set out in Clause 2. above upon completion of the first degree program.

8. In assessing applications to the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education degree program, consideration will be given to the following:
   a. average in courses in clause 2. b.;
b. overall academic performance; and

c. personal statement and references as outlined on the application to the Faculty.

9. Because of the structured, sequential nature of this program, a student must attend full-time. A student who drops any course which is part of the program will be dropped from the entire program.

10. A student who has been admitted to the program but chooses not to attend in the Spring semester of the year of admission will lose his/her admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be considered in competition with those of all other applicants.

8.3 Bachelor of Education (Post-Secondary) as a First Degree

The Bachelor of Education (Post-Secondary) as a First Degree is designed to prepare students for a variety of instructional and leadership roles in formal and informal post-secondary education, including careers in academic, adult, community, technical and trades, and professional education.

A number of the courses also form the basis for the Post-Secondary Instructor Certificate awarded by the Government of Newfoundland and Labrador.

1. For application deadlines refer to the Application Deadline Dates table. To be considered for admission to the Bachelor of Education (Post-Secondary) as a First Degree program, an applicant must meet, in addition to the general admission requirements of the University, the requirements outlined below:

   a. the Diploma in Adult Learning and Post-Secondary Education; and
   b. a program of study as verified by one of:
      • a certificate of qualification as a journeyperson for a designated trade; or
      • a certificate or diploma from a college, university, or school (vocational, technical, business); or
      • satisfactory completion of a training program equivalent to bullet one or two above.

2. Advanced standing to a maximum of 30 credit hours may be awarded, upon admission, for training and work experience applicable to post-secondary education settings. Training and experience will be assessed by the Selections Committee for Post-Secondary Education. The work experience must be subsequent to the completion of, or concurrent with, the occupational training program.

8.4 Bachelor of Education (Post-Secondary) as a Second Degree

1. For application deadlines refer to the Application Deadline Dates table. To be considered for admission to the Bachelor of Education (Post-Secondary) as a Second Degree program, an applicant must meet, in addition to the general admission requirements of the University, the admission requirements as outlined below. Applicants must have:

   a. been awarded an undergraduate degree from Memorial University of Newfoundland or from an institution recognized by Memorial University of Newfoundland with at least second class standing or equivalent; or
   b. been awarded an undergraduate degree from Memorial University of Newfoundland or an institution recognized by Memorial University of Newfoundland and have successfully completed Education 2700, 2720 and 2801 with an average of at least 65%.

8.5 Bachelor of Education (Primary/Elementary) as a First Degree

1. For application deadlines refer to the Application Deadline Dates table.

2. Consideration will be given to the courses for which an applicant is registered at the time of assessment of applications. An applicant who has completed all requirements for admission by the end of the Spring semester of the year that admission is being sought will be considered as time and resources permit.

3. To be considered for admission, an applicant must have successfully completed 60 credit hours as outlined in Clauses a. - h. below with a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours. The 60 credit hours are:

   a. 12 credit hours in English including at least 6 credit hours at the 2000 level or above - ESL courses cannot be used to satisfy this requirement;
   b. 6 credit hours in Mathematics or 3 credit hours in Calculus;
   c. 6 credit hours in Psychology;
   d. Science 1150 and 1151; or 9 credit hours from 3 separate Science areas. The science areas are: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Physics; or a Focus Area in Science;
   e. 6 credit hours chosen in any combination from Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies, Sociology;
   f. 6 credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language;
   g. 15 credit hours as part of a focus area as set out in Table 9 Focus Areas for Bachelor of Education (Primary/Elementary) as a First Degree; and
   h. additional credit hours from areas other than Education.

4. An applicant with French as a Focus Area must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam.

5. In assessing applications to the Bachelor of Education (Primary/Elementary) as a First Degree program, consideration will be given to applicant’s:

   a. overall academic performance; and
   b. personal statement and references as outlined on the application to the Faculty.
8.5.1 Bachelor of Education (Primary/Elementary) as a First Degree, French Immersion Option

In addition to meeting the Admission Requirements for the Bachelor of Education (Primary/Elementary) as a First Degree, an applicant for this option must have French as a focus area as outlined in Table 9 Focus Areas for Bachelor of Education (Primary/Elementary) as a First Degree. An applicant with French as a Focus Area must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. A student admitted to this option will spend the two semesters of the Professional Year in a French milieu at an institution with which Memorial University of Newfoundland has a memorandum of understanding. An applicant who is interested in the French Immersion Option should contact the Office of Undergraduate Programs, Faculty of Education, at his/her earliest opportunity.

8.6 Bachelor of Education (Primary/Elementary) as a Second Degree

1. For application deadlines refer to the Application Deadline Dates table.

2. Consideration will be given to the courses for which an applicant is registered at the time of assessment of applications. An applicant who has attended institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades by February 1.

3. To be considered for admission to the Bachelor of Education (Primary/Elementary) as a Second Degree program, an applicant must have:
   a. been awarded a Bachelor’s Degree, or approved (prior to program startup) for the award of a Bachelor’s Degree from a university recognized by Memorial University of Newfoundland;
   b. achieved a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours;
   c. completed a minimum of:
      • 6 credit hours in English - ESL courses cannot be used to satisfy this requirement;
      • 6 credit hours in Mathematics or 3 credit hours in Calculus;
      • 6 credit hours in Psychology;
      • Science 1150 and 1151 or 6 credit hours in science in any combination to be chosen from: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Physics. It is recommended that applicants have 9 credit hours in Science.
      • 6 credit hours in any combination to be chosen from: Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies, Sociology;
      • 6 credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language; and
      • the equivalent of a completed focus area as per Table 9 Focus Areas for Bachelor of Education (Primary/Elementary) as a First Degree or the completion of a major or minor within the initial Bachelor's degree program in a subject area classified as a focus area.

   An applicant with French as a Focus Area must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. An applicant must also have completed at least 4 weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment.

4. In assessing applications to the Bachelor of Education (Primary/Elementary) as a Second Degree program, consideration will be given to the following:
   a. overall academic performance; and
   b. personal statement and references as outlined on the application to the Faculty.

8.6.1 Bachelor of Education (Primary/Elementary) as a Second Degree, French Immersion Option

In addition to meeting the Admission Requirements for the Bachelor of Education (Primary/Elementary) as a Second Degree an applicant for this option must have completed a major in French of at least 36 credit hours or equivalent and achieved at least an average of 65% in the 36 credit hours. Applicants with a French major must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. Applicants must have completed at least eight weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment. Admission to this option will be competitive and based on overall academic performance and demonstrated commitment, in the personal statement, to studies in French and French Education. Applicants who are unable to fulfill the eight week immersion requirements will be considered on a case-by-case basis.
8.7 Bachelor of Music Conjoint with Bachelor of Music Education
1. For application deadlines refer to the Application Deadline Dates table.
2. Applications for admission are considered once a year normally to the Fall semester. Consideration will be given to the Winter semester courses for which an applicant is registered at the time of application.
3. At the time of application, an applicant must have been formally admitted to, and be in clear standing with, the School of Music.
4. To be considered for admission, an applicant must have successfully completed a minimum of 45 credit hours with either a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours.
   Within the 45 credit hours, an applicant must have completed the following:
   a. at least 6 credit hours in English designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses;
   b. at least 3 credit hours from the following: Music 3221, 3222, 3231, 3232, 3233, 3241, 3242, 3261, 3281, 3282;
   c. at least 12 credit hours in Music, in addition to the 3 credit hours used to satisfy the clause directly above.
5. In assessing applications, consideration will be given to the following:
   a. average in the courses required for admission in clause 4. above;
   b. overall academic performance; and
   c. personal statement and references as outlined on the application to the Faculty. One reference must be from a faculty member of the School of Music.

8.8 Bachelor of Music Education as a Second Degree
1. For application deadlines refer to the Application Deadline Dates table.
2. Applications for admission are considered once a year normally to the Fall semester. Consideration will be given to the Winter semester courses for which an applicant is registered at the time of application.
3. An applicant who has been awarded a Bachelor’s degree in Music (or equivalent) from a recognized post-secondary institution may be admitted to the program leading to the degree of Bachelor of Music Education provided that the pattern of courses for the first degree is acceptable to the Selections Committee of the Faculty of Education. This pattern normally includes courses or equivalent experiences in conducting and instrumental techniques (brass, woodwinds, strings and percussion).

8.9 Bachelor of Special Education
1. For application deadlines refer to the Application Deadline Dates table.
2. Consideration will be given to the courses for which an applicant is registered at the time of application. Provisional acceptance may be granted to an applicant who will successfully complete all prerequisites prior to commencement of the program. A percentage of program spaces will be allocated to applicants having relevant teaching experience.
3. To be considered for admission an applicant shall have a minimum of a 65% average in the last 60 attempted credit hours (not including the internship) and also meet the following requirements:
   a. have been awarded a degree in Primary and/or Elementary Education, Music Education, or Intermediate/Secondary Education from Memorial University of Newfoundland or from an institution recognized by Memorial University of Newfoundland;
   b. have completed Education 4240 (or equivalent);
   c. have completed Education 3312 and 3543, or 4350 (or equivalent); and
   d. have successfully completed a professional internship in education or have equivalent teaching experience prior to admission.
4. There are four Education courses applicable to the Special Education degree program that may be completed prior to admission (following completion of an Education degree). They are Education 3040, 3640, 3660, 3941 (please see the Course Descriptions section for prerequisites).

8.10 Diploma in Adult Learning and Post-Secondary Education
The Diploma in Adult Teacher Education and the Diploma in Post-Secondary Education have been replaced with the Diploma in Adult Learning and Post-Secondary Education. Students are advised to contact the Office of Undergraduate Programs, Faculty of Education for further information.
1. For application deadlines refer to the Application Deadline Dates table.
2. To be considered for admission an applicant must have completed one of:
   a. a training program or slate of post-secondary level courses; or
   b. the Post-Secondary Instructor Certificate awarded by the Government of Newfoundland and Labrador.
Programs and courses will be assessed by the Selections Committee for Post-Secondary Education.
9 Program Regulations

The admission/readmission regulations for each degree and diploma program listed below can be found at Admission/Readmission Regulations for the Faculty of Education.

In addition to meeting Program Regulations for his/her program of admission/readmission a student must also meet UNIVERSITY REGULATIONS.

9.1 Bachelor of Education (Intermediate/Secondary)

- The full-time, 51 credit hour Bachelor of Education (Intermediate/Secondary) is a second degree program offered in three semesters (12 months) and commences in the Fall semester of each year.
- A student must complete the 51 credit hours in the academic semesters, sequence and course load as set out in Table 1 Bachelor of Education (Intermediate/Secondary) below. A student must also have complied with the Regulations for Readmission and Advancement for this program.

Courses may be offered in Spring, Intersession and/or Summer Session.
9.2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

- The full-time, 69 credit hour Bachelor Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education is offered in four semesters.
- The 69 credit hours shall include 30 credit hours in intermediate and secondary education, 24 credit hours in technology education and 15 credit hours of internship. A student must also have complied with the Regulations for Readmission and Advancement for this program.
- A student shall complete the 69 credit hours in the academic semesters, sequence and course load as set out in Table 2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education below.

9.4 Bachelor of Education (Post-Secondary) as a Second Degree

- The Bachelor of Education (Post-Secondary) as a Second Degree is a full or part-time, 36 credit hour program intended for students who have completed an appropriate Bachelor’s degree.
- The 36 credit hours are set out in Table 4 Bachelor of Education (Post-Secondary) as a Second Degree.
- A student can be awarded only one of the Diploma in Adult Learning and Post-Secondary Education, the former Diploma in Adult Teacher Education, the former Diploma in Post-Secondary Education or the Bachelor of Education (Post-Secondary) as a Second Degree.
- A student must also comply with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Second Degree.

9.5 Bachelor of Education (Primary/Elementary) as a First Degree

- The Bachelor of Education (Primary/Elementary) as a First Degree is a 150 credit hour program.
- The 150 credit hours must include: 75 credit hours in non-education courses including the courses required for admission, courses required to complete a focus area listed under Table 7 Focus Areas for Bachelor of Education (Primary/Elementary) as a First Degree below, and Human Kinetics and Recreation 2001; and 75 credit hours in Education courses as set out in Table 5 Bachelor of Education (Primary/Elementary) as a First Degree.
- Following admission, a student will normally progress in attaining the 150 credit hours required for the Bachelor of Education (Primary/Elementary) as a First Degree, in the academic terms, sequence and course load as set out in Table 5 Bachelor of Education (Primary/Elementary) as a First Degree. In particular, a student must have all non-education requirements completed prior to Professional Year; must enrol full-time during the Professional Year; and may enrol in the internship only after successful completion of the Professional Year.
- A student may choose to complete Bachelor of Education (Primary/Elementary) as a First Degree, French Immersion Option listed below.

9.6 Bachelor of Education (Primary/Elementary) as a Second Degree

- The Bachelor of Education (Primary/Elementary) as a Second Degree is a 72 credit hour program intended for students who have completed an appropriate Bachelor’s degree. This program is offered in a four semester (16 month), full-time format and commences in the Spring semester of each year.
- In addition to meeting these regulations, students must also meet UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Second Degree.
- The Bachelor of Education (Primary/Elementary) as a Second Degree requires 72 credit hours normally completed in the academic terms, sequence, and course load as set out in Table 8 Bachelor of Education (Primary/Elementary) as a Second Degree.

9.7 Bachelor of Music Education

The Bachelor of Music Education is delivered in two formats: the Bachelor of Music Conjoint with Bachelor of Music Education and Bachelor of Music Education as a Second Degree.

9.7.1 Bachelor of Music Conjoint with Bachelor of Music Education

- A student for the Bachelor of Music Conjoint with Bachelor of Music Education shall be required to complete a minimum of 159 credit hours in accordance with the Bachelor of Music degree regulations for the Bachelor of Music Conjoint with Bachelor of Music Education and the regulations below.
- A student shall complete 45 credit hours in Education as set out in Table 10 Bachelor of Music Conjoint with Bachelor of Music Education.

9.8 Bachelor of Special Education

- The full or part-time Bachelor of Special Education requires the completion of the Memorial University of Newfoundland Bachelor of Education Degree Primary and/or Elementary, Music Education, or Intermediate/Secondary, or another Education degree deemed appropriate by the Faculty of Education.
- In addition a student must complete a further 36 credit hours as outlined below in Table 12 Bachelor of Special Education.
- A limited number of courses are available through distance education. A student must comply with the University’s Regulations for a Second Degree as outlined in the University Regulations section of the Calendar.
- A student may request waiver of ED 3650 as outlined under Waiver Guidelines - Education 3650.

9.8.1 Waiver Guidelines - Education 3650

Following completion of ED 3600, a student who has at least two years experience as a Special Education teacher, and who provides a written report from his/her principal or other appropriate authority, certifying the quality of his/her experience, to the Office of Undergraduate Programs, may be granted waiver of ED 3650 upon approval by the Faculty of Education. A student approved for the waiver must substitute in its place 3 credit hours in Special Education. A student requesting waiver of Education 3650 must complete the appropriate form at www.mun.ca/educ/undergrad/forms.php.
9.9 Diploma in Adult Learning and Post-Secondary Education

The Diploma in Adult Teacher Education and the Diploma in Post-Secondary Education have been replaced with the Diploma in Adult Learning and Post-Secondary Education.

- The Diploma in Adult Learning and Post-Secondary Education is a part-time program and requires 30 credit hours in Education courses as outlined in Table 13 Diploma in Adult Learning and Post-Secondary Education.
- At least 21 of the 30 credit hours required for the Diploma must be completed at this University.

10 Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Intermediate/Secondary), and Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

These regulations apply to the Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Intermediate/Secondary), and Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education. For any of the degree programs not listed here see Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a First Degree, Bachelor of Music Conjoint with Bachelor of Music Education, Bachelor of Music Education as a Second Degree, Bachelor of Special Education, Bachelor of Education (Post-Secondary) as a First Degree, Bachelor of Education (Post-Secondary) as a Second Degree, and Diploma in Adult Learning and Post-Secondary Education.

1. A student who is required to withdraw from the University under regulations stated in Clause 2. above.
2. A student who has been required to withdraw from the Faculty of Education may, after a lapse of at least two semesters, apply for readmission to the Faculty. A student who is readmitted under this Clause will be considered probationary and must meet requirements stated in Clause 2. above.
3. A student who is required to withdraw from the University under UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) will be required to withdraw from the Faculty of Education.
6. A student who has been required to withdraw from the Faculty on two occasions will be ineligible for future readmission.
7. Notwithstanding Clauses 1. through 4., the Committee on Undergraduate Studies on recommendation from the Admissions Committee reserves the right to require a student to withdraw from the Faculty at any time if, in the opinion of the Committee, he/she is deemed unsuitable for continued attendance in the programs.
8. A student who has been required to withdraw from the Faculty may register only in those Education courses listed as applicable for non-Education students.
9. In exceptional circumstances, the Committee on Undergraduate Studies may waive the Readmission and Advancement regulations for the Faculty of Education as stated above.

12 Graduation
Upon meeting the qualifications for any of the programs offered by the Faculty a student must apply to graduate on the prescribed “Application for Graduation” form. This form may be obtained on-line at Memorial Self Service at www3.mun.ca/admit/twbkwbis_P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

13 Waiver of Faculty Regulations
A student has the right to request waiver of Faculty regulations. The requirement for a specific course, or courses, may in special circumstances, and upon individual request, be waived by the Committee on Undergraduate Studies. Such waivers shall not reduce the total number of credits required for the Degrees or Diploma.
A student wishing waiver of University academic regulations should refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations.

14 Appeal of Decisions
Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions.

15 Course Descriptions
In accordance with Senate’s Policy Regarding Inactive Courses, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the Faculty.
All courses of the Faculty are designated by ED.

Legend:
A: Courses for students in the Aboriginal Community Based programs
AL: Courses for students in the Adult Learning and Post-Secondary Education program
IS: Courses for students in the Intermediate/Secondary program
ISI: Courses for students in the Intermediate/Secondary
ME: Courses for students in the Music Education program
PE: Courses for students in the Primary/Elementary programs
PS: Courses for students in the Post-Secondary Education programs
SE: Courses for students in the Special Education program

2022 The Teaching of Inuttut (ACP) focuses on the preparation of materials and the development of methods, strategies and assessment techniques for the teaching of Inuttut in schools in Labrador.

2023 Language and Culture in Education (ACP) explores contexts, curricula and materials that recognize cultural diversity (especially Aboriginal cultures), foster the teaching and maintenance of Aboriginal languages, and support the work of Aboriginal language specialists in the classroom.

2032 The Teaching of Innu-aimun (ACP) focuses on the preparation of materials and the development of methods, strategies and assessment techniques for the teaching of Innu-aimun in schools in Labrador.

2038 Aboriginal Music and Art (ACP) is a study of music and art in cultural transmission. The course will develop skills in reading and writing associated with Aboriginal cultures, and will emphasize activities for exploring the elements of music. Aboriginal art forms will be explored as well as art in decoration in Aboriginal society.

2039 Aboriginal Land Based Learning (ACP) is for students interested in learning about the Aboriginal cultures of Newfoundland and Labrador. Under the guidance of Elders and traditional teachers, learners will gain an understanding of Aboriginal pedagogy, land-based learning and ways of integrating culture into the school curricula. This course is normally offered at Labrador Institute.

2040 Basic Interpersonal Communication (PE) is designed to help students develop confidence through self-expression, and acquire skills in interpersonal relationships.

CR: the former ED 2041

2050 Introduction to Drama Education (ME,PE) is designed to introduce students to the use of drama as a learning medium. Students will be expected to participate in and to critically analyse practical drama sessions in order to gain an understanding of the fundamental nature of drama. Students will be engaged in a variety of teacher devised drama structures to introduce them to the theory and practice of selected pioneers in the field. Reference will be made to some aspects of child development such as play, cognition, affect and language and their relationship to learning through drama. It is expected that students will begin to formulate a rationale for the use of drama education in their future classroom practice.

CR: the former ED 2030

2194 Physical Education in the Primary and Elementary Grades is an introduction to the teaching of physical education in the Primary and Elementary grades; instructional material and teaching techniques for these grades; creative, aesthetic, and health-developing aspects of physical education.

CR: the former ED 3070, or the former ED 2192 taken during the 1984-85 or 1985-86 academic years.

2202 Education in Aboriginal and Northern Communities - An Overview (ACP,PE) is an introductory course where students explore teaching an Aboriginal or northern context with particular focus on Newfoundland and Labrador. This course will include an understanding of philosophical and cultural distinctions between Aboriginal and non-Aboriginal approaches to teaching and learning; an examination of significant historical developments in Abi

2222 Teaching English as a Second Language (PE) includes selection and preparation of materials, and suitable classroom strategies for teaching English as a second language. Stress will be on the methods appropriate to cope with linguistic difficulties encountered in schools by children whose first language is not English.

2500 Orientation to Music Education (ME) is an introduction to music education, bridging life as a musician and the development of a career as a musician-teacher. Topics include an overview of theoretical, philosophical, historical, sociological, cultural, psychological, methodological, and curricular foundations of music education as well as contemporary contexts and issues in music education. Emphasis is on research and writing in music education, technology applications, and the development of functional keyboard skills specific for music educators.

2515 Primary/Elementary School Music Methods (ME,PE) examines

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
current pedagogical practices, methodologies, and resources for use in the primary and elementary school music program. Within the context of authorized K-8 curriculum guides, teacher candidates will develop skills and instructional strategies for developing the singing, moving, playing, listening, and creating child.

CR: the former ED 2510, the former ED 2530
PR: Primary/Elementary program candidates must have completed the focus area in music

2520 Voice and Choral Methods (ME) examines current pedagogical practices, procedures, and resources for use with all levels of school singing ensembles and choirs. Emphasis is placed on developing teacher candidates' own vocal techniques. Topics include philosophy and history of choral music, music education, vocal and choral pedagogy, and components/organization of choral programs.

LH: a 2 hour twice weekly laboratory section (MUN Lab Choir) designed to provide practical teaching experience and methodologies in vocal/choral settings

2700 Academic Literacies in Adult and Post-Secondary Learning Contexts (AL,PS) examines the literacies, discourses and epistemologies of post-secondary learning contexts. Academic areas are ways of knowing which are generated and defended through language, practices and texts. This course explores ways of making explicit these often implicit activities. It provides opportunities to understand different forms of knowledge, what counts as evidence, and how 'texts' are developed, written, read and performed.

2710 Course Organization and Development in Post-Secondary Education (ME,PE) examines the development of procedures for the identification of concepts in instructional units; analysis of tasks and identification of related competencies; development of resource units.

2711 Course Organization and Development in Technology Education (ISI) is an examination of the development, structure and organization of technology education curriculum locally and internationally; applications of design and problem solving instructional strategies; the management of resources in technology education laboratories; the development of resource units for teaching.

2720 Introduction to Post-Secondary Education (AL,PS) is a study of the background of Post-Secondary Education and of its development and present forms in Newfoundland, other provinces of Canada, and other countries; an examination of current programs in Post-Secondary Education; the role of federal and provincial governments in Post-Secondary Education.

2730 General Methods of Teaching in Post-Secondary Education (AL,PS) is an introduction to teaching and learning methods in post-secondary and adult learning contexts and it includes preparation, learning goals, higher order assessment and a range of methods such as facilitation, lecturing, active learning, experimental learning and problem-based learning.

2740 Ethics and Professionalism in Adult and Post-Secondary Education (AL,PS) will explore the ethical dimensions of adult and post-secondary education in Canadian higher education. Students will consider the meaning of ethical professional practice within the post-secondary environment and examine the importance of ethical theories to real world learning contexts within adult and post-secondary education.

2750 Introductory Design and Materials Processes (ISI) examines theory and practice of teaching problem solving, design and materials processes. Topics and practical activities include production and computer assisted design.

AR: attendance is required
OR: WhMIS training. Information can be obtained from the Office of Undergraduate Student Services.

2752 Teaching Current and Emerging Power Technology Systems (ISI) provides technology education students with opportunities to apply current teaching and learning strategies to the issues surrounding traditional and emerging energy technologies. Major topics of study include: fundamentals of sustainable energy production and control, redevelopment and use of traditional energy sources, application of solar energy wind power production, and fuel cell development and utilization.

AR: attendance is required
OR: WhMIS training. Information can be obtained from the Office of Undergraduate Student Services.

2800 Introduction to Adult Education (AL,PS) is a review of the history of the Adult Education movement. The rationale for the investment of public or traditional energy sources, application of solar energy, wind power and fuel cell development and utilization.

AR: attendance is required
OR: WhMIS training. Information can be obtained from the Office of Undergraduate Student Services.

2801 Adult Learning (AL,PS) examines the major foundational theories of adult learning, the contextual nature of adult learning and various dimensions of learning and development throughout adulthood.

2803 Educational Aspects of Adult Development (AL,PS) is an examination of the educational aspects of adult development from early adulthood through middle age to later maturity.

2806 Sociology of Adult Education (AL,PS) explores the sociological context of adult learning. The interrelationship between particular social factors (e.g., age, sex, occupational structure) and the need for adult education programs are studied. Emphasis is given to the interplay of societal structures and its impact on education. Special emphasis is given to societal change as it relates to education as a way of life.

2900 Introduction to Statistics in Education (ME,PE,PS) is a laboratory course which takes a practical case study approach to survey and quasi-experimental quantitative methods in education. Emphasis is given to discussing statistical concepts of probability, descriptive and inferential statistics, sampling and sampling distributions, correlation and bivariate regression.

LH: 2

3007 Teaching Strategies in Native and Northern Schools - inactive course.

3009 Drama Education in the Primary and Elementary Grades (ME,PE) - inactive course.

3040 The Assessment and Development of Children's Language Abilities (PE,SE) focuses on techniques for assessing language abilities in primary/elementary and intermediate/secondary students and will provide models for developing strategies in implementing language instruction appropriate to students' needs.

PR: ED 4350, 3543, or the former 3540 or 3545

3050 The Teaching of French as a Second Language in the Primary and Elementary Grades (ME,PE) introduces a second language-teaching, to the curriculum materials currently prescribed for use in the schools, and to a consideration of teaching strategies and evaluation techniques associated with these materials.

OR: for students completing the Bachelor of Education (Primary/Elementary) as a Second Degree, French Immersion Option this course will be taught in French

PR: French 2101

3052 and 3053 Institute for Teachers of Core French in the Elementary Grades (PE) - inactive course.

3120 Foundations of Art Education (ME,PE) develops an understanding of the relation to current theories of education and art education to provide individual exploration of an experience in appropriate techniques. Curriculum will be examined with the focus on understanding how to provide favourable conditions and experiences for high quality individual development in visual expression.

CR: the former ED 2020, the former ED 3110, the former ED 3112

3131 Music Education in the Primary/Elementary Grades (PE) is designed to provide the prospective primary/elementary classroom teacher with the knowledge, skills and understandings necessary for presenting music concepts and skills to students and for using music as a means for teaching or enriching other areas of the curriculum. Course work will include study in the three facets of general classroom music: scholarship of the discipline, musicianship, and classroom methodology.

CR: the former ED 3130

UL: not applicable towards the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education or the Bachelor of Music Education as a Second Degree

3150 Bilingualism: Linguistic, Cognitive and Educational Aspects (PE) - inactive course.

3210 Introduction to Counselling (AL,PE,PS) is an introduction to the profession of counselling throughout the lifespan with specific emphasis on the definition and history of the profession, the characteristics and professional competencies of a counsellor, ethical issues and principles, theories and current issues. Topics also include an introduction to the nature of counselling and ways of developing effective interpersonal relationships within various educational contexts.

3211 Introduction to Career Education (PE) is an introduction to contemporary concepts and practices of career education and to theories of career development. Emphasis is on the practical application of theory and basic principles to the design and delivery of career education programs and to career counselling. Attention will be given to continuing career counselling and career development needs of individuals as well as to groups with special needs.

CR: the former ED 4906

3255 Child Abuse and the School-Age Child (PE) will discuss the general issues of child abuse including definitions, detection, reporting, prevention, and the educational implications of child abuse. A number of specific issues including provincial policies presently in force in Newfoundland and Labrador and elsewhere will be examined. The teacher's role in collaboration between officials in education, social work, health and justice agencies will be explored with a view to preventing abuse and
modifying the circumstances of abused children.

3273 Science in the Primary/Elementary Grades (PE) is a practical course designed to develop approaches to Science teaching based on student investigation of scientific phenomena. Examples are drawn from both provincial and other major curricula. 
CR: the former ED 2180, the former ED 3270, the former ED 3275.

3280 Educational Assessment (ALPS) is a study of the broad spectrum of educational assessment focussing specifically on the development of objectives, the construction and use of formal teacher-made tests, the use of informal assessment techniques, the interpretation and application of assessment data, continuous evaluation, criterion-referenced measurement, and emerging trends in assessment.
CR: the former ED 4912.

3290 Identifying Learner Diversity Within a Context of Culture (PE) - inactive course.

3312 Language Arts in the Primary/Elementary School I (PE) provides students with a holistic view of the learning and teaching of language arts (i.e., the receptive language abilities of viewing, listening and reading, and the expressive language abilities of speaking and writing). This course will help students develop a theoretical perspective on two major aspects of language, that being “knowledge of language” (i.e., knowledge of the structural system or system of rules) and “knowledge about language” (i.e., knowledge about attitudes and perceptions towards language and the various purposes of language). This course will extend students’ understanding of the importance of the home/community influences upon emergent and developmental literacy and language development.
CR: the former ED 2210, the former ED 2220, the former ED 3305, the former ED 3315.

3322 Children’s Literature in the Primary/Elementary School (PE) focuses on the personal and educational values for using children’s literature in the classroom. The course will examine appropriate and effective methods of integrating children’s literature into primary/elementary school teaching, and students will be scheduled so that they can learn how to use and implement narratives, applications and curricular frameworks. 
CR: the former ED 2060, the former ED 2065, the former ED 3310, the former ED 3320.

3440 Organization and Administration of Programs in Adult Education (PE) examines alternative provincial or regional methods of organization for the provision of Adult Education, including the statutory framework within which Adult Education functions.

3464 Computers and Learning Resources for Primary/Elementary Teachers (PE) focuses on the integration of computer software and other learning resources into primary/elementary school teaching. Laboratory components will be scheduled so that students may learn how to use and implement communications, applications and curricular software.
CR: the former ED 3480, ED 3801, the former ED 4480, the former ED 4905.

3515 Current Approaches to Reading in the Primary and Elementary Grades (PE) - inactive course.

3543 Language Arts in the Primary/Elementary School II (PE) provides students with a sociopsychological perspective on language learning, reading, and writing. Students will explore current and traditional models of the reading process and the importance of home/school/community contexts for fostering literacy learning. Students will apply instructional strategies for children’s learning of story, book and print concepts, word identification, fluency, vocabulary development and comprehension for a variety of texts.
CR: the former ED 2110, the former ED 2120, the former ED 3540, the former ED 3542, the former ED 3545.
PR: ED 3312.

3565 Gender and Schooling (PE) is an introduction to the study of gender and education. It includes a historical overview of the link between gender and schooling as well as an examination of contemporary theoretical perspectives and research relating to the role of the school in gender development in general and gender inequality in particular. Implications for educational policy and practices will also be explored.

3570 History of North American Education (PE) - inactive course.

3571 The History of Education in Newfoundland Since 1800 (PE) - inactive course.

3573 History and Current Trends in Aboriginal Education in Canada (ACP,PE) is a seminar course that explores how to integrate indigenous knowledge and experience in curriculum and pedagogy in classrooms and communities, and on the land. The course offers insights from past experience and draws on Aboriginal perspectives to understand educational history, current contexts and future directions. Students will develop critical analytical skills and learn about restorative justice, land and place based education, and other pedagogical approaches based on Aboriginal knowledge and cultures.

3585 Multiculturalism and Education (PE) - inactive course.

3600 Academic and Behavioural Assessment (PE) applies the theories of test development in establishing a competent understanding of the utilization of diagnostic and prescriptive instruments as well as teacher-made tests as they apply to the area of exceptional children.
AR: attendance is required.

3610 Nature and Characteristics of Intellectual Disabilities (SE) aims to provide an understanding of the nature and characteristics of intellectual disabilities and the psycho-social implications of this area of exceptionality.

3618 Nature of the Primary/Elementary School Child - Development (ME,PE) is intended to provide students with an awareness and understanding of the origins of many aspects of child behaviour and competence. While focussing on the development and nature of the "normal" child, where appropriate, contrasts and comparisons will be made between the development of "normal" and "exceptional" individuals.
CR: the former ED 2610, the former ED 3640.

3619 Nature of Primary/Elementary School Child - Learning and Cognition (ME,PE) provides an introduction to human learning, motivation and cognition and to the related concepts and theories underlying children's classroom learning and behaviour. Focus will be on typical development with reference to atypical (disability) functioning in these areas. Emphasis will be placed on the use of and the need for the knowledge and concepts to describe classroom learning and with explanations and justifications for many educational and instructional activities and practices. Particular attention will be paid to application of this knowledge to instruction and classroom management and to the facilitation of learning.
CR: the former ED 3616, the former ED 3615.
PR: ED 3618.

3620 Nature and Characteristics of Emotional/Behavioural Disorders (SE) includes an examination of procedures for the early identification of children with behavioural disabilities and major systems of classification of behaviour problems. It will also include an analysis of: aberrant adjustment mechanisms, deviant development and specified behaviour problems with implication for therapeutic education.
PR: ED 4240, or the former ED 3220 or ED 3230.

3630 Nature and Characteristics of Learning Disabilities (SE) examines our theoretical understanding of the nature and characteristics of learning disabilities. It explores contemporary understandings, assessment/identification approaches, and current research as it relates to educational practice.
CR: the former ED 3231.

3640 Current Issues in Special Education (PE,SE) consists of a study of special and selected problems related to the teaching of special education with particular emphasis placed on special education within the Province of Newfoundland and Labrador.
PR: ED 4240, or the former ED 3220 or ED 3230.

3650 Practicum in Special Education (SE) encompasses a practice experience with students who have an identified exceptionality. The emphasis will be on a supervised field placement in a special education position within a school setting.
PR: completion of 18 credit hours in Special Education including ED 3600.

3660 A Study of the Gifted Child (ME,PE,SE) is an examination of the nature and characteristics of gifted children, with emphasis upon methods of identifying gifted children, implications of giftedness for learning and instruction and reviews of several educational programs for the gifted.

3680 Inclusive Practices for Students with Autism Spectrum Disorder (ASD) (SE) examines the nature of ASD with particular focus on methods of behavioral assessment, use of assistive technology and specific therapy techniques. Support programs will be considered within an ecological context that prioritizes collaborative planning with parents and other therapeutic agents.

3690 Collaborative Practice (SE) examines the theoretical and practical aspects of collaborative practice within an interagency model of case planning for students with diverse learning needs. Emphasis is on exploring issues of power/empowerment, consultation, communication, conflict resolution/problem-solving, advocacy and collaboration. Perspectives of parents and families, educators, and community resource professionals will be explored. The course strives to create a family-focused approach to effective planning in contemporary schools.

3691-3699 Special Topics Courses in Special Education (SE) to be announced by the Faculty of Education.

3710 Group Instruction in Post-Secondary Education (PS) - inactive course.

AR = Attendance requirement; CR = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LG = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
3720 Individualized Instruction in Post-Secondary Education (PS) - inactive course.

3730 Curriculum and Instructional Development in Post-Secondary Education (AL/PS) examines the social, cultural, philosophical, and economic forces impacting educational practices in Post-Secondary curriculum and instructional methods. Study of current Post-Secondary Education curriculum designs, problems and trends; methods of gathering curriculum information; procedures for revising and evaluating a curriculum.

PR: ED 2710 and ED 2730.

3750 Intermediate Design and Materials Processing Technology (ISI) provides opportunities to apply current teaching and learning strategies within the technology education laboratory environment. Technology education students will examine labor trends that are impacting society's ability to expand and maintain today's infrastructure. Innovative teaching methodologies will be utilized to facilitate further exploration of the opportunities offered in skilled trades. Topics include: Red Seal Certification, print reading and application of the National Building Code within selected skilled trades. This course is normally offered in a three week accelerated format in the Summer Session.

AR: attendance is required.

3751 Teaching Intermediate Communication Systems (ISI) examines the application and use of modern communication techniques through the various forms of media available. Technology education students will engage in activities that will provide insights into how current teaching and learning strategies can be blended with contemporary communication devices and means to facilitate collaborative lifelong learning. Topics include: web based multimedia, graphic design, audio/video production, animation production and social networking applications. This course is normally offered in a three week accelerated format in the Summer Session.

AR: attendance is required.

3801 Educational Media (AL/PS) introduces audio visual communications with emphasis on equipment operation and basic local production of instructional materials; and the application of computers to education.

CR: the former ED 3480, ED 3484, the former ED 4480, the former ED 4905.

3920 Instrumental Teaching Methods (ME) examines current pedagogical practices, procedures, and resources for teaching brass, woodwinds, percussion, and strings in both band and orchestral school settings. Emphasis is placed on the development of comprehensive instrumental music education programs.

LH: a 2 hour twice weekly laboratory section (MUN Lab Band and Orchestra) designed to provide practical teaching experience and methodology in both band and orchestral settings.

3925 Intermediate/Secondary School Music Methods (ME) examines current pedagogical practices, procedures, and resources for teaching Music in the intermediate/secondary schools. In addition to standard contexts in general music, choral, and instrumental settings, emphasis is placed on technology and settings such as musical theatre in order to reflect the diversity of music programming in intermediate/secondary schools.

3940 Mathematics in Primary and Elementary Grades (PE,PS) is a general overview of the mathematics curriculum in primary and elementary grades. Topics of child development as they relate to mathematics teaching, characteristics of Mathematics topics in primary and elementary grades, and the implications for teaching will be the major topics to be discussed in this course.

CR: the former ED 2340, the former ED 2310, the former ED 2320.

3941 Diagnosing and Directing Learning in Primary and Elementary Mathematics (PE,SE) is a study of aspects of diagnosis and remediation in primary and elementary Mathematics, and of the basis for constructing and applying diagnostic techniques. The course offers an examination, development, and application of a variety of manipulative aids and assistive technology to be used in the teaching of Mathematics in the primary and elementary grades.

PR: ED 3940.

3945 and 3946 Institute in Teaching of Junior High School Mathematics Course (PS) will focus on the nature of junior high Mathematics instruction, and how it should differ from elementary and high school instruction. Emphasis will be placed on the transition between informal and formal approaches to the teaching of junior high Mathematics. The Van Hiel levels and their implications for instruction in geometry will be discussed. Activities appropriate to the teaching of junior high Mathematics will be developed and demonstrated. A particular focus in this component of the Institute will be on activities appropriate to the new program and how they can be integrated into the junior high Mathematics curriculum.

PR: ED 3940 (or equivalent) or ED 4161 (or equivalent) or permission of the instructor.

3951 Curriculum, Instruction, and Assessment in the Primary/Elementary School I (PE) is designed to engage students in an introduction to curriculum, instruction, and assessment in the primary/elementary school through active participation in problem solving. Students will be introduced to the different ways that primary/elementary school children view and make sense of their world (i.e., the linguistic, mathematical, scientific, artistic). Working through such a framework, students will be introduced to instructional strategies and planning, formative and summative assessment, and issues inherent in the management of the primary/elementary classroom, as they create multi-disciplinary, thematic, resource-based units. OR: for students completing the Bachelor of Education (Primary/Elementary) as a Second Degree, French Immersion Option this course will be taught in French.

3952 Curriculum, Instruction, and Assessment in the Primary/Elementary School II (PE) is designed to engage students in a deeper exploration of issues in curriculum, instruction, and assessment in the primary/elementary school through active participation in problem solving. Students will be introduced to the different ways that primary/elementary school children view and make sense of their world. Working through such a framework, students will be introduced to instructional strategies and planning, formative and summative assessment, and issues inherent in the management of the primary/elementary classroom, as they create multi-disciplinary, thematic, resource-based units. OR: for students completing the Bachelor of Education (Primary/Elementary) as a Second Degree, French Immersion Option this course will be taught in French.

3962 Social Studies in the Primary/Elementary School (PE) is an introduction to the social studies program at the primary/elementary school level. Topics to be explored include the nature and purposes of the social studies curriculum, approaches to teaching and learning in this curricula area, selecting and utilizing learning resources, and conducting assessment in the social studies.

OR: the former ED 2160, the former ED 2160.

4005 Effective Teaching and Learning Environments (IS,ISI) introduces the principles, dispositions, and skills needed to create various types of effective learning environments. Topics include: professional relationships, school culture, decision making classroom management and models of teacher power.

401X Undergraduate Teaching Internship (PE) (equivalent to 15 credit hours in Education) is a 65 day teaching and learning experience, framed by explicit guidelines, designed to provide students an opportunity to integrate theory and practice in the school classroom. It includes both observation periods and extensive teaching experiences. The internship is intended to help students develop their individual style of teaching, to enable students to recognize the scope and complexity of a classroom teacher’s role and responsibility, and to provide opportunities for the study of children as individuals and in groups, both in the classroom and other school settings.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

OR: students may not be placed in the first school of choice and may be assigned to another appropriate school.

PR: successful completion of the professional year. Students must have completed the professional year of the French Immersion Option to be assigned to a French Immersion classroom.

4020 Topics and Trends in Aboriginal Education (ACP) is a seminar course with a focus on topics and trends in Aboriginal educational research and practice in Newfoundland and Labrador, as well as other Aboriginal contexts. The course will provide a greater understanding and appreciation of Aboriginal educational needs and self-determination within national and local socio-political contexts.

403X Internship in Music Education (ME) (equivalent to 15 credit hours in Education) is a one semester internship in one or more schools to provide student teaching experiences in choral, classroom, and/or instrumental teaching contexts in primary, elementary, intermediate, and/or secondary schools settings.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

OR: students may not be placed in their first district of choice and may be assigned to another Provincial school district.

PR: ED 2500, ED 2515, ED 2520, ED 3925 and any additional requirements as outlined in the letter of acceptance to the music education program.

406T Introductory Internship in the Intermediate and Secondary School (IS,ISI) is a 10 (consecutive) school day teaching and learning experience, framed by explicit guidelines, that focuses on key learning experiences and goals and responsibilities related to professional teaching. It includes both observation periods and initial teaching experiences.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

407T Extended Internship in the Intermediate and Secondary School (IS,ISI) is a 60 day teaching and learning experience, framed by explicit guidelines, that focuses on key learning experiences and graduated responsibilities related to professional teaching. It includes both observation periods and initial teaching experiences.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
responsibilities related to professional teaching. It includes both observation periods and extensive teaching experiences.

AF: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

CH: 12
CR: the former ED 4053
OR: Interns pursuing the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education will be placed for part of the internship in a Technology Education classroom setting. PR: Education 406T. Interns wishing to complete an internship in French immersion must complete Education 4154 and obtain the permission of the Office of Undergraduate Programs. Normally, French immersion interns have the equivalent of a major in French and a minimum of two semesters in a French milieu.

4120 The Teaching and Learning of Art in the Intermediate and Secondary School (IS,ISI,ME) introduces the rationales for teaching art and examines contemporary art teaching practices. Teacher candidates will examine their roles as artist-teacher and teacher-artist, as well as explore learning in and through art. Topics include curriculum implementation; instructional planning; managing the learning environment; assessment and evaluation; safety; arts advocacy; and visual, artistic and technological literacies.

4121 The Teaching and Learning of Theatre Arts in the Intermediate and Secondary School (IS,ISI,ME) engages teacher candidates in developing their role as theatre artist/teacher. Topics include: beliefs informing the practice of theatre arts in the context of school; related pedagogies and educational practices in dialogue with the art form of drama; producing and directing drama; and theatre education, an interdependence relationship, implementation planning strategies; communication style and facilitative language.

4122 The Teaching and Learning of the English Language Arts in the Intermediate and Secondary School (IS,ISI,ME) draws on research in the teaching and learning of English/language and literacy to prepare teacher candidates to be effective in teaching English as a second language. Topics include: curriculum; the nature and structure of language and literature programs; test analysis, response and critique; writing and representing genres in multimodal and linguistic; media literacy forms; and oracy.

4151 Advanced French Methodology (IS,ISI,NS) - inactive course.

4154 The Teaching and Learning of French in the Intermediate and Secondary School (IS,ISI,ME) provides an introduction to the nature and purpose of French programs in Canada. Topics include: an overview of the purpose of core French and French immersion; theories and principles of second-language teaching and learning; methods; techniques, strategies and characteristics of effective planning and assessment in second-language teaching.

4155 Introduction to Teaching in French Immersion in the Primary and Elementary Grades (ME,PE) is an introduction to the development of French immersion programs and an examination of current models for organizing and instruction of French at the primary and elementary levels. This course will focus on methods and strategies for content-based teaching in immersion, integrating the formal aspects of French language teaching into the context of content area learning and integrating curriculum, strategy training, and language awareness into immersion curricula. Additional topics will include assessment of/for learning and effective technology integration in French Immersion.

OR: this course will be taught in French
PR: acceptance to the French Immersion Option or permission of the Office of Undergraduate Programs

4161 The Teaching and Learning of Mathematics in the Intermediate and Secondary School (IS,ISI,ME) introduces teacher candidates to the principles, dispositions, and skills necessary to teach mathematics. Topics include: the nature of mathematical knowledge, learning principles, mathematics pedagogy, curriculum, instructional planning, and evaluation in mathematics.

4174 The Teaching and Learning of Science in the Intermediate and Secondary School (IS,ISI,ME) provides a context for teacher candidates to develop the knowledge, abilities, and dispositions to provide learners with the opportunity to develop multidimensional scientific literacy. Topics include: assessment and instruction, controversial issues in Science, curriculum planning, differentiating instruction in science, inquiry, information and communication technologies in science, learning theories, multicultural science education, scientific literacy, science-technology-society-environment, and student naive and alternative conceptions.

CR: the former ED 4170, the former ED 4171, the former ED 4270, the former ED 4271
LH: two hours per week
OR: WIMS training. Information can be obtained from the Office of Undergraduate Programs, Faculty of Education.

4175 The Teaching and Learning of Science in the Intermediate and Secondary School II (IS) provides a context for teacher candidates to develop a greater understanding of the nature of scientific knowledge and how it is generated, explore the rationale(s) for the inclusion of the nature of science as a goal of scientific literacy, analyse research that reports on teachers’ and students’ views about the nature of science, and examine the potential of a range of pedagogical approaches for helping all learners in science develop a greater understanding of the nature of science. Topics include: philosophy, history, and sociology of science; the nature of science (definitions and beliefs); and the nature of science in the classroom.

CO: ED 4174

4180 The Teaching and Learning of Social Studies in the Intermediate and Secondary School I (IS,ISI,ME) examines the theory and practice of social studies education. Teacher candidates will investigate ways of applying the principles of effective teaching and learning in the social studies classroom.

Topics include: the nature and purpose of social studies education, specific teaching strategies, and instructional planning and evaluation.

4181 The Teaching and Learning of Social Studies in the Intermediate and Secondary School II (IS) examines the separate disciplines of social studies. Topics include: the evolution and nature of social studies education, current issues and trends in the area and various teaching strategies and assessment techniques appropriate to the discipline.

CO: ED 4180

4190 The Teaching and Learning of Physical Education in the Intermediate and Secondary School (IS,ISI,ME) applies the principles of effective teaching and learning to the teaching and learning of physical education. Topics include: the nature and purpose of physical education, an examination of the physical education curriculum, an analysis of quality daily physical education, approaches to teaching physical education, and evaluation of progress in physical education.

LH: two hours per week supervised practice teaching on-campus and/or in a school setting

4203 The Teaching and Learning of Religious Education in the Intermediate and Secondary School (IS,ME) applies the principles of effective teaching and learning to the teaching of religious education.

Topics include formulating objectives; examining theories of faith and moral development; selecting and using resources, and evaluating learning.

4205 Religious Education in Primary and Elementary Grades (ME,PE) is an introductory study of aims and objectives, subject matter, curriculum materials, teaching methods, learning experiences, and evaluation for Religious Education courses.

CR: the former ED 2080

4240 An Introduction to the Exceptional Learner (IS,ISI,ME,PE) is an introduction to the nature of exceptionalism in the student. Topics include an examination of special needs resulting from exceptionality, approaches to meeting the special needs, issues of exceptionality, and a consideration of selected categories of exceptionalism.

CR: the former ED 3220, the former 3230, the former ED 4902

4242 Identification and Remediation of Learning Difficulties (IS,ISI,PE) examines the identification processes and remediation techniques appropriate for dealing with student learning difficulties. Topics include the application of learning difficulties theories and principles of program planning, and analysing the potential of a range of pedagogical approaches for helping all learners develop a greater understanding of the nature of learning difficulties, the process of program planning, and analysing the potential of a range of pedagogical approaches for helping all learners in science develop a greater understanding of the nature of science. Topics include: philosophy, history, and sociology of science; the nature of science (definitions and beliefs); and the nature of science in the classroom.

4260 Engaging the Adolescent Learner (IS,ISI,ME) considers the unique learning contexts and characteristics of learners through the span of adolescence, from early adolescence to young adulthood. It focuses on the intersection of psychological aspects of adolescence with biological, social and cultural, as well as cognitive and affective aspects in order to understand, to engage, and to effectively teach the adolescent learner. The implications of these unique periods for creating effective teaching and learning environments in both intermediate and secondary classrooms will be considered.

4300-4310 Special Topics Courses in Primary/Elementary (PE) will have topics to be offered announced by the Faculty of Education.

4350 Reading in the Content Areas (IS,ISI) examines the nature of reading in subject-specific areas such as history, biology, and mathematics. Topics include the role of the teacher in the teaching of content in different areas, evaluating vocabulary, grammar, usage and text structure for instruction, and analysing the variety of strategies for reading, writing and studying.

4362 Sociological Perspectives on Teaching and Learning (ME,PE) is an examination of such social issues in education as poverty, child abuse, gender, ethnicity, and change and the society and their implications for the nature and process of schooling. A study of social dimensions of education, including the content of education and the organization of teaching and learning. An analysis of students' experiences in the internship with regard to the above and other aspects of education the students might identify.
4381 Perspectives on Education (IS,ISLME) examines educational theory, practice and policy from the disciplinary perspectives of philosophy, sociological, and/or comparative education. Its aim is to foster an appreciation of the intrinsic value of these specific forms of inquiry as contributions to contemporary understanding of educational enterprise. Topics include: ethical and epistemological considerations related to areas such as critical pedagogy, equal educational opportunity, educational reform, change and social justice.

4383 Philosophy of Teaching and Learning (ME,PE) examines a number of central philosophical concepts, assumptions and issues involved in the pursuit of teaching and learning in the schools. The aim of the course is to provide students with an understanding of the distinctive character of philosophical analysis as a reflective and critical practice that intends to promote professional excellence and personal well-being. CR: the former Education 2430 PR: completion of the Professional Year

4390 Diversity, Social Justice, Teaching and Learning (IS,ISI) examines the intersection of multiple and inter-related forms of social and cultural diversity such as those related to social class, ethnicity, gender, ability, place, and sexual identity. The course explores ways to create more effective equitable learning environments through renewed, culturally responsive and respectful policy; critical, reflective and anti-discriminatory teaching; and more inclusive, socially critical curriculum.

4420 Legal and Moral Issues in Education (PE) examines educational law and sources of conventional morality for the purpose of clarifying individual stances on legal and moral issues. Topics include the nature and theoretical bases of morality in education, the legal foundations of the Canadian education system, the legal and moral rights and responsibilities of teachers and students, and teacher liability.

4425 Introduction to Educational Administration (PE) is an examination of the roles of various levels of government in Education; theories of administration; management as it relates to curriculum, organization, personnel, finance, and communication; and their implications for teachers in the Newfoundland context. CR: the former Education 2410 PR: completion of the Professional Year

4427 Professional Leading and Learning in the School Organization (IS,ISI) explores the theory and practice of school organization and its effect on teaching and learning and provides opportunities for teacher candidates to become reflective learners and teacher leaders. Topics include: parents and families, communities and schools; law and education; resources in educational decision making; teaching leadership, school and system administration; and the teaching profession. CR: ED 4425

4450 Practicum in Adult Education (PS) - inactive course.

4505 Transition Planning for Adolescents with Intellectual Disabilities (SE) focuses on the application of educational procedures relevant to successful post-secondary education, employment and community integration of adolescents and young adults with mild and moderate intellectual disabilities. Appropriate senior high programming, life skills development, use of assistive technology and resource materials necessary for transition planning for this population will be reviewed. CO: ED 3610 PR: ED 3610

4510 Inclusive Practices for Students with Mild Intellectual Disabilities (SE) gives consideration to the establishment of objectives; selection, development and review of materials; the use of various instructional strategies; assistive technology and the provision of appropriate experiences for the education of students with mild intellectual disabilities. CO: ED 3610 PR: ED 3610

4515 Inclusive Practices for Students with Moderate Intellectual Disabilities (SE) focuses on inclusive educational practices for students with moderate intellectual disabilities. Emphasis will be placed on the development, implementation and management of a well-balanced individualized curriculum as articulated in an individual educational plan. Students will be expected to demonstrate fluency in the design of effective instructional strategies, including the use of assistive technology to maximize student’s individual strengths across a variety of environments. CO: ED 3610 PR: ED 3610

4520 Inclusive Practices for Students with Behavioural Challenges (SE) examines and strategies for students with behavioural issues. These will include counseling skills, case conferences, structured learning environments, use of assistive technology and therapeutic interventions for specific behaviour problems. In addition, consideration will be given to collaboration with mental health practitioners and procedures to develop readiness for return to regular instructional programs. CO: ED 3620 PR: ED 3620

4530 Inclusive Practices for Students with Learning Disabilities (SE) investigates specific teaching methods, use of assistive technology and programming practices as they pertain to reading, writing, language, mathematics, social skills, and metacognitive skills for students with identified learning disabilities.

4540 Inclusive Practices for Students with Speech/Language Disorders (SE) examines theoretically sound and research-based methods for the identification and remediation of speech and language concerns in children and adolescents. Topics include typical language development; nature of developmental concerns for both speech (articulation, voice and fluency) and language (receptive, expressive and phonetic awareness); social use of language; and use of assistive technology. Particular focus will be placed on current interventions/strategies and techniques.

4541 Communication for the Deaf - inactive course.

4543 Inclusive Practices for Students with Hearing Loss (SE) - inactive course.

4610 The Nature and Management of Stress (PE) studies the nature of stress and its manifestations. It is manifested in the teacher and the teaching profession, and provides approaches to coping effectively with the factors which are related to that stress. Topics include the nature of the human stress response, causes and symptoms of stress (personal and professional), self-management techniques, and relaxation techniques. An emphasis is placed on the effects of stress on the role and goal expectations of the teacher.

4620-4639 Institutes in Intermediate and Secondary Education (IS) will be topics announced by the Faculty of Education. These institutes may follow a schedule that falls outside of the normal teaching semester. CH: 1

4640-4659 Institutes in Intermediate and Secondary Education (IS) will be topics announced by the Faculty of Education. These institutes may follow a schedule that falls outside of the normal teaching semester. CH: 2

4700 Student Teaching in Post-Secondary Education (PS) applies theories of education in the learning situation; observation and demonstration of lessons; seminars in teaching techniques. PR: ED 2710, ED 2720, ED 2730, ED 2801, ED 3280, and ED 3801, or equivalent teaching experience and permission of the course instructor

4710 Recurring Issues in Post-Secondary Education (PS) identifies, analyses, and discusses major issues, practices and problems in Post-Secondary Education provincially, nationally, and internationally. PR: ED 2710, ED 2720, and ED 2730

4730 Educational Programs and Practices in Industry and Labour (AL,PS) is a study of the various Post-Secondary Education programs operated either wholly by industry and labour or jointly with educational institutions; apprenticeship, work experience and study programs, co-operative education, industry training, training on-the-job, supervisory training, and management development.

4750 Integrated Materials and Production Processes (ISI) provides technology education students with opportunities to examine current teaching and learning strategies applicable to intermediate and secondary technology education programs. The course will focus on advanced materials processing using Computer Numeric Control (CNC) devices. Students will receive practical instructional use in the fluidic control systems that are used in many manufacturing processes. Topics include: CNC production processing, fluidic control systems, and application of design process and portfolio development. This course may follow a schedule that falls outside of the normal teaching semester. AR: attendance is required OR: WHMIS training. Information can be obtained from the Office of Undergraduate Programs.

4752 Teaching Robotics Systems (ISI) is designed to provide students with an understanding of key concepts in robotic development and control applications. Students will complete practical activities that promote development of the skills necessary to deliver a comprehensive program in this area of study. Topics include: the study of electrical energy, analog and digital electronics; fabrication techniques; object oriented/event driven programming; and wireless robotic control over Internet Protocol (IP). This course may follow a schedule that falls outside of the normal teaching semester. AR: attendance is required OR: WHMIS training. Information can be obtained from the Office of
Undergraduate Programs.

4753 Teaching Residential Construction Technology (ISI) provides technology education students with opportunities to apply current teaching and learning strategies while developing the skill set necessary to deliver a comprehensive program in residential construction technologies. Topics include: shop and site safety, print reading and interpretation, basic residential framing techniques, installation of exterior construction features, installation of interior environmental applications, and energy control systems. This course may follow a schedule that falls outside of the normal teaching semester.

AR: attendance is required
OR: WHMIS training. Information can be obtained from the Office of Undergraduate Programs.

4760-4780 Advanced Specialized Post-Secondary Education Technologies (PS) examines the theory and practice of selected advanced specialized Post-Secondary Education technical skills and their application to the laboratory, workshop and business office. Emphasis will be placed on innovative and emerging techniques in selected areas of business, industry, and the service occupations.

4830 Music Education Seminar (ME) examines, through inquiry, reflection and synthesis, the foundations of music education common to all levels and contexts of school music. The focus is the bridging of theory, philosophy, and practice in music education. Topics include current issues; challenges and opportunities in music education(provincial, national, and international); interdisciplinary and integrated arts education; cultural pedagogy, diversity, and social justice in education; and teacher professional development. Additional modules will be designed to meet teacher candidates’ needs and interests.

4901 Effective Teaching Strategies for Multi-grade/Multi-age Classrooms (PE) begins with a critical examination of traditional approaches to multi-grading. The main focus of the course will be to introduce teachers to the potential of adopting a multi-age approach in small schools which have of necessity grouped children of more than one age group and grade level together for instruction. This course will also examine the implications of implementing a philosophy of multi-age pedagogy in the primary, elementary and intermediate grades (K-9).

4950 Assessment for Learning (IS,ISI) introduces the theory and practice of evaluation and assessment in educational settings. Topics include the nature of classroom assessment; production, administration and evaluation of teacher-made tests and other assessment tools; product and performance assessment; grading and reporting communication of evaluation information; and the analysis and application of assessment data to instructional planning and the improvement of teaching.

CR: the former ED 4912

4970-4980 Special Topics Courses in Intermediate/Secondary (IS) will have topics offered announced by the Faculty of Education.

5000 The Teacher Development Seminar (IS,ISI) provides teacher candidates with an opportunity to frame, conceptualize and articulate educational issues; (re)consider the purposes of education; reflect on teaching and learning; and develop and display artifacts that document learning, professional knowledge and practice, and teacher identity. Teacher candidates are expected to participate in a series of critical reflective seminars and workshops, and to create an electronic portfolio (e-portfolio). Topics include: critical reflection, professionalism and ethics in teaching, and teacher identity.

AR: attendance is required
OR: seminars, workshops and other professional development sessions

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

1 The Memorial University of Newfoundland Code
The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University’s commitment to maintaining the highest standards of academic
2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

For additional information and resources on academic and professional integrity in the Faculty of Engineering and Applied Science, see www.mun.ca/engineering/undergrad/academicintegrity.php.

3 Faculty Description

The Faculty of Engineering and Applied Science offers a co-operative undergraduate program leading to the degree of Bachelor of Engineering, as well as graduate programs leading to the degrees of Master of Engineering, Master of Applied Science, Master of Engineering Management, and Doctor of Philosophy. The Faculty encompasses five academic departments: Civil Engineering, Electrical and Computer Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering. Through teaching, research and outreach, the Faculty of Engineering and Applied Science plays a critical role in the economic development of the Province, and graduates from the programs hold key positions in the major industrial developments in our Province. A growing number of our recent graduates are leading emerging high-technology companies and hold important positions in national and international industries and governments, contributing to the University’s global impact. Research in the Faculty of Engineering and Applied Science has a strong focus on research and development opportunities associated with the general technological needs of our society. The Faculty maintains a very strong sense of identity and cooperation among students, faculty, and staff, and prides itself on its strong linkages with industry and the engineering profession.

Additional information regarding the Faculty of Engineering and Applied Science is available at www.mun.ca/engineering.

Students must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to UNIVERSITY REGULATIONS.

3.1 Accreditation Status

Graduates of Memorial University of Newfoundland’s engineering programs have been enjoying the benefits of full accreditation with the Canadian Engineering Accreditation Board (CEAB) since 1975. The undergraduate programs offered by The Faculty of Engineering and Applied Science are fully accredited by The Canadian Engineering Accreditation Board (CEAB) of The Canadian Council of Professional Engineers (CCPE) to 2020.

3.2 Objectives of the Bachelor of Engineering Degree Program

The objectives of the undergraduate program are to provide students an excellent academic experience and to equip graduates with the ability to solve a broad range of problems in our rapidly changing technological, economic and social environment. To this end, the Faculty is committed to educate graduates who have:

1. a strong foundation and knowledge in engineering fundamentals with a capacity to know how, when and where to use the knowledge in specific ways;
2. an ability to identify, formulate, analyse and solve engineering problems and a capacity to integrate material from more than one subject and to apply appropriate engineering principles to arrive at correct and effective solutions;
3. a comprehensive knowledge in the fundamentals of engineering practice, including an ability to use analytical techniques, experimental and laboratory skills and modern engineering simulation and design software tools;
4. a broad knowledge of the principles and skills in engineering design, development and management in global, cultural and business contexts;
5. a multidisciplinary view with an ability to work effectively as members of teams, composed of individuals from different disciplines and different professional cultures;
6. strong oral and written communication skills with a capacity to produce effective technical documents and to use current communication techniques and tools;
7. a culture of life-long learning with a capacity to engage in continuous self-improvement, personal enrichment and professional development; and
8. a broad sense of social, ethical and professional responsibility with a capacity to demonstrate an understanding and appreciation of the human dimension of technology and its impact on mankind.

3.3 Academic and Professional Ethics

The Faculty of Engineering and Applied Science supports the highest standards of academic and professional ethics. Ethical behaviour encompasses integrity, conduct, respect, and professionalism, and also means that we will take responsibility for our learning and pursue academic goals in an honest and engaged manner. It is the principles, values, and expectations that we espouse as members of the Faculty and future professional engineers.

When participating in coursework or representing the Faculty on work-terms, in competitions, at conferences, and other research and academic activities, we consider ethical behaviour as important as our performance, conduct, and quality of work. In decision-making, teamwork, and individual expression, we seek to understand the significance of justice, fairness, individual rights, and care in striving to achieve our own personal best.

Guidelines for Academic Integrity and an Engineering Student Code of Conduct are available at the Faculty of Engineering and Applied Science website.

4 Description of Program

The Bachelor of Engineering Degree at Memorial University of Newfoundland is a Co-operative Program in which regular full-time academic study is supplemented by four month periods of full-time work in positions related to the student’s future career. The Bachelor
of Engineering degree program is available in the following six majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering.

Engineering One, the first-year of the engineering program, comprises courses in mathematics and basic science (physics and chemistry), as well as courses covering engineering fundamentals which are common to each of the majors. The engineering courses in Engineering One introduce students to engineering problem-solving, analysis, design, communication, and teamwork. Students will develop an understanding of the different engineering specialties, as well as the interdisciplinary nature of engineering practice.

The specialized major programs of Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering are offered in academic terms 3 through 8.

Electives can be tailored to meet the needs of those who plan to go straight into industry and those who wish to join the increasing number of our graduates who are pursuing advanced degrees.

All courses of the Faculty are designated by the abbreviation ENGI.

4.1 Program of Study

1. Courses in the engineering program are normally taken in Academic Terms as shown in the appropriate program table. Students must satisfy the criteria for promotion as described below under Promotion Regulations to remain in the Engineering program.

2. The Engineering Program consists of eight academic terms and four work terms. The first-year of the Engineering Program, known as Engineering One, forms a core that is common to all majors. All students must successfully complete the requirements of Engineering One prior to being promoted to Academic Term 3.

3. In 1000 level Engineering courses, registration priority is given to students who have been admitted to Engineering One. Other students will be admitted to these courses only with the approval of the Associate Dean (Undergraduate Studies).

4. In these program regulations, including the program tables, wherever reference is made to English 1090 or the former English 1080 or Chemistry 1050, these courses may be replaced by courses deemed equivalent by the relevant academic unit.

5. Upon entering Academic Term 3, students begin to specialize in their academic program, in one of the following six majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, or Process Engineering. All Engineering students who successfully complete the Engineering One requirements during their first year of Engineering will be guaranteed a place in Academic Term 3, although not necessarily in the preferred major as indicated under Promotion Regulations, Promotion Status (Engineering One).

7. Engineering courses in Academic Term 3 and beyond (i.e., those with numbers 3000 and greater) are restricted to students who have been admitted or promoted to the appropriate academic term and major (e.g., Academic Term 3 for 3000 level courses, restricted by major). Other students will be admitted to these courses only with the approval of the Associate Dean (Undergraduate Studies) in consultation with the Head of the appropriate Department.

Some of the courses offered in academic terms 3 to 8 are taken by all Engineering students, others are offered for more than one major, but most technical courses in academic terms 3 to 8 are specific to the individual majors. Students should refer to the program descriptions for the detailed course requirements in each phase of their program.

8. Technical elective courses may be offered in terms other than those indicated in the program tables.

9. A student who has previously met a technical elective requirement in a given semester or wishes to defer it, may request an exemption or deferral by applying to the Head of the appropriate Department. A minimum grade of 60% is required for credit to be given towards a student's engineering program for any technical elective taken outside the normal Academic Terms as shown in the tables.

10. A minimum grade of 60% is required for credit to be given towards a student's engineering program for any course beyond Engineering One that is taken outside the normal Academic Terms as shown in the tables.

11. Transfer credit cannot be awarded for project or design courses in Academic Terms 7 or 8 of the Engineering program.

12. Students registered in Academic Term 7 of any Engineering major are eligible to apply for admission to a Master of Engineering Fast-Track Option (M.Eng.). The purpose of the Option is to encourage students interested in pursuing graduate studies to begin their graduate program while still registered as an undergraduate student. While enrolled in the Option, a student may complete some of the M.Eng. Degree requirements and potentially be able to graduate earlier from the M.Eng. Program. For further details and the regulations regarding the option, refer to the School of Graduate Studies, Regulations Governing the Degree of Master of Engineering.

4.2 Complementary Studies

1. The Complementary Studies component has been developed to make students aware of the function and responsibilities of the Professional Engineer in society and the impact that engineering in all its forms has on environmental, economic, social and cultural aspects of our society. This complements the technical expertise and communications skills developed and practised in all components of the program.

2. The Complementary Studies component is the same for all programs and consists of a minimum of 21 credit hours as follows:

- English 1090 or the former English 1080 or English 1020
- Engineering 3101
- Engineering 4102 must be completed before Term 6 in the Civil and Process majors, and must be completed before Term 7 in all other majors
- One 3 credit hour course that deals with the effect of technology on society and the environment. The course is to be chosen from Engineering 6101, Engineering 8151, Sociology 2120, Sociology 4107, Philosophy 2571 or the former Philosophy 2801
- Engineering 8152
- One Elective course of a 3 credit hour value chosen from the arts, humanities, social sciences and management and approved by the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science. List A is an approved list of courses maintained by the Office of the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science and is available at the website www.mun.ca/engineering.
- One Elective course of a 3 credit hour value chosen from the humanities and social sciences and approved by the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science. This course must be second-year or higher and it is intended to provide experience with the central issues, methodologies and thought processes of the humanities and
3. In order to graduate, the student must obtain an overall average of at least 60% in the 21 credit hours in Complementary Studies courses required in the program.

4.3 Bachelor of Engineering Majors

The Bachelor of Engineering degree program is available in the following six majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, and Process Engineering.

4.3.1 Civil Engineering

Civil Engineering deals with the planning, design, and construction of roads, railways, harbours, docks, tunnels, bridges, buildings, water supplies, hydroelectric power development, and sewage collection, treatment, and disposal systems.

The Civil Engineering major provides a broad introduction to the scientific principles and engineering techniques necessary for an understanding of the fundamental problems tackled by civil engineers.

4.3.2 Computer Engineering

Computer Engineering is the design and analysis of computer systems applied to the solution of practical problems. It encompasses both hardware and software design in applications ranging from telecommunications and information systems to process control and avionics. Computer Engineering students learn the mathematics of discrete and continuous systems, the design of digital machines such as processors and memories, the fundamentals of software design, and the principles used in communications systems such as telephone networks and the Internet.

Computer Engineering shares many fundamentals with Electrical Engineering, which are covered in a common curriculum up to and including Academic Term 3. In recognition of the considerable diversity of careers available to computer engineers, students are given latitude in the final three academic terms to choose from a wide range of electives in various specialty areas.

4.3.3 Electrical Engineering

Electrical Engineering is a broad field encompassing the study of control systems, electromagnetics and antennas, power systems, electronics, communications, and computer hardware and software.

Electrical Engineering shares many fundamentals with Computer Engineering, which are covered in a common curriculum up to and including Academic Term 3. In recognition of the considerable diversity of careers available to electrical engineers, students are given latitude in the final three academic terms to choose from a wide range of electives in various specialty areas. Making use of their elective course choices, students in the Electrical Engineering major also have the opportunity to undertake a minor in Physics.

4.3.4 Mechanical Engineering

Mechanical Engineering is a highly diversified discipline encompassing the design, analysis, testing and manufacture of products that are used in every facet of modern society. Mechanical engineers analyse and design using the principles of motion, energy, and force to ensure that the product functions safely, efficiently, reliably, and can be manufactured at a competitive cost. This activity requires a thorough knowledge of materials, mathematics, and the physical sciences, and an ability to apply this knowledge to the synthesis of economical and socially acceptable solutions to engineering problems.

Mechanical Engineering is designed to provide students with a knowledge in the following four areas: design and dynamics, emphasizing solid mechanics, material science, dynamics, vibrations and machine component design; thermo-fluids, focussing on thermodynamics, heat transfer and fluid mechanics; mechatronics, dealing with electro-mechanical systems, control, robotics, and automation; and manufacturing/industrial, which encompasses CAD/CAM, production and operation management. In Academic Term 6, students may select one of four Technical Streams, which provide focus to the wide range of electives in various specialty areas in Academic Terms 7 and 8.

4.3.5 Ocean and Naval Architectural Engineering

Ocean and Naval Architectural Engineering covers aspects of both naval architecture and ocean engineering. The Ocean and Naval Architectural Engineering major is the only accredited undergraduate program specifically in naval architecture/ocean engineering in Canada. The major is designed to provide education to work in marine transport, ship and boat building, offshore engineering, submersibles design and many related marine areas. The undergraduate program is also a comprehensive preparation for graduate studies, research and consulting in ocean engineering.

Naval Architecture is primarily concerned with the design and construction of ships, offshore structures and other floating equipment and facilities. Ocean Engineering extends this focus to cover virtually all aspects of engineering related to the world’s oceans. Topics including sub-sea systems and oceanographic science add core ocean engineering content to the program.

4.3.6 Process Engineering

Process Engineering is a diversified discipline encompassing new development, design, optimization, and operation of sustainable processes for human needs. A process engineer uses biological, chemical, and physical processing of substances to modify their nature, their properties, and/or the composition of mixtures to produce useful products. This activity requires a thorough knowledge of materials, chemical and physical sciences, and mathematics and an ability to apply this knowledge in an economical and sustainable way to engineering development.

The Process Engineering major is designed to provide students with a specialization in the areas of minerals and metals processing, and downstream oil and gas processing. In Academic Term 6, a student may select to continue in the Process Stream with emphasis on sustainable processing or in the Petroleum Stream with emphasis on upstream oil and gas including petroleum geology, drilling, reservoir and production engineering. Throughout the major and within each area of specialization, emphasis is placed on green and clean processes which are environmentally benign and inherently safe. The goal of this major is to prepare graduates with knowledge and ability to implement this knowledge in a sustainable manner to larger-scale industrial development.

4.4 Work Terms

Engineering work term registration, grading, and tuition fee charges and payments are governed by the UNIVERSITY REGULATIONS in this Calendar and those outlined below. Engineering work term placement and opt-outs, conduct, and evaluation are governed by the Engineering Student Co-op Handbook which is available at www.mun.ca/coop/programs/engineering/enghandbook.pdf. Any changes to
A student must complete successfully a minimum of four work terms in order to graduate with a Bachelor of Engineering degree. The Bachelor of Engineering degree offers the opportunity to complete up to five work terms beyond academic term 3. A student is expected to complete as many of these work terms as possible. A student who expects to complete the Engineering One requirements by the end of the Winter semester may apply to the Committee on Undergraduate Studies to undertake a work term during the Spring semester of Engineering One. Academic performance is the basis for approving such requests.

All students in academic terms 3 to 7 and any student approved to complete a work term during the Spring semester of Engineering One will be registered automatically during the regular registration period for the next scheduled work term unless the student has opted-out. A student may opt out of up to two work terms beyond Academic Term 3 by completing the procedures outlined in the Engineering Student Co-op Handbook. Opt outs normally are approved only in cases where a student has successfully completed a minimum of four work terms.

4.4.1 General Information
- During work terms a student is brought into direct contact with the engineering profession, exposed to the work place setting, expected to assume ever-increasing responsibility in employment situations as his/her education advances, and introduced to experiences beyond the scope of those which could be provided in the classroom.
- A student is responsible for finding suitable work placements. The Office of Co-operative Education provides resources to assist in this process. A student who obtains a work placement outside the job competition must have that work placement approved by the Office of Co-operative Education prior to accepting it.
- A student who cannot meet the demands of the work term may be required by the Faculty to withdraw from the work term until he/she can demonstrate an ability to continue in the program.
- Following the date of automatic registration for a work term, only a student who is registered for that work term will be permitted to continue in, or subseuqently join, the job placement process and be approved to begin a work placement.
- A student in the job competition who refuses all job offers without the prior consent of the Office of Co-operative Education may be subject to penalties that may include the assignment of a grade of FAL (fail) for that work term.
- A student who conducts him or herself in such a manner as to cause termination from the job, will normally be assigned a grade of FAL (fail) for that work term.
- A student who conducts him or herself in such a manner as to cause termination from the job, will normally be assigned a grade of FAL (fail) for that work term.
- A student who conducts him or herself in such a manner as to cause termination from the job, will normally be assigned a grade of FAL (fail) for that work term.
- A student who opts out from a work term is not permitted to work for a co-op employer during that work term.
- A student who opts out from a work term and who works for a co-op employer during that work term may be considered to have committed an academic offence and will be subject to the penalties listed under the UNIVERSITY REGULATIONS, Academic Offences.
- A student in a work term who does not meet the deadlines stated by the Office of Co-operative Education for the submission of forms and documentation may be awarded a reduced grade for one or both components of that work term.
- The work term performance grade is assigned by the student’s Coordinator based upon feedback from the employer and other information gathered from contact with the student.

4.4.2 Evaluation of Work Terms
Two components are considered in work term evaluation: work performance and a communications component, as described in the Engineering Student Co-op Handbook which is available at www.mun.ca/coop/programs/engineering/enghandbook.pdf. Each component is evaluated separately and equally weighted resulting in one of the following classifications: Outstanding, Above Expectations, Satisfactory, Marginal Pass, Fail. Both evaluations will be recorded on the transcript. Overall evaluation of the work term will result in the assignment of one of the following final grades:
- Pass with distinction (PWD): To receive a PWD, a student must obtain an evaluation of Outstanding in both the communications and work performance components of the work term.
- Pass (PAS): To receive a PAS, a student must achieve an evaluation of Marginal Pass or better in the communications component and in the performance component of the work term.
- Fail (FAL): A student receiving a Fail in either the communications or performance component of the work term will receive a FAL. For promotion from the work term, a student must obtain PWD or PAS.
4.5 Continuing Engineering Education

The Faculty of Engineering and Applied Science has a firm commitment to continuing engineering education and offers a variety of seminars and short courses in St. John's and in other centres for practising engineers. For applicability of courses towards diplomas and certificates in Engineering, contact the Continuing Engineering Education office through the Faculty of Engineering and Applied Science website.

5 Admission/Readmission Regulations for the Faculty of Engineering and Applied Science

In addition to meeting UNIVERSITY REGULATIONS, students must meet the admission/readmission regulations for the Faculty of Engineering and Applied Science.

5.1 General Information

1. The Bachelor of Engineering program requires completion of a minimum of four co-operative education work terms. Prospective applicants should review the information about work term expectations at Work Terms.

2. Entry to the Bachelor of Engineering program is competitive for a limited number of placements. Meeting the minimum admission requirements does not guarantee acceptance into the Engineering program. The final decision on admission or readmission to the Bachelor of Engineering program rests with the Admissions Committee of the Faculty. Students are admitted to a common/general Engineering Program and are allocated a major in Academic Term 3.

3. Admission or readmission to the University does not necessarily constitute admission or readmission to the Bachelor of Engineering program.

4. The primary criterion used in reaching decisions on applications for admission or readmission is the judgement of the Admissions Committee on the likelihood of an applicant succeeding in the program.

5. Up to three positions per year in the Faculty of Engineering and Applied Science may be designated for applicants of Aboriginal ancestry who have met the admission requirements of the program. Applicants must send a letter of request at the time of application and provide documentation of Aboriginal ancestry.

6. The Admissions Committee allocates majors to students after promotion or readmission to Academic Term 3 of the Bachelor of Engineering program. Information on promotion from Engineering One is available at: Promotion Regulations, Promotion Status (Engineering One).

5.2 Application Forms and Deadlines

The application for admission or readmission to programs offered by the Faculty of Engineering and Applied Science is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

5.2.1 Admission

1. A student applying for admission to the Bachelor of Engineering program is required to submit an online application. Applications for admission to Engineering One will normally be considered for admission to the Fall semester of each year. The deadline for submission of applications for admission to the Fall semester is March 1. Applications for admission to the Winter and Spring semesters will be considered for students who have completed or are completing two or more of the following courses: Mathematics 1000, Mathematics 1001, Mathematics 2050, Physics 1050, Physics 1051, Chemistry 1050, English 1090 or the former English 1080. The deadline for application to the Winter semester is October 1 and to the Spring semester is February 1.

2. Applications received after the relevant deadline may be considered as time and space permit. The Admissions Committee for the Faculty will only consider applications that are complete.

5.2.2 Readmission

A student applying for readmission to Academic Term 3 and beyond is required to submit an online application. Applications will only be considered for students who have been previously admitted to the Academic Term for which readmission is applied.

1. Academic Term 3: The deadline for submission of an application for readmission to Academic Term 3 is March 1. Applicants will be considered for readmission to Academic Term 3 based on their Promotion Status (Engineering One).

2. Beyond Academic Term 3: The deadlines for submission of an application for readmission to an academic term beyond Academic Term 3 are: June 1 for the Fall semester, October 1 for the Winter semester, and February 1 for the Spring semester.

3. Applications received after the relevant deadline may be considered as time and space permit. The Admissions Committee for the Faculty will only consider applications that are complete.

5.3 Admission Requirements to the Faculty Program

An applicant must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate), Categories of Applicants, Admission Criteria and Other Information. In addition to meeting these regulations, an applicant to the Bachelor of Engineering program in the following admission categories must meet the requirements as indicated below.

5.3.1 High School Applicants

- The Faculty of Engineering and Applied Science encourages applications for admission to the Bachelor of Engineering program from high school students who are new to post-secondary education, have an interest in pursuing an engineering degree and have achieved a good academic performance during high school. In addition to meeting the requirements under UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate), Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador, Admission Criteria, performance in advanced mathematics, chemistry, physics and English is of particular interest, and grades above 80% are normally required for consideration.

- Applicants who have not successfully completed either chemistry or physics but who have performed well in the other subjects may be considered.
Applicants must meet the English language proficiency requirements as noted in **English Language Proficiency Requirements**.

With careful planning the course load for the Engineering One requirements can be spread out over three semesters, to provide flexibility and additional time for a successful transition to the University and the Bachelor of Engineering program. However, as some courses are not offered in some semesters, a student should check with the appropriate academic unit to determine in which semester(s) each course is offered.

An applicant who is not admitted to the Bachelor of Engineering program is encouraged to contact the University’s Academic Advising Centre or the Office of the Associate Dean (Undergraduate Studies) to discuss an appropriate first-year program.

### 5.3.2 Memorial University of Newfoundland Applicants

- To be eligible for consideration for admission to the Bachelor of Engineering program, a student who is attending or has previously attended this University must have a cumulative average of at least 70%, and obtained a grade of at least 70% in two or more of the following courses: Mathematics 1000, Mathematics 1001, Mathematics 2050, Physics 1050, Physics 1051, English 1090 or the former English 1080.

- Applicants must meet the English language proficiency requirements as noted in **English Language Proficiency Requirements**.

### 5.3.3 Transfer Applicants

- An applicant seeking admission to the Bachelor of Engineering program through transfer from recognized post-secondary institutions must have achieved a minimum overall average of 70% or GPA of 3.0, or equivalent.

- Applicants must have obtained a grade of at least 70% in two or more of the following courses that have been deemed equivalent for transfer credit purposes to: Mathematics 1000, Mathematics 1001, Mathematics 2050, Physics 1050, Physics 1051, Chemistry 1050, English 1090 or the former English 1080.

- Where it is determined, at the time of admission, that an applicant has met all the requirements for promotion from Engineering One, advanced placement in Academic Term 3 or beyond, and requirements needed to complete the program, will be determined on an individual basis following transfer credit evaluation. A transfer applicant must complete a majority of the credit hours in his/her program at Memorial University of Newfoundland.

- Applicants must meet the English language proficiency requirements as noted in **English Language Proficiency Requirements**.

### 5.4 English Language Proficiency Requirements

Applicants who have not met the University specified requirements for study at an English Language Secondary or Post-Secondary Institution (see **UNIVERSITY REGULATIONS, Admission/Readmission to the University (Undergraduate)** - **English Language Proficiency Requirements**) are required to:

1. Possess higher than University minimum scores in one of the following standardized tests:
   a. **Test of English as a Foreign Language (TOEFL)**. A minimum score of 90, with at least 20 in each of Reading and Listening, and no less than 25 in Speaking and Writing, is required on the TOEFL;
   b. **International English Language Testing System (IELTS)**. A minimum overall band score of 6.5, with at least band 6.5 in each of Writing and Speaking, and 6.0 in Reading and Listening is required on the IELTS;
   c. **Canadian Academic English Language Assessment (CAEL)**. A minimum overall score of 70, with at least 60 per band, and no less than 70 in Writing and Speaking is required on the CAEL; and

2. Successfully complete an e-proctored English test or an interview.

### 5.5 Other Information

1. The Faculty will notify each applicant in writing regarding an admission decision to the Faculty program.

2. Decisions will be made when grades are available for courses currently being completed. For current high school students decisions are based on current course registrations and final grades in courses previously completed.

3. A student admitted to the program in any term, without receiving credit for all courses required up to that level, must complete those courses successfully prior to graduation.

4. A student who has been admitted to one major offered by the Faculty and who wishes to change to another major within the Faculty must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the appropriate deadline date as outlined above in **Application Forms and Deadlines** and will be considered in competition with all other applications.

5. A student admitted full-time to the program and who declines the offer of admission or who fails to register for the appropriate courses during the term of admission will be considered withdrawn from the program. Such a student, if he/she subsequently wishes to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the appropriate deadline date in **Application Forms and Deadlines** above and will be considered in competition with other applications.
6 Program Regulations

6.1 Civil Engineering Program Regulations

6.1.1 Civil Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Civil Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in Table 1 Civil Engineering Major.
- Work terms shall normally be taken in the order as set out in Table 1 Civil Engineering Major.

6.4.1.1 Technical Streams

- Technical Streams are available in the areas of Mechanics and Materials, Mechatronics, Petroleum, and Thermo-Fluids.
- Technical Stream required courses must be chosen according to the student’s stream as outlined below in the Technical Stream Required Courses Table.
- Technical Stream elective courses must be chosen according to the student’s stream as outlined below in the Technical Stream Elective Courses Table.

A student must choose one course in Academic Term 7 and two courses in Academic Term 8 according to the student’s stream from the Technical Stream Elective Courses Table or other courses as approved by the Head of the Department of Mechanical Engineering.

- The selection of a course as a technical stream course from outside these lists requires the approval of the Head of the Department of Mechanical Engineering.

6.6 Process Engineering Program Regulations

6.6.1 Process Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Process Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in Table 6 Process Engineering Major.
- Beginning in Academic Term 6, a student will follow either the Process Stream or Petroleum Stream with elective course options as outlined in Table 6 Process Engineering Major.
- Work terms shall normally be taken in the order as set out in Table 6 Process Engineering Major.
- Process Engineering students may complete a minor in Chemistry as outlined under Faculty of Science, Chemistry, Minor in Chemistry.

</tr>
</tbody>
</table>
6.6.1.1 Technical Streams

- Technical Streams are available in the areas of Petroleum and Process.
- A student may experience scheduling difficulties if courses are selected from more than one Technical Stream.
- The selection of a course as a technical stream course from outside these lists requires the approval of the Head of the Department of Process Engineering.

6.6.2 Minor in Applied Science - Process Engineering for Chemistry Majors or Honours Students

For Chemistry Majors or Honours students, a Minor in Applied Science - Process Engineering will consist of Chemistry 1051, ENGI 3600, 4621, 4602 (or Chemistry 2301), 4625, and 4961 and 6 credit hours chosen from ENGI 5601, 6621, 6631, 6651, 7621, and 8671.

Completion of the Minor in Applied Science - Process Engineering does not qualify persons to hold the designation "Professional Engineer" as defined by various provincial acts governing the Engineering Profession.

6.7 Advanced Standing

Students are occasionally admitted to later terms in Engineering from other institutions. Such entry is normally based on a detailed analysis of the student’s record and is handled on a case-by-case basis. Such students should contact the Office of the Associate Dean (Undergraduate Studies).

7 Promotion Regulations

7.1 General Information

1. Engineering One consists of eleven required courses: Mathematics 1000, Mathematics 1001, Mathematics 2050, Physics 1050, Physics 1051, Chemistry 1050, English 1090 or the former English 1080, ENGI 1010, ENGI 1020, ENGI 1030 and ENGI 1040.
2. Students are assigned majors for Academic Term 3, which is offered in the Fall semester only.
3. In addition to meeting the promotion regulations for the Faculty of Engineering and Applied Science, all students must meet the general academic regulations (undergraduate). For further information refer to the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate).
4. Success in the programs depends on meeting the requirements of both academic terms and work terms.

7.2 Promotion Status (Engineering One)

1. The minimum requirements for promotion to Academic Term 3 are:
   a. an Engineering One promotion average of at least 65%. The promotion average is defined as the overall average of the following nine courses: Mathematics 1001, Mathematics 2050, Physics 1051, Chemistry 1050, English 1090 or the former English 1080, ENGI 1010, ENGI 1020, ENGI 1030 and ENGI 1040; and
   b. a grade of at least 55% in each of the above nine courses.
2. Meeting the minimum Engineering One promotion requirements does not guarantee promotion to Academic Term 3.
3. A student who meets the promotion requirements and has an Engineering One promotion average of at least 70% will be guaranteed promotion to Academic Term 3.
4. A student who meets the promotion requirements and has an Engineering One promotion average of less than 70% will be promoted to Academic Term 3 as Faculty capacity permits.
5. To be considered for promotion to Academic Term 3 no required course in Engineering One may be failed more than once. If a student fails one of the Engineering One courses more than once the student will be withdrawn from the Engineering program.
6. In order to remain in the Engineering program, a student admitted to Engineering One must complete the requirements for promotion to Academic Term 3 before the end of the academic year following the academic year of admission. Therefore, a student in
Engineering One will have at most two years to complete all requirements for promotion to Academic Term 3.

7. A student who fails to meet the requirements for promotion to Academic Term 3 before the end of the academic year following the academic year of admission will be withdrawn from the Engineering program.

8. Promotion from Engineering One guarantees admission to one of the six majors, but not necessarily to a student’s preferred major. The Faculty reserves the right to establish the capacity of each major. The Faculty also reserves the right to guarantee admission into a particular major at the time of admission into the Engineering program. A student promoted to Academic Term 3 with an Engineering One promotion average of 75% and greater is guaranteed a preferred major.

9. A student is required to submit a Major Preference form, indicating a preferences for major in rank order, by April 1 in the academic year in which the student expects to complete the requirements of Engineering One.

7.3 Promotion Status (Beyond Engineering One)

A student’s eligibility for promotion from semesters beyond Engineering One will be determined at the end of each term. In order to be considered for promotion a student must complete all courses required in that Academic term. Promotion from each academic term will be based upon the student’s Promotion Average for the semester. The Promotion Average, which will appear on the transcript, is calculated to be the overall average of required courses completed in the academic term excluding complementary studies and free elective courses. Promotion from work terms will be determined based upon the grade awarded in that work term.

A student’s promotion status will be determined beyond Engineering One and at the end of each academic term in one of the following three categories:

7.3.1 Clear Promotion

Clear Promotion means that a student can proceed to the next term without restrictions.

1. A student completing or repeating an academic term will receive a Clear Promotion by obtaining a promotion average of at least 60% and a numeric grade of at least 50% in each of the courses included in the calculation of the promotion average in that academic term.

2. A student completing a work term will receive a Clear Promotion by obtaining an overall grade of PAS or PWD in that work term.

7.3.2 Probationary Promotion

A student who is not eligible for Clear Promotion from an academic term but who achieves a promotion average of at least 60% in that term will be granted Probationary Promotion.

1. A student’s Probationary Promotion status will be reflected on the University Transcript under the Promotion Average for the semester.

2. A student with Probationary Promotion from an academic term may continue to the subsequent work term under the condition that entry into the next academic term is not allowed until the student’s status is changed to Clear Promotion.

3. A student with Probationary Promotion at the end of the final academic term will not be recommended for graduation until the student’s status is changed to Clear Promotion.

4. To change Probationary Promotion to Clear Promotion for an academic term the student must satisfy the Faculty that he or she is competent in the subject of the ENGI course(s) in which the student has failed to achieve 50%. This will normally entail re-examination(s) prescribed by the Faculty as a condition of probation, after which the student will be declared to have passed or failed a test of competency in the subject(s) concerned. No numerical grade will be assigned in a re-examination. Upon passing a re-examination, the original grade submitted for the course will be changed to PAS, but the promotion average will not change and a note of the original grade will remain on the transcript.

5. Re-examination will be at a time determined by the Faculty, normally in the first week of the subsequent academic term. A re-examination is cumulative in nature, covers the entire course and, as such, may be different in scope from the original final examination for that course.

6. In order to qualify for a re-examination in a failed ENGI course, a student must obtain a grade of at least 40% in that course and must have completed any laboratory and/or project work in that course. Re-examinations are not normally available for senior project courses or for other courses in which the final examination is worth less than 40% of the grade.

7. A student who has failed the communications component of a work term and who, in the opinion of the Office of Co-operative Education, can benefit from a remedial program, may be permitted an extension of time, not to exceed the end of the registration period of the subsequent academic term, to complete the requirements of the work term.

8. A student will be permitted to write a maximum of four re-examinations for the duration of his/her program.

9. To change Probationary Promotion to Clear Promotion for an academic term the student must repeat successfully any non-ENGI course(s) which count towards the promotion average and in which the student has failed to achieve 50%.

10. A student may apply for a deferred re-examination on a similar basis to the deferral of a final examination.

11. A student with Probationary Promotion who does not complete a prescribed re-examination will be deemed to have failed that re-examination. Upon failing a prescribed re-examination the original course grade will be retained and a comment confirming failure of the re-examination will be added to the transcript.

12. A student with Probationary Promotion who fails in the re-examination(s) or who does not qualify for the re-examination(s) must repeat the corresponding failed course(s) successfully in order to change the Probationary Promotion to Clear Promotion.

13. A student with Probationary Promotion from any of Academic Terms 3 to 7 who does not meet the requirements for Clear Promotion by the end of the registration period for the subsequent academic term must withdraw from the program. Permission to register for ENGI courses to be repeated may be subject to the approval of the Faculty. Such students may apply for readmission to the Bachelor of Engineering program when they have satisfied the requirements for Clear Promotion.

7.3.3 Promotion Denied

Promotion Denied status is awarded when a student does not meet the requirements for Clear Promotion or Probationary Promotion. The student’s Promotion Denied status will be reflected on the University Transcript under the Promotion Average for the academic term.

1. A student with Promotion Denied status will be required to withdraw from the Faculty.

2. A student with Promotion Denied status may apply for readmission to the program after two semesters. Subject to space being available, a student will be admitted into the term from which promotion was denied. An academic term may be repeated only...
once, and not more than two academic terms may be repeated in the entire program.

3. A student who is denied promotion for failing a work term may be considered for readmission. A student readmitted under this clause must successfully complete four work terms prior to graduation.

4. A work term may be repeated only once, and not more than two work terms may be repeated in the entire program.

5. A student who is denied promotion from an academic term will be required to repeat all required courses in which the student obtained a numeric grade of less than 60% in that term. In addition, the Admissions Committee may design a remedial program to address the student’s specific area(s) of weakness. A technical elective course in which the student obtained a numeric grade of less than 60% may be replaced by a course acceptable in the student’s program.

6. A student who is denied promotion from an academic term may not continue to the subsequent work term unless both the employer and the Office of Co-operative Education grant permission.

7. A student with Promotion Denied status at the end of the final academic term will not be recommended for graduation until the student’s status is changed to Clear Promotion.

7.4 Other Information

1. The appropriate Department will make a recommendation to Faculty Council on each student’s promotion status at the end of each of Academic Terms 3 to 8.

2. To be recommended for graduation, a student must have Clear Promotion from Academic Term 8, must have successfully completed the four mandatory work terms and any elective work terms undertaken and must have an average of at least 60% in the 21 credit hours in complementary studies as described in Description of Program, Complementary Studies.

3. The Office of Co-operative Education will make a recommendation to Faculty Council on each student’s promotion status at the end of each work term.

4. A student must have completed at least one work term successfully, in order to be promoted to Academic Term 5.

5. A student must have completed at least two work terms successfully, in order to be promoted to Academic Term 6.

6. A student must have completed at least three work terms successfully, in order to be promoted to Academic Term 7.

7. A student must have completed four work terms successfully, in order to be promoted to Academic Term 8.

8. A student denied promotion shall be permitted only one readmission to the same term and a total of no more than two readmissions to the Faculty.

9. A student is permitted one failure only in each of the courses required in Engineering One.

10. No course required in any of Academic Terms 3 to 8 of the program may be attempted more than twice.

11. A student may be required to withdraw from their program at any time, if, in the opinion of the Faculty, he/she is unlikely to benefit from continued attendance.

8 Graduation

Upon meeting the qualifications for any of the programs of the Faculty of Engineering and Applied Science a student must apply by the appropriate deadline date to graduate on the prescribed “Application for Graduation” form. This form may be obtained on-line at the Memorial Self-Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

9 Waiver of Faculty Regulations

Every student has the right to request a waiver of Faculty regulations. Students seeking a waiver of University academic regulations should refer to the UNIVERSITY REGULATIONS - General Academic Regulations Undergraduate, Waiver of Regulations.

1. The Faculty Council reserves the right in special circumstances to modify, alter, or waive any Faculty regulation in its application to individual students, where merit and equity so warrant in the judgment of the appropriate Committee of the Faculty Council.

2. All requests must be submitted to the Office of the Associate Dean (Undergraduate Studies) for submission to the appropriate Committee of the Faculty. Students must submit their request in writing. Medical and/or other documentation to substantiate the request must be provided.

3. Requests for waivers of admission requirements will be submitted to the Admissions Committee who will make a recommendation for action to the Committee on Undergraduate Studies of the Faculty.

4. Requests for a waiver of a course(s) required in academic terms 3 to 8 should be made prior to the commencement of the academic term and will be considered by the Committee on Undergraduate Studies, upon recommendation of the Head of the appropriate Department.

5. Requests for a waiver of a work term will be considered by the Committee on Undergraduate Studies upon recommendation of the Office of Co-operative Education. Any waiver granted does not reduce the total number of work terms required for the degree below an absolute minimum of three.

10 Appeal of Regulations

10.1 General Information

In accordance with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Appeal of Decisions, the Appeals Committee of the Faculty of Engineering and Applied Science considers appeals of promotion, admission and readmission decisions related to undergraduate programs offered by the Faculty of Engineering and Applied Science. A student wishing to appeal related decisions should review the General Academic Regulations (Undergraduate), Appeal of Decisions carefully. Individual course grades may not be appealed as a student will normally have had the opportunity of contesting grades immediately after notification as outlined under UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Appeal of Decisions, Route for Questioning Grades.

All appeals must be directed to the Secretary of the Appeals Committee, c/o the Undergraduate Studies Office of the Faculty of Engineering and Applied Science. All letters of appeal must state clearly and fully the grounds for the appeal and the resolution being sought.
10.2 Appeals of Admission Decisions

An appeal of a decision concerning admission or readmission must be made in writing within fourteen days of the date of notification of the decision to the Secretary of the Appeals Committee, c/o the Undergraduate Studies Office of the Faculty of Engineering and Applied Science.

10.3 Appeals of Promotion Decisions

1. Appeals of promotion decisions must be submitted to the Secretary of the Appeals Committee, c/o the Undergraduate Studies Office of the Faculty of Engineering and Applied Science within one month of the notification by the Faculty of the promotion decision. Appeal submissions shall contain the following:

- Student name,
- Current address and telephone number,
- Memorial University of Newfoundland e-mail address,
- Student ID number,
- A copy of the decision giving rise to the appeal,
- A description of the matter under appeal,
- The grounds of appeal,
- Supporting documentation; and
- The resolution being sought.

2. When a student has requested a re-read of an examination paper which may affect an appeal, that appeal must nevertheless be submitted within one month of the issue of the original decision and consideration of the appeal will be delayed until the result of the re-read is available.

3. A student may request additional time to gather supporting documentation. Such a request will not be unreasonably denied.

4. For assistance in the appeals process, a student is advised to consult with the Associate Dean (Undergraduate Studies) whose advice shall include the provision of a list of others within the Faculty and elsewhere in the University who can advise the student during the appeals process.

5. A student is encouraged to review UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions, Information Required in Letters of Appeal.

6. The terms of reference for the Appeals Committee of the Faculty of Engineering and Applied Science, including procedures followed by the Committee, are posted on the Faculty website at www.mun.ca/engineering.

10.4 Other Appeals

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions.

11 Course Descriptions

All courses of the Faculty are designated by ENGI.

11.1 Work Terms and Non-Credit Courses

001W Engineering Work Term 1 represents, for most students, the first experience in an engineering or related work environment. A student is expected to learn, develop and practise the basic standards of behaviour, discipline and performance normally found in a professional work environment. A student is expected to learn the basics of technical writing and to become familiar with the various communications tools used in a technical work environment. The communications component for Work Term 1 will include a daily diary and a written document.

CH: 0
LC: 0
PR: ENGI 200W

002W Engineering Work Term 2 requires a student to contribute positively to the engineering design and problem solving processes practised in the work environment. A student is expected to show greater independence and responsibility and function as a more effective team member than in Work Term 1. An ability to deal, under supervision, with complex work-related concepts and problems should also be demonstrated. A student can become better acquainted with his/her chosen discipline, and the attitudes, responsibilities, and ethics normally expected of engineers. The communications component for Work Term 2 consists of a formal, descriptive technical report on a topic chosen from the student’s work environment.

CH: 0
LC: 0
PR: ENGI 001W, ENGI 3101

003W Engineering Work Term 3 requires greater participation in the student’s selected engineering discipline. A student becomes more experienced and proficient with the appropriate design procedures than in the preceding work terms. A student is expected to acquire improved speed and accuracy in their work and accept greater responsibility and be able to function with less direct supervision. Self-confidence and initiative as well as improved analytical skills are expected to develop at this stage in the student’s engineering education. The communications component for Work Term 3 consists of a formal technical report on a topic chosen from the student’s work environment.

CH: 0
LC: 0
PR: ENGI 002W

004W Engineering Work Term 4 requires a student to engage in various facets of engineering, such as design, analysis, project management, specifications, plans, formal proposals, tender documents, etc. Participation in the student’s selected engineering discipline is expected. A student should continue to gain an appreciation of the use and importance of acquired analytical skills in engineering analysis as well as the application of specifications and codes. A student should have a level of responsibility commensurate with his/her academic background and experience. The communications component for Work Term 4 consists of an oral presentation and written summary on a technical subject taken from the student’s work environment.

CH: 0
LC: 0
PR: ENGI 003W

005W Engineering Work Term 5 requires a student to engage in various facets of engineering, such as design, analysis, project management, specifications, plans, formal proposals, tender documents, etc. Participation in his/her selected engineering discipline is expected. A student should continue to gain an appreciation of the use and importance of acquired analytical skills in engineering analysis as well as the application of specifications and codes. A student should have a level of responsibility commensurate with his/her academic background and experience. The communications component for Work Term 5 consists of a written report or oral presentation on a topic chosen from the student’s work environment.

CH: 0
LC: 0

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
200W Professional Development Seminars are offered during the Fall and Winter semesters prior to a student’s first work term. These seminars introduce the co-operative education process and prepare the student for work terms. These seminars are graded PAS or FAL.

11.2 Engineering One Courses

1010 Engineering Statics is the first course in Engineering mechanics. Forces and moments are described with vector algebra, leading to a description of the equilibrium conditions for particles and solid bodies. The importance of free body diagrams is highlighted. This knowledge is then applied to the analysis of trusses, frames and machines. Additional topics include an examination of friction and the concepts of centre of force, centroids and second moments of area.

CO: Mathematics 1000
CR: the former ENGI 1313
OR: tutorial 1 hour per week
PR: Level III Physics or Physics 1020 or equivalent

1020 Introduction to Programming is an introduction to algorithmic problem solving techniques and computer programming, including basic program control structures (sequence, call, branch, loop) and data representations, functional decomposition, and design by contract. Exercises and examples are drawn from a variety of engineering disciplines and are implemented using a standard modern programming language.

CR: the former ENGI 2420
PR: the former ENGI 2420
OR: tutorial 1 hour per week

1030 Engineering Graphics and Design provides two complementary competencies. Firstly, it provides an introduction to the fundamentals of graphic communication, including orthographic projections, three dimensional pictorials, sectioning and dimensioning. Both sketching and CAD are utilized. Secondly, the course introduces students to standard design methodologies. The graphics and design competencies are reinforced through lab and project exercises.

PR: eligibility to register for Mathematics 1000

1040 Mechanisms and Electric Circuits is offered in two serial modules, including laboratory and workshop practice, and a team project to expose students to the concept of system integration involving electrical and mechanical systems. The electrical module provides an introduction to dc circuits, with an analysis of dc circuits used in control, measurement and instrumentation systems. The mechanism module provides an introduction to machine components such as belts, pulleys, gears, and simple linkages. The laboratory and workshop component introduces students to hands-on practice in basic laboratory instruments, tools and safety procedures. A team project involves the construction, assembly and testing of a simple mechanism.

PR: Level III Physics or Physics 1051 (which may be taken concurrently) and Mathematics 1000 (which may be taken concurrently).

11.3 Academic Term 3 Courses

3001 Ocean/Naval Design introduces design and operation for ships and marine structures. Technology evolution in ship and offshore structures is reviewed, emphasizing service needs. Structural concepts, materials and construction methods are examined, including design for manufacturing. The design spiral and trade-offs between design characteristics are explored and modelling methods as tools in the design process are introduced. There is a minimum of six laboratory sessions including ship tours, a design project or research paper.

PR: Level III Physics or Physics 1051

3054 Ocean Engineering Hydrostatics is an introductory course to naval architecture and marine engineering. It discusses the basic principles of the statics of rigid floating or submerged structures. These include: ships, offshore platforms and submarines. Methods of analysis of the hydrostatics, stability and trim, damage stability and the statics of mooring systems are introduced. Applications are also discussed.

PR: ENGI 1010

3101 Engineering Professionalism I examines issues associated with professional engineering practice and with functioning effectively in the workplace. Topics include communication, workplace and professional ethics, information literacy, equity, gender, diversity, and occupational health and safety (including first-aid). This is a writing-intensive course with a critically-reflective component. Current accreditation graduate attributes are introduced for further development throughout the program.

3424 Engineering Mathematics includes ordinary differential equations of first order and first degree; linear ordinary differential equations of higher order, methods of undetermined coefficients and variation of parameters; applications to electric circuits and mass-spring systems; Laplace transforms; partial differentiation; convergence of series; Taylor and binomial series; remainder term; and an introduction to Fourier series.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001, Mathematics 2050

3425 Mathematics for Civil Engineering I includes sequences & series, functions of a single parameter, conic sections, polar coordinates, partial differentiation, multiple integration, introduction to first order ordinary differential equations.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001 and 2050

3600 Introduction to Process Engineering is an introductory course in process engineering, which comprises principles and the practical aspects of organic, inorganic and biochemical processes. It emphasizes the structure and properties of organic, inorganic, and bio-chemicals; process flow measurement, process variable identification and production processes. The course uses extensive examples from industrial processes. In laboratory sessions students will use HYSYS and OLI software to study process characteristics.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001 and 2050

3610 Earth Sciences for Civil Engineering is an introduction to basic concepts in geology with emphasis on applications in Civil, Geological, Mining and Environmental Engineering through the study of basic concepts and case histories. It includes the study of rocks, minerals, sediments and their physical properties in laboratory exercises.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001 and 2050

3703 Surveying and Geomatics includes distance, elevation, and angle measurements; horizontal curves; plane survey calculations; area and volume computations; introduction to photogrammetry; global positioning system (GPS) and geographical information systems (GIS). A surveying field school to introduce students to the use of surveying equipment and mapping will be held in the first two weeks of the term.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001 and 2050

3731 Materials for Construction includes structure of metals and nonmetals; deformation of metals; strengthening mechanisms in metals; concrete and cementitious materials; admixtures; iron and steel; brick masonry; concrete masonry; mortar grout and plaster; wood and wood products.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001 and 2050

3821 Circuit Analysis begins with a review of basic circuit analysis including dependent sources, then considers wye-delta transformation, bridge circuits, transient analysis of first and second order circuits, sinusoidal steady state analysis, phasor diagrams, sinusoidal steady-state power, complex power and maximum power transfer.

PR: the former ENGI 2422
OR: tutorial 1 hour per week
PR: Mathematics 1001, Mathematics 2050, ENGI 1040

3861 Digital Logic includes number systems and Boolean algebra; minimization techniques for Boolean functions; basic combinational logic design; analysis and design; flip-flops, state machine design, implementation; decoders, multiplexors, registers, counters; simple arithmetic and logic units (ALUs); digital system design of small systems.

PR: the former Computer Science 3723
OR: tutorial 1 hour per week
PR: Mathematics 1001, Mathematics 2050, ENGI 1040
3891 Foundations of Programming introduces fundamental concepts in object-oriented programming and develops vocational programming skills in C++. Topics include abstraction, types, contracts, object-oriented design, C++ language features including key elements of the standard library and practical programming and debugging skills.

CR: Computer Science 2510
LH: at least four 2-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 1020

3901 Thermodynamics I is a macroscopic approach to heat, work, and energy; properties of pure substances; conservation of mass, energy for open and closed systems; thermal efficiency and coefficient of performance; second law of thermodynamics; and its corollaries; entropy; second law analysis of thermodynamic systems; second law efficiency; and an introduction to simple thermodynamic cycles.

LH: at least three 1-hour sessions per semester
OR: tutorial 1 hour per week
PR: Mathematics 1001

3911 Chemistry and Physics of Engineering Materials I is an introduction to the structure and properties of engineering materials, in particular materials, semiconductors, ceramics, glasses and polymers. Topics include a review of basic concepts, bonding, discussion of basic crystalline and amorphous structures, point and line defects, and the role these structural features play in elastic and plastic deformations, yield, fracture, glass transition, thermal conductivity, thermal expansion, specific heat and electrical conductivity.

CR: the former ENGI 2205
LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: Chemistry 1050

3933 Dynamics includes kinematics and kinetics of particles using rectangular, polar, and spherical coordinates; constant and non-constant acceleration, work-energy and impulse-momentum methods.

CR: the former ENGI 2313
OR: tutorial 1 hour per week
PR: ENGI 1010, Mathematics 1001

3941 Production Technology includes an overview of production: production strategies; dimensioning and tolerancing; basic material removal process; forming and shaping process; casting; molding, extrusion and joining processes; computer aided machining; new technologies.

LH: at least eight 3-hour sessions per semester

11.4 Academic Term 4 Courses

4007 Marine Materials examines the properties and uses of steel, aluminum and composite materials in marine applications. Topics include: review of mechanics of materials, Hooke’s Law, material failure models; carbon steel - fundamentals, processes, preparation, design, drawings, cutting, heat treatment; stainless steel: aluminum; riveting and welding; corrosion phenomena; composites - classification, production, and mechanical properties.

CR: the former ENGI 7007
LH: at least four 3-hour sessions per semester
PR: CHEM 1050

4011 Resistance and Propulsion examines the phenomena resisting the motions of ships and some factors considered in the design of the marine screw propeller. The topics include the resistance due to friction, wave making, form appendage, wind and waves, squat, blockage, and shallow water effects, and also include the estimation of powering using methodical series and statistical methods. Topics considered in the design of the marine screw propeller include propeller theory, blade sections, blade strength, metrical sets, charts, efficiency elements, lifting line calculations, cavitation, and propellers in non-uniform flow.

CR: the former ENGI 5011
LH: 3
OR: tutorial 1 hour per week
PR: ENGI 3054

4020 Marine Fluid Dynamics includes fluid statics; fluid flow phenomena, in general and in marine applications; control volume analysis of fluid motion; conservation of mass, momentum and energy; differential approach to flow analysis; head losses; applications of conservation laws: external vs. internal flow; dimensional analysis and scaling; fluid-structure interaction concepts; potential flow theory, lift and Kutta-Joukowski theorem; viscous flow, boundary layers and drag.

LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 3054

4102 Engineering Economics is an introduction to the concepts in the determination of the economic feasibility of engineering projects; time value of money – interest rates, depreciation, annual, present and future worth analysis; benefit-cost analysis, tangible and intangible benefits and costs; economic risk and sensitivity analysis, economic optimization.

4312 Mechanics of Solids I examines force analysis of structures and structural components, free body diagrams of structure, components and section of a components, definition of a stress at point, stress notation, complementary property of shear stress, definition of strain, normal strain, shear strain, thermal strain, mechanical properties of materials, analysis of prismatic members due to axial, bending and torsion loading, analysis of beams, shear force and bending moment diagrams, combined loads; and the transformation of stresses and strains.

CR: ENGI 4934
LH: four 1-hour sessions per semester
LH: up to ten 1-hour tutorials per semester
PR: ENGI 1010

4421 Probability and Statistics includes probability, probability distributions, probability densities, sampling distribution, hypothesis testing, regression and correlation.

CR: the former ENGI 3423, STAT 2550, the former STAT 2510
OR: tutorial 1 hour per week
PR: Mathematics 1001

4424 Discrete Mathematics for Computer Engineering is an introduction to discrete mathematics including a selection of topics such as propositional logic, introductory predicate logic, mathematical reasoning, induction, sets, relations, functions, integers, graphs, trees, and models of computation.

CR: the former ENGI 3422, Mathematics 2320, Computer Science 1002, or the former Computer Science 2740
OR: tutorial 1 hour per week
PR: Mathematics 2050

4425 Mathematics for Civil Engineering II examines the analytical solution of ordinary differential equations of the first and higher order numerical methods: errors, round off and stability, solution to nonlinear equations, curve fitting and interpolation methods, numerical differentiation and integration.

CR: 4
LH: 4
OR: tutorial 1 hour per week
PR: ENGI 3425

4430 Advanced Calculus for Engineering includes parametric vector functions; polar curves; gradient, divergence and curl; multiple integration; vector calculus, theorems of Green, Stokes and Gauss; an introduction to partial differential equations; and application of advanced calculus to relevant engineering problems.

CR: the former ENGI 5432
OR: tutorial 1 hour per week
PR: ENGI 3424

4602 Process Engineering Thermodynamics extends the study started in ENGI 3901 of thermodynamics, with special reference to chemical process applications: basic laws, thermodynamic properties of pure fluids and mixtures, heat engines, multicomponent systems, thermal/mechanical equilibrium, chemical equilibrium, and thermodynamics of chemical processes. Special emphasis is placed on the application of thermodynamics to practical problems in chemical engineering such as phase equilibria, solutions and reaction equilibria in separations and reaction engineering.

CR: the former Chemistry 2300, the former Chemistry 3300
PR: ENGI 3901

4621 Process Mathematical Methods introduces numerical methods in chemical engineering processes, sets of linear algebraic equations, simultaneous non-linear equations, polynomial functions, numerical integration, numerical differentiation, higher order ordinary differential equations, stiff equations, Runge-Kutta methods, boundary value problems and applications of eigenvalue problems (numerical solutions). It provides applications of the methods to different aspects of process engineering such as reactor design, separation, process modeling, equipment design and analysis.

CO: ENGI 4625
LH: 3
PR: ENGI 3424 (or Mathematics 2000, Mathematics 2050, and Mathematics 2260)

4625 Process Engineering Calculations is an introduction to the analysis of chemical processes with an emphasis on mass and energy balances. Stoichiometric relationships, ideal and real gas behaviour are also covered. The course will help Process Engineering majors in their second year to develop a framework for the analysis of flow sheet problems and will present systematic approaches for manual and computer-aided solution of full scale balance problems.

CO: ENGI 4602. There is no corequisite for students completing a minor in Applied Science - Process Engineering.

PR: ENGI 3901. Students completing a minor in Applied Science - Process Engineering must complete Chemistry 2301 as the prerequisite instead of ENGI 3901.
4617 Applied Environmental Science and Engineering examines the nature and scope of environmental problems; concept of sustainable development; basic concepts of environmental quality parameters and standards; water and wastewater treatment; solid and hazardous wastes; atmospheric, water and noise, pollution, their measurements, and mitigation control.

CR: ENGI 4961, the former ENGI 4913, the former ENGI 5961

LH: five 1-hour sessions per semester

4723 Geotechnical Engineering I includes an introduction to soil as a three-phase medium; and examines physical and mechanical properties; particle size distribution; soil plasticity and structure; classification of soils; soil compaction; hydraulic properties; permeability; flow of water in soil; flow nets; effective stress concept in soils; stresses in soils beneath loaded areas; and one-dimensional consolidation theory.

LH: 3

OR: twelve 1-hour tutorials per semester

PR: ENGI 3610

4823 Introduction to Systems and Signals begins with an introduction to systems and signals, and includes mechanical and electrical analogues; principles of linear superposition and time-invariance; definitions, properties, and use of the delta function; applications of complex variables and functions; impulse and step responses; input-output relations of continuous-time systems; in terms of convolution and transfer functions; frequency response plots; the Fourier transform and applications; Laplace transforms with application to filtering, communications, and controls.

OR: twelve 1-hour tutorials per semester

PR: ENGI 3424, ENGI 3821

4841 Electromechanical Devices includes an introduction to fundamental principles of energy conversion; review of single-phase AC circuits; three-phase AC circuits; magnetic fields and circuits; transformer models, performance and applications; basic concepts of rotating machines; performance and control of DC motors.

CR: the former ENGI 5842

LH: six 3-hour sessions per semester

OR: tutorial one hour per week

PR: ENGI 3424, ENGI 3821

4854 Electronic Circuits I provides an introduction to semiconductor electronic devices and circuits. Topics covered include internal structure of electronic devices; working principles, dc and small-signal models and analysis of p-n junction diodes, bipolar junction transistors and field effect transistors; introduction to digital electronics; differential and multistage amplifier circuits; Miller’s theorem; frequency response of discrete amplifiers; practical applications including power supplies, amplifiers and switching circuits. CAD tools are used to illustrate the analysis and design of electronic circuits.

LH: eight 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 3821, Physics 3000

4862 Microprocessors includes microprocessor architecture; assembly language programming; addressing modes, table look up; memory mapped devices; interfacing techniques: parallel, serial; timing control; analog input and output, and computer displays.

LH: eight 3-hour sessions per semester

OR: nine 1-hour tutorial sessions per semester

PR: ENGI 3861

4892 Data Structures examines fundamental data structures; recursive structures and generic programming techniques; modularity and reusability; time complexity and efficient data structures; procedural abstraction; data abstraction and precise documentation of data structures.

CO: ENGI 4424

OR: tutorial 1 hour per week

PR: ENGI 3891

4901 Thermodynamics II examines thermodynamic cycles: power and refrigeration applications; human comfort and air conditioning; mixture of gases and vapours, humidity, psychrometrics; chemically reacting mixtures and combustion; exergy analysis.

LH: at least three 1.5-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 3901

4932 Mechanicals and Machines includes an overview of mechanisms within machines; analytical and computer-aided methods for position, velocity, and acceleration analysis of moving mechanisms; power transmission; kinematics and kinetics of planar mechanisms; static and dynamic loads on mechanisms and an introduction to mechanism synthesis. Students will complete an analysis project.

CR: the former ENGI 3933

OR: tutorial 1 hour per week

PR: ENGI 3934

4934 Mechanics of Solids I examines stress and strain analysis applied to bars and beams in axial, torsion and bending; beam deflection, plane stress and strain, stress and strain transformations in two dimensions and Mohr’s circle.

CR: ENGI 4312

LH: at least four 1-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 1010

4961 Fluid Mechanics I (same as the former ENGI 5961) examines fluid statics; fluid flow phenomena; control volume analysis; conservation of mass, momentum, and energy; Bernoulli equation; head losses, applications of conservation laws: flow measurement devices; pipe networks; momentum devices, dimensional analysis, boundary layer phenomena, lift and drag.

CR: ENGI 4611, the former ENGI 4913, the former ENGI 5961

LH: five 1-hour sessions per semester

OR: tutorial 1 hour per week

11.5 Academic Term 5 Courses

5020 Marine Propulsion is a second course in marine propellers and ship powering. Design and analysis of marine screw propellers and other propulsion devices are covered. Conventional and unconventional propulsion systems are introduced. Methods and philosophy of propeller design are included. Design of fixed-pitch propellers based on lifting line theory and the design of ducted propellers are examined. Design of other propulsion systems such as waterjets and sails is also incorporated.

CR: the former ENGI 6020

LH: at least two 3-hour sessions per semester

OR: tutorial one hour per week

PR: ENGI 4020

5022 Probability and Random Processes in Ocean Engineering includes basic concepts in probability, random variables, multiple random variables, descriptive statistics. The random processes component reviews mathematics of functions; introduces system input-output relations of discrete-time systems; contrasts time vs frequency domain representations; introduces frequency response plots and the Fourier transform. A probabilistic approach to ship damage, representation of ocean waves (in time and frequency domains), Response Amplitude Operators (RAO), and acceptable levels of risk for design are introduced and applied.

CR: tutorial one hour per week

PR: ENGI 4020, Mathematics 2260 or the former Mathematics 3260

5034 Marine Vibrations provides an introduction to mechanical vibration with a focus on vibration of marine machinery and on the dynamic response of marine structures. Topics include: single degree of freedom systems – free vibration, energy methods, response to harmonic excitation, response to arbitrary inputs; multi degree of freedom systems – natural frequencies and mode shapes, response to harmonic excitation; frequency response functions; on-board sources of vibration, vibration measurement techniques and instrumentation.

CR: ENGI 6933, the former ENGI 5932

LH: at least four 2-hour sessions per semester

PR: ENGI 3934

5312 Mechanics of Solids II includes a review of earlier concepts; strain transformation; failure theories; deflections of beams; energy methods; buckling of columns and the inelastic behaviour of beam cross-sections.

LH: four 3-hour sessions per semester

OR: twelve 1-hour tutorials per semester

PR: ENGI 4312

5420 Probability and Random Processes includes basic concepts in probability, random variables, multiple random variables, descriptive statistics, random processes and selected applications for engineering.

PR: ENGI 4823

5434 Applied Mathematical Analysis examines numerical and analytical solutions of applied mathematical problems in Civil Engineering, problems with higher order ordinary differential equations, stiff equations, systems of ODE, Runge-Kutta methods, boundary value problems, applications of eigen value problems (numerical solutions), Fourier analysis, elliptic, parabolic and hyperbolic partial differential equations and their numerical solutions with engineering applications.

PR: ENGI 4425

5601 Mass Transfer covers diffusive as well as convective mass transfer, mass transfer correlations, and the application to absorption and dehumidification.
5602 Process Heat Transfer is a study of concepts involved in heat transfer. Topics include applications of continuity and energy equations, fundamentals of heat transfer, modes of heat transfer, conduction, convection and radiation heat transfer, boiling and condensation, evaporation, and heat exchanger analysis and design.

CR: ENGI 6901

LH: one 4-hour session per semester

PR: ENGI 4602, ENGI 4661 or ENGI 4961 or the former ENGI 5961

5671 Process Equipment Design I introduces the principles of unit operations, grouped into four sections: fluid mechanics, heat transfer, mass transfer and equilibrium stages, and operations involving particulate solids. It also includes design and operation fundamentals of unit operations: size reduction, filtration, extraction, drying, crystallization, and humidification, and membrane separation.

CO: ENGI 5501

LH: at least four 2-hour sessions per semester

PR: ENGI 4621, ENGI 4625

5706 Design of Concrete Structures begins with a review of mechanical properties of concrete. Topics include design methods and requirements, strength of reinforced concrete sections in bending, balanced condition at ultimate strength with tension reinforcement, bending with both tension and compression reinforcement; serviceability, deflections, flexural crack control for beams and one-way slabs; shear strength, inclined cracking and shear reinforcement; bond stress and development of reinforcement; members in compression and bending; short columns.

LH: five 3-hour sessions per semester

OR: twelve 1-hour tutorials per semester

PR: ENGI 4312

5713 Fluid Mechanics examines fluid properties; fluid statics; buoyancy and stability; kinematics; pressure measurement; continuity, energy and momentum principles; control volume analysis; energy and hydraulic lines; free jets; laminar and turbulent flow; dimensional analysis; drag on immersed bodies; flow measurement; head loss in pipes; and an introduction to flow in pipe systems.

CR: ENGI 4961, the former ENGI 4913, the former ENGI 5961

LH: five 2-hour sessions per semester

OR: twelve 1-hour tutorials per semester

PR: ENGI 4425

5723 Geotechnical Engineering II examines shear strength of soil; types of laboratory and in-situ soil shear strength tests; lateral earth pressure and retaining structures; slope stability analysis; soil bearing capacity for shallow foundations; introduction to pile foundations and limit state design in geotechnical engineering.

CR: the former ENGI 6723

LH: 3

OR: twelve 1-hour tutorials per semester

PR: ENGI 4723

5800 Electrical Engineering Design students work, normally in pairs, on small design projects that require them to follow a hierarchical design process including general product definition, specifications and requirements, functional-block diagrams, specification of functional blocks for circuit-level synthesis and implementation, system integration, simulation or preliminary testing and verification. The small projects are designed to encourage and motivate students to learn and practise the process of design. The course culminates in a large design project.

CO: ENGI 5820, ENGI 5854

LC: 18 lecture hours per semester

OR: meetings with project supervisor as required

PR: ENGI 4841, ENGI 4854, ENGI 4862

5812 Basic Electromagnetics includes a review of relevant vector calculus, including the divergence, gradient and curl operators in Cartesian, cylindrical and spherical coordinates, divergence theorem, Stokes' theorem, and Laplace's and Poisson's equations. Topics in electrostatics include Coulomb's law, potential and energy, conductors, dielectrics, capacitance and electric field boundary conditions. Topics for magnetism include the steady magnetic field, the Biot-Savart law and Ampère's law.

CR: Physics 3500

OR: tutorial 1 hour per week

PR: ENGI 3821, ENGI 4400

5821 Control Systems I includes an introduction to control systems with negative feedback; mathematical modelling and transfer functions of electromechanical systems; block diagram and signal flow graphs; controller realization; transient response analysis; Routh's stability criterion; basic control actions and response of control systems; root locus analysis and design; frequency response analysis. Bode diagram; gain and phase margins; compensator design in frequency domain; Nyquist stability criterion; digital implementations of analog compensators; and an introduction to PID controller tuning methods.

CO: ENGI 5854

LH: four 3-hour sessions per semester

PR: ENGI 4823

5854 Electronic Circuits II provides an introduction to circuits using operational amplifiers. Topics covered include operational amplifier configurations, analysis, and design; transient and frequency response of amplifier circuits; feedback amplifier analysis and design, stability and compensation techniques; noise and distortion in electronic circuits; analysis and design of data converters; and an introduction to analog filter design. CAD tools are used to illustrate the analysis and design of electronic circuits.

LH: eight 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 4823, ENGI 4854

5855 Digital Systems includes concepts, language, tools, and issues pertaining to specification, modelling, analysis, simulation, testing and synthesis of digital systems, including PLD, FPGA, and ASIC devices. Industry standard CAD tools will be used in this course to facilitate system design and testing.

LH: ten 3-hour sessions per semester

PR: ENGI 3891, ENGI 4862

5895 Software Design examines the development process: requirement analysis, design, iterative development, design documentation; an introduction to the Unified Modelling Language; use cases, class diagrams and sequence diagrams; an introduction to software design patterns; creational patterns, structural patterns and behavioural patterns; object oriented, modular decomposition. The course includes a major design project.

LC: 25 lecture hours per semester

LH: six 3-hour sessions per semester

OR: meetings with project supervisor as required

PR: ENGI 4892

5911 Chemistry and Physics of Engineering Materials II examines aspects of chemical and physical processes and microscopic structure relevant to the production and use of engineering materials, focusing on metals, alloys, silicates, Portland cement, plastics and adhesives, composites, and wood. Topics include solid-state solutions and compounds, alloy structures, phase diagrams, reaction rates, solid-state transformations, polymerization, oxidation and corrosion, hardness, creep, fatigue, fracture toughness and visco-elastic deformation.

CR: the former ENGI 3205

LH: at least four 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 3911

5931 Mechanics of Solids II examines stresses due to combined loads, asymmetric bending, transformation of stresses and strains, principal stresses and strains (in two and three dimensions), static failure theories, stress concentration, energy methods, method of superposition, buckling of columns, thin- and thick-walled pressure vessels and contact stresses.

CR: ENGI 5312

LH: at least four 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 4934

5952 Mechatronics I involves modelling of electro-mechanical systems and introduction to basic analog and digital electronic devices. Topics covered include lumped-parameter modelling of electro-mechanical systems, basic electronic components and semiconductors, introduction to op amps, digital logic and number systems, microcontroller technology and interfacing (switches, LEDs, steppers, solenoids, A/D and D/A conversion).

CR: the former ENGI 4951

LH: five 3-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 1040, ENGI 3424

5962 Fluid Mechanics II examines differential analysis of fluid motion; conservation of mass: continuity equation; conservation of momentum: Navier-Stokes equations; conservation of energy; basic film lubrication theory, boundary layer flows; compressible flows.

CR: ENGI 6661, the former ENGI 5913, the former ENGI 6961

LH: at least three 1-hour sessions per semester

OR: tutorial 1 hour per week

PR: ENGI 4961 or the former ENGI 5961

11.6 Academic Term 6 Courses

6002 Ship Structures I examines longitudinal strength, still water and wave bending moment, shear and bending moment curves, Smith Correction, section modulus calculation, torsion and racking forces; bulkhead and girder design; pressure vessels; linear and nonlinear analysis; load analyse; portal frame analysis by moment distribution and energy method; finite element analysis and the use of Classification Society rules for design of midship section. Laboratory sessions cover use of analysis software to illustrate structural behaviour concepts.

CR: the former ENGI 5003

LH: at least five 3-hour sessions per semester
6005 Floating Ocean Structures Design introduces floating structures used in the offshore petroleum industry, along with functional requirements, such as drilling and production, of the platforms. Field development criteria are presented in the context of platform concept selection and synthesis. Environmental loads are examined, focussing on wave loads and ice loads. Diffraction theory and its application on offshore structures is presented. Offshore safety is discussed in terms of major hazards, risk management, and case studies.

CR: the former ENGI 7005
LH: 1
PR: ENGI 3054

6036 Dynamics of Ocean Vehicles examines applications of the linearized equations of motion to ocean vehicle problems with single and multiple degrees of freedom in waves; dynamics of marine vehicles: motions in waves; hydrodynamics effects such as added mass, radiance and viscous damping, strip theory; irregular seaway and motions. CR: the former ENGI 6530, the former ENGI 7035
LH: at least two 3-hour sessions per semester
OR: 1 tutorial hour per week
PR: ENGI 3054, ENGI 4020

6046 Marine Engineering Systems (same as the former ENGI 7045) examines shafting system design; shafting system vibration analysis, study of exciting forces and moments, and balancing of reciprocating and rotating machinery; heat transfer and marine heat exchangers; incompressible fluid flow and piping system design and selection of appropriate pumping devices.

CH: 4
CO: ENGI 6933
CR: the former ENGI 7045
LC: 4
LH: 1
PR: ENGI 3901

6055 Marine Cybernetics examines propulsion and motion control of ships, submeribles and offshore structures. Building upon the student’s knowledge of mathematics, mechanics and hydromechanics provides an introduction to control systems and mathematical modeling of marine systems. Course components include: basic control actions and response of control systems; simulation and design of control systems; dynamic positioning; power management; marine automation.

LH: at least four 2-hour sessions per semester
PR: ENGI 4011

5101 Assessment of Technology deals with the issues of the impact of technology on society from an economic, environmental and sociological point of view. Public safety as an engineering responsibility will also be covered. Students will be expected to participate in group discussions, write a number of essays and give oral presentations.

6322 Thermal Sciences examines fundamental concepts associated with thermodynamics, fluid dynamics and heat transfer; first and second laws of thermodynamics; system and control volume analysis; classification of flows; introduction to boundary layers and drag; convection, conduction and radiation heat transfer; thermal insulation and calculation of R-values; and cooling of electrical components.

CR: the former ENGI 4322
PR: ENGI 5312

6602 Offshore Petroleum Geology and Technology introduces basic concepts in geology and geophysics of the offshore environment. An outline of petroleum geology is presented, following a path from the origins of hydrocarbons through migration in the Earth’s crust, accumulation in reservoirs and the strategies used to discover and to exploit liquids found in the subsurface. Topics include an introduction to the offshore oil and gas industry in harsh environment, type of platforms and structures, exploration phase of offshore oil development, production drilling and completion processes and equipment, and oil and gas transportation system. There are case studies and a project.

PR: completion of Academic Term 5

6621 Process Modelling and Analysis (same as the former ENGI 5621) is designed to introduce the concepts of process model building and its application in design and process scheduling. It introduces fundamental tools and skills of process modelling: lumped parameter dynamic models, distributed parameter dynamic models, advanced dynamic model development, application of process models, and computer aided process design. The course will also introduce concepts and applications of process optimization, process flow sheet optimization, process scheduling, and process flexibility analysis.

CR: the former ENGI 5621
LH: 3
PR: ENGI 4621, ENGI 4625

6631 Chemical Reaction Engineering will cover the fundamentals of chemical kinetics and reaction rate expressions as well as the types of reactors, homogeneous and heterogeneous (catalytic) reactors, and the interrelation between transport phenomena and reaction engineering as it applies to process design. It also includes non-ideal flow, non-ideal reactors, catalytic reaction system, and multiphase reactors.

LH: four 2-hour sessions per semester
PR: ENGI 4621, ENGI 4661 or ENGI 4961 or the former ENGI 5961

6651 Sustainable Engineering in Processing Industries will introduce students to sustainable development and its application to processing operations. Areas such as traditional economic growth, materials cycles, methods for measuring environmental impact, life cycle analysis, waste treatment technologies and recycling technologies will be covered. In addition, the concept of industrial ecology will be included.

PR: ENGI 4625, ENGI 5601

6661 Process Fluid Dynamics II builds upon the materials introduced in Process Fluid Dynamics I. The course covers important aspects of fluid dynamics principles and applications in process engineering, including continuity equation; differential governing equations of fluid momentum; conservation laws in chemical/process engineering; ideal and non-ideal flow; compressible and incompressible flow; boundary layer theory for laminar and turbulent flow; multiphase flow; introduction to CFD; turbomachinery; fluid flow features of unit operations.

CR: ENGI 5962, the former ENGI 5913, the former ENGI 5961
LH: three 1-hour sessions per semester
PR: ENGI 4661, ENGI 4961 or the former ENGI 5961

6671 Process Equipment Design II will cover design and operation of equilibrium stage separation processes including distillation, extraction, and leaching. It will also cover advanced concept of equipment design such as heterogeneous system, multiphase system, absorption, and adsorption operation and computer assisted design. Course will use HYSIS and other process equipment design tools.

LH: at least four 2-hour sessions per semester
PR: ENGI 5601, ENGI 5671

6705 Structural Analysis examines structure classification and loads, building codes provisions, the analysis of statically determined frames, arches and cables, stability and determinacy of planar structures, shear and moment diagrams for frames, influence lines for statically determinate structures, the force method of analysing indeterminate structures, the slope deflection method, and moment distribution method.

LH: six 3-hour sessions per semester
OR: twelve 1-hour tutorials per semester
PR: ENGI 5312

6707 Design of Concrete and Masonry Structures examines the design of concrete members, axial load and bending in reinforced and prestressed concrete members, axial load and bending in unreinforced and prestressed walls, and case studies.

LH: 2
OR: twelve 1-hour tutorials per semester
PR: ENGI 5706

6713 Hydraulics examines flow in pipe systems and networks; uniform and non-uniform flow in open channels; hydraulic machinery and associated conduits; design and analysis of culverts; and pipeline/pump system optimization.

LH: four 3-hour sessions per semester
PR: ENGI 4102, ENGI 5713

6749 Construction Planning Equipment and Methods includes construction equipment selection and utilization; earthmoving including use of explosives; case studies of major civil projects; principles of project planning and control; computer applications to the construction industry.

PR: the former ENGI 8749
ENGI 4102, completion of Academic Term 5 of the Civil Engineering program

6813 Electromagnetic Fields is a continuation of the topics started in Engineering 5812, including a review of electrostatics and magnetostatics, Maxwell’s equations, Lorentz force, Poynting’s theorem, plane waves, and applications including two-wire transmission lines.

CR: Physics 4500
OR: tutorial 1 hour per week
PR: ENGI 5812

6843 Rotating Machines examines the fundamentals of rotating machines; design of machine windings; polyphase and single phase induction motor theory and applications; synchronous machine theory; stability and control of synchronous generators; introduction to permanent magnet machines; introduction to AC motor drives.

LH: six 3-hour sessions per semester
OR: eight 1-hour tutorial sessions per semester
PR: ENGI 4841

6855 Industrial Controls and Instrumentation examines control and instrumentation system components; transducers and signal processing circuits, linear variable differential transformers, power oscillators;
electromechanical actuators, solenoids, power drives; A/D and D/A conversion, standard PC interfaces; real-time operating systems; design of discrete-time feedback controllers on a PC platform; system integration, control system tweaking and troubleshooting; programming soft-PLC's using EC61131.
CR: the former ENGI 7858
LH: at least eight 3-hour sessions per semester
PR: ENGI 5821

6856 Power Electronics is an overview of power semiconductor switches, an introduction to energy conversion and control techniques and examination of controlled rectifiers; phase-controlled converters; switch-mode d/c-d converters; variable frequency d/c/ac inverters; a/c/ac converters; gate and hysteresis drive circuits; design of driver and snubber circuits; thermal models and heat sink design.
CR: the former ENGI 7846
LH: eight 3-hour sessions per semester
OR: eight 1-hour tutorial sessions per semester
PR: ENGI 5854

6861 Computer Architecture begins with a review of microprocessors and computer organization. Topics include fundamentals of computer design: performance metrics and cost; instruction set architecture; memory hierarchy design: cache, main memory and virtual memory; pipelining; hazards; parallelism; special purpose processors; multiprocessors and thread-level parallelism.
OR: tutorial 1 hour per week
PR: ENGI 5865

6871 Communication Principles begins with a review of signal representation and analysis and includes distortionless signal transmission, analog modulation (AM, FM and PM), super-heterodyne receiver, sampling theorem, pulse amplitude modulation (PAM), pulse code modulation (PCM), delta modulation.
LH: four 3-hour sessions per term
PR: ENGI 4823, ENGI 5420

6876 Communication Networks is an introduction to communication networks such as the telephone and computer networks. Topics include circuit switching, packet switching, network protocols and layered architecture, physical layer, data link layer, network layer, error control; local area networks, and internetworking.
PR: ENGI 5420

6892 Algorithms: Complexity and Correctness presents fundamental theories and practices for the design of correct and efficient computing systems. Including specification of computing systems and their components, correctness with respect to specifications; methods of verification; algorithmic problem solving strategies (such as divide and conquer, dynamic programming); tractability and intractability of computational problems.
OR: tutorial one hour per week
PR: ENGI 4424, ENGI 4892

6901 Heat Transfer I examines modes of heat transfer; conduction: steady 1-D conduction, thermal resistance, extended surfaces (fins), lumped capacitance and base drive circuits; convection: Newton's Law of cooling, convection heat transfer coefficient, external boundary layer flows, internal flows; radiation: principles, properties, exchange factors, black body radiation, and enclosures, radiation shields.
PR: ENGI 5802
LH: at least one 3-hour session per semester
OR: tutorial 1 hour per week
PR: ENGI 4901

6928 Computer Aided Engineering Applications (same as the former ENGI 7928) introduces a variety of Computer Aided Engineering (CAE) applications based on advanced 3D CAD modelling. The fundamentals of 3D modelling are covered. CAE applications include assembly modelling, mechanism animation and finite element analysis. Further applications include Computer Aided Manufacturing (CAM); model based inspection (i.e. Coordinate Measurement Machines); reverse engineering; document/ drawing production; data exchange; and data management. The course has a significant practical component, which provides exposure to solid modelling and CAE applications based on an industrial CAD/CAM/CAE package.
CO: ENGI 6929 or the former 5926 or 5927
CR: the former ENGI 7928 or 7962
OR: at least ten 3-hour computer laboratory sessions per semester
PR: ENGI 1030

6929 Mechanical Component Design I (same as the former ENGI 5927) examines adequacy assessment and synthesis of machine elements with a focus on failure prevention, safety factors, and strength; static failure and fatigue analysis of components. Topics include the design of power screws, bolted connections, shafts, and wheels. 
CR: the former ENGI 5926 or 5927
OR: at least eight 3-hour computer laboratory sessions per semester
PR: ENGI 4312

6933 Mechanical Vibrations examines single degree of freedom systems: free vibration, energy methods, response to harmonic excitation, response to arbitrary inputs, rotating unbalance, vibration isolation; two degree of freedom systems: natural frequencies and mode shapes, vibration absorption.
CR: the former ENGI 5932
LH: at least four 2-hour sessions per semester
PR: ENGI 3904

6951 Control Systems I examines modeling, analysis and design of control systems using classical controller design methods. Topics covered include linear system modelling using Laplace transforms, control system stability, time domain analysis - root locus design, frequency domain analysis - bode diagram and Nyquist design, PID Control.
CR: the former ENGI 6925
LH: at least three 1-hour sessions per semester
OR: 1-hour tutorial per week
PR: ENGI 5952 or the former ENGI 5951

11.7 Academic Term 7 Courses

7000 Ocean Systems Design develops concept design methods for marine positions from need definition through to solution selection, including weight, cost and power requirements estimating, selection of principal design characteristics and evaluation of alternative solutions. Students develop a proposal for a marine system design project which will include a statement of requirements, a parametric study, a work plan and schedule. This design project will be completed as a full design in ENGI 8000.
CR: the former ENGI 7052
LH: at least ten 3-hour computer laboratory sessions per semester
PR: ENGI 6002

7003 Small Craft Design (same as the former ENGI 8003) presents fundamentals of naval architecture and design methodology for small craft. Emphasis is on recreational craft, with special emphasis on sailing vessels. Construction materials, scantlings, performance prediction and seaworthiness are covered. Design problems unique to small craft such as motion design, sail area determination and performance prediction are covered. Students will do a small craft design of their choice. Small weekly design studies will be required.
CO: the former ENGI 7035
CR: the former ENGI 8003

7033 Marine Hydrodynamics examines the fundamental equations of hydrodynamics, boundary layers; potential flow, added mass, damping, circulation, and vorticity; numerical methods for hydrodynamic coefficients; water waves and loading for regular and irregular seas.
LH: at least one 3-hour session per semester
OR: one tutorial hour per week
PR: ENGI 4020

7036 Manoeuvring of Ocean Vehicles examines manoeuvrability of ocean vehicles; derivation of linear and nonlinear equations of motion and hydrodynamic coefficients; stability of motion; standard maneuvers such as turning circle, turning spiral, and PMM test; motion design, design studies will be required.
CR: the former ENGI 6030, the former ENGI 7035
LH: at least two 3-hour sessions per semester
OR: 1 tutorial hour per week
PR: ENGI 6036

7046 Marine Economics and Ship Construction examines the macro-economics of the marine transportation industry and identifies and explains the stages of project definition. The basic techniques of project management needed for large scale industrial marine projects, such as ship construction and transportation of natural resources, are introduced. This course examines methods for estimating labour hours, materials, fabrication facilities required and schedule for ship construction. The legal and social aspects of large projects are also examined.
PR: ENGI 4102

7621 Process Dynamics and Control familiarizes students with the control and engineering principles of process dynamics and control. Students will apply and integrate knowledge of chemical engineering to identify, formulate and solve process dynamics problems and develop control systems. Modern computational techniques and tools will be used for solving chemical process control problems. Also students will become familiar with industrial control systems.
7623 Process Simulation provides students with the knowledge and experience to use a process simulator effectively for the analysis and synthesis of process flowsheets, mass and energy balances, sizing of individual component and process unit, reactor modeling, separation device modeling, heat exchanger modeling, and dynamic and steady state analysis.

7640 Process Engineering Project I gives students the opportunity to apply the knowledge gained in previous design and technical courses to the complete design of a piece of process equipment, e.g., distillation column, evaporator, membrane separation unit, etc. The goal is to expose the students to practical design issues that arise in process equipment design, and to provide experience in the complete design process as applied to real devices. This course is a pre-requisite to ENGI 8640 where students will work in groups to design a process system.

7650 Offshore Oil and Gas Engineering Project I is a multidisciplinary design project that illustrates the application of previous engineering science and design related courses. The project will be done by teams of students with individuals concentrating their participatory in their own engineering discipline. The project topic will be from the offshore oil and gas engineering industry. Lectures will be scheduled as required. This is the Term 7 project and the scope of the project is such that it needs to continue, then the student will have the option to continue the same project term 8 (in ENGI 8650).

7651 Industrial Pollution Control/Pollution Prevention is designed to introduce methods of industrial pollution assessment and control. Topics include waste characterization, water pollution assessment, water pollution control, air pollution assessment and control, solid waste assessment and control, pollution prevention, environmental risk assessment and risk based decision making.

7680 Supervisory Control and Data Acquisition examines data acquisition and intelligent field devices; distributed systems and fieldbus technology; programmable logic controllers and programming standards; operator interface; supervisory control and data acquisition; and enterprise organization.

7691 Mining and Metallurgical Process Engineering is designed to provide students with a basic fundamental background to the mining, mineral processing, and extractive metallurgical processing industry from both traditional and modern industrial methodologies. Concepts such as a mine design, mineral flow sheets, extraction methods, and examples from industrial practice will be reviewed with students.

7704 Design of Steel Structures begins with a review of design concepts, standards and products. Topics include design of members and connections, tension members, bolted joints, welded joints, compression members, stability and effective length, structural members including beams & beam-columns, plate girders, composite beams, introduction to serviceability through deflections of beams.

7706 Finite Element Structural Analysis includes a review of basic concepts required for FEA. basics of stiffness formulation, direct stiffness method, one dimensional elements, trusses and frames. Topics include 1-D fluid and heat transfer elements, automated analysis and modelling concepts, higher order elements, two dimensional elements - plane stress and plane strain, isoparametric elements, material and stress-strain relationships. The course examines basic project management techniques for network planning and scheduling (CPM and PERT); principles of resource productivity databases, preliminary estimating, and detailed bid preparation; quantitative approaches for effective control of time, cost, resource, quality, and value of constructed facilities; use of computer software for scheduling, estimating, and control.

7716 Hydrotechnical Engineering examines the theory and application of steady gradually-varied flow in artificial and natural open channels together with an introduction to appropriate software; erosion protection and mobile-boundary hydraulics; problems with ice in rivers, the design of spillways, energy dissipators, and culverts. There is an introduction to water hammer and surge tanks.

7717 Environmental Geotechniques examines soil characteristics; soil mineralogy; soil water interaction; soil contaminated interactions; advection, adsorption and diffusion; non-aqueous phase liquids; geosynthetics; design of landfills; and use of waste materials. Relevant software programs are used.

7723 Geotechnical Engineering III examines soil characterization and site characterization; pile foundations; embankment dams; elements of geotechnical earthquake engineering; constitutive theories for soil materials; and numerical methods in geotechnical engineering. The students select two of the above topics on which they are interested in concentrating their efforts. Bi-weekly lectures are offered on the other topics at an informal level.

7745 Highway Engineering examines highways transportation systems including driver, vehicle and road characteristics; geometric design of highways; subgrade and base materials; highway drainage features; design of flexible and rigid pavement; fundamentals of traffic flow and queuing theory; traffic control and analysis of signalized intersections; travel demand and traffic forecasting.

7748 Project Planning and Control includes an introduction to types of construction projects, project delivery methods, and project relationships. The course examines basic project management techniques for network planning and scheduling (CPM and PERT); principles of resource productivity databases, preliminary estimating, and detailed bid preparation; quantitative approaches for effective control of time, cost, resource, quality, and value of constructed facilities; use of computer software for scheduling, estimating, and control.

8003 Electrical Engineering Design Project I provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving an electrical engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ENGI 8654.

8004 Computer Engineering Design Project I provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a computer engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ENGI 8654.
theory; elementary discrete-time signals; discrete-time linear and time-invariant systems; linear constant-coefficient difference equations; the convolution sum; the discrete-time Fourier series; the discrete-time Fourier transform; the z-transform; the frequency response of discrete-time systems; the discrete Fourier transform; the efficient fast Fourier transform algorithm; an introduction to digital filter design techniques; and digital signal processing applications.

PR: ENGI 6871

7825 Control Systems II examines state space models for multi-input/output systems; observability, controllability; state feedback without and with integral controller structure, state observers; quadratic optimal regulator and tracking control strategies; discrete-time state equations; and an introduction to optimal control.

CR: the former ENGI 6825
PR: ENGI 5821

7844 Power System Analysis begins with an introduction to electric power systems. Topics include per unit quantities; transmission line parameters; modeling of power system components; single line diagrams; network equations formulation; bus impedance and admittance matrices; load flow analysis and control; design of reactive power compensation for power system performance enhancement; tap changing, auto and control transformers for power system application; economic dispatch and optimal power flow studies.

LH: six 3-hour sessions per semester
PR: ENGI 6843

7854 Image Processing and Applications presents fundamental theoretical and practical concepts of image processing and analysis. These concepts include image enhancement and filtering, frequency domain analysis, morphological image operations, image segmentation, and feature extraction. The course enables the use of these concepts to automatically process and analyze images and videos from various real-world applications such as biomedical imaging, visual surveillance, and robotics.

CR: Computer Science 4756
LH: at least four 3-hour sessions per semester

7855 Communications Electronics - inactive course.

7856 Renewable Energy Systems examines the assessment of wind energy potential, wind turbine aerodynamics, types, modelling and control strategies; hybrid energy systems; energy storage; solar energy systems; photovoltaics; PV system engineering, stand-alone and grid connected systems, sizing and maximum power tracking; solar water pumping; micro-hydro systems and control; tidal power, wave energy converters, ocean thermal systems. Applications of hybrid energy system sizing software are also included in the course.

LH: eight 3-hour sessions per semester
PR: ENGI 6843

7894 Concurrent Programming surveys parallel and distributed architectures and examines patterns of concurrent program design, correctness of concurrent programs; safety and liveness properties, proof of properties; synchronization using locks, semaphores, and monitors; communication using message passing and remote procedures; parallelism in high-performance computation and advanced topics such as scientific applications, distributed systems, model checking, and transaction processing.

CR: the former ENGI 8893
PR: ENGI 6866, ENGI 6892

7801 Heat Transfer II examines advanced topics in heat transfer; multidimensional heat conduction; shape factors, numerical methods, moving heat sources; phase change heat transfer; melting, solidification, condensation, and boiling; natural convection: external flows, internal flows; multimode heat transfer; and environmental radiation.

LH: at least three 3-hour session per semester
PR: ENGI 6901

7903 Mechanical Equipment examines performance characteristics of mechanical equipment; fluid power devices: pipes; valves; turbomachinery; pumps; fans; blowers; compressors; heat transfer devices: heat exchangers; boilers, and cooling towers.

LH: at least five 1.5-hour sessions per semester
PR: ENGI 6901

7911 Industrial Materials includes metals and alloy systems, strengthening mechanisms of metals, iron-carbon alloys, corrosion resistant alloys, light metals, and their alloys, copper and nickel base alloys, super alloys, the function of alloying elements in metals, heat treatments, surface hardening, and surface modification.

CR: the former ENGI 6972
LH: at least 20 hours per semester
PR: ENGI 5911

7926 Mechanical Design Project I is the first of two capstone design courses in the Department of Mechanical Engineering. In this course mechanical students are organized into small groups or teams, which must complete a common design challenge. The project is presented as an open-ended problem statement with specific performance objectives. The system must be designed, prototyped and tested during the course of the term. Each team is a small consulting firm and is required to document its object planning as well as its design.

CR: the former ENGI 7936
LC: minimum of 2 lecture hours per week
PR: ENGI 4102

7929 Mechanical Component Design II same as the former ENGI 6927 is a continuation of the ENGI 6929 course in analysis and synthesis of machinery, including advanced analysis of machine elements such as clutches, brakes, couplings, journal bearings and gears. Advanced machine design concepts are examined, such as reliability, optimization and techniques for stimulating innovative design. A synthesis project involving the machine elements studied is usually included.

CR: the former ENGI 6926 or 6927
OR: at least one 3-hour computer laboratory tutorial per week
PR: ENGI 6929 or the former 5927

7930 Instrumentation and Experimental Design involves analysis and design of mechanical measurement systems and multi factor experiments. Topics covered include static and dynamic characteristics of sensors, Fourier transforms, sampling theorem and signal conditioning, uncertainty analysis of sensors, sensors for motion control, load sensing and process control, one factor or multi factor experiments, factorial design and analysis, parallel and serial design and blocking, response surface methodology (RSM).

LH: five 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 4421

7934 Finite Element Analysis includes a review of basic concepts required for FEA, basics of stiffness formulation, direct stiffness method, displacement method, one dimensional elements, two dimensional elements. Topics include 1D fluid and heat transfer elements, automated analysis and modelling concepts, higher order elements, two dimensional elements - plane stress and plane strain, introduction to 3D elements, introduction to advanced topics and isoparametric formulation.

LH: 2
OR: tutorial 1 hour per week
PR: ENGI 4430, ENGI 5931

7952 Robotics and Automation provides the fundamentals in robotic manipulators and arms. The course provides basic understanding of coordinate transformations for spatial description, both kinematical and kinetic analysis, forces and dynamics and finally trajectory generations and path planning.

CR: the former ENGI 7944
LH: at least three 3-hour sessions per semester
PR: ENGI 4430

7953 Mechatronics II emphasizes the integration of the core technologies on which contemporary, mechatronic designs are based. Topics covered include combinational logic circuit design, sequential logic circuit design, modelling and control of servo motors, selection, sizing, and modelling of servo valves and hydraulic actuators, microcontroller technology and interfacing (relays, timers, PWM control, interrupts, digital communication).

CR: the former ENGI 5891
LH: five 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 5952

11.8 Academic Term 8 Courses

8000 Ocean and Naval Architectural Engineering Project completes the design project selected and approved in ENGI 7000. The project must illustrate the application and integration of previous design related courses, i.e., decision methods, impact assessments and application of technology. The subject may be ship or offshore structure design, marine system, directed research or a unique design solution. Lectures will be scheduled as required.

LH: 3
PR: ENGI 7000

8034 Applied Acoustics provides an introduction to acoustic engineering. Topics include: sound in fluids and solids, wave phenomena, mathematical models of sound waves, sources of sound, frequency analysis, level, decibels, introduction to psychoacoustics, sound waves in rooms, reverberation time, sound absorbers, sound insulation, room acoustical design, introduction to underwater acoustics, acoustic measurement techniques and instrumentation.

LH: at least four 3-hour sessions per semester
PR: ENGI 5034

8046 Marine Engineering II builds on the fundamental marine engineering aspects covered in ENGI 6046 to include engineering factors onboard the ship, such as electrical generation, lighting, heating and air conditioning, as well as special systems needed on board the ship for operation, cargo
management and navigation.
PR: ENGI 6046

8054 Advanced Marine Vehicles examines the concepts used in the design of advanced marine vehicles. Emphasis will be given to: structural design of craft constructed from fibre reinforced plastics; high speed marine vehicles (powering, structures, seakeeping and model testing); small craft.

LH: at least 9 hours per semester
PR: ENGI 6002 or the former ENGI 5003

8055 Design and Control of Unmanned Marine Vehicles examines the formulation of mission statement and design constraints of unmanned maritime systems, surface and underwater. Major topics include propulsion, power, communication, navigation and control, are introduced. Principles of navigation and control as they pertain to unmanned systems are examined. This course includes hands on experimentation including the design of a small unmanned platform for tank experiments.

LH: at least 12 hours per semester
PR: ENGI 3054

8074 Arctic Ocean Engineering (same as the former ENGI 8674) examines marine ice as an environmental load factor in the context of ships and engineered structures designed for ice covered water. Topics include types of naturally occurring ice; sea ice formation and characteristics; mechanical strength of sea ice under common modes of ice failure; modes of ice interaction with ships and marine structures; estimation of ice forces on offshore installations; development requirements for ice breaking ships; regulations and standards for design of ships and offshore structures in arctic environments.

CR: the former ENGI 8674
LH: at least four 3-hour sessions per semester
PR: ENGI 3934, ENGI 4312

8075 Finite Element Analysis of Marine Structures examines application of the finite element method (FEM) to the design and assessment of marine hull structures. Simulation of static, quasi-static, and impact loads on hull structures is discussed. Linear and nonlinear analyses are explored. Practical considerations for finite element model design are discussed.

LH: 12 weekly 3-hour lab sessions
PR: ENGI 4007, ENGI 7002

8150 Engineering Entrepreneurship (same as the former ENGI 8607) is an introduction to the concepts, issues, and themes related to business planning, strategy, and entrepreneurship, with an overview of the functional activities in a typical business venture. Business analysis and planning skills are developed. The course explores the business planning and strategic management of technology-driven enterprises in the early stages of development and focuses on the engineer as an entrepreneur.

CR: the former ENGI 8607
PR: completion of Academic Term 6

8151 Technology, Sustainable Society and International Development (same as the former ENGI 8977) examines multidisciplinary planning on technology, culture, economic, environmental and political factors, and technology to achieve sustainable international development objectives.

CR: the former ENGI 8977
PR: ENGI 3101

8152 Engineering Professionalism II (same as the former ENGI 7102) examines the demands upon the 21st Century engineer. Topics include the roles and responsibilities of the professional engineer in society, the Engineering Code of Ethics, sustainable development, environmental stewardship, the place of technology in society and the nature of technology in society, the role of engineers and their entire engineering professions in the context of current accreditation grade attributes. This is a writing-intensive course with a critically-reflective component.

CO: one of ENGI 8000, ENGI 8640, ENGI 8650, ENGI 8700, ENGI 8853, ENGI 8854, or ENGI 8926
CR: the former ENGI 5101, the former ENGI 7102
PR: ENGI 004W

8640 Process Engineering Project II is a design project that illustrates the application of previous engineering science and design related courses. Project will be done by teams of students with individuals concentrating their participation in their own engineering discipline. The project topic will be from the process industry which includes the offshore oil and gas industry, mining and metal processing industry and chemical process industry.

LH: scheduled as required
PR: ENGI 7640

8650 Offshore Oil and Gas Engineering Project II is a multidisciplinary design project that illustrates the application of previous engineering science and design related courses. The project will be done by teams of students with individuals concentrating their participation in their own engineering discipline. The project topic will be from the offshore oil and gas engineering industry. Lectures will be scheduled as required.

CR: the former ENGI 8600

8670 Reliability Engineering is an introduction to reliability engineering; physics of failure and failure mechanism, reliability measures and assessment; reliability of components and parts; complex system reliability and availability analysis; and field reliability assessment. The course includes case studies and a project.

PR: completion of Academic Term 6

8671 Safety and Risk Engineering begins with an overview of safety and risk issues in the offshore oil and gas industry. The course examines regulatory requirements; hazards and structured analysis tools; risk terminology and quantified risk analysis (QRA) techniques; and safety assessment studies. The course includes project and case studies.

PR: completion of Academic Term 6 or registration in the Minor in Applied Science - Process Engineering

8673 Subsea Pipeline Engineering provides an introduction to subsea pipeline engineering with a focus on the mechanical design of offshore pipelines. Stress-based, design-based and limit-states design for strength and stability are examined. Other fundamental pipeline engineering design issues such as materials specification, flow assurance and inspections are reviewed. Principles of geotechnical engineering and pipeline/socket interaction analysis techniques are investigated. Special topics are also reviewed.

LH: one of ENGI 5312, ENGI 5931 or ENGI 7002 or the former ENGI 6003

8675 Design of Natural Gas Handling Equipment covers process description, design methods, operating procedures, and troubleshooting aspects of gas production facilities including inlet separation operations, hydrate prevention and control, gas dehydration, NGL recovery and dew point control, gas transmission and pipeline design and transportation systems.

PR: completion of Academic Term 6

8677 Process Plant Design and Economics will provide a comprehensive picture of the availability and design of both traditional and current process equipment. Economic and optimization issues relevant to investment, product cost estimation, and project feasibility analysis are also important. Special topics include modelling thermal, gas, liquid and chemical processes; sensors and transmitters, controller design and simulation in Matlab /Simulink, industrial feedback control loops; design of feedback control loops, tuning and cascade, ratio, digital controller design; feedforward control; multivariable process control; fuzzy logic control and tuning, instrumentation electronics design, and process system identification using Matlab /Simulink.

LH: twelve 3-hour sessions per semester
PR: ENGI 5821

8690 Reservoir Engineering examines fluid pressure regimes, oil recovery factors, calculation of hydrocarbon volumes, reservoir rock characteristics, reservoir fluid properties, porosity and permeability, material balance, and well test analysis.

PR: completion of Academic Term 6

8691 Petroleum Production Engineering examines the procedures and equipment necessary for preparing a well to produce hydrocarbons and maximizing flow rate during the life of the well; techniques for well productivity analysis in under-saturated, saturated, and natural gas systems; well completion and workover fluids; perforating oil and gas wells; formation damage; surfactants for well treatment; hydraulic fracturing; acidizing, scale deposition, removal, and prevention; work over and completion rigs; and artificial lift.

PR: completion of Academic Term 6

8692 Drilling Engineering for Petroleum Exploration & Production covers both offshore and onshore drilling operations and includes; rotary drilling rig operations, well construction sequence, drill string, drill bits, well control, mud systems, casing and wellheads, cementing, well control, directional and horizontal drilling, well planning and fishing operations, and extended reach, horizontal and multilateral well drilling techniques.

PR: completion of Academic Term 6

8693 Petroleum Facilities Engineering - inactive course.

8694 Downstream Processing includes: oil and natural gas processing, oil and gas storage facilities and their design, oil and gas separation processes, petroleum refining processes, and oil and gas processing safety.

PR: completion of Academic Term 6

8696 Petroleum Refining Engineering will cover crude and refinery products properties and specifications, process description, design methods,
Faculty of Engineering and Applied Science 2017-2018

operating procedures, and troubleshooting aspects of modern petroleum refining. It also includes hydrorefining, catalytic reforming, hydrotreating, isomerisation, and utilities.

8700 Structural Building Design examines geometries, loads, safety and serviceability, procedure of using the national building code for evaluating the governing loads on structural members; approximate analysis of structures; structural forms for low rise structures; design of low rise and steel buildings; lateral load-resisting elements and bracing systems.

8705 Offshore Structural Design examines guidelines and international codes and standards for offshore structural design; understanding design constraints and concepts of offshore fixed and floating structures; design consideration for fixed offshore concrete platform; design consideration for offshore platform and floating production system design, and design of various support systems of the offshore structure.

8713 Municipal Engineering includes water supply system overview; water consumption estimation; groundwater and surface water sources; oxygen demand and transfer; water treatment processes; water distribution systems and design software; sewer systems and design software; wastewater treatment processes; sludge handling; decentralized and on-site wastewater treatment.

8717 Environmental Assessment, Monitoring and Control covers statistical analysis, pollution monitoring, and sampling network design; water quality and air quality modelling; environmental risk assessment; environmental impact assessment; site remediation and hazardous waste management. There are relevant field trips and case studies.

8740 Contract Law and Labour Relations is an introduction to law as it applies to engineering activity; the nature of law and legal processes, including standard forms; liens, bonds and insurances; the labour movement in North America; examination of union philosophies and managerial attitudes; labour law and collective bargaining; disputes and settlements.

8751 Coastal and Ocean Engineering examines the coastal and ocean environment; ocean circulation and properties; waves and tides; instrumentation and measurement. Additional topics will be drawn from the areas of hydraulic, geotechnical and structural engineering. Relevant field exercises will be conducted.

8814 Computer Vision (same as Computer Science 4301) studies how to develop a machine that enable a machine to "understand" or analyze images. The course introduces the fundamental problems in computer vision and the state-of-the-art approaches that address them. Topics include feature detection and matching, geometric and multi-view vision, structure from X, segmentation, object tracking and visual recognition.

8815-8820 Special Topics in Computer Engineering will have topics to be studied announced by the Faculty.

8821 Design of Digital Signal Processing Systems is a review of introductory digital signal processing (DSP) principles, including sampling theory and discrete-time systems and signals. Topics include transform analysis of DSP systems; issues in the implementation of DSP systems; design of IIR and FIR digital filters; computable transforms and their use in the frequency analysis of digital signals; and design of DSP systems for current and emerging applications of digital signal processing.

8826 Filter Synthesis begins with an introduction to analog filters. The course examines descriptive terminology, transfer functions and frequency response of filters; design of first order passive and active filters; and design and analysis of biquadratic circuits. Sallen key circuit, multiple feedback circuit and state variable filter; RC-RC transformation; inductance simulation circuit; cascade design principle; design of filters with maximally flat magnitude response; design of filters with equal ripple magnitude response; design of Bessel-Thomson filters; analysis and design of switched capacitor filters; and the use of Matlab for design of analog filters.

8845 Power System Operation examines symmetrical components; power system fault analysis; power system stability; and power system protection.

8853 Electrical Engineering Design Project II continues ENGI 7803 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving an electrical engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of an electrical engineering system to solve the problem as defined in 7803.

8854 Computer Engineering Design Project II continues ENGI 7804 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a computer engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of an computer engineering system to solve the problem as defined in 7804.

8863 Introduction to VLSI Design is an introduction to ASICs and ASIC design methodology and includes basic concepts of digital logic design tools and ASIC technology libraries; partitioning for logic synthesis and VHDL code; constrained designs, synthesis, simulation and optimization; design for testability; layout and post-layout optimization and SDF generation; and static timing analysis.

8868 Computer and Communications Security examines the techniques used to provide security in communication networks and computer systems.

8877 Wireless and Mobile Communications (same as the former ENGI 8804) covers the fundamentals and main concepts of wireless and mobile communication systems focusing on the system level design and performance. Main topics to be covered include Introduction to Wireless Communication Systems, Wireless Channel Models, Frequency Reuse Problem, Wireless Multiple Access Techniques (TDMA, FDMA, CDMA), Orthogonal Frequency Division Multiplexing (OFDM), Wireless Systems (GSM, 3G, LTE, etc.).

8879 Digital Communications is a review of baseband transmission and basic digital modulation schemes, detection (optimum receiver, matched filter, correlator), error performance, intersymbol interference (ISI), equalization, the concept of information and entropy, source coding including Huffman coding and arithmetic coding; channel coding including block and convolutional error correcting codes, modulation and coding trade-offs, bandwidth and power efficiency.

8894 Real-time Operating Systems examines real-time process scheduling; memory and device management; I/O communications; real-time systems; operating system and hardware concurrency issues; kernel architectures; device drivers; and a survey of available real-time operating systems and embedded platforms.

8903 Design of Thermal Systems examines thermal system design; modeling of thermal systems; steady and transient system simulation; single and multi-variable optimization; overall system performance; thermodynamic optimization; selected design case studies.

8911 Corrosion and Corrosion Control examines forms of corrosion; the electrochemical nature of the corrosion process; the mixed potential theory, Pourbaix diagrams and Evans diagrams; corrosion testing, control use by use of materials, selection, cathodic protection, inhibitors, and coatings. There are case studies of selected corrosion problems.

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
Special Topics Courses

8926 Mechanical Design Project II is the second of two capstone design courses in the Department of Mechanical Engineering. Building on skills acquired in the first, student teams each choose a unique design challenge and then proceed to generate a solution. The problem statements are often drawn from industry and, where possible, interdisciplinary interaction is encouraged (for example, with business, computer science, or other engineering disciplines). In most cases, the problem proponent will act as the “client” and the team is expected to manage the client interaction process as well. Significant emphasis is placed on both oral and written communication of both the process and results. Wherever possible, each system or a critical component of it, will be prototyped and tested.

CR: the former ENGI 8936
LC: scheduled as required
PR: ENGI 7926

8933 Fatigue and Fracture Mechanics is an introduction to fatigue and fracture analysis of metallic components, failure mechanisms, fracture mechanisms, effects of cracks, notches, collapse; linear elastic fracture mechanical analysis; design of components to avoid fracture; fatigue crack propagation, fracture initiation, crack arrest; and fracture toughness measurements.

PR: ENGI 5931

8935 Pressure Component Design includes pressure vessel design philosophy; membrane theory of shells; stress categories; discontinuous stresses; design of pressure vessel components according to ASME Boiler and pressure vessel and piping codes. There is a design project involving pressure vessel components.

CR: at least 1 tutorial hour per week
PR: ENGI 5931, ENGI 6929

8937 Machine Dynamics reviews mechanism kinematics and inverse dynamics (prediction of unknown forces and torques required to create a known motion) and continues with forward dynamic analysis of mechanisms (predicting unknown motion due to applied forces and torques) using student-generated computer code and commercial software. Practical applications of dynamics are explored, such as engine shaking forces, balancing of machinery, shaft vibration, design of flywheels, and gyroscopic effects.

CR: the former ENGI 7945
PR: ENGI 4932, 6933

8945 Production & Operations Management is an overview of production and operations management, and an examination of decision making and operations strategy; process design and improvement, process flow analysis/simulation, capacity planning; design of value chains, lean systems, plant layout and process planning; operating value chains. MIS systems, inventory and resource management; Relevant computer laboratory exercises are conducted.

CR: the former ENGI 7943
PR: ENGI 6901

8946 Modelling and Simulation of Dynamic Systems emphasizes interdisciplinary model systems, equation formulation and structure, and model complexity. The bond graph modelling language will be introduced to simulate systems containing mechanical, electrical, thermal, hydraulic, and magnetic components.

CR: ENGI 9496
PR: ENGI 5952

8947 Computational Fluid Dynamics begins with a review of the equations governing viscous fluid flows and heat transfer. The course includes heat conduction, convection-diffusion, and fluid flow equations; gridding, dependent variable interpolation, discretized equations, solution of the discretized equations, transients and nonlinearities; testing and validation of CFD codes, standard test problems.

CR: ENGI 9977
PR: ENGI 5962 or the former ENGI 6961

8964 Fluid Structure Interactions examines structural vibrations generated by fluid flow. These vibrations can be transient or they can take the form of instability or resonance. The course deals with the following fluid structure interactions: (1) Flow induced vibration of structures (2) Unsteady flow in pipe networks (3) Water wave interactions with structures.

CR: the former ENGI 8904
LH: at least three 3-hour sessions per semester
PR: ENGI 5962 or the former ENGI 6961, ENGI 6933

8965 Advanced Fluid Dynamics includes fluid kinematics; equations of fluid dynamics: Navier-Stokes equations, Euler’s equations, Stokes’ equations, vorticity transport; advanced topics in: low Reynolds flows, unsteady viscous flows, boundary layer analysis, potential flows; introduction to turbulent flow; free shear flows.

CR: ENGI 9901
PR: ENGI 5962 or the former ENGI 6961

11.9 Special Topics Courses

8076-8099 Special Topics in Ocean and Naval Architectural Engineering will have topics to be studied announced by the Faculty.

8102-8149 Special Topics in Engineering will have topics to be studied announced by the Faculty.

8601-8610 Special topics in Process Engineering will have topics to be studied announced by the Faculty.

8625-8639 Special topics in Process Engineering will have topics to be studied announced by the Faculty.

8765-8799 Special Topics in Civil Engineering will have topics to be studied announced by the Faculty.

8801-8805 (Excluding 8804) Special Topics in Computer Engineering will have topics to be studied announced by the Faculty.

8806-8809 Special Topics in Electrical Engineering will have topics to be studied announced by the Faculty.

8815-8820 Special Topics in Computer Engineering will have topics to be studied announced by the Faculty.

8833-8840 Special Topics in Electrical Engineering will have topics to be studied announced by the Faculty.

8970-8994 (Excluding 8977, 8981, 8991) Special Topics in Mechanical Engineering will have topics to be studied announced by the Faculty.

Fisheries and Marine Institute Advisory Committee

An Industry-based Advisory Committee, established by an Act of Legislature, with members appointed by the Board of Regents of the University, advises the Fisheries and Marine Institute on fisheries and marine related programs and activities.

Chair Advisory Committee
Captain S. Hynes, Executive Chairman, Oceanex Inc.

Committee Members
Allan, M., (Vice-Chair), Manager, Regulatory Affairs and Administration, Husky Energy
Anderson, K., Regional Director, Department of Fisheries and Oceans, Government of Canada
Blackwood, G., Vice-President, Fisheries and Marine Institute
Butler, R., CEO Cooke Seafood USA and Wanchese Fish Company
Dolomount, M., Executive Director, Professional Fish Harvesters Certification Board
Green, Z., President, MISU
Griffin, P., President and CEO, Marine Atlantic
Keating, K., Director of Projects, GJ Cahill & Company Limited
Lawrence, T., Former General Manager, Oceaneering Canada Limited
Lewis, D., Deputy Minister, Dept. of Fisheries, Forestry and Agrifoods
Milley, D., President, Marine Institute Students' Union
Pecore, L., President, Genoa Design International Ltd.
Sullivan, M., CEO, Ocean Choice International L.P.

Secretary to the Committee
Kavanagh, J., Office of the Vice-President (Marine Institute)

Fisheries and Marine Institute Executive Committee

Vice-President (Marine Institute)
Blackwood, G., B.Sc.(Hons.), M.A. Memorial

Associate Vice-President (Marine Institute) Academic and Student Affairs
Shea, R.J., B.A., B.S.W., M.Ed. Memorial, Ed.D. Calgary

Associate Vice-President (Marine Institute) Administration and Finance

Director, Offshore Safety and Survival Centre

Head, School of Fisheries

Head, School of Maritime Studies

Interim Head, School of Ocean Technology

1. **The Memorial University of Newfoundland Code**

The attention of all members of the University community is drawn to the section of the University Calendar titled *The Memorial University of Newfoundland Code*, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2. **Student Code of Conduct**

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in *UNIVERSITY REGULATIONS - Academic Misconduct* in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student/sscm/conduct/

3. **School Description**

The Fisheries and Marine Institute was established in 1964 as the College of Fisheries, Navigation, Marine Engineering and Electronics. It became affiliated with the University in 1992 and since then has continued to grow as a world-class centre of marine technology and education. The official name is the Fisheries and Marine Institute of Memorial University of Newfoundland, but it is commonly known as the Marine Institute.

The main campus of the Marine Institute overlooks the city of St. John's from within Pippy Park, which has extensive hiking trails and recreational facilities. This building houses a flume tank, a seafood processing plant, freshwater aquaculture research and development facilities, and extensive marine simulation facilities. The Dr. C. R. Barrett Library, located at this campus, houses one of Canada's largest marine-related collections. In addition, the Institute manages the Offshore Safety and Survival Centre in Foxtrap, the Safety and Emergency Response Training (SERT) Centre in Stephenville, a regional fisheries and marine training center in Lewisporte, and a marine base on the south side of St. John's harbour and another in Holyrood.

The Marine Institute provides a full range of programs focusing on fisheries and marine science and technology. In addition to undergraduate and graduate degrees, the Institute offers advanced diplomas, diplomas of technology, and technical and vocational certificates. The Institute also runs a variety of short courses and industrial response programs.

All programs and courses are designed to provide students with the knowledge and skills required for success in the workforce. The Institute seeks the advice of industrial program advisory committees in the ongoing development and review of programs. Whenever appropriate, it submits programs for national accreditation, providing graduates with mobility in professional employment.

3.1 **The Marine Institute Students' Union (MISU)**

The Marine Institute Students' Union (MISU) was incorporated in 1991. It is committed to the provision of services to students as well as representing the student body at the national, provincial and institute levels in matters affecting the quality of student life.

The MISU is a prominent member of The Canadian Federation of Students (CFS). The CFS provides a voice for students at over 70 universities, colleges, and technical institutes across Canada including more than 32,000 students in Newfoundland and Labrador. The national body has a strong presence in Ottawa and ensures students' opinions are known on Parliament Hill. Services provided by CFS include the National Student Health Network, student saver cards, Student Work Abroad Program (SWAP), International Student Identity Cards (ISIC), and Travel Cuts. The CFS Newfoundland and Labrador (CFS-NL) ensures student's opinions are known in the Provincial House of Assembly. The MISU takes part in the CFS bi-annual conferences to discuss and form policies on behalf of students.

Within the Institute, the MISU has representation on a number of committees, including the Marine Institute Industry Advisory committee and the Academic Council, where the Union members ensure that student well-being is at the forefront in all policies affecting student life. The MISU administers the student health plan. Many social and recreational activities are planned and sponsored by the MISU including Winter Carnival held during the last week of January. Profits from the social activities are returned to the students in the form of scholarships. The MISU manages and maintains the student lounge - The Mariner's Lounge.

4. **Description of Degree Programs**

Students must meet all regulations of the Fisheries and Marine Institute in addition to those stated in the University's general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to *UNIVERSITY REGULATIONS*.

For information about non-degree programs and upgrading opportunities refer to www.mi.mun.ca.
4.1 General Degrees
The Marine Institute offers two undergraduate degrees. For specific details on each degree refer to the appropriate Degree Program Regulations. The courses in the program are available fully by distance and select courses are available on campus.

4.1.1 Bachelor of Maritime Studies
The Bachelor of Maritime Studies program prepares graduates for career advancement in the maritime and related industries. It is designed for students who have graduated from accredited, or Transport Canada approved, diploma of technology programs in the marine fields. The program is also available to professional mariners, professional fish harvesters and certain Canadian Forces (Naval Operations) personnel. Courses in the program provide the student with an introduction to human resource and business management concepts, and the social contexts in which their careers will be based. The program consists of 39 credit hours in addition to work completed in a diploma program and can be taken on a full-time or part-time basis.

4.1.2 Bachelor of Technology
The Bachelor of Technology program prepares graduates for career advancement in health science technology or engineering/applied science technology industries. It is designed for students who have graduated from an accredited diploma of technology program that is applicable to one of two optional areas. Courses in the program provide the student with an introduction to human resource and business management concepts, and the social contexts in which their careers will be based. The program consists of 39 credit hours in addition to work completed in a diploma program and can be taken on a full-time or part-time basis.

The optional areas are:
- Engineering and Applied Science Technology Option, which is normally chosen by students who have an engineering/applied science technology diploma.
- Health Sciences Technology Option, which is normally chosen by students who have a health sciences technology diploma.

5 Admission/Readmission Regulations for Degree Programs
In addition to meeting the admission/readmission requirements for the University students must also meet the admission/readmission requirements for the Marine Institute. See UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate) for University requirements.

5.1 General Information
1. The application for admission or readmission is submitted online; current and returning Fisheries and Marine Institute of Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Fisheries and Marine Institute of Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
</tr>
<tr>
<td>Winter</td>
</tr>
<tr>
<td>Spring</td>
</tr>
</tbody>
</table>

2. Students may not obtain both a Bachelor of Maritime Studies and a Bachelor of Technology degree based upon completion of the same diploma of technology.

5.2 Admission Requirements for Applicants to the Bachelor of Maritime Studies Program
1. The application for admission or readmission is submitted online; current and returning Fisheries and Marine Institute of Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Fisheries and Marine Institute of Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply. This application must include all required documentation including proof of the diploma or certificate required for admission in a specific category.

2. Categories for admission to the Bachelor of Maritime Studies
   Applicants must meet the general admission/readmission requirements of the University and be eligible for admission to the Bachelor of Maritime Studies program in one of the following categories:
   - Category A: applicants holding a diploma from the Marine Institute in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology,
   - Category B: applicants holding a Canadian Technology Accreditation Board accredited, or Transport Canada approved, diploma in marine engineering technology or nautical science,
   - Category C: applicants holding a Canadian or non-Canadian diploma similar to an accredited or Transport Canada approved Marine Institute diploma in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology,
   - Category D: applicants holding a Transport Canada Certificate of Competency at the Master Mariner, Fishing Master First Class or Engineering First Class level or equivalent,
   - Category E: applicants who have Canadian Forces (Naval Operations) training acceptable to the Admissions Committee.

3. Applications to the program will be considered by the appropriate admissions committee(s).

4. In accordance with the UNIVERSITY REGULATIONS - Residence Requirements - Second Degree, students completing the Bachelor of Maritime Studies Program, as a second degree, must complete all required courses within the Bachelor of Maritime Studies Program.
5.3 Admission Requirements for Applicants to the Bachelor of Technology Program

1. The application for admission or readmission is submitted online; current and returning Fisheries and Marine Institute of Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Fisheries and Marine Institute of Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply. This application must include all required documentation including proof of the diploma or certificate required for admission in a specific category.

2. Categories for admission to the Bachelor of Technology Program

   Applicants must meet the regular admission requirements of the University and be eligible for admission in one of the following categories:

   • Category A: applicants holding a diploma from the Marine Institute in marine engineering technology, naval architecture technology or marine engineering systems design technology, marine environmental technology,

   • Category B: applicants holding a diploma of technology accredited by the Canadian Medical Association (CMA),

   • Category C: applicants holding a diploma of technology in engineering/applied science technology accredited by the Canadian Technology Accreditation Board (CTAB), or Technology Accreditation Canada (TAC),

   • Category D: applicants holding a diploma of technology comparable to a Marine Institute or College of the North Atlantic three-year CTAB accredited diploma in engineering/applied science technology,

   • Category E: applicants holding a diploma of technology comparable to a College of the North Atlantic three-year CMA accredited diploma,

   • Category F: applicants holding a Certified Engineering Technologist (CET) designation or a Professional Technologist (PTech) designation along with a diploma of technology acceptable to the Admissions Committee,

   • Category G: applicants who have Canadian Forces training acceptable to the Admissions Committee.

3. Upon acceptance into the program, students will be admitted to one of the two options: the Engineering and Applied Science Technology Option or the Health Sciences Technology Option. Students may be permitted to change their option with the approval of the Marine Institute Committee on Undergraduate Studies.

4. Applications to the program will be considered by the appropriate admissions committee(s).

5. In accordance with the UNIVERSITY REGULATIONS - Residence Requirements - Second Degree, students completing the Bachelor of Technology program, as a second degree, must complete all required courses in their stream of study within the Bachelor of Technology program.

6 Degree Program Regulations

6.1 Bachelor of Maritime Studies

   • Students must complete 39 credit hours in addition to the work which was required under their category of admission.

   • The required and elective courses are listed in Table 2 Bachelor of Maritime Studies - Course Requirements For All Students. These courses may have prerequisites which have to be met.

   • When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission students must take an additional elective University course(s).

   • To meet the academic requirements for a Bachelor of Maritime Studies a candidate shall successfully complete the following program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree unless stated otherwise within the course description.

   • Students must take 39 credit hours with 21 credit hours from the required courses and 18 credit hours from the electives.

   • At least three electives must be chosen from Group A and at least one elective must be chosen from Group B.

6.2 Bachelor of Technology

- Students must complete 39 credit hours in addition to the work which was required under their category of admission.
- The required and elective courses are listed in Table 3 Bachelor of Technology - Engineering and Applied Science Technology Option and Table 4 Bachelor of Technology - Health Science Technology Option. These courses may have prerequisites which have to be met.
- When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission, students must take an additional elective University course(s).
- To meet the academic requirements for a Bachelor of Technology a candidate shall successfully complete the program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree unless stated otherwise within the course description.

6.2.1 Bachelor of Technology - Engineering and Applied Science Technology Option

- Students must take 39 credit hours with 24 credit hours from the required courses and 15 credit hours from the electives.

7 Waiver of Degree Program Regulations

Students requesting waiver of University academic regulations should refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations. Every student also has the right to request waiver of degree program regulations.

7.1 General Information

- The Marine Institute reserves the right in special circumstances to modify, alter, or waive any Marine Institute regulation in its application to individual students where merit and equity so warrant, in the judgement of the Committee on Undergraduate Studies of the Marine Institute.
- Students requesting a waiver of a Marine Institute regulation must submit their request in writing to the head of the program who will forward a recommendation to the Chair of the Committee on Undergraduate Studies of the Marine Institute. Medical and/or other documentation to substantiate the request must be provided.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

8 Graduation

Upon meeting the qualifications for any of the degree programs of the Fisheries and Marine Institute a student must apply by the appropriate deadline date to graduate on the prescribed “Application for Graduation” form. This form may be obtained on-line at the Memorial Self Service at www.mun.ca/regoff/stuweb.htm. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.
9 Appeal of Decisions

Any student whose request for waiver of Marine Institute regulations has been denied has the right to appeal. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions.

10 Course Descriptions

All courses of the Marine Institute degree programs are designated as MSTM (Maritime Studies/Technology Management).

4001 The Organization and Issues of Shipping - inactive course.

4002 The Business of Shipping will provide students with an understanding of financial statements, costs, revenues and financial performance of shipping companies as well as computing, voyage and annual cashflows. The course will develop an understanding of marine insurance and forecasting, and risk management. PR: MSTM 4001

4004 Marine Environmental Management will introduce students to the requirements for the safe management of the marine environment. The course will introduce major environmental problems and identify the major threats to the marine environment. It will provide a working knowledge of these threats and consider the possible counter measures that may be employed by employees in the marine industry.

4005 Trends and Issues in International Shipping will provide students with an understanding of how regulatory bodies and their legislation have evolved to affect the modern seafarer trading internationally. This course will develop an understanding of the various rules and regulations dealing with Classification, ISM, MAPROL, SOLAS and SIRE inspections which have to be dealt with on a daily basis at sea.

4006 Maritime Human Resource Management provides basic principles of HRM in terms of seagoing and shore-based personnel. Students will analyze the work environment, labour market, human resource practices, organizational and international conventions. It stresses the importance of coherent maritime HRM systems required to gain a sustainable competitive advantage.

4007 Shipping Finance focuses on commercial ship management and the critical evaluation of alternative financial decisions. Analyzes the principles of financial ship management and the impact of global economic variables on the financial operations and performance of shipping companies. The course provides an appreciation of critical questions, problems, issues and alternative approaches incorporated in shipping finance. This will support and the development of meaningful financial analysis and managerial decision-making for investments and fund raising in shipping business.

4008 Introduction to Offshore Oil and Gas will provide students with an understanding of the basic concepts of the oil and gas industry from a marine perspective. This course will cover the entire supply chain and industry structure from upstream to downstream. Topics discussed will give an overview of oil and gas; how it is explored and evaluated, extracted, refined, transported and traded.

4010 Assessment and Implementation of Technology (formerly Technology 4010) examines the effects of technology on the physical, socio-economic, historic, cultural and aesthetic environments. The course also addresses relevant legislation, the generation and evaluation of project/product alternatives, and the prediction, verification and mitigation of technological effects. CR: the former Technology 4010

4011 Introduction to Intellectual Property and Its Management is an introductory course to the management of Intellectual Property Rights (IPRs). This course will cover the philosophical rationale for intellectual property rights, its technical and legal considerations, its implications to the development of science and technology and its economic impact in society.

4012 Occupational Health and Safety Legislation and Management is an introduction to occupational health and safety issues in a technical/industrial context. Students will gain a knowledge and understanding of the legislative framework, structural confusions and operational health and safety, the assignment of responsibilities in the workplace, the management of occupational health and safety in the workplace and the importance of establishing a positive safety culture.

4013 Structure and Functions of Technology-based Organizations focuses on the emergence of technology-based companies and how to implement methods to increase their organizational effectiveness. This course will concentrate on the integration of three basic frameworks which include the study of technological economics and organizational progressions, structural configurations and operations, and presentations for organizational design. In addition it will examine the challenges of change that face highly dynamic industries: individual and organizational change, technological change, and national and global change.

4014 Technology and the Environment will help students critically examine technology and the environment and how the two are linked. Topics may include how technology is both the cause of and solution to many environmental problems, the greenhouse effect, renewable energy vs. fossil fuels, recycling vs. landfills, the efficiency paradox, geo-engineering, and other select current topics.

4015 Technological Entrepreneurship surveys technological entrepreneurship via examples of both successful and failed businesses in technological fields. By examining cases of entrepreneurship, this course will examine challenges and opportunities facing technological entrepreneurs.

4016 Technological Problem Solving will introduce students to TRIZ, a powerful set of tools and algorithms developed specifically for analyzing and solving technological problems. TRIZ was developed by people with a technical background for those with a technical background. While TRIZ was developed for inventing and solving technical problems, the tools and approaches can be used to understand and solve virtually any solvable problem.

4017 Technical Operations Management introduces students to the area of operations management as it pertains to technology companies. Operations is generally considered the process by which an organization converts inputs such as labour and material into outputs such as goods or services. This course will examine how to manage the processes with a particular emphasis on operations in technology-based companies. Topics may include operations based strategy, processes and technology, capacity and facilities planning, and supply chain management.

4019 Research Methods will examine the fundamental steps in the process of doing research. It will provide students with the necessary information and tools to conduct technical research and communicate their findings. This course will examine how to define a research project, how to prepare a research proposal, how to select a research methodology, how to collect and analyze data and information, and how to prepare a research project report.

4025 Applied Statistics will enable the student to use descriptive statistics to report data findings, to make statistical inferences using appropriate data analysis, and to use, and interpret the output from, statistical software.

4020 Economic Management for Technologists (formerly Technology 4020) provides an introduction to the economics of technological projects. Students will study the mathematics of money, cost composition, and project evaluation, including cost comparison. They will also learn to analyze projects for decision making, including risk assessment and replacement analysis. In addition, they will learn to use suitable criteria for project selection, and to conduct sensitivity analysis.

CR: Engineering 4102; the former Technology 4020

4102 Technology in the Human Context (formerly Technology 4030) examines technology in the historical context and technology in the modern era. Students will discuss human insights, innovation, the interactions between development and technology transfer, ethics and professionalism and how to develop a technology value system. CR: the former Technology 4030

4040 Project Management for Technologists (formerly Technology 4040) will introduce the student to the interdisciplinary field of project management. The course covers the interpersonal skills necessary to successfully lead or work effectively within a project team as well as providing an overview of certain planning and scheduling tools and techniques necessary for the planning and monitoring of projects.

CR: the former Technology 4040

4050 Introduction to Quality Management (formerly Technology 4050) will provide students with an understanding of the philosophy and concepts involved in the total quality approach to quality management. The course covers the various tools and techniques used in quality management as well as providing an overview of the role of management.

CR: the former Technology 4050

4060 Advanced Technical Communications will enhance the technical communication skills of students. The course content examines technical writing fundamentals; information gathering, analysis, and documentation; proposal preparation; technical document applications; technical report preparation; graphics preparation; and technical presentations. The course will provide students with the knowledge and skills necessary to develop proposals, reports, and presentations for technical projects.

4070 Special Topics in Technology will provide the opportunity for students to maintain technical currency through a review of recent advances in technology and their application to particular technical areas.

4090 Introduction to Technology will provide a broad survey of practices
critical to operating a technology-based business. Topics covered may include an introduction to technology management, historical developments in the management of technology; the functions of technology management, and select current topics that are relevant to operating technology-based businesses.

410A and 410B Technical Project Report (same as the former MSTM 4100 and 4200) is a two-semester linked course based on independent study of a problem involving the management of technology. The subject of study will be decided in consultation with the course instructor and must be approved by a committee. The student will identify a research topic in a specialty area, write a concept paper, develop a proposal and write a report. The passing grade for this course is 65%.

CR: MSTM 4400, the former MSTM 4000, the former MSTM 4100, the former MSTM 4200, the former Technology 4000
OR: must be completed within three consecutive semesters
PR: MSTM 4060
UL: not available to students following the 2017/18 Calendar or later as this course will be discontinued after Spring 2018

4101 Maritime Occupational Safety and Health (Legislation and Regulations) will provide students with the knowledge and understanding to manage the legislative framework within the workplace and show the importance of establishing a positive safety culture with specific focus on the maritime industry.

4102 Maritime Risk Management/Accident Incident Investigation will provide students with the knowledge of methodologies and practices needed to manage operational risk in today’s maritime industry. Risk management will be analyzed in the context of prevention and mitigation of loss resulting from health and safety, equipment, and environmental accidents and incidents. The course will further explore methodologies and practices used to investigate accident and incident occurrences in the maritime industry.

4103 Advanced Communications for the Maritime Sector will equip students to write a variety of formal and informal maritime-related technical documents; develop students’ capabilities in gathering and critically analysing information from technical sources and constructing a clear message; and prepare students to develop and deliver oral technical presentations.

4104 Integrated Management Systems in Maritime Industries offers a firsthand knowledge of a systematic, comprehensive process for managing safety risks. A safety management system program provides for goal setting, planning, and measuring performance. It becomes part of the company’s safety culture, as well as the way people do their jobs.

4105 Policy and Governance in the Maritime Industry provides the student with an understanding of the maritime industry as a global enterprise in the context of policy and governance. It will focus on the full range of the regulatory framework from the standpoint of the International Maritime Organization to the statutory regulations applicable to the Canadian maritime industry.

4106 Operations Management provides comprehensive knowledge of global ship management practices supporting the function of ship operations management, both ashore and at sea. This course aims to develop the students understanding of management issues in marine transportation as they relate to basic principles of management; management in multi-ethnic environments; managing under adverse conditions; the SOLAS Convention and the ISM and ISPS Codes; the International Labour Organization and the MLC Convention; the International Transport Federation; and, Port State Control.

4400 Technological Assessment Project will provide students with the opportunity to conduct an assessment and implementation plan of a technical project in their area of interest. Students will utilize the knowledge that they have obtained in the required courses and incorporate this knowledge into a final project paper.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University’s commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offenses, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

3 Grenfell Campus Description

www.grenfell.mun.ca/about

Grenfell Campus, Memorial University of Newfoundland, was established in September 1975, and originally was called the Western Regional College. In 1979 it was named Sir Wilfred Grenfell College, honouring the memory of the medical missionary who pioneered medicine in northern Newfoundland and along the coast of Labrador. In 2010, it was renamed Grenfell Campus, Memorial University of Newfoundland.

Four-year undergraduate degree programs in Arts, Business Administration, Fine Arts, Nursing, Resource Management, and Science may be completed at Grenfell Campus, as well as fast-track options in Education and Nursing. The Bachelor of Arts degree is available in English, Environmental Studies, Historical Studies, Humanities, Psychology, Social/Cultural Studies, and Tourism Studies and the Bachelor of Arts (Honours) may be obtained in Psychology. The Bachelor of Business Administration is offered as general and honours degrees. The Bachelor of Science is offered in Computational Mathematics, Environmental Science, General Science, Physics, and Psychology and the Bachelor of Science (Honours) is offered in Environmental Science, and Psychology, and the University's four-year Bachelor of Nursing degree is offered in conjunction with the Western Regional School of Nursing in Corner Brook. Bachelor of Fine Arts degrees are conferred in Theatre and Visual Arts. These programs differ from those offered on the St. John's Campus and many are available only at the Grenfell Campus. Grenfell Campus also offers graduate programs in environmental policy and in boreal ecosystem and agriculture science. For information regarding graduate programs see the School of Graduate Studies at www.mun.ca/sgs.

Students at Grenfell Campus may also complete the first-year requirements of several programs offered at St. John's Campus including the requirements of the Engineering One Program. It is recommended that students meet with an academic advisor concerning course selection for specific programs.

Students have the option of completing distance and web-based credit courses offered by Memorial University of Newfoundland's Centre for Innovation in Teaching and Learning (CITL). As well, Grenfell's Office of Engagement offers a wide variety of non-credit courses to students, the Campus community, and the general public.

Grenfell's physical location affords the Campus a spectacular view of the city of Corner Brook and the scenic Bay of Islands. All Campus buildings are connected by a series of skywalks and tunnels. The Arts and Science Building houses administrative and academic units, a bookstore, an athletics and recreation wing, a student residence, the Grenfell Campus Student Union Student Centre and the Grenfell Campus Observatory and astronomical telescope. The Library and Computing Building includes Ferriss Hodgett Library, a computer lab and the largest lecture theatre on Campus. The Fine Arts Building contains facilities for visual arts and theatre students. It features a 160 seat theatre, dressing rooms, scenery, costume and properties workshops, as well as an actors’ green room and a rehearsal hall. The Fine Arts Building also includes an art gallery, art storage vault, studios for drawing, painting, sculpture, multi-media and photography, darkrooms, and workshops for lithography, intaglio and serigraphy. The Forest Centre houses classroom, laboratory and research facilities for the Campus as well as the Atlantic Division of the Canadian Forestry Service, Natural Resources Canada. Adjacent to the Forest Centre is a boreal ecosystem research facility, which supports research in agricultural, environmental and boreal sectors.

Additional information regarding the Grenfell Campus is available at www.grenfell.mun.ca/about.

3.1 Statement of Academic Purpose

Grenfell Campus, as part of Memorial University of Newfoundland, is a four year undergraduate degree granting institution offering a liberal education in arts and science and a professional education in business, nursing, theatre and visual arts. In addition, the Campus continues to accommodate students who wish to complete their degrees at Memorial University of Newfoundland in St. John's or at universities elsewhere.

At Grenfell Campus a liberal education means a critical and open-minded pursuit of knowledge providing students with the intellectual tools to enable them to respond to a rapidly changing world. A liberal education marks the start of preparation for a career and it may lead to graduate work in a number of fields. In a broader sense it is intended to build a foundation for social, cultural and recreational interests that will help students move toward a meaningful personal and professional life. Academically, the aim of Grenfell Campus is to enable students to be open to new ways of thinking and to gain a lasting intellectual self-confidence so that they may have both the ability and the desire to be life-long learners.

At Grenfell Campus the goal of high quality education is reflected in the following commitments:

1. to teach students in a variety of challenging contexts and in general provide them with a personalized learning environment;
2. to maintain high academic standards;
3. to foster excellence in teaching, to encourage scholarship, research, performance and artistic endeavour, and to engage students,
4 General Information

In addition to the information given below, further information regarding Grenfell Campus is available at www.grenfell.mun.ca.

4.1 Advice to Students on Planning a Program

www.grenfell.mun.ca/registrar
www.grenfell.mun.ca/undergraduate-studies

When planning the sequence of courses for a Major or Minor Program, or to ensure that a proposed degree program is possible within the constraints of course scheduling and prerequisites, students should seek advice from the Office of the Registrar or the appropriate Dean of the School.

4.2 Grenfell Campus Student Union

www.gcsuonline.ca

The Grenfell Campus Student Union (GCSU), Local 36, CFS, represents students' interests to the Campus administration and on a provincial and national level through the Canadian Federation of Students. The GCSU also promotes artistic, literary, educational, social, recreational, charitable, and sporting activities for the enhancement of the students of the Campus. All full and part-time students pay GCSU fees and upon registration become members of the Grenfell Campus Student Union.

4.3 Library

www.library.mun.ca/grenfell

Small branch, big collection! The Ferriss Hodgett Library is one of five libraries that make up the Memorial University of Newfoundland Libraries system. It provides local personalized service and a core collection of over 120,000 books, 200 print journal subscriptions, and other materials, combined with access to a much larger collection of print and online resources. Over 1,000,000 books and articles can be requested from the St. John's campus, and if it's not available through Memorial University of Newfoundland, can be obtained from other libraries worldwide.

Everyone is always welcome in the Library, but for those who like to research after hours or from the comfort of dorms or homes, remote access to the Library catalogue, over 20,000 e-books, 200 article databases, and 26,000 e-journals is available 24/7, making library research easier than ever. The Library also provides equipment loans to support emerging research needs such as eBook readers, digital voice recorders, portable DVD players, and more.

The Library has an Information Commons, with computers providing access to the Library's online resources (like e-journals and e-books), Internet, email, MS Office, and other software. Students can bring their laptops into the Library and access all online services using the campus wireless network. There are a variety of study spaces, from group study rooms to individual study carrels and laptop chairs.

A full range of public services are offered including research assistance, tours, library instruction classes, and support for copyright enquiries.

4.4 Student Services

www.grenfell.mun.ca/current-students

Student Services is located in the Student Services Centre, AS234 at Grenfell Campus. Further information may be obtained by telephone to (709) 637-6232, or by e-mail at saffairs@Grenfell.mun.ca, or through the website at www.grenfell.mun.ca/current-students.

4.4.1 Aboriginal Student Services

www.grenfell.mun.ca/aboriginal-students

Student Services provides a variety of services to Aboriginal students attending Grenfell Campus. The Student Affairs Officer-Aboriginal Affairs assists and/or refers students on matters related to admission requirements, adaptation to an academic/urban environment, and connections with Aboriginal communities on- and off-campus. Activities are organized on-campus to raise awareness about Aboriginal cultures and to develop opportunities for engaging Aboriginal students in life at Grenfell Campus. As well, the Aboriginal Student Centre is a designated culturally safe space for smudging and Kwik/Ilk lighting. Further information may be obtained through the website at www.grenfell.mun.ca/aboriginal-students, by e-mail to studentservices@grenfell.mun.ca, or by telephone to (709) 637-6232.

4.4.2 Athletics

www.grenfell.mun.ca/athletics

Grenfell Campus competitive sports offerings include men's and women's basketball, women's volleyball, cross country skiing, and swimming. Further information may be obtained through the website at www.grenfell.mun.ca/athletics or by telephone to (709) 637-7315.

4.4.3 Counselling Services

www.grenfell.mun.ca/cps

The Campus has a full-time registered psychologist and two part-time professional counsellors in Counselling Services, which is physically located within Health Services at Grenfell Campus. One of the counsellors works exclusively with Western Regional School of Nursing students and is located in Monaghan Hall. Counselling Services provides a free and confidential service to students including personal, academic and career counselling. The services may be provided through individual appointments, group programming and/or on-line support. When necessary, counselling services can arrange referrals to other professionals in the community. In addition, psychoeducational assessments are available on a fee-for-service basis for currently registered students seeking academic accommodations. Further Information may be obtained through the web site at www.grenfell.mun.ca/cps or by telephone to (709) 637-7919.
4.4.4 Health Services
www.grenfell.mun.ca/health
Health Services provides students with access to a variety of allied health services including physiotherapy and massage. In addition, through a partnership with the Western Regional School of Nursing, Grenfell Campus offers a variety of sessions designed to promote healthy living. Further information may be obtained in-person in the Bennett Wing of the Arts and Science building (AS 243), through the website at www.grenfell.mun.ca/recreation, or by telephone to (709) 637-7919.

4.4.5 International Student Services
www.grenfell.mun.ca/international
International Student Services provides settlement and integration services to foreign students. New students must meet with the student programming coordinator (international) upon arrival for advice concerning their stay at the University and their compulsory health insurance program. Further information may be obtained through the website at www.grenfell.mun.ca/international or by telephone to (709) 630-2525.

4.4.6 The Learning Centre
www.grenfell.mun.ca/learning-centre
The Learning Centre, the Grenfell Campus is the academic support centre at Grenfell Campus. Staff assist students with writing, math, and study skills. Peer tutoring and supplemental instruction are available to students free of charge. Students who require accommodations because of a disability should contact the Accessibility Centre & Education Support (ACES) though the web at www.grenfell.mun.ca/disability-services or by telephone to (709) 637-6232.

4.4.7 Student Housing
www.grenfell.mun.ca/housing
Student Housing currently offers accommodation for 600 students in suite-style residences and chalet apartments. The suite-style residences are mainly for first-year students while the chalet-style apartments are mainly for students beyond first-year and families. In each apartment, four students share a living room, kitchen and one-and-a-half baths and each has their own room. Individual phones and Internet ports are provided.

Student Housing facilitates a variety of programs and activities to meet the diverse interests of residents and encourages students to get involved.

Further information may be obtained by telephone to (709) 637-6266, or by e-mail at resinfo@Grenfell.mun.ca or through the website at www.grenfell.mun.ca/housing.

4.4.8 Wellness
www.grenfell.mun.ca/recreation
Grenfell Campus offers recreation and wellness activities that contribute to the well-being and personal and social development of students. The Campus has a double gymnasium. Students at Grenfell have the opportunity to participate in a variety of different recreation programs, such as: intramural sports, step aerobics, yoga, downhill skiing, and curling. Students also have access to a fitness centre (which includes cardio equipment, weights and squash courts), skating, hockey and a walking track. Students may purchase a recreation pass in order to participate in these activities. Further information may be obtained by telephone to (709) 637-6232.

5 Description of Programs

Students must meet all regulations of Grenfell Campus in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to UNIVERSITY REGULATIONS.

5.1 General Degrees

Grenfell Campus has three Schools; the School of Arts and Social Science, the School of Fine Arts, and the School of Science and the Environment. Grenfell Campus offers seven general degrees in sixteen program areas. For specific details on each degree refer to the appropriate Admission/Readmission Regulations for Grenfell Campus and Program Regulations - General and Honours Degrees. The School of Arts and Social Science also offers English as a Second Language non-degree programs.

5.1.1 Arts Degree

Bachelor of Arts degree programs are offered under the School of Arts and Social Science and the School of Science and the Environment.

The School of Arts and Social Science offers the Bachelor of Arts Degree with majors in English Language and Literature, Historical Studies, Humanities, Psychology, Social/Cultural Studies, and Tourism Studies. The School of Science and the Environment offers the Bachelor of Arts with Major in Environmental Studies.

The Bachelor of Arts degree program is comprised of 120 credit hours, 40 courses, and may be completed on a full or part-time basis. Students will examine culture, thought, prehistory and history, human interactions, and the social and natural forces that constantly transform our society. Students gain critical-thinking, analytical and communication skills needed to succeed and adapt in a changing world through the study of a major and minor. Students must complete a minimum of 120 credit hours made up of Core Program Requirements, an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses. A Minor is not required for Interdisciplinary programs. However, students in such programs may choose to complete a minor. A student may not use the same course to satisfy the requirements for both a Major and a Minor.

Majors are available in English Language and Literature, Environmental Studies, Historical Studies, Humanities, Psychology, Social/ Cultural Studies, and Tourism Studies. The requirements for a Major can be fulfilled in one of two ways:
1. a minimum of 36 credit hours in a single discipline. Students choosing a single discipline major, with the exception of Bachelor of Science in Psychology, must complete one of the following: a minor or with the permission of the appropriate program chair(s), a second major. Actual credit hours required for specific disciplines will vary, or
2. a minimum of 72 credit hours in an interdisciplinary area.
All Majors require a minimum of 12 credit hours in 3000-level courses, 6 credit hours in 4000-level courses and 3 credit hours in a 4000-level senior project. A candidate must follow the specific requirements for each major program as set forth in the Grenfell Campus section of the University Calendar. Single discipline majors are available in the following areas: English, Historical Studies, Humanities, Psychology (B.A. and B.Sc.), and Tourism Studies. Interdisciplinary majors are available in the following areas: Environmental Studies, and Social/Cultural Studies.

A Minor requires a minimum of 24 credit hours which must be completed in a single discipline or interdisciplinary area other than that of the Major. Minors are available in the following areas: Art History, Business, Canadian Studies, Classics, Economics, English, Environmental Science, Environmental Studies, Folklore, French, Geography, Historical Studies, Humanities, Mathematics, Philosophy, Physics, Psychology, Religious Studies, Science, Social/Cultural Studies, Sociology, and Tourism Studies. A candidate must follow the requirements for the Minor program as set forth in the Grenfell Campus section of the University Calendar. As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.

Elective courses to make up the total of 120 credit hours, other than those required for the core program and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts, and up to 15 credit hours in other subject areas.

An Articulation Agreement with the College of the North Atlantic is in place for students who have completed the two-year Adventure Tourism diploma program and who wish to complete the Bachelor of Arts with Major in Environmental Studies at Grenfell Campus. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Arts and Social Science and Program Regulations - General and Honours Degree, School of Arts and Social Science.

An Articulation Agreement with the College of the North Atlantic is in place for students who have completed the two-year Adventure Tourism and the two-year Hospitality Management diploma program and who wish to complete the Bachelor of Arts with Major in Tourism Studies at Grenfell Campus. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Arts and Social Science and Program Regulations - General and Honours Degree, School of Arts and Social Science.

5.1.2 Business Degree
The Bachelor of Business Administration (B.B.A.) is offered under the School of Arts and Social Science.

The Bachelor of Business Administration is comprised of 120 credit hours, 40 courses, and may be completed on a full or part-time basis. The program is designed to deliver a comprehensive foundation in the fundamental areas of business and decision making. Articulation Agreements with the College of the North Atlantic are in place for students who have completed the two-year Business Administration (Accounting), the two-year Business Administration (Human Resource Management), the two-year Business Administration (Marketing), the three-year Business Management (Accounting), the three-year Business Management (Human Resource Management), or the three-year Business Management (Marketing) diploma programs and who wish to complete the Bachelor of Business Administration degree program at Grenfell Campus. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Arts and Social Science and Program Regulations - General and Honours Degree, School of Arts and Social Science.

5.1.3 Education Degree
The Bachelor of Education (Primary/Elementary) as a Second Degree is offered under the School of Arts and Social Science.

The Bachelor of Education (Primary/Elementary) as a Second Degree is a 72 credit hour program intended for students who have completed an appropriate Bachelor's degree. This program is offered in a four semester (16 month), full-time format and commences in the Spring semester of each year. The student will learn about child development, diverse learners and much more. For specific admission and program requirements see Admission/Readmission Regulations for the Faculty of Education, (Bachelor of Education (Primary/Elementary) as a Second Degree and Program Regulations, Bachelor of Education (Primary/Elementary) as a Second Degree.

5.1.4 Fine Arts Degree
The Bachelor of Fine Arts is offered under the School of Fine Arts.

The Bachelor of Fine Arts is available in Theatre or Visual Arts. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Fine Arts and Program Regulations - General and Honours Degree, School of Fine Arts.

5.1.4.1 Theatre
The Bachelor of Fine Arts (Theatre) is comprised of 120 credit hours, 36 courses and is normally completed on a full-time basis. This program is designed to educate and train the student in the history, theory and practice of the theatre arts.

5.1.4.2 Visual Arts
The Bachelor of Fine Arts (Visual Arts) is comprised of 120 credit hours, 40 courses and a non-credit health and safety course, and is normally completed on a full-time basis. This professional program is designed to educate and train students in the history, theory, and practice of the visual arts.

5.1.5 Nursing Degree
The Bachelor of Nursing (Collaborative) is a four-year program comprised of 130 credit hours and is completed on a full-time basis. The program is designed to prepare entry-level nurses who will function within a variety of health care settings. For specific admission and program requirements see Admission/Readmission Regulations for the School of Nursing and Program Regulations, General Degree, Bachelor of Nursing (Collaborative). The program is completed at Grenfell Campus and the Western Regional School of Nursing.

The Bachelor of Nursing (Collaborative) Fast-Track Option is a full-time option for current degree holders or those with advanced standing and is comprised of 94 credit hours. This Option is taken over six consecutive semesters, i.e. two calendar years. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Nursing and Program Regulations, General Degree, Bachelor of Nursing (Collaborative) Fast-Track Option. The program is completed at Grenfell Campus and the Western Regional School of Nursing.

5.1.6 Resource Management Degree
The Bachelor of Resource Management is offered under the School of Science and Environment.
The Bachelor of Resource Management is a four-year program comprised of 40 courses, 120 credit hours and may be completed on a full or part-time basis. The program aims to produce a different type of resource manager, graduates who have an understanding of ethics, as well as the many ecological, sociological, and economic factors. This program is currently under review. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment and Program Regulations - General and Honours Degree, School of Science and the Environment.

Articulation Agreements with the College of the North Atlantic are in place for students who have completed the two-year Fish and Wildlife Technician or the two-year Forest Resources Technician Diploma, and who wish to complete the Bachelor of Resource Management degree program at Grenfell Campus. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment and Program Regulations - General and Honours Degree, School of Science and the Environment.

5.1.7 Science Degree

Bachelor of Science degree programs are offered under the School of Arts and Social Science and the School of Science and Environment.

The School of Science and the Environment offers the Bachelor of Science with Majors in Computational Mathematics, Environmental Science, General Science, and Physics general degrees. The School of Arts and Social Science offers the Bachelor of Science with Major in Psychology.

The Bachelor of Science is a four year program comprised of 40 courses, 120 credit hours and may be completed on a full or part-time basis. Students must complete a minimum of 120 credit hours made up of Core Program Requirements, an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses. A Minor is not required for Interdisciplinary programs or for Bachelor of Science in Computational Mathematics, Physics, or Psychology. However, students in such programs may choose to complete a Minor. A student may not use the same course to satisfy the requirements for both a Major and a Minor with the exception of Computational Mathematics. The program is available in the following five majors: Computational Mathematics, Environmental Science (Biology or Chemistry), General Science, Physics, and Psychology. Elective courses to make up the total of 120 credit hours, other than those required for the core program and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts, and up to 15 credit hours in other subject areas.

An Articulation Agreement with the College of the North Atlantic is in place for students who have completed the three-year Environmental Technology diploma program and who wish to complete the Bachelor of Science with Major in Environmental Science degree program at Grenfell Campus. For specific admission and program requirements see Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment and Program Regulations - General and Honours Degree, School of Science and the Environment.

5.2 Honours Degrees

Programs are offered leading to the Honours Degrees of Bachelor of Arts, Bachelor of Business Administration, and Bachelor of Science. An Honours degree requires, over and above the requirement of the General degree, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program. Grenfell Campus offers two honours degrees in three program areas. For specific details on each degree refer to the appropriate Program Regulations - General and Honours Degrees.

5.3 Non-Degree Programs

The School of Arts and Social Science offers the non-degree Intensive English Bridge Program at Grenfell (IEBP-G) and the Intensive English Program at Grenfell (IEP-G).

5.3.1 English as a Second Language

English as a Second Language programs are offered under the School of Arts and Social Science. The English as a Second Language Office, affiliated with the School of Arts and Social Science, Grenfell Campus, offers year-round programs for adult students wishing to improve their English language skills for academic, professional or personal purposes. These programs include:

1. the Intensive English Bridge Program at Grenfell (IEBP-G);
2. twelve-week non-credit Intensive English Program at Grenfell (IEP-G) which are offered year-round on a semesterized basis;
3. tutoring and language development support for current Grenfell Campus, Memorial University of Newfoundland students in undergraduate and graduate degree programs; and
4. custom-designed language and culture programs for schools, universities, or businesses. These can be developed on contract and are either for general learning purposes or to suit the needs of specific disciplines or professions.

The full-time, non-credit Intensive English Program at Grenfell (IEP-G) is designed to improve English language skills for academic, professional and personal purposes. Reading, writing, speaking and listening skills are covered, and workshops on culture and social activities promoting integration with the local community also form part of the program. The program prepares the student for full-time university studies in English.

The full-time, non-credit and credit Intensive English Bridge Program at Grenfell (IEBP-G) is designed for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students and who are students of advanced proficiency.

Information regarding the above programs and services is available from the Coordinator of English as a Second Language programs at Grenfell Campus, Memorial University of Newfoundland and online at www.grenfell.mun.ca/academics-and-research/Pages/esl.aspx.

6 Admission/Readmission Regulations for Grenfell Campus

An applicant must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate), Categories of Applicants, Admission Criteria and Other Information. In addition to meeting these regulations, an applicant to certain programs offered by Grenfell Campus must meet the requirements as indicated below under the appropriate program and School.
6.1 Applications

The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants should apply using the Admissions menu within Memorial Self-Service at www.mun.ca/admit/twbkwbsis_P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.2 Admission/Readmission Regulations for Programs Offered by the School of Arts and Social Science

1. A student may apply for admission into programs offered by the School of Arts and Social Science directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

2. The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.2.1 Advanced Diploma in Tourism Studies

1. The Advanced Diploma in Tourism Studies is designed for individuals already possessing a post-secondary diploma or degree in any relevant field who wish to acquire the knowledge and skills required to work in today's tourism industries. The program will benefit individuals from a wide variety of backgrounds including, Business, Environmental Science, Environmental Studies, Fine Arts, Historical Studies, Social/Cultural Studies, and Sustainable Resource Management.

2. Students who wish to undertake the Advanced Diploma in Tourism Studies must have completed a post-secondary diploma or degree in any field, or possess at least five years of full-time, relevant work experience or equivalent. Applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbsis_P_WWWLogin or for current students in the space provided on the DECLARATION/CHANGE OF ACADEMIC PROGRAM form, which must then be approved by the Chair of the Tourism Studies Program. Admission into this program is limited and competitive.

6.2.2 Bachelor of Arts Degrees

1. A student may apply for admission into the Bachelor of Arts program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

2. Students who have graduated from the two-year Adventure Tourism Diploma Program offered by the College of the North Atlantic, or who are in their final semester of this program, can apply for entry with advanced standing into the Bachelor of Arts degree at www5.mun.ca/admit/twbkwbsis_P_WWWLogin. Students who have graduated from either the two-year Fish and Wildlife Technician program or the two-year Forest Resources Technician Diploma program offered by the College of the North Atlantic, or who are in the final semester of one of these programs, can apply for entry with advanced standing into the Bachelor of Environmental Science offered by Grenfell Campus. Students who have graduated from either the two-year Adventure Tourism Diploma program offered by the College of the North Atlantic, or who are in their final semester of one of these programs, can apply for entry with advanced standing into the Bachelor of Arts degree at www5.mun.ca/admit/twbkwbsis_P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.2.2.1 Direct Entry (for High School Students)

Students may apply for admission into the Bachelor of Arts program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University.

6.2.2.2 Transfers from Other Post-Secondary Institutions

Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbsis_P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete
A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

### 6.2.3 Bachelor of Business Administration

**6.2.3.1 Direct Entry (for High School Students)**

Students may apply for admission into the Bachelor of Business Administration program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University.

**6.2.3.2 Current Grenfell Campus Students**

Current Grenfell Campus students should select the B.B.A. program on the Declare/Change Academic Program (Grenfell Campus) form available from the Office of the Registrar.

**6.2.3.3 Transfers from Other Post-Secondary Institutions**

Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to programs offered by Grenfell Campus is submitted online: current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

**6.2.3.4 Articulation Agreements for Bachelor of Business Administration**

1. For Graduates of the Two-Year Business Administration (Accounting) Diploma Program Offered by the College of the North Atlantic
   
   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the two-year Business Administration (Accounting) Diploma Program Offered by the College of the North Atlantic.
   
   A student in this category must apply under Transfers from Other Post-Secondary Institutions above.

2. For Graduates of the Two-Year Business Administration (Human Resource Management) Diploma Program Offered by the College of the North Atlantic
   
   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the two-year Business Administration (Human Resource Management) Diploma Program Offered by the College of the North Atlantic.
   
   A student in this category must apply under Transfers from Other Post-Secondary Institutions above.

3. For Graduates of the Two-Year Business Administration (Marketing) Diploma Program Offered by the College of the North Atlantic
   
   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the two-year Business Administration (Marketing) Diploma Program Offered by the College of the North Atlantic.
   
   A student in this category must apply under Transfers from Other Post-Secondary Institutions above.

4. For Graduates of the Three-Year Business Management (Accounting) Diploma Program Offered by the College of the North Atlantic
   
   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the three-year Business Management (Accounting) Diploma Program Offered by the College of the North Atlantic.
   
   A student in this category must apply under Transfers from Other Post-Secondary Institutions above.

5. For Graduates of the Three-Year Business Management (Human Resource Management) Diploma Program Offered by the College of the North Atlantic
   
   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the three-year Business Management (Human Resource Management) Diploma Program Offered by the College of the North Atlantic.
   
   A student in this category must apply under Transfers from Other Post-Secondary Institutions above.

6. For Graduates of the Three-Year Business Management (Marketing) Diploma Program Offered by the College of the North Atlantic
   
   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the three-year Business Management (Marketing) Diploma Program Offered by the College of the North Atlantic.
   
   A student in this category must apply under Transfers from Other Post-Secondary Institutions above.

### 6.2.4 Bachelor of Education (Primary/Elementary) as a Second Degree

Admission/readmission regulations for the Bachelor of Education (Primary/Elementary) as a Second Degree can be found at Admission/Readmission Regulations for the Faculty of Education, Bachelor of Education (Primary/Elementary) as a Second Degree.
6.2.5 Bachelor of Science with Major in Psychology
A student may apply for admission into the Bachelor of Science with Major in Psychology directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

6.2.5.1 Direct Entry (for High School Students)
Students may apply for admission into the Bachelor of Science with Major in Psychology program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University.

6.2.5.2 Transfers from Other Post-Secondary Institutions
Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbs.P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University.

6.2.6 English as a Second Language
A student may apply for admission to the Intensive English Program Grenfell (IEP-G) or the Intensive English Bridge Program at Grenfell (IEBP-G) program offered by the School of Arts and Social Science by submitting an application by email to esl@grenfell.mun.ca or in writing to the Coordinator, English as a Second Language Programs (Grenfell Campus), Memorial University of Newfoundland, Corner Brook, NL, A2H 6P9. Further information and applications for admission to these programs are available at www.grenfell.mun.ca/academics-and-research/Pages/esl.aspx. Grenfell Campus reserves the right to limit the number of spaces available in English as a Second Language programs.

6.2.6.1 Intensive English Program at Grenfell (IEP-G)
A student may apply for admission into the Intensive English Program Grenfell (IEP-G) program offered by the School of Arts and Social Science by submitting an application directly in writing to Coordinator, English as a Second Language Programs (Grenfell Campus), Memorial University of Newfoundland, Corner Brook, NL, A2H 6P9.

Applicants to the Intensive English Program must
1. be at least 18 years old;
2. hold a valid high school diploma; and
3. have an intermediate level of English proficiency, equivalent to International English Language Testing System (IELTS) 4.5 or higher, as determined by the English as a Second Language (ESL) Coordinator.

A student wishing to complete the Intensive English Program Grenfell (IEP-G) preparation for admission to Memorial University of Newfoundland as an undergraduate degree student may apply for this program at the same time as application for admission to undergraduate studies. Subject to General Academic Regulations (Undergraduate), Admission/Readmission to the University (Undergraduate), governing admission for undergraduate studies, and the regulations in place for admission to specific programs, a student may be provisionally admitted for studies at an undergraduate level in an upcoming term currently enrolled in the Intensive English Program. The General Academic Regulations (Undergraduate), Admission/Readmission to the University (Undergraduate) should be reviewed carefully by students.

6.2.6.2 Intensive English Bridge Program at Grenfell (IEBP-G)
A student may apply for admission to Memorial University of Newfoundland using the University's General Application for Admission/ Readmission (Undergraduate).

A student for the Intensive English Bridge Program at Grenfell (IEBP-G) must have:
1. been provisionally accepted to undergraduate studies at Memorial University of Newfoundland;
2. achieved for IEBP-G Level 1: an average of Band 40 in the Canadian Academic English Language (CAEL) Assessment with a Writing sub-score of at least 40, a paper-based Test of English as a Foreign Language (TOEFL) score of 480, an iBT TOEFL score of 58, with a minimum writing score of 16, or an International English Language Testing System (IELTS) score of 5.5 with no sub-score less than 5 and a minimum writing score of 5.5 or evidence showing equivalent proficiency as determined by the English as a Second Language (ESL) Coordinator; achieved for IEBP-G Level 2: an average of Band 50 in the CAEL with a Writing sub-score of at least 50, a paper-based TOEFL score of 530, or an iBT TOEFL score of 70, with a minimum writing score of 18, or an IELTS score of 6.0 with no sub-score less than 5.5 and a minimum writing score of 6.0; or evidence showing equivalent proficiency as determined by the ESL Coordinator; or
3. achieved a grade of “B” or better with a satisfactory attendance level (90%) if enrolled in the preceding level of the Intensive English program or Intensive English Bridge Program and “C” in the concurrent credit course (if applicable) at the Grenfell Campus within the previous two semesters.

Final admission for provisionally admitted students will be subject to the regulations outlined under UNIVERSITY REGULATIONS, Admission/Readmission to the University (Undergraduate), English Language Proficiency Requirements.
6.3 Admission/Readmission Regulations for Programs Offered by the School of Fine Arts

The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis_P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

A student may apply for admission into programs offered by the School of Fine Arts directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program. In addition to meeting the general admission requirements of the University, applicants for the Bachelor of Fine Arts (Theatre) must undergo an audition/interview to the satisfaction of the Department. Enrollment in the Bachelor of Fine Arts (Theatre) is limited and selection is competitive. In addition to meeting the general admission requirements of the University, all applicants for the Bachelor of Fine Arts (Visual Arts) will be required to submit a portfolio of previous art work. The deadline for submission of applications to the Bachelor of Fine Arts (Theatre) is March 31st and the deadline for the Bachelor of Fine Arts (Visual Arts) is March 1st of the year in which entry is sought.

6.3.1 Bachelor of Fine Arts (Theatre)

1. Applicants must meet the general admission requirements of the University as outlined under UNIVERSITY REGULATIONS.
2. In addition to meeting the general admission requirements of the University, applicants for the Bachelor of Fine Arts (Theatre) must undergo an audition/interview to the satisfaction of the School. Enrollment in the Bachelor of Fine Arts (Theatre) is limited and selection is competitive.
3. The deadline for submission of Theatre application forms is March 31st of the year in which admission is sought.

6.3.2 Bachelor of Fine Arts (Visual Arts)

1. Applicants must meet the general admission requirements of the University outlined under UNIVERSITY REGULATIONS.
2. In addition to meeting the general admission requirements of the University, all applicants will be required to submit a portfolio of previous art work. Applicants must apply before March 1st of the year in which entry is sought. Although it is assumed that applicants will have had no previous formal training in art, evidence of suitability for study in the visual arts is required. Instructions for the submission of portfolios will be provided by the School of Fine Arts upon request. Enrollment in the Bachelor of Fine Arts (Visual Arts) program is limited and selection is competitive.
3. Students who have voluntarily withdrawn from the Bachelor of Fine Arts (Visual Arts) program and wish to re-enter must re-apply by March 1st for the upcoming Fall semester, or by August 30th for the upcoming Winter semester.
4. Students who have been required to withdraw from the Bachelor of Fine Arts (Visual Arts) program and wish to re-enter must re-apply in competition after a lapse of two semesters by March 1st for the upcoming academic year.
5. Students who have been required to withdraw twice from the Bachelor of Fine Arts (Visual Arts) program shall be ineligible for further admission to the Visual Arts Program.

6.4 Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment

1. A student may apply for admission into programs offered by the School of Science and the Environment directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.
2. The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis_P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.4.1 Bachelor of Arts with Major in Environmental Studies

A student may apply for admission into the Bachelor of Arts with Major in Environmental Studies program. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.4.1.1 Direct Entry (for High School Students)

Students may apply for admission into the first year of the Bachelor of Arts with Major in Environmental Studies program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.4.1.2 Transfers from Other Post-Secondary Institutions

Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to programs offered by Grenfell Campus is submitted online;
current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbwbis.P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.4.2 Bachelor of Arts with Major in Environmental Studies for Graduate of the Two-Year Adventure Tourism and the Two-Year Hospitality Management Diploma Program Offered by the College of the North Atlantic

A student may apply for admission into the Bachelor of Arts with Major in Environmental Studies program. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the Two-Year Adventure Tourism and the two-year Hospitality Management diploma program offered by the College of the North Atlantic.

6.4.3 Bachelor of Resource Management

Students may apply for admission into the Bachelor of Resource Management program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University.

6.4.3.1 Direct Entry (for High School Students)

Students may apply for admission into the first year of the Bachelor of Resource Management program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University.

6.4.3.2 Transfers from Other Post-Secondary Institutions

Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbwbis.P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.4.4 Bachelor of Resource Management for Graduates of the Two-Year Fish and Wildlife Technician Diploma Program or the Two-Year Forest Resources Technician Diploma Program Offered by the College of the North Atlantic

A student may apply for admission into the Bachelor of Resource Management program. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the Two-Year Fish and Wildlife Technician Diploma Program or the Two-Year Forest Resources Technician Diploma Program offered by the College of the North Atlantic.

6.4.4.1 Transfers from Other Post-Secondary Institutions

Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbwbis.P_WWWLogin. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application forms are submitted. Applicants to this program must have been awarded the Two-Year Fish and Wildlife Technician Diploma Program or the Two-Year Forest Resources Technician Diploma Program offered by the College of the North Atlantic.

6.4.5 Bachelor of Science

A student may apply for admission into the Bachelor of Science directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

6.4.5.1 Direct Entry (for High School Students)

Students may apply for admission into the Bachelor of Science program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant’s final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.
to the applicant’s final acceptance to the University. Direct admission from high school is subject to the applicant’s final acceptance to the University.

6.4.5.2 Transfers from Other Post-Secondary Institutions
Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified in the University Diary for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.4.6 Bachelor of Science with Major in Environmental Science for Graduates of the Three-Year Environmental Technology Diploma Program Offered by the College of the North Atlantic
A student may apply for admission into the Bachelor of Science with Major in Environmental Science program. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section UNIVERSITY REGULATIONS and have been awarded the Three-Year Environmental Technology Diploma Program Offered by the College of the North Atlantic.

6.5 Bachelor of Nursing (Collaborative) Degree
Admission/readmission regulations for the Bachelor of Nursing (Collaborative) degree program can be found at Admission/Readmission Regulations for the School of Nursing.

7 Program Regulations - General and Honours Degrees
7.1 Grenfell Campus Core Program Requirements
Students completing the Bachelor of Arts, Bachelor of Resource Management, and Bachelor of Science degree programs at Grenfell Campus must complete the requirements as outlined below under Breadth of Knowledge Requirement, Literacy Requirement, and Quantitative Reasoning and Analysis Requirement.

7.1.1 Breadth of Knowledge Requirement
Six credit hours from each of the three groups identified below for a total of 18 credit hours. The courses chosen can be any courses within the disciplines identified. However, students are not permitted to use these courses to meet the Quantitative Reasoning and Analysis requirement nor the first-year English requirements.

7.1.1.1 Breadth of Knowledge Requirement - Group A
Art History, Classics, English, History, Humanities, Languages, Philosophy, Religious Studies, Theatre, Visual Arts

7.1.1.2 Breadth of Knowledge Requirement - Group B
Anthropology, Business, Economics, Education, Environmental Studies, Folklore, Gender Studies, Geography, Human Kinetics and Recreation, Political Science, Psychology, Sociology, Sustainable Resource Management, Tourism Studies

7.1.1.3 Breadth of Knowledge Requirement - Group C
Biology, Biochemistry, Chemistry, Computer Science, Earth Sciences, Environmental Science, Mathematics, Physics, Science

7.1.2 Literacy Requirement
Thirty credit hours in Writing courses which must include 6 credit hours in first-year English. Up to 6 credit hours in languages other than English may be used to satisfy the literacy requirement. Courses in this group are identified with the designation W and are listed in Table 1 Designated Writing Courses (W).

Courses in this category must either be completed through on-campus offerings at Grenfell Campus or be demonstrated to be equivalent to Grenfell writing courses.

7.1.3 Quantitative Reasoning and Analysis Requirement
Six credit hours in Quantitative Reasoning and Analysis courses. Courses in this group are identified with the designation QRA and are listed in Table 2 Designated Quantitative Reasoning and Analysis Courses (QRA).
7.1.4 Designated Writing Courses (W)

Courses will be designated Writing courses by the Academic Studies Committee. A Writing course is a course in which a minimum of 30 percent of the course grade involves a specific component consisting of written work on which students will receive feedback. For the purpose of this regulation, the final examination will not be counted as part of the evaluated Writing component.

7.1.5 Designated Quantitative Reasoning and Analysis Courses (QRA)

Courses will be designated Quantitative Reasoning and Analysis by the Academic Studies Committee. The Quantitative Reasoning and Analysis (QRA) Requirement is intended to help students develop a degree of appreciation of numerical, statistical and/or symbolic modes of representation, as well as an appreciation of the analysis, interpretation and broader quantitative application of such representations.

7.2 School of Arts and Social Science

www.grenfell.mun.ca/school-of-arts-and-social-science

The School of Arts and Social Science offers the Bachelor of Arts Degree with majors in English Language and Literature, Historical Studies, Humanities, Philosophy, Psychology, Social/Cultural Studies, and Tourism Studies. A Bachelor of Business Administration and a Bachelor of Science with Major in Psychology are also available. Minors are available in Business, Canadian Studies, Classics, English, Folklore, French, Historical Studies, Humanities, Philosophy, Psychology, and Religious Studies and are outlined under Table 19 Minor Programs Offered by the School of Arts and Social Science. Students may choose the minor from Table 19 Minor Programs Offered by the School of Arts and Social Science, or from Table 5 Minor Program Offered by the School of Fine Arts, or from Table 12 Minor Programs Offered by the School of Science and the Environment. An Intensive English Program (IEP-G) and an Intensive English Bridge Program at Grenfell (IEBP-G) are also available.

Bachelor of Arts (Honours), Bachelor of Business Administration (Honours) and the Bachelor of Science (Honours) degree in Psychology are available.

7.2.1 Bachelor of Arts with Major in English Language and Literature

www.grenfell.mun.ca/english

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 1 Bachelor of Arts with Major in English Language and Literature.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses to make up the required total of 40 courses, 120 credit hours.
- A student may not use the same course to satisfy the requirements for both a Major and a Minor.
- As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.
- A student may devise a Major/Minor of one’s own choosing in close consultation with a faculty advisor and with approval of appropriate head(s). Such “open” programs must be approved by the Academic Studies Committee.
- Any student enrolled in the Grenfell Campus Bachelor of Arts Degree with a Major in English who has completed the Bachelor of Fine Arts (Theatre) Degree at Grenfell Campus will be considered to have fulfilled the requirements for a Minor in Theatre.

</tbody>
</table>

18 credit hours in one of the following concentrations. Within each concentration, there must be a minimum of 6 credit hours at the 3000 level and 6 credit hours at the 4000 level.

**Canadian Literature Concentration**

English 2146, 4950 and 12 credit hours in Canadian Literature from the following selection: English 2155, 2156, 2905, 3145, 3147, 3148, 3149, 4307, 4825-35.

**Dramatic Literature Concentration**

English 2350, 2351, 4950 and 9 credit hours in Dramatic Literature from the following selection: English 3021, 3171, 3181, 3205 or 3206 (whichever course has not been used to fulfil the requirements of the English Core), 3275, 4302, 4305, 4307, 4308, 4316, 4317, 4836-44.

**Modern Literature Concentration**

English 3215, 3216, 4950 and 9 credit hours in Modern Literature from the following selection: English 2215, 2242, 2243, 2244, 2705, 2805, 2870, 2905, 3275, 3810, 3905, 4245, 4246, 4302, 4305, 4308, 4861-4870, 4905.

**Combined Concentration**

A total of 18 credit hours from English Concentration Courses which must include:
- At least 6 credit hours from one of three concentrations (Canadian, Dramatic, Modern) as specified below and an English 4950 project within the area chosen:
  - Canadian Literature: 2146 and at least 3 additional credit hours in this concentration or Dramatic Literature: 2350 or 2351 and at least 3 additional credit hours in this concentration or Modern Literature: 3215 or 3216 and at least 3 additional credit hours in this concentration.
  - At least 3 credit hours from each of the other two concentrations.
7.2.2 Bachelor of Arts with Major in Historical Studies

The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 2 Bachelor of Arts with Major in Historical Studies.

7.2.6.3 Advanced Diploma in Tourism Studies

- The Advanced Diploma in Tourism Studies is designed for individuals already possessing a post-secondary diploma or degree in any relevant field who wish to acquire the knowledge and skills required to work in today's tourism industries. The program will benefit individuals from a wide variety of backgrounds including, Business, Environmental Science, Environmental Studies, Fine Arts, Historical Studies, Social/Cultural Studies, and Sustainable Resource Management (proposed).
- Students who wish to undertake the Advanced Diploma in Tourism Studies must have completed a post-secondary diploma or degree in any field, or possess at least five years of full-time, relevant work experience or equivalent. Application is made in the space provided on the Change of Academic Program Form, which must then be approved by the Chair of the Tourism Studies Program. Admission into this program is limited and competitive.
- The Advanced Diploma in Tourism Studies require 30 credit hours as outlined under Table 9 Advanced Diploma in Tourism Studies.
- Prerequisites for all Tourism courses may be waived after consultation with, and permission of, the Chair of the Tourism Studies program.

The Bachelor of Business Administration requires a total of 120 credit hours as outlined under Table 10 Bachelor of Business Administration and may be completed on a full or part-time basis. Students must achieve a grade point average of at least 2.5 and an average of at least 60% on those 120 credit hours.

Students enrolled in the Bachelor of Business Administration program are not required to complete minor programs; however, students may choose to pursue a minor in other non-business academic units (where minor programs exist) with permission of that academic unit.

Students are advised to refer to the requirements for the chosen Minor program as set forth in the University Calendar, and it is recommended that students seek academic advice when planning their program.

### 7.2.8 Bachelor of Education (Primary/Elementary) as a Second Degree

www.grenfell.mun.ca/education

Information regarding program requirements for the Bachelor of Education (Primary/Elementary) as a Second Degree is located at Faculty of Education, Program Regulations, Bachelor of Education (Primary/Elementary) as a Second Degree.

### 7.2.9 Bachelor of Science with Major in Psychology

www.grenfell.mun.ca/psychology

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 18 Bachelor of Science with Major in Psychology.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.
- Students completing this program cannot receive credit for Psychology 2920.

7.2.10 Intensive English Program at Grenfell (IEP-G)
www.grenfell.mun.ca/esl

- The 12 week, full-time, non-credit program may be offered at the intermediate level in each of the Fall, Winter, and Spring semesters.
- Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Coordinator of English as a Second Language programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll in the IEP in the following semester.
- Evaluation of students may include, but not be limited to, any or all of the following: projects, assignments, quizzes, oral presentations, and class participation.

7.2.10.1 Program of Study
1. The IEP-G may be offered at the intermediate level in each of the Fall, Winter, and Spring terms.
2. A student admitted to the IEP-G must register for the course English as a Second Language 013F.

7.2.11 Intensive English Bridge Program at Grenfell (IEBP-G)
www.grenfell.mun.ca/esl

- The program is offered at two levels, IEBP-G Level 1 and IEBP-G Level 2 and requires fifteen to twenty hours of classroom language instruction in reading, writing, speaking, grammar, vocabulary and listening. The emphasis is on English for academic purposes.
- A student in this program may register concurrently for one undergraduate credit course at IEBP-G Level 1 or two undergraduate credit courses at IEBP-G Level 2, in consultation with the Coordinator of English as a Second Language programs and with the approval of the academic unit. The number of semesters of intensive English study required to achieve a student’s desired level of proficiency will vary according to his or her initial proficiency level and individual progress rate.
- The Intensive English Bridge Program is intended for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students, and who are students of high intermediate or advanced proficiency who meet the criteria outlined in Admission.
- Final admission for provisionally admitted students will be subject to the regulations governing English language proficiency requirements for admission/readmission to the University as described in the University Calendar under UNIVERSITY REGULATIONS, English Language Proficiency Requirements.

7.2.11.1 Program of Study
1. A student admitted to the Intensive English Bridge Program must register for the course English as a Second Language 014F (level 1) or 015F (level 2).
2. A student in this program may normally register for no more than one credit course at IEBP-G Level 1 and no more than two credit courses at IEBP-G Level 2, chosen in consultation with the Coordinator of the English as a Second Language Program, and with approval of the academic unit.
3. A student may register in each level of the Intensive English Bridge Program for a maximum of two semesters.
4. Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Coordinator of English as a Second Language programs. A student who fails to meet the minimum attendance requirements may not be permitted to re-enroll in the IEBP-G in the following semester.
7.2.12 Minor Programs Offered by the School of Arts and Social Science

The School of Arts and Social Science offers minors comprised of 8 courses, 24 credit hours as outlined under Table 19 Minor Programs Offered by the School of Arts and Social Science, in addition to the minors below, students for the Bachelor of Arts degree may complete a minor offered by the School of Fine Arts or the School of Science and the Environment.

| **English Minor** | 6 credit hours at 1000 level in English  
6 credit hours from English 2005, 2006 and 2007  
3 credit hours from English 3205 or 3206  
9 additional credit hours in English electives; 3 credit hours must be chosen from courses having an initial digit "3" or "4" |
| **Folklore Minor** | Folklore 1000, 2100, 2300, 2401, 2500  
9 additional credit hours in Folklore |
| **French Minor** | No more than 6 credit hours at the 1000 level and no more than 6 transfer credits may be used to fulfill the minimum requirement of the minor in French.  
French 2100 and 2101  
French 3100 or French 3101  
15 additional credit hours in French |
| **French Minor** | Humanities 1001 and 1002  
6 credit hours from Humanities 2001, 2002 or 2010  
12 credit hours from Humanities 3001, 3002, 3010, 3020, 3021, 4001, 4010; one of 3100-3109; one of 4020-4029 |
| **Philosophy Minor** | Philosophy 1200, 1600, 2210, 2551, 2561  
9 additional credit hours in Philosophy, of which at least 3 credit hours must be at the 3000- or 4000-level |
| **Psychology Minor** | Psychology 1000, 1001  
18 credit hours in Psychology at the 2000 level or above |
| **Religious Studies Minor** | 24 credit hours in Religious Studies with no more than 6 credit hours at 1000 level and at least 9 credit hours at 3000 level or above. |
| **Social/Cultural Studies Minor** | Anthropology 1031, Folklore 1000, Sociology 1000  
Anthropology 2410 or Sociology 3150  
Folklore 2100 or Sociology 3040  
3 additional credit hours in each of Anthropology, Folklore, and Sociology |
| **Tourism Studies Minor** | Tourism 1000, 1100, 2000, 3100, 3900  
3 credit hours chosen from a 2000-level or 3000-level Tourism elective  
3 credit hours chosen from a 4000-level Tourism course  
3 credit hours chosen from Geography 3222, Psychology 2925, Sociology 3040, Statistics 2500, Statistics 2550. |

Students for the Bachelor of Arts and Bachelor of Science degrees offered by the School of Arts and Social Science may complete a minor offered by the School of Fine Arts, the School of Fine Arts, or the School of Science and the Environment. See Table 19 Minor Programs Offered by the School of Arts and Social Science, or from Table 12 Minor Programs Offered by the School of Science and the Environment.
7.3 School of Fine Arts
www.grenfell.mun.ca/school-of-fine-arts

The School of Fine Arts offers Bachelor of Fine Arts degrees in Theatre and in Visual Arts. Students completing a Fine Arts degree are not required to follow the Grenfell Campus Core program requirements. The Minor Program is available in Art History.

7.3.1 Bachelor of Fine Arts (Theatre)
www.grenfell.mun.ca/theatre

- The 120 credit hour, 36 course program may be completed on a full-time basis as set out under Table 1 Bachelor of Fine Arts (Theatre). The course structure for the Bachelor of Fine Arts (Theatre) is outlined under Table 2 Suggested Program of Study for the Bachelor of Fine Arts in Theatre.
- The program is designed to educate and train the student in the history, theory and practice of the theatre arts. The degree provides an undergraduate training, delivered by theatre professionals, that will prepare students to enter a professional graduate school of theatre, theatre conservatory or an apprenticeship in the theatre profession. The degree also provides a broad liberal arts education with a strong component of dramatic literature, enabling the graduate to pursue a variety of careers outside the theatre profession.
- In recognition of the relative isolation of the Grenfell Campus and the need for students of the performing arts to be exposed to examples of excellence in their field of study, provision will be made for students in their senior years to visit major theatre centres outside the province (e.g. the Harlow Campus will be utilized for studies in London and Stratford).
- Where circumstances warrant any prerequisite(s) for Theatre courses may be waived by the Program Chair.
- Students in their first year will not be allowed to participate in theatre productions. Exceptions will be made only with the permission of the Head of the School of Fine Arts, and permission will be given only where a student demonstrates satisfactory performance. Where circumstances warrant, a student in second or third year may be given the opportunity for advanced responsibilities in production with the permission of the Program Chair. Permission will be given only where a student demonstrates above average academic performance as well as exceptional theatrical ability.
- Productions will constitute the designated number of rehearsal hours as described below. However, the final week of rehearsals (technical rehearsals) will include ten hour days on Saturday and Sunday. All performances will take place in the evenings with the possible exceptions of occasional matinees.

### 7.3.2 Bachelor of Fine Arts (Visual Arts)

www.grenfell.mun.ca/visual-arts

- The 120 credit hour, 40 course program and a non-credit health and safety course, may be completed on a full-time basis as set out under Table 3 Bachelor of Fine Arts (Visual Arts) and Table 4 Suggested Program of Study for the Bachelor of Fine Arts (Visual Arts).

- The Bachelor of Fine Arts (Visual Arts) degree program is a professional program designed to educate and train students in the history, theory and practice of the Visual Arts. Courses are offered in Computers and Art, Drawing, New Media, Painting, Sculpture, Printmaking, Photography, Textile and Fibre Art, Time-Based Art, and Art History/Visual Culture. The curriculum is devised with the aim of producing well-rounded generalists with a solid grounding in all aspects of the Visual Arts. It illustrates the philosophy that artistic freedom and creative expression require both technical skill and intellectual vision, acquired through a disciplined application of effort and a critical awareness of artistic issues, past and present.

- In addition to Studio and Art History/Visual Culture courses, students will take a number of appropriate academic courses from disciplines other than Visual Arts. It is intended that academic courses be chosen which will enhance the Bachelor of Fine Arts (Visual Arts) program. The first year of the program consists of an in-depth exploration of a wide range of media and an introductory health and safety studio component. This is in preparation for continued study in a given discipline or, alternatively, exploring new disciplines in the second year. Intermediate studio courses in the third year emphasize the production of self-directed bodies of work in extended practices. In the fourth year, the senior studio seminar course includes professional practices. The 4950/4951 studio courses are conducted as tutorials, in which, students will work independently on the research and creation of independent bodies of work and confer regularly with instructors. Each year of the program will include Art History/Visual Culture courses as well as academic electives.

- It is recognized that students in the Bachelor of Fine Arts (Visual Arts) program must have occasional opportunities to view important works of art first-hand. Arrangements will therefore be made where possible for students to visit major art centres.

- The Bachelor of Fine Arts (Visual Arts) program is rigorous and demanding and it is assumed that students will normally be enrolled for full-time study. Students who withdraw from a course may put their program in jeopardy or be unable to complete the degree in the normally allotted time. Where circumstances warrant, any prerequisite(s) or co-requisite(s) for Visual Arts courses may be waived by the Program Chair. For further information on waiver or regulations refer to [UNIVERSITY REGULATIONS, General Academic Regulations (Undergraduate) - Appeal of Decisions](www.grenfell.mun.ca/academic-regulations).

- Studio courses are offered in the following subjects: Computers and Art, Drawing, New Media, Painting, Sculpture, Printmaking, Photography, Textile and Fibre Art, and Time-Based Art. Courses in a studio subject consist of four hours of practical work in a studio class each week. Course components will require that considerable additional studio work be done outside scheduled class time. Students will supply their own art materials. Some courses may not be offered every year. Courses with a planned rotation are indicated in the University Calendar under Course Descriptions. Please consult with the Fine Arts Division prior to registration to confirm course offerings.

- One work of art done during the fourth year may be selected by the Visual Arts Program, in consultation with the student, and retained for the permanent collection of the Campus.

7.4 School of Science and the Environment

www.grenfell.mun.ca/school-of-science-and-the-environment

The School of Science and the Environment offers the Bachelor of Arts with Major in Environmental Studies, the Bachelor of Resource Management with Major in Sustainable Resource Management, and the Bachelor of Science with Majors in Computational Mathematics, Environmental Science, General Science, and Physics general degrees.

A Bachelor of Science (Honours) degree is available in Environmental Science.

Minors are available in Economics, Environmental Science, Environmental Studies, Geography, Mathematics, Physics, and Science. Students for the Bachelor of Science degree offered by the School of Science and the Environment may complete a minor offered by the School of the Environment or the School of Arts and Social Science. See Table 19 Minor Programs Offered by the School of Arts and Social Science and Table 12 Minor Programs Offered by the School of Science and the Environment.

An articulation agreement has been established with the College of the North Atlantic for those students who have completed the three-year Environmental Technology diploma program and who wish to obtain a Bachelor of Science degree with a Major in Environmental Science.

7.4.1 Bachelor of Arts with Major in Environmental Studies

www.grenfell.mun.ca/environmental-studies

The Major in Environmental Studies is an interdisciplinary program which uses various theoretical and applied approaches to explore the complex, dynamic interaction of human beings and nature, considering environmental, political and economic constraints and possibilities. The Major requires a total of 78 credit hours. Students must complete 60 credit hours from the Environmental Studies Core and 18 credit hours from the Environmental Studies Electives.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 1 Bachelor of Arts with Major in Environmental Studies.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

</table>

#### Environmental Studies Electives
18 credit hours from Environmental Studies electives, from which at least 6 credit hours must be at the 3000-or 4000-level, chosen in consultation with a faculty advisor as follows:
- Anthropology 3080, 3083
- Biology 1001, 1002, 2600
- Chemistry 1001, 1200
- Earth Sciences 1000, 1002
- Economics 1020 (or the former 2020)
- Environmental Science 2261, 2360, 2369, 2370, 2371, 3072, 4140 (or field course acceptable to the Chair of Environmental Studies)
- Environmental Studies 3000, 3085, 3210, 4020-4039
- Folklore 2100, 2401, 4480
- Geography 2302, 3350
- History 3030, 4480
- Humanities 3020
- Human Kinetics and Recreation 3555, 3565, 4555, 4575
- Philosophy 2561
- Political Science 3550, 3731, 4650
- Religious Studies 3880
- Sociology 2120
- Sustainable Resource Management 2000, 3000, 3001, 3002, 4000, 4002, 4003

**Environmental Studies Core**
- Earth Sciences 1000 or Environmental Science 2370
- Economics 1010 (or the former 2010)
- Environmental Studies 1000, 2000, 2210 or 2220, 3000, 3001, 3085, 4000, 4010, 4950
- Geography 1050, 2001, 2102, 2425, 3222
- Political Science 2600 and one of 3550 or 3731
- Sustainable Resource Management 4002 or 4003
- 3 credit hours chosen from Anthropology 3083 or Philosophy 2561, History 3030, Religious Studies 3880

**Other Elective Courses**
- Elective courses to make up the total of 120 credit hours, other than those required for the Grenfell Campus Core Program Requirement and Major/Minor requirements, may be chosen according to the following guidelines:
- Any courses in arts, social science, science and fine arts and up to 15 credit hours in other subject areas.

If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from Table 19 Minor Programs Offered by the School of Arts and Social Science, or from Table 5 Minor Programs Offered by the School of Fine Arts, or from Table 12 Minor Programs Offered by the School of Science and the Environment.
7.4.1.1 Articulation Agreement - Bachelor of Arts with Major in Environmental Studies for Students who have Graduated From the Two-Year Adventure Tourism Diploma Program Offered by the College of the North Atlantic

- Students who have graduated from the two-year Adventure Tourism Diploma Program offered by the College of the North Atlantic, or who are in their final semester of this program, can apply for entry with advanced standing into the Bachelor of Arts Degree with a Major in Environmental Studies offered by Grenfell Campus.
- Students who have graduated from the two-year Adventure Tourism program offered by the College of the North Atlantic and who are entering the Environmental Studies program will be awarded a total of 60 credit hours toward the 120 credit-hour degree program.
- The program may be completed on a full or part-time basis as set out under Table 2 Bachelor of Arts with Major in Environmental Studies for Students who have Graduated From the Two-Year Adventure Tourism Diploma Program Offered by the College of the North Atlantic.

When selecting elective or core courses, students must complete 6 credit hours to satisfy Grenfell Campus Core Program Requirements, Breadth of Knowledge Requirement, Group A.
7.4.2 Bachelor of Resource Management with Major in Sustainable Resource Management

www.grenfell.mun.ca/resource-management

- The 120 credit hour, 40 course Bachelor of Resource Management with Major in Sustainable Resource Management program may be completed on a full or part-time basis as set out under Table 3 Bachelor of Resource Management with Major in Sustainable Resource Management.
- The program consists of a Sustainable Resource Management core which provides an interdisciplinary understanding of management activities within the context of the physical, social and economic environments.
- A Minor is not required for this program.

7.4.3 Bachelor of Science with Major in Computational Mathematics

This Mathematics Major covers the essential undergraduate topics in mathematics, develops rigorous logical thinking, and equips students with computational techniques to model and solve real-world problems. Courses used to complete the requirements of this major may be used to meet the requirements of a minor or second major in a different subject area excluding a minor in Science and a major in General Science.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 6 Bachelor of Science with Major in Computational Mathematics.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

</tbody>
</table>
7.4.4 Bachelor of Science with Major in Environmental Science

www.grenfell.mun.ca/environmental-science

The Major consists of an Environmental Science Core which provides a broad appreciation of the interrelationships inherent in any study of the environment and one of two possible streams which provide the depth and focus for the degree program.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 7 Bachelor of Science with Major in Environmental Science.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

**Environmental Science Core**

45 credit hours as follows:
- Biology 1001, 1002, 2600
- Earth Sciences 1000
- Mathematics 1000 (or 1080 and 1081), Statistics 2550 or equivalent
- One of Physics 1020 or 1050 and one of Physics 1021 or 1051
- Environmental Science 4000
- Environmental Science 4950 (or 4951)

- a minimum of 6 credit hours chosen from Anthropology 3083, Economics 1010 (or the former 2010), Environmental Studies 3000, Environmental Studies 4000, Philosophy 2561, Political Science 3550, Political Science 3731, Religious Studies 3880
- a minimum of 9 credit hours chosen from Environmental Science 2261, Environmental Science 2360, Environmental Science 2370, Environmental Science 2371, Environmental Science 2430, Environmental Science 2450, Environmental Science 3072, Environmental Science 3470, Environmental Studies 2000 (this course is strongly recommended for the Biology Stream of the Environmental Science program)

It is strongly recommended that students considering the Chemistry stream of the Environmental Science program complete Mathematics 1000, Physics 1020 or 1050 and one of Physics 1021 or 1051 in their first year.

**Environmental Science Streams**

39 credit hours in one of the following streams:

- **Biology stream**
  - Biology 2010, 2122
  - Chemistry 1200/1001 sequence or Chemistry 1050/1051 sequence, and one of Chemistry 2210 or Chemistry 2301 or 2440 or 2400/2401 sequence, or Chemistry 1010/1011 sequence and Chemistry 2440
  - Environmental Science 3110, 3130, 3131, 4132, 4140 (or equivalent field course)
  - Two of Environmental Science 4069, 4131, 4133, 4240, 4369, 4479
  - one additional laboratory (Science/Statistics/GIS) course beyond the first year level excluding Environmental Science Core courses. A course used to fulfill a stream requirement cannot also be used as a Group C course in the Environmental Science Core.

- **Chemistry stream**
  - Chemistry 1200/1001 sequence or Chemistry 1050/1051 sequence. It is strongly recommended that students complete one of these sequences of Chemistry courses in their first year.
  - Chemistry 2210, 2301/2302, Chemistry 2400/2401 or equivalent
  - Environmental Science 2261, 3210, 3211, 3260, 3261, 4230
  - Two of Environmental Science 4069, 4131, 4240, 4249, 4369, 4479
  - Mathematics 1001 which should be completed in the first year of studies

If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from [Table 19 Minor Programs Offered by the School of Arts and Social Science](#), or from [Table 5 Minor Program Offered by the School of Fine Arts](#), or from [Table 12 Minor Programs Offered by the School of Science and the Environment](#).
7.4.4.1 Articulation Agreement - Bachelor of Science with Major in Environmental Science for Graduates of the Three-Year Environmental Technology Diploma Program Offered by the College of the North Atlantic

- The program may be completed on a full or part-time basis as set out under Table 8 Bachelor of Science with Major in Environmental Science for Graduates of the Three-Year Environmental Technology Diploma Program Offered by the College of the North Atlantic.

- An articulation agreement has been established with the College of the North Atlantic for those students who have completed the three-year Environmental Technology diploma program and who wish to obtain a Bachelor of Science degree (Major in Environmental Science). Students who have graduated from the three-year Environmental Technology Diploma Program offered by the College of the North Atlantic, or who are in their final semester of this program, can apply for entry with advanced standing into the Environmental Science Degree Program offered at Grenfell Campus. Upon admission to the university, such students will enter the second year of either stream of the Environmental Science Degree Program.

- Students will be given unspecified credit for 45 credit hours towards the 120 credit-hour degree program. Included in these 45 credit hours will be 9 credit hours for unspecified writing courses, of which 6 credit hours will be at the 1000 level and three will be at the 2000 level. In addition, 6 of these credit hours will be for unspecified credit at the 2000 level satisfying Group B, breadth of knowledge requirement.

- Students gaining entry into the Environmental Science Degree Program at Grenfell Campus will need to satisfy all other core program requirements specified for Grenfell Campus degree programs. As well, they will need to satisfy all other course requirements specified for their specific stream in Environmental Science and meet the requirements outlined under Table 8 Bachelor of Science with Major in Environmental Science for Graduates of the Three-Year Environmental Technology Diploma Program Offered by the College of the North Atlantic.

</tbody>
</table>

one of the following streams:

**Biology Stream**

- Biology 2010, 2122
- the former Chemistry 2300 or 2440 or 2400/2401

- Environmental Science 3110, 3130, 3131, 4132, 4140 (or an equivalent field course)

- 6 credit hours from Environmental Science 4069, 4131, 4133, 4240, 4479

- 3 credit hours in an additional science or statistics laboratory course at the 2000 level or higher, excluding Environmental Science core courses

**Chemistry Stream**

- Chemistry 2210, the former 2300, 2400, 2401

- Environmental Science 2261, 3210, 3211, 3260, 3261, 4230

- 6 credit hours from Environmental Science 4069, 4131, 4240, 4249, 4479
### 7.4.5 Bachelor of Science with Major in General Science

Students completing the Major in General Science will complete a General Science Core. In addition, they will complete a minimum of 24 credit hours (or 18 credit hours in the case of Mathematics) in each of three streams chosen from Biology, Chemistry, Earth Systems, Mathematics or Physics. A student may not use the same course to satisfy the requirements of more than one stream. Students planning their course selection should be aware of the fact that most senior level science courses have one or more specified prerequisites.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 9 Bachelor of Science with Major in General Science.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

</tr>
</tbody>
</table>

#### General Science Core

- Mathematics 1000, 1001
- Physics 1050 (or 1020), 1051 (or 1021). Students in the Physics Stream require Physics 1050, 1051.
- Science 4000, 4950

#### General Science Streams

- 24 credit hours in each of three streams, chosen from the following list of courses:
  - **Biology:**
    - Biology 1001, 1002
    - Eighteen credit hours from Biology 2010, 2122, 2210, 2250, 2600, 3053, Environmental Science 3072, 3110, 3130, 3131, 4140 (or equivalent field course) where at least 6 credit hours must be beyond the 2000 level.
  - **Chemistry:**
    - Chemistry 1001, and 1200 (or equivalents), 2210, 2301 or 2302, 2400 and 2401, another 6 credit hours from Environmental Science 3210, 3211, 4240
  - **Earth Systems:**
    - Earth Sciences 1000, 1001 or 1002
    - Any 18 credit hours (six courses) from the following list, at least 6 credit hours of which are beyond the 2000 level: Environmental Studies 2000, 3001, Environmental Science 2360, 2369, 2370, 2371, 2430, 2450, 3072, 3470, 4069, 4369, 4479, Earth Sciences 2150, 3811.
  - **Mathematics:**
    - Mathematics 1000, 1001, 2000, 2050, 2320
    - Nine additional credit hours beyond the 1000 level chosen from Mathematics or Statistics, at least 6 which must be beyond the 2000 level.
  - **Physics:**
    - Physics 1050, 1051, 2056, 2820, 3060, 3220
    - Two of Physics 2053, 2151, 2400, 2553, 3160, 3180, Earth Sciences 2150, Environmental Science 2430, 2450, 3470, 4479
7.4.6 Bachelor of Science with Major in Physics

www.grenfell.mun.ca/physics

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under Table 10 Bachelor of Science with Major Physics and Table 11 Suggested Program of Study for the Bachelor of Science with Major in Physics.
- A student must complete Core Program Requirements as outlined under Grenfell Campus Core Program Requirements.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

Mathematics 1000, 1001, 2000, 2050, 2260 (or the former Mathematics 3260), 3202. Since Mathematics 2000 is required for a number of upper-year Physics and Mathematics courses, a student not completing Mathematics 1001 in first year will require more time to complete the degree. A student who has completed Mathematics 1000 and Physics 1020 with a minimum grade of 65% may enrol in Physics 1051. Taking the sequence Physics 1020, 1021, and 1051 will increase the number of credit hours needed to complete the degree.

Physics 1050 (or 1020), 1051, 2053, 2056, 2400 or 2151, 2820, 3060, 3061, 3220, 3400, 3650, 4100, 4880, 4950. It is recommended that students complete Chemistry 1200 and 1001. A student who has completed Mathematics 1000 and Physics 1020 with a minimum grade of 65% may enrol in Physics 1051. Taking the sequence Physics 1020, 1021, and 1051 will increase the number of credit hours needed to complete the degree.

9 additional credit hours in Physics chosen from Physics 3160, 3180, 3250, 3230, 3820.

Students for the Bachelor of Science degree offered by the School of Science and the Environment may complete a minor offered by the School of Science and the Environment, the School of Arts and Social Science or the School of Fine Arts. See Table 19 Minor Programs Offered by the School of Arts and Social Science, or from Table 5 Minor Program Offered by the School of Fine Arts, or from Table 12 Minor Programs Offered by the School of Science and the Environment.
7.5 Bachelor of Nursing (Collaborative)
Information regarding program requirements for the Bachelor of Nursing (Collaborative) degree program is located at the School of Nursing, Program Regulations, Bachelor of Nursing (Collaborative) Program - Western Memorial Regional Hospital.

8 Honours Degrees
Programs are offered leading to the Honours Degrees of Bachelor of Arts, Bachelor of Business Administration, and Bachelor of Science.

An Honours Bachelor of Arts or Bachelor of Science degree requires, over and above the requirement of the General degree, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program. The Honours Degree of Bachelor of Arts is available in Psychology and the Honours Degree of Bachelor of Science is available in Environmental Science and Psychology.

An Honours Bachelor of Business Administration signifies superior academic achievement.

8.1 Admission and Registration for Honours Bachelor of Arts or Bachelor of Science Degrees
1. Admission to the Honours degree is competitive and limited, depending upon available resources. Students should consult the criteria established for the program in question. To be considered for admission to an Honours program a candidate shall complete an "Application For Admission to the Honours Program" form. The application must be approved by the Program Chair of the Major before the student can be admitted to the program.

A candidate who wishes to enter an honours program is strongly advised to consult the Program Chair at the earliest possible date, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.

2. Students who have been awarded the General Degree of Bachelor of Arts or Bachelor of Science at Grenfell Campus may convert it to an Honours Degree of Bachelor of Arts or Bachelor of Science by following procedure outlined in 1. above.

3. Before registering for any semester or any session, the candidate is strongly advised to consult with the Program Chair on the student's choice of courses. Failure to comply with this requirement may result in denial of access to certain courses.

8.2 Admission and Registration for Honours Bachelor of Business Administration Degree
Students do not apply for admission to this program but rather must indicate their desire to be considered for the Bachelor of Business Administration (Honours) by the appropriate deadline date to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at www3.mun.ca/admit/bwbkbibs.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

8.3 Course Requirements for Honours Bachelor of Arts or Bachelor of Science Degrees
Students for the Honours Degree of Bachelor of Arts or Bachelor of Science shall complete a program of studies which shall consist of not fewer than 120 credit hours subject to the following regulations:

1. All students are required to complete the Core Program requirements governing the Bachelor of Arts and Bachelor of Science degrees at Grenfell Campus.

2. All students must also submit an Honours thesis or dissertation on an approved topic which may be followed by an oral examination thereon. Two copies of the Honours thesis/dissertation must be submitted to the University Library upon completion. All Honours theses/dissertations in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances which must be approved by the Academic Studies Committee. Copyright remains with the author. A signed release form must accompany a thesis or dissertation when it is submitted to the University Library.

3. Further courses shall be chosen:
   a. minimum 60 credit hours in the major and, where applicable, not fewer than 24 credit hours in the minor; and
   b. courses to make up a minimum of 120 credit hours, other than those required for the Core Program, major and minor, shall be chosen as follows:
      i. any courses in Arts, Science, Social Science and Fine Arts
      ii. up to 15 credit hours in other subject areas.

8.4 Course Requirements for Honours Bachelor of Business Administration Degree
A student must meet all the regulations governing the General Degree of Bachelor of Business Administration and Academic Standing for Honours Bachelor of Business Administration Degree.

8.5 Program Regulations for Honours Bachelor of Arts or Bachelor of Science Degrees
Students for Honours degrees must comply with such additional requirements of the appropriate Program(s) as approved by the Senate and printed in the University Calendar.

8.6 Program Regulations for Honours Bachelor of Business Administration Degree
A student must meet all the regulations governing the General Degree of Bachelor of Business Administration.
8.7 Academic Standing for Honours Bachelor of Arts or Bachelor of Science Degrees

In order to be considered for graduation with an Honours degree, a student shall obtain:

1. A grade of 'B' 70% or better, or an average of 75% or higher in the courses that comprise the minimum number of credit hours in the Honours subject(s) prescribed by the program concerned as outlined under the regulations governing specific Honours degree programs, excluding 1000-level courses. Students who wish to fulfill this requirement using repeated or substituted courses must obtain approval of the Program Chair and the Academic Studies Committee. The Honours thesis or dissertation may not be repeated or substituted. A grade of 70% or better must be obtained in the Honours dissertation; and

2. An average of at least 2.75 points per credit hour in the courses required for the degree. (see UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate, Graduation), for explanation of the point system.

For information regarding classification of degrees see UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate, Graduation).

8.7.1 Classification of Degrees

1. If a student's general average is 3.25 points or better per credit hour in required courses and the average is 3.5 points or better per credit hour in the courses in the Honours subject (excluding 1000-level courses), the student shall be awarded an Honours degree with First Class standing.

2. If a student fulfills the conditions of Academic Standing above but not of Regulation 1. under Classification of Degrees, the student shall be awarded an Honours degree with Second Class standing.

3. No classification will be given to the degree awarded a student who has completed fewer than one half of the courses required for the degree at this University, or who has completed fewer than one half of the courses required for the degree at this University since 1959. All students for such degrees shall, however, fulfill the condition of Academic Standing above on the courses taken at this University since September 1959 in order to qualify for the degree.

4. A declared student for an Honours degree who fails to attain the academic standing specified in Academic Standing above but fulfills the academic requirements for a General degree shall be awarded a General degree, the classification of which shall be determined in accordance with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate, Graduation).

8.8 Academic Standing for Honours Bachelor of Business Administration Degree

Students are not permitted to repeat or substitute courses for the purposes of meeting the criteria below.

A declared student for an Honours degree who fails to fulfill the criteria below but fulfills the requirements for the general degree will be awarded the general degree of Bachelor of Business Administration.

In order to be considered for graduation with an Honours degree, a student shall obtain:

1. a minimum overall average of 75% in the courses prescribed in Table 10 Bachelor of Business Administration and

2. obtain a minimum overall grade point average of 3.25 in the 120 credit hours required for the degree.

8.9 Honours in Environmental Science (B.Sc.)

8.9.1 Course Requirements for Honours in Environmental Science (B.Sc.)

1. Students must meet the General Regulations for Grenfell Campus Bachelor of Science degree.

2. Students must complete 75 credit hours as follows:

   a. the Environmental Science Core requirements as outlined under Bachelor of Science with Major in Environmental Science.

   b. the course requirements of a specific stream as outlined under Bachelor of Science with Major in Environmental Science.

3. Students must complete 3 additional credit hours in courses at the 4000 level. These courses normally will be drawn from the student's honours stream as follows:

   a. For the Honours Bachelor of Science in Environmental Science (Biology), a further course chosen from: Environmental Science 4069, 4131, 4133, 4240, 4479

   b. For the Honours Bachelor of Science in Environmental Science (Chemistry), a further course chosen from: Environmental Science 4069, 4131, 4240, 4249, 4479

Students, in close consultation with a faculty advisor and the agreement of the Chair of the Program, may select fourth-year honours requirement courses in place of those required above, so long as such selections are consistent with the Major to which they are added. Such honours selections will be subject to approval by the Academic Studies committee.

4. Honours graduates of the Environmental Science Program will have also completed a two-semester research project consisting of a research proposal and literature review course (Environmental Science 4951) and a research project course (Environmental Science 4959).

5. In order to be considered for graduation with an Honours degree, the candidate must satisfy the regulations regarding Academic Standing as specified under Honours Degrees.

Courses used to calculate the academic standing as outlined under Honours Degrees include all required Environmental Science and Chemistry courses for the Chemistry stream students and all required Environmental Science and Biology courses for the Biology stream students, excluding, in both cases, 1000 level courses.

More specifically, courses normally used for calculations would be:

**Biology stream**

</tr>
</tbody>
</table>

For information regarding classification of degrees see UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate, Graduation).
8.9.2 Honours Dissertation for Honours in Environmental Science (B.Sc.)

The honours project sequence (Environmental Science 4951 and 4959) involves the production of an honours dissertation. This dissertation will be evaluated by a three member committee that includes the dissertation supervisor(s) and that is approved by the Environmental Science faculty unit.

8.10 Honours in Psychology

The Honours B.A. and B.Sc. degrees in Psychology offer greater concentration in the discipline and also require a higher level of academic achievement than is required for the completion of a degree. The Honours degrees in Psychology at Grenfell Campus are 120 credit hour programs normally requiring four years for completion (See Honours Degrees).

8.10.1 Course Requirements for Honours in Psychology

Students must meet the General Regulations for Grenfell Campus Bachelor of Arts or Bachelor of Science degree. Students must also complete:

1. Psychology 1000, 1001, 2025, 2125, 2225, 2425, 2825, 2925, 2950, 3950, 4910, 4925;
2. 15 credit hours from Psychology 3025, 3040, 3125, 3126, 3225, 3226, 3325, 3425, 3525, 3625, 3626, 3627, 3628, 3725, 3825; and
3. a two-semester research project, Psychology 4951 and 4959.

Students for the Bachelor of Science (Honours) degree in Psychology shall also complete an additional 27 credit hours as follows:

1. 6 credit hours in Mathematics, which must include Mathematics 1000;
2. Biology 1001 and 1002;
3. Chemistry 1200 and 1001 OR Physics 1020 (or 1050) and 1021 (or 1051); and
4. 9 credit hours at the 2000 level or above (two courses of which must be laboratory courses) in one of the following subjects: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science or Physics.

In order to be considered for graduation with an Honours degree, the candidate must satisfy the regulations regarding Academic Standing as specified under Honours Degrees.

Students completing this program cannot receive credit for Psychology 2920.

8.10.2 Honours Thesis for Honours in Psychology

The Honours project sequence (Psychology 4951 and 4959) involves the production of an Honours thesis. This thesis will be evaluated by the thesis supervisor and an additional faculty member selected by mutual consent of the candidate and the supervisor.

9 Promotion Regulations

For all programs students must meet the meet the general academic regulations (undergraduate) of the University and all general and program regulations of Grenfell Campus. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate). In addition, student completing the Bachelor of Fine Arts (Theatre) or the Bachelor of Fine Arts (Visual Arts) must fulfill the promotion regulations outlined below as appropriate.

9.1 Bachelor of Fine Arts (Theatre)

9.1.1 Academic Performance

1. Attendance and participation in all studio courses and production rehearsals is vital to the collaborative nature of the program of study in Theatre. Absence from classes or rehearsals of any one student could jeopardize a production, the proper dissemination of practical skills and the overall safety of the students. Therefore attendance at all studio classes, rehearsals and crew calls will be compulsory.
2. A student who has failed a studio course shall not take more advanced courses in that discipline until the failed course has been satisfactorily completed.
3. A student shall complete all 1000 level Theatre courses before advancing to any 2000 level Theatre course.
4. A student whose average in the Theatre courses for the Bachelor of Fine Arts degree falls below 65 percent in any semester will be placed on probation within the program. A student placed on probation at the end of the final semester of the Theatre program will not be recommended for graduation.
5. A student will be required to withdraw from the program if the candidate's average in Theatre courses falls below 65 percent in each of two consecutive semesters of enrollment in the program.
6. A student who has withdrawn or who have been required to withdraw from the Bachelor of Fine Arts (Theatre) program and who wishes to re-enter the program must re-apply in competition after a lapse of two semesters by April 30 for the upcoming Fall semester, or by August 30 for the upcoming Winter semester.
7. A student who has been required to withdraw twice from the Bachelor of Fine Arts (Theatre) program shall be ineligible for further admission.
8. The Bachelor of Fine Arts (Theatre) program is intended for full-time students only. Students are strongly advised to take the full course load as prescribed each semester and so progress through the degree in clearly defined blocks of courses.

9.2 Bachelor of Fine Arts (Visual Arts)

9.2.1 Academic Performance

9.2.1.1 Attendance

1. Attendance at all studio courses is considered vital to the program and will be required. Failure to attend may result in the student
being dropped from the course.

2. A student whose average in Visual Arts courses falls below 65% in any semester will be placed on probation by the Visual Arts program.

3. A student registered beyond the first semester of the Foundation Year will be required to withdraw from the program if:
   a. The student's cumulative average in Visual Arts courses required for the program falls below 65%. or
   b. The student's average in Visual Arts courses falls below 65% in each of two consecutive semesters of enrollment in the program.

4. A student will be denied graduation if, at the end of the final semester of the Visual Arts Program:
   a. The student's cumulative average in Visual Arts courses required for the program falls below 65%. or
   b. The student's term average in Visual Arts courses falls below 65% in each of the last two consecutive semesters of enrollment in the program.

A student denied graduation for either of these reasons will be permitted to register for Visual Arts courses without a waiting period and re-application, and is not bound by Regulation 7 below.

5. A student who has voluntarily withdrawn from the Bachelor of Fine Arts (Visual Arts) program and who wishes to re-enter must re-apply in competition by March 1st for the upcoming Fall semester, or by August 30th for the upcoming Winter semester.

6. A student who has been required to withdraw from the Bachelor of Fine Arts (Visual Arts) program and who wishes to re-enter must re-apply in competition after a lapse of two semesters by March 1st for the upcoming academic year.

7. A student who has been required to withdraw twice from the Bachelor of Fine Arts (Visual Arts) program shall be ineligible for further admission to the Visual Arts Program.

9.2.1.2 Calculation of Visual Arts Average
1. Promotion status within the Visual Arts program will be determined by semester or cumulative average of Visual Arts courses only.
2. A failed Visual Arts course grade will be used to calculate the cumulative average for Visual Arts courses and the semester average for Visual Arts courses for the semester in which the fail occurs.
3. A failed visual arts course will not be used in calculating the cumulative average for Visual Arts courses beyond the semester in which it occurred but will remain on the academic transcript.

9.2.1.3 Probationary Promotion
A student whose semester average in Visual Arts courses falls below 65% will be placed on probation by the Visual Arts program.

9.2.1.4 Promotion Denied
1. A student registered beyond the first semester of 1000 level Visual Arts courses will be required to withdraw from the program if:
   a. the student's cumulative average in Visual Arts courses required for the program falls below 65% or
   b. the student's semester average in Visual Arts courses falls below 65% in each of two consecutive semesters of enrollment in the program.

9.2.1.5 Graduation Denied
1. A student will be denied graduation if, at the end of the final semester of the Visual Arts Program:
   a. the student's cumulative average in Visual Arts courses required for the program falls below 65% or
   b. the student's semester average in Visual Arts courses falls below 65% in each of their last two consecutive semesters of enrollment in the program.

A student denied graduation for either of these reasons will be permitted to register for Visual Arts courses without a waiting period and re-application, and is not bound by Regulation 7 under Attendance above.

10 Graduation
Upon meeting the qualifications for any of the programs listed above a student must apply by the appropriate deadline date to graduate on the prescribed "Application for Graduation " form. This form may be obtained on-line at the Memorial Self Service at www3.mun.ca/admit/twbkwbis.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

11 Waiver of Regulations
Every student has the right to request waiver of Grenfell Campus regulations. Students wishing waiver of University academic regulations should refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations.

11.1 General Information
- Grenfell Campus reserves the right in special circumstances to modify, alter, or waive any Grenfell Campus regulation in its application to individual students where merit and equity so warrant in the judgment of the Academic Studies Committee of the Campus.
- All requests, other than requests for waiver of a prerequisite or co-requisite of a course, must be submitted to the Academic Studies Committee of the Campus for consideration. Waiver of a course prerequisite or co-requisite may be granted by the course instructor.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

12 Appeal of Decisions
Any student whose request for waiver of Grenfell Campus regulations has been denied has the right to appeal. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions.
13 Course Descriptions

In accordance with Senate's Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School. Prerequisites may be waived by the Head/Program Chair of the course area in question.

Upon the recommendation of the appropriate Program Chair(s), any Major requirements may be waived by the Academic Studies Committee.

Some of the courses in this section of the Calendar are available only at Grenfell Campus. Students who choose to transfer from Grenfell Campus to the St. John's campus should see their faculty advisor to determine the extent to which such courses can be applied to their new program.

13.1 Anthropology

Anthropology 1030 and Anthropology 1031 or an equivalent course or courses are required of all students wishing to concentrate in anthropology.

The following courses, cross-listed with the Department of Sociology and identified by the prefix "S/A", are also taught at the introductory level: 2200, 2210, 2220, 2230, 2240, 2260, 2270, 2290, and 2300. These courses can be taken as first courses or may be taken following an Anthropology introductory course.

Anthropology courses are designated by ANTH.

1031 Introduction to Anthropology is a general introduction to Anthropology emphasizing different forms of society and culture. Cultures within and outside the Western tradition will be examined, ranging from small-scale to more complex pre-industrial societies. CR: the former ANTH 1000 or 2000

2200 Communities (S/A 2200) is an interdisciplinary examination of the concept of Community. Readings will include community studies from North America and Europe.

2210 Communication and Culture (S/A 2210) is an examination of verbal and non-verbal systems of communication, and the influence of language on human cognition.

2220 Labrador Society and Culture examines the Sociology and Anthropology of Labrador. The focus is on social and cultural aspects of contemporary Labrador.

2230 Newfoundland Society and Culture (S/A 2230) (same as Folklore 2230) explores the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland. CR: Folklore 2230

2240 Canadian Society and Culture (S/A 2240) is a descriptive and analytic approach to the development of Canadian society and culture.

2260 War and Aggression (S/A 2260) is a critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.

2270 Families (S/A 2270) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

2280 The City (S/A 2280) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

2300 Newfoundland Folklore (same as Folklore 2300) is a survey of the various types of Folklore: tale, song, rhyme, riddle, proverb, belief, custom, childhood and others, with stress on their function in the Newfoundland community. Individual collection and analysis of materials from the students' home communities, supplemented by data from the Memorial University of Newfoundland Folklore and Language Archive. CR: the former Folklore 3420, Folklore 2300 PR: Folklore 1000 or ANTH 1031

2350 Religious Institutions (S/A 2350) is a comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization. CR: Religious Studies 2350 UL: not applicable towards the Major or Minor in Anthropology

2410 Classics in Social and Cultural Anthropology is an examination of selected milestone monographs, ground-breaking studies for subdisciplinary specialties and major syntheses.

2411 Anthropologists in the Field base many of their ideas on experiences they have while living in other cultures. This course examines the human relationships through which anthropologists explore cultures and how in turn these relationships affect the anthropologists and the development of their discipline.

2412 Threatened Peoples is an examination of key social and cultural factors involved in the global extinction of small-scale societies; the intrusive influences that jeopardize small-scale societies, such as disease, economic and military incursion; the role of international non-governmental agencies in aid of threatened peoples; and the role of the anthropologist in this human crisis.

2413 Modern World Cultures is an examination of significant studies of 20th century populations and their implications for understanding the human condition.

2500 Folk Literature (same as Folklore 2500) is an examination of the major genres of folk literature: folk narrative, folk poetry and song, folk drama, and the traditional generic forms within folk speech. An introduction to the textual, comparative and contextual methods of analysis. The literature discussed will be international in scope. CR: Folklore 2500, the former Folklore 3400, English 3400, Sociology/Anthropology 3400. PR: Folklore 1000 or ANTH 1031

3053 Anthropology of Religion is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual. CR: Religious Studies 3053

3080 The Third World is an examination of the anthropology of the Third World. The course considers perspectives on peasantry, including such topics as underdevelopment, land reform, hunger, political and social movement.

3083 Cultural Crises and the Environment is an examination of social and cultural aspects of dilemmas in the use of renewable and non-renewable resources such as animals, arable land, forests, fisheries, air, water, fossil fuel, and nuclear energy. Special attention to Third World and marginal populations.

3140 Social Movements (S/A 3140) is an examination of social movements which challenge prevailing social institutions and cultural values. Social movements considered may include religious cults and sects, millenarian movements, attempts at utopian and communal living, feminism, labour and revolutionary movements.

3210 Persistence and Change in Rural Society (S/A 3210) assesses the social and cultural significance of the rural experience in the face of expanding urbanism. Topics may include (a) the nature of rural society in Canada, (b) similarities between Canadian and European rural society, (c) utopian and anarchist movements in rural life, and (d) reaction of agricultural populations to external influence.

3314 Gender and Society (S/A 3314) is an examination of biological, psychological, social and cultural aspects of gender, with an emphasis upon contemporary directions of change in sex roles.

3520 Aboriginal History to 1763 (same as Archaeology 3520 and History 3520) examines Aboriginal history in North America from before European contact to the Royal Proclamation in 1763. Particular attention will be paid to historical encounters framed by first contacts, cultural exchange, trade, disease, religious encounters, conflict and diplomacy, and territorial encroachment. CR: Archaeology 3520 and History 3520

3525 Aboriginal History from 1763 (same as Archaeology 3525 and History 3525) examines the history of Aboriginal peoples in North America from 1763 to the twentieth century. Particular attention will be paid to Indigenous-settler relations, including Aboriginal policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization. CR: Archaeology 3525 and History 3525

4071 Social and Cultural Aspects of Health and Illness (S/A 4071) covers topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships. Special attention will be paid to Indigenous-settler relations, including Aboriginal policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization. CR: Archaeology 3525 and History 3525

4072 Social and Cultural Aspects of Death (S/A 4072) covers topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of
survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the instructor.

4440 Music and Culture (S/C 4440) (same as Folklore 4440, Music 4040, the former Music 4440) explores traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.
CR: Folklore 4440, Music 4040, the former Music 4440

13.2 Biochemistry

Biochemistry courses are designated by BIOC.

1430 Biochemistry for Nurses is an introduction to the chemistry and structure-function relationships of carbohydrates, lipids and proteins. Basic metabolism of carbohydrates and fats, with emphasis on the biochemical fluctuations that occur in human health and disease. A brief introduction to molecular genetics. This course may not be used for credit to fulfil the requirements for a major in the Department of Biochemistry. Entry into this course is restricted to students in the Bachelor of Nursing (Collaborative) Program. Prospective fast-track program students should consult with the School of Nursing concerning admission to this course.
CR: the former BIOC 2430
LC: 4
PR: Level 3 Chemistry or Chemistry 1010 or Chemistry 1810 or equivalent

13.3 Biology

Students may obtain credit for only 6 1000-level credit hours in Biology. Normally, these courses will be Biology 1001-1002, which are prerequisite to all higher courses in Biology, except where noted below.

Biology courses are designated by BIOL.

1001-1002 Principles of Biology is an introduction to the science of Biology, including a discussion of the unity, diversity and evolution of living organisms.

PR: BIOL 1001 is a prerequisite for BIOL 1002; Science 1807

2100 Biology of Plants is a study of the structure, function and reproductive Biology of plants, with emphasis on the vascular plants, and on their relationship to environment and human activities.

PR: BIOL 1001, BIOL 1002, and Chemistry 1001; Science 1807

2040 Modern Biology and Human Society I examines various aspects of the human body, and the implications of modern biological research for human beings. Topics include cancer; diet and nutrition and associated diseases; circulatory disease, immunity, human genetics, biorhythms, new diseases, genetic engineering and reproductive engineering.
UL: cannot be used towards the Minor, Major or Honours programs in Biology

2041 Modern Biology and Human Society II examines the origins and consequences of the environmental crisis of the 20th century. Topics include the population explosion, energy, material cycles, air and water and land pollution, global food supplies, the fisheries, wildlands, renewable and non-renewable resources, environmental ethics.
UL: cannot be used towards the Minor, Major or Honours programs in Biology

2122 Biology of Invertebrates is a study of the invertebrates with emphasis on structure and function, adaptations and life histories. The laboratories will present a broad survey of the major invertebrate groups.
CR: the former BIOL 3122

2120 Biology of Vertebrates is a study of the vertebrates, with emphasis on structure and function, adaptations and life histories. The laboratories will present a broad survey of the major invertebrate groups.
CR: the former BIOL 3210

2250 Principles of Genetics is an introduction to Mendelian and molecular genetics. Phenotype and genotype, behaviour of alleles in genetic crosses, chromosome theory of inheritance, genetic linkage, molecular Biology of DNA, RNA and protein, molecular basis of mutation, recombinant DNA, applications of genetic biotechnology.
CR: Chemistry 2440 or Chemistry 2400

2600 Principles of Ecology is a conceptual course introducing the principles of ecology, including theoretical, functional and empirical approaches.
CR: the former BIOL 3600
LH: 3
PR: BIOL 1002; Science 1807

3053 Microbiology for Nurses is a course on the fundamentals of microbiology with an emphasis on medical microbiology. The course will include topics such as: host responses to infections, human diseases caused by microorganisms, and the control and exploitation of microorganisms. Entrace is restricted to Nursing students in the Bachelor of Nursing (Collaborative) program.
LH: 3
PR: Science 1807
UL: cannot be used as one of the required courses for the Minor, Major, or Honours in Biology, nor is it acceptable for any of the joint programs between Biology and other disciplines

13.4 Business

Enrolment in some Business courses is limited and first priority will be given to students registered in Grenfell Campus’s Business Administration programs.

Business courses are designated by BUSN.

13.4.1 Core Program Course Descriptions

1010 Introduction to Business provides students with an overview of business in the Canadian environment, with a focus on the economic and business systems, as well as major social, technological, and global trends. The course introduces students to fundamental concepts related to many functional areas of business, such as human resource management, marketing, production, operations management, accounting, and financial management. Emphasis is placed on relating the course material to current events in the business world, as well as helping students acquire critical and analytical thinking skills.
CR: Business 1000 and the former Business 2001
UL: may be used in place of Business 1000 in programs offered by the Faculty of Business Administration at the St. John’s Campus

1020 Introduction to Entrepreneurship is designed to give students a broad understanding of the field of entrepreneurship, the role that entrepreneurship plays in society, and the importance of small business in Canada. Topics will include the nature and theories of entrepreneurship, the characteristics and behaviours of entrepreneurs, and the entrepreneurial process in small and large firms. Students will get to think and act in a creative manner, engage with local entrepreneurs, and evaluate their own entrepreneurial skill set. Students will learn entrepreneurial, technical and communication skills that will be useful in any organizational setting.
CR: Business 1600

2020 Business and Professional Communication focuses on the development of written, oral, and visual communication skills for modern professional environments. Students will learn the fundamentals of business research, analytical thinking, presentation design and delivery, professional document creation, and efficient writing. This course will introduce theoretical background and provide the opportunity for students to develop their expertise in teamwork, critical thinking, writing and presentation skills.
CR: Business 2000, Business 2010
PR: 6 credit hours in first-year English

2100 Financial Accounting I introduces the concepts of financial accounting using the Canadian framework. Topics include the nature of accounting, the accounting cycle, and preparation of financial statements: balance sheet, income statement, statement of owner’s equity and statement of cash flow. Specific topics include accounting for assets as well as current and long-term liabilities in both service and merchandising operations.
CR: Business 1101, Business 2102, the former Business 3100, the former Business 2100

2110 Managerial Accounting I introduces students to the concepts of preparing and using financial data for management decision-making. Topics include job costing, process costing, activity-based costing, cost-volume-profit analysis, budgeting, and variance analysis.
CR: Business 2101, Business 2102, the former Business 4100
PR: BUSINESS 2100 or Business 1101

2200 Marketing I introduces students to marketing strategy development, including a consideration of a firm’s marketing-specific goals, strengths, weaknesses, and opportunities, environmental and competitive analysis, marketing research, consumer behaviour, and market segmentation, targeting and positioning. Students will assess and develop marketing strategies and action plans that address strategic marketing challenges in
these areas.

CR: Business 1210, the former Business 1201, the former Business 2201, the former Business 6100 or BUSN 1020
PR: BUSN 1010 or Business 1000 or BUSN 1020

2250 Marketing II introduces students to practical decision making based on the concepts, analyses, and activities that comprise marketing tactics: product management, pricing considerations, promotional strategies, channels of distribution, customer relationship marketing, implementation, evaluation, and control.

CR: Business 2210, the former Business 1201, the former Business 2201, the former Business 3200
PR: BUSN 2200 or Business 1210

2300 Organizational Behaviour highlights the contribution of the applied behavioural sciences to the study of work in today’s organizations with a particular focus on individual and group processes. Students will examine topics in personality, perception, motivation, communication, group dynamics, leadership, workforce diversity, conflict management and organizational culture.

CR: Business 3310, the former Business 2301, the former Business 4300

2310 Business Leadership further develops concepts from Organizational Behaviour and provides students with an opportunity to explore various theories of leadership in the context of today’s business environment. Students will consider topics related to effective leadership and management that may include an examination of leader behaviour, attitudes and style, the role of self-awareness and emotional intelligence, communication style, followership, employee motivation and engagement, power and influence tactics, and ethics and social responsibility in decision making.

CR: the former Business 3350
PR: BUSN 2300 or Business 3310 or the former Business 2301

3010 Organizational Theory emphasizes the fundamental concepts of organizational theory: the nature of organizational structure and its determinants in a complex global economy, the boundaries and impacts of organizational environments, measures of organizational effectiveness, and the roles of organizational learning, culture, innovation, development and change in today’s organizational context. By understanding the underlying theory of these organization-level phenomena, students will have an opportunity to critically apply course concepts to their own professional experiences.

CR: Business 5301, the former Business 5300
PR: BUSN 2300 or Business 3310 or the former Business 2301

3030 Canadian Business Law I introduces the student to the Canadian legal system and substantive areas of the law that are of particular relevance to the business setting. Topics include torts, negligence, contracts, legal structures for business formation, employment and property law. Emphasis will be placed on risk management. The course is taught through a variety of means used to improve the student’s critical thinking skills.

CR: Business 4000, the former Business 3000
PR: completion of at least 60 credit hours

3300 Human Resource Management provides background in the theory and practice of human resource management (HRM) in modern organizations. Students will learn the fundamentals of traditional human resource functions that focus on forecasting, attracting, retaining, developing, evaluating, and compensating employees. Contemporary issues in HRM will also be considered.

CR: Business 4320
PR: BUSN 2300 or Business 3310

3410 Operations Management teaches fundamental concepts regarding the nature, design and management of the operations function of organizations. Focus will be on capacity planning, forecasting, quality management, inventory management, and material requirements planning.

CR: Business 3401, the former Business 5400
PR: Statistics 2500

3500 Financial Management I introduces the concepts of financial management in Canadian capital markets. Focus will be on financial analysis and forecasting; working capital management; time value of money; and financing options.

CR: Business 4500, the former Business 4110
PR: Economics 1010 (or the former 2010), and Statistics 2500

3600 Enterprise Development explores and examines the venture creation process. Emphasis is on the critical role of the entrepreneur and the underlying attributes and norms guiding the steps in creating a new business venture. Students will have the opportunity to experience closely the entrepreneurial process, as well as gain the skills and competencies required in developing a viable business plan and negotiating for start-up financing.

CR: Business 5600, the former Business 5500, the former Business 7030
PR: BUSN 1020 or Business 1600, BUSN 2100 or Business 1101, and BUSN 2250 or Business 2210

4010 Strategic Management teaches students how to analyze and evaluate an organization’s corporate strategies from the perspective of the CEO. This capstone course integrates and synthesizes knowledge acquired through the program and applies skills developed in all functional areas of business. Students work to identify, diagnose and recommend appropriate action for challenges faced in various types of business organizations. Topics include the role of multinational corporations in economic development, market entry strategies for small- and medium-sized enterprises, the challenges of managing economic, cultural, and technological changes and differences, the role of international investment and FDI, as well as international business strategies required to compete in today’s highly interconnected world. Students will gain the skills to function within the international and global business context.

CR: Business 5302, the former Business 7302
PR: BUSN 1010 or Business 1000, Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020)

4070 Change Management and Implementation examines the current thinking and research regarding the strategic management of change. Change in a variety of organizational settings will be introduced and examined with respect to identifying barriers to change, using change agents, creating learning environments, implementing, and evaluating. The course will focus on the leadership, implementation and strategies for developing a culture for change.

PR: BUSN 4010, or Business 4050 and Business 7000

13.4.2 Business Electives Course Descriptions

2320 Workplace Skills offers students an opportunity to explore knowledge and practice skills that will enable them to professionally navigate many of the challenges in the workplace environment. Class participation forms a significant part of this course, and substantial amounts of classroom time will be devoted to role plays, case studies and group discussion.

PR: completion of at least 30 credit hours

2500 Personal Finance introduces the essentials of individual financial management. Students will further develop an understanding and skills in areas such as basic personal income tax, financial security, saving and investing, the use of credit, insurance, investments, and borrowing.

PR: 3 credit hours in Mathematics and completion of at least 30 credit hours

3060 Negotiation in Organizations teaches students strategies and skills for negotiating with various stakeholders in a variety of workplace settings. Students will gain an understanding of the current theory and research on negotiation, the course will focus on developing awareness and skills of the various aspects of the negotiation process. The course will include a practical component that will allow students to develop their negotiation skills.

PR: completion of at least 60 credit hours

3100 Intermediate Accounting I continues the study of financial accounting by focusing on specific topics such as current assets, long-term investments, capital assets, intangibles, financial assets and revenue recognition.

CR: Business 6100
PR: BUSN 2100 or Business 1101

3110 Intermediate Accounting II continues the study of financial accounting by focusing on specific topics such as long term debt, employee future benefits, shareholders’ equity, and financial statement presentation and analysis.

CR: Business 6110
PR: BUSN 2100 or Business 1101

3120 Taxation I is an introduction to the fundamentals and principles of the taxation system in Canada. Emphasis is placed upon the calculation of the tax liability of individuals and corporations.

CR: Business 6120
PR: BUSN 2100 or Business 1101, and BUSN 3030 or Business 4000

3220 Services Marketing explores the distinctive nature and characteristics of services, the unique opportunities and challenges associated with the marketing of services, the role of service providers in determining service quality and its connection to customer satisfaction, and the distinctions and connections between tangibles and intangibles. In addition to considering new services marketing requirements, an alternative approach to the traditional marketing mix, students will also examine how service marketing mix...
strategies vary in the context of for-profit and non-profit organizations. CR: Business 6230

PR: BUSN 2250 or Business 2210 or the former Business 2201

3230 Social Media Marketing examines the relevance and importance of social media in a contemporary marketing environment. Students will learn to apply and adapt traditional marketing strategy and tactics in a social media context and will gain practical experience through the development of an integrated social media strategy. CR: Business 2220, the former Business 6004, the former Business 6042, the former Business 6240

PR: BUSN 2250 or Business 2210 or the former Business 2201

3240 Understanding Consumer Behaviour considers the impact of consumer behaviour and the consumer decision making process on corporate and marketing strategy. Students will examine the complexity of consumer decision-making influence the purchase, consumption, and post-purchase behaviours of individuals including culture, reference groups, self-image, perception, personality and lifestyle. CR: Business 2210, the former Business 5200

PR: BUSN 2250 or Business 2210 or the former Business 2201

3320 Labour Relations introduces the structure and function of the Canadian labour relations system. Labour relations management in Canada is highlighted with emphasis on the players in the union environment, the collective bargaining process, the dispute resolution process and the overall administration of the collective agreement. CR: Business 4330 or the former Business 3320

PR: BUSN 1010 or Business 1000

3510 Financial Management II continues the concepts of financial management in Canadian capital markets. Focus will be on asset management, capital budgeting, valuation, dividend policy and extension of long-term financing options. CR: Business 5500, the former Business 5140, the former Business 7140

PR: BUSN 3500 or Business 4500

3610 Social Entrepreneurship examines the research and practice of social entrepreneurship. The course introduces students to the theories and models of social entrepreneurship and will also learn about the role and contribution of social entrepreneurship to society, define viable social enterprise concepts, and evaluate the characteristics of social entrepreneurs. PR: BUSN 1020 or Business 1600

3620 Franchising and Buying a Business introduces students to the concept of franchising and buying an enterprise. Topics include the nature of franchising in Canada, the characteristics of the franchisee-franchisor agreement, legal considerations, as well as policies and strategies in successful franchising. Students will also learn the important factors involved in buying and selling an enterprise, the valuation models to assess the value of a business, as well as the negotiation dynamics in the buying and selling process. CR: the former Business 6500

PR: BUSN 1020 or Business 1600

3800-3850 Special Topics is a range of special topics courses in Business. PR: successful completion of at least 60 credit hours is normally required

4020 Business Ethics and Corporate Social Responsibility acknowledges the complexities of ethical and socially responsible workplace decision making given the pressures and inter-relationships among business, government, society and the environment. Students will explore topics such as the social-economic business system, business ideologies, business ethics, social responsibilities of business, stakeholder and issues management, and sustainability. CR: BUSN 7010

PR: BUSN 3010 or Business 5501

4030 Canadian Business Law II expands upon the topics covered in Canadian Business Law I. The substantive areas of law from BUSN 3030 are considered at a more advanced level; additional topics include landlord and tenant, property, insurance and guaranties, sale of goods, mortgages and real estate transactions, the regulation of business, and international business transactions. Critical analysis is emphasized in this course. CR: Business 5000

PR: BUSN 3030 or Business 4000

4060 Managing Non-Profit Organizations explores the management of non-profit organizations in Canada. Students will learn what distinguishes the non-profit sector from traditional descriptions of business and government, with particular emphasis given to organizational structure, funding, and operations. Topics considered may include organizational strategy and governance, managing paid and non-paid human resources, fundraising and financial management, marketing and communications, and accountability. CR: BUSN 2250 or Business 2210, BUSN 2300 or Business 3310, BUSN 3300 or Business 4320, and BUSN 3500 or Business 4500

4080 Business in Film engages students to examine, reflect on and discuss the role of business and its evolution in society. Topics include business and its contribution to socio-economic and community development, the role of stakeholders, the nature of the corporation, the impact of change and management and change agents, and trends in functional areas of business. This seminar uses a combination of popular films, as well as documentaries to highlight issues, challenges, and opportunities in business administration from both a practical and an academic point of view. PR: completion of at least 90 credit hours

4120 Taxation II is a continuation of the study of the income tax system in Canada. Focus will be on tax planning for corporations and individuals, sales tax, succession and estate planning, partnerships, trusts, and deferred income plans. CR: Business 7150

PR: BUSN 3120 or Business 6120

4130 External Auditing introduces the theory and concepts of external auditing. Emphasis will be placed upon legal liability, materiality and risk, internal control, and audit evidence and strategy as well as the case studies of the control of specific business processes. CR: Business 6130

PR: BUSN 3100 or BUSN 3110 or Business 6100 or Business 6110

4210 Marketing Research is designed to help students develop an understanding of the value of marketing research in strategic decision making. Students will become familiar with different methods and tools for collecting, analyzing, and interpreting data in a marketing research context. CR: Business 2220, the former Business 6200

PR: Statistics 2500, and BUSN 2250 or Business 2210 or the former Business 2201

4230 International Marketing examines marketing in a global context with a particular focus on the strategic significance of the international dimensions on marketing efforts. Students will explore various marketing challenges around global marketing opportunities such as exporting and direct entry strategies, contending in unfamiliar competitive environments, navigating cultural, social and cultural and legal environments, and adapting the marketing mix and activities to suit specific foreign market needs. CR: Business 7240, the former Business 6001

PR: BUSN 2250 or Business 2210 or the former Business 2201

4210 Recruitment and Selection explores the role of recruitment and selection in the larger context of human resource management. Students will acquire the knowledge and skills needed to successfully design and implement strategic recruitment and selection initiatives in a variety of business situations. Topics may include the analysis of job requirements, legal considerations, selection criteria and methods, testing methods, interviewing techniques, and process evaluation. CR: Business 6312

PR: BUSN 3300 or Business 4320

4510 Investments is a study of capital markets and the financial services industry. Emphasis will be placed upon investment securities, risks, markets and mechanisms, and portfolio management for personal and institutional investments. CR: Business 6510, the former Business 6140

PR: BUSN 3500 or Business 4500

4610 Family Business Management focuses on introducing students to the theory and practice of family business issues, such as understanding the difference between family business and other types of businesses and examining the role of family and non-family members involved in the business. Other topics include understanding the succession planning process, learning to resolve and manage conflicts, and exploring the challenges of multigenerational businesses. CR: the former Business 6500

PR: BUSN 1020 or Business 1600

4660 Workplace Innovation discusses how organizations can use innovation to create a sustainable and competitive business. The course explores how organizational creativity is developed and studies both the drivers and barriers to managing employees through this process. Emphasis will be placed on the role of leadership in developing and maintaining innovation and its use in stimulating organizational growth. The course will focus on product, process and service innovation and consider innovation as an integral aspect of the core business functions. PR: completion of at least 90 credit hours

4800-4850 Special Topics is a range of special topics courses in Business. PR: successful completion of at least 90 credit hours is normally required

5010 Experiential Learning: Event Planning allows students to gain important event management, organizational and communication skills through the planning of one or more events on campus and throughout the greater community. PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5020 Experiential Learning: Field Study allows students to gain hands-on
experience through one or more field studies. Students may work with organizations such as communities, associations or businesses in various settings across Newfoundland and Labrador. Field study opportunities may include, for example, working from the Bonne Bay Marine Station.

PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5030 Experiential Learning: Internship places students in a business setting and provides the student with opportunities to use their business skills in a real business environment.

PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5040 Experiential Learning: Small Business Consulting allows students to gain hands-on experience by working with small businesses. Student groups will be involved in such projects as business plan writing, market research, market strategies, strategic analysis or other business-related functions.

PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5050 Experiential Learning: Student Leadership allows students to gain leadership and project management skills to empower fellow students and the community at large by assuming senior roles in student driven programs such as Enactus Grenfell.

PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

13.5 Chemistry

Attendance for all Chemistry Laboratory sessions is mandatory. Failure to attend may result in a failing grade or deregistration from the course.

Students are strongly advised to complete the Chemistry sequence appropriate to their stream (Chemistry 1200/1001 or 1010/1011 or 1011/the former 1031 or 1050/1051) on the campus they first attend prior to transfer to another campus. Consult the credit restrictions listed under the St. John's Campus Department of Chemistry section of the University Calendar.

Chemistry courses are designated by CHEM.

1001 General Chemistry II is rates of reaction, chemical equilibria, thermodynamics, and introduction to organic chemistry.

AR: attendance is required
CR: credit may be obtained for only one of the following pairs of courses:
   CHEM 1000 and CHEM 1001; CHEM 1200 and CHEM 1001
   LC: 4 including tutorials
   LH: 3
   PR: CHEM 1200 or equivalent; Science 1807

1200 General Chemistry I is atomic structure and bonding, stoichiometry, reactions in aqueous solutions, gases, energetics of chemical reactions, the periodic table, chemical bonding and molecular geometry, intermolecular forces. This introductory course is intended for students who have a knowledge of high school chemistry. This course is offered at Grenfell Campus only.

AR: attendance is required
CO: credit may be obtained for only one of the following pairs of courses:
   the former CHEM 1000 and CHEM 1001; CHEM 1200 and CHEM 1001
   LC: 4
   LH: 3
   PR: Science 1807

1810 Elements of Chemistry is matter, scientific measurement, atomic theory, the periodic table, chemical compounds and elementary bonding theory, the mole, chemical reactions, the chemistry of selected elements, gases, solutions, stoichiometry. This course is specifically intended for those who have no background in chemistry. This course is offered at Grenfell Campus only.

AR: attendance is required
CR: the former CHEM 1800
   LC: 4
   LH: 3
   PR: Science 1807

UL: may not be used as one of the Chemistry courses required for a B.Sc. Degree with a Specialization in Environmental Science at Grenfell Campus, nor for a Major or Honours in Chemistry, nor towards fulfillment of the 78 credit hours in science courses required for the B.Sc. degree on the St. John's campus.

1900 Chemistry in Everyday Life is a course that shows the relevance of chemistry in our daily lives. Following an introduction to atomic structure and chemical bonding, the course will focus on some of the following topics: organic chemistry and fuels; redox processes and batteries; acids, bases, and household cleaners; phases and detergents; the chemical components of foods; polymers and plastics; toiletries, and pharmaceuticals.

AR: Attendance requirement
CR: credit hours are 3 unless otherwise noted
CO: Co-requisite(s)
CR: Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed
LC: Lecture hours per week are 3 unless otherwise noted
LH: Laboratory hours per week
OR: Other requirements of the course such as tutorials, practical sessions, or seminars
PR: Prerequisite(s)
UL: Usage limitation(s)

UL: may not be used as one of the required courses towards a Minor, Major, or Honours in any science degree program

2210 Introductory Inorganic Chemistry focuses on fundamental concepts in the chemistry of s, p, and d block elements and their compounds. Emphasis will be placed on periodic trends in physical and chemical properties, molecular symmetry, molecular orbital diagrams, simple crystal structures, Lewis acid/base theory, and introductory coordination chemistry.

AR: attendance is required in the laboratory component of this course.

Failure to attend may result in a failing grade or deregistration from the course.

LH: 3
PR: Science 1807; minimum 65% in CHEM 1001 (or the former 1031) or a minimum 60% in CHEM 1051, Mathematics 1000

2301 Thermodynamics and Kinetics builds upon knowledge of physical chemistry from first year. It covers the three laws of thermodynamics for ideal and real systems as well as chemical kinetics. Topics in thermodynamics include the thermodynamics of ideal and real gases, phase transitions, and solutions; the Maxwell relations, equilibrium between phases, and in electrolyte solutions. The integrated rate laws for simple and complex mechanisms, and the temperature dependence of reaction rates in terms of kinetic molecular theory are some of the topics discussed in the kinetics section of the course.

AR: attendance is required in the laboratory component of this course.

Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 2300
LH: 3
PR: Science 1807; minimum 60% in CHEM 1051, or a minimum 65% in either CHEM 1001 or the former CHEM 1031: Mathematics 1001

2302 Quantum Chemistry and Spectroscopy examines the quantum mechanics of simple systems such as the particle in a box, the harmonic oscillator, linear rotor, and hydrogen-like atoms. Topics also include orbital quantum numbers, spin, many electron atoms, an introduction to quantum mechanical methods, the electronic structures of molecules, bonding, and symmetry. Furthermore, electronic, rotational, and vibrational spectroscopy will be discussed as well as modern applications of spectroscopy and lasers.

AR: attendance is required in the laboratory component of this course.

Failure to attend may result in a failing grade or deregistration from the course.

CO: Mathematics 2000 is recommended
CR: the former CHEM 3301
LH: 3
PR: Science 1807; minimum 65% in CHEM 1051, or a minimum 65% in either CHEM 1001 or the former CHEM 1031; Mathematics 1001 and Physics 1051 or Physics 1021

2400 Introductory Organic Chemistry I is a course on bonding involving carbon; conformations and stereochemistry; introduction to functional groups and nomenclature; properties, syntheses and reactions of hydrocarbons, alkyl halides, alcohols and ethers.

AR: attendance is required in the laboratory component of this course.

Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 2440
LH: 3
PR: a minimum 60% in CHEM 1051, or CHEM 1010 and CHEM 1011 with a grade of at least 85% in each; or CHEM 1011 with a grade of at least 85%; or CHEM 1001 (or the former 1031) with a grade of at least 65%; Science 1807

2401 Introductory Organic Chemistry II is an introduction to the interpretation of mass, infrared, 1H and 13C NMR spectra; properties, syntheses and reactions of simple aromatic and heteroaromatic compounds, ketones, aldehydes, amines, carboxylic acids and their derivatives; aldol and related reactions.

AR: attendance is required in the laboratory component of this course.

Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 2440
LH: 3
PR: CHEM 2440; Science 1807

2440 Organic Chemistry for Biologists is an introduction to the principles of organic chemistry with an emphasis on material relevant to biological molecules. The laboratory will introduce techniques and illustrate concepts covered in the course. This course is designed primarily for Biology Majors.

AR: attendance is required in the laboratory component of this course.

Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 2440
LH: 3
PR: CHEM 1001 or CHEM 1051 or a minimum 60% in CHEM 1011; Science 1807

UL: may not be used for credit by Chemistry or Biochemistry Majors and will not serve as a prerequisite for any other Chemistry course.
13.6 Classics

In accordance with Senate's Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

Classics courses are designated by CLAS.

1120 and 1121 Elementary Latin is an introduction to the grammar and syntax of Latin, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.
CR: the former CLAS 120A and 120B
PR: CLAS 1120 is the prerequisite for CLAS 1121

1130 and 1131 Elementary Ancient Greek is an introduction to the grammar and syntax of ancient Greek, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.
CR: the former CLAS 130A and 130B
PR: CLAS 1130 is the prerequisite for CLAS 1131

1100 Introduction to Greek Civilization is a general illustrated survey of the origins and evolution of Ancient Greek Civilization. The course introduces the student to Greek social and political institutions, religion and myth, and achievements in art, philosophy, science and literature, as well as the influence of Ancient Greece on the modern world.
CR: the former CLAS 1000, the former CLAS 2000

1200 Introduction to Roman Civilization is a general illustrated survey of the origins and evolution of Ancient Rome. This course introduces the student to social, political, and legal institutions, the growth of the Roman Empire, Roman art, literature, and religions, as well as Rome's pervasive influence in the modern world.
CR: the former CLAS 1000, the former CLAS 1101, the former CLAS 2001

2010 Greek Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Greece.
CR: the former CLAS 3100, the former CLAS 3101

2015 Roman Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Rome.
CR: the former CLAS 3100, the former CLAS 3102.

2020 History of the Hellenistic World (same as History 2034) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.
CR: History 2034

2035 History of Classical Greece (same as History 2035) is a survey of Greek History from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century, B.C.
CR: History 2035, the former CLAS 3910, the former History 3910, the former CLAS 2030, the former History 2030

2040 History of Rome (same as History 2040) is a survey of Roman History from the early monarchy to the reign of Constantine with special reference to society and politics in the late Republic and early Empire.
CR: CLAS 2041, CLAS 2042, History 2040, the former CLAS 3920; the former History 2920

2055 Women in Greece and Rome is an examination of the role of women in ancient Greece and Rome from the perspectives of religion, literature, art, society, and politics. Critical assessments of the scholarship and methodologies (including feminist methodologies) relevant to this topic will be included.

2701 History of Ancient Philosophy (same as Philosophy 2701) is a survey of the origins and development of Western philosophy among the Greeks and Romans.

CR: Philosophy 2701

2800 Classical Drama I - inactive course.

2801 Classical Drama II - inactive course.

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world.
CR: Religious Studies 3010, the former CLAS 3121, the former Religious Studies 3121

3020 Roman Religion (same as Religious Studies 3020) is a study of the role of religion in the private and public life of the Roman world.
CR: the former CLAS 3121, the former Religious Studies 3121, Religious Studies 3020

3090 Alexander and the Macedonians (same as History 3090) investigates the impact of the conquests of Alexander the Great and his Macedonian successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander's accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.
CR: History 3090

3110 Greek Literature in Translation - inactive course.

3111 Latin Literature in Translation - inactive course.

3130 Greek and Roman Mythology (same as Folklore 3130) is a comparative study of the major myths of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.
CR: Folklore 3130

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics to be discussed include the development of ancient tragedy, its literary, performative and thematic traditions, its representation of social and historical conditions, and its influence on later tragic drama.
CR: the former Classics 3905

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry or ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society.
CR: the former CLAS 2060

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence which informs them. The ancient world's impact on modern Western society will be considered together with the film industry's recasting of the ancient world in response to modern social and historical developments.

4000 Seminar in Greek History and Society will have the topics to be studied announced.

4010 Seminar in Roman History and Society will have the topics to be studied announced.

4020 Seminar in Greek Literature and Culture will have the topics to be studied announced.

4030 Seminar in Roman Literature and Culture will have the topics to be studied announced.

13.7 Computer Science

Computer Science courses are designated by COMP.

1600 Basic Computing and Information Technology offers an overview of computers and information technology. It provides students with the knowledge necessary to answer questions, such as: What is a computer system? How does it work? How is it used? This is done through the use of popular spreadsheet, word processing and database software packages and the Internet. Social issues and implications will also be included.
CR: the former Business 2700, the former COMP 2650, the COMP 2801
PR: Level III Advanced Mathematics or Mathematics 1090 or 109B, which can be taken concurrently

1700 Introduction to Computer Science lays the foundation for the art and the science of computing. The course contains fundamental and topical issues in computers, languages, programming and applications. This course is designed for potential Computer Science majors without a background in programming, but is also available for non majors.
CO: Mathematics 1090 or 109B (or equivalent), or Mathematics 1000

CR: Philosophy 2701

2800 Classical Drama I - inactive course.

2801 Classical Drama II - inactive course.

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world.
CR: Religious Studies 3010, the former CLAS 3121, the former Religious Studies 3121

3020 Roman Religion (same as Religious Studies 3020) is a study of the role of religion in the private and public life of the Roman world.
CR: the former CLAS 3121, the former Religious Studies 3121, Religious Studies 3020

3090 Alexander and the Macedonians (same as History 3090) investigates the impact of the conquests of Alexander the Great and his Macedonian successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander's accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.
CR: History 3090

3110 Greek Literature in Translation - inactive course.

3111 Latin Literature in Translation - inactive course.

3130 Greek and Roman Mythology (same as Folklore 3130) is a comparative study of the major myths of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.
CR: Folklore 3130

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics to be discussed include the development of ancient tragedy, its literary, performative and thematic traditions, its representation of social and historical conditions, and its influence on later tragic drama.
CR: the former Classics 3905

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry or ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society.
CR: the former CLAS 2060

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence which informs them. The ancient world's impact on modern Western society will be considered together with the film industry's recasting of the ancient world in response to modern social and historical developments.

4000 Seminar in Greek History and Society will have the topics to be studied announced.

4010 Seminar in Roman History and Society will have the topics to be studied announced.

4020 Seminar in Greek Literature and Culture will have the topics to be studied announced.

4030 Seminar in Roman Literature and Culture will have the topics to be studied announced.

13.7 Computer Science

Computer Science courses are designated by COMP.

1600 Basic Computing and Information Technology offers an overview of computers and information technology. It provides students with the knowledge necessary to answer questions, such as: What is a computer system? How does it work? How is it used? This is done through the use of popular spreadsheet, word processing and database software packages and the Internet. Social issues and implications will also be included.
CR: the former Business 2700, the former COMP 2650, the COMP 2801

PR: Level III Advanced Mathematics or Mathematics 1090 or 109B, which can be taken concurrently
13.8 Earth Sciences

Earth Sciences courses are designated by EASC.

1000 Earth Systems is a survey of the structure, function and interrelations of Earth's lithosphere, hydrosphere, atmosphere and biosphere. Topics include an exploration of the physical and chemical properties of planetary materials, forces driving and sustaining Earth systems, and biological modifiers (including humankind) on the Earth today.

LH: 3
PR: Science 1807

1001 Evolution of Earth Systems - inactive course.

1002 Concepts and Methods in Earth Sciences is an introduction to a broad range of concepts concerning the development of the geological record and the Earth; practical methods for collection of field based data; topics in map interpretation and geometric analysis, stratigraphy, paleontology, structure and petrology. The course is presented with an emphasis on the development of practical skills needed to pursue a career in Earth Sciences.

LH: 3
PR: EASC 1000; Science 1807

2150 The Solar System describes the basic astronomy of the Solar System, tracing the search to understand motion of the Sun, Moon and planets in the sky: modern observations of planets, moons, comets, asteroids and meteorites and what they tell us about the origin and evolution of the Solar System. This course is designed for students taking Earth Sciences as an elective.

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences

3811 Paleontology is an outline of the major changes in life forms from Archaeozoan times through the Phanerozoic to the present day, including details of invertebrate and vertebrate faunas and major floral groups; mechanisms and effects of mega-, and microevolution in the fossil record; Biology and classification of organisms and summaries of their geological significance in biostatigraphy, paleoecology and rock-building; relationships between major cycles of evolution and extinction to global processes. This course has a laboratory component.

CR: Biology 3811, the former EASC 3801, the former Biology 3800
LH: 3
PR: either Biology 2120 (or Biology 1001 and Biology 1002) and EASC 1002; or Biology 2122 and Biology 2210; Science 1807

13.9 Economics

Economics courses are designated by ECON.

1010 Introduction to Microeconomics I (same as the former ECON 2010) examines scarcity and opportunity cost, Demand and supply, Elasticity, Household demand: marginal utility, Household demand: indifference curves, Production functions, Short-run and long-run cost functions, Perfect competition in the short run and the long run, Monopoly.

CR: the former ECON 2010

1020 Introduction to Macroeconomics (same as the former ECON 2020) covers national income accounting, aggregate income analysis, money, banking and foreign trade.

CR: the former ECON 2020

2550 Economic Statistics and Data Analysis is an analysis of economic statistics and the use of economic data. A course designed to introduce students to the task of economic data collection, description and analysis. Emphasis will be on interpretation and analysis of data using computer software programs.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020), and Statistics 2500 or equivalent.

3000 Intermediate Micro Theory I is the basic microeconomic theory course; consumer demand, indifference curve analysis, theory of production and cost, factor substitution, and the theory of the firm under perfect competition and monopoly.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3001 Intermediate Micro Theory II is a continuation of basic microeconomic theory; the theory of imperfect competition, theory of factor pricing under various market structures, general equilibrium and welfare economics.

PR: ECON 3000

3010 Intermediate Macro Theory I is aggregate analysis including consumer, investment, government and international sectors, the role of money, determinants of aggregate supply, and the effects of autonomous behavioural changes and fiscal and monetary policies on unemployment, price levels and the balance of payments.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3011 Intermediate Macro Theory II is a consideration of modern theories of macroeconomics, dynamics, empirical evidence and simulation of the national economy. Emphasis on the availability and effectiveness of government policy instruments.

PR: ECON 3010

3030 International Economics: Issues and Problems in a Canadian Context is an intermediate course in international economics. The course covers the theory of comparative advantage, the structure and policy issues of the Canadian balance of payments, the foreign exchange market and the institutional aspects of international commerce.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3050 Economic Forecasting: Methods and Applications - inactive course.

3080 Natural Resource and Environmental Economics is application of economic analysis to renewable and nonrenewable natural resource industries such as the fishery, forestry, and mining. Emphasis is given to the criteria for optimal resource use under various market structures and their implications for public policy. Limits to environmental resource management and pollution control will also be covered.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3085 Issues in Ecological Economics (same as Environmental Studies 3085) aims to explore the dynamic interaction between the economic system and the ecological system that sustains it by using trans-disciplinary theoretical approaches and methodologies. The main focus of this course will be on Ecological Economics concepts such as low and high entropy, biodegradable and toxic goods and services, stock-flow resources, carrying capacity, throughput, co-evolution, sustainable scale, use value, and their applications in a problem-solving context.

CR: Environmental Studies 3085
PR: ECON 1010 (or the former 2010)

3150 Money and Banking examines the operation of the money and banking system, with special emphasis on Canadian problems. Monetary theory will be treated in relation to income theory and foreign trade.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3160 Financial Economics provides an analysis of the major building blocks of the modern theory of financial economics and their implications for decision-making. To reflect that modern finance is a branch of economics, emphasis will be on how general economic principles and analytical techniques can be applied across all finance sub-fields. Topics include the basic pillars in finance–intertemporal optimization, asset valuation, risk management–and selected issues that will vary each year.

CR: Business 4500 (St. John’s), the former Business 4500 (Grenfell)
PR: Mathematics 1000 or its equivalent, ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020).
Students are recommended to take ECON 2550 or its equivalent prior to taking this course.

3550 Mathematical Economics I examines linear algebra and differential calculus, with applications to economics.

PR: Mathematics 1000 or equivalent with a "B" standing, or Mathematics 2050 and ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020).

3551 Mathematical Economics II covers integral calculus, difference and differential equations, with applications to Economics.

PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020), ECON 3550

4550 Econometrics I covers estimation of the general linear regression model with emphasis on fundamental theory and examples from published empirical research.

PR: ECON 2550, 3000 and 3010.

4551 Econometrics II covers further problems in econometric theory and technique; multicollinearity, autocorrelation, nonlinear estimation, and the identification and estimation of systems of equations. Published empirical research will be discussed and each student will be expected to perform an original empirical study.

PR: ECON 4550

13.10 English Language and Literature

13.10.1 English Core Courses

1000 Critical Reading and Writing in Prose Forms is an introduction to the essay, short fiction and the novel. Emphasis is placed on critical reading and thinking strategies; composition of essays, including use of quotations
1001 Critical Reading and Writing in Poetry and Drama builds upon the essay writing and critical analytical strategies begun in English 1000. Emphasis is placed on developing composition skills in essay writing, composing and revising the genres of poetry and drama. All sections of this course follow the CRW guidelines available at www.mun.ca/hss/CRW.

CR: cannot receive credit for more than one of English 1000, 1050, 1090 or the former 1080, the former 1100 or for more than one of 1001, 1051, 1191 or the former 1101, 1192 or the former 1102, 1193 or the former 1103, and 1110; cannot receive credit for more than one of English 1002, the former 1030 or 1110; cannot receive credit for more than 6 credit hours at the first year level including unspecified transfer credits
PR: English 1000 or equivalent

1110 Critical Reading and Writing II (Context, Substance, Style) is an examination of prose texts such as essays, articles and reviews. Students write for different purposes and audiences. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing.

CR: cannot receive credit for more than one of English 1000, 1050, 1090 or the former 1080, the former 1100 or for more than one of 1001, 1051, 1191 or the former 1101, 1192 or the former 1102, 1193 or the former 1103, or 1110; cannot receive credit for more than 6 credit hours at the first year level including unspecified transfer credits
PR: English 1000, the former English 1080

2005 Literary Survey I (The beginnings to 1660) introduces students to the major writers by detailed study of selected texts. The course will include such authors as Chaucer, Mallory, Shakespeare, Spenser, Bacon, Webster, Donne and works such as Beowulf, the Old English Elegies and Gawaine and the Green Knight. Recommended for English specialization students that English 2005 be taken first in the English 2005-2006-2007 sequence.

CR: English 2000, the former English 2110
PR: English 1000 and one of English 1001, 1110

2006 Literary Survey II (1660-1837) introduces students to the major writers by detailed study of selected texts. The course will include such authors as Dryden, Pope, Swift, Johnson, Fielding, Blake, Wordsworth, Austen, Byron, Keats and Shelley. Recommended for English specialization students that English 2006 be taken second in the 2005-2006-2007 sequence.

CR: English 1000 and one of English 1001, 1110

2007 Literary Survey III (1837 to the present) introduces students to the major writers by detailed study of selected texts. The course will include such authors as Tennyson, Browning, Arnold, Hardy, George Eliot, Dickens, Yeats, T.S. Eliot and Dylan Thomas. Recommended for English specialization students that English 2007 be taken third in the English 2005-2006-2007 sequence.

CR: English 2001, the former English 2111
PR: English 1000 and one of English 1001, 1110

3205 Shakespeare Survey is a study of at least eight plays, two from each dramatic mode: comedy, history, tragedy, and romance.

CR: credit may be obtained for only two of English 3200, English 3201, English 3205, and English 3206
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3206 Shakespeare and the Classical Tradition is a study of the relationship between Shakespeare and his major classical sources, with a particular focus on the use of classical literature in the Renaissance.

CR: credit may be obtained for only two of English 3200, English 3201, English 3205, and English 3206
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3395 The Literary Uses of English from the Earliest Times to the Present is an exploration of the development of the English language, as evidenced by its literary uses.

CR: the former English 2401
PR: successful completion of at least 6 credit hours in English courses at the second-year level

4105 Critical Approaches and Theory is a survey of critical approaches to English Literature, particularly those adopted by twentieth century readers. The course will attempt to give an account of the theories on which these approaches are based and some attention will be paid to the application of different approaches to specific works of literature.

CR: English 4101

PR: successful completion of at least 6 credit hours in English courses at the third-year level

4950 Individual Project in English is an individual project of a creative, or a critical, or a research character on a topic which is subject to the approval of the Program Chair. The topic will be prepared under the supervision of a designated faculty member or members.

CR: English 4990
PR: successful completion of at least 6 credit hours in English courses at the third-year level

13.10.2 Dramatic Literature

2350 Introduction to Drama I is a survey of the major plays in the history of western drama from the Greeks to the end of the eighteenth century.

CR: English 2002
PR: English 1000 and one of English 1001, 1110

2351 Introduction to Drama II is a survey of the major plays in the history of western drama from the 19th Century to the present.

CR: English 2002
PR: English 1000 and one of English 1001, 1110

3021 English Drama to 1580 is a study of the development of English drama from the Middle Ages to 1580. The course may also consider the popular arts, such as folk plays and mumming.

PR: successful completion of at least 6 credit hours in English courses at the second-year level

3171 Irish Drama is a study of representative Anglo-Irish drama by such authors as Wilde, Shaw, Yeats, Synge, Lady Gregory, O'Casey, Behan, Friel and Molloy.

CR: the former English 3170, the former English 3180
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3181 Drama of the Restoration and Eighteenth Century is a study of major dramatic texts from 1660 to the end of the eighteenth century.

PR: successful completion of at least 6 credit hours in English courses at the second-year level

3275 Modern Drama (1830-1930) is a study of western drama and performance during the period 1830-1930, with a focus on theatrical and dramatic texts and movements, as well as artistic, social, political, technological, and philosophical influences.

CR: the former English 3300, the former English 4300
PR: successful completion of at least 6 credit hours in English courses at the second-year level

4302 Contemporary British Drama is a study of representative dramatic works of contemporary British drama.

PR: successful completion of at least 6 credit hours in English courses at the third-year level

4305 Contemporary Drama is a study of modern and post-modern western drama and performance from 1930 to the present, with a focus on theatrical and dramatic texts and movements, as well as artistic, social, political, technological and philosophical influences. Recommended previous course: English 3275.

CR: English 4301, the former English 3301
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4307 Contemporary Canadian Drama is a study of contemporary drama and performance in Canada, focussing on texts representative of Canada's cultural and regional diversity.

CR: English 3156
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4308 20th Century American Drama is a study of American drama and performance from the turn of the century to the present, focussing on the theatre's historic role in the definition, reinforcement and scrutinizing of American mythology.

CR: English 3260

4317 Elizabethan-Jacobean Drama is a survey of Shakespeare’s dramatic rivals and the Elizabethan and Jacobean repertoires.

CR: English 3022
PR: English 3200 or English 3201 and successful completion of at least 6 credit hours in English courses at the third-year level

4836-4844 Special Topics in Drama is supervised study in specialized areas of dramatic literature. Course topic, design, and requirements to be determined through consultation by the student with the instructor.

PR: permission of the instructor and successful completion of at least 6 credit hours in English courses at the third-year level
13.10.3 Canadian Literature
2146 Canadian Prose after 1949 is a study of the outstanding works of Canadian prose from 1949 to the present.
CR: English 2150, English 2151, the former English 3146
PR: English 1000 and one of English 1001, 1110
2155 Newfoundland Literature is a study of Newfoundland literature with emphasis on representative writers since 1949.
CR: English 3155
PR: English 1000 and one of English 1001, 1110
2156 Canadian Short Stories is a study of Canadian short stories which aims to give the student a heightened appreciation of individual short stories, and some sense of the range of Canadian accomplishment in the genre.
PR: English 1000 and one of English 1001, 1110
3145 Canadian Fiction to 1949 is a study of outstanding works of Canadian fiction from the beginnings to 1949.
PR: successful completion of at least 6 credit hours in English courses at the second-year level
3147 Canadian Poetry to 1949 is a study of representative Canadian poetry from the pre-confederation period to 1949.
PR: successful completion of at least 6 credit hours in English courses at the second-year level
3146 Canadian Poetry After 1949 is a study of Canadian poetry from 1949 to the present, with emphasis on the work of major poets and an examination of the various styles and theories of poetry developed during the period.
CR: English 4850
PR: successful completion of at least 6 credit hours in English courses at the second-year level
3149 Canadian Prose is a study of selected works of Canadian prose, covering both fiction and non-fiction.
PR: successful completion of at least 6 credit hours in English courses at the second-year level
4307 Contemporary Canadian Drama course description can be found in the dramatic literature list above.
CR: English 3156
PR: successful completion of at least 6 credit hours in English courses at the third-year level
4825-4835 Special Topics in Canadian Literature is a variety of topics to be offered as resources permit.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

13.10.4 Modern Literature
2215 American Literature to 1900 is a study of the historical origins and development of nineteenth century American Literature, concentrating on a selection of works within their political, social and artistic contexts.
CR: the former English 2214
PR: English 1000 and one of English 1001, 1110
2242 Science Fiction is a survey of Science Fiction from its earliest days to the present. Subjects that will be considered include the evolution of the genre, the relations among humans, technology and multinational capitalism, and the significance of memory and space.
CR: English 2811
PR: English 1000 and one of English 1001, 1110
2243 Introduction to Humour in Literature begins with a survey of humour theories from antiquity to the present, and proceeds to a study of various forms and strategies of humour through a selection of works in English. Students will study texts exploring the roles that humour plays in relation to topics such as transgression, iconoclasm, class, sexuality, gender, ethnicity, culture, politics and religion.
CR: the former English 2121
PR: English 1000 and one of English 1001, 1110
2244 The Graphic Novel - Historical, Cultural and Literary Contexts (same as Social/Cultural Studies 2244) examines the historical, cultural and literary impact of the Graphic Novel; investigates its continuing development; and introduces students to significant works within the genre.
CR: English 3842, Social/Cultural Studies 2244
PR: English 1000 and one of English 1001, 1110; one of Folklore 1000, Anthropology 1031, or Sociology 1000
2705 Modern World Literature in Translation is a study of modern world literature in English translation, with focus on writers of the twentieth century who have attained international stature.
PR: English 1000 and one of English 1001, 1110
2805 Women’s Writing to 1900 is a study of writing by women in the British Isles and North America from the Middle Ages to 1900, including such items as letters and journals as well as fiction, poetry, and drama.
CR: English 3810, English 3830. This credit restriction replaces the note in earlier calendars and is retroactive to September 1, 1993.
PR: English 1000 and one of English 1001, 1110
2870 Children’s Literature is an introduction to literature written for children and young people. Beginning with an examination of the history of children’s literature in the British Isles and North America, the course will focus on twentieth century and contemporary works, touching on a broad range of genres, audiences, and reading levels.
PR: English 1000 and one of English 1001, 1110
2905 Introduction to Creative Writing will introduce students to three main areas of creative writing: poetry, prose fiction, and creative non-fiction (travel writing, autobiography, journalism). Much of the emphasis will be on writing as a medium of communication. For this reason, some of the instruction will be the workshop system in which students act as each other’s readers and audience.
PR: English 1000 and one of English 1001, 1110
3215 20th Century American Literature is study of American poetry and fiction from 1900 to 1960.
CR: ENGL 2217, ENGL 2218, the former English 4260, the former English 4261, the former English 4270
PR: successful completion of at least 6 credit hours in English courses at the second-year level
3216 20th Century British and Irish Literature is a study of British and Anglo-Irish poetry and fiction from 1900 to 1960.
PR: successful completion of at least 6 credit hours in English courses at the second-year level
3810 20th Century Non-Fiction Writing by Women is a study of twentieth century topical writing by women, including writing about social, political, and literary issues. Non-traditional as well as traditional genres will be studied.
CR: English 2805, English 3830. This credit restriction replaces the note in earlier calendars and is retroactive to September 1, 1993.
PR: English 2805 or permission of the instructor and successful completion of at least 6 credit hours in English courses at the second-year level
3905 Creative Writing is a workshop course for aspiring writers of poetry and/or fiction. Limited enrolment. Applicants will be required to submit a sampling of their previous and current work.
CR: English 3900, English 3901
PR: permission of the instructor and successful completion of at least 6 credit hours in English courses at the second-year level
4245 Contemporary Fiction in English is an in-depth study of a selection of recent short fiction and novels in English. The focus will be on recent developments in American, British, Irish and Commonwealth fiction (excluding Canadian).
PR: successful completion of at least 6 credit hours in English courses at the third-year level
4246 Contemporary Poetry in English is an in-depth study of contemporary poetry in English. The focus will be on major poets and developments in the U.S.A., Britain, Ireland and the Commonwealth (excluding Canada) since 1945.
PR: successful completion of at least 6 credit hours in English courses at the third-year level
4861-4870 Special Topics in Modern Literature is a variety of topics to be offered as resources permit.
PR: successful completion of at least 6 credit hours in English courses at the third-year level
4905 Advanced Creative Writing is a workshop course for creative writers who have demonstrated considerable talent and skill in poetry and/or prose fiction. Limited enrolment.
PR: permission of the instructor and successful completion of at least 6 credit hours in English courses at the third-year level

13.10.5 English Courses for Non-Major Students
2010 Comprehension Writing and Prose Style (I) will chiefly emphasize the development of (a) the capacity to understand and appreciate the varieties of prose through close analysis of a wide range of examples, and (b) the ability to write expository and other kinds of prose.
CR: English 1110
PR: English 1000 and one of English 1001, 1110
3110 Greek Literature in Translation (same as Classics 3110) is representative readings in English of the principal literary forms of Classical Greece. The literary achievement of the Greeks and their contributions to Western letters and culture.
CR: Classics 3110
PR: successful completion of at least 6 credit hours in English courses at
3111 Latin Literature in Translation (same as Classics 3111) is representative readings in English of the principal literary forms of Republican and Imperial Rome. The literary achievement of the Romans and their contribution to Western letters and culture.

CR: Classics 3111
PR: successful completion of at least 6 credit hours in English courses at the second-year level

13.11 English as a Second Language

011F Core Intensive English Program covers reading through a variety of types of texts, vocabulary development, writing development, and academic listening and note-taking skills.

AR: attendance is required
CH: 0

013F Core Intensive English Program covers reading, writing, speaking, listening, grammar and vocabulary development at an intermediate level through a variety of texts.

AR: attendance is required
CH: 0

014F Core Intensive English Bridge Program I covers reading, writing, speaking, listening, grammar and vocabulary development at a high-intermediate level through a variety of academic texts.

AR: attendance is required
CH: 0

015F Core Intensive English Bridge Program II covers reading, writing, speaking, listening, grammar and vocabulary development at an advanced level through a variety of academic texts.

AR: attendance is required
CH: 0

13.12 Environmental Science

Environmental Science courses are designated by ENVS.

13.12.1 Environmental Biology

3110 Taxonomy of Flowering Plants is a study of the biodiversity of flowering vascular plants (Magnoliophyta) through the practical identification of Newfoundland families, genera, and species. Related taxonomic and biogeographical principles will be stressed.

CR: Biology 304
LH: 3 laboratory periods of integrated practice and theory
OR: Students must submit a collection of flowering plants identified to the species level. Detailed instructions should be obtained from the instructor in the spring/summer prior to the commencement of this course.

PR: Biology 2010 or equivalent; Science 1807

3130 Freshwater Ecology is the study of freshwater ecosystems (lakes, rivers, streams, peatlands). Included are abiotic components, community structures, energy flow, biogeochemical cycles, and the evolution of natural and altered aquatic ecosystems. Emphasis will be placed on field and laboratory studies of the ecology of freshwater organisms and systems in western Newfoundland.

LH: 3
PR: Biology 2010, Biology 2122, Biology 2600; one of Chemistry 1001 or Chemistry 1011; Science 1807

3131 Impacted Terrestrial Ecosystems is an examination of ecological and evolutionary responses by organisms in terrestrial ecosystems to human-derived and natural perturbations. Advanced conceptual, empirical and experimental approaches will be used, with an emphasis on sampling local habitats.

CR: Biology 3610
LH: 3
PR: Biology 2600; and two of Biology 2010, Biology 2122, Biology 2210 or the permission of the instructor and Program Chair; Science 1807

4132 Analytical Ecology states that the assessment of environmental impacts on higher-level ecological systems requires a critical analysis of scientific reports, along with the ability to evaluate ecological terminology and concepts and associated statistical methodologies. Students in this course will critically read and analyse recent scientific literature in Environmental Biology, with selected topics at the community, ecosystem and landscape scale, and examine related univariate and multivariate statistical procedures.

LH: three-hour laboratory/discussion group
PR: Biology 2600, Science 1807, Statistics 2550 (or equivalent), with 6 credit hours from clause e. of the Environmental Science Core. It is recommended that students complete at least 80 credit hours before registering for this course.

4133 Conservation Biology will bring together the principles of ecology and conservation Biology at an advanced level. Current issues and techniques will be discussed with an aim towards understanding how populations of native flora and fauna can be managed for long-term conservation in the face of habitat degradation and loss.

CR: Biology 4650 and Geography 4650
LH: three-hour laboratory/discussion group
PR: two of ENVS 3110, 3130, and 3131; or permission of instructor; Science 1807

4140 Environmental Science Field Course is a providing practical experience in the observation, collection, identification and quantification of organisms and the various environmental parameters which affect them in pristine and disturbed habitats. Combinations of freshwater, marine and terrestrial habitats will be studied using techniques from various scientific disciplines. The actual combination of habitats, organisms, and techniques will vary from year to year.

PR: Biology 2600, Statistics 2550, with a minimum of 80 credit hours from Environmental Science Program (or equivalent) and permission of the instructor and Program Chair; Science 1807

13.12.2 Environmental Chemistry

In accordance with Senate’s Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

PR: Chemistry 1001 or the former 1031 or Chemistry 1501 or Chemistry 2440 or the permission of the instructor and Program Chair

3210 Environmental Analytical Chemistry I is treatment of data, error analysis, wet methods of analysis of laboratory and field samples. Volumetric methods for acidity, alkalinity and hardness; chemical and biological oxygen demand (COD and BOD). Gravimetric methods for sulphate and phosphates. Theory and application of specific ion electrodes analysis of metal ions, dissolved gases and halide ions. Turbidimetric and nephelometric measures of water quality. Spectrophotometric analysis of trace metal ions.

LC: not more than seven hours per week
LH: not more than seven hours per week
PR: the former Chemistry 2300 (or 2301) and Chemistry 2210; Science 1807

3211 Environmental Analytical Chemistry II is theory and application of spectrophotometric methods of analysis (including error analysis) of environmentally important compounds. Spectrophotometrically, fluorometrically, with light scattering, chromatographic (GC, GC/MS, HPLC), fluorescence, phosphorescence, atomic absorption and electroanalytical methods will be studied. Synthetic laboratory samples and field samples will be examined by these techniques.

LC: not more than seven hours per week
LH: not more than seven hours per week
PR: ENVS 2310 (or equivalent); Science 1807

3260 Industrial Chemistry is chemical principles used in the manufacture of inorganic and organic chemical products; electrochemical, petrochemical, polymer, pulp and paper, agricultural, cement, cosmetics, detergent and paint industries. Processes, specific pollutants of current interest: inorganic (e.g. mercury, nitrogen oxides and sulfur oxides gases, lead etc.) and organic (e.g. PCBs, chlorinated hydrocarbons, freons, pesticides, herbicides). Industrial sources and analytical methods of detection will be studied.

PR: Chemistry 2210, Chemistry 2401, and ENVS 2261 (ENVS 2261 may be taken concurrently) or permission of the instructor and Program Chair

3261 Atmospheric Chemistry (same as Chemistry 3261) provides a comprehensive study of the chemistry of the Earth’s atmosphere. Beginning with an overview of planetary atmospheres, we follow the evolution of the Earth’s atmosphere until today. Atmospheric chemical processes are interpreted from the perspectives of chemical kinetics, chemical thermodynamics, molecular orbital theory, and molecular spectroscopy. The mechanisms of stratospheric reactions are studied in the context of the ozone layer, while those of the troposphere are linked to the so-called ‘greenhouse effect’ and aspects of pollution. The very different upper-atmosphere chemistry is also studied.

CR: Chemistry 3261
3072 Comparative Marine Environments will investigate the physical, chemical, geological and biological characteristics of the major marine environments from the coastal zone to the abyss and from the equator to the poles. The course will be an integrated study of the physical parameters that define the various environments. Emphasis will be placed on the interaction of organism and environment. The influence of the environment on the form, function and behaviour or organisms and the influence of the organism in modification of the physical environment will be stressed.

PR: ENVS 2371

PR: Mathematics 1001, Physics 1020 and Physics 1021 or Physics 1051 and Physics 1051

4000 Environmental Science Seminar reviews current topics in environmental science and discusses in a seminar format. Seminars will be presented on current research and environmental issues by faculty, students and guest speakers from universities, government and industry.

PR: EnvironSci 2 students who have earned at least 3 credit hours or more, to include Biology 2600, Statistics 2550 and one of Chemistry 2440, Chemistry 2401, Chemistry 2210, or the former Chemistry 2300 (or 2301).

4069 Fundamentals of Soil Systems is the physics, chemistry and Biology of soils: including inorganic soil components, chemistry of organic soil matter, soil equilibria, sorption phenomena on soils, ion exchange processes, kinetics of soil processes, redox chemistry of soils, soil acidity, saline and sodic soils, organic pollutants, trace and toxic elements in soils, soil biogeochemistry, organic matter cycling, nutrient cycling and fertility, soil conservation and sustainable agriculture.

PR: Chemistry 1050, Environmental Organic Chemistry or co-requisite Physics 1050.

13.12.3 Other Environmental Science

1000 Introduction to Environmental Science is an introduction to the study of the environment. Environmental principles, issues and problems will be described and placed in a historical and societal context.

2360 Geological Hazards and Natural Disasters will introduce students to the geological aspects of the natural environment and the impacts that natural processes and phenomena may have on humanity. The impact of geological hazards and natural disasters on human society and behaviour will be examined through case studies.

CR: Earth Sciences 2916
PR: 15 credit hours or more

2369 Introduction to Soils provides a broad background knowledge about soils. Topics covered include: the origin of soils; physical, biochemical and engineering aspects of soils; influence on humans and their food production; soil pollution and degradation; and management and conservation of soils.

PR: Earth Sciences 1000 or the former Geography 1000

2370 Global Environmental Change is a survey of the Earth as a dynamic system. Different biogeochemical cycles that define the Earth's environment. Material cycles and energy concepts. Evolution of the atmosphere in response to lithospheric, biospheric and hydrospheric changes. Major global environmental changes from Earth's formation to present. Emphasis on self-regulating ability of the Earth system.

PR: 30 credit hours or more

PR: 30 credit hours or more

2430 Energy and the Environment considers energy, energy conversion, heat transfer, the laws of thermodynamics, nuclear processes and radiation. Practical problems such as the energy shortage, human influences on climate, renewable energy, nuclear power etc. will be discussed.

PR: Mathematics 1081 or Mathematics 1000; Physics 1021 or co-requisite Physics 1051

2450 Meteorology is an application of physics and mathematics to the study of the atmosphere. Atmospheric motion on the global, synoptic, meso- and micro-scales. An introduction to atmospheric radiation and thermodynamics, clouds and precipitations, and the analysis and interpretation of surface and upper-air weather maps.

CO: Physics 1051 or prerequisite Physics 1021
PR: Physics 1021 or co-requisite Physics 1051
guidance of a faculty member, where students will conduct a scientific study based upon original research or a critical review of extant data in an appropriate area. Students are required to submit a report and give a presentation. This project fulfills the Core requirement for a fourth-year individual project in the area of specialization. 
PR: permission of Program Chair; Science 1807

**4951 Honours Project in Environmental Science** I is a course, under the guidance of a designated supervisor (or supervisors), where the student will prepare a thesis proposal including a comprehensive literature review of the subject of their Honours thesis. Students will present the results of their work in both written and oral form.
PR: restricted to Environmental Science students who have been accepted into the Honours option; Science 1807

**4959 Honors Research Project in Environmental Science** II is a continuation of ENVS 4951 specifically for Honours students. Under the supervision of faculty member(s), students will carry out an original research project in environmental science. Students will present both a thesis and seminar portions of their research.
PR: ENVS 4951 and admission to the honours program; Science 1807

### 13.13 Environmental Studies

Environmental Studies courses are designated by EVST.

**1000 An Introduction to Environmental Studies** is an interdisciplinary introduction to the study of the environment that aims to develop environmental literacy. This course brings together perspectives from the natural sciences and the social sciences to examine such issues as global warming, air pollution, sustainability, new energy technologies, and environmental law.

**2000 Introduction to Mapping, Remote Sensing, and Geographical Information Systems** is an introduction to maps, global positioning systems, remote sensing, and geographic information systems. Applications to a broad range of environmental issues will be discussed. 
CR: Geography 2195 
LH: 3 
PR: Geography 1050 or Earth Sciences 1002

**2210 Outdoor Environmental Pursuits I** is the theoretical rationale and practical skills needed to demonstrate basic proficiency in several of the following activities: minimal impact camping, wilderness cooking, hiking, kayaking, navigating with map and compass, outdoor safety, search and rescue, and group management. The major focus of this course will be the practical application of learned skills.
AF: attendance is required 
CO: basic first aid and CPR course 
OR: 3 hours of practicum per week 
UL: cannot be used as an elective towards the Environmental Studies Program

**2220 Outdoor Environmental Pursuits II** is the theoretical rationale and practical skills needed to demonstrate basic proficiency in several of the following activities: cross-country skiing, telemark skiing, downhill skiing, snowshoeing, winter camping, and winter survival techniques. The major focus of this course will be the practical application of learned skills.
AF: attendance is required 
OR: 3 hours of practicum per week 
UL: cannot be used as an elective towards the Environmental Studies Program

**3000 Issues in Environmental Economics** is an analysis of current issues concerning the effects of the economic activities of production and consumption on the natural environment. The concepts of scarcity, abundance, demand, supply, opportunity cost, trade-offs, externalities, marginal benefits and marginal costs will be utilized in examining environmental problems. The social and economic implications of various approaches will also be analyzed. 
CR: Economics 1010 (or the former 2010)

**3001 Environmental and Resource Management: Applications of Geographic Information Systems** is applied GIS knowledge and skills in environmental and resource management. The topics cover GIS data sources, data conversions, database design, spatial analysis and decision support systems. Examples of GIS applications in the private and public sectors will be provided. 
LH: 3 
PR: EVST 2000

**3085 Issues in Ecological Economics** (same as Economics 3085) explores the interplay between the economic system and the ecological system that sustains it by using trans-disciplinary theoretical approaches and methodologies. The main focus of this course will be on Ecological Economics concepts such as low and high entropy, biotic and abiotic goods and services, stock-flow resources, carrying capacity, throughput, co-evolution, sustainable scale, use value, and their applications in a problem-solving context. 
CR: Economics 3005 
PR: Economics 1010 (or the former 2010)

**3210 Expedition** will consist of one or more extensive expeditions into wilderness areas. A variety of applied topics related to environmental issues, outdoor leadership, and outdoor survival will be covered using an experiential approach. Expedition: Two weeks (Summer term).
PR: attendance is required 
PR: EVST 2210 and EVST 2220 
UL: cannot be used as an elective towards the Environmental Studies Program

**4000 Environmental Impact Assessment** will include an analysis of the different methods of assessing the impacts that investment projects or decision-making processes have on the environment. Environmental Impact Assessments (EIAs) vary with individual projects and are a vital tool to use in integrated planning of development proposals, policies and programs. Emphasis will be given to assessing the socio-economic impact of development projects.

**4010 Seminar in Environmental Studies** is a seminar in which selected environmental issues will be examined from several disciplinary perspectives. 
CR: seminars three hours per week 
PR: permission of the Environmental Studies Program Chair

**4020-4039 Special Topics in Environmental Studies** has a range of special topics in Environmental Studies. This course is normally taken by students beyond the second year.

**4950 Independent Research Project** is a course, under the supervision of a faculty member, where each student will carry out an approved project in environmental studies and prepare a major paper based on independent research.
PR: permission of the Environmental Studies Program Chair

### 13.14 Folklore

In accordance with Senate's Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, contact the appropriate Dean of the School.

Folklore 1000 is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060 and those courses cross-listed with other subject areas.

Folklore courses are designated by FOLK.

**1000 Introduction to Folklore** explores the role of tradition in communication, art and society. Reading assignments and audiovisual material will emphasize the use of folklore in context. Students will analyse traditions in their own lives through special assignments.
CR: the former FOLK 2000

**1050 Folklore Studies - Inactive course**

**2100 Folklore Research Methods - An Introduction** is designed to provide the integrative introduction to the research resources, tools and methods regularly employed in the area of Folklore. On the one hand, the course will examine what types of Library and Archive resources can be useful to the folklorist and, on the other hand, it will explore how folklorists in fieldwork situations should handle people, and how they can capture for posterity a record of the interviews that they have conducted and the events that they have observed. It is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses.

**2230 Newfoundland Society and Culture** (same as Sociology/ Anthropology 2230) is the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.
CR: Sociology/Anthropology 2230 
UL: not applicable towards the Major or Minor in Anthropology

**2300 Newfoundland Folklore** (same as Anthropology 2300) is survey of the various types of Folklore: tale, song, rhymer, riddle, proverb, belief, custom, childlore and others, with stress on their function in the Newfoundland community culture. Individual collection and analysis of materials from the students’ home communities, supplemented by data from the this University’s Folklore and Language Archive.
CR: Anthropology 2300 and the former FOLK 3420 
PR: FOLK 1000 or Anthropology 1031 
UL: not applicable towards the Major or Minor in Anthropology

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LG = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
2401 Folklore Studies is an examination of the traditional cultures of Europe and North America with special reference to Newfoundland. A selection of the following areas will be covered: settlement patterns, architecture, work and leisure patterns in the folk community, calendar customs, rites of passage, folk religion, folk medicine, language and folk culture, folk costume, foodways and folk art.
CR: the former FOLK 3500

2500 Folk Literature (same as Anthropology 2500) is an examination of the major forms of folk literature: folk narrative, folk poetry and song, folk drama, and the traditional generic forms within folk speech. An introduction to the textual, comparative and contextual methods of analysis. The literature discussed will be international in scope.
CR: Anthropology 2500 and any of the former FOLK 3400, English 3400, Sociology/Anthropology 3400
PR: FOLK 1000 or Anthropology 1031

2600 Regional Folklore - inactive course.

3130 Greek and Roman Mythology (same as Classics 3130) is a comparative study of specific myths and folktales of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.
CR: Classics 3130

3200 Folksong is an introduction to the full range of traditional verse, song and music. Stress primarily on the songs of Canada, the United States and the British Isles, with attention to Newfoundland parallels. Examination of traditional vocal and instrumental styles as well as verse forms. Some reference to non-Western musical traditions. A knowledge of music is not a prerequisite.
CR: the former FOLK 2430

3300 Folk Drama is a survey of the main forms of traditional drama found in Great Britain and North America with reference to related European and non-Western traditions. The origins, history and regional variations of these forms will be considered together with questions of social function, performance and aesthetics. The history of research in the area of folk drama will be examined along with related methodological and theoretical issues.

3450 Language and Play is an examination of such forms as the rhyme, riddle, proverb and proverbial saying, game, etc. Emphasis on problems of function and classification. Material will be chiefly from the British and North American traditions. Collecting will be encouraged.

3601-3620 Special Topic in Folklore will have topics to be studied announced by the School.

3850 Material Culture (same as Archaeology 3850) is an introduction to the study of material culture and the question of why objects are important to us. Using folklore and interdisciplinary approaches, we will look at objects as cultural products, question the influence of objects on behaviours, and address the role of objects in historical and ethnographic research.
CR: Archaeology 3850

3920 Folklore, Education and Community is intended to familiarize students with the function of Folklore in the educational process. Emphasis will be placed upon the application of theories of Canadian culture to folklore studies. Questions of the role of folklore and folklife with respect to identity, ethnicity, multiculturalism, national literature, regionalism and similar issues will be considered.
CR: the former FOLK 3030 or the former FOLK 4475

3930 Folklore and Popular Culture is an introduction to the study of popular culture, the folk/popular continuum, and the role of folklore in media such as film, television, music, and art.
CR: the former FOLK 2400

4300 Folklore of Canada is an examination of a variety of Canadian folklore from historical, geographical and cultural perspectives. Emphasis will be placed upon the application of theories of Canadian culture to folklore studies. Questions of the role of folklore and folklife with respect to identity, ethnicity, multiculturalism, national literature, regionalism and similar issues will be considered.
CR: the former FOLK 1020

4440 Music and Culture (same as Anthropology 4440. Music 4400, the former Music 4440) is traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to context. Outside reading, class exercises and individual reports will be required.
CR: Anthropology 4440, Music 4400, the former Music 4440
UL: not applicable towards the Major or Minor in Anthropology

4480 Oral History (same as History 4480) examines the narratives of everyday people who tell their life experiences. This course focuses on the collection and analysis of oral narratives and how they can be used to illuminate the past. It considers the power of these narratives to shape constructions of the present and future for both narrators and audiences.
CR: History 4480

13.15 French

Three consecutive credit courses in French language are available at the first-year university level, providing a complete overview of basic oral and written French. New students may choose to register initially in French 1500 or 1501; a diagnostic test is offered to assist students with initial course selection or to confirm that initial course selection is appropriate. Students with a limited background in French should register for French 1500 and continue with 1501. Students with a strong background in high school French should bypass 1500 and begin their university study with 1501, especially if they intend to proceed beyond the first-year level. Very well prepared students may apply to the School for permission to enter 1502 directly. Bypassing one or more of these courses may enable students to include a larger number of advanced electives in their degree program. French 1500, 1501 and 1502 require three hours of instruction per week and two additional hours of language laboratory work or conversation class, or both.

French courses are designated by FREN.

1500 Introduction à la langue française, niveau universitaire I (same as Anthropology 1500) is designed for beginners and for students whose background in French is very weak. Permission to register for this course will not be given to students who have completed Français 3200 (High School French immersion). See Note above.
CR: the former FREN 1010 or 1011

1501 Introduction à la langue française, niveau universitaire II Voir ci-dessus la note.
CR: et Français 1050 (désormais supprimé)
PR: High School French 3200 ou permission du chef du département. Les étudiants qui ont complété un programme d’immersion devraient consulter le chef du département avant de s’inscrire à ce cours.

1501 Introductory University French II See Note above.
CR: the former FREN 1050
PR: High School French 3200 or permission of the Head of the department. Ex-immersion students should consult the Head of the Department before registering for this course.

1502 Introduction à la langue française, niveau universitaire III Voir ci-dessus la note.
CR: et Français 1051 (désormais supprimé)
PR: 1501, ou la permission du chef de la division

1502 Introductory University French III See Note above.
CR: the former FREN 1051
PR: 1501, or by permission of the Dean of the School

2100 Français intermédiaire I Rédaction, grammaire et pratique orale.
PR: Français 1502

2100 Intermediate French I is composition, grammar and practice in oral skills.
PR: FREN 1502

2101 Français intermédiaire II continuation du travail de rédaction, de grammaire et de communication orale.
PR: Français 2100

2101 Intermediate French II is further work in composition, grammar and oral skills.
PR: FREN 2100

2300 Phonétique introduction pratique à la phonétique du français. Emploi des symboles de l’alphabet phonétique, transcription phonétique et phonétique corrective.
PR: Français 1502 ou équivalent

2300 Phonetics is a practical introduction to French phonetics, including the International Phonetic Alphabet and phonetic transcription as well as corrective phonetics.
PR: FREN 1502 or equivalent

2601 Apprentissage de la lecture les étudiants exploreront des stratégies de lecture qui faciliteront la compréhension de textes divers. Ce cours sera normalement enseigné en français.

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Coerequisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LG = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

PR: Français 1502 ou Français 2159, ou équivalent

2601 Reading Skills will explore reading strategies in a variety of texts in French. This course will normally be taught in French.

CR: Students who have successfully completed FREN 2550 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed FREN 2551 may take either FREN 2601 or FREN 2602, but not both. Students who have completed both FREN 2550 and FREN 2551 may not take either FREN 2601 or FREN 2602.

PR: FREN 1502, or FREN 2159 or equivalent

2602 Reading Complete Texts will explore reading strategies in a variety of complete texts in French. This course will normally be taught in French.

CR: Students who have successfully completed FREN 2550 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed FREN 2551 may take either FREN 2601 or FREN 2602, but not both. Students who have completed both FREN 2550 and FREN 2551 may not take either FREN 2601 or FREN 2602.

PR: FREN 1502, or FREN 2159 or equivalent

2900 A Survey of Francophone Cultures places emphasis on oral comprehension and expression. This course is a prerequisite for FREN 3650-3651-3653.

CR: the former FREN 2500

PR: FREN 1502 or equivalent. Students who have obtained less than 70% in FREN 1051 are, however, advised to complete FREN 2100 before attempting this course.

2900 Surviv des cultures francophones met l'accent sur la compréhension et l'expression orales.

PR: Français 2101 ou Français 2160 et au moins un autre cours de français de niveau 2000

3100 Grammar and Textual Analysis is revision of the French noun and verb systems (morphology, number, gender, tense, aspect, mood, voice). Grammatical and stylistic textual analysis with special emphasis on the use of verbs in French. Vocabulary enrichment.

PR: FREN 2001 and 9 additional credit hours in French at the second-year level, or permission of the Head of the Department

3101 Style et analyse de textes rôle et fonction des parties du discours; exploitation sémantique (synonymie, polysémie); tropes et figures de style. Analyse grammaticale et stylistique de textes avec un accent particulier sur ces phénomènes. Travaux d'expansion lexicale.

PR: Français 2101 ou Français 2160 et au moins un autre cours de français de niveau 2000

3101 Style and Textual analysis is role and function of the parts of speech in French; semantic enrichment (synonymy, polysemia); tropes and figures of speech. Grammatical and stylistic textual analysis with special emphasis on phenomena. Vocabulary enrichment.

PR: FREN 2101 or FREN 2160 and at least one other 2000-level course in French

13.16 Gender Studies

Gender Studies courses are designated by GNDR.

2000 An Interdisciplinary Introduction to Gender Studies (same as the former Women's Studies 2000) is an interdisciplinary introduction to the major concepts, issues and debates of Gender Studies.

CR: the former Women's Studies 2000

2001 Women and Science (same as the former Women's Studies 2001) is an introductory course on historical and contemporary contributions of women scientists, especially Canadians; different sciences and how they study women; and feminist and other perspectives on gender and science.

CR: the former Women's Studies 2001

3000-3010 Special Topics in Gender Studies (same as the former Women's Studies 3000 - 3010) has a range of special topics in Gender Studies.

CR: the former Women's Studies 3000 - 3010

4000 Contemporary Feminist Issues same as the former Women's Studies 4000 is an interdisciplinary seminar in Gender Studies that identifies emerging debates in contemporary feminism and analyses complex and contentious issues and how they intersect and disrupt social constructions of gender.

CR: the former Women's Studies 4000

OR: 3 hour seminar per week

PR: students must normally have completed GNDR 3905 or the former Women's Studies 3005 and 15 credit hours in other courses applicable to the Gender Studies Major and Minor programs before taking GNDR 4000. In exceptional cases, students without these prerequisites may be accepted, with the approval of the instructor of GNDR 4000 and the Head of the Department.

13.17 Geography

Geography courses are designated by GEOG.

1050 Geographies of Global Change provides perspectives on the major geographical challenges and changes facing the contemporary globe, including: climate and environmental change, sustainability, human development, economic globalization, cultural change, and population and migration. Using the integrative skills of geographical analysis, the course prepares students for advanced study in geography and citizenship in the modern world.

CR: the former GEOG 1000, the former GEOG 1001, the former GEOG 1010, and the former GEOG 1011

2001 Cultural Geography is an introduction to the study of culture in geography, emphasizing both the history of the field from classic studies of landscapes to contemporary scholarship and themes of recent importance. These include the relationship between nature and culture: imperialism and colonialism; place, identity, and power; and global cultures of commodities, media, and tourism.

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

2102 Physical Geography: The Global Perspective is a study of form, process, and change in natural systems at and near the surface of Earth, viewed as a human environment. Emphasis is on global and regional scales in the systematic study of climate, water, landforms and vegetation.

LH: 3

PR: GEOG 1050, or the former GEOG 1000, or the former GEOG 1011

2195 Introduction to Geographical Information Sciences is an introduction to the fields of cartography, remote sensing, and geographic information systems (GIS). Geographic information collection, representation and analysis methods are the topics for the course. An emphasis is given to the applications of maps and satellite images.

CR: Environmental Studies 2000

2302 Issues in Economic Geography are basic issues and ideas in economic geography. The development of a regional economy will be examined and the underlying economic and physical factors.

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

2425 Natural Resources is an introduction to the concepts of natural resources, environment and conservation: the nature and distribution of natural resources; methods of use, allocation and development of natural resources and the role of various physical, social, economic, political and technological factors influencing decision-making about resources.

CR: the former 3325

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

3222 Research Design and Quantitative Methods in Geography is an introduction to principles of research design, and to the use of quantitative techniques. This course provides students with a basic understanding of data collection, entry, and analysis and presentation skills most commonly used by geographers. Practical, computer-based exercises are an essential part of the course. It is strongly recommended that this course be completed before registration in a 4000-level geography course.

CR: the former GEOG 2220

LH: 3

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011 and at least 9 credit hours from GEOG 2001, GEOG 2102, GEOG 2195, GEOG 2302, GEOG 2425.

3350 Community and Regional Planning and Development introduces students to regional planning and development theories, techniques and approaches. Understanding of networks of development actors at the community and regional scales, methods of delineating regions, links between theory and practice in planning and development. Focus on Canadian experiences and a sustainable development perspective.

PR: GEOG 2302 or permission of the instructor

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LG = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
13.18 History

With the exception of 4000-level cross-listed courses, students are required to take 12 credit hours in History (in addition to History 1100/1101) or have permission of the Chair of the Historical Studies Program before enrolling in any 4000-level History course. History courses are designated by HIST.

1100 Introduction to History is an introduction to the study and writing of history which will emphasize the concepts of history through a thematic approach to the history of western civilization from ca. 1500 to ca. 1815. (Offered only at Grenfell Campus.)
CR: the former HIST 1000

1101 Introduction to History is an introduction to the study and writing of history which will emphasize the concepts of history through a combination of research and writing within a thematic approach to the history of western civilization from ca. 1815 to the present. (Offered only at Grenfell Campus.) Students in their first year normally take HIST 1100 and HIST 1101.
CR: the former HIST 1001

2034 History of the Hellenistic World (same as Classics 2020) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt into the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.
CR: same as Classics 2020

2035 History of Classical Greece (same as Classics 2035) is a survey of Greek history from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century BC.
CR: Classics 2035, HIST/Classics 2030 since 1985-86 or the former HIST/Classics 3910

2040 History of Rome (same as Classics 2040) is a survey of Roman history from the early monarchy to the reign of Constantine, with special reference to society and politics in the late Republic and early Empire.
CR: Classics 2040, HIST/Classics 3920

2100 Empires of the North Atlantic, 1500-1820 will examine European expansion across the Atlantic to North America, the attempt to take possession of that continent through commercial investment and colonies, and the way in which European colonies were transformed into new societies.

2120 The History of Canadian-American Relations, 1783 to the Present is a survey of the major themes in the history of Canadian-American relations, from the American Revolution to the present. Emphasis will be placed on economic, social, political and cultural developments.

2200 Making Canada is a survey of Canadian History to Confederation, 1867.

2210 Modern Canada is a survey of Canadian History since Confederation.

2300 Early Modern European History, 1500-1789 is an introduction to the main issues and problems in early modern European History with an emphasis on the political, social, economic and cultural developments from the sixteenth through the eighteenth centuries.

2310 Europe in the Nineteenth Century: 1789-1914 is a survey of the economic, social, political and cultural developments of Europe from 1789-1914.

2320 Medieval Europe to the Eleventh Century (same as Medieval Studies 2001) is a survey of the economic, social, political and cultural developments of the Early Middle Ages.
CR: the former HIST 2030, Medieval Studies 2001

2330 Medieval Europe Since the Eleventh Century (same as Medieval Studies 2002) is a survey of the economic, social, political and cultural developments of Europe in the high and late Middle Ages.
CR: the former HIST 2030, Medieval Studies 2002

2500 The Twentieth Century I is a study of the world-wide impact of the main events and developments in the age of global interdependence.
CR: the former HIST 3700

2510 Twentieth Century II is an historical analysis of the main issues in the contemporary world since 1945.
CR: the former HIST 3710

2700 Art History Survey I (same as Visual Arts 2700) is the history of art from pre-historic times to the Renaissance.
CR: Visual Arts 2700

2701 Art History Survey II (same as Visual Arts 2701) is the history of art from the Renaissance to the 20th century.
CR: Visual Arts 2701

3030 Environmental History examines the history of human relationships to the natural environment. The focus of the course is the history of environmental changes caused by humans, and the influence of the natural environment on human cultures and societies. Case studies will focus on issues with broad relevance to contemporary environmental issues such as energy use, the environmental impact of military conflict, species introductions, natural disasters, urban sustainability, ecological restoration, and the origins of environmentalism.

3050 History of Warfare to 1789 is a survey of major developments in the history of warfare from the earliest times to 1789 with particular emphasis on changes in the nature and conduct of warfare, the evolution of military thinking, the organization of military and naval forces, the impact of technological change, the emergence of professionalism and the relationship between societies and armed forces.

3060 History of Modern Warfare since 1789 is an examination of those major developments which have affected the nature and conduct of warfare in the period since 1789, with particular emphasis on the evolution of military thinking, the impact of technology on organization and planning, the role of leadership, the civil-military relationship, professionalism in the armed forces, and the changing nature of warfare: the emergence of total war, global war, guerilla warfare, and limited warfare.

3090 Alexander and the Macedonians (same as Classics 3090) investigates the impact of the conquests of Alexander the Great and his Macedonian Successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander’s accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.
CR: Classics 3090

3110 History of Newfoundland to 1815 is the growth of settlement and the manner in which a migratory fishery carried on from England and Ireland changed into a `sedentary' fishery carried on by residents of Newfoundland.

3120 Modern Newfoundland Since 1815 is the establishment and development of political institutions, changes in economic structure and the growth of populations.

3135 France in the Americas: 1500-1815 investigates the French presence mainly in New France, but also Newfoundland, Florida, Louisiana, the Caribbean, Acadia, Ile Royale, and Brazil, from the earliest voyages of exploration to the Anglo-French struggle for North America. This topic will be studied within the greater framework of the transplantations of a European society onto a different continent, delving also into various subject themes such as French-aboriginal relations, politics, and government, women and gender, and society in France and New France.

3250 Migration History of North America is a survey of migration to and within North America from the seventeenth to the twentieth century.

3320 Early Modern France, 1500-1789 is French History from 1500 to 1789, with a focus on such themes as the Renaissance, political and social change, gender history and the Enlightenment.
CO: 6 credit hours that have the initial digit '2'
PR: 6 credit hours that have the initial digit '2'

3330 France: 1750-1825 is the study of France from the decline of the Old Regime to the end of the Second Republic.

3440 History of the British Empire and Commonwealth since 1815 is the transition from British Empire to Commonwealth of Nations.

3445 Witchcraft and the Witch-Hunts in Early Modern Europe is a history of witchcraft, demonology, and witch-hunts from 1400 to 1750, focusing on such themes as gender, the body and medical knowledge, religious dissidence, and popular culture.

3450 British History: 1485-1714 is the emergence of Britain under the Tudors and early Stuart monarchs.

3460 British History Since 1714 is British History from the accession of the
Hanoverians to the welfare state.

3490 History of Ireland Since the Great Famine is a survey of Irish history from the mid-nineteenth century to the present.

CR: the former HIST 3470

3520 Aboriginal History to 1763 (same as Anthropology 3520 and Archaeology 3520) examines Aboriginal history in North America from earliest European contact to the Royal Proclamation in 1763. Particular attention will be paid to historical encounters framed by first contacts, cultural exchange, trade, disease, religious encounters, conflict and diplomacy, and territorial encroachment.

CR: Anthropology 3520 and Archaeology 3520

UL: not applicable towards the Major or Minor in Anthropology

3525 Aboriginal History from 1763 (same as Anthropology 3525 and Archaeology 3525) examines the history of Aboriginal peoples in North America from 1763 to the twentieth century. Particular attention will be paid to Indigenous-settler relations, including Aboriginal policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization.

CR: Anthropology 3525 and Archaeology 3525
UL: not applicable towards the Major or Minor in Anthropology

3675 Navies and Societies Since 1650 is an examination of the rise of modern navies since 1650 that places navies and naval decisions within a broader national and international political, economic and social contexts.

CR: the former HIST 3802

3700 Art History: The Italian Renaissance (same as Visual Arts 3700) is an overview of the art and architecture of Renaissance Italy with an emphasis upon the historical context in which art was produced.

CR: Visual Arts 3700

3701 Art History: The Renaissance Outside Italy (same as Visual Arts 3701) is the Renaissance outside Italy from the late Fourteenth century and the international style through the 16th century.

CR: Visual Arts 3701

3760 Women in Western Society and Culture is a survey of major developments in the history of women from the fifteenth through the eighteenth centuries. The major themes addressed are: cultural and religious assumptions about women; demographic changes; women’s work roles; women’s participation in religious and political movements.

3770 Women in Western Society and Culture (II) are selected themes in the history of women in the modern period with a focus on cultural attitudes toward women, demographic trends affecting women, the impact of changing economic roles, and the development of feminism.

CR: the former HIST 3761

3840 Historical Methods is an introduction to the methods and practices of history in the modern era. This course is compulsory for Honours students and recommended for Majors, including those intending to apply for graduate studies. For Historical Studies students at Grenfell Campus this course is required for all Majors and Minors.

CR: the former HIST 4801

PR: 12 credit hours in History including HIST 1100/1101 or permission of the instructor

4101 The Renaissance in Europe, 1400-1550 is a seminar on the Renaissance in Europe, particularly in Italy and northern Europe, focusing especially on its intellectual and cultural aspects but also the social and gender history of the topic.

4230 Special Topics in Newfoundland History I are special studies in the History of Newfoundland.

4231 Special Topics in Newfoundland History II are special studies in the History of Newfoundland.

CR: the former Political Science 4731

4254 Special Topics in Canadian History: A History of Social Welfare is a study of a broad theme of the state and social welfare in Canada. It examines the origins of modern forms of social control as evidenced in the nineteenth century prison, the lunatic asylum, and the poorhouse. As well, it compares Canadian and British and American social welfare institutions and policies, and traces their historical evolution into the twentieth century.

4320 Special Topics in European History: The British Empire, 1688 to the Present has a range of special topics.

4410-4430 (Excluding 4411, 4419, 4421) Historical Problems are specialized studies in historical problems.

4560-4570 Special Topics in Social and Intellectual History are specialized studies in social and intellectual history.

4730 Art History: Modern Art I (same as Visual Arts 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.

CR: Visual Arts 4730
PR: 6 credit hours in art history or permission of the chair of the Visual Arts Program

4731 Art History: Modern Art II (same as Visual Arts 4731) is an examination of the various cultural and social forces between 1850 and 1914 which shaped the rise of the Modern movement.

CO: 6 credit hours in art history or permission of the chair of the Visual Arts Program
CR: Visual Arts 4731
PR: 6 credit hours in art history or permission of the chair of the Visual Arts Program

4821 Reading Course is a directed reading course for Honours and selected students including those intending to apply for graduate studies. Readings will be taken from a list of significant works in History, the Humanities, and the Social Sciences.

PR: permission of the Program Chair

4950 Independent Project in Historical Studies will have students complete an independent research project under the supervision of a faculty member or members. Topics must have the approval of the Program Chair of History.

PR: HIST 3840 and nine other History courses

13.19 Human Kinetics and Recreation

Human Kinetics courses are designated by HKR.

3555 Outdoor Recreation Management is an overview of outdoor recreation practices in Newfoundland and Canada. This course will examine the management of resources, conservation education and practices, development for public use or exclusion; legislation related to management; viability of facilities; national and provincial agencies; private commercial ventures; and future trends in management. Management strategies will form a major part of the course.

CR: the former RECR 3555 and the former PHSD 3550
UL: cannot be used as an elective towards the Environmental Studies Major for Graduates of the Two-Year Adventure Tourism Diploma Program

3565 Tourism/Commercial Recreation will examine behavioural factors influencing tourism; promotion of commercial recreation attractions; provincial strategies in travel and tourism; problems of leisure travel; stability of entrepreneurial ventures in tourism, and research and planning strategies relevant to commercial ventures.

CR: Tourism 1000, Tourism 2201, the former RECR 3555 and the former PHSD 3550

4555 Leadership and Supervision in Recreation is need, selection, training and supervision of leaders in recreation. Certification, standards and professional organizations. Evaluation of leadership - materials and methods used. Practical exposure to roles of both leader and supervisor through seminar and related fieldwork.

CR: the former RECR 4555 and the former PHSD 4550
UL: cannot be used as an elective towards the Environmental Studies Major for Graduates of the Two-Year Adventure Tourism Diploma Program

4575 Recreation Ethics, Issues and Trends will explore contemporary issues and issues identified by governments and recreation practitioners and the way in which these issues influence the delivery of leisure services.

CR: the former RECR 4575 and the former PHSD 4570

13.20 Humanities

Humanities courses are designated by HUMN.

1001 Humanities and the Contemporary World is a study of the relevance of humanities disciplines and texts to contemporary cultural forms and practices such as movies, popular music, television, comic books, graphic novels, professional sports, etc. The course will also focus on the mastery of composition skills. The course is a designated writing (W) course.

1002 Texts That Changed the World is a study of humanities texts which have helped to shape Western Civilization. The course is a designated writing (W) course.

PR: HUMN 1001

2000 Texts that Changed the World II is a continuation of Humanities 1002. It focuses primarily on political thought from the renaissance through modern eras and examines how developments in the understanding of what it means to be human inform the social and political world. The course is a designated writing (W) course.

2001 The Ancient World is a study of major cultural developments and achievements in art, literature, religion, philosophy, and science in the ancient Mediterranean during the period 400 BC to 400 CE. The course explores the great ancient civilizations of the Near East, Greece, and Rome.
and their influence on the shaping of Western culture and society. The course is a designated writing (W) course.

PR: HUMN 1001 and 1002

2002 Thought and Society in the Medieval World this course examines the development of medieval civilization through the consideration of thought, art, spirituality and politics. Medieval culture will be examined largely through primary texts centered on a series of key themes and historical-cultural watersheds. These texts will be contained in a course pack designed for this course. The course is a designated writing (W) course.

PR: HUMN 1001 and 1002

2010 Themes in Humanities (Interdisciplinary Seminar) is a seminar course in which themes have common interest to the Humanities will be discussed from the perspective of the various disciplines. The course is a designated writing (W) course.

PR: HUMN 1001 and 1002

3001 The Early Modern Period is a study of the major cultural developments and achievements in art, literature, religion, philosophy, and science in Western Europe during the period 1450-1650. The course is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3002 The Modern World examines emerging conceptions of the modern self and its expression in philosophy, science, political revolution and constitution, visual art and literature during the period 1650-1850. The course is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3010 The Nature of Interpretation introduces students to central concepts and debates concerning the sorts of interpretation that distinguish Humanities as a discipline. Students gain familiarity with contemporary and historical approaches. The course is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3020 Humanities and the Environment is an examination of the human understanding of the natural world from the perspectives of the literary arts, the visual arts, and music and religion. It is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3021 East Meets West - Asian Traditions and the Humanities is an examination of the influence of Asian currents of thought in the West in literature, philosophy, the visual arts, music and popular culture. This is a designated writing (W) course.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

3100-3109 Special Topics has a range of special topics in Humanities.

PR: 9 credit hours in Humanities with at least 3 credit hours at the 2000-level

4001 The Postmodern World is a study of major developments in the evolution of culture, thought, art, science, and beliefs in the Western world from the nineteenth century to the present day. The course is a designated writing (W) course.

PR: 12 credit hours in Humanities with at least 3 credit hours at the 3000-level

4010 Authors, Events, and Texts is a seminar course in which themes having common interest to the Humanities will be discussed from the perspectives of the various disciplines. This course focuses on close readings of its subject matter and is distinct from theme-oriented courses in Humanities. The course is a designated writing (W) course.

CR: the former HUMN 4000

PR: 24 credit hours in Humanities including HUMN 3100

4020-4029 Special Topics has a range of special topics in Humanities.

PR: 24 credit hours in Humanities including HUMN 3100

13.21 Mathematics and Statistics

At most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1052, 1053, 1080, 1081, 1090, 109A/B, 1150, 1151. Students who have already obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for Mathematics 1052 or 1053, nor can they receive credit for either of these courses.

At Grenfell Campus, students who have completed high school mathematics may enter directly into Mathematics 1090, 1050, 1051. However, placement in more advanced first-year mathematics courses is based upon a student’s pre-requisite level of proficiency in mathematics as demonstrated in a manner that is acceptable to the School of Science and the Environment. This may be through a combination of credit and grades earned in recognized high school or undergraduate mathematics courses or through scores earned in recognized, standardized examinations such as International Baccalaureate (IB), Advanced Placement (AP), or the College Board’s Subject Area Test in Mathematics Level I (SATM1) examinations. Where a pre-requisite has not been met through one of these means, a student will be required to complete the University’s Mathematics Placement Test (MPT) or the Calculus Placement Test (CPT). Students registering for first year mathematics courses online or through the St. John’s Campus should consult the Faculty of Science, Course Descriptions, Mathematics for placement information.

Mathematics courses are designated by MATH and Statistics courses are designated by STAT.

1000 Calculus I is an introduction to differential calculus, including algebraic, trigonometric, exponential, logarithmic, inverse trigonometric and hyperbolic functions. Applications include kinematics, related rates problems, curve sketching and optimization.

CR: the former MATH 1081
LH: 1.5
PR: MATH 1090 or 109B or a combination of placement test and high school Mathematics scores acceptable to the Department

1001 Calculus II is an introduction to integral calculus, including Riemann sums, techniques of integration and improper integrals. Applications include exponential growth and decay, area between curves and volumes of solids of revolution.

PR: MATH 1000 or the former MATH 1081

1052 Mathematics for Business covers topics which include elementary algebra and functions, sets, elementary probability, matrices, systems of equations, and linear programming.

CR: Math 1050 and Math 1051
LC: 4
UL: students who already have obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for this course, nor can they receive credit for it

1053 Classical Mathematics covers topics which include logic, permutations, combinations, mathematical systems, elementary number theory, and geometry.

CR: Math 1050 and Math 1051
LH: 4
UL: students who already have obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for this course, nor can they receive credit for it

1090 Algebra and Trigonometry provides students with the essential prerequisite elements for the study of an introductory course in calculus. Topics include algebra, functions and their graphs, exponential and logarithmic functions, trigonometry, polynomials, and rational functions.

CR: if previously completed or currently registered for MATH 1000, MATH 1001, 109A/B, the former 1080, or the former 1081
LH: 4
PR: a combination of placement test and high school Mathematics courses acceptable to the Department or the former MATH 104F

2000 Calculus III is an introduction to infinite sequences and series, and to the differential and integral calculus of multivariable functions. Topics include tests for the convergence of infinite series, power series, Taylor and Maclaurin series, complex numbers including Euler’s formula, partial differentiation, and double integrals in Cartesian and polar coordinates.

LH: 1.5
PR: MATH 1001

2050 Linear Algebra I includes the topics of Euclidean n-space, vector operations in 2- and 3-space, complex numbers, linear transformations on n-space, matrices, determinants, and systems of linear equations.

PR: A combination of placement test and high school Mathematics scores acceptable to the Department or 3 credit hours in first year Mathematics courses.

2051 Linear Algebra II includes the topics of real and complex vector spaces, basis, dimension, change of basis, eigenvectors, inner products, and diagonalization of Hermitian matrices.

PR: MATH 1000 and MATH 2050

2090 Mathematics of Finance covers the following topics: simple and
compound interest and discount, forces of interest and discount, equations of value, annuities and perpetuities, amortization schedules and sinking funds, bonds and other securities, contingent payments.

PR: MATH 1001

2130 Technical Writing in Mathematics is a project oriented course combining mathematical investigation and technical writing. By using computer programming, graphical and typesetting tools, students will explore mathematical concepts and will produce technical reports of professional quality. The latter will combine elements of writing and graphics to convey technical ideas in a clear and concise manner.

PR: MATH 1001 and (Computer Science 1510 or 1710 or 2710 or the former 2802 or Engineering 1020 or permission of the Chair of Computational Mathematics

2260 Ordinary Differential Equations I (same as the former MATH 3260) is an introduction to the theory of first order and first degree, higher order linear equations, variation of parameters, methods of undetermined coefficients, Laplace transforms, systems of differential equations. Applications include vibratory motion, satellite and rocket motion, pursuit problems, population models and chemical kinetics.

CR: the former MATH 3260 or the former Engineering 3411
PR: MATH 2000

2320 Discrete Mathematics are basic concepts of mathematical reasoning, sets and set operations, functions, relations including equivalence relations and partial orders as illustrated through the notions of congruence and divisibility of integers, mathematical induction, principles of counting, permutations, combinations and the Binomial Theorem.

CR: the former Computer Science 2740
PR: MATH 1001 or MATH 2050

2330 Euclidean Geometry is an introduction to Euclidean geometry of the plane. It covers the geometry of triangles and circles, including results such as the Euler line, the nine-point circle and Ceva's theorem. It also includes straight-edge and compass constructions, isometries of the plane, the three reflections theorem, and inversions on circles.

CR: the former MATH 3330
PR: MATH 2051 or 2320

2500 Statistics for Business and Arts Students is descriptive statistics (including histograms, stem-and-leaf plots and box plots), elementary probability, random variables, the binomial distribution, the normal distribution, sampling distribution, estimation and hypothesis testing including both one and two sample tests, paired comparisons, correlation and regression, related applications.

CR: STAT 2250, the former STAT 2510, Psychology 2910, Psychology 2925 and the former Psychology 2900
LH: 1.5
PR: MATH 1000 or MATH 1052 or 6 credit hours in first year courses in Mathematics or registration in at least semester 3 of a Bachelor of Nursing program or permission of the Head of Department.

2550 Statistics for Science Students is an introduction to basic statistics methods with an emphasis on applications to the sciences. Material includes descriptive statistics, elementary probability, binomial distribution, Poisson distribution, normal distribution, sampling distribution, estimation and hypothesis testing (both one and two sample cases), chi-square test, one way analysis of variance, correlation and simple linear regression.

CR: Engineering 4421, STAT 2500, the former STAT 2510, Psychology 2910, Psychology 2925 and the former Psychology 2900
LH: 1.5
OR: Statistical computer package will be used in the laboratory, but no prior computing experience is assumed
PR: MATH 1000 or the former MATH 1081

3000 Real Analysis I is proof techniques, structure of R, sequences, limits, continuity, uniform continuity, differentiation.

CR: the former MATH 2001
LH: 1.5
PR: MATH 2000

3132 Numerical Analysis I includes a discussion of round-off error, the solution of linear systems, iterative methods for nonlinear equations, interpolation and polynomial approximation, least squares approximation, fast Fourier transform, numerical differentiation and integration, and numerical methods for initial value problems.

CR: Computer Science 3731
LH: 1.5
PR: MATH 2000, MATH 2050, and Computer Science 1510 or 1710 or the former 2802 or Engineering 1020 or permission of the Chair of Computational Mathematics

3202 Vector Calculus deals with functions of several variables. Lagrange multipliers, vector valued functions, directional derivatives, gradient, divergence, curl, transformations, Jacobians, inverse and implicit function theorems, multiple integration including change of variables using polar, cylindrical and spherical co-ordinates, Green’s theorem, Stokes’ theorem, divergence theorem, line integrals, arc length.

CR: Physics 3810
PR: MATH 2000 and MATH 2050

3240 Applied Graph Theory examines algorithms and complexity, definitions and basic properties of graphs, Eulerian and Hamiltonian chains, shortest path problems, graph colouring, planarity, trees, network flows, with emphasis on applications including scheduling problems, tournaments, and facilities design.

CR: the former Computer Science 2741
PR: MATH 2320

3320 Abstract Algebra is an introduction to groups and homomorphisms including cyclic groups, cosets, Lagrange's theorem, normal subgroups and quotient groups, introduction to rings and ring homomorphisms including ideals, prime and maximal ideals, quotient rings, integral domains and fields.

PR: MATH 2320

3340 Introductory Combinatorics includes Topics such as distributions, the binomial and multinomial theorems, Stirling numbers, recurrence relations, generating functions, and the inclusion-exclusion principle. Emphasis will be on applications.

PR: MATH 2320

3370 Introductory Number Theory is perfect numbers and primes, divisibility, Euclidean algorithm, greatest common divisors, primes and the unique factorization theorem, congruences, cryptography (secrecy systems), Euler-Fermat theorems, power residues, primitive roots, arithmetic functions, Diophantine equations, topics above in the setting of the Gaussian integers.

PR: MATH 2320

3410 Mathematical Statistics I is basic probability concepts, combinatorial analysis, conditional probability, independence, random variable, distribution function, mathematical expectation, Chebyshiev's inequality, distribution of two random variables, binomial and related distributions, Poisson, gamma, normal, bivariate normal, t, and F distributions, transformations of variables including the moment-generating function approach.

OR: one and a half hour tutorial period weekly
PR: MATH 2000

4132 Introduction to Optimization is an introduction to optimization, analytic methods for functions of one variable and for functions of several variables, classical maxima and minima, necessary and sufficient conditions, constrained optimization, equality and inequality constraints, Kuhn-Tucker conditions, introduction to the calculus of variations, linear programming, simplex algorithm.

PR: MATH 3202 and 2260 (or the former MATH 3260)

PR: MATH 3202 and 2260 (or the former MATH 3260)

4242 Algorithms and Complexity is a study of the correctness and complexity of algorithms, with particular focus on algorithms important in mathematics. Topics may include sorting and binary search, string searching, integer multiplication and exponentiation, matrix multiplication, geometric problems such as closest pair of points and convex hull, probabilistic and approximative algorithms. This course discusses polynomial reductions and NP-completeness.

PR: MATH 3132 and 3240 and Computer Science 1510 or 1710 or 2710 or the former 2802 or Engineering 1020 or permission of the Chair of Computational Mathematics

4291-4299 Special Topics in Computational Mathematics is a variety of topics in Mathematics.

PR: permission of the Chair of Computational Mathematics

4340 Combinatorial Analysis continues most of the topics started in 3340 with further work on distributions, recurrence relations and generating functions. Generating functions are used to solve recurrence relations in two variables. Also included is a study of Polya's theorem with applications.

PR: MATH 2000 and 3340

4950 Senior Project is a course in which, under the guidance of a faculty member, students conduct a scientific study based upon original research or a critical review of extant data in an appropriate area. Normally the project will have a computational component. Students are required to submit a report and give a presentation. This project fulfills the Core requirement for a fourth-year individual project in the area of specialization. This is a Designated Writing Course.

PR: permission of Program Chair

13.22 Philosophy

In accordance with Senate's Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to
be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

Philosophy courses are designated by PHIL.

1200 Principles of Philosophy (same as the former PHIL 2200) is a general introduction to the study of Philosophy both as a contemporary intellectual discipline and as a body of knowledge. The course covers the main divisions, fundamental questions and essential terminology of Philosophy through a reading of classical texts (It is a required course for further courses in Philosophy programs. It is intended for students in first year who have completed one semester of university education).

CR: the former PHIL 2200

1600 Philosophy of Human Nature is an approach to philosophical thinking by way of analysis and critique of theories of human nature, classical and modern, and the world views associated with them.

CR: former PHIL 1001

2021 Logic is an introduction to traditional and modern logic open in any year to all students wishing acquaintance with basic logical skills.

2220 Principles of Human Knowledge are various concepts of knowledge - empirical, rational, transcendental, systematic. Their metaphysical grounds and implications. The concept of scientific knowledge; real and abstract entities; objectivity and subjectivity.

2551 Health Ethics examines concepts of health and illness and their ethical implications.

CR: the former PHIL 2803

2561 Environmental Ethics examines concepts of nature and their ethical implications.

CR: the former PHIL 2809

2561 Philosophy of Film introduces some of the central philosophers, topics and themes in the philosophy of film. Topics and themes include: the nature of film image, the relationship between film and "reality", the social/ political role and function of film and the nature and value of the documentary. The course will also consider the representation of broader philosophical idea in film. A film or films will accompany each section.

2701 History of Ancient Philosophy (same as Classics 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Classics 2701

2702 History of Modern Philosophy is a survey of the development of western Philosophy since the seventeenth century.

CR: the former PHIL 3700, the former PHIL 3701

3400 Political Philosophy is leading philosophical ideas concerning the origin and justification of political institutions.

3610 Philosophy and Literature is a study of the interrelationship of thought and imagination in philosophical and literary forms of writing.

3730 Plato is selections from the works of the Greek "lovers of wisdom" - the first philosophers - particularly Plato.

3740 Aristotle is the works and legacy of perhaps the most influential systematic thinker of all time.

3860 Hegel is selections from Hegel's system with emphasis on the nature of dialectical and speculative philosophy and its enormous influence in the present time.

3940 Existentialism is the philosophy and literature of Existentialism from Kierkegaard, Nietzsche and Dostoevsky to Sartre, de Beauvoir and Camus.

4250 Seminar in Metaphysics and Epistemology will have topics to be studied announced by the Department.

4700 Seminar in Special Authors and Texts will have topics to be studied announced by the Department.

13.23 Physics

Physics courses are designated by PHYS.

1020 Introductory Physics I is an algebra-based introduction to Newtonian mechanics. Topics covered include motion in one and two dimensions, Newton's laws, momentum, energy and work, and rotational motion. Previous exposure to physics would be an asset but is not essential.

CO: Mathematics 1090 or 109B

CR: PHYS 1050

LH: 3; six laboratory sessions per semester

OF: tutorial or problem sessions may be held on weeks when no laboratory is scheduled

PR: Level III Advanced Mathematics or Mathematics 1090 or 109B. It is recommended that students have completed at least one high school physics course.

1021 Introductory Physics II is an algebra-based introduction to oscillations, fluids, wave motion, electricity and magnetism, and circuits.

CR: PHYS 1020

LH: 3

PR: Mathematics 1000

1050 General Physics I: Mechanics is a calculus-based introduction to mechanics. The course emphasizes problem solving, beginning with a review of vectors and one-dimensional kinematics. The main part of the course covers motion in two dimensions, forces and Newton's Laws, energy, momentum, rotational motion and torque, and finally oscillations. For details regarding recommendations for students taking PHYS 1050, see Physics and Physical Oceanography, Note 4.

CO: Mathematics 1001

CR: PHYS 1020

LH: 3

PR: Mathematics 1000

1051 General Physics II: Oscillations, Waves, Electromagnetism is a calculus-based introduction to oscillations, wave motion, and electromagnetic. Topics include: simple harmonic motion; travelling waves, sound waves, and standing waves; electric fields and potentials; magnetic forces and fields; electric current and resistance; and electromagnetic waves.

CO: Mathematics 1001

LH: 3

PR: PHYS 1050, or 1020, or 1021 (with a minimum grade of 70%) and Mathematics 1001; Science 1807

2053 Fluids and Thermal Physics examines elasticity, fluid mechanics, thermodynamics, kinetic theory and statistical mechanics.

CO: Mathematics 1001 and PHYS 1051

LH: 3

PR: Mathematics 1001 and PHYS 1051; Science 1807

2056 General Physics VI: Modern Physics is special relativity, quanta of light, atomic structure and spectral lines, quantum structure of atoms and molecules, nuclei and elementary particles.

CO: Mathematics 1001 and PHYS 1051

CR: PHYS 2750

LH: 3

PR: Mathematics 1001, PHYS 1050 (or PHYS 1020 and PHYS 1021), and PHYS 1051; Science 1807

2065 Experimental and Computational Physics is an inactive course.

Cosmology: PR: 6 credit hours in Mathematics at the first year level

2400 Subatomic Physics is an introduction to nuclear and particle physics. Topics include nuclear properties and models; radioactive dating; fission; nuclear reactors; accelerators; the detection, classification, and properties of subatomic particles. Applications in areas such as ecology, dosimetry, medical physics and nuclear astrophysics are discussed.

PR: Level III Advanced Mathematics or Mathematics 1090 or 109B. It is recommended that students have completed at least one of Level II and Level III high school physics courses.

2535 Introduction to Analog and Digital Electronics covers the basics of the analog and digital electronics; direct current circuits, capacitors and inductors, alternating currents, test equipment and measurement, transducers, diodes and transistors, introduction to operational amplifiers, digital basics, digital circuitry and digital analog I/O. This course is a combined lecture/laboratory course with two three-hour sessions scheduled per week.

PR: Mathematics 1000 or equivalent, PHYS 1021 or 1051; Science 1807

2820 Computational Mechanics introduces computational methods in the context of Newtonian mechanics. Numerical differentiation and integration, numerical solutions to differential equations and data analysis are applied to projectile motion, N-body systems, oscillations and problems from astrophysics and geophysics. Implementation of numerical methods using computer programming is emphasized.

CO: Mathematics 2000

LH: 2

PR: Mathematics 2000 and PHYS 1051

3060 Electricity and Magnetism is point charges; Coulomb's law; electrostatic field and potential; Gauss' law; conductors; magnetostatics; Ampere's law; Biot-Savart law; dielectric and magnetic materials; electrostatic and magnetostatic energy; Lorentz force; time varying fields;
Faraday's law; Lenz's law; Maxwell's equations.

CO: Mathematics 2260 (or the former Mathematics 3260); Science 1807

3061 Electromagnetic Theory includes Maxwell's equations, energy and momentum in electromagnetic systems, EM waves, potentials and fields, dynamical systems of charges, radiation, the interaction of EM fields with matter, and the relativistic formulation of electromagnetism and its applications.

PR: PHYS 3060

CR: PHYS 2056 and PHYS 3151

PR: Mathematics 2000, PHYS 2056, PHYS 2151. PHYS 3220 is recommended.

3180 Observational Astrophysics covers theoretical topics including celestial mechanics, continuous and line spectra, stellar structure and nucleosynthesis, and stellar evolution. Observational topics include planning observations, acquisition of images with a CCD electronic camera, fundamentals of astronomical image processing, photometry, and stellar spectroscopy using a variety of software packages.

LH: 3

PR: Mathematics 2000, PHYS 2056. PHYS 2151 is recommended.

3220 Classical Mechanics I covers vector operations, coordinate transformations, derivative of vectors, Newton's laws, differential equations, kinematics and dynamics of a particle, linear and quadratic air resistance, terminal velocity, momentum of a time varying mass, center of mass system; work, momentum, centripetal force, energy, work-kinetic energy theorem, forces as the gradient of potential energy, time dependent potential energy, curvilinear one-dimensional systems, energy of a multiparticle system, calculus of variations, and Lagrangian Dynamics.

CO: PHYS 2820, Mathematics 2260 and the former 3220

PR: PHYS 2820, Mathematics 2260 and 3202

3230 Classical Mechanics II covers noninertial frames of reference, Newton's second law in a rotating frame, centrifugal force, Coriolis force, motion of rigid bodies, center of mass, rotation about a fixed axis, rotation about an axis of a tensor, Euler's equation with zero torque, simple harmonic oscillators, chaos theory, bifurcation diagrams, state-space orbits, Poincare sections, Hamiltonian dynamics, ignorable coordinate, phase-space orbits, Liouville's theorem, scattering angle, impact parameter, differential scattering cross section, and Rutherford scattering.

CO: Mathematics 3202

PR: PHYS 3220, and Mathematics 2260 and 3202

3250 Elementary Particles and Fields includes the Standard Model, classification of elementary particles and forces of nature, symmetries, conservation laws, quark model, quantum electrodynamics, quantum chromodynamics, and the theory of weak interactions.

PR: Mathematics 3202, Mathematics 2260 (or the former Mathematics 3260), PHYS 2056, PHYS 2400

PR: Mathematics 2000, PHYS 2053 and PHYS 2750 or 2056

3650 Quantum Mechanics I includes a review of elementary quantum physics and covers topics such as wave functions, operators, expectation values, the Schrödinger equation in 1-dimension, states and operators in Hilbert space, coordinate and momentum representations, quantum mechanics in three dimensions, angular momentum, spherically symmetric potentials, and approximation methods.

PR: Mathematics 3202, PHYS 2056, PHYS 3220

PR: Mathematics 2260 (or the former Mathematics 3260), and PHYS 3810 (or Mathematics 3202)

4100 Senior Physics Seminar is a review of current topics in Physics discussed in a seminar format. Seminars are presented by faculty, students, and guest speakers. Topics are normally drawn from the fields of sub-atomic & nuclear physics or astronomy & cosmology. This is a designated Writing course.

PR: normally restricted to Physics students who have completed 78 credit hours or more

4880 Physics Laboratory introduces the student to advanced laboratory work in several areas of physics.

PR: Physics students who have completed 60 credit hours or more; Science 1807

4950 Research Experience in Physics is an opportunity for students to participate in original research under the supervision of a faculty advisor. Students are required to present a written report and to give a seminar on their work.

PR: Physics students who have completed 78 credit hours or more and permission of the Physics Program Chair

13.24 Political Science

Political Science courses are designated by POSC.

1000 Introduction to Politics is an introduction to basic concepts in the study of politics, power, law, public policy and government, touching on major areas of political ideologies, institutions, and current domestic and international political issues. Suitable for students in all disciplines.

1010 Issues in Canadian Politics and Policy explores some of Canada's most pressing and interesting political and public policy issues. This course profiles important political problems facing federal and provincial politicians and society. Open to all students interested in Canadian politics, government and domestic public policy.

1020 Issues in World Politics explores some of the world's most pressing and interesting political issues. This course profiles important political problems, such as a power struggle within a particular country, a regional conflict, a territorial dispute, or a global conflict. Weight is placed on international organizations and the role they play in these situations. This course is recommended for all students interested in international politics.

2200 Introduction to International Politics is an examination of the "building blocks" of international politics including determinants, means, processes and ends. Emphasis is on the post-1945 period.

2300 Introduction to Comparative Politics is an introduction to comparative politics and techniques of comparative analysis across political jurisdictions. This course focuses on the differences between, and similarities among, a variety of countries and systems of government.

2500 Introduction to Political Behaviour - inactive course.

2600 Introduction to Public Policy and Administration outlines major concepts in, and issues relating to, the fields of public policy and administration. Introduces students to major conceptual issues that shape public policy and government, such as agenda setting, types of public policy models and public management processes. Open to all students interested in the study of public policy and public administration.

2800 Introduction to Canadian Politics and Government is an introduction to the structure and operations of institutions of Canadian government and the nature of political actors. Topics to be examined may include the constitution, federalism, parliament, political parties, political culture and elections.

CR: the former POSC 2710

3550 Politics and the Environment is an examination of the environmentalist movement, interest groups, and green parties; the impact of environmentalism on conventional parties and public opinion; and the dynamics of support for and opposition to the achievement of environmentalist objectives.

3731 Environmental Policy is an examination of the formation, implementation, and impact of public policies concerning the environment including an examination of different policy approaches and the problems of environmental regulation.

13.25 Psychology

Psychology 1000 and Psychology 1001 are prerequisites for all Psychology courses.

1000 and 1001 Introduction to Psychology is an introduction to Psychology as a biological and social science. Topics shall include research methodology, physiological processes, perception, learning, memory and cognition, human development, animal behaviour, emotion, motivation, consciousness, personality and individuality, psychological disorders and treatment, and social psychology.

CR: Psychology 1000 is a prerequisite for Psychology 1001

2925 Research Methods and Data Analysis in Psychology I will cover basic research methods and supporting statistical concepts and techniques. Basic methods will include observational techniques, correlational studies, and surveys. Supporting statistical concepts will include populations and
samples, measures of central tendency and variability, basic probability, correlation, simple linear regression and validity and reliability. Supporting statistical techniques will include producing tables and graphs, and the calculation and interpretation of measures of central tendency, variability, probabilities, correlation, and simple linear regression. Students will also learn how to write a description of a simple study in basic APA style, and how to use a statistical package to analyse surveys and calculate correlation. Basic ethical principles in conducting research will be introduced. This course includes a weekly laboratory.

CR: Psychology 2910, Statistics 2500, Statistics 2560, the former Psychology 2925, and the former Statistics 2510

LH: 3

2950 Research Methods and Data Analysis in Psychology II will cover basic experimental methods and supporting statistical concepts and techniques. Basic designs will include one factor designs (independent and repeated measures). Supporting statistical concepts will include statistical sampling distributions (t and F), internal and external validity, hypothesis testing, and simple interactions. Supporting statistical techniques will include independent and repeated measures t-tests, one-factor independent and repeated measures ANOVA, and selected multiple comparisons techniques. Students will also learn how to write a description of an experiment in APA style, how to critically analyse a report of an experiment, how to use and interpret a statistical package to analyse experimental data, and how to conduct literature searches.

CR: the former Psychology 2901, Statistics 2501, and Statistics 2560
LH: a weekly laboratory
PR: Psychology 2925 or equivalent

13.25.1 Survey Courses

2025 Survey of Developmental Psychology is a survey of the cognitive, social, and personality development of people. Development will be tracked from the prenatal stage to old age. Topics to be studied shall include: research methodology, genetics, prenatal development, environmental effects on prenatal development, attachment, emotional development, language development, intelligence, cognitive development, socialization, sex-roles and gender identity, adolescence, adulthood and aging.

CR: Psychology 2010, Psychology 2020, the former Psychology 2011

2125 Survey of Social Psychology is a survey of how the behaviour of individuals is influenced by others. Topics to be studied shall include: social facilitation, group influence, conformity, obedience, persuasion, and social change.

CR: Psychology 2100 and Psychology 2120

2225 Survey of Learning is a survey of learning phenomena and learning theories. Topics to be studied shall include: the evolutionary context of learning, habituation and sensitization, imprinting, Pavlovian conditioning, instrumental learning, generalization and discrimination in learning and neural mechanisms of learning.

CR: Psychology 2240 and the former Psychology 2250

2425 Survey of Cognitive Psychology is a survey of how humans process and retain information. Topics to be studied shall include: perception and pattern recognition, attentional processes, and memory. The influence of stored information on selected behaviours will be considered. Selected behaviours may include language processing, concept formation, problem solving, decision making and practised and skilled performance.

CR: Psychology 2440 and Psychology 3410

2625 Survey of Personality is a survey of the theories of personality and relevant selected areas of research in the area of personality. Issues related to the application of this information to understanding abnormal behaviour will also be discussed. Theoretical systems covered will include: psychoanalytic, humanist, and social learning theories. The emphasis will be on humanism, traits and dispositions, social learning theory, psychological constructivism, information processing and biological theories of personality.

CR: Psychology 210, the former Psychology 2620, and the former Psychology 2273

2825 Survey of Biological Psychology is a survey of the biological bases of behaviour. Topics to be studied shall include: the structure and function of the nervous system, sensory structures and sensory coding, homeostasis, emotions, circadian rhythms and sleep, sexual behaviour, psychopharmacology, consciousness and language, behavioural evolution and behaviour genetics.

CR: Psychology 2810 and the former Psychology 2850

13.25.2 Contemporary Issues Courses

3025 Contemporary Issues in Developmental Psychology examines in depth one or more areas of research within developmental psychology. Some topics that may be examined include cognitive development, social development, developmental psychopathology, and child eyewitness testimony.

PR: Psychology 2025 and Psychology 2925

3040 Contemporary Issues in the Psychology of Death and Dying uses psychological research, theory, and clinical experience to study death, dying and bereavement throughout the life cycle. Some selected topics include understanding death, the process of dying, care of the dying, medical ethics, suicide, and the psychological impact of life-threatening conditions. In addition, trauma, grief, and bereavement in children, adolescents, and adults are explored.

PR: Six credit hours in 2000 level psychology courses

3125 Contemporary Issues in Social Psychology examines in depth one or more areas of research within social psychology. Some topics that may be examined include the psychology of prejudice, criminal behaviour, social influence, and aggression.

PR: Psychology 2125 and Psychology 2925

3126 Contemporary Issues in the Psychology of Women explores the psychology of women from varying cultural perspectives, such as racial, sexual orientation, age and class. Topics include the history of women in psychology, women’s development throughout the life span, women and social relationships, and violence against women.

PR: Six credit hours in 2000 level psychology courses

3225 Contemporary Issues in Learning examines in depth one or more areas of research in learning and cognition. Topics may include associative learning, instrumental conditioning, discrimination learning, category formation, memory, navigation, social cognition and learning, intelligence, concepts of time and number, self-awareness and communication and language.

PR: Psychology 2225 and Psychology 2925

3226 Contemporary Issues in the Psychology of Education is an advanced exploration to the application of psychology to educational issues in a variety of settings. It examines the theoretical and applied aspects of learning and cognitive development; motivation; personal and social development; and evaluation, measurement, and assessment.

PR: Six credit hours in 2000 level psychology courses

3325 Contemporary Issues in Sensation and Perception examines the functioning of human sensory systems and how physical stimuli are transformed into signals that can be understood by the nervous system. In both human and animal models how the brain receives and processes information from the visual, auditory, gustatory, olfactory, and somatosensory systems may be examined. Basic psychophysics may also be examined.

PR: Psychology 2925 and Psychology 2425 or Psychology 2825

3425 Contemporary Issues in Memory and Cognition uses current psychological theories and research to examine aspects of human memory and cognition. Topics may include, but are not limited to, perception and pattern recognition, attentional processes, knowledge representation, working and long term memory, language, problem solving, decision making, expert performance, and abnormalities in cognition.

PR: Psychology 2425 and Psychology 2925

3525 Contemporary Issues in Emotion introduces the biological, cognitive, and social influences on emotions. Attention is given to unconscious (automatic) processes, nonverbal emotional expressions, and understanding specific emotions. Contemporary research may be highlighted in such areas as the effect of hormones, emotional intelligence, the consequences of problems in emotional development, or emotions in therapy.

PR: Psychology 2925 and any Survey Course in Psychology from the Grenfell Campus Psychology Program

3625 Contemporary Issues in Personality examines in depth one or more topics of research with personality psychology. Some topics that may be examined include stress and health, psychoanalysis, psychology of motivation, and personality in work organizations.

PR: Psychology 2625 and Psychology 2925

3626 Contemporary Issues in Abnormal Psychology explores the diagnosis of abnormal behaviour and the treatment, classification, and diagnosis. The core theoretical perspectives on psychological disorders are
examine. For each disorder the diagnostic criteria, etiology, treatment, and prognosis is presented. This course enhances the students' ability to think critically about issues pertaining to mental health and illness.

CR: Psychology 3410, Psychology 3650 or the former Psychology 3600
PR: Psychology 2625 and Psychology 2925

3627 Contemporary Issues in Psychotherapy introduces students to the major theories, concepts and practices of contemporary approaches to psychotherapy. It includes the exploration of ethical and professional issues in professional practice.

PR: Psychology 2625 and Psychology 2925

3628 Contemporary Issues in Psychological Testing and Measurement explores the development and application of tests and techniques for psychological assessment. A review of test construction and evaluation examines methods of item analysis, reliability, validity, and test norms. The major domains of applied psychological assessment are examined. Ethical issues in psychological assessment are presented throughout the course.

PR: Psychology 2950 and any one of Psychology 2025, Psychology 2425, Psychology 2625.

3725 Contemporary Issues in Animal Behaviour includes one or more areas of research in animal behaviour and/or evolutionary psychology. Topics may include history of animal behaviour and/or evolutionary psychology, genetic analysis of behaviour, evolutionary theory and natural selection, development of behaviour, sensation and perception, orientation, foraging, antidepressant behaviour, learning, cognition, sociality and dispersion, sexual reproduction and sexual selection, parental care and mating systems, altruism, aggression, communication and social dominance.

PR: Psychology 2925 and Psychology 2825 or Psychology 2225

3825 Contemporary Issues in Physiological Psychology includes one or more areas of research in neuroscience and/or behavioural neuroscience. Topics may include neurophysiology and neuroanatomy, methodology including brain imaging, developmental disorders, sensory-perceptual and motor systems, physiological basis of attention, memory, language, emotions and spatial behavior, alterations of consciousness, neurological disorders, plasticity, recovery and rehabilitation and neuropsychological assessment.

PR: Psychology 2625 and Psychology 2925

13.25.3 Senior Courses

4910 Systems of Psychology is a study of paradigms and explanations in contemporary psychology in the context of their historical antecedents.

PR: at the St. John’s campus, 30 credit hours in Psychology courses required in the majors program and admission to a Major in Psychology or Behavioural Neuroscience or, at the Grenfell campus, 30 credit hours in Psychology courses including Psychology 3950

4925 Senior Seminar in Psychology is weekly seminars for faculty and senior students in Psychology. Current issues in academic and professional psychology shall be discussed.

PR: 30 credit hours in Psychology including Psychology 3950 or permission of the Chair of Psychology

4950 Independent Project in Psychology is under the supervision of a Faculty member where students will independently carry out approved projects and prepare reports of their findings.

CR: Psychology 4951
PR: 30 credit hours in Psychology including Psychology 3950 or permission of the Chair of Psychology

4951 Honours Project in Psychology I is under the supervision of a Faculty member and each student will independently review an area of psychology and prepare a thesis proposal for further investigation.

CR: Psychology 4950
PR: 30 credit hours in Psychology including Psychology 3950 or permission of the Chair of Psychology and admission to the Honours program in Psychology

4959 Honours Project in Psychology II is a continuation of Psychology 4951. Under the supervision of a Faculty member, each student will independently carry out an approved project which will result in an honours thesis.

PR: Psychology 4951 or the permission of the Chair of Psychology and admission to the Honours program in Psychology

13.25.4 Non-Restricted Courses

2150 Introduction to Forensic Psychology will provide an in-depth overview of the relationship between psychology and the law. A variety of topics will be discussed and critically evaluated, including the use and misuse of psychology-based investigative methods such as offender and geographic profiling, detection of deception, investigative interviewing, eyewitness testimony, jury decision-making, corrections and criminal responsibility.

PR: PSYC 1000 and 1001
UL: cannot be used towards the Psychology major

2800 Drugs and Behaviour is an examination of the neurophysiology of drug action, the measurable effect of drugs on experimentally controlled behaviour, and a survey of information available on common self-administered drugs and their immediate and long-term effects.

PR: PSYC 1000 and 1001
UL: cannot be used towards the Psychology major

3533 Sexual Behaviour covers the most important aspects of human sexuality with a psychology theory and research framework. The course will examine the biological, behavioural and socio-cultural bases of the human sexual response. Topics include sexual interaction and communication, contraception, sexually transmitted infections, reproduction, sexual orientation, transgender and intersex, variations in sexual behaviour, sex and gender, sexual dysfunctions and therapy, and sexual coercion.

PR: PSYC 1000 and 1001
UL: cannot be used towards the Psychology major

13.26 Religious Studies

Unless otherwise specified, Religious Studies courses do not have prerequisites. Students who register in a 3000- or 4000-level course are encouraged, however, to make sure that they have adequate preparation for that course, preferably by having completed a first- or second-year course in the field.

Religious Studies courses are designated by RELS.

1000 The Religions of the World is an introduction to the basic beliefs and practices of the world’s great religions.

OR: the former RELS 2010

1032 Introduction to Asian Religions and Culture is a broadly based survey course introducing students to the religions, culture, and societies of Asia. Traditions explored may include those of India (Hinduism, Buddhism, Sikhism, Jainism), China (Daoism, Confucianism, Buddhism), Japan (Shinto, Zen Buddhism), and Korea.

2013 Introduction to Christianity is a study of the Christian tradition, its development and variety. The course will include an examination of the beliefs and practices of both Eastern and Western Christianity and a study of the main differences among the major Western denominations.

2050 The Old Testament is an introduction to the historical background, literary structure, and content of the Old Testament. Emphasis will be placed on the authorship and dating of the various texts that comprise the Old Testament, as well as on major themes, figures, and events.

2051 The New Testament is an introduction to the history and literary structure of the documents comprising the New Testament. Emphasis will be placed on the major themes found in these documents and on the distinctiveness of approach of the individual writers.

2350 Religious Institutions (same as Anthropology 2350) is a contextual study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and ritual revitalization.

CR: Anthropology 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

[[2400 Buddhism examines the history of Buddhist traditions in Asia, with consideration of the major developments in Buddhist philosophy, institutions, and practices.]

CR: the former RELS 3400

2410 Hinduism examines the history of Hindu religious traditions, their major religious texts, institutions, and practices, and their role in social, political, and cultural movements in India and in Hindu diaspora communities.

CR: the former RELS 3410

2610 Introduction to Religious Ethics is an introduction to religious ethics through the systematic study of selected writers and issues in biomedicine, human sexuality, and social justice. Possible topics for discussion include euthanasia, abortion, poverty, and unemployment.

CR: the former RELS 2600 and the former RELS 2601

3010 Greek Religion (same as Classics 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Classics 3010 and the former RELS/Classics 3121

3020 Roman Religion (same as Classics 3020) is a study of the role of religion in the private and public life of the Roman world.

CR: Classics 3020 and the former RELS/Classics 3121

3025 Jesus of Nazareth is a study of the historical Jesus. Beginning with an assessment of the relevant source material, this course explores what can be known about the life of Jesus of Nazareth in its historical and cultural contexts.
3210 Paul and His Writings is a study of the writings of the Apostle Paul in the New Testament, and his contribution to Christianity in the cultural and historical milieu in which he lived and was active.

3310 Judaism at the Time of Jesus will explore the developments in Jewish thought, institutions, beliefs, and practices from the Babylonian Exile of the sixth century B.C.E. to the time of Jesus, King Herod and the Roman Empire of the first century C.E. CR: the former RELS 3220

3401 Zen, Buddhist Meditation, and Buddhist Psychology examines the relationship between meditation and theories of human psychology in Buddhism from its origins to its formulation in Zen.

3820 Religion and the Arts (same as Visual Arts 3820) is an examination of the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture and dance. CR: Visual Arts 3820

3831 Religious Themes in Contemporary Songwriting is a study of religious themes in contemporary songwriting through the in-depth examination of the work of a selection of contemporary songwriters. The course will explore how religious questions and themes are handled in contemporary song and explore how song as an artistic medium expresses religious meaning. Songwriters to be explored may include the following: Bob Dylan, Bob Marley, Joni Mitchell, Leonard Cohen, Van Morrison, Tori Amos, Nick Cave, Alanis Morissette, Julie Miller, the Lovin Brothers, the Stanley Brothers, Hank Williams, etc.

3880 Religion, Worldviews, and the Environment examines the human connection to the natural world as expressed in traditional religions, indigenous worldviews and contemporary approaches to environmental crises.

13.27 Science

Science courses are designated by SCI.

1807 Safety in the Scientific Laboratory introduces students to safety practices required for working in science laboratories where hazards are present. Students complete individual online modules in Laboratory Safety and WHIMIS. Normally, it will be taken before the start of the semester in which students take their first science laboratory course with this prerequisite, and it must be completed no later than the first Friday of the semester. Check department lists of courses to see where this is a prerequisite.

4000 Senior Science Seminar is a review of current topics in science discussed in a seminar format. Seminars will be presented by faculty, students and guest speakers. This will be a designated Writing Course. PR: Permission of the Program Chair. This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4950 Senior Project requires students to work either individually or in pairs on developing a poster presentation on specific scientific topics of current interest. This will require a detailed proposal, followed by the necessary relevant research in appropriate journals and Internet sources. Participants in this course will organize a mini-conference, to be held at the end of the semester. These posters will be presented. Where appropriate, students will be encouraged to integrate knowledge from at least two different scientific disciplines in the development of this project. This will be a designated Writing Course. PR: This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4951 Honours Project I is the preparation of a project proposal under the guidance of a faculty supervisor, including a comprehensive bibliographical review, with the aim of producing a well-annotated Bibliography. This will be a designated Writing Course. PR: Permission of the Program Chair. This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4959 Honours Project II is a continuation of SCI 4951. Under the supervision of a Faculty Advisor, students will prepare an Honours Thesis. The preparation of this will entail some original research, and will require the student to integrate knowledge from at least two disciplines. This will be a designated Writing Course. PR: SCI 4951 and permission of the Program Chair

13.28 Social/Cultural Studies

Social/Cultural Studies courses are designated by SCCU.

2000 Introduction to Social/Cultural Studies introduces students to the intellectual and historical contexts of anthropology, sociology and cultural studies as the central academic foci of Social/Cultural Studies. Readings and lecture materials, drawn from each of the three disciplines, introduce students to core concepts, ideas and debates found within each discipline and the ways in which all three disciplines contribute to Social/Cultural Studies as an interdisciplinary field of study.

2244 The Graphic Novel - Historical, Cultural and Literary Contexts (same as English 2244) examines the historical, cultural and literary impact of the Graphic Novel; investigates its continuing development; and introduces students to significant works within the genre. CR: English 3842, English 2244

4000 Interdisciplinary Seminar in Social/Cultural Studies is conducted through faculty presentations, assigned readings and group discussions and students will learn how to engage and evaluate the broad debates within Anthropology, Folklore and Sociology. Rather than focus on narrow substantive material from the disciplines, this seminar will emphasize the larger shifts and challenges which have led to new topics and methods of analysis within the social sciences. PR: completion of 90 credit hours or more and admission to Social/Cultural Studies

4100 Issues in Cultural Studies represents an examination of the concept of culture, as it is presently used within Anthropology, Folklore and Sociology. Particular attention will be paid to the area of Cultural Studies, and the ways in which that approach has re-energized an interest in the role of culture in modern society. PR: completion of 90 credit hours or more and admission to Social/Cultural Studies

4850 Independent Project in Social/Cultural Studies is under the supervision of a faculty member and students will independently carry out approved projects of direct relevance to social and cultural phenomena, and prepare reports of their findings. PR: SCCU 4000

13.29 Sociology

Sociology 1000 is a prerequisite for all further Sociology courses except Sociology 2250 and those cross-listed with Anthropology. Credit is not given for both Sociology 1000 and the former Sociology 2000. Before taking 3000-level courses, students should have taken at least 6 credit hours in courses below the 3000 level. Courses at the 4000 level will normally be taken by students who have previously taken at least 9 credit hours in courses at the 3000 level.

The following courses, cross-listed with Anthropology and identified by the prefix "S/A", are also taught at the introductory level: 2200, 2210, 2220, 2230, 2240, 2260, 2270, 2280, and 2350. A minimum of two of these courses is prerequisite to further cross-listed courses. These courses are open to be taken as first courses or may be taken to follow up a Sociology introductory course.

Sociology courses are designated by SOCI.

1000 Introduction to Sociology (same as the former SOCI 2000) is an introduction to the concepts, principles, and topics of Sociology. This course is a prerequisite to most departmental courses.

CR: the former SOCI 2000

2100 Social Inequality introduces the subject of social inequality and stratification, examines social inequality in historical perspective, reviews major theories about social inequality, and considers key social developments in contemporary societies in the area of social inequality.

2120 Technology and Society is an examination of the role of technology in society. Topics may include the emergence of modern technological society, the impact of new technologies on social organization and culture and the institutionalization of science and the production of scientific knowledge. The course also explores the ideological functions of science and technology in advanced industrial societies as well as the question of “the domination of nature”.

2200 Communities (S/A) is an interdisciplinary examination of the concept of Community. Readings will include community studies from North America and Europe.

2210 Communication and Culture (S/A) is an examination of verbal and non-verbal systems of communication, and the influence of language on
human cognition.

UL: not applicable towards the Major or Minor in Anthropology

2220 Labrador Society and Culture is the sociology and anthropology of Labrador. The focus is on social and cultural aspects of contemporary Labrador.

2230 Newfoundland Society and Culture (S/A) (same as Folklore 2230) is the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.

CR: Folklore 2230

UL: not applicable towards the Major or Minor in Anthropology

2240 Canadian Society and Culture (S/A) is a descriptive and analytic approach to the development of Canadian society and culture.

UL: not applicable towards the Major or Minor in Anthropology

2250 Changing World is sociological analysis of contemporary world issues and social problems.

2260 War and Aggression (S/A) is critical review of ethological, psychological, and sociological approaches to the understanding of violence and organized aggression.

2270 Families (S/A) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

2280 The City (S/A) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

2350 Religious Institutions (S/A) (same as Religious Studies 2350) is comparative study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.

CR: Religious Studies 2350

UL: not applicable towards the Major or Minor in Anthropology

2610 Socialization - inactive course.

3040 Introduction to the Methods of Social Research has as its objectives (1) to introduce basic concepts underlying research in the social sciences, and (2) to make students familiar with some techniques that are useful in the analysis of a wide range of sociological data and that represent a good foundation for later study of more advanced techniques.

3140 Social Movements (S/A) examines the major social movements that have driven social changes related to gender equality, social justice, human rights, and the environment. The course asks why people become involved in social movements, and what factors contribute to movement success. The course also examines social movements' use of mass media and new media technologies as tools for reaching the public and provoking social and cultural transformation.

UL: not applicable towards the Major or Minor in Anthropology

3150 Classical Social Theory is an introduction to the work of major 19th- and early 20th-century social theorists including Marx, Durkheim, Weber and Freud.

3160 Contemporary Social Theory is an exploration of selected topics from issues in contemporary social theory, including theories of feminism, the state, the environment, culture, organization, and communication.

PR: SOCI 3150

3210 Persistence and Change in Rural Society (S/A) assesses the social and cultural significance of the rural experience in the face of expanding urbanization. Topics may include (a) the nature of rural society in Canada, (b) similarities between Canadian and European rural society, (c) utopian and anarchist movements in rural life, and (d) reaction of agricultural populations to external influence.

3290 Deviance is major sociological theories and methodological techniques central to the study of deviance and crime are outlined and evaluated. The distribution, attributes and explanations of a variety of forms of deviance are examined, which may include violence, sexual deviance, delinquency, addiction, mental disorder, theft, organized crime, political deviance and corporate deviance.

3314 Gender and Society (S/A 3314) is an examination of biological, psychological, and sociocultural aspects of gender, with an emphasis upon contemporary directions of change in sex roles.

3395 Criminal Justice and Corrections provides an introduction to the operation of the Canadian criminal justice system. Topics to be examined may include the origin, nature and utilization of criminal law, policing, adult and juvenile courts, sentencing, correctional institutions, and community based corrections (probation, parole, community service). Criminal justice policy formulation and application are also discussed.

PR: SOCI 3290

3731 Sociology of Culture is a comparative examination of major contemporary sociological texts on the relationship between culture, broadly understood as symbolic systems, and social structure.

4071 Social and Cultural Aspects of Health and Illness covers topics which may include; cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine. Open to those without normal prerequisites by permission of the Instructor.

4072 Social and Cultural Aspects of Death (S/A) will cover topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the Instructor.

13.30 Sustainable Resource Management

Sustainable Resource Management courses are designated by SRMG.

2000 Sustainable Resource Management I: Marine and Terrestrial Environments is an introduction to the interdisciplinary field of sustainable resource management, including marine and terrestrial environments. The course focuses on sustainable practices rather than profit or resource extraction optimization. First Nations' perspectives will also be considered.

PR: Geography 1050 or the former Geography 1000

2001 Sustainable Resource Management II: Industry-Specific Approaches develops the topics presented in Sustainable Resource Management 2000 with reference to specific industries such as the fishery, forests, mining, oil and gas, soils, and water. This course traces the importance of resources in their historical context both locally and globally.

PR: SRMG 2000

3000 Regional Planning and Management is an introduction to the concepts and processes of regional planning, development, and management. The course addresses planning history and dominant historical contributions to regional, urban, and rural morphology. Planning theory, planning practice, and management strategies are studied.

PR: SRMG 2000 and SRMG 2001

3001 Environmental Planning and Management focuses on balancing economic growth and environmental objectives. Environmental risk analysis, environmental auditing, and First Nations' perspectives will also be studied.

PR: SRMG 3000

3002 Biodiversity focuses on the three dimensions of biodiversity (genetic diversity, species diversity, and ecosystem diversity) and their relationships. Biodiversity will be addressed from an interdisciplinary perspective as genes, species, and ecosystems are of economic and biological interest.

PR: Biology 1001, SRMG 2000, and SRMG 2001

4000 Remote Sensing, Image Interpretation, and Resource Management builds on topics introduced in Environmental Studies 2000 and Environmental Studies 3001. The course addresses the use of remotely-sensed images to track the location, health, and variety of natural resources such as forests, crops, and migratory populations. The lab component of the course employs GIS, GPS, satellite imagery, and aerial photography to address research concerns such as oil spills, forest fire management, iceberg tracking, ocean temperature monitoring, mining exploration, and oil and gas development.

LH: 3

PR: Environmental Studies 2000 and Environmental Studies 3001

4001 Renewable and Non-Renewable Energy Resources presents an interdisciplinary approach to renewable and non-renewable energy resources and their management. The course examines the existing interaction of economy's dependence on fossil fuels and studies renewable energy resources such as wind, solar, and geothermal.

PR: SRMG 2000

4002 Risk Assessment and Management is an introduction to risk assessment and management as interdisciplinary.

PR: Environmental Studies 4000

4003 Environmental Law is an introduction to laws protecting the environment in Canada and elsewhere. The course examines environmental rules and activities through the study of legal precedents and contexts. Laws and policies of the federal, provincial, and local levels of government including those pertaining to First Nations are addressed as well as their effects on the environment. Case studies are employed.

PR: Environmental Studies 1000

4010 Research Seminar in Sustainable Resource Management is the senior seminar in which selected sustainable resource management topics are examined from an interdisciplinary perspective. The seminars are presented on current research and environmental issues by faculty,
students, and guest speakers from universities, government, and industry. PR: Enrolment in the final year of the Sustainable Resource Management program or permission of the Program Chair.

4901-4910 Special Topics in Sustainable Resource Management will have topics to be studied announced. PR: SRMG 2000 and SRMG 2001

4950 Independent Research Project requires that students carry out an approved project on a topic in Sustainable Resource Management and prepare a major paper under the supervision of a faculty member. Students will undertake both a systematic literature review and independent research. PR: Permission of the Sustainable Resource Management Chair

13.31 Theatre

Theatre courses are designated by THEA.

1000 and 1001 Introduction to the History of Theatre I and II are historical surveys of the art of the theatre. The history of theatre will be studied in terms of the evolution of performance and of the physical theatre from their origins in a variety of social rituals and contexts through to their present plurality of forms. At the same time, the nature and function of the various components of theatrical performance (acting, directing, design, etc.) will be analysed in terms of period philosophical, social, cultural, political and religious contexts. These courses are open to non-theatre students.

1010 Introduction to Acting is an appreciation of the fundamentals of the craft of acting. Basic exercises in voice, movement, relaxation and concentration, improvisation and script analysis will introduce the student to the imaginative and physical skills required by an actor. This is a basic course for both Acting and Technical Theatre Production majors. AR: attendance is required
OR: 6 hours of studio per week

1020 Introduction to Technical Theatre Production is an appreciation of the basic vocabulary and techniques of the various technical and organizational structures and practices of staging plays. Areas of concentration will include scenic and costume construction, basics in lighting, painting, props, sound and stage management. This is a basic course for both Acting and Technical Theatre Production majors. AR: attendance is required
OR: 6 hours of studio per week

1110 Acting I is an introductory course for those majoring in acting. Emphasis on voice, speech, movement and text analysis. Various learning methods will be employed, from sensitivity exercises to improvisation and creative imagination exercises. Participation in in-class performance is required. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1000, THEA 1010, and THEA 1020 and admission to the Theatre Major

1120 Technical Theatre Production I is an introductory course for those majoring in Technical Theatre Production. Emphasis on the fundamentals of scenic carpentry, wardrobe, sound, lighting, crewing, painting and stage management. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1000, THEA 1010, and THEA 1020

1200 Concert Dance is an overview of the basic techniques of Western concert dance forms such as jazz, ballet, and contemporary dance within their historical, cultural, and aesthetic contexts. The course develops basic body awareness and alignment and explores the basics of codified dance technique. This course is open to non-Theatre students. AR: attendance is required
OR: 3 hours of studio per week

1250 Improvised Movement and Conditioning is an exploration of the basic development of healthy physical practice for movement training including conditioning and improvisation. Students will investigate body awareness, self-expression, dynamic alignment, and the basic principles of creating movement-based performances. This course is open to non-Theatre students. AR: attendance is required
OR: 3 hours of studio per week

2010 and 2011 Acting II are second level courses for Acting Majors. Emphasis is on speech, text analysis and scene study. Various techniques and texts will be employed to root the student in the fundamental process of acting. A beginning approach to understanding the body as an instrument and the techniques required to use the instrument. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1001 and THEA 1110. THEA 2010 is a prerequisite for THEA 2011 and admission to the Acting Major

2020 and 2021 Technical Theatre Production II are second level courses for the Technical Theatre Production Major. Emphasis is on the fundamentals of drafting, stage management and props development. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1001 and THEA 1120. THEA 2020 is a prerequisite to THEA 2021

2080 and 2081 Production Acting both involve practical work in each case work for Acting Majors in a theatre department production. AR: attendance is required
CH: 4 credit hours each
OR: 12 hours of studio per week
PR: THEA 1110

2090 and 2091 Production - Technical Theatre both involve practical work for Technical Theatre Production Majors, in a departmental production in a supporting capacity (i.e. assistant stage manager, wardrobe assistant, etc.). AR: attendance is required
CH: 4 credit hours each
OR: 12 hours of studio per week
PR: THEA 1120

3010 and 3011 Acting III are intermediate level courses for the Acting Major. Continued emphasis on speech, voice production, text analysis, etc. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2010 and THEA 2011, THEA 2080 and THEA 2081

3020 and 3021 Technical Theatre Production III are intermediate courses for Technical Theatre Production Majors. Continued emphasis on carpentry, painting, lighting, sound, wardrobe, stage management, etc. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2020 and THEA 2021, THEA 2090 and THEA 2091

3060 and 3061 Master Classes I and II (Technical Theatre Production) are courses for Technical Theatre Production students with a guest artist in a particular area of specialization. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2020 and THEA 2021. THEA 3060 is a prerequisite for THEA 3061

3070 and 3071 Master Classes I and II (Acting) are courses for Acting students with a guest artist in a particular area of specialization. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2010 and THEA 2011. THEA 3070 is a prerequisite for THEA 3071

3080 and 3081 Production - Acting both involve practical work in each case work, for Acting Majors on a department of theatre production. AR: attendance is required
CH: 4 credit hours each
OR: 16 hours of studio per week
PR: THEA 2010 and THEA 2011, THEA 2080 and THEA 2081

3090 and 3091 Production - Technical Theatre both involve practical work, for Technical Theatre Production Majors on a departmental production in a significant capacity (i.e. stage manager, crew chief, head of props, etc.). AR: attendance is required
CH: 4 credit hours each
OR: 16 hours of studio per week
PR: THEA 2020 and THEA 2021, THEA 2090 and THEA 2091

3605 Music Theatre Workshop - inactive course.

4001 Theatre Institute at Harlow is a full semester’s work, utilizing both the Harlow Campus and Grenfell Campus, comprising a “thesis production” involving fourth-year acting and stagework students in major responsibilities. A practical component in Theatre Criticism utilizing the resources of the Harlow Campus proximity to London and Stratford. A series of Master Classes, Workshops, Field Trips and Guest Lectures offered by members of the theatre profession in England. A project in a selected area of theatre history. AR: attendance is required
CH: 10
PR: THEA 4010 or THEA 4020, THEA 4060 or THEA 4070, THEA 4080 or THEA 4090, THEA 4030, THEA 4040

4010 Acting IV is an advanced course for acting majors. Concentration on advanced scene study on texts illustrating period styles or genres of plays. AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 3010 and THEA 3011, THEA 3080 and THEA 3081

4020 Technical Theatre Production IV is an advanced course for Technical Theatre Production Majors with individual concentration on specific technical skills. AR: attendance is required

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
philosophical, historical and contemporary issues and challenges in resource recreation and ecotourism. Opportunities for tourism activity based on special or unique ecological considerations and other forms of alternative tourism are examined, as are issues around the sustainability, impacts, risk management, programming, tour operation, ethics, development, marketing and parks management.

PR: TRSM 3100. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

3100 Resource Valuation and Tourism Activity Impact Assessments considers contemporary issues in the allocation of scarce natural and cultural resources demanded by tourism activity, and the determinants of the demand and supply for tourism recreation. Students will examine the impacts of those tourism and leisure activities upon natural systems (e.g., cultural, ecological, socio-cultural, etc.) and economies, (local, regional, etc.). Visitor impacts will also be considered.

PR: Statistics course, Economics 1010 (or the former 2010) and Economics 1020 (or the former 2020). Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

3240 Cultural Heritage Development considers built, natural and cultural resources for heritage tourism destinations on a variety of scales from World Heritage Sites to countryside and rural tourism attractions. Issues around the international context of heritage, identities, innovation, and cultural heritage products, regional identities and environments and the importance of small and medium sized enterprises are examined.

PR: TRSM 1000 and TRSM 1100. Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

3800 Colloquium in Tourism Management (Applied Interpretation) - inactive course.

3900 Global Issues and Tourism highlights the importance of responding to world issues in tourism, and considers issues around socio-political-environmental factors influencing tourism, the impact of new social movements on tourism, the demographics and psychographics of travelers, the promotion of culture and territories, and the globalization of tourism.

PR: Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4010 Community and Cultural Issues in Tourism is a case-based course examining cultural diversity and sensitivities to such areas as heritage, tradition and history. Students will build skills in areas such as inclusive planning, communication and negotiation, the changing nature of international tourism, identifying synergies and potential links with global partners (e.g., NL and Ireland).

PR: Students must have completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4900-4910 Special Topics in Tourism is a case-based course focussing on the application of major tourism theories and concepts to modern tourism industry issues. Potential areas of consideration include transportation issues in tourism, visitor management, rural tourism, urban tourism, health tourism and therapeutic recreation, island tourism, critical regionalism, maximizing the year-round potential of tourism, and contemporary research into tourism.

PR: TRSM 1000 and TRSM 1100. Students must have completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4850 Senior Project in Tourism will have students, under the guidance of a faculty member, complete an independent research project and produce a report. Topics must have the approval of the Program Chair of Tourism Studies.

PR: Students must have completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

13.32.2 Electives Course Descriptions

2300 Hospitality Management introduces students to the organization and structure of resorts, hotels, restaurants, and cruise ships. Areas of consideration include business ethics, service contracts, areas of management responsibility such as strategic planning, the evaluation of financial, environmental and human resources considerations.

PR: TRSM 1000 and TRSM 1100

2301 Events Management provides an introduction to the principles and practices of event/festival management. The material will include the
The University Experience introduces visual language.

2305 Arts Administration and Exhibition Management - inactive course.

3210 Interpretation of Natural Resources - inactive course.

3211 Interpretation of Cultural Resources - inactive course.

3220 Conservation Planning - inactive course.

3230 Parks and Protected Areas examines the history and geography of national parks and other publicly protected lands, and considers the impact of human interaction with landscapes. Additionally, the course will focus on tourism planning and management in national parks and protected areas, and investigate guidelines for best practice in tourism operations.

PR: TRSM 1000 and TRSM 1100
CR: HLR 3555
Students must have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

4020 Seminar in Rural and Remote Tourism provides an overview of tourism as it intersects with rural development theory, processes and planning. In addition, the course examines various social, environmental, cultural and economic problems, consequences and opportunities within a rural/peripheral area context (e.g., visitor attraction and accommodation, special transport issues).

PR: Students must completed 78 credit hours, and have officially declared a Major in Tourism Studies, a Minor in Tourism Studies, or have been accepted into the Advanced Diploma program in Tourism Studies.

13.33 University

1010 The University Experience introduces students to the different modes of enquiry that one finds in the University, the interrelatedness of knowledge and the role of the University in society. It also provides students with tools and techniques of study and research that can lead them to academic success and fulfilling career.

13.34 Visual Arts

Visual Arts courses are designated by VART.

13.34.1 1st Year

1000 Introduction to Two-Dimensional Art Practices provides an introduction to two-dimensional art practices with selections made from drawing, painting, and printmaking. Design elements and principles, aesthetic concerns, the study of colour, and fundamental concepts of a variety of two-dimensional media, materials and processes will be explored. Ways of describing, analyzing, interpreting and assessing art will be examined. This course is open to both visual arts and non-visual arts students.

AR: attendance is required
CO: VART 1911
CR: the former VART 1510 and the former VART 1511
OR: 4 hours of studio per week

1001 Introduction to 3D, Photo and Time-based Art Practices provides an introduction to 3D, photo and time-based art practices with selections from sculpture, installation, photo-media, time-based art and related practices. Design elements and principles, postmodern strategies, aesthetic concerns, and fundamental concepts of a variety of media, materials, and processes will be explored. Ways of appreciating art and artistic processes will be examined. This course is open to both visual arts and non-visual arts students.

AR: attendance is required
CO: VART 1911
CR: the former VART 1510 and the former VART 1511
OR: 4 hours of studio per week

1010 Introduction to Drawing introduces the fundamentals of drawing with study of line, tone, shape, volume, form, texture and space. This course includes practice-based research methodologies.

AR: attendance is required
CO: VART 1911
CR: the former VART 1500
OR: 4 hours of studio per week

1110 Painting: Colour, Materials, and Processes introduces the concepts, principles, and processes of painting. Students will be introduced to paint mediums, materials, and tools with a focus on colour, all within the context of contemporary art practices.

AR: attendance is required

1210 Introduction to Sculpture introduces the exploration of three-dimensional form, sculpture materials and processes, and of the organization of relationships and interactions between objects and space.

AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week

1310 Printmaking: Relief and Screenprinting introduces visual language and concepts in conjunction with printmaking methods, materials and techniques via projects in relief and screenprinting.

AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week

1410 Photography introduces the theory and technique of photography using a digital camera and its controls and incorporating the use of Photoshop for photography. The course also introduces theories and genres of photographic vision, the use of the medium to explore a personal vision, image editing, and service bureau printing.

AR: attendance is required
CO: VART 1911
CR: the former VART 2400
OR: 4 hours of studio per week

1522 Textile and Fibre Art explores various textile and fibre materials and processes used in contemporary art studio practice.

AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week

1610 Introduction to Computers and Art provides an initial exploration of how computational technology can be a creative tool applied to all creative practices involving the essential applications for imaging and dissemination. The course includes but is not limited to, vector illustration, photo manipulation, digital painting and use of presentation technologies. A key notion in this course is that of personal workflow approaches.

AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week

1711 Fine Arts Health and Safety provides an overview of the culture and practice of health and safety in studio courses, as well as giving students information that will help them succeed at Grenfell Campus. This component is delivered through a series of workshops, demonstrations, lectures, and online training. The course includes: WHMIS, Personal Protective Equipment, art materials safety, basic First-Aid, studio protocols, tours and lectures to acquaint students with campus resources, and the purchase of a safety kit, WHMIS fees, and a course manual. This course is a co-requisite for all 1000 level studio courses. This is a pass/fail course and requires attendance at all sessions and completion of all online components.

AR: attendance is required
CR: 0
OR: 12 contact hours and supplementary online components

13.34.2 2nd Year

2010 Drawing explores drawing through a range of materials, processes, and concepts. This course leads toward the investigation of student-initiated ideas and concepts, as well as comprehension of drawing in contemporary practices. Some drawing fundamentals are also covered. This course includes practice-based research methodologies.

AR: attendance is required
CO: the former VART 2200 and the former VART 2001
OR: 4 hours of studio per week
PR: 24 credit hours in VART

2011 Expanded Field explores the territory beyond conventional boundaries of discipline-based practices.

AR: attendance is required
CO: the former VART 2100 and the former VART 2101
OR: 4 hours of studio per week
PR: 24 credit hours in VART

2110 Painting: Process and Materiality introduces painting with emphasis on materials, processes and ideas within a contemporary painting context.

AR: attendance is required
CO: the former VART 2100 and the former VART 2101

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
2111 Painting: Themes and Practices emphasizes thematic development and practice in painting. This course includes practice-based research methodologies.

AR: attendance is required
CR: the former VART 2100 and the former VART 2101
PR: 4 hours of studio per week
PR: 24 credit hours in VART

2210 Sculpture I develops accurate and expressive control of three-dimensional media with an emphasis on areas such as carved sculpture and installation/site-specific sculpture.

AR: attendance is required
CR: the former VART 2201
OR: 4 hours of studio per week
PR: 24 hours of studio per week
PR: 24 credit hours in VART

2211 Sculpture II develops accurate and expressive control of three-dimensional media with an emphasis on areas such as carved sculpture and constructed sculpture.

AR: attendance is required
CR: the former VART 2201
PR: 4 hours of studio per week
PR: 24 credit hours in VART

2311 Intaglio Printmaking provides intensive exploration of intaglio Printmaking materials and media applied to development of visual communication skills, conceptual breadth and personal expression. This course is normally offered in alternating years.

AR: attendance is required
CR: 4 hours of studio per week
PR: 24 credit hours in VART

2321 Lithographic Printmaking provides intensive exploration of Lithographic Printmaking materials and media applied to development of visual communication skills, conceptual breadth and personal expression. This course is normally offered in alternating years.

AR: attendance is required
CR: the former VART 3300
PR: 4 hours of studio per week
PR: 24 hours of studio per week

2330 Print Media introduces contemporary printing technologies as applied to the development of personal expression. The course is designed to develop the students' critical awareness of print media while building technological, conceptual and visual communication skills. Technologies to be introduced include integration of computer or digital processes and photomechanical methods.

AR: attendance is required
CR: the former VART 3300
PR: 4 hours of studio per week
PR: 24 credit hours in VART

2410 Photography I introduces students to film cameras, lenses, and their controls to produce film negatives for printing in the traditional black and white darkroom. Topics covered include negative scanning, large-format digital printing for exhibition, the use of Photoshop for photography, the examination of photo-theory, critical reading and critical evaluation of photographs. Students are encouraged to explore a personal vision. Studio time is balanced with regular illustrated lectures on the theory and history of the first century of photography.

AR: attendance is required
CR: the former VART 3400
PR: 4 hours of studio per week
PR: 24 credit hours in VART

2411 Photography II continues the use of digital and/or film cameras to produce files and/or film negatives for printing in the traditional darkroom and/or digital lab. The theory and aesthetics of photography is addressed through critiques, readings and lectures. Students are encouraged to strengthen their personal vision. Studio time is balanced with regular illustrated lectures on the theory and history of the medium since the 1930’s, with emphasis on contemporary photographic practitioners.

AR: attendance is required
CR: the former VART 3401
PR: 4 hours of studio per week
PR: VART 2410

2610 Introductory Projects in New Media encourages individualized investigation in the potential and possibilities of New Media in the creation of personal artistic works. Techniques for working with vector and pixel based software are demonstrated with the goal of encountering the tools to find their own particular approach to a New Media workflow applied to various mediums. Blended and alternative learning approaches are used.

AR: attendance is required
PR: 4 hours of studio per week
PR: 3 credit hours in VART

2611 New Media - Motion and Media explores motion as a tool for expression and visual practice. Students are instructed in the use of tools for editing sound and motion (e.g. video, animation) with the goal of studying how a medium independent from the tools can be used. Students will learn to use digital techniques designed for an audience, instrumental to this process is the study of New Media theory concurrent with the development of software/programming skills, allowing space for any and all tools of expression. Blended and alternative learning approaches are used. This course is normally offered in alternating years.

AR: attendance is required
PR: 4 hours of studio per week
PR: 3 credit hours in VART

3210 Extended Practice in Sculpture, Space and Installation develops independent artistic and personal expression utilizing areas of expression such as sculpture, definition and articulation of space and site; and the creation and presentation of three-dimensional media through the use of installation.

AR: attendance is required
PR: 4 hours of studio per week
PR: VART 2210 and VART 2211

3310 Extended Practice in Printed Multiples hones skills in any of printmaking, print media, digital output, multiple producing print processes and printed matter while developing a self-directed body of work. The use of these processes will be selected by students in consultation with the instructor. Students can focus on the tradition of printmaking or print media or an interdisciplinary production. The creation of printed output is emphasized. This course includes practice-based research methodologies.

AR: attendance is required
CR: the former VART 3301
PR: 4 hours of studio per week
PR: 24 credit hours in VART

3330 Directed Studies in Printmaking is a professional work/study experience in Printmaking. Students will undertake their own projects in Printmaking. In addition, they will assist the Director and/or Master printer at St. Michael’s Printshop in St. John’s, NL in the day-to-day operations of the studio. Students are required to write a paper on an aspect of Printmaking that interests them. Normally this course is available during Spring Session only (May to mid-August) so that students can experience the complete summer activities scheduled at St. Michael’s.

AR: attendance is required
PR: 6 credit hours from any of VART 1310, VART 2311, VART 2321, VART 2330, VART 2341

3410 Extended Practice in Photography continues exploration in photographic/digital output by creating self-directed, coherent bodies of work. These explorations build toward the production of suites, folios, and/or sequences in print installations, webpages, apps, and/or physical photographs. Independent practice and ongoing research of process, structure, content and sequence are major components of the term’s work. This course includes practice-based research methodologies.

AR: attendance is required
PR: the former VART 3401
OR: 4 hours of studio per week
PR: VART 2411

3520 Intermediate Practice in Textile and Fibre Art explores the expressive potential of textiles and fibre materials and processes.

AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART

3610 Computational Media explores process-based New Media for the production of spectacle. Students produce an independent body of work using computational media (e.g. projection, audio, installation) to create experiential spaces designed for an audience. Instrumental to this process is the study of New Media theory concurrent with the development of software/programming skills, allowing space for any and all tools of expression. Blended and alternative learning approaches are used. This course is normally offered in alternating years.

AR: attendance is required
PR: 4 hours of studio per week
13.34.4 4th Year

4800 Senior Studio Seminar and Professional Practices I focuses on building skills in the understanding and articulation of concepts, research, theory, and practice involved in studio work. There are reading, research and writing components, including a support document. The course covers topics in a range of professional practices needed in the visual arts field, including preparation for graduate school. Visual Arts faculty and visitors offer presentations specific to their areas of expertise.

OR: 4 hours of studio per week
PR: 72 credit hours in VART

4801 Senior Studio Seminar and Professional Practices II continues the process of building skills in the understanding and articulation of concepts, research, theory and practice involved in studio work. Course components include reading, research, writing and preparation for the graduating exhibition. This course covers topics in a range of professional practices with a focus on preparation for a professional visual arts career. Visual Arts faculty and visitors offer presentations specific to their areas of expertise.

OR: 4 hours of studio per week
PR: VART 4800

4900-4929 Special Topics in Visual Arts introduces a range of topics that might include: Photo Journalism, Art and Politics, Community Practices, Environmental Practices.

AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART

4950 Independent Senior Studio I develops an independent body of work and a related practice-based research methodology component under the supervision of a visual arts faculty advisor. Students attend regular meetings with their faculty advisor. Students are required to submit work at two critiques with visual arts faculty other than the student's advisor. Students present the body of work and associated practice-based research methodology component to their advisor at the end of semester.

AR: attendance is required
CO: VART 4800
PR: 72 credit hours in VART

4951 Independent Senior Studio II produces an independent body of work and a related practice-based research methodology component under the supervision of a visual arts faculty advisor. Students attend regular meetings with their faculty advisor. Students are required to submit work at two critiques with visual arts faculty other than the student's advisor. Students present the final body of work and associated practice-based research methodology component to their advisor at the end of semester.

AR: attendance is required
CO: VART 4801
PR: VART 4950

13.34.5 Art History

The prerequisite for all 3000-level courses is VART 2701 or History 1101 or permission of the Chair, Visual Arts.

No students shall register in any course having an initial digit "4" unless they have successfully completed at least 6 credit hours in Art History courses or by permission of the Chair, Visual Arts.

2700 Art History Survey I (same as History 2700) is the history of art from pre-historic times to the Renaissance.

CR: History 2700

2701 Art History Survey II (same as History 2701) is the history of art from the Renaissance to the twentieth century.

CR: History 2701

3620 Philosophy of Art is an introduction to aesthetics; applications in Visual Arts, music and drama.

CR: Philosophy 3620

3700 Art History: The Italian Renaissance (same as History 3700) is an overview of the art and architecture of Renaissance Italy with an emphasis upon the historical context in which art was produced.

CR: History 3700

3701 Art History: The Renaissance Outside Italy (same as History 3701) is the Renaissance outside Italy from the late fourteenth century and the Italian Renaissance to the twentieth century.

CR: History 3701

3702-3721 Art History: Special Topics has a range of special topics which might include: Early Renaissance Art, Art of the Later Renaissance, Renaissance, Modern Art, C. 18th Century Art, Aestheticism, 17th and 18th Century Art, 19th Century Art, Research Project in Modernism.

3820 Religion and the Arts (same as Religious Studies 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture, and dance.

CR: Religious Studies 3820

4700-4729 Art History: Special Topics has a range of special topics which might include: British Art and Architecture, Modern Art, Modern Art II, Aestheticism, 17th and 18th Century Art, 19th Century Art, Research Project in Modernism.

4730 Art History: Modern Art I: Precursors to Modernism (same as History 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.

CR: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

4731 Art History: Modern Art II: Early Modernism (same as History 4731) is an examination of the various cultural and social forces between 1850 and 1914 which shaped the rise of the Modern movement.

CR: History 4731

4740 Current Issues in Art - inactive course.

4741 Art Criticism - inactive course.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University’s commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

3 School Description

The School of Human Kinetics and Recreation offers undergraduate and graduate degrees in kinesiology, physical education, and recreation. The School's programs prepare students to meet societal needs for professionals who are able to initiate and manage health and lifestyle-enhancing programs. The School encourages a close working relationship among students, faculty, and staff, and with local and national sport, health, and professional organizations. Co-operative education programs provide for the integration of academic and professional knowledge. A full-time academic program officer within the School assists students with decisions related to their academic program. The School prides itself on the extent to which senior undergraduate and graduate students are engaged in teaching, research, and scholarly activity. Many graduates of the School are leaders in the fields of physical education, sport, kinesiology, health, and recreation.

Additional information regarding the School of Human Kinetics and Recreation is available at www.mun.ca/hkr.

Students must meet all regulations of the School in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to UNIVERSITY REGULATIONS.

4 Description of Programs

All courses of the School are designated by the abbreviation HKR.

4.1 General Degrees

The School of Human Kinetics and Recreation offers six general degrees in three program areas. For specific details on each degree refer to the appropriate Program Regulations - General and Honours Degrees.

4.1.1 Kinesiology Degrees

Kinesiology degrees are designed to prepare graduates for careers in ergonomics, fitness, health and wellness, and lifestyle professions. The kinesiology degree programs consist of School courses in addition to a flexible choice of electives. The two kinesiology degrees are:

- Bachelor of Kinesiology (Co-operative): is comprised of 120 credit hours and three work terms and is taken on a full-time basis.
- Bachelor of Kinesiology: is comprised of 120 credit hours and can be taken on a full-time or part-time basis.
4.1.2 Physical Education Degrees

Physical Education degrees are designed to prepare graduates for careers in teaching and related areas. There are two physical education degrees with teaching and general options available within each degree.

The teaching option contains courses in the fundamentals of physical education as well as courses in curriculum planning, teaching methods, and pedagogy relevant to physical education curricula for various grade levels. Within the teaching option students will be placed in an educational setting for some of the course work. Following completion of a physical education degree - teaching option, a student wishing to teach in a school setting normally completes an intermediate/secondary degree program offered by the Faculty of Education. For information regarding admission requirements to the intermediate/secondary programs refer to the Faculty of Education section of this Calendar.

The general option is designed to provide basic professional preparation. The general option of the program consists of courses common to the teaching option plus a flexible choice of electives, without the requirement for curriculum and methods courses.

The two physical education degrees are:
- **Bachelor of Physical Education (Co-operative):** is comprised of 120 credit hours and three work terms and is taken on a full-time basis. This program is offered in the teaching and general options.
- **Bachelor of Physical Education:** is comprised of 120 credit hours and can be taken on a full-time or part-time basis. This program is offered in the teaching and general options.

4.1.3 Recreation Degrees

Recreation degrees are designed to provide students with the opportunity to develop professional competencies in recreation and leisure service management. There are two recreation degrees in the School of Human Kinetics and Recreation with community recreation and therapeutic recreation options available within each degree. In community recreation the students will also gain an understanding of the social, physical, psychological, cultural, economic, and political issues that influence recreation and leisure participation, delivery, and management. The therapeutic recreation option is designed to provide professional preparation for the practice of therapeutic recreation. The two recreation degrees are:

- **Bachelor of Recreation (Co-operative):** is comprised of 120 credit hours and three work terms and is taken on a full-time basis.
- **Bachelor of Recreation:** is comprised of 120 credit hours and can be taken on a full-time or part-time basis.

4.2 Honours Degrees

Honours degrees signify superior academic achievement with specific course work in kinesiology, physical education, and recreation programs. To be considered for an Honours Degree, the student must so indicate on the prescribed “Application for Graduation” form. This form may be obtained online at the Memorial Self Service at www3.mun.ca/admit/twbkwbsis.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php For further information on honours degrees see Program Regulations - General and Honours Degrees.

4.3 Work Terms in Co-operative Programs

Students registered for work terms are also governed by the Co-operative Student Handbook. Prior to registering for the first work term, students must successfully complete the course Professional Development Seminars.

4.3.1 General Information

- During work terms students are brought into direct contact with the kinesiology, physical education, and recreation professions, exposed to the work place setting, expected to assume ever-increasing responsibility in employment situations as their education advances, and introduced to experiences beyond the scope of those which could be provided in the classroom.

- Students are responsible for finding suitable work placements. The Co-operative Education Office of the School provides resources to assist in this process.

- In addition to a work term, students may register for up to 6 credit hours, although they are advised to consult the School's Academic Program Officer.

- Students are not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies and with the recommendation of the Co-operative Education Office of the School. Students who drop a work term without permission, or who fail to honour an agreement to work with an employer, will be assigned a grade of FAL (fail) for that work term.

- Students who conduct themselves in such a manner as to cause their termination from the job, will be assigned a grade of FAL (fail) for that work term.

- Students are expected to maintain professional ethics, including confidentiality.
4.3.2 Work Term Reports
- A work term report, on a topic approved by the Co-operative Education Office of the School, must be submitted for each work term. The report must be approved by the employer and submitted by the student to the Co-operative Education Office of the School on or before the appropriate deadline in the University Diary.
- Late work term reports will not be evaluated unless prior permission for a late work term report has been granted by the Co-operative Education Office of the School.

4.3.3 Evaluation of Work Terms
- Two components are considered in work term evaluation: on-the-job performance and the work term report. Each component is evaluated separately and equally. The overall evaluation of work terms will result in the assignment of one of the following letter grades: PWD (pass with distinction), PAS (pass) or FAL (fail).

5 Admission/Readmission Regulations for the School of Human Kinetics and Recreation
In addition to meeting the UNIVERSITY REGULATIONS students must meet the Admission/Readmission Regulations for the School of Human Kinetics and Recreation.

5.1 General Information
1. Entry to programs offered by the School is competitive for a limited number of placements. Meeting the minimum requirements for admission does not guarantee acceptance into the program. The final decision on admission rests with the Admissions Committee of the School.
2. Admission or readmission to the University does not necessarily constitute admission or readmission to any program.
3. Up to three positions per year in the School of Human Kinetics and Recreation may be designated for applicants of aboriginal ancestry who have met the admission requirements of the program. Applicants must send a letter of request to hkr_registrar@mun.ca at the time of application and provide documentation of aboriginal ancestry.

5.2 Application Forms and Deadlines
1. All programs of the School commence in the Fall semester. The deadline for application for admission is March 1.
2. The deadline for application for readmission, for students who were previously admitted to a School program, is June 1 for the Fall semester, October 1 for Winter, and February 1 for Spring.
3. The application for admission or readmission to programs offered by the School of Human Kinetics and Recreation is submitted online; current and returning Memorial University of Newfoundland applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis_P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.
4. In addition to the application, students applying to the physical education programs must:
   - submit a 250 word autobiographical statement highlighting the applicant's experiences of teaching and learning and demonstrating a commitment to leading a physically active lifestyle. Further information is available from the School's website at www.mun.ca/hkr, and
   - submit a current first aid certificate, and
   - complete the School's swim test. Students applying from outside St. John's should call the School's General Office at (709) 864-8130 to contact the swim test co-ordinators to arrange for testing. In lieu of the School swim test, a level 8 Red Cross or other credential satisfactory to the School may be accepted. Students unable to complete the swim test requirement before beginning their program must successfully complete this requirement by the end of October of their first semester of admission to the program. Failure to do so will result in the student being required to withdraw from the program at the end of their first semester.

5.3 Admission Requirements to School Programs
Applicants may apply for admission to School programs under the Categories Of Applicants, Admission Criteria and Other Information outlined under UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate). In addition to meeting these regulations, applicants in the following categories, other than those applying for admission to the Bachelor of Recreation degree program, must meet the additional requirements as indicated below.

5.3.1 High School Applicants
- High school applicants to the kinesiology degree programs must have completed:
  - Level III Laboratory Science with a grade of at least 70%, and either
  - Level III Advanced Mathematics, or Level III Academic Mathematics with a grade of at least 70%, or Level III Academic Mathematics and a score on the Mathematics Placement Test acceptable to the Department of Mathematics and Statistics. For further information on the Mathematics Placement Test contact the Department of Mathematics and Statistics.

5.3.2 Memorial University of Newfoundland Applicants
- To be eligible for consideration for admission to all programs, students who are attending or have previously attended this University must have a cumulative average of 60% or an average of 65% on their last 30 credit hours.
- Overall academic performance is an important criterion in reaching decisions on applications for admission, and will be considered, in the selection process.
- In addition to overall academic achievement and evidence of ability to successfully maintain a full course load, admission decisions shall normally include a review of the applicant's average in the following 15 credit hours:
  - Kinesiology and Physical Education Applicants: 6 credit hours in English; 6 credit hours in Math, or Math 1000 and 3 credit hours in an elective; and HKR 2000 or an elective.
  - Recreation Applicants: 6 credit hours in English; 6 credit hours in Psychology; and HKR 2000 or an elective.
  - A maximum of one repeated course may be included among the 15 admission credit hours.
Students who are attending or have previously attended this University are not required to submit a copy of their transcript with their application(s).

**5.3.3 Transfer Applicants**
- Applicants seeking admission through transfer from accredited post-secondary institutions must have achieved a minimum overall average of 60% to be considered for admission.
- A student's placement within a program, and requirements needed to complete the program, will be determined on an individual basis at the time of admission. No applicant will be granted placement beyond Academic Term 4.
- Transfer applicants must request that an official transcript showing any completed courses and current registrations be forwarded to the Office of the Registrar. Final transcripts must be submitted upon receipt of final grades.

**5.4 Other Information**
1. The School will notify applicants in writing regarding an admission decision to a School program.
2. Students admitted to a program at any level beyond Academic Term 1, without successfully completing all courses required up to that level, must successfully complete those courses prior to the end of their last academic term. Successful completion shall mean a minimum grade of 50% in every non-HKR course and a minimum grade of 60% in every HKR course.
3. Students who have been admitted to one program offered by the School and who wish to change to another program within the School must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with all other applications.
4. Students admitted full time to a program and who decline the offer of admission or who fail to register for courses during the Fall term of admission will be considered withdrawn from the program. Successful completion shall mean a minimum grade of 50% in every non-HKR course and a minimum grade of 60% in every HKR course.
5. Students admitted part time to a program and who decline the offer of admission or who fail to register for courses and to successfully complete at least 6 credit hours applicable to the degree during each academic year will be considered withdrawn from the program. Such students, if they subsequently wish to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with other applications.
6. While the School of Human Kinetics and Recreation does not require criminal record checks or other screening procedures as a condition of admission to its program, Physical Education students may be required by a school district to submit a Certificate of Conduct before placement in a school setting, such as HKR 3110. Students are encouraged to seek the Certificate of Conduct before registration in HKR 3110. Each Physical Education student is responsible for obtaining a Royal Newfoundland Constabulary or Royal Canadian Mounted Police Certificate of Conduct at his or her own expense. Details are available from the General Office of the School of Human Kinetics and Recreation.
## 6 Program Regulations - General and Honours Degrees

### 6.1 Bachelor of Kinesiology (Co-operative)

- The full-time 120 credit hour Bachelor of Kinesiology (Co-operative) requires 69 HKR credit hours, 51 non-HKR credit hours, and three work terms.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in Table 1 Bachelor of Kinesiology (Co-operative). Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Work terms shall be taken in the term and sequence as set out in Table 1 Bachelor of Kinesiology (Co-operative).

6.2 Bachelor of Physical Education (Co-operative)

6.2.1 Teaching Option

- The full-time 120 credit hour Bachelor of Physical Education (Co-operative) - Teaching Option requires 69 HKR credit hours, 51 non-HKR credit hours, three work terms, and a first aid certificate and a CPR certificate both of which must be current at the time of graduation.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in Table 2 Bachelor of Physical Education (Co-operative) - Teaching Option. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- The three work terms shall be taken in the term and sequence as set out in Table 2 Bachelor of Physical Education (Co-operative) - Teaching Option.
- Students must complete 24 credit hours in an acceptable Academic Discipline or Minor. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. In choosing the Academic Discipline students must select from and follow the Academic Discipline requirements of the Faculty of Education Bachelor of Education (Intermediate/Secondary), Admission Regulations. No more than 6 credit hours at the 1000 level may be included in the 24-credit-hour Academic Discipline. At least 3 credit hours at the 3000 level or higher must be included in the 24-credit-hour Academic Discipline.

### 6.3 Bachelor of Recreation (Co-operative)

- The full-time Bachelor of Recreation (Co-operative) requires 120 credit hours and three work terms.
- The 120 credit hours shall normally be taken in the academic terms in the sequence and course load as set out in **Table 4 Bachelor of Recreation (Co-operative)**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School’s Academic Program Officer.
- The three work terms shall be taken in the sequence as set out in **Table 4 Bachelor of Recreation (Co-operative)**.
- A minor is optional in the Bachelor of Recreation (Co-operative) program. Students following the therapeutic recreation option may opt to choose a minor of at least 24 credit hours in English, Math, Psychology, or Sociology. In completing the minor, students must follow the minor program regulations listed under the appropriate faculty or school.

6.4 Bachelor of Kinesiology

- The full-time and part-time 120 credit hour Bachelor of Kinesiology requires 69 HKR credit hours and 51 non-HKR credit hours.
- Students admitted full time shall normally complete the 120 credit hours in the academic terms in the sequence and course load as set out in Table 5 Bachelor of Kinesiology. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Students admitted part time should consult with the School's Academic Program Officer regarding course sequence.

6.5 Bachelor of Physical Education

6.5.1 Teaching Option

- The full-time and part-time 120 credit hour Bachelor of Physical Education - Teaching Option requires 69 HKR credit hours, 51 non-HKR credit hours, and a first aid certificate and a CPR certificate both of which must be current at the time of graduation.
- Students admitted full time shall normally complete the 120 credit hours in the academic terms in the sequence and courses load as set out in Table 6 Bachelor of Physical Education - Teaching Option. Students wishing to change the sequence and/or reduce the course load required in the academic terms must first consult with the School's Academic Program Officer.
- Students admitted part time should consult with the School's Academic Program Officer regarding course sequence.
- Students must complete 24 credit hours in an acceptable Academic Discipline or Minor. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. In choosing the Academic Discipline students must select from and follow the Academic Discipline requirements of the Faculty of Education Bachelor of Education (Intermediate/Secondary), Admission Regulations. No more than 6 credit hours at the 1000 level may be included in the 24-credit-hour Academic Discipline. At least 3 credit hours at the 3000 level or higher must be included in the 24-credit-hour Academic Discipline.

6.6 Bachelor of Recreation

- The full-time and part-time Bachelor of Recreation is comprised of 120 credit hours as set out in Table 8 Bachelor of Recreation - Course and Credit Hour Requirements.
- A minor is optional in the Bachelor of Recreation program. Students following the therapeutic recreation option may opt to choose a minor of at least 24 credit hours in Psychology. Students following the community recreation option may opt to choose a minor of at least 24 credit hours in English, Math, Psychology, or Sociology. In completing the minor, students must follow the minor program regulations listed under the appropriate faculty or school.
- Students admitted part-time should consult with the School's Academic Program Officer regarding course sequence.

6.7 Honours Degrees

1. An honours degree signifies superior academic achievement.
2. An application for admission to any of the honours degrees is not required. Rather, students indicate on the prescribed application for graduation form that they wish to be considered for an honours degree.
3. To receive an honours degree, a candidate shall:
   - meet the requirements of the general degree;
   - successfully complete HKR 4600 and HKR 4610 with a minimum grade of 80% in each course;
   - obtain an overall average of 80% or better on all HKR courses for the degree; and
   - obtain an overall average of 70% on the non-HKR credit hours required for the degree.
4. A candidate for the honours degree who does not fulfill these conditions but fulfills the requirements for the general degree shall be awarded the general degree.
5. A candidate may, with the approval of the Committee on Undergraduate Studies, repeat or substitute up to three courses in order to meet the requirements of clause 3 above. In counting repeats, each attempt at the same course will count as one course towards the maximum. That is, the same course, repeated three times, would place a student at the maximum and no additional repeats or substitutions would be allowed.
6. Candidates are not permitted to repeat or substitute work terms for the purpose of meeting the academic requirements for honours degrees.
7. A candidate who, for academic reasons, has been required to withdraw from a program offered by the School will not be eligible for the honours degree.
7 Promotion Regulations

7.1 General Information
- In addition to meeting the promotion regulations for the School of Human Kinetics and Recreation all students must meet the general academic regulations (undergraduate). For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate).
- Success in the programs depends on meeting the requirements of both academic terms and work terms.
- To be promoted a student must, in addition to obtaining the requisite grades and average, complete and deliver all work term reports as required.

7.2 Promotion Status
- A student's promotion status at the end of each term will be in one of the following four categories:

7.2.1 Clear Promotion
Clear Promotion means a student can proceed to the next term without restrictions.
- Students completing an academic term will receive a Clear Promotion by obtaining an overall average of at least 60%, with a numeric grade of at least 60% in each HKR course, and a numeric grade of at least 50% in each non-HKR course.
- Students completing a work term will receive a Clear Promotion by obtaining a PAS (pass) or a PWD (pass with distinction) in the work term.
- Students completing courses in addition to a work term must obtain a PAS (pass) or a PWD (pass with distinction) in the work term and an overall average of at least 60%, with a numeric grade of at least 60% in each HKR course, and at least 50% in each non-HKR course.

7.2.2 Probationary Promotion
Probationary Promotion designates failure to successfully complete the required components of HKR 2210, 2220, 3210, 3220, 4210 and 4220 in a given term.
- A student with Probationary Promotion at the end of Academic Term 1 may be permitted to enter Academic Term 2 but must have Clear Promotion by the end of Academic Term 2.
- A student with Probationary Promotion from any academic term may continue to the subsequent work term under the condition that entry into the next academic term is not allowed until the student's status is changed to Clear Promotion.
- A student with Probationary Promotion at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.
- To change Probationary Promotion to Clear Promotion the student must satisfy the School that he or she is competent in the subject of the HKR course in which the student has failed to achieve 60%. This will normally entail re-examination, after which the student will be declared to have passed or failed a test of competency in the subject concerned. Re-examination is normally available only to a student who has submitted all required coursework during the semester. No numerical grade will be assigned in the re-examination, and the original grade submitted for the course will not be changed.
- Re-examination may be written, oral, practical or a combination of formats and will be at a time determined by the School.
- Only one re-examination is permitted per course.
- A maximum of two re-examinations is permitted in a student’s degree program. If a student is awarded a grade of less than 60% in a third HKR course, the student will be required to repeat or replace the course.
- It is the responsibility of the student to arrange for re-examination before the end of the first week of the student’s next academic term. If re-examination is not arranged in accordance with this time frame, the student will be required to repeat or replace the course.
- The School may recommend that the student complete remedial studies before re-examination.

7.2.3 Probationary (A) Promotion
Probationary (A) Promotion designates failure to successfully complete the required components of HKR 2210, 2220, 3210, 3220, 4210 and 4220 in a given term.
- Probationary (A) Promotion will be given upon the recommendation of the course instructor/Co-ordinator and/or the Committee on Undergraduate Studies and only for extreme circumstances, duly authenticated.
- A student with Probationary (A) Promotion in any term will be permitted to enter subsequent terms and will receive a letter grade of INC (incomplete) in the course. A final numeric grade will not be received until the required components of each course have been successfully completed. Academic Council will grant this status, taking into account the specific factors involved in each case. This status is not automatic, as failure to successfully complete all required components of each course would normally result in a failing grade.
- To change Probationary (A) Promotion to Clear Promotion, a student must successfully complete the activity course(s), with a minimum grade of 60%, within one academic year of the date on which the original grade(s) of Incomplete was (were) recorded.
- A student with Probationary (A) Promotion at the end of the final academic term will not be recommended for graduation until the student has successfully completed all required components of all courses, and the student's status is changed to Clear Promotion.

7.2.4 Promotion Denied
Promotion Denied indicates Clear Promotion is not achieved each term or following probation.
- A student with Promotion Denied status will be required to withdraw from the School. Students with Promotion Denied status may apply for readmission to the program after two semesters. A student will normally be readmitted into the term from which promotion was denied.
- A student who is denied promotion for failing a work term may be considered for readmission after the lapse of two semesters, at which time the student will be required to complete a further work term with satisfactory performance before being admitted to any further academic term in the School. A work term may be repeated only once, and not more than two work terms may be repeated in
the entire program.

- A student who has been denied promotion as a result of having failed a work term and who, in the opinion of the School, can benefit from a remedial program, may be permitted an extension of time not to exceed the end of the registration period of the subsequent semester to complete the requirements of the work term.
- A student who is denied promotion as a result of grades received in HKR and non-HKR courses will be required to repeat all HKR courses in which they obtained a numeric grade of less than 60% in that term. A non-HKR course may be replaced by a course acceptable in the student's program.
- A student with Promotion Denied status at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.

7.3 Other Information

- The Committee on Undergraduate Studies will determine each student's promotion status at the end of each term and will make its recommendations to Academic Council.
- Academic Council may promote a student notwithstanding the promotion regulations given above. A decision of this nature will be made only for reasons acceptable to Academic Council and in the case of a student thought likely to succeed in future terms.
- A student shall be permitted only one readmission to the School.
- Students may be required to withdraw from their program at any time, if, in the opinion of the School, they are unlikely to benefit from continued attendance.

8 Graduation

Upon meeting the qualifications for any of the programs of the School of Human Kinetics and Recreation a student must apply by the appropriate deadline date to graduate on the prescribed "Application for Graduation " form. This form may be obtained on-line at the Memorial Self Service at www3.mun.ca/admit/twkiwib.P_WWWLogin. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

9 Waiver of School Regulations

Every student has the right to request waiver of School regulations. Students wishing waiver of University academic regulations should refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations.

9.1 General Information

- The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity so warrant in the judgment of the Committee on Undergraduate Studies of the School.
- All requests, other than requests for waiver of a prerequisite or co-requisite of a School course, must be submitted to the Committee on Undergraduate Studies of the School for consideration. Waiver of a School course prerequisite or co-requisite may be granted by the course instructor.
- Students requesting a waiver of a School regulation, other than requests for waiver of a prerequisite or co-requisite of a School course, must submit their request in writing to the Chair of the Committee on Undergraduate Studies on the prescribed form which is available from the School's general office. Medical and/or other documentation to substantiate the request must be provided.
- Any waiver granted does not reduce the total number of credit hours required for the degree.
- In addition, regardless of any waiver granted, students enrolled in a co-operative program must successfully complete a minimum of two work terms.

10 Appeal of Decisions

Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions.
11 HKR Courses Available to Students Not Enrolled in a Program Offered By the School

11.1 Regulations for Students Not in a Program Offered By the School
- Students not in a program offered by the School may register for a maximum of 15 credit hours only from the following list if space is available.
- Students who have been required to withdraw from a program offered by the School may not register for any HKR course.
- Students not in a School program will be required to drop any HKR course(s) in excess of 15 credit hours and may be subject to academic and financial penalties.

11.2 HKR Courses
1000 Fitness and Wellness
1001 Resistance Training for Health and Activity
2000 Introduction to Kinesiology, Physical Education and Recreation
2002 Coaching
2300 Growth and Development
2310 Human Anatomy
2311 Introduction to Anatomy and Physiology
2320 Primary Human Physiology
2515 Social Psychology of Leisure
2585 Recreation and Persons with Disabilities
2600 Introduction to Human Nutrition
2601 Physical Activity, Obesity, and Weight Control
3360 Care and Prevention of Athletic Injuries
3400 Social Determinants of Health and Physical Activity
3410 Sociology of Sport
3490 Gender in Sport and Physical Activity
3535 Legal Aspects of Leisure and Recreation Services
3955 Gender and Leisure
4330 Social Psychology of Sport, Physical Activity and Recreation

12 Course Descriptions
In accordance with Senate’s Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

All courses of the School are designated by HKR.
1000 Fitness and Wellness is an introduction to fitness and wellness, and the relationships among physical activity, fitness, wellness, quality of life, and longevity.
UL: not applicable towards any of the degrees offered by the School

1001 Resistance Training for Health and Activity is an introduction to resistance training exercises, programs, and principles.
CR: HKR 2340; the former HKR 4320
UL: not applicable towards any of the kinesiology or physical education degrees offered by the School

1123 Professional Development Seminars are offered during the Fall semester prior to a student’s first work term. These seminars introduce the co-operative education process and prepare the student for work terms. These seminars are graded PAS or FAL based on attendance and participation.
AR: attendance is required
CH: 0
LC: as scheduled

2000 Introduction to Kinesiology, Physical Education and Recreation introduces the philosophical, scientific, socio-cultural, historical concepts, and influences in kinesiology, physical education, and recreation.

2001 Introduction to Physical Education for Education Students provides students a general overview of the role that physical education and active living play in the overall development of primary and secondary students, and in the creation of positive learning environment in schools. This course is intended for students in the primary/elementary program offered by the Faculty of Education.
CR: HKR 3110
PR: admission to the Bachelor of Education (Primary/Elementary) offered by the Faculty of Education
UL: not applicable towards any of the degrees offered by the School

2002 Coaching introduces the various methods, principles, and theories used to coach developing athletes in various sport settings. Factors such as the coach’s role, planning, analysing and developing skills, sport safety, and physical preparation will be presented with an emphasis on attaining competency in these areas.

2004 Enhancing Performance in Physical Activity gives an overview of the various models, principles, and theories used to explain and predict ways in which athletes and exercisers conduct themselves in various sport settings. Selected intervention techniques to enhance performance will be presented.

2005 Personal Stress Management is designed to provide students with an introduction to stress and to explore the relationship between exercise, fitness and physical activity and stress management. It describes how to reorganize one’s life by presenting a systematic analysis of stress and coping mechanisms appropriate to different stages of life. The stress coping mechanisms will be presented with an emphasis on application. Completion of this course does not qualify students as stress management counsellors. Students interested in this field are advised to contact the Department of Psychology for information on careers in counselling.
CO: Psychology 1000 and 1001
PR: Psychology 1000 and 1001

2100 Introduction to Organization and Administration introduces the basic administrative functions in a work setting in physical education and/or recreation. The laboratory sessions will assist students to develop skill in the basic computer applications relevant to these functions.
LH: 2

2210 Physical Activities Course: Physical and Health Literacy employs the conceptual approach of movement education (i.e. concepts, skills, and strategies) through a wide variety of physical activities that focus on the development of the whole person. Socially-responsible leadership and inclusive education will also be emphasized.
AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0.
LC: as scheduled
LH: as scheduled

2220 Physical Activities Course: Gymnastics and Aquatics may employ a number of teaching methods. Emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.
AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0.
LC: as scheduled
LH: as scheduled

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
2300 Growth and Development is an introductory study of human growth and developmental factors and their influence on the learning of motor skills.

2310 Human Anatomy is a study of the structure of the human body with emphasis on selected systems (endocrine, neural, muscular, skeletal, cardiovascular, respiratory).

2311 Introduction to Anatomy and Physiology is designed to provide students with a general overview of the anatomy and physiology of the human body. Students will explore skeletal, muscular, neural and cardiorespiratory systems in addition to a very brief introduction to cell structure and 'cellular' muscle function.

2320 Primary Human Physiology is a study of bodily functions with emphasis of selected systems (endocrine, neural, muscular, cardiovascular, respiratory).

2410 Historical and Comparative Physical Education - inactive course.

2420 Doping in Sport - inactive course.

2505 Recreation Programming and Evaluation introduces the student to a variety of methods, skills, and materials for planning, developing, implementing, and evaluating professional recreation programs for diverse populations in a variety of settings.

2515 Social Psychology of Leisure introduces the personality and social factors that shape how people experience leisure. Course materials will focus on life cycle theory, intrinsic and extrinsic motivation, perceived freedom, constraints theory, and other social psychological theory related to leisure.

2545 Introduction to Outdoor Recreation and Education gives an overview of the foundational principles of outdoor education and recreation as they pertain to philosophy, wilderness ethics, professional preparation, movement through wildlands, environmental hazards, navigation, and safety. Students will participate in a sampling of outdoor education and recreation activities during the course including a three-day field trip.

2585 Foundations of Therapeutic Recreation is designed to examine a variety of aspects of therapeutic recreation from both a practical and theoretical perspective. Topics will include the history, philosophies, and theories underlying therapeutic recreation, therapeutic recreation models, essential skills for the therapeutic recreationist and ethical considerations for therapeutic recreation. Diverse groups (e.g. adults, youth, disadvantaged and disabled) and settings (e.g. community, schools, institutions, and workplace) suitable for therapeutic recreation will be discussed.

2600 Introduction to Human Nutrition (same as Biochemistry 2600) gives an overview of human nutrition with an emphasis on topics of current interest. Students will gain an understanding of nutrition in the context of health maintenance across the life span. Topics covered will include nutrition during pregnancy, nutrition for infants, Canadian Recommended Nutrient Intake/Dietary Reference Intake, weight loss and weight gain, nutraceuticals, and ergogenic aids.

2601 Physical Activity, Obesity, and Weight Control explores the relationship between physical activity, obesity, and morbidity. Emphasis will be placed on the incidence and prevalence of obesity, environmental and genetic factors affecting obesity, and mechanisms of weight and body composition modification.

2703 Introduction to Human Factors is an introduction to the field of human factors, the field that studies aspects of human movement, health, safety, and performance in the workplace. This will include an introduction to the methods of detection, evaluation, and the physiological changes arising from hazards (e.g. inappropriate levels of noise, vibration, and illumination) in the workplace. The course will also examine adverse injuries in workplace studied in the context of basic biomechanics and function of the musculoskeletal system.
promotion. Students will explore the historical, social, political, and cultural contexts of health promotion, while gaining a better understanding of the models and theoretical frameworks that help to inform health promotion and the process of developing, implementing and evaluating health promotion programs.

3340 Adapted Physical Activity presents an overview of current practices, philosophies, and issues related to physical activity and recreation for persons with disabilities. Knowledge and understanding of various disabling conditions and consequent needs of persons with disabilities, including health, safety and fitness, and how these needs may be met in terms of physical activity will be emphasized. CR: HKR 3665

3350 Health Issues II - inactive course.

3360 Care and Prevention of Athletic Injuries is a basic introduction to the field of athletic therapy and sports medicine. The content focuses on the prevention and care of sports injuries and covers topics such as preventive screening, exam procedures, on the spot assessment and First Aid, legal responsibility, and supportive taping/wrapping. PR: HKR 2310 and a Basic First Aid Course

3400 Social Determinants of Health and Physical Activity provides students with a social, political, economic, environmental, and cultural perspective on health and health inequalities. A concentrated look at contemporary health issues using the social determinants of health model will equip students with critical skills necessary to consider health issues beyond physical pathologies.

3410 Sociology of Sport (same as Sociology 3410) is an analysis of functions of sport in Canadian and North American society. Areas include social organization of sport, sport and social processes, sport and social problems, socialization and stratification of sport, and violence in sport. CR: Sociology 3410

3485 Therapeutic Recreation Service Delivery focuses on issues related to the delivery of therapeutic recreation services. In particular, the following topics will be addressed: documentation in therapeutic recreation; client assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, task and activity analysis, planning change-oriented programs, writing behavioural objectives, etc.); program and client evaluation; written plans of operation. PR: HKR 2585 and HKR 2505

3490 Gender in Sport and Physical Activity - inactive course.

3505 Adventure Programming - inactive course.

3515 Therapeutic Recreation in Outdoor Settings provides an introduction to current philosophy, issues, and practices relating to therapeutic recreation in outdoor settings. This course is designed to provide students with the knowledge and skills necessary to practice therapeutic recreation in outdoor settings.

3525 Canadian Recreation Delivery Systems - inactive course.

3535 Legal Aspects of Leisure and Recreation Services provides students with an opportunity for in-depth study of legal issues related to the operation of leisure services and facilities. Issues of tort and contract liability, employment related legal aspects, human rights and freedoms, and administrative procedures involved in property acquisition, law enforcement, and risk management are the topics of this course.

3545 Outdoor Recreation Leadership acquaints students with the breadth, depth, and scope of outdoor recreation leadership including a detailed examination of theories, principles, and practices. The course provides opportunities for individual students to develop, practice, and receive feedback on their outdoor leadership skills. The course includes a required field experience in outdoor recreation leadership. PR: HKR 2505 or HKR 3220

3555 Outdoor Recreation Management gives an overview of outdoor recreation practices in Newfoundland and Canada. This course will examine the management of resources, conservation education and practices, and development for public use or exclusion; legislation related to management of risk; viability of facilities; national and provincial agencies; private communities; and future trends in management. Management strategies will form a major part of the course.

3565 Tourism/Commercial Recreation examines behavioural factors influencing tourism; promotion of commercial recreation attractions, provincial strategies in travel and tourism, problems of leisure travel, stability of entrepreneurial ventures in tourism, and research and planning strategies relevant to commercial ventures.

3575 Community Development and Recreation introduces various theoretical perspectives on community organization and development, as well as methods available to the recreation practitioner to facilitate the development of recreation services in communities. This course examines, in particular, recreation services delivery which involves community residents and groups in recreation program decision-making and implementation. CR: HKR 3755

3595 Gender and Leisure provides students with an opportunity to critically understand and appreciate the essence of gender and leisure. The student will be expected to analyze, synthesize, and evaluate a wide range of historical, cultural, philosophical, and socio-psychological issues that have shaped the nature and scope of participation in leisure.

3685 Assessment and Documentation in Therapeutic Recreation presents an overview of current practices, philosophies, and issues related to recreation and leisure for persons with disabilities. Knowledge and understanding of various disabling conditions and needs of persons with disabilities from a therapeutic recreation perspective. Students will focus on communication skills necessary to carry out these tasks successfully. This requires the ability to actively listen, document with correct terminology, and interpret data to plan for treatment services. CH: HKR 3340 PR: HKR 2585

3755 Community Development and Recreation in Therapeutic Recreation Settings introduces various theoretical perspectives on community organization and development, as well as methods available to the therapeutic recreation practitioner to facilitate the development of recreation services in communities. Various issues such as poverty, ethnicity, and disability will be addressed. This course employs an ecological perspective in examining therapeutic recreation service delivery which involves community residents and groups in recreation program decision-making and implementation. The interconnectedness between leisure education, recreation and health and community development is discussed. CR: HKR 3575

399W Work Term 2 offers an opportunity for students to further expand and develop professional knowledge and skills, while demonstrating the ability to accept increased responsibility and challenge in the work place. A student is expected to demonstrate competence in written communication skills through the maintenance of a personal job diary and the submission of a formal report demonstrating the student's ability to effectively gather, analyze, interpret, organize, and present information according to a specific aspect of the work term position.

4210 Physical Activities Course: Winter Outdoor Activities and Leadership includes outdoor activities such as winter travel methods emphasizing cross-country skiing, snowshoeing, navigational skills, winter survival/camping, and overnight winter camping. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

4220 Physical Activities Course: Territorial Games includes activities such as soccer and rugby, basketball, ice hockey, water polo, team handball, and other territorial games. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.

4300 Human Motor and Perceptual Motor Disorders - inactive course.

4310 Evaluation - inactive course.

4330 Social Psychology of Sport, Physical Activity and Recreation introduces the psychological factors that influence participation in sport, physical activity and recreation and the psychological effects derived from participation.

4420 Issues explores, through research and discussion, trends and issues basic to the profession including areas in physical education, health, fitness, and lifestyle industries. PR: successful completion of a minimum of 78 credit hours

4485 Leisure Education in Therapeutic Recreation Settings is designed to relate to the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals. The course will address the following three broad areas: a) concepts and models of leisure education; b) content related to specific skills required for leisure involvement (leisure awareness, social

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

## 13 Programs and Regulations

### 13.1 Anthropology
- 13.1.1 Department of Anthropology Description
- 13.1.2 Bachelor of Arts Degree Requirements
- 13.1.3 General Degree
- 13.1.4 Honours Degree
- 13.1.5 Regulations for Joint Honours, Anthropology and Another Major Subject
- 13.1.6 Regulations for the International Bachelor of Arts (IBA)
- 13.1.7 Certificate in Food Studies

### 13.2 Archaeology
- 13.2.1 Department of Archaeology Description
- 13.2.2 Bachelor of Arts Degree Requirements
- 13.2.3 General Degree
- 13.2.4 Honours Degree
- 13.2.5 Regulations for Joint Honours, Archaeology and Another Major Subject
- 13.2.6 Major in Archaeology (Co-operative)
- 13.2.7 Honours Major in Archaeology (Co-operative)
- 13.2.8 Regulations for the International Bachelor of Arts (IBA)
- 13.2.9 Diploma in Ancient Worlds
- 13.2.10 Certificate in Aboriginal and Indigenous Studies

### 13.3 Classics
- 13.3.1 Department of Classics Description
- 13.3.2 Bachelor of Arts Degree Requirements
- 13.3.3 General Degree
- 13.3.4 Honours Degree
- 13.3.5 Regulations for the International Bachelor of Arts (IBA)
- 13.3.6 Certificate in Ancient Languages

### 13.4 Computer Science

### 13.5 Economics
- 13.5.1 Department of Economics Description
- 13.5.2 Bachelor of Arts Degree Requirements
- 13.5.3 Admission Regulations (B.Sc.)
- 13.5.4 Major in Economics (B.A. or B.Sc.)
- 13.5.5 Honours in Economics (B.A. or B.Sc.)
- 13.5.6 Minor in Economics
- 13.5.7 Joint Programs
- 13.5.8 Major in Economics (Co-operative) (B.A. or B.Sc.)
- 13.5.9 Honours in Economics (Co-operative) (B.A. or B.Sc.)
- 13.5.10 Regulations for the International Bachelor of Arts (IBA)

### 13.6 English
- 13.6.1 Department of English Description
- 13.6.2 Bachelor of Arts Degree Requirements
- 13.6.3 General Degrees
- 13.6.4 Honours Degrees
- 13.6.5 Major in Communication Studies
- 13.6.6 Regulations for the International Bachelor of Arts (IBA)
- 13.6.7 Diploma in Creative Writing
- 13.6.8 Diploma in Performance and Communications Media
- 13.6.9 Certificate in Film Studies

### 13.7 English as a Second Language
- 13.7.1 Intensive English Program
- 13.7.2 Intensive English Bridge Program (IEBP)

### 13.8 Folklore
- 13.8.1 Bachelor of Arts Degree Requirements
- 13.8.2 General Degree
- 13.8.3 Major in Folklore
- 13.8.4 Minor in Folklore
- 13.8.5 Honours Degree in Folklore
- 13.8.6 Joint Honours Degree in Folklore and Another Major Discipline
- 13.8.7 Regulations for the International Bachelor of Arts (IBA)

### 13.9 Gender Studies
- 13.9.1 Department of Gender Studies Description
- 13.9.2 Bachelor of Arts Degree Requirements
- 13.9.3 Major Program Regulations
- 13.9.4 Minor Program Regulations
- 13.9.5 Elective Courses
- 13.9.6 Regulations for the International Bachelor of Arts (IBA)

### 13.10 Geography
- 13.10.1 Department of Geography Description
- 13.10.2 Bachelor of Arts Degree Requirements
- 13.10.3 Major in Geography (B.A. or B.Sc.)
- 13.10.4 Honours in Geography (B.A. or B.Sc.)
- 13.10.5 Minor in Geography
- 13.10.6 Joint Programs
- 13.10.7 Regulations for the International Bachelor of Arts (IBA)
- 13.10.8 Diploma in Geographic Information Science

### 13.11 History
- 13.11.1 Department of History Description
- 13.11.2 Bachelor of Arts Degree Requirements
- 13.11.3 General Degree
- 13.11.4 Honours Degree
- 13.11.5 Regulations for the International Bachelor of Arts (IBA)

### 13.12 Linguistics
- 13.12.1 Department of Linguistics Description
- 13.12.2 Bachelor of Arts Degree Requirements
| 13.12.3 | Major in Linguistics | 332 |
| 13.12.4 | Minor in Linguistics | 333 |
| 13.12.5 | Honours in Linguistics | 333 |
| 13.12.6 | Regulations for the International Bachelor of Arts (IBA) | 333 |
| 13.13 | Mathematics and Statistics | 334 |
| 13.14 | Modern Languages, Literatures and Cultures | 334 |
| 13.14.1 | Department of Modern Languages, Literatures and Cultures Description | 334 |
| 13.14.2 | French | 335 |
| 13.15 | Philosophy | 345 |
| 13.15.1 | Department of Philosophy Description | 345 |
| 13.15.2 | Bachelor of Arts Degree Requirements | 345 |
| 13.15.3 | Major Program | 345 |
| 13.15.4 | Minor Program | 345 |
| 13.15.5 | Honours Program | 345 |
| 13.15.6 | Regulations for the International Bachelor of Arts (IBA) | 346 |
| 13.15.7 | Major and Minor in Medieval Studies | 346 |
| 13.16 | Political Science | 347 |
| 13.16.1 | Department of Political Science Description | 347 |
| 13.16.2 | Bachelor of Arts Degree Requirements | 348 |
| 13.16.3 | General Information | 348 |
| 13.16.4 | Honours in Political Science | 348 |
| 13.16.5 | Major in Political Science | 349 |
| 13.16.6 | Political Science Concentrations | 350 |
| 13.16.7 | Honours and Major in Political Science (Co-operative) | 350 |
| 13.16.8 | Minor in Political Science | 353 |
| 13.16.9 | Regulations for the International Bachelor of Arts (IBA) | 353 |
| 13.16.10 | Major and Minor in Law and Society | 355 |
| 13.16.11 | Certificate in Public Policy | 355 |
| 13.17 | Psychology | 355 |
| 13.18 | Religious Studies | 355 |
| 13.18.1 | Department of Religious Studies Description | 355 |
| 13.18.2 | Bachelor of Arts Degree Requirements | 356 |
| 13.18.3 | General Information | 356 |
| 13.18.4 | General Degree | 356 |
| 13.18.5 | Honours Degree | 356 |

Department of Classics

Head
Roman, L., B.A. Harvard, Ph.D. Stanford; Associate Professor

Associate Professors
Allen, T.J., B.A. Amherst, M.A. Texas at Austin, Ph.D. Alberta
Levett, B., B.A. Trent, M.A. Calgary, Ph.D. Washington
Maynes, C., B.A. Alberta, M.A., Ph.D. Toronto
Nikolic, M., M.A. Calgary, Ph.D. Victoria
Simonsen, K., B.A. British Columbia, M.A., Ph.D. Toronto

Department of Economics

www.mun.ca/econ

Head
Locke, L.W., B.Sc., B.A. Memorial, M.A., Ph.D. McMaster; Professor

Professores Emeriti
Roy, N., B.A. McGill, Ph.D. Johns Hopkins

Professors
Fiehean, J.P., B.A. Memorial, M.Sc. London School of Economics, Ph.D. Carleton
Martinez-Espieheira, R., Licenciatura Santiago de Compostela, M.Sc., Ph.D. York, England
May, J.D., B.Comm. Queen's, D.Phil. York (England); Cross appointments to the Faculty of Business Administration and the Division of Community Health and Humanities

Associate Professors
Gambin, L., B.Sc., M.A. Memorial, Ph.D. York, England
Kundhi, G., B.A. Egerton University, M.A. University of Nairobi, M.A. University of Toronto, Ph.D. York University
Masseoudi, N., B.A. Shiraz University, M.A. Tehran University, Ph.D. HEC Montréal Montréal, Québec

Adjunct Professor
Messacar, D., Ph.D. Toronto, M.A. British Columbia, B.A. Brock; Research Analyst (Statistics Canada)

Department of English

www.mun.ca/english

Head
Lokash, J., B.A.(Hons.), M.A., Ph.D. McGill; Associate Professor

Professores Emeriti
Buchanan, R., B.A. Keele, Ph.D. Birmingham
Jones, G.J., B.A. Leeds, M.A. McMaster, Ph.D. London
Miller, E., B.A., B.A.(Ed.), M.A., Ph.D. Memorial; Recipient of the President's Award for Distinguished Teaching, 1991-92
O'Dea, S., C.M., O.N.L., B.A., M.A. Memorial, Recipient of the President's Award for Distinguished Teaching, 1988-1989; Public Orator

Professors
Cumming, M.D., B.A.(Hons.) Wilfrid Laurier, B.Ed. Lakehead, M.A., Ph.D. Western Ontario, Recipient of the President's Award for Outstanding Research, 1989-1990
Dalton, M., B.A.(Hons.) Toronto, M.A. Memorial
Golfman, N., B.A.(Hons.) Alberta, M.A., Ph.D. Western Ontario; Provisot/Vice-President (Academic)/Pro Vice-Chancellor

Legge, V.E., B.A., B.Ed., M.A., Ph.D. Memorial; Recipient of the
President's Award for Distinguished Teaching, 2007-2008
Lynde, D.C., B.A.(Hons.) Queen's, M.A., Ph.D. Toronto
Nichol, D.W., B.A.(Hons.), M.A. Carleton, Ph.D. Edinburgh; Recipient of the President's Award for Outstanding Research, 1993-1994
Pedri, N., B.A. Windsor, M.A., Ph.D. Toronto
Schipper, W., B.A., M.A. Windsor, Ph.D. Queen's
Skidmore, J., B.A.(Hons.) Queen's, M.A., Ph.D. Toronto;
Undergraduate Advisor: Communication Studies
Memorial: Recipient of the President's Award for Distinguished Teaching, 1994-1995; Deputy Public Orator

Associate Professors
Clissold, B., B.A.(Hons.) York, M.A., Ph.D. McGill
Farquharson, D., B.A. Alberta, M.A., Ph.D. Memorial
Finley, R., B.A. Dalhousie, M.A., Ph.D. Toronto
Juhasz-Ormsby, A., B.A.(Hons.), B. Ed., Ph.D. Eötvös Loránd, Budapest, M.A. Central European University, Budapest
Lockett, C., B.A. York, M.A. Toronto, Ph.D. Western Ontario
Loman, A., B.A. Victoria, M.A., Ph.D. Queen's
Ormsby, R., B.A. Toronto, M.A. Birmingham, Ph.D. Toronto;
Graduate Coordinator
Polack, F., B.A., M.A., Ph.D. Tasmania, Australia
Walsh, D., B.A., M.A. Wyoming

Assistant Professors
Charman, C., B.A.(Hons.). St. Francis Xavier, M.A., Ph.D. Queen's
Deshayes, J., B.A.(Hons.), M.A. University of Saskatchewan, Ph.D. McGill
Gbeck, J., B.A. University of Rochester, M.A., Ph.D. University of Toronto
Moore, L., B.F.A. Nova Scotia College of Art and Design

Director of E.S.L. Programs
Davis, T., B.A. Memorial, Diploma in TEFL TEFL International, Thailand, M.Ed. Burapha, Thailand

Manager of Academic Program
Bobby, N., B.A., M.A. Madras

Department of Folklore
www.mun.ca/folklore

Head
Thorne, C.W., B.Mus. Memorial, M.A., Ph.D. Pennsylvania; Associate Professor

Professor Emeritus
Rosenberg, N.V., B.A. Oberlin, M.A., Ph.D. Indiana

Professors
Berger, H., B.A. Wesleyan, M.A., Ph.D. Indiana; Canada Research Chair in Ethnomusicology; Joint appointment with School of Music
Smith, P., B.A., Ph.D. Sheffield
Tye, D., B.A.(Hons.) Mount Allison, M.A., Ph.D. Memorial

Associate Professors
Everett, H.J., B.A.(Hons.) Texas, M.A., Ph.D. Memorial
Gould, J.P., B.A.(Hons.) Toronto, M.A. New York, Ph.D. Memorial
Hiscock, P., B.A., M.A., Ph.D. Memorial

Assistant Professor
Lesiv, M., B.A. Ukranie, M.A., Ph.D. Alberta

Department of Gender Studies
www.mun.ca/genderstudies

Head
Boon, S., B. Mus. (Performance) Toronto, M.M. Indiana, PGRNCM Manchester, M.A. (LS), Ph.D. Simon Fraser; Associate Professor

Associate Professors
Del Negro, G., B.A. Concordia, M.A. Bowling Green State, Ph.D. Indiana
Dyer, J., B.A. (Hons.) Trent University, M.A. Western Ontario, Ph.D. Amsterdam
Side, K., B.P.E., B.A. McMaster, M.A. Kent, Ph.D. York

Assistant Professors
D'Arcangelis, C.L., B.A. Harvard, M.A., Ph.D. Toronto
Doolan, C., B.A., M.A. Carleton, Ph.D. Rutgers
Hallett, V.S., B.A., M.W.S Memorial, Ph.D. York

Department of Geography
www.mun.ca/geog

Head
Catto, N.R., B.Sc.(Hons.) Queen's, M.Sc., Ph.D. Alberta; Recipient of the President's Award for Distinguished Teaching, 2009; Professor

Professors Emeriti
Macpherson, A.G., M.A. Edinburgh, Ph.D. McGill
Macpherson, J.C., B.Sc., M.Sc. London, Ph.D. McGill
Sanger, C., B.A.(Ed.), M.A. Memorial, M.Ed. Ottawa, Ph.D. Dundee
Sharpe, C.A., B.A.(Hons.) Carleton, M.A., Ph.D. Toronto; Recipient of the President's Award for Distinguished Teaching, 2007

Honorary Research Professors
Jacobs, J.D., B.A. Adams State, M.A., Ph.D. Colorado
Sharpe, C.A., B.A.(Hons.) Carleton, M.A., Ph.D. Toronto; Recipient of the President's Award for Distinguished Teaching, 2007
Storey, K., B.A.(Hons.) Leicester, M.A. Simon Fraser, Ph.D. Western Ontario
White, R., B.A. Swarthmore, M.A., Ph.D. North Carolina; University Research Professor, Awarded 1997

Professors
Bath, A.J., B.A.(Hons.) Wilfrid Laurier, M.A. Wyoming, Ph.D. Calgary; Recipient of the President's Award for Distinguished Teaching, 2012; Recipient of the President's Award for Outstanding Graduate and Post-graduate Supervision, 2015-2016
Bell, T.J., B.A.(Hons.) Trinity College Dublin, M.Sc. Memorial, Ph.D. Alberta; Recipient of the President's Award for Outstanding Research, 2000-2001; University Research Professor, Awarded 2014; Petro Canada Young Innovators Award, 2002; Coracle Fellow

Devillers, R., B.Sc.(Eq.) Lyon 1, M.Sc. UQAM, M.Sc. Laval, Ph.D. Laval/Marne la Vallée; Cross appointments with Departments of Computer Science and Earth Sciences
Edinger, E.N., B.A. California, M.Sc., Ph.D. McMaster, Joint appointment with Department of Biology; Cross appointment with Department of Earth Sciences
Mather, C., B.A.(Hons.) Wilwattersnad, M.A. British Columbia, Ph.D. Queen's

Associate Professors
Bavington, D., B.Sc.(Hons) Acadia, M.Env.Sc. York, Ph.D. Wilfrid Laurier
Finnis, J., B.Sc.(Env) Guelph, Ph.D. Colorado
Keeling, A., B.A.(Hons.) Carleton, M.A., Ph.D. British Columbia
Lepawsky, J., B.A. British Columbia, M.A. Queen's, Ph.D. Kentucky
Simms, A., B.A. Memorial, M.Sc., Ph.D. Calgary; Cross appointment with Faculty of Medicine

Assistant Professors
Brown, C.D., B.Sc.(Hons) Lakehead, M.Sc. Carleton, Ph.D. Saskatchewan
Liboiron, M., B.F.A. Mount Allison, M.F.A. State University of New York, Ph.D. New York University
Lynch, N., B.A.H. Queen's, M.A. Toronto, Ph.D. British Columbia
Pottie-Sherman, Y., B.A.(Hons.) McGill, M.A. Queen's, Ph.D. British Columbia

Cross Appointments
Asghari, S., M.D., MsPh., Ph.D. Sherbrooke; Cross appointed from the Discipline of Medicine, Faculty of Medicine
Blaser, M.E., Lic. Buenos Aires; M.A. Carleton, Ph.D. McMaster; Cross appointment from Department of Archaeology
Sandlos, J., B.A.(Hons.) McGill, M.A., Ph.D. York; Cross appointment from Department of History
St. Hilaire-Gravel, D., B.Sc. Université Laval, Ph.D. Memorial; Cross appointment from the School of Ocean Technology, Marine Institute
Adjunct Professors
Altkén, A., B.Sc., M.Sc. Queen's, Ph.D. McMaster
Batterson, M., B.A. (Hons.) Wales, M.Sc., Ph.D. Memorial
Bonnell, S., B.A., M.A. Memorial, Ph.D. Dundee
Brown, C., B.Sc. (Hons.) University of Reading, Ph.D. University of Portsmouth

Department of History
www.mun.ca/history

Head
Bishop Stirling, T.L., B.A. Memorial, M.A. Queen's; Assistant Professor

Professores Emeriti
Bassler, G.P. Cand. Phil. Munich, Ph.D. Kansas
Hiller, J.K., B.A. Oxon, M.A. Memorial, Ph.D. Cantab; University Research Professor

Honorary Research Professors
Voué, C.P., B.A. Lancaster, M.A., Ph.D. Dalhousie; CSU Teaching Award, 1998

Professors
Burton, V.C., B.A. (Hons.), M.A. Lancaster, Dip. Ed. Sussex, Ph.D. London; MUNSU Teaching Award, 2009-2010
Cadigan, R.K., B.A. (Hons.), M.A. Memorial, Ph.D. Queen's, Chair in Words of Power, University of Victoria Panjabi, R.K., B.A. (Hons.), LL.B. (Hons.), M.A. London, Ph.D. Peradeniya
Sanadlo, J., B.A. (Hons.) McGill, M.E., Ph.D. York; Recipient of the President's Award for Outstanding Research, 2013-2014; Cross appointment to Department of Geography Webb, J., B.A., M.A. Memorial, Ph.D. New Brunswick

Associate Professors
Bosák, E., B.A. Brock, B.Ed. Memorial, M.A. Waterloo, Ph.D. London
Brégent-Heald, D., M.A. Toronto, Ph.D. George Washington, Ph.D. Duke
Cassidé, M., B.A. (Hons.) Alberta, M.A., M.A., Ph.D., L.M.S. Toronto; Cross appointment to Department of Archaeology Curtis, S.M., B.A. (Hons.) Brock, B.Ed. Lakehead, M.A., Ph.D. Carnegie Mellon
Kennedy, N., B.A. (Hons.) Toronto, M.A. (Anth) William and Mary, M.A. (Hist) Johns Hopkins, Ph.D. Western Ontario; Cross appointment to Department of Archaeology Kornes, K., B.A. Northern Illinois, Ph.D. Memorial

Assistant Professors
Clapperton, J., B.A. (Hons.) UNBC, M.A. Victoria, Ph.D. Saskatchewan Fantauzzo, J., B.A. (Hons.) M.A. Windsor, Ph.D. Cambridge Kirkpatrick, M., B.A. (Hons.) M.A. Manitoba, Ph.D. Saskatchewan Rossignol, S., B.A. Montréal, M.A. Georg-August Universität Göttingen, Ph.D. Université de Montréal
Stanley, H., B.A., M.A. Victoria, Ph.D. Saskatchewan

Cross Appointments
Connors, J.J., B.A. Guelph, M.A. York, M.Phil. Waterloo, Ph.D. Western Ontario; Cross appointment from Discipline of Psychiatry, Faculty of Medicine
Connor, J.T.H., B.Sc. Guelph, M.A. Western Ontario, M.Phil., Ph.D. Waterloo, F.R.Hist.S.; Recipient of the President’s Award for Outstanding Teaching, 2012-2013; John Clinch Professor of Medical Humanities and History of Medicine; Cross appointment from Discipline of Psychiatry, Faculty of Medicine

Head
Craig, A., B.A. York, Ph.D. New York University; Associate Professor; Recipient of the President’s Award for Outstanding Teaching (Faculty), 2016-2017

Professores Emeriti
Meja, V., Dip. Soz., Frankfurt, Ph.D. Brandeis
Porter, M., M.A. Trinity College, Dublin, Ph.D. Bristol; University Research Professor, Awarded 2003
Sinclair, P.R., M.A. Aberdeen, Ph.D. Edinburgh; University Research Professor, Awarded 1992

Honorary Research Professors
Cullum, L., B.A. Memorial, M.A., Ph.D. OISE
House, J.D., B.A. Memorial, M.A. Oxford, Ph.D. McGill
Riggins, S.H., B.A., M.A. Indiana, Ph.D. Toronto

Professors
Neis, B., B.A. York, M.A. Memorial, Ph.D. Toronto; University Research Professor, Awarded 2007
Oleinik, A., MA (DEA), Ph.D. EHESS, Paris, Ph.D. Habilitation, Central Economics and Mathematics Institute (Moscow)

Associate Professors
Adler, J., B.A. California, Ph.D. Brandeis
Crocker, S., B.A. Memorial, M.A., Ph.D. York
Hall, A., B.A. Bishops, M.A. Guelph, Ph.D. Toronto; Undergraduate Advisor: Police Studies
Kenney, S., B.A., LL.B. Dalhousie, M.A., Ph.D. McMaster
Micucci, A., B.A., M.A., Ph.D. York
Power, N., B.A., M.A. Memorial, Ph.D. Essex, UK
Ricciardelli, R., B.A.(Hons.), M.A. Western Ontario, Ph.D. McMaster

Stanbridge, K., B.A., M.A., Ph.D. Western Ontario
1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled The Memorial University of Newfoundland Code, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in UNIVERSITY REGULATIONS - Academic Misconduct in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student/sscm/conduct/.

3 Faculty Description

The Faculty of Humanities and Social Sciences offers a wide range of undergraduate and graduate programs in the social sciences and the humanities, offering excellence in both teaching and research. These degree programs examine culture, thought, prehistory and history, human interactions and the social and natural forces that constantly transform our society. A Humanities and Social Sciences education can provide incomparable advantages. Students gain the critical-thinking, analytical and communication skills needed to succeed and adapt in a changing world. This can lead to exciting, productive careers. One of Memorial University of Newfoundland's largest and most diverse units, the Faculty of Humanities and Social Sciences is a place where you can study what fascinates you, and succeed and adapt in a changing world. This can lead to exciting, productive careers. Our faculty conduct research in a wide variety of areas, making discoveries that foster our understanding of the past, present and future. Our alumni work in a wide variety of fields not only in Newfoundland and Labrador, but also in Canada and the rest of the world. Their services are in demand because they have learned to define and analyze problems, to think creatively, and to communicate to others. Members of the faculty are also actively engaged in the community, whether helping to understand complex problems, working with groups to preserve culture, hosting public lectures and readings, or helping raise awareness of significant issues relevant to the well-being of people and communities.

Additional information regarding the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss.

4 Admission to Undergraduate Degree Programs

The application for admission or readmission is submitted online; current and returning Faculty of Humanities and Social Sciences applicants should apply using the Admissions menu within Memorial Self-Service at www.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

These regulations shall also apply to interdisciplinary programs. In such cases, the student should contact the Program Coordinator or supervisor.

1. Declaration of the Bachelor of Arts or the International Bachelor of Arts degree programs may be made at the time of application to the University or by means of the DECLARATION/CHANGE OF ACADEMIC PROGRAM form following admission to the University. This form may be obtained at www.mun.ca/regist/registration/Declare_Change_Academic_Program.pdf or in-person at the Office of the Registrar.

2. A student who intends to complete a degree in the Faculty of Humanities and Social Sciences must also declare a Major and Minor (or second Major) chosen according to the Major Program and the Minor Program below. In most cases, this declaration may be made at the time of application to the University or, following admission to the University, by means of the DECLARATION/CHANGE OF ACADEMIC PROGRAM form, which must be submitted to the Office of the Registrar.

3. A student is encouraged to declare a Major and Minor (or second Major) no later than the semester in which they next attend the University following completion of 18 credit hours in courses applicable to their program(s).

4. A student is strongly advised to consult with departmental or program coordinators or supervisors before making a declaration to the department or program of the student's intended Major or Minor.

5. In the case of programs with admission requirements which go beyond the general admission requirements of the University, a student should make formal application to the department, coordinator or supervisor after completion of the program's admission requirements. These Bachelor of Arts programs include, but are not restricted to the following: Major in Archaeology (Co-operative), Major in Economics (Co-operative), Major in Political Science (Co-operative). In the Faculty of Science, this includes the Major in Psychology (Co-operative).

6. For information about admission to a diploma program, refer to Diploma Programs, Admission.

7. For information about admission to a certificate program, refer to Certificate Programs, Admission.

5 Course Syllabus

All course syllabi must observe the University's General Academic Regulations (Undergraduate). Evaluation of Student Work. In
addition to adhering to provisions in General Academic Regulations (Undergraduate), Evaluation of Student Work, Course Syllabus, a course syllabus in the Faculty of Humanities and Social Sciences that is distributed in the first week of classes must also include:

- the title and number of the course as it appears in the University Calendar;
- the instructor’s Memorial University of Newfoundland email address;
- the instructor’s room number, if one has been assigned;
- the instructor’s office hours for students, if the course is delivered on campus;
- a brief description of all required assignments and testing that comprise the method of evaluation;
- a provisional schedule that outlines the themes or topics to be covered throughout the semester, accompanied by an associated timeline of required reading; and,
- a policy statement about missed testing and late penalties, which must be in accordance with University policies. As per UNIVERSITY REGULATIONS - Attendance, a course syllabus does not include attendance regulations unless approved by Senate.

In addition, the syllabus for any course designated as Critical Reading and Writing (CRW), Language Study (LS) or Quantitative Reasoning (QR) must follow the applicable course guidelines available on the Faculty of Humanities and Social Sciences website at www.mun.ca/hss.

6 Degree Regulations - General and Honours Degrees

In these regulations, all references to Heads of Departments and Program Supervisors are to be read as “Head of Department or delegate” and “Program Supervisor or delegate.”

6.1 Bachelor of Arts General Degree Components

1. A student for the General Degree of Bachelor of Arts must complete a minimum of 120 credit hours in courses subject to the following regulations.

2. A Bachelor of Arts emphasizes the study of the Humanities and Social Sciences. The Bachelor of Arts General Degree consists of the following components:

   a. Core Requirements courses, some of which may also be used to satisfy other components of the Degree;

   b. a Major Program, including a minimum 60% average, or alternatively an Honours Program including a grade of 70% or better;

   c. a Minor Program, including a minimum 60% average, or alternatively a second major including a minimum 60% average; and

   d. Electives.

3. A student completing a degree program in the Faculty of Humanities and Social Sciences will normally follow the degree regulations in effect in the academic year in which the student first completes a course(s) at Memorial University of Newfoundland. However, a student may elect to follow subsequent regulations introduced during the student’s tenure in the program. In accordance with UNIVERSITY REGULATIONS - Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science, when changes occur to a Major, Minor, or Honours program, students who had completed a 2000-level course or above in that program will follow the regulations that were in effect at that time, or may choose to follow the revised regulations for that program.

6.1.1 Academic Advising and Declaring a Bachelor of Arts

A student is encouraged to consult with an academic advisor to discuss academic programs, including the Core Requirements. A student is encouraged to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors are available at www.mun.ca/hss/programs/undergraduate/declare.php.

6.1.2 Core Requirements

The Bachelor of Arts Core Requirements comprise a Breadth of Knowledge Requirement, a Critical Reading and Writing (CRW) Requirement, a Language Study (LS) Requirement, and a Quantitative Reasoning (QR) Requirement. The Core Requirements provide breadth of knowledge and exposure to methodologies that are foundational for a university education, including the development of critical thinking, analytical, and communication skills in different disciplines within the Faculty of Humanities and Social Sciences. Normally, core requirement courses are offered at the 1000-level or 2000-level, and are intended to be completed early in a student’s program of study. A student is encouraged to complete the CRW, LS, and QR Requirements within the first 45 credit hours.

A student must complete all Core Requirements, subject to the following conditions:

1. Each eligible course may be used towards both the Core Requirements and applicable Major(s) or Minor requirements.

2. A student who is concurrently completing the Bachelor of Commerce (Co-operative) degree should refer to Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative).

3. Specific (designated) Grenfell Campus courses may be eligible to fulfill the Core Requirements. Art History, Environmental Studies, Humanities, Social/Cultural Studies, and Tourism courses are eligible to fulfill the Breadth of Knowledge Requirement. A designated Writing (W) course is eligible if it is demonstrated that the course follows the CRW course guidelines available at www.mun.ca/hss/crw. A course in a language, other than English, is eligible if it is demonstrated that the course follows the LS course guidelines available at www.mun.ca/hss/ls. A designated Quantitative Reasoning and Analysis (QRA) course is eligible if it is demonstrated that the course follows the QR course guidelines available at www.mun.ca/hss/qr. The Faculty of Humanities and Social Sciences’ Committee on Undergraduate Studies is responsible for assessing the eligibility of these courses.

A student, in consultation with an academic advisor, is encouraged to follow Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts. A student interested in a Bachelor of Arts Major in Computer Science, Mathematics, Statistics, or Psychology, or in a Minor in an eligible program outside of the Faculty of Humanities and Social Sciences, should consult an advisor in the appropriate department for suggested course sequencing, in addition to consulting an advisor in the Faculty of Humanities and Social Sciences.

A student in the International Bachelor of Arts (iBA) program is advised to subsequently consider Table 2 Possible Course Sequencing for the iBA (first 60 credit hours).
Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts

<table>
<thead>
<tr>
<th>Semester</th>
<th>Suggested Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester 1 (15 credit hours)</td>
<td>Course #1 (3 credit hours): first course for Critical Reading and Writing (CRW) Requirement should be a 1000-level English CRW course&lt;br&gt;Course #2 (3 credit hours): first course for Language Study (LS) Requirement&lt;br&gt;Course #3 (3 credit hours): first course for Quantitative Reasoning (QR) Requirement. Eligible Quantitative Reasoning courses offered at the 3000-level are normally completed after the first 45 credit hours.&lt;br&gt;Courses #4-5 (6 credit hours): choose 1000-level courses as electives. Breadth is encouraged. Consider choosing courses in a possible Major and Minor. Programs without 1000-level courses offer 2000-level courses that are ordinarily completed in the first year of study.</td>
</tr>
<tr>
<td>Semester 2 (15 credit hours)</td>
<td>Course #6 (3 credit hours): second course for Critical Reading and Writing (CRW) Requirement, ideally in an area of study being considered for the Major. This course can be at the 1000-level or 2000-level.&lt;br&gt;Course #7 (3 credit hours): second course for Language Study (LS) Requirement&lt;br&gt;Course #8 (3 credit hours): second course for Quantitative Reasoning (QR) Requirement. Eligible Quantitative Reasoning courses offered at the 3000-level are normally completed after the first 45 credit hours.&lt;br&gt;Courses #9-10 (6 credit hours): choose additional electives of interest. Breadth is encouraged. Consider declaring a Major and Minor.</td>
</tr>
<tr>
<td>Semester 3 (15 credit hours)</td>
<td>Courses #11-15 (15 credit hours): consider your Major and Minor program requirements, as appropriate. Choose further electives.</td>

6.1.2.1 Breadth of Knowledge Requirement

The Breadth of Knowledge Requirement is designed to ensure that students have exposure to courses in a variety of disciplines and interdisciplinary areas of study within the Humanities and Social Sciences, in order to achieve a well-rounded Humanities and Social Sciences education. To fulfill the Breadth of Knowledge Requirement, a student must complete at least one course in a minimum of 6 of the following areas of study in the Humanities and/or Social Sciences, chosen from: Anthropology, Archaeology, Classics, Communication Studies, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Law and Society, Linguistics, Medieval Studies, Philosophy, Police Studies, Political Science, Religious Studies, Russian, Sociology, Spanish, University courses. Humanities and/or Social Sciences courses used to meet the CRW, LS, and QR requirements and/or the student's Major or Minor requirements may also be used towards this requirement.

6.1.2.2 Critical Reading and Writing (CRW) Requirement

The Critical Reading and Writing Requirement (CRW) is designed to ensure that students develop university-level foundational knowledge and skills in critical reading and writing in the Humanities and/or Social Sciences, as described in the CRW course guidelines available at www.mun.ca/hss/crw. To fulfill the Critical Reading and Writing Requirement, a student must complete a minimum of 6 credit hours in foundational Critical Reading and Writing courses. This shall include 3 credit hours in a 1000-level CRW course offered by English, and an additional 3 credit hours in any Faculty of Humanities and Social Sciences course whose title begins with “Critical Reading and Writing” chosen from the following eligible courses: Archaeology 1001, English 1090 or the former 1080, 1191 or the former 1101, 1192 or the former 1102, 1193 or the former 1103, 1110, Gender Studies 2005, German 1010, History 1005, 1009-1015, 1300, 1301, Philosophy 1001, 1230, Political Science 1001, Religious Studies 1001, University 1020, 1500. Courses offered at Grenfell Campus using these course numbers are only eligible if they meet the CRW criteria specified above. Normally, students will complete 3 credit hours in an English CRW course, and 3 credit hours in a CRW course in another area of study included in the Breadth of Knowledge Requirement, preferably in the student's respective Major or Minor if available. The foregoing notwithstanding, any student who has completed a minimum of 3 credit hours in any English course may instead elect to fulfill the CRW Requirement by completing 6 credit hours in CRW courses in any disciplines in the Humanities and/or Social Sciences. A Critical Reading and Writing course cannot also be used to fulfill the Language Study Requirement or the Quantitative Reasoning Requirement. Guidelines for CRW courses are maintained by the Committee on Undergraduate Studies.

6.1.2.3 Language Study (LS) Requirement

The Language Study (LS) Requirement is designed to ensure that students develop university-level foundational knowledge of the structure of a language other than English, and to foster awareness of the inherent link between language and cultural literacy, as described in the LS course guidelines available at www.mun.ca/hss/ls. To fulfill the Language Study Requirement, a student must complete a minimum of 6 credit hours in the study of a single language, other than English, chosen from one of: French (Modern Languages, Literatures and Cultures), German (Modern Languages, Literatures and Cultures), Greek (Classics), Hebrew (Religious Studies), Innu-aimun (Linguistics), Inuktitut (Linguistics), Irish Gaelic (Modern Languages, Literatures and Cultures), Italian (Modern Languages, Literatures and Cultures), Japanese (Modern Languages, Literatures and Cultures), Latin (Classics), Mandarin Chinese (Religious Studies), Russian (Modern Languages, Literatures and Cultures), Spanish (Modern Languages, Literatures and Cultures), or another language that may be offered by the Faculty of Humanities and Social Sciences. Not all courses in the Department of Modern Languages, Literatures and Cultures or other departments qualify and it is a student's responsibility to refer to the department's or course's Calendar entry. The guidelines for LS courses are maintained by the Committee on Undergraduate Studies. A student with competency in one of these languages should check with the respective department to select appropriate university-level courses.

6.1.2.4 Quantitative Reasoning (QR) Requirement

The Quantitative Reasoning (QR) Requirement is designed to ensure that students develop university-level foundational knowledge and skills in numeracy, quantitative analysis, logical reasoning involving numbers, and/or the graphical representation of data, as described in the QR course guidelines available at www.mun.ca/hss/qr. To fulfill the Quantitative Reasoning Requirement, a student must complete a minimum of 6 credit hours in foundational Quantitative Reasoning courses, through any combination of the following:

1. Eligible Humanities and Social Sciences courses: Archaeology 2450, Economics 1010 (or the former 1020), 1020 (or the former 1000), 2550; Geography 1050, 2102, 2195, 2302; History 2000; Linguistics 2210, 3850; Philosophy 2210, 2211; Political Science 2210, 2213; Sociology 2550, 2650; Religious Studies 2000; Philosophy 1010; Political Science 1100; Psychology 1000; Linguistics 1000.
Faculty of Humanities and Social Sciences 2017-2018

3010, 3350; Sociology 3040, 3041.
2. Eligible Faculty of Science courses (limited to disciplines for which there is an Humanities and Social Sciences Major): Computer Science 1000-level and 2000-level courses; Mathematics 1000-level courses, 2050; Psychology 2910, 2911, 2920; Statistics 1510, 2500, 2550.

Some foundation-level Quantitative Reasoning courses have prerequisites and/or are offered at the 3000-level. Such courses will normally be completed after the first 45 credit hours. Guidelines for QR courses are maintained by the Committee on Undergraduate Studies.

6.1.2.5 Previous Calendar Regulations
A student who has completed any course at Memorial University of Newfoundland prior to September 2015 may choose to follow Core Requirement Calendar regulations from the corresponding previous edition of the University Calendar. For all students, a course section with the former Research/Writing (R/W) designation that was completed prior to September 2015 may be used to fulfill the second Critical Reading and Writing (CRW) course requirement (i.e., all students must complete at least one English course); identifying eligible R/W courses may require consultation with an academic advisor.

6.1.3 The Major Program
A Major program is offered by departments, leading to the General Degree of Bachelor of Arts. A Departmental Major Program consists of a minimum of 36 to a maximum of 45 credit hours taken in a subject listed in The Major Program. An alternative to a departmental Major is an Interdisciplinary Major. An alternative to a General Degree is an Honours Degree.
1. Departmental Major Programs are offered by the following departments in the Faculty of Humanities and Social Sciences: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish. As an alternative, Interdisciplinary Humanities and Social Sciences Major Programs are available under Interdisciplinary Major and Minor Programs. Majors are also available through the following Faculty of Science departments: Computer Science, Mathematics and Statistics, and Psychology.
2. In departments that offer programs leading to either a degree of Bachelor of Arts or a degree of Bachelor of Science, a student is free to choose either degree program and may change from one to the other. A student may not obtain both a Bachelor of Arts and a Bachelor of Science degree in the same Major subject. Furthermore, a student must complete a minimum of one of the Major or the Minor, or a minimum of one of the two Majors, in a Humanities or Social Sciences program offered by the Faculty of Humanities and Social Sciences.
3. A student who has completed courses in the area of the Major at another university is required to complete at least 18 credit hours in that subject at Memorial University of Newfoundland.
4. A student must follow the regulations for the Major programs as set forth in the appropriate section of the Calendar.
5. The Head of the Department or Departmental Undergraduate Academic Advisor of the Major program can advise the student on the selection of courses in the Major.
6. Departmental regulations do not prevent a student from completing more than the minimum required credit hours in the subjects of the Major and/or Minor. A student may complete additional courses in the Major and/or Minor subject area and, if eligible, use them towards the Bachelor of Arts Electives.

6.1.4 The Minor Program
A Departmental Minor Program shall consist of at least 24 credit hours taken in a subject other than that of the Major and normally chosen from the subjects listed under The Major Program. As an alternative to a departmental Minor, Interdisciplinary Humanities and Social Sciences Minor programs are available and are described under Interdisciplinary Major and Minor Programs.
1. Departmental Minor Programs are offered by the following departments in the Faculty of Humanities and Social Sciences: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish. As an alternative, Interdisciplinary Humanities and Social Sciences Minor Programs are available. In addition to the Departmental Minor Program in Humanities and Social Sciences disciplines and those detailed under the Interdisciplinary Humanities and Social Sciences Minor Programs. Minors are also available through the Faculty of Business Administration, the School of Music, and relevant departments in the Faculty of Science. Such programs are governed by regulations which are detailed in the Calendar entries for the Faculty of Business Administration, the School of Music, and relevant departments in the Faculty of Science.
2. A student must complete a minimum of one of the Major or the Minor, or a minimum of one of the two Majors, in a Humanities or Social Sciences program offered by the Faculty of Humanities and Social Sciences.
3. A student must follow the regulations for the Minor program as set forth in the appropriate section of the Calendar.
4. The Head of the Department or Departmental Undergraduate Academic Advisor of the Minor program can advise the student on the selection of courses in the Minor.
5. A student who has completed courses in the area of the Minor at another university is required to complete at least 9 credit hours in that subject at Memorial University of Newfoundland.
6. As an alternative to a Minor, a student may simultaneously complete a second Major program. The student must follow all General and Departmental or Program Regulations for this Major program.
7. Departmental regulations do not prevent a student from completing more than the minimum required credit hours in the subjects of the Major and/or Minor. A student may complete additional courses in the Major and/or Minor subject area and, if eligible, use them towards the Bachelor of Arts Electives.

6.1.5 Interdisciplinary Major and Minor Programs
The Faculty of Humanities and Social Sciences offers undergraduate interdisciplinary Major and Minor programs that consist of courses that deal with a common topic from a variety of departments within the Faculty. This normally prioritizes core courses and is supplemented by other courses that bring different approaches to the study of the subject matter.

6.1.5.1 General Regulations for Interdisciplinary Major and Minor Programs
1. Students shall consult about their interdisciplinary Faculty of Humanities and Social Sciences program with the designated Program Coordinator.
2. Departmental prerequisites for courses are applicable. This may increase the number of stated courses required for completion of
the program. Such courses may be eligible towards other components of the Bachelor of Arts.

3. Normal credit restrictions apply. It is the student’s responsibility to recognize that additional credit may not be obtained for completing two versions of a cross-listed course (i.e., the same course delivered by two or more departments).

4. Courses selected from a minimum of three disciplines within the Faculty of Humanities and Social Sciences Programs and Regulations shall be required for an interdisciplinary Major or Minor.

5. A Program Coordinator may, in consultation with the Head of the relevant academic unit, request permission from the Committee on Undergraduate Studies for a course to be added to the program. Normally, the addition of a course whose Calendar entry clearly establishes that it is highly relevant to the program shall be approved, and the Committee shall request Senate approval to add the course to the program’s Calendar entry. Due to their temporary nature, “special topics” courses are not listed in the entry for an interdisciplinary Major or Minor program; however, a special topics course may be included in a student’s program of study with permission from the Committee on Undergraduate Studies.

6. With the prior written approval of a Program Coordinator and the Committee on Undergraduate Studies, a student may use up to 3 credit hours from a departmental Honours research essay course towards interdisciplinary program requirements, provided that the essay topic is clearly related to the program.

6.1.5.2 Interdisciplinary Humanities and Social Sciences Major Programs

1. A student must follow the regulations for the interdisciplinary Humanities and Social Sciences Major program as set forth in the appropriate section of the Calendar. Interdisciplinary Humanities and Social Sciences Major programs are available in Communication Studies (Department of English), Law and Society (Department of Political Science), Medieval Studies (Department of Philosophy), and Police Studies (Department of Sociology).

2. These interdisciplinary Humanities and Social Sciences Major programs shall require not fewer than 36 and not more than 45 credit hours.

3. A student completing an interdisciplinary Humanities and Social Sciences Major program must choose a Minor in a single discipline (i.e., offered by a department or another eligible Faculty). Instead of a Minor, a second Major in a single discipline may be pursued; however, only one Major may be interdisciplinary. All General and Departmental or Program Regulations for this second Major program must be followed.

4. A maximum of 12 credit hours from an interdisciplinary Humanities and Social Sciences Major may be used to satisfy the requirements of a single disciplinary Minor or second Major, provided they are in accordance with the regulations governing both programs.

5. For an interdisciplinary Humanities and Social Sciences Major, other than courses exclusive to the interdisciplinary program of study (e.g., Law and Society courses used for the Law and Society program), a maximum of 15 credit hours from any one discipline listed in the Faculty of Humanities and Social Sciences Course Descriptions shall be eligible. No more than 6 credit hours in undergraduate courses which are not listed in the Faculty of Humanities and Social Sciences Course Descriptions shall be eligible. Students completing such courses are still required to complete the minimum number of Faculty of Humanities and Social Sciences courses as per Electives below. Courses delivered only at Grenfell Campus shall be treated on a case-by-case basis in the manner prescribed for adding courses in General Regulations for Interdisciplinary Major and Minor Programs.

6. A student who has completed courses in the area of the interdisciplinary Humanities and Social Sciences Major at another university is required to complete at least 18 credit hours in that subject or in courses applicable to the program at Memorial University of Newfoundland.

7. In Departments which offer programs leading to both a degree of Bachelor of Arts and a degree of Bachelor of Science, a student is free to choose the degree program he/she wishes to follow and may change from one to the other; however, he/she may not obtain both degrees in the same Major subject.

6.1.5.3 Interdisciplinary Humanities and Social Sciences Minor Programs

1. A student must follow the regulations for the interdisciplinary Humanities and Social Sciences Minor program as set forth in the appropriate section of the Calendar. Interdisciplinary Humanities and Social Sciences Minor programs are available in Law and Society (Department of Political Science) and Medieval Studies (Department of Philosophy).

2. These interdisciplinary Humanities and Social Sciences Minor programs shall require not fewer than 24 credit hours.

3. A student completing an interdisciplinary Humanities and Social Sciences Minor program must choose a single disciplinary Major (i.e., in a single department discipline).

4. A maximum of 6 credit hours from the interdisciplinary Humanities and Social Sciences Minor may be used to satisfy the requirements of the single disciplinary Major, provided they are in accordance with the regulations governing both programs.

5. For an interdisciplinary Humanities and Social Sciences Minor, other than courses exclusive to the interdisciplinary program of study (e.g., Law and Society courses used for the Law and Society program), a maximum of 15 credit hours from the department that administers the program, and a maximum of 9 credit hours from any other discipline listed in the Faculty of Humanities and Social Sciences Course Descriptions shall be eligible. No more than 3 credit hours in undergraduate courses which are not listed in the Faculty of Humanities and Social Sciences Course Descriptions shall be eligible. Students completing such courses are still required to complete the minimum number of Faculty of Humanities and Social Sciences courses as per Electives below. Courses delivered only at Grenfell Campus shall be treated on a case-by-case basis in the manner prescribed for adding courses in General Regulations for Interdisciplinary Major and Minor Programs.

6. A student who has completed courses in the area of the interdisciplinary Humanities and Social Sciences Minor at another university is required to complete at least 9 credit hours in that subject or in courses applicable to the program at Memorial University of Newfoundland.

7. In addition to the Departmental Minor programs in Humanities and Social Sciences disciplines and those detailed under the Interdisciplinary Humanities and Social Sciences Minor Programs, Minors are available through the Faculty of Business Administration, the School of Music, and departments in the Faculty of Science. These programs are governed by regulations which are detailed in the Calendar entries for the Faculty of Business Administration, the School of Music, and departments in the Faculty of Science.

8. Departmental regulations are not intended to prevent a student from completing more than the minimum required credit hours in the subjects of their Major and Minor.

6.1.6 Electives

In accordance with Regulations outlined under Core Requirements, The Major Program and The Minor Program, a student must complete a minimum of 78 credit hours (of the 120 credit hours for the degree) in Humanities and Social Sciences courses offered by
the Faculty of Humanities and Social Sciences. With some limitations, courses offered by the Faculty of Science in Computer Science, Mathematics and Statistics, and Psychology may be applied to this requirement. Electives comprise the remaining 42 credit hours of the total 120 credit hours for the degree.

1. Electives provide students with the opportunity to choose university-level courses from a variety of eligible disciplines. Subject areas that are eligible as electives towards the remaining 42 credit hours for the degree include:
   a. Humanities and/or Social Sciences. This includes additional courses in the Major and/or Minor that are over and above the normal requirements for that program of study,
   b. Science,
   c. Business, and/or,
   d. Music (Musicologies and Music Theory and Composition only).

2. Of the 42 credit hours in electives, a student may choose to include up to 15 credit hours in electives in any other subject area, including but not limited to Education, Engineering, Human Kinetics and Recreation, Maritime Studies, Medicine, Nursing, Pharmacy, Social Work, with the exception of courses that are clearly practical or professional.

3. Courses with academic demands that are clearly practical or professional, and are not consistent with the Faculty of Humanities and Social Sciences Description, are not eligible for use in any manner towards the Bachelor of Arts. Ineligible courses include but are not limited to:
   a. Internships, Student Teaching or Practicum courses (Education),
   b. Outdoor Pursuits or Expeditions courses (Environmental Studies),
   c. Activities and Coaching courses (Human Kinetics and Recreation),
   d. Master Classes (Fine Arts, Theatre),
   e. Studio courses (Fine Arts, Visual),
   f. Applied Music or Ensemble Techniques courses (Music),
   g. Nursing Practice or Clinical Practicum courses (Nursing),
   h. Structured Practice Experiences (SPE) or Pharmacy Practice Experiences in Pharmacy (Pharmacy), and/or
   i. Field Placement courses (Social Work).

6.1.7 Limit on Certain Credit Hours

1. Students can receive credit for only two English courses at the 1000-level: one of English 1000 or 1090 or the former 1080, and one of 1001, 1191 or the former 1101, 1192 or the former 1102, 1193 or the former 1103 or 1110. Students whose first language is not English and who do not meet the standards for entry into regular first-year English courses, and who elect to use English 1020 and 1021 to fulfill the Language Study requirement, may complete up to an additional 6 credit hours in English courses at the 1000-level. These limits also apply to unspecified credit hours transferred from other institutions.

2. Credit hours awarded for field placement courses in certain Diploma programs are not eligible towards a Bachelor of Arts. This includes English 5000, the former Philosophy 5000, and the former Police Studies 5000.

6.2 International Bachelor of Arts (iBA) Degree Regulations

1. The International Bachelor of Arts (iBA) Degree program is designed for students who are interested in the study of global dynamics and worldwide issues from the perspective of the Humanities and Social Sciences. The program’s objectives are to provide knowledge and analytical skills essential for research and work on cultural, economic, political, religious and social processes on a global scale. An iBA degree requires, in addition to the requirements of the Bachelor of Arts (B.A.) Degree, a combination of additional university-level language study, completion of designated courses with a clear international focus, and participation in either an international study or internship placement requiring residency outside of Canada.

2. The process for declaring an International Bachelor of Arts (iBA) is the same as for declaring a Bachelor of Arts (B.A.). However, admission to the International Internship Option is limited and competitive.

3. The iBA program is available exclusively to students who complete a Major or Honours program in one of the following Faculty of Humanities and Social Sciences programs: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.

4. The iBA is not available with a Major in an interdisciplinary program (Communication Studies, Law and Society, Medieval Studies, Police Studies) or a Faculty of Science program (Computer Science, Psychology, Pure Mathematics, Statistics) unless the student also completes an eligible Honours or Major program.

5. The iBA is not available to students who are enrolled in a Co-operative Education degree program.

6. Unless otherwise specified, normal Bachelor of Arts regulations apply with respect to Joint programs and Minor programs, including those offered by other Faculties and Schools.

6.2.1 International Bachelor of Arts (iBA) Admission and Registration

1. A student shall declare a Major in the Humanities and Social Sciences, normally within the first 45 credit hours, or shall apply for admission to an Honours program in the Humanities and Social Sciences as outlined under Academic Advising and Declaring a Bachelor of Arts.

2. A student who wishes to enter an iBA program is strongly advised to consult an academic advisor and international exchange coordinator early in their university career, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.

3. In accordance with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Degree and Departmental Regulations - Further Credentials, no student shall obtain more than one undergraduate degree from the Faculty of Humanities and Social Sciences.

6.2.2 International Bachelor of Arts (iBA) Degree Components

A student for the Degree of International Bachelor of Arts (iBA) must complete a minimum of 120 credit hours in courses subject to the following regulations:

1. A student is required to complete the Core Requirements as detailed in the Regulations for the General Degree of Bachelor of Arts. These include:
a. Breadth of Knowledge Requirement
b. Critical Reading and Writing (CRW) Requirement
c. Language Study (LS) Requirement
d. Quantitative Reasoning (QR) Requirement

2. A student is required to complete a Major Program including a minimum 60% average, or alternatively an Honours Program including an average of 75% or better;

3. A student is required to complete a Minor Program including a minimum 60% average, or alternatively a second Major including a minimum 60% average;

4. A student is required to complete general Electives; and,

5. As part of the minimum 120 credit hours, an iBA student is also required to complete the following requirements, for which credit hours may be used to jointly satisfy other requirements of the degree:
   a. International Studies (IS) Courses Requirement;
   b. Additional Language Study (LS) Requirement, and

6. A student must complete all iBA requirements, subject to the following conditions:
   a. All students are required to follow the regulations pertaining to the Bachelor of Arts unless otherwise specified
   b. Grenfell Campus courses and courses completed at other eligible academic institutions may be eligible to satisfy the International Studies (IS) Courses Requirement or the Additional Language Study (LS) Requirement. A course that involves international study may be eligible if it is demonstrated that it follows the IS course guidelines available at www.mun.ca/hss/IS. The Faculty of Humanities and Social Sciences’ Committee on Undergraduate Studies is responsible for assessing the eligibility of these courses, in consultation with the applicable academic unit Head; refer to Waiver of Regulations for Undergraduate Students, Other Regulations.

In consultation with an academic advisor, a student is encouraged to follow Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours) and to consider possible course sequencing in the Program Regulations — General and Honours Degrees. A student interested in a Bachelor of Arts Minor in an eligible program outside of the Faculty of Humanities and Social Sciences should consult an advisor in the appropriate department or suggested course sequencing, in addition to consulting an advisor in the Faculty of Humanities and Social Sciences.

</tr>
<tr>
<td>Semester 2 (15 credit hours)</td>
<td>Follow Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts, including 3 credit hours in each of a CRW course, a LS course in the same language as completed in Semester 1, and a QR course.</td>
</tr>
<tr>
<td>Semester 3 (15 credit hours)</td>
<td>Courses #11-15: Consider Major and Minor program requirements, as appropriate (a Major in the iBA is available only in Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish). Choose a first course for International Studies (IS) Requirement from Table 3 International Studies (IS) Designated Courses, which may be eligible to jointly fulfill requirements of the Major or Minor program. Consider another LS course in a language not yet studied within the parameters of the Additional Language Study (LS) Requirement.</td>
</tr>
<tr>
<td>Semester 4 (15 credit hours)</td>
<td>Courses #16-20: Consider Major and Minor program requirements. Choose a further 3 credit hours in an IS course. Consider a fourth LS course to fulfill the Additional Language Study (LS) Requirement, ensuring a maximum of 6 credit hours in languages not actively spoken. Attend an information session about options available for the International Experience Requirement or the International Internship Option, or speak with an academic advisor.</td>
</tr>
<tr>
<td>Semester 5-8 (60 credit hours)</td>
<td>Follow Table 4 Possible Course Sequencing for the iBA, International Study Option (Final 60 Credit Hours). Alternatively, subject to admission to the International Internship Option, follow Table 5 Possible Course Sequencing for the iBA, International Internship Option (Final 60 Credit Hours).</td>
</tr>
</tbody>
</table>

Eligible Quantitative Reasoning courses offered at the 3000-level are normally completed after the first 45 credit hours.

6.2.3 International Studies (IS) Courses Requirement

1. Certain courses that are offered by the Faculty of Humanities and Social Sciences are found under Course Descriptions, International (IS). For the purposes of course designation, “international” refers to worldwide processes, institutions and peoples in today’s global society. It does not refer to the study of a country, a multi-country region, or comparisons of countries or nations. For further information, refer to the International Studies course guidelines at www.mun.ca/hss/IS.

2. Students must complete a minimum of 24 credit hours in designated IS courses listed in Table 3 International Studies (IS) Designated Courses from a minimum of five disciplines, of which at least 6 credit hours must be at the 4000-level. Disciplines that offer designated IS courses include Anthropology, Economics, English, Folklore, French, Gender Studies, Geography, History, Political Science, Religious Studies, Sociology. As part of their course selections in other areas of the degree, students are encouraged to supplement the International Studies Courses Requirement with the study of related concepts, traditions and phenomena across a variety of disciplines.

3. Up to 3 credit hours in an Honours essay course that clearly encompasses the International Studies course criteria may, upon the
6.2.4 Additional Language Study (LS) Requirement

1. The study of a variety of world languages and cultures is an important component of international study. An iBA student shall complete 12 credit hours in Language Study (LS) courses as follows:
   a. 6 credit hours in university-level study of a single language to satisfy the Language Study Requirement; and,
   b. 6 additional credit hours in any LS courses, ensuring that no more than 6 credit hours used towards fulfilling the Additional Language Study Requirement are completed in languages that are not actively spoken, including those eligible towards the Certificate in Ancient Languages (e.g., Ancient Greek, Latin, Sanskrit).

2. A student who completes university-level study of language at another institution may apply for LS transfer credit, including the study of a language not taught at Memorial University of Newfoundland for which unspecified LS credit hours may be awarded.

3. A student whose first language is not English, who does not meet the standards for entry into regular first-year English courses, and who uses English 1020 and 1021 to satisfy the Language Study Requirement, is required to complete 6 credit hours in LS courses to satisfy the Additional Language Study Requirement.

6.2.5 International Experience Requirement

Studying or working outside of Canada provides an opportunity for students to immerse themselves in the culture, politics and society of another country. During the program of study and while residing outside of Canada, a student for the iBA degree is required to complete either university-level study (INTL 399L) or an approved international internship (INTL 399W). The International Experience Requirement will normally be completed prior to the final semester of the iBA program so that a student may build on the learning experience in remaining courses.

6.2.5.1 Student Responsibilities

1. Careful course planning is essential for a student enrolled in the iBA program. Students are encouraged to consult with an academic advisor and international exchange coordinator.

2. A student will normally have completed at least 60 credit hours with a minimum 70% average, including a minimum of 6 credit hours in designated LS courses and 12 credit hours in designated IS courses, prior to commencement of study outside of Canada.

3. Students must thoroughly research and comply with visa requirements of the country they intend to visit. Visa processing times and requirements may vary depending on the student’s nationality, the international experience location, and the nature of the visit.

4. It is assumed that, by virtue of studying at Memorial University of Newfoundland, a student who is not a Canadian citizen has international experience; equally, many Canadian citizens will have acquired international experiences for diverse reasons. Notwithstanding their prior experiences or home country, all students must satisfy either the International Study Option or the International Internship Option while actively enrolled in the iBA program.

6.2.5.2 International Study Option

1. The International Study Option is designed for students who have completed 60 credit hours or more. In consultation with an academic advisor, a student is encouraged to follow Table 4 Possible Course Sequencing for the iBA, International Study Option (Final 60 Credit Hours).

2. Between their first registration at Memorial University of Newfoundland and the time of their graduation, a student will complete courses in an approved international study program, or complete an international exchange semester at one of Memorial University of Newfoundland’s approved partner institutes. These courses will require residency outside of Canada and are normally to be completed in 12 consecutive weeks.

3. Information about study abroad programs offered by Memorial University of Newfoundland is available at Go Abroad (Harlow Campus and International Field Schools) and from the Office of the Dean of Humanities and Social Sciences.

4. Students must register for INTL 399L (International Study Program) during the international study program. Completion of this non-credit hour course will designate fulfillment of the International Study Option.

5. Alternatively, and normally with prior written approval from the Head of Department, a student may complete a minimum of 9 credit hours instruction in another university-level program requiring study while residing outside of Canada. Before leaving Canada, the student must research the course offerings at the proposed host institute and obtain the course syllabi. These must be submitted along with a Letter of Permission to the Office of the Registrar. The transferability of the courses will be determined before the student commences the international program of study. Upon completion of the program, the student must request that the host institute send the student’s transcripts directly to the Office of the Registrar in order for the transcripts to be deemed official. The student must provide complete information about the program and complete an Application for Transfer Credit Evaluation. Documentation must establish that the course(s) was completed while the student was residing outside of Canada, normally for a minimum 12 week duration. If the transfer credits occur within the final 30 credit hours for the degree, an iBA student will not require a waiver of the University residence requirement, provided that all other requirements and University regulations are observed, and provided that courses were taken at university-level institutions which are included in formal institutional exchange agreements with this University and are not subject to the requirements of this residency requirement clause; or with special permission from the
Head of the department. For more information regarding transfer of credit, the student should consult with the Faculty’s International Exchange Coordinator or the Office of the Registrar.

6. Courses and programs that do not require residency outside of Canada for a minimum 12 week duration are ineligible for the International Study Option.

Complete remaining requirements for the degree, including the Major and Minor.</td>
</tr>
</tbody>
</table>

6.2.5.3 International Internship Option

1. In lieu of the International Study Option, a small number of internship placements outside of Canada may be available for eligible students during the Fall or Winter semesters. The purpose is to provide a structured work-integrated educational experience that supports the development of intercultural competencies and global citizenship. The educational experience will be completed between a student’s first registration at Memorial University of Newfoundland and the time of their graduation, normally prior to the final semester of the iBA program. The internship should build on a student’s prior coursework, education, employment and personal experiences to allow the student to experience workplace culture in a location outside of Canada.

2. Admission to the International Internship Option is limited and competitive, and is available only to full-time students in the iBA program. In consultation with an academic advisor, an admitted student is encouraged to follow Table 5 Possible Course Sequencing for the iBA, International Internship Option (Final 60 Credit Hours).

3. Co-operative Education is responsible for administering the International Internship Option, in consultation with the Head of the student’s declared Major(s) and the Office of the Dean of Humanities and Social Sciences as applicable.

4. A student must apply to Co-operative Education at least eight months before commencing work for the internship.

5. A student will normally have completed at least 60 credit hours, including a minimum of 12 credit hours with a minimum 70% average in designated IS courses and a minimum of 6 credit hours in designated LS courses, prior to commencement of the internship outside of Canada.

6. General management of the International Internship Option is the responsibility of Co-operative Education, which provides supports to accepted students, including job search preparation, counselling, monitoring during work assignments and evaluating internships. These supports are available exclusively in preparation for a Fall semester internship or Winter semester internship.

7. A student must participate in professional development and debriefing sessions offered by Co-operative Education before and after the placement.

8. As part of admission to the International Internship Option, a student is responsible for identifying and securing a prospective internship to be completed during the program of study. Internships must be full-time (normally paid) and must be at least 12 weeks duration within the dates for Fall or Winter semesters specified in the University Diary. Students are strongly advised to complete all arrangements and secure approval before travelling internationally. All internships must be approved in writing by Co-operative Education, in consultation with the Head of the relevant academic unit, before the first day of the internship.

9. Students must register for INTL 399W (International Internship) during the approved internship. Students are required to complete the internship reporting requirements as set out by Co-operative Education. Completion of INTL 399W will designate fulfillment of the International Internship Option. The evaluation of the internship by Co-operative Education will result in one of the following grades being awarded: pass with distinction, pass, or fail.

10. Regardless of the location of an international internship, the employer must have sufficient command of the English language to communicate with Co-operative Education personnel.

11. Students who drop INTL 399W without approval from Co-operative Education or who fail to honour an agreement to work with an employer, or conduct themselves in a manner which results in their discharge from the internship, will normally be awarded a grade of fail for INTL 399W and will not be eligible to re-apply to the International Internship Option.

12. A student who completes an equivalent internship position outside of Canada as part of another university-level academic program should contact Co-operative Education and the Office of the Registrar about the possibility of receiving INTL 399W as transfer credit.

13. In extenuating circumstances, duly authenticated, a student may apply for permission from the Committee on Undergraduate Studies to self-initiate and complete a work placement during the Fall or Winter semester within Canada involving an equivalent immersion in international cultures. As per Waiver of Regulations for Undergraduate Students, Other Regulations, a detailed rationale for the request must be made in writing to the Secretary of the Committee of Undergraduate Studies, Faculty of Humanities and Social Sciences, c/o The Office of the Registrar. Prior to doing so a student is expected to meet with Co-operative Education to discuss requirements associated with the proposed equivalency placement.

6.2.6 International Bachelor of Arts (iBA) as a Second Degree

A student who has been previously awarded a General Degree of Bachelor of Arts or a Bachelor of Arts Honours degree is not eligible to complete or be awarded the International Bachelor of Arts (iBA) degree.

6.2.7 Previous Calendar Regulations

An International Bachelor of Arts (iBA) student who, prior to September 2017, completed an eligible course that subsequently received the IS designation may use up to 15 credit hours towards the International Studies (IS) Courses Requirement. Eligible courses completed before September 2017 are limited to Anthropology 2412, 2413, 4416; Anthropology 3260 or Sociology 3260; Economics 3030, 4030, 4031; Folklore 3250, 4470; Geography 2102, 3510, 3800, 4300; History 2500, 2510, 2800, 3030; French 3654; Political Science 2200, 3210, 3220, 3250, 3290, 4215, 4230, 4255; Sociology 2250, 4230, 4093. Normal requirements for credit hours from five disciplines and for 4000-level credit hours continue to apply.

6.3 Graduation Requirements for the Bachelor of Arts and International Bachelor of Arts (iBA) General Degrees

1. In order to graduate with the Bachelor of Arts General Degree, a student shall obtain:
   a. an overall average of 60% or higher on the minimum number of courses prescribed for The Major Program and,
   b. an average of 60% or higher on the minimum number of courses prescribed for The Minor Program.

2. In order to graduate with the International Bachelor of Arts (iBA) General Degree, a student shall obtain:
   a. an overall average of 60% or higher on the minimum number of courses prescribed for The Major Program and,
   b. an average of 60% or higher on the minimum number of courses prescribed for The Minor Program and,
   c. an average of 70% or higher in the minimum number of designated International Studies (IS) courses prescribed for the International Studies Courses Requirement.

3. Students must apply to graduate by the appropriate deadline through the Memorial Self-Service under the Graduation section. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

6.4 Bachelor of Arts (Honours) and International Bachelor of Arts (iBA) (Honours) Degree Regulations

1. A program is offered leading to the Honours Degree of Bachelor of Arts and the Honours Degree International Bachelor of Arts (iBA). The Bachelor of Arts Honours and the iBA degrees require, over and above the requirements of the General Degree, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program.

2. A student completing a degree program in the Faculty of Humanities and Social Sciences will normally follow the degree regulations in effect in the academic year in which the student first entered Memorial University of Newfoundland. This is determined by the year of the student number. However, a student may elect to follow subsequent regulations introduced during his/her tenure in the program.

6.4.1 Admission and Registration

1. Admission to Honours programs is competitive and limited, depending upon available resources. A student should consult the criteria established for the program in question. To be considered for admission to an Honours program, a student shall submit an “Application for Admission to Honours” form to the Office of the Registrar. The application may be obtained at www.mun.ca/regoff/Application_Honours_Program.pdf. The application must be approved by the Head of the Department or Program Supervisor of the Subject of Specialization before the student can be admitted to the program.
2. A student who wishes to enter an Honours program is strongly advised to consult the Head of the Department or Program Supervisor at the earliest possible date, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.

3. A student who has been awarded the General Degree of Bachelor of Arts may convert it to an Honours Degree of Bachelor of Arts by applying to the department of specialization and the Registrar and, upon approval of such application by the Department, completing the requirements for the Honours degree as set forth in the regulations. Similarly, a student who has been awarded the General Degree of International Bachelor of Arts may convert it to an Honours Degree of International Bachelor of Arts by following the same process.

4. Upon entering the program, the student shall be assigned a Faculty Advisor by the Head of the Department or Program Supervisor. The Faculty Advisor will be responsible for advising the student and the Head of the Department or Program Supervisor with respect to the student's program of studies.

### 6.4.2 Subjects of Specialization

Subjects which may be chosen as Subjects of Specialization for the Honours Degree of the Bachelor of Arts or the Honours Degree of the iBA are the following:

1. Those administered by Departments in the Faculty of Humanities and Social Sciences by the Head of the Department: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Sociology. Departmental Bachelor of Arts Honours Programs are available in and administered by the following Faculty of Science Departments: Computer Science, Mathematics and Statistics, Psychology.

2. Joint Honours Programs: A student may undertake a program of Joint Honours in two Subjects of Specialization.

### 6.4.3 Course Requirements

A student for the Honours Degree of Bachelor of Arts or the Honours Degree of the iBA shall complete a program of studies that shall consist of not fewer than 120 credit hours subject to the following regulations:

1. A student is required to complete the Core Requirements as detailed in the Regulations for the General Degree of Bachelor of Arts. These include:
   a. Breadth of Knowledge Requirement
   b. Critical Reading and Writing (CRW) Requirement
   c. Language Study (LS) Requirement
   d. Quantitative Reasoning (QR) Requirement

2. A student must also:
   a. Pass a general comprehensive examination in a Subject of Specialization. This examination may be written, or oral, or a combination of both. The comprehensive examination shall count as 3 credit hours in the Subject of Specialization; and/or
   b. Submit an Honours essay on an approved topic which, at the discretion of the Head of the Department or the Program Supervisor, may be followed by an oral examination thereon. Normally, the Honours essay will count as 3 credit hours in the Subject of Specialization, or as 6 credit hours in the case of linked (A/B) Honours essays (please consult departmental regulations). The semester in which the student sits for the comprehensive examination, and/or the semester in which the Honours essay is to be submitted, may be decided by the student after consultation with the Head of the Department or Program Supervisor. A copy of the Honours essay must be submitted to the University Library upon completion. All Honours essays in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances, which must be approved by the Head of the department concerned. Copyright remains with the author. A signed release form must accompany an essay or dissertation when it is submitted to the University Library.

3. Further courses shall be chosen either
   a. in consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the Subject of Specialization. The student's program shall include not fewer than 60 credit hours in courses applicable to the Subject of Specialization, including the comprehensive examination and/or the Honours essay, at least 36 of which must be at the 3000 level or above, and not fewer than 24 credit hours in a Minor subject or program according to the Departmental or Program Regulations covering that Minor, and the total number of credit hours which may be applied to the degree is not fewer than 120; or
   b. in consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the Subject of Specialization. The student's program shall include not fewer than 60 credit hours in courses applicable to the Subject of Specialization, including the comprehensive examination and/or the Honours essay, at least 36 of which must be at the 3000 level or above, and not fewer than 36 credit hours in a Major subject or program according to the Departmental or Program Regulations governing that Major, and the total number of credit hours which may be applied to the degree is not fewer than 120; or
   c. in consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the Subject of Specialization. The student's program shall include not fewer than 42 and not more than 51 credit hours in courses approved for each of the Subject of Specialization, including the comprehensive examination and/or the Honours essay, of which at least 27 shall be at the 3000 level or above in each of the Subjects of Specialization, and the total number of credit hours which may be applied to the degree is not fewer than 120.

4. In the case of Joint Honours, the student may choose the Subject of Specialization for the Honours essay and/or comprehensive examination.

### 6.4.4 Departmental Regulations

A student for Honours degrees shall also comply with such additional requirements of the appropriate Department(s) as are approved by the Senate and printed in the Calendar.
6.5 Graduation Requirements for the Bachelor of Arts (Honours) and the International Bachelor of Arts (IBA) (Honours) Degrees

6.5.1 Academic Standing - Bachelor of Arts (Honours) and the International Bachelor of Arts (IBA) (Honours) Degrees

A student for the Bachelor of Arts (Honours) or the International Bachelor of Arts (IBA) (Honours) degree shall complete a program of studies that shall consist of not fewer than 120 credit hours subject to the following regulations:

1. In order to graduate with a Bachelor of Arts (Honours) or the International Bachelor of Arts (IBA) (Honours) degree, a student shall obtain:
   a. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in the Honours subject(s) prescribed by the Department or, in the case of Joint Honours, Departments concerned. A grade of 70% or better must be obtained in the Honours essay and/or comprehensive examinations;
   b. an average of at least 2.75 points on the total number of credit hours in the courses required for the degree. (See General Academic Regulations (Undergraduate), Classification of General Degrees); and
   c. an average of 70% or higher in the minimum number of designated International Studies (IS) courses prescribed for the International Studies Courses Requirement for students completing the International Bachelor of Arts (IBA) (Honours) degree.

   Note: A student may, with the written approval of the Head of the Department and the Committee on Undergraduate Studies, repeat or substitute up to three courses in order to meet the requirements of Clause 1. above. In counting repeats, each attempt at the same course will count as one course towards the maximum. That is, the same course, repeated three times, would place a student at the maximum and no additional repeats or substitutions would be allowed. The Honours essay and/or comprehensive examinations may not be repeated or substituted.

6.5.2 Classification of Degrees

1. If a student's general average is 3.25 points or better per credit hour in required courses and his/her average is 3.5 points or better per credit hour in the courses in the Honours subject (excluding 1000-level courses), the student shall be awarded an Honours degree with First Class standing.

2. If a student fulfills the conditions of Academic Standing above but not of Regulation 1. under Classification of Degrees, the student shall be awarded an Honours degree with Second Class standing.

3. No classification will be given to the degree awarded a student who has completed (1) fewer than one half of the courses required for the degree at this University, or (2) who has completed fewer than one half of the courses required for the degree at this University since 1959. All students for such degrees shall, however, fulfill the condition of Academic Standing above on the courses taken at this University since September 1959 in order to qualify for the degree.

4. A declared student for an Honours degree who fails to attain the academic standing specified in Academic Standing above but fulfills the academic requirements for a General degree shall be awarded a General degree, the classification of which shall be determined in accordance with General Academic Regulations (Undergraduate), Classification of General Degrees.

6.6 Regulations Governing Co-operative Education Program

1. Co-operative Education programs are offered in the Department of Archeology, Department of Economics and Department of Political Science.

2. A student who transfers from a Co-operative Education degree program to an International Bachelor of Arts (IBA) degree program may, with permission of the Faculty’s Undergraduate Studies Committee and the Head of the department, be permitted to satisfy INTL 399W with the successful completion of a respective Major program work term that was completed outside of Canada.

6.7 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)

In order to meet all of the requirements of the Bachelor of Arts and Bachelor of Commerce (Co-operative) degree programs at the same time, students who are completing the joint degrees are strongly advised to follow the Suggested Program of Studies outlined below, to take account of the accompanying advisory notes, and to seek advice from the department or program of their Major in order to ensure that their proposed program is possible within the constraints of course scheduling and prerequisites. See General Academic Regulations (Undergraduate), Residence Requirements, Second Degree.

6.7.1 Suggested Program of Studies for the Bachelor of Arts and Bachelor of Commerce (Co-operative) Prior to admission to the Bachelor of Commerce (Co-operative) Program

For the joint degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), students must successfully complete a minimum of 150 credit hours in courses applicable to the degrees. To be eligible for admission to Term 1 of the Bachelor of Commerce (Co-operative) program, an applicant must have successfully completed 30 credit hours with an overall average of at least 65% on the courses comprising those credit hours. The 30 credit hours must comprise:

1. 6 credit hours in English courses which must include either English 1021 or 1110;
2. either Mathematics 1090 (or 109A/B) and 1000 or Mathematics 1000 and 3 credit hours in one of a language other than English or in the subject of the intended Major program;
3. Economics 1010 (or the former 2010) and Economics 1020 (or the former 2010);
4. Business 1000; and
5. 9 additional credit hours in non-Business courses. It is strongly recommended that these 9 credit hours include courses in a language other than English and courses in the subject of the intended Major program as the Bachelor of Arts degree requires 6 credit hours in single language other than English.

Following admission to the Bachelor of Commerce (Co-operative) program, the curriculum is as set out below in Table 1 Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly With The Degree of Bachelor of Arts).

Please refer to the Calendar entry for the Faculty of Business Administration for complete course descriptions and regulations for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts.
6.8 Joint Degrees of Bachelor of Arts and Bachelor of Science

Students who wish to simultaneously pursue a Bachelor of Arts program and a Bachelor of Science program may do so by completing a minimum of 135 credit hours in courses, rather than the minimum of 150 credit hours required under UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Residence Requirements - Second Degree.

Students who complete the Joint Degrees of Bachelor of Arts and Bachelor of Science are not required to complete a minor. Students may complete the requirements for a minor, or an additional (third) major, in accordance with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Degree and Departmental Regulations - Further Credentials.

Credit hours earned in Computer Science, Economics, Geography, Mathematics and Statistics, and Psychology may be eligible to simultaneously satisfy a requirement for credit hours in the Faculty of Humanities and Social Sciences and a requirement for credit hours...
in the Faculty of Science.

Careful planning of courses is crucial to ensure timely completion of the Joint Degrees of Bachelor of Arts and Bachelor of Science. Students enrolled in this program, or who plan to enroll in this program, are strongly encouraged to consult regularly with appropriate academic advisors in both the Faculty of Humanities and Social Sciences and the Faculty of Science. It may not be possible to complete the requirements for the Joint Degrees in the normal time if the decision to embark on the program is delayed.

Students who have enrolled in the Joint Degrees of Bachelor of Arts and Bachelor of Science must satisfy all program requirements before they may be granted either the degree of Bachelor of Arts or the degree of Bachelor of Science, and must graduate with both degrees at the same convocation.

1. The minimum of 135 credit hours for the Joint Degrees of Bachelor of Arts and Bachelor of Science shall include:
   a. a Major program chosen from those majors offered by departments within the Faculty of Humanities and Social Sciences and the Interdisciplinary Arts majors, with the exception of majors offered by the Department of Computer Science, the Department of Mathematics and Statistics, and the Department of Psychology;
   b. a Major program chosen from those majors offered by departments within the Faculty of Science, with the exception of majors offered by the Department of Economics and the Department of Geography;
   c. the Core Requirements for the Faculty of Humanities and Social Sciences (including the Breadth of Knowledge Requirement, the Critical Reading and Writing (CRW) Requirement, the Language Study (LS) Requirement, and the Quantitative Reasoning (QR) Requirement), for which the Quantitative Reasoning Requirement shall be satisfied by 6 credit hours in Mathematics courses;
   d. 6 credit hours in courses from each of two Sciences other than Mathematics;
   e. a total of at least 78 credit hours in courses offered by departments within the Faculty of Humanities and Social Sciences, and a total of at least 78 credit hours offered by departments within the Faculty of Science; and
   f. no more than 6 credit hours in courses offered by a Faculty or School other than the Faculty of Humanities and Social Sciences or the Faculty of Science.

While the Joint Degrees of Bachelor of Arts and Bachelor of Science is available to all Major programs offered by the Faculty of Humanities and Social Sciences and the Faculty of Science, students pursuing a major outside of Computer Science, Economics, Geography, Psychology, Pure Mathematics or Statistics should pay special attention to course planning and selection to ensure that this requirement is met within the required 135 credit hours.

2. Admission to the Major programs shall be governed by Faculty of Humanities and Social Sciences - Admission to the Bachelor of Arts General Degree Programs and Faculty of Science - Degree Regulations - Admission to the Department of Subject of Major.

3. Where an admission requirement or program regulation for the Major program from the Faculty of Science includes English 1090 (or the former 1080) and English 1110 (or equivalent), such requirements may instead be satisfied by the completion of 3 credit hours in any 1000-level Critical Reading and Writing (CRW) course offered by the Department of English, and an additional 3 credit hours in any Faculty of Humanities and Social Sciences course whose title begins with “Critical Reading and Writing” chosen from those listed under Core Requirements - Critical Reading and Writing (CRW) Requirement for the Bachelor of Arts.

4. Students who have already completed a degree’s bachelor degree are not eligible to complete the Joint Degrees of Bachelor of Arts and Bachelor of Science, but may separately complete a Bachelor of Arts or a Bachelor of Science in accordance with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Residence Requirements - Second Degree.

7 Diploma Programs

Diploma Programs in the Faculty of Humanities and Social Sciences are of distinct advantage to students who wish to complement their studies in one or more fields of specialization. Students can choose programs that either develop knowledge relevant to growing sectors of the economy and to areas of increasing social concern, or enable exploration of a concentrated subject from a variety of disciplinary perspectives. Diploma programs tend to provide more in-depth study of a specialized area than certificate programs, and some include a practical component, such as an instructional field placement, a field course, or a capstone project. Some diploma programs may assist in easing the transition of graduates to the workplace. The Faculty of Humanities and Social Sciences offers the Diploma in Ancient Worlds, the Diploma in Creative Writing, the Diploma in Geographic Information Sciences, the Diploma in Humanities, the Diploma in Performance and Communications Media, and the Diploma in Police Studies.

7.1 General Regulations for Diploma Programs

1. A diploma program is administered by a Program Coordinator. The Coordinator is normally affiliated with the Faculty of Humanities and Social Sciences department that is primarily responsible for the Program’s administration.
2. Diploma programs consist of between 24 and 36 credit hours in courses as specified in individual programs.
3. Courses satisfying the Honours, Major, Minor and elective components of an undergraduate degree may also be used to satisfy the requirements of a diploma program. Departmental prerequisites for courses are applicable. This may increase the number of stated courses required for completion of the diploma program. Such courses may be eligible towards other components of the Bachelor of Arts.
4. Normal credit restrictions apply. It is the student’s responsibility to recognize that additional credit may not be obtained for completing two versions of a cross-listed course (i.e., the same course delivered by two or more departments).
5. A Program Coordinator may, in consultation with the Head of the relevant academic unit, request permission from the Committee on Undergraduate Studies for a course to be added to the program.
6. A student may apply to the Committee on Undergraduate Studies to have a maximum of 3 credit hours from an Honours essay course applied to a diploma program. It must be clearly demonstrated that the entirety of the Honours essay course content is relevant to the program. This may not be used to substitute credit hours in a core course.
7. Due to their temporary nature, “special topics” courses are not listed in the entries for a diploma program. However, a special topics course may be included in a student’s program of study with permission from the Committee on Undergraduate Studies.

7.2 Admission

Students seeking information about specific diploma programs should contact the Diploma Program Coordinator, the Office of the Dean of Humanities and Social Sciences, or the Office of the Registrar.

1. Admission to all diploma programs is competitive and limited, depending upon available resources. For additional requirements stipulated by individual diploma programs, see the appropriate Calendar entry below.
2. All applicants for diploma programs must also be admitted to the University. The application for admission or readmission is submitted online; current and returning Faculty of Humanities and Social Sciences applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P.WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply. A complete application package includes an application to the University, an application to the Diploma Program, and any other required documentation (for those who have not attending Memorial University of Newfoundland in the three preceding semesters). Details are available under UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate).

3. Applicants for admission to diploma programs must apply by completing the appropriate form available at the Faculty of Humanities and Social Sciences website or from the Office of the Registrar.

7.3 Graduation Requirements
1. To be eligible for the award of a diploma, a student must have obtained an overall average of 60% or higher in the courses prescribed for that program.
2. A minimum of 9 credit hours in courses prescribed for the diploma program must be completed at this University.
3. Students must apply to graduate by the appropriate deadline through the Memorial Self-Service under the Graduation section. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/apply_grad.php.

7.4 Diploma in Ancient Worlds
www.mun.ca/hss/ancientworlds
Program Coordinator: Head, Department of Archaeology
The Diploma in Ancient Worlds is administered by the Department of Archaeology.
The Diploma in Ancient Worlds is designed for those who are interested in the study of the history, customs, and culture of the Ancient World. The program’s objective is to offer students a representative breadth of knowledge about the Ancient World. It is structured around introductory and advanced courses in Archaeology, Classics, History, Philosophy, and Religious Studies and promotes familiarity with at least three disciplines among the five offered. The program also includes Archeology 3583, a field school orientation course. The core skills and competencies taught in the course of the program will prepare students for pursuing studies in a variety of interdisciplinary fields.

7.4.1 Faculty of Humanities and Social Sciences Diploma Regulations
Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Diploma Programs and Graduation Requirements.

7.4.2 Advising
Throughout their program of study, students for a Diploma in Ancient Worlds are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

7.4.3 Declaring the Diploma in Ancient Worlds
Students wishing to declare a Diploma in Ancient Worlds are encouraged to consult with the Program Coordinator to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.

7.4.4 Regulations for the Diploma in Ancient Worlds
As part of the Diploma in Ancient Worlds, students must complete courses up to and including the 3000 level and may take courses at the 4000 level. The Diploma in Ancient Worlds consists of 27 credit hours, as prescribed below:
1. Archaeology 1000 or the former 1030, 2480, and 3583 and
2. 18 credit hours from Table 1 Approved Courses for the Diploma in Ancient Worlds, which must include 3 credit hours in at least two of Classics, History, Religious Studies, Philosophy. This may include no more than 6 credit hours in designated Language Study courses and no more than 6 additional credit hours from Archaeology.

The calendar description of courses eligible for the diploma place an emphasis on the study of ancient history, culture, and/or customs that pre-date the Middle Ages (i.e., before 500 A.D.). With the prior written permission of the Program Coordinator and the Committee on Undergraduate Studies of the Faculty of Humanities and Social Sciences, credit hours may be completed in eligible courses not listed in Table 1 Approved Courses for the Diploma in Ancient Worlds provided that the Faculty of Humanities and Social Sciences course calendar description is clearly related to the diploma’s objectives. An approved list is maintained on the Diploma in Ancient Worlds at www.mun.ca/hss/ancientworlds.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Coordinator for assistance with course planning, and to generally follow Table 2 Suggested Course Sequencing for the Diploma in Ancient Worlds.

<tr>
<td>Program Coordinator: Dr. É. Simms, Department of Geography</td>
<td>The Diploma in Geographic Information Sciences is administered by the Department of Geography. The Diploma in Geographic Information Sciences is of interest to students from a broad range of backgrounds. It is a valuable complement to social and natural sciences programs such as anthropology, biology, computer sciences, earth sciences, history, economics, engineering, health and medicine, physical oceanography, environmental sciences, and environmental studies. The fields of remote sensing, geographic information systems (GIS), and cartography provide the most effective methods of gathering, managing, analyzing, and representing geographic information. Remote sensing images provide resourceful information to observe and study cultural and physical landscapes. Examples of remote sensing applications include the monitoring of spatial changes, environmental quality evaluation, natural resource exploration, assessment and monitoring, and archaeological site assessment. Geographic information systems enable the compilation, organization, and processing of spatial (maps) and nonspatial (text statistics, graphs) data. Socio-economic, political, and environmental management decision-making is supported by the results of GIS analyses and modeling. Cartography involves the compilation, organization, and visual representation of spatial information. A variety of geographical information can effectively be communicated through cartography.</td>

7.6.2 Advising
Throughout their program of study, students for a Diploma in Geographic Information Sciences shall contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator shall normally communicate a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

7.6.3 Declaring the Diploma in Geographic Information Science
Students wishing to declare a Diploma in Geographic Information Sciences shall consult with the Program Coordinator to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.

7.6.4 Admission Requirements
Admission to the Diploma in Geographic Information Sciences is limited and competitive. Students who wish to enter this program must apply through the Office of the Registrar by April 1 for Fall semester registration and by October 15 for Winter semester registration. The formal application is available at www.mun.ca/hss/programs/undergraduate/diplomas/ or from the Office of the Registrar.

To be considered for admission to the Diploma in Geographic Information Sciences, students will normally have completed 24 credit hours, including the courses listed below, with an overall average of at least 65%.

1. Geography 1050 or one 1000-level course in applicant's Bachelor's Major program.
2. Mathematics 1000 or equivalent.
3. Two 1000- or 2000-level core courses in student's Bachelor's Major program, excluding the courses listed above.

Students who fulfill the eligibility requirements compete for a limited number of available spaces. Selection is based on academic performance.

7.6.5 Program of Study
Students are required to complete a minimum of 30 credit hours of courses as listed below under Table 1 Course Requirements for the Diploma in Geographic Information Sciences. All students for the Diploma in Geographical Information Sciences must complete the Field Placement course Geography 4290 and the capstone course Geography 4919.

7.6.6 Continuation Requirements
To be considered for Geography 4290 and 4919, the students for the Diploma in Geographic Information Sciences will normally have completed at least 21 credit hours required for the program, with an overall average of 65%.

7.7 Diploma in Humanities
www.mun.ca/hss/humanities
Program Coordinator: Dr. A. Sullivan, Department of Philosophy

The Diploma in Humanities is administered by the Department of Philosophy. The Diploma in Humanities provides a foundation in the study of liberal arts. Students are exposed to the foundational disciplines of Classics and Philosophy and other areas of the humanities that explore how great thinkers have interpreted our world, and take courses in a language other than English in which many of these thinkers originally wrote. The program takes a holistic approach to the study of the humanities by emphasizing subject areas rather than specific courses in order to be accessible to a wide audience. Students are encouraged to select from a wide variety of humanities courses in the Faculty of Humanities and Social Sciences that align with their interests and which fit their schedule.

7.7.1 Faculty of Humanities and Social Sciences Diploma Regulations
Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Diploma Programs and Graduation Requirements.

7.7.2 Advising
Throughout their program of study, students for a Diploma in Humanities shall contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

7.7.3 Admission Requirements
To be considered for admission to the Diploma in Humanities, students will have completed 6 credit hours in designated Critical Reading and Writing (CRW) courses in eligible humanities disciplines, including at least 3 credit hours in Department of English CRW courses. Eligible credit hours in CRW courses required for program admission will be applied towards the Diploma requirements.

7.7.4 Declaring the Diploma in Humanities
Students wishing to declare a Diploma in Humanities shall consult with the Program Coordinator to discuss the requirements of the
program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.

7.7.5 Regulations for the Diploma in Humanities

Students are required to complete a minimum of 36 credit hours in eligible courses selected from Table 1 Required and Elective Courses for the Diploma in Humanities as follows:

1. a minimum of 12 credit hours at the 3000-level or above, of which at least 3 credit hours must be at the 4000-level;
2. a maximum of 18 credit hours in any one discipline;
3. 6 credit hours in designated Critical Reading and Writing (CRW) courses, chosen from areas of study listed in Table 1 Required and Elective Courses for the Diploma in Humanities, including at least 3 credit hours in a CRW course offered by English. Refer to Bachelor of Arts General Degree Components, Core Requirements, Critical Reading and Writing (CRW) Requirement;
4. 6 credit hours in designated Language Study (LS) courses delivered in the same language of instruction chosen from languages listed in Bachelor of Arts General Degree Components, Core Requirements, Language Study (LS) Requirement;
5. 6 credit hours in Greek studies and/or Roman studies courses offered by Classics (excluding designated Language Studies courses);
6. 6 credit hours in Philosophy (excluding Philosophy 2210, 2211); and,
7. 12 additional credit hours chosen from:
   a. any of the specified areas of study above, which may include a maximum of 6 additional credit hours in Language Study courses; and/or
   b. up to 9 credit hours in non-Language Study courses in French, German, Russian, Spanish; and/or
   c. up to 9 credit hours in any one of Communication Studies, English, Gender Studies, History, Medieval Studies, Political Science, political theory, Religious Studies. Quantitative Reasoning (QR) courses are not eligible towards the Diploma in Humanities.

A student is encouraged to select courses that align with classical humanities and theory, while being mindful of the limit of 18 credit hours in any one discipline</td>
</tr>
</tbody>
</table>

7.7.6 Other Eligible Courses

Courses whose calendar title and description clearly aligns with the Diploma in Humanities requirements may be deemed eligible towards the program with the prior written permission of the Committee on Undergraduate Studies of the Faculty of Humanities and Social Sciences and the Program Coordinator. This includes up to 9 elective credit hours in cultural studies humanities courses offered by related disciplines in the Faculty of Humanities and Social Sciences; up to 18 credit hours in Humanities courses offered at Grenfell Campus; and of up to 9 credit hours in Social/Cultural Studies courses offered at Grenfell Campus. Quantitative Reasoning (QR) courses are not eligible.

7.7.7 Course Prerequisites

Normal course prerequisites apply. Students must plan their program of study accordingly in order to fulfill all requirements.

7.7.8 Preparation for a Bachelor of Arts

All credit hours used towards the Diploma in Humanities may also be eligible for application to a Bachelor of Arts, including the Critical Reading and Writing (CRW) and Language Study (LS) aspects of the Bachelor of Arts Core Requirements.

7.7.9 Graduation Requirements

As per Diploma Programs Offered in the Faculty of Humanities and Social Sciences, Graduation Requirements, to be eligible for the award of a Diploma in Humanities, a student must obtain an overall average of 60% or higher in the courses prescribed for the program. A minimum of 9 credit hours in courses prescribed for the diploma program must be completed at this University.
7.8 Diploma in Performance and Communications Media

www.mun.ca/english/dpcm

Program Coordinator: Dr. J. Skidmore, Department of English

The Diploma in Performance and Communications Media is administered by the Department of English. Memorial University of Newfoundland offers a specialized Diploma Program in Performance and Communications Media. This Diploma draws on the expertise of the Drama Specialization, Department of English, Centre for Innovation in Teaching and Learning (CITL), and CBC Television. Students receive an introduction to multi-media in the area of dramatic arts and video techniques. Students will be introduced to the wide applications of stage and video craft through a program of project-oriented courses. Required courses give students specific skills in stage and video craft and enable students to specialize in their own particular practical area of interest.

The Diploma in Performance and Communications Media prepares students to work in the cultural industries in Newfoundland (or other parts of North America). Students with this unique training are better able to work across existing media.

7.8.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Diploma Programs and Graduation Requirements.

7.8.2 Admissions

Formal application is required and is available at www.mun.ca/hss/programs/undergraduate/diplomas/ or from the Office of the Registrar. 

Academic Requirements: Applicants for the Diploma program must satisfy the general admission requirements of the University. 

Interviews: In addition to meeting the general requirements of the University for admission to diploma programs, applicants for the Diploma in Performance and Communications Media must undergo an audition/interview to the satisfaction of the Program Coordinator. 

Enrollment in the Diploma in Performance and Communications Media is limited and competitive. Students are advised to notify the Program Coordinator in their first year if they intend to apply for this Diploma. Formal application normally takes place in the second semester of second year.

7.8.3 Program of Study

1. Students must complete a minimum 18 credit hours of course work in the following required courses with an overall average in these courses of at least 65%: Communication Studies 3816 (or the former English 3816), Communication Studies 4402 (or the former English 4402), English 3350, English 3351, English 4400, and English 4401.

2. Students must also complete 6 credit hours in English 5000 - Instructional Field Placement. Admission to this instructional field placement course is by application to the Program Coordinator, normally at least three months before the beginning of the placement, and is limited to students who at the time of admission have completed the six courses listed above with an overall average of at least 65% and who already hold a first degree or are in their final year of a degree program as confirmed by the Office of the Registrar.

7.9 Diploma in Police Studies

www.mun.ca/plst

Program Coordinator: Dr. A. Hall, Department of Sociology

The Diploma in Police Studies is administered by the Department of Sociology. The Diploma Program in Police Studies is offered exclusively to students who are recruit cadets of the Royal Newfoundland Constabulary (RNC). The program provides recruit cadets with academic components of a degree program relevant to their future work as police officers. Police Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Sociology, Police Studies and are designated as PLST.

7.9.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Diploma Programs and Graduation Requirements.

7.9.2 Advising

Throughout their program of study, students taking the Diploma in Police Studies shall contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator shall normally communicate a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

7.9.3 Declaring the Diploma in Police Studies

Students cannot self-declare this program. Each year the Office of the Registrar is provided with a listing of students accepted into the RNC cadet training program and identifies them as admitted into the Diploma in Police Studies program.

7.9.4 Admission Requirements

Students wishing to complete the Diploma in Police Studies should consult with the Academic Planning Manager. Information about diploma programs offered by the Faculty is available at www.mun.ca/hss/programs/undergraduate/diplomas/.

Admission to the Diploma program is limited and competitive. Applicants to the Diploma program must have been accepted as recruit cadets of the Royal Newfoundland Constabulary and satisfy UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate). In addition, at the time of admission, applicants must have completed either a university degree in any discipline from a recognized university, or have completed at a post-secondary institution, the equivalent of 15 credit hours, which should normally include 6 credit hours in English, and/or Critical Reading and Writing (CRW) courses, 6 credit hours in Psychology, and 3 credit hours in Sociology. Applicants who complete courses at this University are strongly encouraged to complete Political Science 1001 as
part of their Critical Reading and Writing Requirement credit hours.

7.9.5 Program of Study
1. Following admission to the Diploma program and until completion of all Diploma program requirements, students must be enrolled in a full course load of 15 credit hours in each of the Fall and Winter semesters.
2. With approval from the appropriate department(s), cadet candidates may be deemed to have met some or all of the program prerequisites. In these situations, prerequisite waivers must be approved prior to a student's enrollment in the Diploma in Police Studies program. Any such prerequisite waiver will only be applicable to the Diploma in Police Studies program and in the Cadet class for which the candidate is applying. Waiver approvals are not an indication of approval for transfer credit. A student may apply for transfer credit through the Office of the Registrar.
3. Students must complete a total of 30 credit hours as outlined under Table 1 Required Courses for the Diploma in Police Studies. By virtue of admission to the program with prior university experience, students are expected to be prepared to complete courses in Police Studies, Political Science, Psychology, and Sociology at the 2000-level and higher. A student who completed a Table 1 course prior to admission to the Diploma in Police Studies and obtained a final grade lower than B is strongly encouraged to retake that course.
4. In order to maintain a full course load (15 credit hours) students who completed a required Table 1 course with a B or higher grade prior to admission to the Diploma program will normally substitute an alternate course selected from Table 2 Approved Alternate Courses for the Diploma in Police Studies. For these students only, a Table 1 course at the 2000 level or below may be substituted with a Table 2 course at the 2000 level or below, and a Table 1 course at the 3000 level or above may be substituted with a Table 2 course at the 3000 level or above. Table 2 alternate courses have a Calendar entry that clearly establishes an emphasis on the study of policing, law, crime and/or violence, normally in the context of modern day Canadian society. Other Humanities and Social Science courses whose Calendar entry clearly pertains to these subject areas and/or social diversity may be eligible. Students should speak with the Program Coordinator for information.

|                    | Sociology 3290                                           |
| Winter (15 credit hours) | Police Studies 3500  
|                      | Psychology 3640                                           
|                      | Sociology 3306, 3395, 4212                                |

7.9.6 Continuation Requirements
1. Students dismissed as recruit cadets by the Royal Newfoundland Constabulary will be automatically dropped from the Diploma in Police Studies program.
2. Eligible credit hours completed as part of the Diploma in Police Studies program may be used towards other Humanities and Social Sciences programs, including the Major in Police Studies, provided that they are in accordance with the regulations governing the program.

7.9.7 Graduation Requirements
To be eligible for awarding of the Diploma in Police Studies students must meet the graduation requirements as outlined in Diploma Programs Offered in the Faculty of Humanities and Social Sciences, Graduation Requirements.

8 Certificate Programs
A certificate program in the Faculty of Humanities and Social Sciences offers a flexible option for students seeking to develop specialized knowledge and competencies. It provides a starting point for further university studies or acts as an adjunct to an undergraduate degree. A certificate program is not designed to satisfy specific employment credentials. A certificate is sufficiently specialized to ensure its academic integrity and normally features at least one required anchor course that is taken at the beginning of the program. The Faculty of Humanities and Social Sciences offers the Certificate in Aboriginal and Indigenous Studies, Certificate in Ancient Languages, the Certificate in Criminology, the Certificate in Film Studies, the Certificate in Food Studies, the Certificate in Newfoundland and Labrador Studies, and the Certificate in Public Policy.

8.1 General Regulations for Certificate Programs
1. A certificate program is administered by a Program Coordinator. The Coordinator is normally affiliated with the Faculty of Humanities and Social Sciences department that is primarily responsible for the Program's administration.
2. Certificate programs consist of between 18 and 21 credit hours in courses as specified in individual programs.
3. Courses satisfying the Honours, Major, Minor and elective components of an undergraduate degree may also be used to satisfy the requirements of a certificate program. Departmental prerequisites for courses are applicable. This may increase the number of
stated courses required for completion of the certificate program. Such courses may be eligible towards other components of the Bachelor of Arts.

4. Normal credit restrictions apply. It is the student’s responsibility to recognize that additional credit may not be obtained for completing two versions of a cross-listed course (i.e., the same course listed under two or more departments).

5. A Program Coordinator may, in consultation with the Head of the relevant academic unit, request permission from the Committee on Undergraduate Studies for a course to be added to the certificate program.

6. Due to their temporary nature, "special topics" courses are not listed in the entries for a certificate program. However, a special topics course may be included in a student’s program of study with permission from the Committee on Undergraduate Studies.

8.2 Admission

1. Students seeking information about a certificate program should contact the coordinator of the certificate program, the Office of the Dean of Humanities and Social Sciences, or the Office of the Registrar.

2. A certificate program is open to all students who are granted admission to the University. The application for admission or readmission is submitted online; current and returning Faculty of Humanities and Social Sciences applicants should apply using the Admissions menu within Memorial Self-Service at www5.mun.ca/admit/twbkwbis.P_WWWLogin. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply. A complete application package includes an application to the University and any other required documentation (for those who have not attended Memorial University of Newfoundland in the three preceding semesters). Details are available under UNIVERSITY REGULATIONS - Admission/Readmission to the University Undergraduate.

8.3 Components

1. A certificate program is administered by a program coordinator. The coordinator is affiliated with the Faculty of Humanities and Social Sciences department that is primarily responsible for the program’s administration.

2. A student must follow the regulations for the certificate program as set forth in the appropriate section of the Calendar.

3. A certificate program in the Faculty of Humanities and Social Sciences consists of between 15 and 21 credit hours in courses as specified by the program. This normally includes a selection of core courses that has been deemed fundamental to the program and a requirement for courses from a minimum of two disciplines. The majority of credit hours in a Faculty of Humanities and Social Sciences certificate must be comprised of courses listed in the Faculty of Humanities and Social Sciences Course Descriptions.

4. In some cases, students may be required to complete pre-requisites.

5. Courses offered by the Faculty of Humanities and Social Sciences satisfying another University program may also be used to satisfy the requirements of a Faculty of Humanities and Social Sciences certificate program, subject to both programs’ regulations.

6. A student may apply to the Committee on Undergraduate Studies to have a maximum of 3 credit hours from an Honours essay course applied to a certificate program. It must be clearly demonstrated that the entirety of the Honours essay course content is relevant to the program. This may not be used to substitute credit hours in an anchor or core course.

8.4 Graduation Requirements

1. To be eligible for the award of a certificate offered by the Faculty of Humanities and Social Sciences, a student must have obtained an overall average of 60% or higher in the courses prescribed for that program.

2. A minimum of 9 credit hours in courses prescribed for the certificate program must be completed at this University.

3. A student who has completed a certificate program and wishes to complete a second certificate offered by the Faculty of Humanities and Social Sciences must:
   a. comply with all course requirements governing the award of that certificate; and
   b. complete at least 9 credit hours beyond those used for the first certificate. The courses which comprise these credit hours must be applicable to the certificate sought.

8.5 Certificate in Aboriginal and Indigenous Studies

www.mun.ca/hss/abst

Program Coordinator: Dr. S. Neilsen. Department of Archaeology and Labrador Institute

The Certificate in Aboriginal and Indigenous Studies is administered by the Department of Archaeology. The Certificate in Aboriginal and Indigenous Studies is designed for those interested in learning about the history, cultures, languages, beliefs, and experiences of Aboriginal and Indigenous peoples. The objective of the program is to provide foundational knowledge for understanding historical and contemporary experiences of Aboriginal and Indigenous peoples - from the origins of first peoples and their complex histories over the proceeding millennia, to present movements and the growing desire for reconciliation between governments and Aboriginal and Indigenous societies. The area of Aboriginal and Indigenous studies is an increasingly important field in Canada, and the world. This program will benefit a wide variety of learners, including current and prospective university students, and individuals interested in a career in the public, not-for-profit, and non-governmental sectors.

8.5.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.

8.5.2 Advising

Throughout their program of study, students interested in the Certificate in Aboriginal and Indigenous Studies are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.
8.5.3 Declaring the Certificate in Aboriginal and Indigenous Studies

Students interested in a Certificate in Aboriginal and Indigenous Studies are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the Certificate can declare a Certificate in Aboriginal and Indigenous Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.5.4 Regulations for the Certificate in Aboriginal and Indigenous Studies

As part of the Certificate in Aboriginal and Indigenous Studies students must complete a 3 credit hour foundation course at the 1000-level and 3 credit hours in a capstone course at the 3000-level. It is anticipated that the foundation course will be taken at the beginning of the program, and the capstone course will be taken at the completion of the program. As part of their course selections, normally prior to completing the capstone course, students will also complete at least one course that emphasizes the origins and histories of Aboriginal and Indigenous peoples (“past”), and at least one course that emphasizes contemporary issues of Aboriginal and Indigenous peoples (“present”).

The Certificate in Aboriginal and Indigenous Studies consists of 21 credit hours as prescribed below:

1. Archaeology 1005 or History 1005;
2. 15 credit hours chosen from Table 1 Courses for the Certificate in Aboriginal and Indigenous Studies, including a minimum of 3 credit hours from the “Past” column and a minimum of 3 credit hours from the “Present” column; and.
3. Law and Society 3012 or 3014.

### Table 1 Courses for the Certificate in Aboriginal and Indigenous Studies

</table>

Not all courses are offered every semester. Students are strongly advised to consult with the Program Coordinator for assistance with course planning, and to generally follow Table 2 Suggested Course Sequencing for the Certificate in Aboriginal and Indigenous Studies.

When the opportunity is available for students to take appropriate Language Study courses in the Department of Linguistics, the Program Coordinator may seek written permission from the Committee on Undergraduate Studies to include up to 6 credit hours in the program. Other Humanities and Social Sciences courses whose Calendar entry clearly establishes an emphasis on Aboriginal and Indigenous Studies, including courses delivered exclusively at Grenfell Campus or the Labrador Institute, may be eligible. Students should speak with the Program Coordinator for information.

</tr>
</tbody>
</table>

8.5.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

8.5.6 Regulation Concerning the Former Minor in Aboriginal Studies

A student who is enrolled in, or who has completed the former Minor in Aboriginal Studies, is not eligible to enroll in the Certificate in Aboriginal and Indigenous Studies.
8.6 Certificate in Ancient Languages

www.mun.ca/hss/ancientlanguages
Program Coordinator: Dr. K. Simonsen, Department of Classics

The Certificate in Ancient Languages is administered by the Department of Classics.

The Certificate in Ancient Languages is designed to appeal to students interested in the study of ancient languages and who wish to gain an appreciation for the origins of many modern languages. Ancient languages are languages which are no longer spoken as the first language of any living person, although they may have direct descendants in current use. They remain culturally significant as languages of religion, scholarship and literature. The Certificate also offers specialized, high-quality preparation for students interested in studying subjects such as Archaeology, Classics, History, Linguistics, Philosophy, and Religion. The Certificate will also appeal to students studying in the areas of Medicine and Law, providing them with the etymological roots of subject-specific terminology.

8.6.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.

8.6.2 Advising

Throughout their program of study, students for a Certificate in Ancient Languages are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

8.6.3 Declaring the Certificate in Ancient Languages

Students interested in a Certificate in Ancient Languages are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the certificate can declare a Certificate in Ancient Languages by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.6.4 Regulations for the Certificate in Ancient Languages

The Certificate in Ancient Languages consists of 21 credit hours as prescribed below:

1. 3 credits hours in Linguistics chosen from a list of approved courses as outlined under Table 1 Approved Courses for the Certificate in Ancient Languages, Foundational Required Courses; and,

2. 18 credit hours chosen from specified courses in Ancient Greek, Biblical Hebrew, Latin, Sanskrit, Old English and Middle High German as outlined under Table 1 Approved Courses for the Certificate in Ancient Languages, Approved Ancient Languages Courses, consisting of:
   a. a minimum of 6 credit hours in one ancient language;
   b. a minimum of 6 credit hours in another ancient language;
   c. a minimum of 3 credit hours in a third ancient language; and
   d. a further 3 credit hours in any Table 1 Approved Courses for the Certificate in Ancient Languages, Approved Ancient Languages Course.

When planning their program of study, students should consider that languages other than Greek and Latin are not regularly available. Therefore, students are strongly advised to consult with the Program Coordinator for assistance with course planning.

8.6.5 Course Prerequisites

Due to the sequenced nature of language courses, all language courses beyond the introductory level have prerequisites.

8.7 Certificate in Criminology

www.mun.ca/hss/criminology
Program Coordinator: Dr. R. Ricciardelli, Department of Sociology

The Certificate in Criminology is administered by the Department of Sociology.

The Certificate in Criminology is designed for those who are interested in the study of criminality, crime, deviance, and the correctional systems more broadly. Program participants will be introduced to the foundational knowledge related to the Canadian legal system, law, justice and correctional systems, with a provincial and federal focus. They will gain a more complex understanding of the social structures and practices of criminal justice as well as what constitutes positive practice for persons working in corrections or criminal justice more generally. Students will be introduced to the theoretical, legal, methodological, practical, and ethical debates in criminology, which will allow participants to more effectively analyze and understand their work in law enforcement, corrections and rehabilitation. The program will be of particular interest to persons engaged in law enforcement, corrections, social work, and rehabilitation, as well as persons studying society, and individuals seeking work in not-for-profit and charitable organizations that foster positive social growth.

8.7.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.
Regulations for Certificate Programs and Graduation Requirements.

8.7.2 Advising
Throughout their program of study, students for a Certificate in Criminology shall contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator shall normally communicate a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

8.7.3 Declaring the Certificate in Criminology
Students interested in a Certificate in Criminology are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the certificate can declare a Certificate in Criminology by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.

8.7.4 Regulations for the Certificate in Criminology
The Certificate in Criminology consists of 21 credit hours as prescribed below. Six credit hours must be at the 3000-level or higher and no more than 15 credit hours shall be in a single discipline:
1. 12 credit hours in Sociology 1000, 2300, 3290 and 3395;
2. 3 credit hours in either Law and Society 1000 or Law and Society 2000; and
3. 6 additional credit hours at the 2000-level or above chosen from Table 1 Approved Courses for the Certificate in Criminology.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Coordinator for assistance with course planning.

Students are advised to generally follow the suggested course sequencing presented in Table 2 Suggested Course Sequencing for the Certificate in Criminology.

<table>
<thead>

</table>

8.7.5 Course Prerequisites
Normal course prerequisites will apply. Students should note that Psychology 1000 and 1001 are prerequisites (in addition to the 21 credit hours specified for the certificate) for Psychology 2920.

8.7.6 Regulations Concerning the Former Lifelong Learning Certificate in Criminology
A Humanities and Social Sciences Certificate in Criminology cannot be awarded to those who have already been awarded a Certificate in Criminology through the former Division of Lifelong Learning.

8.8 Certificate in Film Studies
www.mun.ca/hss/fms
Program Coordinator: Dr. A. Loman, Department of Sociology

The Certificate in Film Studies is administered by the Department of English.

The Certificate in Film Studies is designed for those who are interested in film as a form of cultural production that spans the globe. The program acquaints students with film as form before exploring how it is deployed in multiple settings and how it evolves depending on political, social, historical, economic, and technological contexts.

8.8.1 Faculty of Humanities and Social Sciences Certificate Regulations
Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.

8.8.2 Advising
Throughout their program of study, students enrolled in a Certificate in Film Studies are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.
8.8.3 Declaring the Certificate in Film Studies
Students interested in a Certificate in Film Studies are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the Certificate can declare a Certificate in Film Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.8.4 Regulations for the Certificate in Film Studies
As part of the Certificate in Film Studies students must complete a communications theory course and a film theory course, supplemented by courses analyzing film in specific contexts. Students are encouraged to take foundation courses before proceeding with the other requirements for the Certificate.

The Certificate in Film Studies consists of 21 credit hours as prescribed below:
1. 3 credit hours in Communication Studies 2001 or English 2813;
2. 3 credit hours in English 2850 or 2851; and
3. a minimum of 15 additional credit hours selected from Table 1 Faculty of Humanities and Social Sciences Courses for the Certificate in Film Studies, of which there shall be a minimum of 3 credit hours at the 3000-level.

</tbody>
</table>

8.8.5 Course Prerequisites
Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

8.8.6 Regulations Concerning the Former Minor in Film Studies
The Certificate in Film Studies cannot be awarded to those who have already been awarded a Minor in Film Studies.

8.9 Certificate in Food Studies
www.mun.ca/hss/fdst
Program Coordinator: Dr. L. Addison, Department of Anthropology
The Certificate in Food Studies is administered by the Department of Anthropology.

The Certificate in Food Studies involves the interdisciplinary study of food issues at local, regional, national and global scales. The objective of the program is to provide foundational knowledge about the various dimensions of food systems and about the barriers to local and global food security.

8.9.1 Faculty of Humanities and Social Sciences Certificate Regulations
Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.

8.9.2 Advising
Throughout their program of study, students interested in the Certificate in Food Studies are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

8.9.3 Declaring the Certificate in Food Studies
Students interested in a Certificate in Food Studies are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the Certificate can declare a Certificate in Food Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.9.4 Regulations for the Certificate in Food Studies
The Certificate in Food Studies consists of 21 credit hours as prescribed below:
1. 9 credit hours chosen from Anthropology 2415, Folklore 3830, Geography 3420, Political Science 3260; and
2. 12 additional credit hours chosen from Table 1 Approved Courses for the Certificate in Food Studies.

In accordance with Certificate Programs, Components, a minimum of 12 credit hours in the Certificate in Food Studies must be must be comprised of courses listed in the Faculty of Humanities and Social Sciences Course Descriptions.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Coordinator for assistance with course planning.

8.10 Certificate in Newfoundland and Labrador Studies

www.mun.ca/hss/programs/undergraduate/certificates/newfoundland_labrador_studies.php

Program Coordinator: Dr. J. Gould, Department of Folklore

The Certificate in Newfoundland and Labrador Studies is administered by the Department of Folklore.

The Certificate in Newfoundland and Labrador Studies is designed as an interdisciplinary humanities and social sciences certificate program that aims to encourage students to better understand the histories, social cultures, languages, geographies, scientific knowledges, philosophies, folklore, and contemporary experiences of Newfoundland and Labrador. Upon completion of the certificate, students should have an improved ability to contextualize Newfoundland and Labrador’s place in Canada and the world, including an ability to situate case studies that have application to broader knowledge development. The program is overseen by the Department of Folklore.

8.10.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.

8.10.2 Advising

Throughout their program of study, students for a Certificate in Newfoundland and Labrador Studies are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

8.10.3 Declaring the Certificate in Newfoundland and Labrador Studies

Students interested in a Certificate in Newfoundland and Labrador Studies are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the Certificate can declare a Certificate in Newfoundland and Labrador Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at the website.

8.10.4 Regulations for the Certificate in Newfoundland and Labrador Studies

The Certificate in Newfoundland and Labrador Studies students consists of 21 credit hours with no more than 9 credit hours in a single discipline as prescribed below:

1. 3 credit hours in a Critical Reading and Writing course that emphasizes the study of Newfoundland and Labrador, normally Folklore 1005; and,
2. 18 additional credit hours selected from Table 1 Courses Approved for the Certificate in Newfoundland and Labrador Studies.

Table 1 Courses Approved for the Certificate in Newfoundland and Labrador Studies

Not all courses are offered every semester. Students are strongly advised to consult with the Program Coordinator for assistance with course planning.

8.10.5 Eligibility of Other Courses

1. Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.
2. The following 4000-level courses may also be counted towards the Certificate subject to the regulations stated above: Anthropology 4280, French 4400 or Folklore 4400, Folklore 4310, History 4230, 4231, Law and Society 4900, Political Science 4680, 4880, Sociology 4240. Students are advised that these advanced study courses may require prerequisites and/or may not be frequently offered.
3. Courses dealing primarily with the study of Newfoundland and/or Labrador not listed here, including special topics courses, or courses offered at Grenfell Campus may be deemed eligible by the Faculty’s Committee on Undergraduate Studies. For further information, see the Program Coordinator.
8.10.6 Regulations Concerning the Former Lifelong Learning Certificate in Newfoundland and Labrador Studies

A student who completed the Certificate in Newfoundland and Labrador Studies offered by the former Division of Lifelong Learning is not eligible also to complete a Faculty of Humanities and Social Sciences Certificate in Newfoundland and Labrador Studies.

8.10.7 Regulation Concerning the Former Minor in Newfoundland and Labrador Studies

A student who is enrolled in, or who has completed the Minor in Newfoundland and Labrador Studies is not eligible to enroll in the Certificate in Newfoundland and Labrador Studies.

8.11 Certificate in Public Policy

www.mun.ca/hss/publicpolicy

Program Coordinator: Dr. S. Tomlin, Department of Political Science

The Certificate in Newfoundland and Labrador Studies is administered by the Department of Political Science. The Certificate in Public Policy is designed for those who are interested in the study of governance and policy responses to public issues. The program’s objective is to provide foundational knowledge that is essential for exploring topical issues in diverse policy fields and settings. The program is structured around introductory and advanced core courses in Political Science that promote understanding of the theoretical parameters of public policy, such as the processes and mechanisms that are relied upon to define and solve policy problems. These core skills and competencies are used in the analysis and study of public policy in a variety of interdisciplinary fields.

8.11.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding General Regulations for Certificate Programs and Graduation Requirements.

8.11.2 Advising

Throughout their program of study, students for a Certificate in Public Policy are encouraged to contact the Program Coordinator for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here. The Coordinator liaises with representatives of participating departments, and normally communicates a tentative schedule of upcoming course offerings to students so that they can plan accordingly.

8.11.3 Declaring the Certificate in Public Policy

Students interested in a Certificate in Public Policy are first encouraged to consult with the Program Coordinator to discuss the requirements of the program. After consultation with the Coordinator, students wishing to enroll in the certificate can declare a Certificate in Public Policy by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.11.4 Regulations for the Certificate in Public Policy

As part of the Certificate in Public Policy, students must complete a concentration in a policy subfield, which comprises foundation courses up to the 3000-level and is overseen by a designated department. Students are encouraged to take courses in the concentration after completing initial foundation-level courses in public policy offered by the Department of Political Science. A student is not eligible to complete more than one concentration.

The Concentration in Economic Policy is overseen by the Department of Economics. Approved courses feature a foundation-level focus on the interrelationships between public policy, political institutions and economic systems. The Concentration in Urban and Regional Policy is overseen by the Department of Geography. Approved courses feature a foundation-level focus on public policy concerning broad concepts of regionalism, municipal governance, and sub-national planning. The Concentration in Governance is overseen by the Department of Political Science. Approved courses feature a foundation-level focus on the public policy process within government, emphasizing constitutional, legal and internal procedural factors.

The Certificate in Public Policy consists of 21 credit hours as follows:

1. 6 credit hours chosen from Political Science 1000, 1010, 2600, 3600, including at least one of Political Science 2600, 3600;
2. 12 credit hours chosen from one of the following designated policy concentrations:
   a. Economic Policy: Economics 1010 (or the former 2010), Economics 1020 (or the former 2010), and 6 additional credit hours chosen from Table 1 Approved Courses for the Concentration in Economic Policy, including at least 3 credit hours in Economics at the 3000-level; or
   b. Urban and Regional Policy: Geography 1050, 2302 and 2 additional credit hours chosen from Table 2 Approved Courses for the Concentration in Urban and Regional Policy, including at least 3 credit hours in Geography 3350, 3701; or
   c. Governance: 3 credit hours chosen from Political Science 3600 or 3620, and a minimum of 9 additional credit hours at the 3000-level chosen from Table 3 Approved Courses for the Concentration in Governance, including at least 3 credit hours in Canadian Governance and 3 credit hours in International Governance; and
3. 3 credit hours in Political Science 4600 or 4630.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Coordinator for assistance with course planning, and to generally follow Table 4 Suggested Course Sequencing for the Certificate in Public Policy.

| Next 12 credit hours: Complete a Policy Concentration                                           |
| Last 3 credit hours: Choose from Political Science 4600 or Political Science 4630              |

8.11.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

8.11.6 Regulations Concerning the Former Lifelong Learning Certificate in Public Administration

A student who completed the Certificate in Public Administration or the Certificate in Regional Policy and Development offered by the former Division of Lifelong Learning is also eligible to complete a Faculty of Humanities and Social Sciences Certificate in Public Policy.

9 Waiver of Regulations for Undergraduate Students

9.1 Student Responsibility and Academic Advice

Students are responsible for following regulations as stipulated in the University Calendar in all respects. In accordance with UNIVERSITY REGULATIONS, Academic Advising, the ability to make sound academic decisions requires access to sound academic advice. Information in the University Calendar and in an academic degree audit prevails over any other advice provided by any representative of Memorial University of Newfoundland. Requests for an academic degree audit are made by emailing the Office of the Registrar at audit_arts@mun.ca.

In extenuating circumstances that are duly documented, certain regulations involving course pre-requisites or co-requisites, departmental regulations, and faculty regulations may be waived or modified in accordance with UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate).

9.2 Course Prerequisites

Matters involving course prerequisites or co-requisites require approval of both the course instructor and the Head of the academic unit that is delivering the course. Requests are made to the course instructor in person or in writing from the student's @mun.ca email account. Students should provide a detailed explanation of the reasons for the request.

9.3 Other Regulations

1. Students facing extenuating circumstances should discuss their situation with an academic advisor(s), up to and including the Head of Department and/or program coordinator.

2. Requests for waivers of degree or program regulations and for adjustment of course requirements must be made in writing to the Assistant Registrar responsible for the Faculty of Humanities and Social Sciences, c/o The Office of the Registrar. In the written request, the student must clearly and fully provide:
   - Full name;
   - Current address and telephone number;
   - @mun.ca email address;
   - Student ID number;
   - The request that is being made, including relevant information from the University Calendar and a course syllabus if applicable;
   - A detailed explanation of the reasons for the extenuating request, supported by all relevant documentation; and
   - The proposed resolution.

3. Only requests arising from extenuating circumstances beyond a student's control and which are properly documented will be brought forward to the Faculty of Humanities and Social Sciences' Committee on Undergraduate Studies.

4. Terms of reference for the Committee on Undergraduate Studies are available on the Faculty of Humanities and Social Sciences website at www.mun.ca/hss/services/administration/council/bylaws.pdf. In considering a request for a waiver or substitution, the Committee normally considers the following factors:
the need to uphold the academic integrity of all programs within the Faculty of Humanities and Social Sciences;

- the need to apply Calendar regulations in a consistent and fair manner;
- the opinion of the Head of Department and/or program coordinator;
- that delayed graduation is not in itself an extraordinary circumstance; and
- that medical documentation from a health professional must be sufficiently specific to allow proper consideration of the request.

For further details, refer to UNIVERSITY REGULATIONS - Information Required in Certificates from Health Professionals.

5. A Committee decision is communicated by the Assistant Registrar to the student's @mun.ca account and to the head of department and/or program coordinator. If appropriate, the Committee, the head and/or the coordinator will also examine whether the Calendar entry should be modified.

6. The procedure for appealing unfavourable decisions is outlined in the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Appeal of Decisions.

10 Study Abroad (Harlow Campus and International Field Schools)

The Faculty of Humanities and Social Sciences periodically offers instruction at the Harlow Campus, England and in field school courses around the world. These provide students with the opportunity to study abroad combined with access to the expertise of Memorial University of Newfoundland instructors. Classroom and learning experiences occur in a safe learning environment. Students are exposed to new surroundings, diverse cultures and languages, skills development, extracurricular trips and guest speakers in ways that are possible only by spending time in another locale. The ability to complete Memorial University of Newfoundland courses elsewhere as part of a local cohort acts as an extension of classroom learning, delivering exceptional value in terms of financial commitment, administration and peace of mind. Those who complete time abroad develop skills that help them prepare for today's global society, which increasingly involves travelling to unfamiliar locations, working in multicultural environments, adapting to new situations, and thinking creatively.

The content of the Harlow Campus and field school courses changes depending on the departments and instructors involved. Priority is normally given to delivering courses that are listed among the requirements for a Major, Minor, Diploma and/or Certificate program. Students wishing to enrol must have completed a minimum number of credit hours at the university level as specified by the participating department, and satisfy any prerequisites which may be required. Entry is limited and competitive. The relevant admission criteria, as well as other information, may be obtained from the Office of the Dean of Humanities and Social Sciences and the participating department.

Harlow campus semester and field school courses are normally clearly identified in the course title and can be found among a department's course descriptions. In addition, other courses or portions thereof are from time-to-time delivered outside of Canada by a variety of faculty members in the Humanities and Social Sciences. For information about upcoming interactional courses, contact the Go Abroad Coordinator at www.mun.ca/goabroad.

10.1 Harlow Campus Semester Courses

Courses delivered exclusively at Harlow Campus include:

- Classics 3710-3729
- English 3710-3729
- Folklore 3710-3729
- Gender Studies 3710-3720
- Geography 3710-3729
- History 3710-3729 (excluding 3713, 3728), 4360-4380
- Medieval Studies 3710-3729
- Political Science 3980-3999

In addition, a number of courses listed under Course Descriptions are periodically offered at the Harlow Campus. For further information, contact the applicable department.

10.2 Field School Courses Delivered Outside of Canada

Field school courses delivered exclusively outside of Canada include:

- French 3102, 3103, 3507, 3508
- German 2511, 3510, 3511

The Department of Modern Languages, Literatures and Cultures regularly offers a one semester French immersion program in St-Pierre (July and Fall Frecker Programs) and periodically offers Russian language courses in Russia and Spanish language study abroad.

In addition, a number of courses listed under Course Descriptions are periodically offered at the Harlow Campus. For further information, contact the applicable department.

10.3 International Exchanges

Memorial University of Newfoundland offers international exchanges with approved partner institutes around the world. Information is available by e-mail to international@mun.ca.

1. All courses are subject to overall degree requirements, including residence requirements and departmental regulations.

2. It is a student's responsibility to confirm that courses completed at another institution are eligible for transfer to Memorial University of Newfoundland. To confirm eligibility, a student is expected to begin by consulting with academic advisors and undergraduate liaisons of the relevant academic department(s). A degree audit may be required.

3. While planning for an International exchange, a student must research the course offering(s) at the host institute and request the associated syllabi. Before leaving the country the student must submit a completed letter of permission (www.mun.ca/regoff/admission/Letter_of_Permission.pdf) along with the relevant syllabi to the Office of the Registrar.

4. Upon completion of the international exchange, a student must request that the host institute send the student's transcripts directly to the Office of the Registrar in order for the transcripts to be deemed official. For more information regarding transfer of credit, the student should consult with the Faculty's International Exchange Coordinator or the Office of the Registrar.

11 Experiential Learning

The Faculty of Humanities and Social Sciences offers a number of experiential learning opportunities. Co-operative education degree
programs feature full-time employment in positions related to the student's area of study. These positions are completed as part of work term courses that are reserved for full-time students enrolled in the program. Field school courses provide hands-on instructional experiences as part of a regular degree or diploma program. Internship courses feature a part-time work placement of short duration that is completed in conjunction with coursework and are otherwise treated as a regular course.

11.1 Co-operative Education Degree Programs
Major in Archaeology (Co-operative)
Honours Major in Archaeology (Co-operative)
Major in Economics (Co-operative) (B.A. or B.Sc.)
Honours in Economics (Co-operative) (B.A. or B.Sc.)
Major in Political Science (Co-operative)
Honours in Political Science (Co-operative)
For further information, contact the Division of Co-operative Education or the appropriate department.

11.2 Co-operative Education Work Term Courses
Archaeology 300W, 400W
Economics 299W, 399W, 499W
Political Science 260W, 360W, 460W
For further information, contact Co-operative Education or the appropriate department.

11.3 Field School Courses Normally Delivered Within Canada
Archaeology 3583, 3585, 3586
English 5000
Geography 3230
For further Information, contact the appropriate department or course instructor.

11.4 Internship Courses Normally Delivered Within Canada
Political Science 4600
Sociology 4100
For further Information, contact the appropriate department or course instructor.

12 Limited Enrolment Courses and Transfer Credits
12.1 Limited Enrolment Courses
Certain course offerings in the Faculty of Humanities and Social Sciences will be identified as being Limited Enrolment Courses and will be clearly identified as such in the University Calendar, under Course Descriptions. Students who have registered for a Limited Enrolment Course must confirm their registration either (1) by attending at least one of the first three hours of lectures in the course (and the first meeting of any laboratory section of the course, if appropriate); or (2) by notifying the department in writing within the first five university working days of the semester. Students who do not confirm their registration may be dropped from the course on the recommendation of the Head of Department.

12.2 Transfers From Other Post-Secondary Institutions
The following Faculty of Humanities and Social Sciences regulations are in addition to UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate).
1. As per UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Graduation, a student who completes fewer than one-half of the credit hours required for the degree is eligible only to obtain an "unclassified" degree. For these students, at least one-half of the minimum number of credit hours required for a Major (or a second Major) and at least one-third of the minimum number of credit hours required for a Minor must be completed at this University.
2. No more than 9 of the 18 combined credit hours required to fulfill the Critical Reading and Writing (CRW), Language Study (LS), and Quantitative Reasoning (QR) Requirements may be transferred as equivalencies from another institution. In addition, no more than 3 credit hours in a CRW course may be transferred towards the Critical Reading and Writing requirement. Additional transferred credit hours that would normally qualify towards these requirements may be eligible to fulfill other requirements of the degree.
3. The Faculty of Humanities and Social Sciences' Committee on Undergraduate Studies is responsible for assessing the eligibility of specific (designated) Grenfell Campus courses for the Bachelor of Arts General Degree Requirements, Core Requirements.
4. Limits on credit transfer hours exist for the Honours, Major and Minor in French. Refer to Program Regulations, Department of French and Spanish.
5. Limits on credit transfer hours exist for the Honours, Major and Minor in History. Refer to Program Regulations, Department of History.
6. Limits on credit transfer hours exist for the Honours, Major and Minor in Spanish. Refer to Program Regulations, Department of French and Spanish.

13 Programs and Regulations
13.1 Anthropology
www.mun.ca/anthro
All students who major in Anthropology will be assisted by a faculty advisor who will help them in planning their academic programs. For this purpose, it is essential that students declare their major at an early stage of their studies.
Anthropology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Anthropology and are designated by ANTH.
13.1.1 Department of Anthropology Description

Anthropology explores how people and groups across the globe engage with the social, cultural, political, and economic processes that shape the contemporary world. Anthropologists spend extended periods of time with the people they study in order to understand their practices and beliefs and how such practices and beliefs are entangled with systems of power. In short, the study of anthropology facilitates cross-cultural understanding and critical engagement with global problems. Students learn how concepts such as class, gender, and ethnicity relate to a variety of areas including development, environmental crises, economic processes, imaginary worlds, labour, media, politics, religion, tourism, and heritage. Our undergraduate programs foster skills needed to both think critically about these topics and engage with an increasingly globalized and complex world.

The study of anthropology provides a strong background for students who intend to specialize in any of the social sciences and humanities or in medicine, nursing, social work, education, law, business, government, communications and many other fields which require an understanding of global processes and a strong grounding in the cross-cultural study of human behaviour. Anthropology students have found employment with private, public and non-government organizations in diverse fields, including: academia; public policy; print, radio, and television journalism; documentary film-making; healthcare; international development; and social and environmental activism.

13.1.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.1.3 General Degree

13.1.3.1 Major

The student majoring in Anthropology must meet the requirements listed under Program Regulations - General and Honours Degrees. A minimum of 39 credit hours in Anthropology is required including:

1. Anthropology 1031;
2. 9 credit hours at the 2000-level chosen from any of the Anthropology courses between 2410 and 2416;
3. Anthropology 3300 and 3410;
4. 9 credit hours from Anthropology offerings at the 4000-level, of which one must be Anthropology 4412; and
5. the remaining 12 credit hours are to be chosen from any of the Anthropology 3000-or 4000-level offerings.

13.1.3.2 Minor

A minor in Anthropology requires the completion of 24 credit hours including:

1. Anthropology 1031;
2. 6 credit hours at the 2000 level chosen from any of the Anthropology courses between 2410 and 2416;
3. Anthropology 3410;
4. 6 credit hours from the 4000 level including Anthropology 4412; and
5. 6 credit hours chosen from Anthropology offerings at the 3000 level or above.

13.1.4 Honours Degree

1. Admission: see Bachelor of Arts (Honours) Degree Regulations.
2. Students intending an Honours program are required to complete 60 credit hours in Anthropology following the requirements in Major above, but in addition must include either Anthropology 4994 and 4995, or 4996. Thirty-six of the 60 credit hours must be at the 3000 or 4000 level. Students must also meet the requirements of the Program Regulations - General and Honours Degrees.

13.1.5 Regulations for Joint Honours, Anthropology and Another Major Subject

1. Students must fulfill the requirements of the Bachelor of Arts (Honours) Degree Regulations.
2. Students must complete 42 credit hours in Anthropology courses and include the following:
   a. Anthropology 1031;
   b. 9 credit hours at the 2000 level chosen from any of the Anthropology courses between 2410 and 2416;
   c. Anthropology 3300 and 3410;
   d. 9 credit hours in Anthropology courses at the 4000 level including Anthropology 4412; and
   e. 15 credit hours to be chosen from any of the 3000 or 4000 level Anthropology offerings.

13.1.6 Regulations for the International Bachelor of Arts (IBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Anthropology, students may elect to complete requirements for the International Bachelor of Arts (IBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Anthropology to jointly satisfy other requirements of the IBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (IBA) (First 60 Credit Hours), and to consider Anthropology courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Anthropology IS courses may be used
13.1.7 Certificate in Food Studies
The Department of Anthropology administers the **Certificate in Food Studies**. Credit hours in Anthropology may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the program coordinator.

### 13.2 Archaeology

**www.mun.ca/archaeology**

#### 13.2.1 Department of Archaeology Description

Archaeologists and bioarchaeologists study past human cultures and behavior through the material left behind: artifacts and features, plant and animal remains, human remains, sediments, sites, and their associated landscapes. In the Department of Archaeology, our students engage in practical training and experiential learning in classroom, laboratory, and field work settings that provide a comprehensive education and transferable skills. State-of-the-art laboratories specializing in applied archaeological sciences, archaeobotany, archaeological conservation, and prehistoric, historical, and aboriginal archaeology integrate undergraduates into community-university research initiatives from Northern Labrador to French Guiana and from British Columbia to Northwest Europe. As one of the largest Archaeology departments in the country, we train our students to become effective researchers, critical thinkers, and active stewards for our shared archaeological heritage.

The Undergraduate Coordinator assists all Archaeology majors and minors in planning their academic programs. For this purpose students should register with the Department at an early stage of their studies.

In addition to the Archaeology core program outlined under **General Degree, First Courses**, students may wish to follow **Table 1 Suggested Course Progression for Bioarchaeology/Archaeological Science Specialization Area of a Major in Archaeology** or **Table 2 Suggested Course Progression for Historical Archaeology Specialization Area of a Major in Archaeology** or **Table 3 Suggested Course Progression for Prehistoric Archaeology Specialization Area of a Major in Archaeology** below.

The following programs are available in the Department:

1. **Major in Archaeology** - Bioarchaeology/Archaeological Science Specialization, Historical Archaeology Specialization Area of a Major in Archaeology
2. **Minor in Archaeology**
3. **Honours in Archaeology**
4. **Joint Honours in Archaeology and Another Major Subject**
5. **Major and Honours in Archaeology (Co-operative) Education (ACE)**

Archaeology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Archaeology** and are designated by ARCH.

#### 13.2.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/declare.php.

#### 13.2.3 General Degree

#### 13.2.3.1 First Courses

The student majoring in Archaeology must meet the requirements listed under **Regulations for the General Degree of Bachelor of Arts**. Under these Regulations, a minimum of 36 credit hours in Archaeology is required. Students wishing to concentrate in this option must complete the Required Courses Archaeology 1000 (or the former 1030), 2480, 4182, and 4411. In addition, students are required to take 3 credit hours from **Group 1 (Core Courses)**; 9 credit hours from **Group 2 (Field and Laboratory Courses)**; 6 credit hours from **Group 3 (Regional Courses)**; and 6 credit hours from **Group 4 (Topical Courses)**.

**Course Groupings for the Archaeology Program:**

**Required Courses:** 1000 (or the former 1030), 2480, 4182, 4411.

**Group 1 (Core Courses):** 1001 (or the former 2590), 2430, 2450.

**Group 2 (Field and Laboratory Courses):** 3040, 3583, 3585, 3586, 3650, 3710, 3850, 4015, 4151, 4152, 4153, 4171.

**Group 3 (Regional Courses):** 2481, 3290, 3291, 3500, 3505, 3510, 3515, 3520, 3525, 3580, 3588, 3592, 3651.

**Group 4 (Topical Courses):** 2494, 3001, 3020, 3536, 3561, 3582, 3584, 3590, 3593, 3594, 3687, 3688, 3750, 3860, 4041, 4043, 4150, 4172, 4173, 4500, 4994.

13.2.3.2 Minor
A minor in Archaeology may be achieved by completing the following courses: Archaeology 1000 (or the former 1030) and 2480; 6 credit hours in Archaeology courses at the 3000-level; 3 credit hours in Archaeology courses at the 4000-level, 9 credit hours chosen from Archaeology courses at any level, except Archaeology 2492 or 2493, the former Archaeology 2491. ARCH 1001 or ARCH 1005 is a recommended choice.

13.2.4 Honours Degree
1. Students intending an Honours program are required to be majors and must complete 60 credit hours in Archaeology, at least 36 of which must be at the 3000 level or above including Archaeology 4994 and Archaeology 4995 (or the former Archaeology 4996). ARCH 1001 or ARCH 1005 is a recommended choice. Students must also meet the Regulations for the General Degree of Bachelor of Arts, and Regulations for the Honours Degree of Bachelor of Arts. Students are strongly advised to consult with the Archaeology Undergraduate Coordinator and Honours Supervisor for assistance with planning their academic program.

13.2.5 Regulations for Joint Honours, Archaeology and Another Major Subject
1. Students must fulfill the Regulations for the Honours Degree of Bachelor of Arts.
2. Students must complete 42 credit hours in Archaeology courses and include the following:
   a. ARCH 1000 (or the former 1030);
   b. Archaeology 2430, 2480 and 3 other credit hours in Archaeology at the 2000 level;
   c. 15 credit hours in Archaeology courses at the 3000 level, chosen in consultation with an Honours supervisor; and
   d. Archaeology 4182 and 4411 and 9 other Archaeology credit hours at the 4000 level, with a grade of "B" or better.

13.2.6 Major in Archaeology (Co-operative)
The Major in Archaeology (Co-operative) Education (ACE) program is available to full-time Archaeology majors only. The student majoring in Archaeology must meet the requirements listed under Regulations for the General Degree of Bachelor of Arts and First Courses above. In addition, the ACE Program requires two work term courses, 300W and 400W, as described in Work Terms. The ACE Program is an extension of the existing Bachelor of Arts and Bachelor of Arts Honours programs. The program is administered by Co-operative Education at Memorial University of Newfoundland. With the help of Co-operative Education and the Department of Archaeology, students will seek placement opportunities within the Province, within Canada, and internationally.

13.2.6.1 Admission Requirements
1. Admission is limited, competitive and selective. Prospective students are encouraged to consider alternate degree program(s) in the event that they are not accepted into the ACE program.
2. Applicants should note that it is possible to enter Term 1 only in the Fall semester commencing in September of each academic year. ACE application forms are available online at www.mun.ca/archaeology/ace or in the Department of Archaeology Office.
3. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Students with weak overall academic records are unlikely to be admitted.
4. To be eligible for admission to Term 1 an applicant must have successfully completed a minimum of 30 credit hours with an overall average of at least 65% as follows: all applicants must have completed Archaeology 1000 (or the former 1030) and 2480 and an Archaeology Field School or significant archaeology experience. It is also advised that students choose courses which can satisfy the requirements for the Core Requirements as outlined under Bachelor of Arts General Degree Components, including courses in a second language.
5. Students who have already completed more than the 30 credit hours that are required for admission to the program may apply for
entry into the program with Advanced Standing. These students will be placed in the term of the program judged to be appropriate considering the number of credit hours. Previous work term and field or laboratory work experience may also be taken into consideration.

6. Transfer students from other universities will be placed in the term of the program judged to be appropriate considering equivalent credits, as determined by the Department.

13.2.6.2 Program of Study

1. Promotion from each term requires a passing grade in all specified required courses and an overall average of at least 65% in all courses including electives. A student who fails a required course or fails to maintain the overall average of 65% will not be promoted to the next term and will be required to withdraw from the program. The student in question may apply for readmission in a subsequent year after passing the specified required course(s) previously failed, and reestablishing the 65% average.

2. In addition to the 30 credit hours required for admission, a student is required to complete a total of 120 credit hours (including a field school) and two Work Terms. A student wishing to change the sequence of the work terms must first consult with the ACE Coordinator, Academic Staff Members-Co-operative Education (ASM-CEs) and receive written approval from the Head of the Department or delegate. A student must complete the program on an academic term.

3. A student may wish to follow Table 4 Suggested Course Progression for Major/Honours in Archaeology (Co-operative) outlined below under the Honours in Archaeology (Co-operative).

4. UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate). Classification of Students notwithstanding, a student will require permission from the Head of the Department to register for courses while on work terms if the courses are in addition to the prescribed program. Normally, work terms are considered full-time employment with no time for additional course work.

13.2.6.3 Work Term Placement

1. Work terms are not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of a student who is required to withdraw from the program, Co-operative Education at Memorial University of Newfoundland has no responsibility for placement until the student has been re-admitted to the program.

2. A student who applies for admission to the Co-operative Education program gives permission to the University to provide a copy of the applicant's resume, university transcript and work term evaluations to potential employers.

3. A student is required to complete professional development seminars offered by Co-operative Education.

4. A student who has been accepted to the ACE Program may obtain a term placement outside the competition. Such employment positions must be confirmed by the employer, and must be approved by the ACE Coordinator.

5. The start and end dates for each work term are shown in the University Diary.

6. A student is expected to submit, within a month from starting a Work Term, a plan of the intended work that term, following the template provided by the Department of Archaeology.

7. Work terms must involve full-time work and are normally paid.

13.2.6.4 Registration and Evaluation of Performance

1. In Work Terms 1 and 2, a student must register for Archaeology 300W and 400W respectively.

2. Student performance evaluations are to be completed by the employer and returned to the ASM-CE. The Work Term evaluations shall consist of two components:
   a. On-the-job Student Performance:
      Job performance shall be assessed by the ASM-CE in consultation with the department using information gathered during the Work Term and input from the employer towards the end of the Work Term. Formal written documentation from the employer shall be sought. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.
   b. The Work Report:
      • A student is required to submit a Work Term report on the first day of final exams.
      • Work Term reports shall be evaluated jointly by the Department and the ASM-CE.
      • If an employer designates a report to be of a confidential nature, both employer and the Coordinator must agree as to the confidentiality of the report before the reportality may be accepted for evaluation.
      • Reports must contain original work related to the Work Term placement. The topic must relate to the work experience and will be chosen by the student in consultation with the employer. The topic must be approved by the ASM-CE in conjunction with the Department of Archaeology.

Evaluation of the Work Term report will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

The evaluation of the job performance and the work term report will result in one of the following final grades being awarded:
• Pass with Distinction: Indicates a classification of OUTSTANDING in both the work report and the job performance.
• Pass: Indicates a classification of ABOVE EXPECTATIONS, SATISFACTORY, and/or MARGINAL PASS for the work report and the job performance.
• Fail: Indicates a classification of FAIL in the work report and/or the job performance.

For promotion from the Work Term, a student must obtain at least a Pass. Students should also refer to the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) of the University. The grades awarded for each work term will be noted on the transcript of the student.

3. If a student fails to achieve the Work Term standards specified above, the student will be required to withdraw from the program. Such a student may reapply to the program after a lapse of two semesters.

4. A student who withdraws from a Work Term without acceptable cause subsequent to a job placement will be required to withdraw permanently from the Co-operative education program. Students who drop a Work Term without prior approval from the ACE Coordinator, the ASM-CE, and the Head of the Department of Archaeology, or who fail to honour an agreement to work with an employer, or conduct themselves in such a manner as to cause their discharge from the job will normally be awarded a failed grade for the Work Term in question. Permission to drop a Work Term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved Work Term in lieu of the one dropped.
13.2.7 Honours Major in Archaeology (Co-operative)

13.2.7.1 Admission Requirements
See Major in Archaeology (Co-operative), Admission Requirements. In addition to the regulations outlined below, a student must also meet the Program Regulations - General and Honours Degree Bachelor of Arts General Degree.

13.2.7.2 Program of Study
In addition to meeting the requirements for the Major in Archaeology (Co-operative), Honours in Archaeology (Co-operative) students must also meet the following regulations.

1. A student should also refer to the Bachelor of Arts (Honours) Degree Regulations. Students intending to complete an Honours program are required to be majors and must complete 60 credit hours in Archaeology including Archaeology 4994 and Archaeology 4995 (or the former Archaeology 4996). In addition, the ACE Program requires two work Term courses, 300W and 400W, as described in Work Terms.

2. Promotion from each Term requires an overall average of at least 65% in all courses including electives. A student who fails a required course or fails to maintain an overall average of 65% will not be promoted to the next term and will be required to withdraw from the program. The student in question may be eligible from readmission in the subsequent year after passing the specified required course(s) previously failed. See also UNIVERSITY REGULATIONS - Regulations for the Honours Degree.

3. In addition to the 30 credit hours required for admission, students are required to complete 120 credit hours (including a field school) and two Work Terms. Students wishing to change the sequence of the work terms must first consult with the ACE Coordinator, the ASM-CE and receive approval in writing from the Head of the Department or delegate. Students must complete their program on an academic term.

4. UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Classification of Students notwithstanding, a student will require permission from the Head of the Department to register for courses while on work terms if the courses are in addition to the prescribed program. Normally, work terms are considered full-time employment with no time for additional course work.

5. Students may wish to follow Table 4 Suggested Course Progression for Major/Honours in Archaeology (Co-operative) outlined below.

See Major in Archaeology (Co-operative) Education (ACE).

13.2.7.4 Registration and Evaluation of Performance
See Major in Archaeology (Co-operative) Education (ACE).

13.2.8 Regulations for the International Bachelor of Arts (iBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Archaeology, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Archaeology to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts.

13.2.9 Diploma in Ancient Worlds
The Department of Archaeology administers the Diploma in Ancient Worlds. Credit hours in Archaeology may be eligible to jointly fulfill requirements of a degree and a diploma and/or a certificate. For further information about this program, see Diploma Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.2.10 Certificate in Aboriginal and Indigenous Studies
The Department of Archaeology administers the Certificate in Aboriginal and Indigenous Studies. Credit hours in Archaeology may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see Certificate Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.
13.3 Classics
/www.mun.ca/classics

13.3.1 Department of Classics Description
Programs of the Department of Classics are designed to acquaint students with the ancient Greek and Roman cultures from which Western Civilization has developed. The Department endeavours to instruct with and utilize the full range of evidence available, including texts in Greek and Latin as well as material culture. Furthermore, it is understood that a degree of access can often be achieved by studying antiquity through translated sources. The Department therefore is committed to offering a wide range of courses and programs designed to explore the many aspects of the discipline.

The following programs are available in the Department:

1. Major in Classics
2. Minor in Classics
3. Honours in Classics
4. Joint Honours in Classics

Classics course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Classics and are designated by CLAS.

13.3.2 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.3.3 General Degree

13.3.3.1 Major in Classics
Students for a Major in Classics are advised to choose their program in consultation with the Department.

The major program consists of a minimum of 39 credit hours in Classics courses in accordance with the following:

1. Either Classics 1120 and 1121 or Classics 1130 and 1131;
2. at least 3 credit hours at the 4000 level;
3. an additional 12 credit hours at the 3000 level or above; and
4. an additional 18 credit hours at any level. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the major.

A student is encouraged to consider the Honours or Joint Honours in Classics outlined under Honours Degree.

13.3.3.2 Minor in Classics
The Minor program in Classics consists of a minimum of 24 credit hours in Classics courses in accordance with the following:

1. At least 3 credit hours at the 3000 level or above.
2. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the minor.

13.3.4 Honours Degree

Students for Honours in Classics are advised to choose their program in consultation with the Department.

13.3.4.1 Honours Degree in Classics
The Honours Degree in Classics will include at least 60 credit hours in Classics courses and consist of the following:

1. 12 credit hours in ancient Greek and/or Latin, selected from Classics 1120, 1121, 1130, 1131, 2200, 2300, 3200, and 3300 (Classics 3200 and/or 3300 can be used to meet the 3000-level requirements in both regulations 1. and 2.);
2. 36 credit hours in Classics at the 3000 and 4000 level, of which at least 9 credit hours must be at the 4000 level, including Classics 4999; and
3. a minimum of 12 additional credit hours at any level in Classics resulting in a total of 60 credit hours. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the Honours Degree.

13.3.4.2 Joint Honours in Classics
Classics may be combined with another subject to form a Joint Honours program. The Joint Honours Degree in Classics will include at least 45 credit hours in Classics courses and consist of the following:

1. 9 credit hours in ancient Greek and/or Latin, selected from Classics 1120, 1121, 1130, 1131, 2200, 2300;
2. 27 credit hours in Classics at the 3000 and 4000 level, of which at least 6 credits must be at the 4000 level (if a student chooses Classics as the Subject of Specialization in which to write the Honours Essay, Classics 4999 Honours Essay will count towards 3 credit hours at the 4000-level requirement); and
3. a minimum of 9 additional credit hours at any level in Classics resulting in a total of 45 credit hours. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the Joint Honours
13.3.5 Regulations for the International Bachelor of Arts (iBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Classics, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Classics to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts.

13.3.6 Certificate in Ancient Languages
The Department of Classics administers the Certificate in Ancient Languages. Credit hours in Classics may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see Certificate Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.4 Computer Science
For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar. The following undergraduate programs are available in the Department of Computer Science:
1. Applied Mathematics and Computer Science Joint Major (B.Sc. only)
2. Computer Science and Economics Joint Major (B.Sc. only)
3. Computer Science and Geography Joint Honours (B.Sc. only)
4. Computer Science and Geography Joint Major (B.Sc. only)
5. Computer Science and Physics Joint Honours
6. Computer Science and Physics Joint Major
7. Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
8. Computer Science and Pure Mathematics Joint Major (B.Sc. only)
9. Computer Science and Statistics Joint Honours
10. Computer Science and Statistics Joint Major (B.Sc. only)
11. Honours in Computer Science Honours (B.A., B.Sc.)
12. Major in Computer Science (B.A., B.Sc.)
13. Honours in Computer Science (Software Engineering) (B.Sc. only)
14. Minor in Computer Science (B.A., B.Sc.)
15. Computer Internship Option (CIIO)

13.5 Economics
www.mun.ca/econ

13.5.1 Department of Economics Description
Economics, the scientific study of how societies use scarce resources to produce and distribute commodities, is a versatile and flexible discipline. The Department has a strong focus on teaching and applied research. Students graduate with problem-solving skills needed to analyze how individuals (microeconomics) and governments (macroeconomics) can efficiently achieve their objectives, given their constraints. Economics students are trained how to evaluate and predict economic relationships. The discipline draws on and collaborates with the sciences (fisheries, health, environment, petroleum) and other disciplines (business, sociology, history, epidemiology, geography, political science, statistics and mathematics) to deal with a variety of topics, including economic growth, monetary policy, fair taxation, regional and municipal economic development, natural resource economics, and the economics of environmental impacts.

The following programs are available in the Department:
1. Major in Economics (B.A. or B.Sc.)
2. Honours in Economics (B.A. or B.Sc.)
3. Honours in Economics (Co-operative) (B.A. or B.Sc.)
4. Minor in Economics
5. Joint Programs (B.Sc. Only)
6. Joint Program (Co-operative) (B.Sc. Only)
7. Major in Economics (Co-operative) (B.A. or B.Sc.)

Economics course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Economics and are designated by ECON.

13.5.2 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/declare.php.
13.5.3 Admission Regulations (B.Sc.)
Students are normally admitted to the B.Sc. Program upon successful completion of 30 credit hours which must include:
1. 6 credit hours in English courses; and
2. 6 credit hours in Mathematics courses.

13.5.4 Major in Economics (B.A. or B.Sc.)
1. Students may Major in Economics as part of either a B.A. or a B.Sc program. See the Regulations for the General Degree of Bachelor of Arts and B.Sc. Degrees as appropriate.
2. ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020) are prerequisites for all other Economics courses except the former Economics 2070.
3. Economics 2550, 3000 and 3010 are prerequisites for all 4000-level courses.
4. Students shall consult with the Head of the Department or delegate when choosing courses for a Major in Economics.
5. Mathematics 1000 or its equivalent is the prerequisite for Economics 3000, 3010, and 3550.
6. B.A. students who undertake a Major in Economics shall complete Statistics 2500 and at least 39 credit hours in courses in Economics of which:
   a. 1010 (or the former 2010), 1020 (or the former 2010), 2550, 3000, 3001, 3010 and 3550 are obligatory.
   b. Eighteen credit hours shall be chosen from among the various Economics courses in consultation with the Head of the Department or delegate, and will include at least 9 credit hours in courses at the 4000-level.
   c. Students may, with the approval of the Head of the Department or delegate, substitute Statistics 2550 for Statistics 2500.
7. B.A. students majoring in Economics shall complete a minor of 24 credit hours in one other approved subject, or a second Major in accordance with Regulations for the General Degree of Bachelor of Arts. It is recommended that the Minor or second Major be chosen from the following subjects: Business, Mathematics, Political Science, Statistics, Computer Science, History, Geography, Philosophy, Sociology, or Anthropology.
8. B.Sc. students who undertake a Major in Economics shall complete at least 42 credit hours in courses in Economics of which:
   a. 1010 (or the former 2010), 1020 (or the former 2010), 2550, 3000, 3001, and 3010 are obligatory.
   b. Six credit hours shall be chosen from either 3550 and 3551, OR 4550 and 4551.
   c. Eighteen credit hours shall be chosen from among the various Economics courses in consultation with the Head of the Department or delegate, and will include at least 9 credit hours in courses at the 4000-level.
9. B.Sc. students must complete credits from other Science disciplines as follows:
   a. Mathematics 1000, 1001, and 2050.
   b. Statistics 2550, or its equivalent, and an additional 3 credit hours of Statistics.
   c. Computer Science 1000, and an additional 3 credit hours of Computer Science. With the approval of the Head of the Department or delegate, students may substitute another 1000-level Computer Science course for Computer Science 1000.
   d. At least 3 credit hours in an additional science subject other than Mathematics/Statistics, Economics, and Computer Science.

13.5.5 Honours in Economics (B.A. or B.Sc.)
1. See the General Regulations for the B.A. and B.Sc. (Honours) Degrees.
2. All students shall consult with the Head of the Department or delegate when choosing courses for an Honours program.
3. All students shall complete all non-Economics courses required of B.A. or B.Sc. Majors, and at least 60 credit hours in courses in Economics, including 1010 (or the former 2010), 1020 (or the former 2010), 2550, and at least 36 credit hours at the 3000-level or above including 3000, 3001, 3010, 3011, 3550, 3551, 4550 and 4551.
4. Twenty-four credit hours in electives in Economics shall be chosen in consultation with the Head of the Department or delegate, including at least 9 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.

13.5.6 Minor in Economics
1. Economics 1010 (or the former 2010), 1020 (or the former 2010), 3000, 3010, and at least one 4000-level Economics course are obligatory.
2. Mathematics 1000 or its equivalent is the prerequisite for Economics 3000, 3010 and 3550.
3. Twelve credit hours in Economics electives shall be chosen in consultation with the Head of the Department or Delegate.
4. Course prerequisites stipulated in the General Degree regulations and in the course descriptions shall apply to a Minor in Economics.

13.5.7 Joint Programs
Programs for Joint Majors in Economics and Computer Science, Pure Mathematics, Applied Mathematics or Statistics, and a Joint Major in Statistics and Economics (Co-operative) are found under the heading Joint Programs in the entry for the Faculty of Science.
Students who wish to take a Joint Major in Economics and Computer Science, Mathematics or Statistics must arrange their program in consultation with the heads of the respective departments and comply with the General Regulations for the Majors Degrees.

13.5.8 Major in Economics (Co-operative) (B.A. or B.Sc.)
13.5.8.1 Economics Co-operative Education Option (ECEO)
This Economics Program is available to full-time Economics majors (B.A. and B.Sc.) only. The ECEO provides an excellent mutual opportunity for students and employers. Qualified students will obtain rewarding employment experience in fields related to Economics for several months of continuous duration. Students will learn valuable practical skills in an employment situation during their course of study. Furthermore, paid employment will help to defray the cost of their education. The objectives of the Work Term component of the ECEO are embodied in the Work Term descriptions found under Course Descriptions,
Economics, Work Terms. The descriptions serve to guide the student and the employer toward achieving these objectives.

1. Admission Requirements
   a. Admission is competitive and selective. Therefore, prospective students are encouraged to consider an alternate degree program in the event that they are not accepted into the Co-operative program.
   b. Applicants should note that it is possible to enter Term 1 only in the Fall semester commencing in September of each academic year. Application forms are available online at www.mun.ca/econ/undergraduates/coop.php or in the Department of Economics.
   c. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Students with weak overall academic records are unlikely to be admitted.
   d. To be eligible for admission to Term 1 an applicant must have successfully completed a minimum of 30 credit hours with an overall average of at least 65% as follows: All applicants must have completed Economics 1010 (or the former 2010), 1020 (or the former 2010); at least 6 credit hours in English (English 1110 is recommended); Mathematics 1000; and 15 credit hours chosen from courses in the Faculties of Humanities and Social Sciences, Business or Science. It is advised that Bachelor of Arts students choose courses which can satisfy the requirements for the Core Program (see Regulations for the General Degree of Bachelor of Arts for these requirements), including courses in a second language. Bachelor of Science applicants must have completed Mathematics 1001.
   e. Students who have already completed more than the 30 credit hours that are required for admission to the program may apply for entry into the program with Advanced Standing into a Term beyond Term 1. Students with Advanced Standing will be placed in that term of the program judged to be appropriate considering the number of credit hours.
   f. Transfer students from other universities will be placed in that term of the program judged to be appropriate considering equivalent credits, as determined by the Department.

2. Program of Study
   a. Promotion from each Term requires a passing grade in all specified required courses and an overall average of at least 60% in all courses including electives. A student who fails a required course or fails to maintain the overall average of 60% will not be promoted to the next term and will be required to withdraw from the program. The student in question may apply for readmission in a subsequent year after passing the specified required course(s) previously failed, or re-establishing the 60% average.
   b. In addition to the 30 credit hours required for admission, students are required to complete a total of 120 credit hours and three Work Terms. Students wishing to change the sequence of the work terms must first consult with the Co-operative Coordinator and receive written approval from the Head of the Department or delegate. Students must complete their program on an academic term.

3. Work Term Placement
   a. General management of the work terms in the ECEO is the responsibility of Co-operative Education. It is responsible for assisting potential employers to become involved in the program, organizing competitions for Work Term employment, arranging student-employer interviews and facilities, data base management, and for the continual development of employment opportunities. The program coordinator (hereafter referred to as coordinator) is an Academic Staff member who will work with the department to counsel students, visit students on their work assignments and evaluate the work term.
   b. Work placement is not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of students who are required to withdraw from the program, the DCE has no responsibility for placement until they have been re-admitted to the program.
   c. A student who applies for admission to the co-op program gives permission to the University to provide a copy of the applicant’s resume, university transcript and work term evaluations to potential employers.
   d. A student who has been accepted to the ECEO program may obtain his/her own work term placement outside the competition. Such employment positions must be confirmed by the employer, and must be approved by the coordinator.
   e. Students are expected to submit, within a month from starting a Work Term, a plan of the intended work that term. Such employment positions must be confirmed by the employer, and must be approved by the coordinator.
   f. Salaries paid to co-operative students are determined by employers based on their internal wage structures, and tend to increase as the student progresses through the program and assumes more responsibility. However, students should not expect the income from work terms to make them completely self-supporting.

4. Registration and Evaluation of Performance
   b. Student performance evaluations are to be completed by the employer and returned to the coordinator. The Work Term evaluations shall consist of two components:
      i. On-the-job Student Performance:
         Job performance shall be assessed by the coordinator in consultation with the department using information gathered during the Work Term and input from the employer towards the end of the Work Term. Formal written documentation from the employer shall be sought. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.
      ii. The Work Report:
         • Students are required to submit a Work Term report to the coordinator on the first day of final exams.
         • Work Term reports shall be evaluated by a faculty member and the coordinator.
         • If an employer designates a report to be of a confidential nature, both employer and the coordinator must agree as to the methods to protect the confidentiality of such a report before the report may be accepted for evaluation.
         • Reports must contain original work related to the Work Term placement. The topic must relate to the work experience and will be chosen by the student in consultation with the employer. The topic must be approved by the coordinator or a faculty member of the Department of Economics.
Evaluation of the work term will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

The evaluation of the job performance and the work term report are recorded separately on the transcript. Overall evaluation of the work term will result in one of the following final grades being awarded:

- Pass with Distinction: Indicates OUTSTANDING PERFORMANCE in both the work report and the job performance.
- Pass: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and the job performance.
- Fail: Indicates FAILING PERFORMANCE in the work report or the job performance.

For promotion from the Work Term, a student must obtain at least a Pass. Students should also refer to the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) of the University.

The grades awarded for each work term will be noted on the transcript of the student.

c. If a student fails to achieve the Work Term standards specified above the student will be required to withdraw from the program. Such a student may reapply to the program after a lapse of two semesters, at which time the student will be required to repeat the Work Term with satisfactory performance before being admitted to any further academic term in the Faculty. A given work term may be repeated only once, and not more than two work terms may be repeated in the entire program.

d. In order to be considered for readmission, students must formally apply for readmission to the program not later than the deadline date specified in Clause b. of the Admission section 1. above.

e. A student who withdraws from a Work Term without acceptable cause subsequent to a job placement will be required to withdraw permanently from the Co-operative education program. Students who drop a Work Term without prior approval from both the coordinator and the Head of the Department of Economics, or who fail to honour an agreement to work with an employer, or conduct themselves in such a manner as to cause their discharge from the job will normally be awarded a failed grade for the Work Term in question. Permission to drop a Work Term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved Work Term in lieu of the one dropped.

13.5.9 Honours in Economics (Co-operative) (B.A. or B.Sc.)

13.5.9.1 Admission Requirements

See Major in Economics (Co-operative) (B.A. or B.Sc.) Economics Co-operative Education Option (ECEO) and the General Regulations for the B.A. and B.Sc. (Honours) Degrees.

13.5.9.2 Program of Study

1. See the General Regulations for the B.A. and B.Sc. (Honours) Degrees.
2. All students shall consult with the Head of the Department or delegate when choosing courses for an Honours program.
3. All students shall complete all non-Economics courses required of B.A. or B.Sc. Majors, and at least 60 credit hours in Economics, including 1010 (or the former 2010), 1020 (or the former 2010), 2550, and at least 36 credit hours at the 3000-level or above including 3000, 3001, 3010, 3011, 3550, 3551, 4120, 4550 and 4551.
4. Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of the Department or delegate, including at least 6 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.
5. Promotion from each Term requires a grade of 70% in all specified required courses and an overall average of at least 70% in all courses including electives. A student who fails a required course or fails to maintain an overall average of 70% will not be promoted to the next term and will be required to withdraw from the program. The student in question may be eligible from readmission in the subsequent year after passing the specified required course(s) previously failed, or re-establishing the 70% average. See also UNIVERSITY REGULATIONS - Regulations for the Honours Degree.
6. In addition to the 30 credit hours required for admission, students are required to complete 120 credit hours and three Work Terms. Students wishing to change the sequence of the work terms must first consult with the Co-op Coordinator and receive approval in writing from the Head of the Department or delegate. Students must complete their program on an academic term.
7. Courses shall normally be taken in academic terms in the sequenced order as set out in Table 3 Honours in Economics (Co-operative Option) B.A. Academic Course Program or in Table 4 Honours in Economics (Co-operative Option) B.Sc. Academic Course Program. Students wishing to change the sequence of the courses and/or reduce the course load required in the academic terms must consult with the Co-op Coordinator and receive written approval from the Head of the Department or delegate. Unspecified credits may be used to fulfill elective requirements only.
8. UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate). Classification of Students notwithstanding, students do not require special permission to register for courses while on work terms if the courses are in addition to the prescribed program.

13.5.9.3 Work Term Placement

See Major in Economics (Co-operative) (B.A. or B.Sc.) Economics Co-operative Education Option (ECEO).

13.5.9.4 Registration and Evaluation of Performance

See Major in Economics (Co-operative) (B.A. or B.Sc.) Economics Co-operative Education Option (ECEO).

**Notes:**
1. Courses specified for admission to and completion of the ECEO only partially satisfy the **Core Requirements** for the Degree of Bachelor of Arts. Additional Core Requirements are 6 credit hours in a single language other than English. These additional requirements should be completed before and following admission to Term 1 as part of the Minor program and elective components of the degree. Students are reminded that careful planning is necessary to ensure that all Core and Minor requirements are satisfied.
2. A Minor is required for a B.A. degree in Economics.

3 credit hours in elective courses [see Note 1.] | |

**Notes:**
1. Elective courses should be chosen with reference to the Regulations for the General Degree of Bachelor of Science, since courses specified for admission to and completion of the ECEO only partially satisfy these regulations. In particular note that (1) at least 78 credit hours (26 courses) in Science subjects are required and that (2) at least 3 credit hours in an additional Science subject other than Mathematics/Statistics, Economics and Computer Science must be included in these Science courses.
2. The Statistics and Computer Science elective courses may both be taken in either Term 4 or 5.

Notes: 1. Courses specified for admission to and completion of the ECEO only partially satisfy the Core Requirements for the Degree of Bachelor of Arts (Honours). Additional Core Requirements are 6 credit hours in a single language other than English. These additional requirements should be completed before and following admission to Term 1 as part of the Minor program and elective components of the degree. Students are reminded that careful planning is necessary to ensure that all Core and Minor requirements are satisfied.
2. A Minor is required for a B.A. degree (Honours) in Economics.
3. Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of Department or delegate, including at least 6 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.

Notes: 1. Another 1000-level Computer Science course may be substituted for Computer Science 1000 with the approval of the Department Head.
2. Elective courses should be chosen with reference to the Regulations for the Honours Degree of Bachelor of Science, since courses specified for admission to and completion of the ECEO only partially satisfy these regulations. In particular note that (1) at least 90 credit hours in Science subjects are required and that (2) at least 3 credit hours in an additional Science subject other than Mathematics/Statistics, Economics and Computer Science must be included in these Science courses.
3. Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of Department or delegate, including at least 6 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.
4. the Statistics and Computer Science elective courses may both be taken in either Term 4 or 5.

### 13.5.10 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Economics, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120
credit hours, a student may use eligible credit hours in Economics to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider Economics courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Economics IS courses may be used towards the International Studies (IS) Courses Requirement.

13.6 English
www.mun.ca/english

13.6.1 Department of English Description
In the Department of English students will encounter ideas, both new and old, and texts, both experimental and traditional. Students will read some of the best works in literature and culture, and will engage in provocative conversations about meaning, literary history, the future, identity, and their place in the world. All of the programs offered by the Department of English are designed to help students to think critically, read closely, and to write effectively. It doesn't matter whether students are pursuing a Major, a Minor, or an Honours degree, as they will find a diverse range of courses taught by highly knowledgeable and dynamic professors.

A Bachelor of Arts in English is one of the most versatile degrees a student can obtain because of the universal creative focus achieved through literary study.

The following undergraduate programs are available in the Department of English:
1. Major in Communications Studies
2. Major in English
3. Major in English with Specialization in Theatre/Drama
4. Minor in English
5. Honours in English
6. Joint Honours in English and Another Major Subject

13.6.1.1 General Information
1. Students who choose an Honours, Major or Minor degree in English are encouraged to consult with the Head of the Department or the Manager of Academic Programs to receive advice on English course selection.
2. Students wishing to pursue an Honours program in English must apply for admission to the Head of Department through the Office of the Registrar. Admission to the program is in accordance with University Regulations and the Bachelor of Arts (Honours Degree) Regulations. Students are encouraged to apply before or during their fourth semester. It is strongly recommended that students have completed at least five English courses, including English 2000, 2001, and 3200 or 3201 before applying.
3. Programs at the Grenfell Campus contain some courses that are not available in St. John’s and students wishing to transfer from the St. John’s Campus to the Grenfell Campus may have difficulty in completing their program in a timely manner.
4. Students using ENGL 1020 and 1021 to fulfill the Language Study Requirement are permitted to complete up to an additional 6 credit hours in Department of English Critical Reading and Writing courses at the 1000 level in order to fulfill the Critical Reading and Writing Requirement.

13.6.1.2 Course Prerequisites
The following course prerequisites apply to all English courses and programs:
1. All students must complete 6 credit hours in English at the 1000-level as follows: one of English 1090 or 1000, and one of English 1001, 1110, 1191, 1192, 1193.
2. In the case of students whose first language is not English and who take 1020 or the former 1030, that course and one of English 1000, 1001, 1021, 1090, 1191, 1192, 1193 are prerequisites for all other courses.
3. Normally, no student shall register for any English course at the 3000 level unless the student has already completed at least 3 credit hours in English at the 2000 level.
4. Normally, no student shall register for any English course at the 4000 level unless the student has already completed at least 3 credit hours in English at the 3000 level.

13.6.1.3 Courses That Fulfill National or Period Requirements in English Programs
1. Courses can only ever count for 3 credit hours. For example, although English 4271 can satisfy both the American requirement and a 4000-level requirement, students in an Honours, Joint Honours, or Major in English program, will have to complete another course to satisfy the total number of credit hours required by the program.
2. Courses which consider more than one century or nationality may fulfill the requirement for one or the other but not for both categories.

English course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, English and are designated by ENGL.

13.6.2 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors are available at www.mun.ca/hss/programs/undergraduate/declare.php.
13.6.3 General Degrees

13.6.3.1 Major in English
1. Students who choose English as their major subject shall complete at least 36 credit hours in English.
2. Nine of these 36 credit hours must be taken at the 3000-level or above.
3. Students are strongly encouraged to complete English 2000 and 2001 within their first five semesters.
4. The 36 credit hours shall include:
   a. 6 credit hours in English courses at the first-year level;
   b. English 2000 and 2001;
   c. English 3200 or 3201;
   d. 3 credit hours in Canadian literature;
   e. 3 credit hours in American literature;
   f. 6 credit hours at the 4000-level; and
   g. 9 credit hours in additional English courses.

13.6.3.2 Major in English with Specialization in Theatre/Drama
1. In addition to the Major in English defined above, the Department offers an English major with a specialization in theatre/drama.
2. Students who choose an English major with a specialization in theatre/drama shall complete 36 credit hours in English, including:
   a. 6 credit hours in courses at the first-year level;
   b. English 2000, 2002, 3350, 3351, 4400, 4401;
   c. English 3200 or 3201;
   d. English 4300 or 4301;
   e. one of English 3156, 3171, 3260, 4302; and
   f. English 3021 or 3022.

13.6.3.3 Minor in English
1. Requirements for the Minor may not be chosen from cross-listed courses when they are conducted by another department.
2. Students who choose to complete a Minor in English shall complete at least 27 credit hours in English as follows:
   a. 6 credit hours in courses at the first-year level;
   c. minimum of 6 credit hours at the 3000-level or above, including one of English 3200 or 3201; and
   d. 6 credit hours in additional English courses including at least 3 credit hours in Canadian Literature as outlined under Table 1 English Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English.

13.6.4 Honours Degrees

13.6.4.1 Honours Degree With English as Major Subject

An Honours degree in English is generally required for admission to a graduate program in the discipline, and is useful preparation for law, journalism and other professional fields.
1. Students who choose to complete an Honours Bachelor of Arts in English must complete 60 credit hours in English courses.
2. At least 36 of these credit hours must be taken at the 3000-level or above.
3. Courses will be chosen in consultation with the Head of Department.
4. In their final year, all Honours English students will be required to present an Honours Essay (English 4999). The semester before they plan to undertake their Honours Essay, students must receive approval of their chosen topic from the Head of the Department, who will then appoint an appropriate supervisor.
5. Any course that considers more than one national literature or period fulfills only one requirement for the Honours degree in English.
6. No courses at the 4000-level may be chosen from courses offered by another department.
7. The 60 credit hours shall include:
Faculty of Humanities and Social Sciences 2017-2018

13.6.5.3 Available at

13.6.5.2 Joint Honours Degree in English and Another Major Subject

See Bachelor of Arts (Honours Degree) Regulations.

1. A student’s program for Joint Honours must be approved by each Head of Department and conform to the Faculty of Humanities and Social Sciences General Regulations for Joint Honours degrees.

2. Students shall complete at least 45 credit hours in English, of which at least 27 credit hours shall be at the 3000-level or above.

3. English courses at the 4000-level may not be chosen from those offered by another department.

4. Any course that considers more than one national literature or period fulfills only one requirement for the Honours degree in English.

5. Students will write their Honours Essay for only one of the two departments from which they are taking Joint Honours.

6. The 45 credit hours shall include:
   a. 6 credit hours in courses at the first-year level;
   b. English 2000 and 2001;
   c. English 3200 or 3201;
   d. 3 credit hours in Canadian literature;
   e. 3 credit hours in American literature;
   f. English 4100 and 4101;
   g. English 4900 or 4901;
   h. 3 credit hours in pre-19th century literature (excluding 3200 and 3201);
   i. 3 credit hours in 19th century literature;
   j. 3 credit hours in 20th or 21st century literature;
   k. two of English 2600, 3500, 3600;
   l. 12 credit hours in additional English courses, of which 3 credit hours must be at the 3000-level or above, and 6 credit hours must be at the 4000-level; and
   m. English 4999.

13.6.5 Major in Communication Studies

The Major in Communication Studies is administered by the Department of English

The Major in Communication Studies is an interdisciplinary program in the Faculty of Humanities and Social Sciences that aims to provide explanatory frameworks and critical methodologies, drawn from a variety of disciplines, for understanding how communication and media are integral to the changing relationships between a variety of agents and agencies, from the individual to the nationstate and from personal interactions to international relations. Core courses in Communication Studies are intended to integrate the material and provide a common focus at the beginning and the end of the program.

Communication Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, English, Communication Studies and are designated by CMST.

13.6.5.1 Advising

Due to the nature of interdisciplinary programming, students must carefully plan their course selection and regularly consult with the program's designated academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit.

13.6.5.2 Declaring the Interdisciplinary Major in Communication Studies

Students wishing to declare a Major in Communication Studies shall consult with the program's designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.6.5.3 Regulations for the Interdisciplinary Major in Communication Studies

1. A Major in Communication Studies consists of all of the requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses chosen from Tables 1 and 2 below as follows:
   a. as per the General Regulations for Interdisciplinary Major and Minor Programs, courses from a minimum of any three Humanities and Social Sciences disciplines, and no more than 15 credit hours in any one Humanities and Social Sciences discipline other than Communication Studies;
   b. a minimum of 18 credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major in Communication Studies, ideally Communication Studies courses, which must include CMST 2000, 2001, 4000; and
   c. a minimum of 18 additional credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major in Communication Studies and/or Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major in Communication Studies, including a minimum of 15 credit hours at the 3000-level or above, with at least one 4000-level course. This may include up to 6 credit hours in non-Communication Studies courses chosen
2. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Major in Communication Studies are ineligible for an interdisciplinary Minor in any program.

13.6.5.4 Course List

1. Interdisciplinary programs provide exposure to courses in various disciplines within the Faculty of Humanities and Social Sciences. Table 1 courses are Faculty of Humanities and Social Sciences courses that are fundamental to the program of study. Subject to the program regulations, they may be supplemented with Table 2 courses whose Calendar entry establishes an emphasis on the questioning and analysis of media and technology, prioritize how communication relates to social and cultural practices, and/or focus on the mass circulation of ideas and values about culture. Not all courses are necessarily offered each year. Students must be careful not to register for different designations of the same course that is crosslisted with different departments. Normal departmental prerequisites for courses are applicable.

2. As per the General Regulations for Interdisciplinary Major and Minor Programs, up to 6 credit hours obtained in undergraduate courses at Memorial University of Newfoundland that are not listed in the Faculty of Humanities and Social Sciences Course Descriptions, may be deemed eligible towards the Major in Communication Studies. Undergraduate courses not delivered by the Faculty of Humanities and Social Sciences that have been approved as Table 1 electives include Computer Science 2000 and as Table 2 electives include Music 2011, 3019.

13.6.5.5 Previous Calendar Regulations

In accordance with UNIVERSITY REGULATIONS - Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science, candidates for a Major in Communication Studies will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000-level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program. These "grandparented" students are encouraged to consult the program's designated academic advisor for assistance with course selection.

In the case of departmental regulations for a major or minor, a student will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000 level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.

13.6.6 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in English, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in English to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider English courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in English IS courses may be used towards the International Studies (IS) Courses Requirement.

13.6.7 Diploma in Creative Writing

The Department of English administers the Diploma in Creative Writing. Credit hours in English may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see Diploma Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.6.8 Diploma in Performance and Communications Media

The Department of English administers the Diploma in Performance and Communications Media. Credit hours in English may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see Diploma Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.
13.6.9 Certificate in Film Studies
The Department of English administers the Certificate in Film Studies. Credit hours in English and Communications Studies may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see Certificate Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.7 English as a Second Language
www.mun.ca/esl
English as a Second Language course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, English as a Second Language.

The English as a Second Language Office, affiliated with the Department of English, and under the auspices of the Faculty of Humanities and Social Sciences, offers year-round programs for adult students wishing to improve their language skills and learn about Canadian culture. These include:
1. A five-week intensive English Language Summer School program;
2. English language preparation for students enrolled in graduate programs such as the Master’s in Business Administration and Master’s of Engineering;
3. Tutorials, workshops, and conversation programs for current Memorial University of Newfoundland students in undergraduate and graduate degree programs;
4. Custom-designed language and culture programs for schools, universities, or businesses. These can be developed on contract and are either for general learning purposes or to suit the needs of specific disciplines or professions; and
5. Twelve-week non-credit Intensive English Programs which are offered year-round on a semesterized basis.

Information regarding the above services is available from the Director of English as a Second Language Programs at Memorial University of Newfoundland. Information regarding the Intensive English Programs is provided below.

13.7.1 Intensive English Program
Memorial University of Newfoundland's full-time, non-credit Intensive English Program (IEP) is designed to improve English language skills for academic, professional and personal purposes. Reading, writing, speaking and listening skills are covered, and workshops on culture and social activities promoting integration with the local community also form part of the program.

The IEP is offered at intermediate to advanced levels in each of the Fall, Winter, and Spring terms. The program consists of two required courses: English as a Second Language 011F, Core Intensive English, and English as a Second Language 012F, Speaking, Listening, and Culture. Students admitted to the IEP must normally register for both courses each semester.

Students wishing to complete the Intensive English Program in preparation for admission to Memorial University of Newfoundland as undergraduate degree students may apply for this program at the same time as they apply for admission to undergraduate studies. Subject to General Academic Regulations (Undergraduate), Admission/Readmission to the University (Undergraduate), governing admission for undergraduate studies, and the regulations in place for admission to specific programs, students may be provisionally admitted for studies at an undergraduate level in an upcoming term if they are currently enrolled in the Intensive English Program. The General Academic Regulations (Undergraduate), Admission/Readmission to the University (Undergraduate), governing Admission/Readmission to this University, also contained in this Calendar, should be reviewed carefully by students as well.

Final admission for provisionally admitted students will be subject to successful completion of the Intensive English Program with an acceptable score on the Canadian Academic English Language (CAEL) Assessment. The CAEL Assessment is administered as part of the Intensive English Program at the end of each semester. Students enrolled in the Intensive English Program may be considered for enrolment in the Intensive English Bridge Program under the conditions described as the Admission requirements for that program.

Students at any level in the program may take the CAEL Assessment at the end of each semester. The number of semesters of Intensive English study required to achieve a student's desired level of proficiency will vary according to his or her initial proficiency level and individual progress rate.

13.7.1.1 Admission Requirements
Applicants to the Intensive English Program:
1. must be at least 18 years old, and
2. must hold a valid high school diploma, and
3. should have an elementary level of English proficiency.

Applications for the Intensive English Program are available at www.mun.ca/esl.

13.7.1.2 Program Requirements
1. Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Director of English as a Second Language programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll in the IEP in the following semester.
2. Evaluation of students may include, but not be limited to, any or all of the following: projects, assignments, quizzes, oral presentations, and class participation.

13.7.2 Intensive English Bridge Program (IEBP)
The Intensive English Bridge Program (IEBP) is intended for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students and who are students in the advanced level of the Intensive English Program (IEP). It requires ten to fifteen hours of classroom language instruction in reading, writing, grammar, and listening. The emphasis is on English for Academic Purposes. Students in this program may register concurrently for an undergraduate credit course pre-determined by the Director of English as a Second Language Programs.

13.7.2.1 Admission
Students for the Intensive English Bridge Program must have:
1. been provisionally accepted to undergraduate studies at Memorial University of Newfoundland;
2. achieved an average of Band 40 in the CAEL with a Writing sub-score of at least 40, a paper-based TOEFL score of 520, a
computer-based TOEFL score of 190, an IBT TOEFL score of 68, or an IELTS score of 5.5 with no sub-score less than 5; and
3. achieved a grade of "C" or better with a satisfactory attendance level (90%) in both ENGS 011F and ENGS 012F if enrolled in the
Intensive English program in the previous semester.
A student may be considered as a candidate for the Intensive Bridge Program under the following conditions:

13.7.2.2 Program Requirements
1. Students admitted to the Intensive English Bridge Program must register for the course English as a Second Language 011F.
2. Students in this program may normally register for no more than one credit course, pre-determined by the Director of English as a
Second Language Programs.
3. Students may register in the Intensive English Bridge Program for a maximum of two semesters.
4. Full participation is an essential part of the language learning process in this program. For this reason regular attendance is required.
   No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Director of English
   as a Second Language programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll
   in the IEBP in the following semester.

13.8 Folklore
www.mun.ca/folklore
The discipline of Folklore is a diverse examination of informal culture. Its subjects include stories, music, dance, drama, architecture,
material culture, celebrations and patterns of belief, as well as customs related to work, leisure, childhood, family, aging, individuality and
community.
Folklore explores these customs as dynamic relationships between old ideas and new, individual creation and collective acceptance,
local and global influences. And because folklore concerns the everyday, intimate practices of people, ethnographic field research is a
vital part of its practice.
Folklore course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions,
Folklore and are designated by FOLK.

13.8.1 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a
departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the
Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts
General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor
of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours
programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.
A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of
Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor
of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before
completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social
Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.8.2 General Degree
Folklore 1000 is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060, and those courses cross-listed
with other Departments.

13.8.3 Major in Folklore
A student registered to major in Folklore must take a minimum of 36 credit hours in courses as follows:
1. 18 required credit hours: 1000 (or the former 2000), 2100, 2300, 2401, 2500, 4470;
2. 6 credit hours from Group A - Folk Literature Genres: 3100, 3200, 3250, 3300, 3450, 3612, 3618;
3. 6 credit hours from Group B - Folklife Genres: 3001, 3350, the former 3591, 3606, 3650, 3700, 3713, 3820, 3830, 3850, 3860, 3870,
   4460; and
4. 6 credit hours from Group C - Topics: not more than 3 of which can be taken from courses at the 1000 level: 1060, 2230, 2700,
   3350, 3360, 3460, the former 3591, 3601, 3613, 3618, 3700, 3714, the former 3900, 3910, 3920, 3930, 3950, 4015, 4100, 4310,
   4400, 4410, 4420, 4440, 4480, 4810.
Students who declare a major in Folklore should have completed Folklore 1000 (or the former 2000); it is recommended that students
intending to major in Folklore take Folklore 2100 as early in their programs as possible.
All students who major in Folklore will be assisted by a faculty advisor who will help them in planning their academic program.
Consequently, it is essential that students consult with the Department at an early stage in their studies.

13.8.4 Minor in Folklore
A student declaring a minor in Folklore must take a minimum of 24 credit hours including:
1. 15 required credit hours: 1000 (or the former 2000), 2100, 2300, 2401, 2500; and
2. 9 additional credit hours in Folklore - not more than 3 of which can be taken from courses at the 1000 level.
Students who declare a minor in Folklore should have completed Folklore 1000 (or the former 2000); it is recommended that students
intending to minor in Folklore take Folklore 2100 as early in their programs as possible.

13.8.5 Honours Degree in Folklore
See General Regulations for Honours Degree. An Honours student in Folklore must complete a minimum of 60 credit hours, which
must include at least 36 credit hours at the 3000-level or above, and including the 36 as prescribed for the Major in Folklore. The
remaining courses will normally include one of the following options:
1. Folklore 400X
2. Folklore 4998
Faculty of Humanities and Social Sciences 2017-2018

3. Folklore 4999

13.8.6 Joint Honours Degree in Folklore and Another Major Discipline
See General Regulations for Honours Degrees. A minimum of 84 credit hours in the two subjects selected, with the approval of the Heads of both Departments, is required.

Of the credit hours required in the two subjects selected, not fewer than 42, and not more than 51, must come from each discipline. The student may choose the discipline in which to complete the Honours Essay or the Comprehensive Examination. If the student chooses the 400X option, the Folklore component will consist of the major in Folklore plus 400X, for a maximum of 51 credit hours in Folklore. Students are advised to choose an option as soon as possible after declaring the second subject of the Joint Honours degree.

13.8.7 Regulations for the International Bachelor of Arts (IBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Folklore, students may elect to complete requirements for the International Bachelor of Arts (IBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Folklore to jointly satisfy other requirements of the IBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (IBA) (First 60 Credit Hours), and to consider Folklore courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Folklore IS courses may be used towards the International Studies (IS) Courses Requirement.

13.8.8 Certificate in Newfoundland and Labrador Studies
The Department of Folklore administers the Certificate in Newfoundland and Labrador Studies. Credit hours in Folklore may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see Certificate Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.9 Gender Studies
www.mun.ca/genderstudies

13.9.1 Department of Gender Studies Description
Gender Studies is an academic area of study that critically examines how gender shapes our identities, our social interactions and our world. Through exposure to interdisciplinary perspectives, students develop frameworks for thinking about power relations and the ways that those relations are shaped and challenged by intersecting constructions of gender, race, class, sexuality, ability, age and nationality. Gender Studies examines everyday experiences, social and political institutions, literary and philosophical contributions, and historical and contemporary issues and events. The discipline provides students with tools to engage with and critically analyze these areas.

Gender Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Gender Studies and are designated by GNDR.

13.9.2 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.9.3 Major Program Regulations
Students declaring a Major in Gender Studies should consult the Head of the Department regarding course selection.

The Major Program in Gender Studies consists of a minimum of 36 credit hours. The following courses are required:
1. Gender Studies 1000, Gender Studies 2005, Gender Studies 3000, one of Gender Studies 3005, or Gender Studies 3025, and Gender Studies 4000.
2. A minimum of 21 credit hours from the Gender Studies Electives Courses Table outlined below, selected from at least three different subject areas.
3. One of these courses may be a selected topics or directed readings course in any subject relevant to the major program.
4. A selected topics or directed readings course included in the student’s major program must be approved in advance by the Committee on Undergraduate Studies on the recommendation of the Head of the Department.

13.9.4 Minor Program Regulations
Students who minor in Gender Studies shall complete a minimum of 24 credit hours in courses which shall include the following:
1. Gender Studies 1000, Gender Studies 3005 or 3025, and Gender Studies 4000.
2. A minimum of 15 credit hours in courses from Table 1 Gender Studies Elective Courses outlined below taken in at least three different subject areas. Gender Studies courses that are not required for the Minor, but that have a Gender Studies (GNDR) designation can be counted as Minor Elective Courses in one subject area. One of these courses may be selected topics or directed reading.
3. A selected topics course or directed readings course included in the student’s minor program must be approved in advance by the Committee on Undergraduate Studies on the recommendation of the Head of the Department.
4. Not more than 3 credit hours in courses in the students major Program may be used to satisfy the requirements of the minor in Gender Studies.
13.9.5 Elective Courses

Normal prerequisites and waiver policies in the respective departments will apply. Some courses may not be offered on a regular basis. Students should consult the appropriate department(s) for scheduling information.

13.9.6 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Major or Minor in Gender Studies, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Gender Studies to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider Gender Studies courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Gender Studies IS courses may be used towards the International Studies (IS) Courses Requirement.

13.10 Geography

www.mun.ca/geog

13.10.1 Department of Geography Description

Geography focuses on people, environments, and their interactions from local to global scales, integrating numerous physical and social sciences. As a spatial discipline, geographers study distributions and relationships among all natural and human features of Earth: climate, landscapes, populations, resources, and communities. Key questions that interest us include: Are we using resources sustainably? What are the impacts of changing environments on communities? How can we interpret the spatial distribution of economic, political and social activity? Memorial University of Newfoundland’s Geographers are planners, researchers, educators, and decision makers focused on questions relevant to all life on Earth.

The following undergraduate programs are available in the Department of Geography:

1. Major in Geography (B.A. or B.Sc.)
2. Honours in Geography (B.A. or B.Sc.)
3. Minor in Geography
4. Joint Programs
5. Focus Area in Geography
6. Diploma in Geographic Information Sciences

Geography course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Geography and are designated by GEOG.

13.10.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations – General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.10.3 Major in Geography (B.A. or B.Sc.)

1. Students may complete a Major in Geography as part of either a B.A. or B.Sc. program. See the Regulations for the General Degree of Bachelor of Arts and Regulations for the General Degree of Bachelor of Science degrees as appropriate.
2. All students who major in Geography shall consult with their assigned faculty advisor, or the Head of the Department, who will help them in planning their academic program. For this purpose, it is essential that students declare their major at an early stage of their studies.
3. The Major in Geography consists of 45 credit hours in Geography courses including:
   a. 1050, or the former 1000 & 1001, or 1010 & 1011;
   b. 2001, 2102, 2195, 2226, 2302, 2425;
   c. 3222, 3226;
   d. 9 credit hours from courses at the 3000-level;
   e. at least 9 credit hours chosen from courses at the 4000-level; and
   f. further credit hours in courses at the 3000-level or above, to fulfill the required 45 credit hours in Geography courses.
4. B.Sc. students must complete 15 credit hours in science courses outside Geography at the 2000-level or above.
13.10.4 Honours in Geography (B.A. or B.Sc.)
1. Students intending to take an Honours degree in Geography must apply for entry to the Honours program through the Office of the Registrar.
2. Students accepted in the Honours program must:
   a. comply with the Regulations for the Honours Degree of Bachelor of Arts or Regulations for the Honours Degree of Bachelor of Science as appropriate; and
   b. arrange their program in consultation with the Head of the Department.
3. For the Honours Degree, a student will be required to have completed at least 60 credit hours in courses in Geography, including:
   a. 45 credit hours in courses as listed under Major in Geography;
   b. Geography 3230, 4990 and 4999; and
   c. 6 additional credit hours at the 4000-level.

13.10.5 Minor in Geography
The Minor in Geography consists of 24 credit hours in Geography courses, including:
1. 1050, 2001, 2102, 2195, 2302, 2425; and 6 credit hours in electives taken from Geography courses at the 3000- or 4000- level, or
2. the former 1000 and 1001, or 1010 and 1011; 2001, 2102, 2195, 2302, 2425; and 3 credit hours in electives taken from Geography courses at the 3000- or 4000- level.

13.10.6 Joint Programs
Regulations for the Joint Honours in Computer Science and Geography, Joint Honours in Geography/Earth Sciences, and Joint Major in Computer Science and Geography are found under the heading Joint Programs in the entry for the Faculty of Science.

13.10.7 Regulations for the International Bachelor of Arts (iBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Geography, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Geography to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider Geography courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Geography IS courses may be used towards the International Studies (IS) Courses Requirement.

13.10.8 Focus Area in Geography - Bachelor of Education (Primary/Elementary)
The focus area in Geography is applicable only to the Bachelor of Education Primary/Elementary degree programs offered by the Faculty of Education. See Focus Areas under the Faculty of Education for program details.

13.10.9 Diploma in Geographic Information Sciences
The Department of Geography administers the Diploma in Geographic Information Sciences. Credit hours in Geography may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see Diploma Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.11 History
www.mun.ca/history

13.11.1 Department of History Description
History is the study of past societies through the critical examination of available evidence including texts, words and objects. The Department of History offers students the opportunity to study both the distant and recent past by exploring a variety of different topics and themes. The analytical skills integral to studying history - essentially how people interacted with one another and their built and natural environments - provide students with opportunities to develop critical thinking and writing proficiencies in addition to an appreciation of past cultures and societies.

History course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, History and are designated by HIST.

The following programs are offered in the Department of History:
1. Major in History
2. Minor in History
3. Specialization in Maritime History
4. Honours in History

13.11.2 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before
13.11.3 General Degree
1. Students should consult the Regulations for the General Degree of Bachelor of Arts in addition to the regulations listed below.
2. Any one of History 1005, 1009-1015 forms the introduction to the practice of history. Third and fourth-year students taking History courses as electives or to satisfy Regulations for the General Degree of Bachelor of Arts are encouraged to enrol in the Department's second-year courses.
3. All students who Major in History will be assisted by a faculty advisor who will help them in planning their academic programs. It is essential that students register with the Department at an early stage of their studies.

13.11.3.1 Major in History
Students who undertake a Major in History must complete 36 credit hours in History, including:
1. 3 credit hours in a course beginning with the initial digit '1'. Only one first-year course may be used to meet the Major requirements in History. However, a Major may use subsequent first-year History courses as Humanities and Social Sciences electives for the B.A.;
2. at least 12 credit hours in courses with the initial digit '2' including either History 2200 or 2210;
3. at least 9 credit hours in courses with the initial digit '2' should be completed before registering in a course with the initial digit '3'. Students should pay particular attention to necessary prerequisites when scheduling courses. In addition, students should obtain advice on the appropriate courses from their faculty advisor;
4. at least 9 credit hours in courses with the initial digit '3' including History 3840;
5. History 3840 for which there is a prerequisite of 12 credit hours in History;
6. at least 3 credit hours in courses with the initial digit '3' should be completed before registering in a course with the initial digit '4';
7. at least 6 credit hours in courses with the initial digit '3'. Some fourth-year courses may require completion of courses in the same topic/subject area. Prerequisites may be waived at the discretion of the instructor; and
8. 6 additional credit hours in courses with an initial digit beyond '1'.
No more than 15 transfer credit hours in History may be used to fulfill the requirements for a Major in History.

13.11.3.2 Minor in History
Students who undertake a Minor in History must complete 24 credit hours in History, including:
1. 3 credit hours in a course beginning with the initial digit '1'. Only one first-year course may be used to meet the Minor requirements in History. However, a Minor may use subsequent first-year History courses as Humanities and Social Sciences electives for the B.A.;
2. at least 9 credit hours in courses with the initial digit '2';
3. at least 6 credit hours in courses with the initial digit '2' should be completed before registering in a course with the initial digit '3';
4. at least 6 credit hours in courses with the initial digit '3';
5. at least 3 credit hours in courses with the initial digit '4'. Some fourth-year courses may require completion of courses in the same topic/subject area. Prerequisites may be waived at the discretion of the instructor; and
6. 3 additional credit hours in courses with an initial digit beyond '1'.
No more than 9 transfer credit hours in History may be used to fulfill the requirements for a Minor in History.

13.11.3.3 Specialization in Maritime History
The Department of History offers a specialization in Maritime History. Recommended courses include History 2100, History 2110, History 3680, History 3690, and 6 credit hours from History 4670-4690.

13.11.4 Honours Degree
The Honours Degree in History is a rigorous and rewarding program of study for History Majors interested in developing a piece of independent research and writing. Honours students in History develop many of the necessary skills and preparation for graduate school, law school, or work in the heritage sector.
1. Students intending to take an Honours Degree with a Major in History must comply with the Regulations for the Honours Degree of Bachelor of Arts.
2. Students are required to complete at least 60 credit hours in History according to the following pattern, of which there must be a minimum of 36 credit hours at the 3000-level or above:
   a. 36 credit hours chosen in accordance with the pattern set out under the Major in History above; and
   b. 12 additional credit hours in History electives beyond the first-year level and 12 credit hours in Honours courses: History 4800, 4821, 4822, and 4999.
3. Applicants must apply by June 30th for the Fall semester and by November 1st for the Winter semester in order to be considered for admission. Applications received after June 30th will be considered for the Winter semester and applications received after November 1st will be considered for the next Fall semester. Students intending to complete an Honours degree in History will be assisted by a faculty advisor in planning their academic programs. The academic programs for Honours students must be approved by the Head of the Department or delegate.
4. Students electing Joint Honours are required to complete at least 51 credit hours in History according to the following pattern:
   a. 36 chosen in accordance with the pattern set out under the Major in History above;
   b. History 4800 and 4821;
   c. 3 additional credit hours in History electives beyond the first-year level; and
   d. if the student chooses to write the Honours Essay in History, the student must complete History 4822 and History 4999; or
   e. if the student chooses to write the Honours Essay in another Department, the student does not need to complete History 4822 and History 4999. However, these courses must be replaced with 6 additional credit hours in History electives at the third-year level or above.
Faculty of Humanities and Social Sciences 2017-2018

5. The minimum grades required are:
   a. 70% on each of the prescribed courses beyond the first-year level or an average of 75% on those courses; and
   b. 70% or higher in History 4999.

6. No more than 27 transfer credit hours may be included in the minimum 60 credit hours required for the Honours degree in History.

13.11.5 Regulations for the International Bachelor of Arts (iBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of an Honours, Major or Minor in History, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in History to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider History courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in History IS courses may be used towards the International Studies (IS) Courses Requirement.

13.12 Linguistics
www.mun.ca/linguistics

13.12.1 Department of Linguistics Description
Linguistics is the scientific study of language, including language structure, language variation, language change, the development of language and the psychology and biology of language.

The Department of Linguistics prides itself on maintaining strong links between teaching and research, with emphasis on data-driven, theoretically informed inquiry into aboriginal languages, language variation and change and language acquisition. Students are invested into the community of linguistic scholars through active engagement in primary research, supported by unique and extensive in-house data archives, broad library holdings and state-of-the-art labs and analytical tools. Strong relations with robust local speech communities enhance our research and our teaching. Memorial University of Newfoundland's Department of Linguistics is the only department of Linguistics in Atlantic Canada, and the largest department east of Quebec City.

The following undergraduate programs are offered in the Department of Linguistics:
1. Major in Linguistics
2. Minor in Linguistics
3. Honours in Linguistics
4. Joint Honours in Linguistics information is under Honours in Linguistics.

In addition to meeting the regulations below, a student must also meet UNIVERSITY REGULATIONS.

Linguistics course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Linguistics and are designated by LING.

13.12.2 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.12.3 Major in Linguistics
The General Major in Linguistics requires twelve courses, 36 credit hours. When planning the program of study, a student is encouraged to follow the pattern outlined in Table 1 Suggested Course Sequence for Major in Linguistics in order to proceed smoothly in the program.

1. Students majoring in Linguistics must complete 36 credit hours in Linguistics, which must include the five courses numbered LING 1100, 1103, 1104, 3100, 3201 plus 21 credit hours in courses chosen from Linguistics 1105, 2060, 2210, 2212, 2220, 2300, 3000, 3104, 3105, 3150, 3155, 3210, 3302, 3310, 3311, 3500, 3850, 3950-3960, 4010-4091, 4100, 4110, 4150, 4151, 4201, 4202, 4210, 4400, 4420, 4421, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4950-4960. Of these 21 credit hours, 9 must be at the 4000 level.

2. Designated Language Study courses offered may not be used towards a Major, Minor, or Honours in Linguistics.

3. In addition to meeting the Major in Linguistics requirements students must also meet the Bachelor of Arts Degree Requirements.

A student is encouraged to consider the Honours or Joint Honours in Linguistics outlined under Honours in Linguistics.

| 2 - 3| LING 3100, 3201 | two or three other 3000-level LING | |
| 4    | 3000- and 4000- level LING courses | | |

With the exception of LING 1100 all other Linguistics courses are offered, other than language courses, during the Fall and Winter
13.12.4 Minor in Linguistics

The General Minor in Linguistics requires eight courses, 24 credit hours. When planning the program of study, a student is encouraged to follow the pattern outlined in Table 2 Suggested Course Sequence for Minor in Linguistics in order to proceed smoothly in the program.

1. The following courses are required: Linguistics 1100, 1103 and 1104; any two courses from the following list: Linguistics 3000, 3100, 3104, 3201, 3500, 3850; and an additional 9 credit hours selected from: Linguistics 1105, 2060, 2210, 2212, 2220, 2300, 3000, 3100, 3104, 3105, 3150, 3155, 3201, 3210, 3302, 3310, 3311, 3500, 3850, 3950-3960, 4010-4091, 4100, 4110, 4150, 4151, 4201, 4202, 4210, 4400, 4420, 4421, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4950-4960.

2. In addition to meeting the Minor in Linguistics requirements students must also meet the Bachelor of Arts Degree Requirements. A student is encouraged to consider the Major or Honours in Linguistics outlined under Major in Linguistics and Honours in Linguistics.

</tr>
<tr>
<td>4</td>
<td>two other LING courses</td>
<td></td>
</tr>
</tbody>
</table>

With the exception of LING 1100 all other Linguistics courses are offered, other than language courses, during the Fall and Winter semesters only.

13.12.5 Honours in Linguistics

The Honours in Linguistics requires twenty courses, 60 credit hours and the joint Honours requires sixteen courses, 48 credit hours. When planning the program of study, a student is encouraged to follow the pattern outlined in Table 3 Suggested Course Sequence for Honours in Linguistics in order to proceed smoothly in the program.

1. In addition to meeting the requirements below students must also meet the Faculty of Humanities and Social Sciences Honours regulations outlined under Bachelor of Arts (Honours) Degree Regulations.

2. An Honours degree in Linguistics must include 60 credit hours in Linguistics courses, including at least 36 credit hours at the 3000-level or above, of which the following are required: Linguistics 1100, 1103, 1104, 2210, 3000, 3100, 3201, 3210, 3500, 3850, 4100 (or 4110), 4201 (or 4202), 4999, and at least one of Linguistics 4010-4091, 4150, 4210, 4500, 4700, 4950-4960. Students should choose courses in consultation with their Honours Essay supervisor, to ensure that the needs and interests of the individual student are met, and to take into account the availability of courses which the Department is able to offer.

3. Linguistics may also be combined with another subject or subjects to constitute a Joint Honours degree. The required courses listed above for the Honours degree, except for Linguistics 4999, are also required for any Joint Honours degree in Linguistics. A total of 48 credit hours in Linguistics, which may include Linguistics 4999, is required for Joint Honours in Linguistics. Students should consult their Department of Linguistics advisor to ensure that they select courses which complement their other Honours Subject of Specialization.

4. In addition to meeting the Honours in Linguistics requirements students must also meet the Bachelor of Arts Degree Requirements.

With the exception of LING 1100 all other Linguistics courses are offered, other than language courses, during the Fall and Winter semesters only.

13.12.6 Regulations for the International Bachelor of Arts (IBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Linguistics, students may elect to complete requirements for the International Bachelor of Arts (IBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Linguistics to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 48 credit hours of the Bachelor of Arts.
Mathematics and Statistics
For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar.
The following undergraduate programs are available in the Department of Mathematics and Statistics:
1. Applied Mathematics Honours (B.Sc. only)
2. Applied Mathematics Major (B.Sc. only)
3. Applied Mathematics and Chemistry Joint Honours (B.Sc. only)
4. Applied Mathematics and Computer Science Joint Major (B.Sc. only)
5. Applied Mathematics and Economics Joint Major (B.Sc. only)
6. Applied Mathematics and Physics Joint Honours (B.Sc. only)
7. Applied Mathematics and Physics Joint Major (B.Sc. only)
8. Biology and Statistics Joint Honours (B.Sc. only)
9. Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
10. Computer Science and Pure Mathematics Joint Major (B.Sc. only)
11. Computer Science and Statistics Joint Honours (B.Sc. only)
12. Computer Science and Statistics Joint Major (B.Sc. only)
13. Economics and Pure Mathematics Joint Major (B.Sc. only)
14. Economics and Statistics Joint Major (B.Sc. only)
15. Economics (Co-operative) and Statistics Joint Major (B.Sc. only)
16. Mathematics Minor
17. Pure Mathematics Honours
18. Pure Mathematics Major
19. Pure Mathematics and Statistics Joint Honours
20. Statistics Honours
21. Statistics Major
22. Statistics Minor

Modern Languages, Literatures and Cultures
www.mun.ca/languages

Department of Modern Languages, Literatures and Cultures Description
The Department of Modern Languages, Literatures and Cultures (MLLC) is a multidisciplinary department that is rooted in the traditions of four major European and world languages (French, German, Russian, and Spanish), as well as in Canada’s own French language and culture. The Department's mission is to advance the linguistic and cultural competencies of students in one or more modern languages. Mastering another language not only includes speaking and writing proficiency in the target language, but also increasing one’s appreciation and critical analysis of the literatures and cultures that share that language. The Department is home to most of the courses offered in the Faculty of Humanities and Social Sciences that study actively spoken languages, including Irish Gaelic, Italian, and Japanese. These complement ancient language courses that are offered principally by the Department of Classics and by the Department of Religious Studies. The Department of Linguistics offers courses in First Nations and Inuit languages.
The following undergraduate programs are offered in the Department of Modern Languages, Literatures and Cultures:
1. French Major
2. French Major for Francophones
3. French Minor
4. French Minor for Francophones
5. Honours Degree in French
6. Joint Honours in French
7. Frecker program in French Immersion
8. Canadian Third Year In Nice
9. Université de Bretagne Sud (UBS)
10. German Major
11. German Minor
12. German Studies Minor
13. Honours Degree in German
14. Russian Language and Literature Major
15. Russian Language and Literature Minor
16. Spanish Major
17. Spanish Minor
13.14.2 French

 Native speakers of French and students with near-native fluency will not normally receive credit for courses taken at the first year level in their native language nor will they be allowed to challenge for credit at the first year level. Such students shall consult the Department to be placed at the appropriate level.

 French course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, French and are designated by FREN.

13.14.2.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.14.2.2 French Major Program

Students completing a French Major Program, depending on the student’s program and point of entry into the program, may wish to follow Table 1 Course Pattern for Major in French, On-Campus (Entry Point FREN 1500), Table 2 Course Pattern for Major in French, On-Campus (Entry Point FREN 2100, or Table 3 Course Pattern for Major in French, Study-Away Option below.

1. Students who choose French as their Major must complete at least 42 credit hours in French, including:
   a. No more than 6 credit hours at the 1000 level;
   b. 2100 and 2101;
   c. 2300;
   d. At least 6 credit hours chosen from 2601, 2602 and 2900;
   e. 3100 and 3101;
   f. At least 6 credit hours chosen from 3500, 3501, 3502, 3503, 3504, 3506, 3507, 3508;
   g. At least 6 credit hours at the 4000 level; and
   h. An extra 3 credit hours at the 2000 level or above.

2. Between their first registration at Memorial University of Newfoundland and the time of their graduation, all students majoring in French must have spent at least eight weeks at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. Students are strongly encouraged to fulfill the requirement early in their program in order to get the greatest benefit from the immersion experience. Students should consult the Head of the Department before the end of their second year of study (60 credit hours) for help in selecting the immersion experience most appropriate for their circumstances. Every reasonable effort will be made to accommodate students who, for personal or professional reasons, are unable to fulfill the immersion requirement.

3. No more than 12 transfer credit hours may be used to fulfill the minimum requirements of the Major in French as outlined under Transfer Credit for Language Courses.

4. It is strongly recommended that students in the Major program complete Classics 1120.

The Study-Away Option may include a summer bursary program. Information regarding bursary programs is available at www.ed.gov.nl.ca/edu/k12/french/bursaries.html.

### 13.14.2.3 French Minor Program

1. Students who choose French as their Minor must complete at least 24 credit hours in French, including:
   a. 2100 and 2101
   b. 3100 or 3101
2. No more than 6 credit hours at the 1000 level may be used to fulfill the minimum requirements of the Minor in French.
3. Between their first registration at Memorial University of Newfoundland and the time of their graduation, all students minoring in French must have spent at least four weeks at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. Students are strongly encouraged to fulfill the requirement early in their program in order to get the greatest benefit from the immersion experience. Students should consult the Head of the Department before the end of their second year of study (60 credit hours) for help in selecting the immersion experience most appropriate for their circumstances. Every reasonable effort will be made to accommodate students who, for personal or professional reasons, are unable to fulfill the immersion requirement.
4. No more than 6 transfer credit hours may be used to fulfill the minimum requirements of the Minor in French as outlined under Transfer Credit for Language Courses.

### 13.14.2.4 Honours Degree in French

In addition to the following regulations students are advised to see the General Regulations for Honours Degrees.

1. An Honours degree in French shall consist of at least 60 credit hours in French, including:
   a. no more than 6 credit hours at the 1000 level;
   b. 2100 and 2101;
   c. 2300;
   d. at least 6 credit hours chosen from 2601, 2602 and 2900;
   e. 3100 and 3101;
   f. at least 6 credit hours chosen from 3500, 3501, 3502, 3503, 3504, 3506, 3507, 3508;
   g. a minimum of 15 credit hours at the 4000 level including French 4900 and 4999; and
h. an extra 6 credit hours at the 2000 level or above.

2. Between their first registration at Memorial University of Newfoundland and the time of their graduation, all students completing the Honours program in French must have spent at least two semesters at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. Every reasonable effort will be made to accommodate students who, for personal or professional reasons, are unable to fulfill the immersion requirement. Students are strongly encouraged to fulfill the requirement early in their program in order to get the greatest benefit from the immersion experience. Students should consult the Head of the Department before the end of their second year of study (60 credit hours) for help in selecting the immersion experience most appropriate for their circumstances.

3. No more than 24 transfer credit hours may be used to fulfill the minimum requirements of the Honours program in French as outlined under Transfer Credit for Language Courses.

4. Classics 1120 may be substituted for 3 credit hours in French.

13.14.2.5 Joint Honours

1. French may be combined with any other subject approved in the General Regulations to form a Joint Honours program. Students will establish their program in consultation with the Heads of the Departments of their chosen Honours subjects.

2. The Joint Honours program in French shall include at least 51 credit hours in French including the same requirements as the French Major.

3. Classics 1120 may be substituted for 3 credit hours in French beyond the first-year level.

4. By the time of their graduation, all students completing the Joint Honours program in French must have spent at least two semesters at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment.

5. No more than 18 transfer credit hours may be used to fulfill the minimum requirements of the Joint Honours program in French as outlined under Transfer Credit for Language Courses.

13.14.2.6 Transfer Credit for Language Courses

1. Students who successfully complete French language programs offered by recognized universities and colleges in Canada and elsewhere may apply to have their courses evaluated for equivalent Memorial University of Newfoundland credit. To do so, they must follow such procedures as may be specified by the Office of the Registrar; they may also be required to sit a placement test administered by the Department of Modern Languages, Literatures and Cultures. The result achieved on this placement test will influence any determination of the number and level of transfer credits to be awarded.

2. Students intending to participate in a summer language bursary program or the Student Fellowship Programs are particularly advised to consult the Head of the Department of Modern Languages, Literatures and Cultures before beginning such a program. All students intending to request transfer of credit are strongly advised to obtain a Letter of Permission from the Office of the Registrar before registering for any course of study offered by another institution.

3. In any event, no more than 9 transfer credit hours in French at the first-year level, and 18 at the second-year level, may be granted to any student.

4. See specific program regulations for restrictions placed on the maximum number of transfer credit hours applicable to the Minor, Major, Honours and Joint Honours programs. Students who have spent an extended period of time studying French in a francophone milieu may discuss with the Head of the Department the suitability of seeking permission from the Committee on Undergraduate Studies to transfer up to a maximum of 3 additional credit hours.

13.14.2.7 Frecker Program

1. The Frecker Program is a one-semester immersion program offered by Memorial University of Newfoundland in St-Pierre. Students who successfully complete this program will receive 15 credit hours in French as specified in clause 5. below. All students will board with French families and will participate in extra-curricular activities designed to take full advantage of the French milieu.

2. Students wanting to complete the Frecker Program may wish to follow Table 4 Course Pattern for Major in French, Frecker Program (Entry Point FREN 1501) below.

3. The minimum prerequisites for admission to the program are successful completion of French 1502 and permission of the Head of the Department following written application. Admission to the program will be on a competitive basis and will depend on marks obtained in French courses at Memorial University of Newfoundland and on instructors’ recommendations.

4. The cost of room and board is partially subsidized by the Federal Government Bursary Program in the case of residents of Newfoundland and Labrador. (A limited number of non-bursary students may be admitted to the program.)

5. Students who are admitted to this program will register for French 2100, 2101, 2300, 2900, and 2602.

### 13.14.2.8 Canadian Third Year in Nice Program

Memorial University of Newfoundland is a member of a consortium of Canadian universities (with Guelph University, University of Toronto, University of Western Ontario, University of Windsor), which offer the Canadian Third Year in Nice Program. This program enables students to spend a full academic year studying at the Université de Nice-Sophia Antipolis in the South of France. Canadian Students participating in this program are accompanied by a faculty member from one of the Canadian universities participating in the program. This person teaches two of the five courses which students complete each semester in Nice, the other three being chosen from the offerings of the Université de Nice. Specific Memorial University of Newfoundland transfer credits are awarded for successful completion of the courses taught by the Canadian coordinator and specified and/or unspecified credits are awarded for the courses offered by the Université de Nice. All courses completed under this program will be offered outside the normal time frame for courses offered at Memorial University of Newfoundland. Fall semester courses will be completed between October and January each year, Winter semester courses between February and May. This follows the time frame of Sessions I and II at the Université de Nice-Sophia Antipolis. Students should consult the Head of the Department regarding course selection.

L’université Memorial fait partie du consortium des universités canadiennes qui offrent le programme Canadian Third Year in Nice (avec Guelph University, University of Toronto, University of Western Ontario, University of Windsor). Ce programme permet à des étudiants et étudiantes de passer une année académique à l’université de Nice-Sophia Antipolis dans le sud de la France. Les étudiant/e/s canadien/ne/s qui participent à ce programme sont encadrés par un/e professeur/e d’une des universités qui participent à ce programme. Chaque semestre, cette personne enseigne deux cours sur les cinq. Les trois autres cours sont choisis parmi les cours enseignés à l’université de Nice. Les cours de l’enseignant/e canadien/ne donneront droit à des crédits spécifiés, alors que les cours offerts à Nice donneront droit à de transfert crédits spécifiés et/ou non spécifiés. Le calendrier sera différent de celui de l’université Memorial: les cours d’automne auront lieu de septembre à janvier et ceux d’hiver de février à mai, suivant le calendrier des sessions I et II de l’université de Nice-Sophia Antipolis. Les étudiants et étudiantes doivent consulter la direction du département concernant le choix des cours.

Students wanting to complete the Frecker Program may wish to follow Table 5 Course Pattern for Major in French, Nice (Entry Point FREN 1501) below.

### 13.14.2.9 Université de Bretagne Sud (UBS)

The exchange program with the Université de Bretagne Sud (UBS) in Lorient, France, is a one semester immersion program (January to May) offered by Memorial University of Newfoundland at the third and/or fourth year level. Specified and/or unspecified Memorial University of Newfoundland transfer credits are awarded for successful completion of the courses taken at UBS.

Le programme d’échanges avec l’université de Bretagne Sud à Lorient, France, est un programme d’immersion d’un semestre aux niveaux de la troisième et/ou de la quatrième année. Les cours suivis à l’UBS donneront droit à des crédits de transfert spécifiés et/ou non spécifiés de Memorial University of Newfoundland.

### 13.14.2.10 Regulations for the Major In French for Francophones

The Major in French for Francophones is offered to students who have resided in a Francophone milieu and who have an advanced comprehension of the French language beyond what is acquired in a high school French immersion program. Admission to the program is normally restricted to students who have completed a minimum of 3 years in a French speaking high school while residing in a Francophone community, duly authenticated in writing. (Equivalencies for Francophone students in other circumstances will be considered by the Faculty of Humanities and Social Sciences’ Committee on Undergraduate Studies upon a written recommendation from the Head of Department.)

Francophone students who choose French as their Major must complete at least 42 credit hours in French, including:

1. a minimum of 9 credit hours at the 2000-level including FREN 2101 and 2300 and a minimum of 3 credit hours to be chosen from FREN 2601 or 2602;
2. a minimum of 18 credit hours at the 3000-level including FREN 3100 and 3101 (or 3202 and 3203); a minimum of 6 additional credit hours chosen from FREN 3500, 3501, 3502, 3503, 3504, 3506, 3507, 3508;
3. a minimum of 12 credit hours at the 4000-level; and
4. an additional 3 credit hours at the 2000-level or above.

Notes:  
1. Francophone students cannot register for 1000-level French courses or for FREN 3300.
2. Francophone students are exempted from the requirement for the Study in a Francophone Milieu.
3. International students from countries where French is an official language are advised to contact the Undergraduate Student Advisor for assistance with course planning.
Faculty of Humanities and Social Sciences 2017-2018

13.14.2.11 Regulations for the Minor In French for Francophones

The Minor in French for Francophones is offered to students who have resided in a Francophone milieu and who have an advanced comprehension of the French language beyond what is acquired in a high school French immersion program. Admission to the program is normally restricted to students who have completed a minimum of 3 years in a French speaking high school while residing in a Francophone community. Duly authenticated in writing, (Equivalencies for Francophone students in other circumstances will be considered by the Faculty of Humanities and Social Sciences’ Committee on Undergraduate Regulations upon a written recommendation from the Head of Department.)

Students who choose French as their Minor must complete at least 24 credit hours in French, including:

1. a minimum of 15 credit hours at the 2000-level including FREN 2100 and 2101;
2. a minimum of 3 credit hours at the 3000-level including FREN 3100 or 3101; and
3. up to 6 additional credit hours at the 2000 level or above.

No more than 6 transfer credit hours may be used to fulfill the minimum requirements of the Minor in French as outlined under Transfer Credit for Language Courses.

Notes:
1. Francophone students cannot register for 1000-level French courses or for FREN 3300.
2. Francophone students are exempted from the requirement for the Study in a Francophone Milieu.
3. International students from countries where French is an official language are advised to contact the Undergraduate Student Advisor for assistance with course planning.

13.14.2.12 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in French, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in French to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider French courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in French IS courses may be used towards the International Studies (IS) Courses Requirement.

13.14.3 German

www.mun.ca/languages

German course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, German and are designated by GERM.

13.14.3.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.14.3.2 General Degree

All students who did not matriculate in German will begin their study with German 1000 or equivalent.

13.14.3.3 German Major Program

Students majoring in German must comply with the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) and arrange their program in consultation with the German Program Liaison. It is highly desirable that, during their course of study, all students majoring in German spend at least one semester of study in a German-speaking country.

Students who choose German as their Major must complete 36 credit hours in German, including:

1. German 1000, 1001, 2010, 2011, 2900 or 2901, 3010, 3011, 4010 or 4011, and
2. 12 credit hours in German at the 3000- or 4000-level.

13.14.3.4 German Minor Programs

1. German Minor: Students who choose German as their Minor must complete at least 24 credit hours in German, including:
   a. GERM 1000, 1001, 2010, 2011, 2510 or 3010; and
   b. 9 credit hours in German at the 2000-level or above.

   GERM 2030, 2031, 2900, 2901, the former 2910, 3000, 3001, 3002, 3003, 3005, the former 3902, 3911, 3912, 3913, 3914, 3915 and the Special Topics courses in German Studies may not be used as part of the Faculty of Humanities and Social Sciences Language Study (LS) Requirement.
2. **German Studies Minor**: In addition to the German Minor, a Minor in German Studies is also available consisting of a minimum of 24 credit hours in courses including:
   a. GERM 1000, 1001, 2010, 2011, 2900 or 2901;
   b. 9 credit hours taken in either additional courses in German and/or from cognate courses offered by other departments, such as History 3370, 3380, Philosophy 3850, 3851, 3860, to be chosen through prior consultation with the German Program Liaison; and
   c. not more than 3 credit hours in courses in the student’s major program may be used to satisfy the requirements of the minor in German Studies.

**Minor Program**

In addition to the German Minor, a Minor in German Studies is also available consisting of a minimum of 24 credit hours, a student may use eligible credit hours in German to jointly satisfy other requirements of the iBA degree. When selecting courses, students are required to complete a minimum of 60 credit hours in German according to the following pattern, of which there must be a minimum of 36 credit hours at the 3000-level or above:

1. 36 credit hours chosen in accordance with the pattern set out under the German Major Program;
2. German 4998 or 4999; and
3. an additional 21 credit hours, which must include German 4010 or 4011 and 4998 or 4999.

**Honours Degree in German**

Students intending to complete an Honours degree with a major in German must comply with the Bachelor of Arts (Honours) Degree Regulations. Students are required to complete a minimum of 60 credit hours in German according to the following pattern, of which there must be a minimum of 36 credit hours at the 3000-level or above:

1. 36 credit hours chosen in accordance with the pattern set out under the German Major Program;
2. 2 German 4998 or 4999;
3. an additional 21 credit hours, which must include German 4010 or 4011 and 4998 or 4999.

The minimum grades for the Honours program are:

1. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in German prescribed by the Department concerned; and
2. a grade of 70% or better must be obtained in the Honours essay and/or comprehensive examination.

**Joint Honours Degree in German**

Students who are completing a Joint Honours Degree in German will complete a minimum of 42 credit hours in German, including:

1. GERM 1000, 1001, 2010, 2011, 3010, 3011, 3900 and 3901;
2. 15 additional credit hours at the 3000-level or above, including GERM 4998 or 4999 if the student chooses to write the Honours Essay and/or comprehensive examination in German; and
3. 3 credit hours in GERM at the 2000-level or above.

The minimum grades for the Honours program are:

1. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in German prescribed by the Departments concerned; and
2. a grade of 70% or better must be obtained in the Honours essay and/or comprehensive examination.

**Regulations for the International Bachelor of Arts (iBA)**

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in German, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in German to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts.

**Russian Language and Literature**

www.mun.ca/languages

Russian language courses are normally taken in succession. The prerequisite for each course is successful completion of the preceding level, or with permission of the Head of the Department. There is no prerequisite for Russian 1000.

The courses in Russian literature, film and culture may not be used as part of the Faculty of Humanities and Social Sciences requirement of 6 credit hours in a second language.

Russian course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Russian and are designated by RUSS.

**Bachelor of Arts Degree Requirements**

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of
Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.14.4.2 Advising for Major and Minor Programs
Students interested in pursuing a major in Russian Language and Literature are advised to consult the Department very early in their undergraduate studies. For students specializing in Russian programs course selection is important to enter graduate school, teaching, library work, or government service. Students with advanced credit or competence in Russian will be placed at an appropriate level. Students are encouraged to consult with the undergraduate liaison. Students with prior knowledge of Russian may be granted transfer credit if that knowledge came from a recognized academic course. Russian courses may be challenged for credit with the permission of the Head of the Department.

13.14.4.3 Russian Language and Literature Major Program
A Major in Russian consists of a minimum of 36 credit hours in Russian courses including 1000, 1001, 2010, 2011 and 3010, as well as 6 credit hours in courses at the 4000-level. The remaining 15 credit hours comprise any combination of language, literature and culture courses.

13.14.4.4 Russian Language and Literature Minor Program
A Minor in Russian consists of a minimum of 24 credit hours in Russian including 12 credit hours in the following: Russian 1000, 1001, 2010, and 2011. The remaining 12 credit hours comprise any combination of language, literature and culture courses. Students should note that with the permission of the Head of the Department, up to 6 credit hours for certain courses with a strong Russian content which are offered by other departments may be counted towards major and minor specializations in Russian Language and Literature.

13.14.4.5 Regulations for the International Bachelor of Arts (IBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Russian, students may elect to complete requirements for the International Bachelor of Arts (IBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Russian to jointly satisfy other requirements of the IBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts.

13.14.5 Spanish
www.mun.ca/languages
Spanish course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Spanish and are designated by SPAN.

13.14.5.1 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.14.5.2 Spanish Major Program
A Major in Spanish consists of a minimum of 36 credit hours in Spanish chosen from the courses listed under the Spanish Course Descriptions. It is strongly recommended that students in the Spanish Major Program complete Classics 1120 and 1121.

13.14.5.3 Spanish Minor Program
A Minor in Spanish consists of a minimum of 24 credit hours in Spanish from the courses listed under the Spanish Course Descriptions.

13.14.5.4 Study Abroad Programs in Spanish
The Spanish section of the Department of Modern Languages, Literatures and Cultures offers students the opportunity of participating in Study Abroad programs in Spanish. These programs are designed to provide an intensive immersion experience in a Spanish-speaking country each summer. On successful completion of one of these programs, students will be awarded specific transfer credits applicable to their academic program at Memorial University of Newfoundland.

A Study Abroad program in Spanish will be offered each summer, provided that there is sufficient enrolment. All such courses will be offered outside the normal time frame for courses offered at Memorial University of Newfoundland.

Students will be required to register for either SPAN 2010/2020 or SPAN 3010/3020 in any one program. Students who are unsure whether they meet the prerequisites for SPAN 2010, 2020, 3010, 3020, or 6900 should consult the Program Liaison for Spanish.

13.14.5.5 Regulations for the International Bachelor of Arts (IBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Spanish, students may elect to complete requirements for the International Bachelor of Arts (IBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Spanish to jointly satisfy other requirements of the IBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts.
13.15 Philosophy

www.mun.ca/philosophy

13.15.1 Department of Philosophy Description

Philosophy is the study of general and fundamental problems concerning matters such as knowledge, truth, beauty, law, justice, mind, language, and the right and the good, using a critical, generally systematic approach relying on reasoned argument. Philosophy is one of the most influential of all areas of study, providing the frameworks in which one thinks and acts. Allowing one to make sense of self and surroundings, Philosophy teaches not what to think but how to think. The study of philosophy develops intellectual abilities. Beyond the knowledge and skills required for any particular profession, a good philosophical education enhances the capacity to participate responsibly and intelligently in public life.

The following undergraduate programs are available in the Department of Philosophy:

1. Major in Medieval Studies
2. Minor in Medieval Studies
3. Major in Philosophy
4. Minor in Philosophy
5. Honours in Philosophy

Philosophy courses may be taken singly as general Humanities and Social Sciences electives or as part of a Minor, Major, Honours or multidisciplinary program. Normally, Philosophy 1200 is a prerequisite for all philosophy courses at the 3000-level and above.

Philosophy course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Philosophy and are designated by PHIL.

13.15.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors are available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.15.3 Major Program

Students declaring a Major in Philosophy must choose a program advisor in consultation with the Head of the Department or Undergraduate Officer and the faculty member concerned.

The major program in Philosophy consists of a minimum of 36 credit hours in courses chosen in accordance with the following requirements:

1. Philosophy 1200, Philosophy 2000 or 2220, Philosophy 2210, Philosophy 2230 or 3400, Philosophy 2701 or 2702
2. 3 credit hours from Philosophy 3120 to 3620 (excluding Philosophy 3400 if previously completed to fulfill the requirements in 1. above).
3. 3 credit hours from Philosophy 3730-3790
4. 3 credit hours from Philosophy 3800-3851
5. 3 credit hours from Philosophy 3860-3890
6. 3 credit hours from the former Philosophy 3900-3950
7. 3 credit hours from the Philosophy 4700-4790 series
8. 3 credit hours from the Philosophy 4800-4890 series

13.15.4 Minor Program

Students declaring a Minor in Philosophy may choose to have a program advisor by mutual agreement with a member of the Philosophy Department.

The minor program in Philosophy consists of a minimum of 24 credit hours in courses which must be chosen in accordance with the following requirements:

1. Philosophy 1200, Philosophy 2000 or 2210 or 2220, Philosophy 2230 or 3400, Philosophy 2701 or 2702;
2. 3 credit hours from Philosophy 3120 to the former 3950 (excluding Philosophy 3400 if previously completed to fulfill the requirements in 1. above);
3. an additional 6 credit hours in Philosophy courses at the 3000-level or higher; and
4. 3 credit hours from 4000-level courses.

13.15.5 Honours Program

The full Honours program requires a minimum of 60 credit hours in Philosophy courses, which must include a minimum of 36 credit hours at the 3000-level or above; Joint Honours requires a minimum of 45 credit hours in Philosophy courses. These must include:

1. Philosophy 1200, Philosophy 2000 or 2220, Philosophy 2210, Philosophy 2230, Philosophy 3400, Philosophy 2701 or 2702;
2. 3 credit hours from Philosophy 3120 to 3620 (excluding Philosophy 3400 if previously completed to fulfill the requirements in 1. above);
3. 3 credit hours from Philosophy 3730-3790;
4. 3 credit hours from Philosophy 3800-3851;
5. 3 credit hours from Philosophy 3860-3890;
6. 3 credit hours from the former Philosophy 3900-3950;
7. 3 credit hours from the Philosophy 4700-4790 series;
8. 3 credit hours from the Philosophy 4800-4890 series;
9. an additional 3 credit hours in courses at the 4000-level;
10. either Philosophy 4998 or 4999;
11. candidates for Joint Honours must choose 4998;
12. candidates for full Honours may take 4999 only with permission of the Department; and
13. other Philosophy courses to a total of 60 credit hours for full Honours, 45 credit hours for Joint Honours.
14. Candidates for Joint Honours who elect to fulfill the honours requirement in the other discipline are not required to take the Comprehensive Examination. (See Bachelor of Arts (Honours) Degree Regulations).

13.15.6 Regulations for the International Bachelor of Arts (iBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of an Honours, Major or Minor in Philosophy, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Philosophy to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts.

13.15.7 Major and Minor in Medieval Studies
The Major and Minor in Medieval Studies are administered by the Department of Philosophy.

The Major in Medieval Studies and the Minor in Medieval Studies are interdisciplinary programs offered by the Faculty of Humanities and Social Sciences that aim to promote the integrated study through core courses of a historical and cultural period, the Middle Ages, here defined as the period between Antiquity and the Modern Age. Such an approach, which coordinates the methods and subjects of several disciplines, mirrors the pluralistic and interreligious framework of the age. Core courses in Medieval Studies are intended to integrate the material and provide a common focus at the beginning of the programs.

Medieval Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Philosophy, Medieval Studies and are designated by MST.

13.15.7.1 Advising
Due to the nature of interdisciplinary programming, students must carefully plan their course selection and regularly consult with the program's designated academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit.

13.15.7.2 Declaring the Interdisciplinary Major or Interdisciplinary Minor in Medieval Studies
Students wishing to declare a Major or Minor in Medieval Studies shall consult with the program's designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.15.7.3 Regulations for the Interdisciplinary Major in Medieval Studies
1. A Major in Medieval Studies consists of all the general requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses selected from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies and Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies below as follows:
   a. as per the General Regulations for Interdisciplinary Major and Minor Programs, courses from a minimum of any three Humanities and Social Sciences disciplines, and no more than 15 credit hours in any one Humanities and Social Sciences discipline other than Medieval Studies;
   b. a minimum of 12 credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies, which must include Medieval Studies 2000, at least one of MST 2001 or 2002, and include a minimum of 6 credit hours at the 3000-level or above;
   c. a minimum of 6 credit hours in the study of the Latin language, normally Classics 1120 and 1121; and
   d. a minimum of 18 additional credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies and/or Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies, including a minimum of 6 credit hours in courses at the 4000-level. Courses at the 3000-level or above are recommended.
2. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Major in Medieval Studies must also choose a single-discipline Minor or a Major in single-discipline.

13.15.7.4 Regulations for the Interdisciplinary Minor in Medieval Studies
1. The Minor in Medieval Studies consists of a minimum of 24 credit hours in courses chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies and Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies below as follows:
   a. as per the General Regulations for Interdisciplinary Major and Minor Programs, courses from a minimum of any three Humanities and Social Sciences disciplines, no more than 9 credit hours in any one Humanities and Social Sciences discipline other than Medieval Studies and a maximum of 15 credit hours in Philosophy;
   b. a minimum of 12 credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies, which must include MST 2000, at least one of MST 2001 or 2002 and, if
   c. a minimum of 12 additional credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies or Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major or Minor in Medieval Studies, including a minimum of 3 credit hours in courses at the 4000-level. Courses at the 3000-
2. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Minor in Medieval Studies must choose a single discipline Major.

13.15.7.5 Course List

1. Interdisciplinary programs provide exposure to courses in various disciplines within the Faculty of Humanities and Social Sciences. Table 1 courses are Faculty of Humanities and Social Sciences courses that are fundamental to the program of study. Subject to the program regulations, they may be supplemented with Table 2 courses whose Calendar entry emphasizes the history, culture, thought, religion and/or languages of the Middle Ages. Not all courses are necessarily offered each year. Students must be careful to register for different designations of the same course that is cross-listed with different departments. Normal departmental prerequisites for courses are applicable.

2. As per the General Regulations for Interdisciplinary Major and Minor Programs, no more than 6 credit hours at Memorial University of Newfoundland that are not listed in the Faculty of Humanities and Social Sciences Course Descriptions may be deemed eligible towards the Major, and no more than 3 such credit hours may be deemed eligible for the Minor. Undergraduate courses not delivered by the Faculty of Humanities and Social Sciences that have been approved as Table 2 electives for the Medieval Studies programs include Biology 4270, Music 2005.

13.15.7.6 Previous Calendar Regulations

In accordance with UNIVERSITY REGULATIONS - Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science, candidates for an Interdisciplinary Major or Minor in Medieval Studies will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000 level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program. These “grandparented” students are encouraged to consult the program’s designated academic advisor for assistance with course selection.

13.15.7.7 Diploma in Humanities

The Department of Philosophy administers the Diploma in Humanities. Credit hours in Philosophy and Medieval Studies may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see Diploma Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.16 Political Science

www.mun.ca/posc

13.16.1 Department of Political Science Description

How do people live together in societies, and how should people live together? Political Science is the study of the institutions, organizations and norms that determine public lives. In Political Science there are discussions on basic concepts - such as “power”, “government” or “democracy” - in order to understand the world and humanity’s place in it. Once these concepts have been explored, there will be a study of the connections between them in order to better explain political outcomes, such as: why people vote for one political party as opposed to another, why governments and public policies differ in different countries, or why armed conflicts happen in some cases but not in other cases. Memorial University of Newfoundland's Department of Political Science has research strengths in public policy; European and international politics; and elections, campaigns and voting, particularly in Canada. The quality of the Department’s research and teaching is reflected in its programs and the success of its students.

The following undergraduate programs are available in the Department of Political Science:
Faculty of Humanities and Social Sciences 2017-2018

1. Major in Law and Society
2. Minor in Law and Society
3. Honours in Political Science
4. Major in Political Science
5. Honours and Major in Political Science (Co-operative)
6. Minor in Political Science

The Department also offers two Political Science concentrations: a concentration in Canadian Government and a concentration in Global Studies. These concentrations are applicable to all programs in Political Science other than the Minor.

Political Science course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Political Science and are designated by POSC.

13.16.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.16.3 General Information

1. Students for an Honours, a Major or a Minor in Political Science may consult with the Head of the Department or its Undergraduate Advisor to receive advice on Political Science course selections.

2. The Department's website at www.mun.ca/posc features details about upcoming course offerings, course instructors, the undergraduate (Honours, Major, Minor) and graduate (Master of Arts) programs, work internships, studying abroad opportunities, special events, frequently asked questions, and more. In the event of conflicting information, the official University Calendar and information issued by the Office of the Registrar shall take precedence.

3. Anticipated completion of an introductory course is generally recommended prior to enrolling in a corresponding course at the next level. Students following this path may opt to take courses in the same area in the same academic year (e.g., if a 2000-level course is completed in Fall then a corresponding 3000-level course may be taken in Winter). This is presented, for illustrative purposes only, in Table 1 Recommended Course Sequencing by Student’s Area of Interest.

</table>

With the written consent of the course instructor and the Head of the Department, certain prerequisite requirements may be waived.

13.16.3.1 Course Prerequisites

1. The following prerequisite schedule applies to Political Science courses, except Co-operative work term courses.

2. All research techniques courses POSC 3010, 4010, 4011 have prerequisites specified in their descriptions.

3. 1000-level: No prerequisites. Suitable for students in all disciplines.

4. 2000-level: No prerequisites. Completion of POSC 1000 and POSC 1001 is generally recommended.

5. 3000-level: Except for POSC 3010, no prerequisites. Completion of a corresponding 2000-level area introduction course is generally recommended as outlined under Table 1 Recommended Course Sequencing by Student’s Area of Interest.

6. 4000-level: Prerequisites are specified in course descriptions. Completion of at least 12 credit hours in Political Science, including 6 at the 3000-level, is generally recommended.

13.16.3.2 Previous Calendar Regulations

Students who completed the former POSC 2010 may elect to treat it as POSC 1001 for the purposes of Political Science degree regulations and towards the Bachelor of Arts Critical Reading and Writing Requirement.

13.16.4 Honours in Political Science

1. An Honours degree provides students with additional research and writing skills, may be required for admission to a graduate program, and may be useful preparation for law and other professional fields. Students considering the Honours program are encouraged to apply before their fourth semester and to begin considering a potential Honours research topic before their seventh semester. Admission to the program is in accordance with UNIVERSITY REGULATIONS and the Regulations for the Honours Degree of Bachelor of Arts.

2. In addition to meeting the general requirements for the degree, students for a B.A.(Hons.) in Political Science must complete at least 60 credit hours in courses offered by the Department, including:
   a. POSC 1000;
b. a minimum of 12 credit hours at the 2000-level, which must include POSC 2100, 2800, and a minimum of two of POSC 2200, 2300, 2600;

c. a minimum of 36 credit hours at the 3000-level or above, which must include:
   i. a minimum of 18 credit hours at the 3000-level, which must include POSC 3010, a minimum of 3 credit hours from a course numbered 32xx or 33xx, and a minimum of 3 credit hours from a course numbered 36xx or 38xx;
   ii. a minimum of 15 credit hours at the 4000-level, which must include POSC 4010, 4011; and
   iii. an additional 3 credit hours at the 3000-level or above; and

d. a further 9 credit hours in Political Science (no more than 3 credit hours from POSC 1010 and 1020). Honours students are strongly encouraged to complete POSC 1001.

Notes: 1. No more than one of POSC 1010 or 1020 can be included among the 60 Political Science credit hours required for an Honours degree.
2. For Honours, Philosophy 3870 and 3890 may be substituted for 3000-level Political Science credit hours (31xx), and Gender Studies 4005 may be substituted for 4000-level Political Science credit hours (41xx). No other such substitutions may apply.
3. If the Honours essay topic encompasses one of Canadian Government or Global Studies, the POSC 4010 and/or 4011 may be applied towards the applicable Political Science concentration, upon recommendation of the Head of the Department and subject to the approval of the Faculty of Humanities and Social Sciences Committee on Undergraduate Studies. Refer to Political Science Concentrations.

3. Students for an Honours degree are required to select courses as specified under Honours in Political Science. A possible course pattern is presented in Table 2 Course Pattern for an Honours in Political Science.

Two other POSC courses at the 3000- or 4000-levels | 9            |

4. Prior to enrolling in POSC 4010, all Honours students should review the Guidelines Governing Honours Essays available from the Head of the Department, and are required to follow these guidelines while enrolled in POSC 4010 and 4011.

5. Students electing Joint Honours are required to complete at least 51 credit hours in Political Science, including 42 credit hours chosen in accordance with the pattern set out in the degree regulations for a Bachelor of Arts with a Major in Political Science. An additional 9 credit hours can be selected from POSC courses, however, no more than 3 credit hours from POSC 1010 or 1020 are eligible. If the student chooses to complete the Honours Essay (POSC 4010 and 4011) in Political Science, it must be passed with a grade of 70% or better.

### 13.16.5 Major in Political Science

1. In addition to meeting the general requirements for the degree, students for a B.A. with a Major in Political Science must complete at least 42 credit hours in courses offered by the Department, including:
   a. POSC 1000;
   b. a minimum of 12 credit hours at the 2000-level, which must include: POSC 2100, 2800 and a minimum of two of 2200, 2300, 2600;
   c. a minimum of 15 credit hours at the 3000-level, which must include: POSC 3010, a minimum of 3 credit hours from a course numbered 32xx or 33xx, and a minimum of 3 credit hours from a course numbered 36xx or 38xx;
   d. a minimum of 9 credit hours at the 4000-level; and
   e. further 3 credit hours in Political Science.

   Notes: 1. No more than one of POSC 1010 or 1020 can be included among the 42 Political Science credit hours required for a Major.
   2. POSC 1001 is a recommended choice for a Major.
   3. For a Major, Philosophy 3870 and 3890 may be substituted for 3000-level Political Science credit hours (31xx), and Gender Studies 4005 may be substituted for 4000-level Political Science credit hours (41xx). No other such substitutions may apply.

2. Students for a Major degree are required to select courses as specified under Major in Political Science. A possible course pattern is presented in Table 3 Course Pattern for a Major in Political Science.

13.16.6 Political Science Concentrations

While meeting the requirements for a program in Political Science, other than a Minor in Political Science, students may optionally select courses in one of two formal concentrations which, if completed, will be noted on the student’s transcript.

13.16.6.1 Concentration in Canadian Government

The concentration in Canadian Government is applicable to all programs in Political Science other than the Minor in Political Science. As part of their course selection, students opting for a Canadian Government concentration will complete a minimum of 24 credit hours in POSC courses emphasizing public policy (second digit is “6”) and/or Canadian politics (second digit is “8”). These POSC x6xx and/or x8xx credit hours must include 2600 and 2800, and at least 6 credit hours at the 4000-level. Students are generally advised to follow the possible course pattern presented in Table 4 Course Pattern for Optional Political Science (POSC) Concentration. For Honours students, credit hours in POSC 4010 and/or POSC 4011 may be deemed eligible towards the concentration; such students must submit their request in writing to the Head of the Department who will communicate a recommendation to the Faculty of Humanities and Social Sciences Committee on Undergraduate Studies.

13.16.6.2 Concentration in Global Studies

The concentration in Global Studies is applicable to all programs in Political Science other than the Minor in Political Science. As part of their course selection, students opting for a Global Studies concentration will complete a minimum of 24 credit hours in POSC courses emphasizing international politics (second digit is “2”) and/or comparative politics (second digit is “3”). These POSC x2xx and/or x3xx credit hours must include 2200 and 2300, and at least 6 credit hours at the 4000-level. Students are generally advised to follow the possible course pattern presented in Table 4 Course Pattern for Optional Political Science (POSC) Concentration. For Honours students, credit hours in POSC 4010 and/or POSC 4011 may be deemed eligible towards the concentration; such students must submit their request in writing to the Head of the Department who will communicate a recommendation to the Faculty of Humanities and Social Sciences Committee on Undergraduate Studies.

</tr>
</tbody>
</table>

13.16.7 Honours and Major in Political Science (Co-operative)

The Political Science Co-operative Education Program (PSCE) is available to full-time Political Science Honours and Majors students only.

The PSCE provides an opportunity for students to obtain public policy and other relevant full-time employment experience in fields related to Political Science, particularly governmental organizations. Students will apply their academic knowledge to practical situations as they develop their research, analysis and writing skills, as well as their career interests. A commitment to ethical and professional conduct is expected of all students.

Candidates who are accepted into the PSCE must complete the normal requirements for their degree, as well as three full-time work terms. In addition to following the PSCE regulations, students must satisfy the Bachelor of Arts General Degree Regulations, the Bachelor of Arts (Honours) Degree Regulations, and the Department’s requirements for the Honours in Political Science or the Major in Political Science, as applicable. Additional information about the PSCE can be found on the Department of Political Science website at www.mun.ca/posc.

13.16.7.1 Eligibility for Admission

Admission to the Political Science Co-operative Education Program is competitive and selective.

The primary criterion used in reaching decisions on applications is overall academic achievement.

Application forms can be obtained from the Department. The annual deadline for application is November 15 (or the next business day). An application should be made in the Fall when a student expects to have completed a minimum of 42 credit hours, including POSC 1000 and 2800, by the end of that semester.

Admission criteria include, but are not necessarily limited to, the following:

a. students currently enrolled in the Honours in Political Science or a Major in Political Science; and
b. an overall average of at least 65%, and a minimum average of 70% in Political Science courses.
c. Applicants transferring from another institution must normally have completed at least one semester at Memorial University of Newfoundland before applying to the program.

d. Applicants may be asked to attend an interview.

13.16.7.2 Program of Study

a. In addition to the requirements below students must fulfill all requirements for either a Honours or Major in Political Science.

b. Students’ status in the program is assessed at the end of each semester. To be eligible to continue, students must maintain full-time student status (9 or more credits in a semester) and maintain a cumulative average of at least 65% and an average of at least 70% in Political Science courses. Students who fail to maintain the required averages will be required to withdraw from the PSCE. Such students may apply for readmission in a subsequent year after re-establishing the required averages.

c. Students must complete three work terms, at least one of which must occur during a Fall or Winter semester. No more than two of the three work terms may be completed consecutively.

d. Work terms normally begin after the student has completed four academic terms. The final work term must be completed before the final academic term.

Course patterns may vary. Students are encouraged to meet with the undergraduate coordinator early in their program in order to establish a course pattern that meets the requirements as set out in these regulations.

13.16.7.3 Preparation for Work Placements

The Program is coordinated by the Academic Staff Member in Co-operative Education in consultation with a designated Department faculty member.

a. A student admitted to the co-op program gives permission to the University to provide a copy of the student's résumé and university transcript to potential employers.

b. The dates for starting and finishing each work term are shown in the University Diary. At the start of the job competition students will normally be provided with a detailed description of each available position. Work placements cannot be guaranteed though every effort is made to ensure that appropriate employment is made available. With the express permission of the Academic Staff Member in Co-operative Education, students may identify and initiate contact with a potential employer outside of the placement competition, though the designated faculty member must ultimately approve all positions. Such jobs must be confirmed by letter from the employer before the first day of the work period.

13.16.7.4 Delivery of Work Term Placements

a. At least one work term must occur in a Fall or Winter semester. The final work term must be completed before the final academic term. Competition for placements is heaviest in the Spring semester and students are strongly recommended to complete one Spring placement outside of the St. John’s area. With permission of the Academic Staff Member in Co-operative Education, and in consultation with the designated faculty member, a student may complete a maximum of two work terms in consecutive semesters.

b. Within two weeks of starting a work term, students must submit a completed confidentiality and professional conduct agreement and a plan of learning objectives for that placement to the Academic Staff Member in Co-operative Education. The placement should normally entail 35 hours of work per week for 12 weeks for a minimum total of 420 hours. Students must maintain an attendance form that must be regularly initialed by the employer and a completed copy must be submitted with the end of term requirements.

c. Remuneration for work placements is determined by employers based on their internal wage structures. Students must not expect any such income to make them completely self-supporting

13.16.7.5 Evaluation of Work Term Placements

a. The first of three components of a work term evaluation will be the preparation of policy instruments such as a briefing note on a topical issue relevant to the student’s placement. This will be assigned and assessed by the designated faculty member who will consider it when arriving at the final grade for POSC 260W, 360W or 460W as applicable. Evaluation of the policy instrument(s) will result in one of the following classifications: pass or fail.

b. The second evaluation component will be of a student’s on-the-job performance. This will be assessed by the Academic Staff Member in Co-operative Education. Formal written documentation from the employer will be sought. Evaluation of on-the-job performance will result in one of the following classifications: pass with distinction, pass, or fail.

c. The third evaluation component will be of an oral or written assignment, to be determined by the Academic Staff Member in Co-operative Education. The assignment must be submitted to the Academic Staff Member in Co-operative Education on the first day of the final examination period and will be evaluated by the Academic Staff Member in Co-operative Education. When preparing the assignment the student must continue to respect the confidentiality of the employer. Evaluation will result in one of the following classifications: pass with distinction, pass, or fail.

d. Evaluation of the policy instrument(s), job performance and third evaluation component are recorded separately on the student’s transcript.

e. Overall evaluation of the work term will result in one of the following final grades being awarded for POSC 260W, 360W or 460W as applicable, which will be noted on the student’s transcript:
   - Pass with Distinction: Indicates that the student received a passing grade on the policy instrument(s) and a pass with distinction
on both the on-the-job performance and the third evaluation component.

- **Pass**: Indicates that the student received a passing grade on the policy instrument(s) and at least a pass on both the on-the-job performance and the third evaluation component.
- **Fail**: Indicates failing performance in one or more of the three evaluation components.

f. To be eligible for promotion from the work term and continuation in the PSCE a student must not be awarded a Fail. Students should also refer to the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate). If a student fails the work term the student will be required to withdraw from the PSCE. Such a student may reapply to the program after a lapse of two semesters, at which time the student will be required to repeat the work term with satisfactory performance. A given work term may be repeated only once and only one work term may be repeated in the entire Program.

g. A student who accepts a job placement and who subsequently withdraws from a work term without acceptable cause will be required to withdraw permanently from the PSCE. Students who drop a work term without prior approval from both the Academic Staff Member in Co-operative Education and the designated faculty member, or who do not honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause their discharge from the job, will normally be awarded a grade of Fail for the work term in question. Permission to drop a work term does not constitute a waiver of degree requirements and students who have obtained such permission must complete an approved work term in lieu of the one dropped.

### 13.16.8 Minor in Political Science

1. Students for a Minor in Political Science must complete at least 24 credit hours in courses offered by the Department, including:
   a. POSC 1000;
   b. a minimum of 6 credit hours at the 2000-level, which must include POSC 2800; and
   c. a minimum of 12 credit hours at the 3000-level or above, which must include at least 3 credit hours at the 4000-level.

   **Notes:**
   1. No more than one of POSC 1010 or 1020 can be included among the 24 POSC credit hours required for a Minor.
   2. POSC 1001 and 3010 are recommended choices for a Minor.
   3. For a Minor, credit hours in another discipline may not be substituted for POSC credit hours.

2. Students for a Minor are required to select courses as specified under **Minor in Political Science**. A possible course pattern is presented in **Table 7 Course Pattern for a Minor in Political Science**.

### 13.16.9 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Political Science, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Political Science to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Political Science courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Political Science IS courses may be used towards the International Studies (IS) Courses Requirement.

### 13.16.10 Major and Minor in Law and Society

The Major and Minor in Law and Society are administered by the Department of Political Science. The Major in Law and Society and the Minor in Law and Society are interdisciplinary programs that encourage students to engage in the academic and philosophical study of different facets of law and its role in society. They will acquaint and confront students with different aspects of the history, philosophical basis, and role of law in modern society. They include courses which deal explicitly with law, courses in social and political theory, and courses examining the role of law and its norms in diverse settings. Core courses in Law and Society integrate the material and provide a common focus at the beginning and the end of the programs. These are not pre-law programs nor do they offer a certificate or qualification in legal studies.

Law and Society course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Political Science, Law and Society** and are designated by LWSO.

### 13.16.10.1 Advising

Due to the nature of interdisciplinary programming, students must carefully plan their course selection and regularly consult with the program’s designated academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit.

### 13.16.10.2 Declaring the Interdisciplinary Major or Interdisciplinary Minor in Law and Society

Students wishing to declare a Major or a Minor in Law and Society shall consult with the program’s designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.
13.16.10.3 Regulations for the Interdisciplinary Major in Law and Society

1. A Major in Law and Society consists of all the general requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses selected from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society and Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society below as follows:
   a. as per the General Regulations for Interdisciplinary Major and Minor Programs, courses from a minimum of any three Humanities and Social Sciences disciplines, and no more than 15 credit hours in any one Humanities and Social Sciences discipline other than Law and Society;
   b. a minimum of 12 credit hours in Law and Society courses, which must include LWSO 1000 and 4000; and
   c. an additional 24 credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society and/or Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society, which must include at least 15 credit hours at the 3000-level or above, including at least 3 credit hours at the 4000-level.

   In fulfilling the requirements above, no more than 15 credit hours can be counted from Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society.

2. Before registering for any 4000-level Law and Society course, students must complete 18 credit hours selected from courses in Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society, including LWSO 1000.

3. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Major in Law and Society must also choose a single-discipline Minor or a Major in single-discipline.

13.16.10.4 Regulations for the Interdisciplinary Minor in Law and Society

1. A Minor in Law and Society consists of a minimum of 24 credit hours in courses selected from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society and Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society below as follows:
   a. as per the General Regulations for Interdisciplinary Major and Minor Programs, courses from a minimum of any three Humanities and Social Sciences disciplines, no more than 9 credit hours in any one Humanities and Social Sciences discipline other than Law and Society and a maximum of 15 credit hours in Political Science;
   b. a minimum of 9 credit hours in Law and Society courses, which must include LWSO 1000 and 4000; and,
   c. an additional 15 credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society and/or Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society, including at least 9 credit hours at the 3000-level or above. In fulfilling the requirements above, no more than 9 credit hours can be counted from Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society.

2. Before registering for any 4000-level Law and Society course, students must complete 18 credit hours selected from courses in Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society, including LWSO 1000.

3. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Minor in Law and Society must choose a single discipline Major.

13.16.10.5 Course List

1. Interdisciplinary programs provide exposure to courses in various disciplines within the Faculty of Humanities and Social Sciences. Table 1 courses are Faculty of Humanities and Social Sciences courses whose Calendar entry establishes a focus on law and society, and are fundamental to the program of study. Subject to the program regulations, they may be supplemented with Table 2 courses whose Calendar entry establishes an emphasis on the study of aspects of society that shape and/or are shaped by law. Not all courses are necessarily offered each year. Students must be careful not to register for different designations of the same course that is crosslisted with different departments. Normal departmental prerequisites for courses are applicable.

2. As per the General Regulations for Interdisciplinary Major and Minor Programs, up to 6 credit hours obtained in undergraduate courses at Memorial University of Newfoundland that are not listed in the Faculty of Humanities and Social Sciences Course Descriptions may be deemed eligible towards the Major in Law and Society, or 3 such credit hours towards the Minor in Law and Society. Undergraduate courses not delivered by the Faculty of Humanities and Social Sciences that have been approved as Table 2 electives include Business 4000, 5000, 6040, 7322; Education 4420; Human Kinetics and Recreation 3535; Psychology 2150; Social Work 3720.

3. Students registered in the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative) who are pursuing a Major or a Minor in Law and Society are eligible to complete up to 12 credit hours for the Major and 6 credit hours for the Minor in approved courses that do not appear in the Faculty of Humanities and Social Sciences Course Descriptions. The normal limit that is identified in the General Regulations for Interdisciplinary Major and Minor Programs does not apply to those students.

13.16.10.6 Previous Calendar Regulations

In accordance with UNIVERSITY REGULATIONS - Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science, candidates for an Interdisciplinary Major or Minor in Law and Society will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000-level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student’s tenure in a program. These “grandparented” students are encouraged to consult the program’s designated academic advisor for assistance with course selection.

13.16.11 Certificate in Public Policy

The Department of Political Science administers the Certificate in Public Policy. Credit hours in Political Science and Law and Society may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see Certificate Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.17 Psychology

For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar.

The following undergraduate programs are available in the Department of Psychology:

1. Biochemistry and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)
2. Biochemistry (Nutrition) and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)
3. Biology and Psychology Joint Honours (B.Sc. Hons. only)
4. Biology and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)
5. Major and Honours in Behavioural Neuroscience (B.Sc. only)
6. Major and Honours in Psychology (B.A. or B.Sc.)
7. Minor in Psychology (B.A. or B.Sc.)

13.18 Religious Studies

www.mun.ca/relstudies

13.18.1 Department of Religious Studies Description

The academic study of religion invites multiple perspectives on the enduring place of religion in human society. It examines the histories, texts, beliefs, values, and practices of a variety of the world’s religions (including Buddhism, Confucianism, Hinduism, Judaism, Christianity, and Islam), as well as the religious and spiritual dimensions of contemporary and popular culture.

The Department of Religious Studies at Memorial University of Newfoundland is the largest religious studies department east of Quebec. It approaches the world’s religious traditions and contemporary religiosity as historical and cultural phenomena. In addition to studying the beliefs and practices that comprise religion in its historical and contemporary forms, the Department’s curriculum includes courses that contextualize religions in relation to the arts, politics, gender, science, ethics, and secularism.

The following programs are available in the Department of Religious Studies:

1. Major in Religious Studies
2. Minor in Religious Studies
3. Honours in Religious Studies
4. Joint Honours in Religious Studies information is under Joint Honours Degree in Religious Studies

13.18.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations - General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.18.3 General Information

1. Courses in Religious Studies are designed for students who wish to study religion as an academic discipline. They are open to all students on the same basis as are other courses in the Faculty of Humanities and Social Sciences. They are recommended for
   a. students who wish to gain an understanding of the essential teachings and beliefs of one or more of the major religions; and
   b. students who are interested in careers for which a knowledge of religious thought and practice is useful; and
students who are interested in exploring this field as an area of scholarly interest and human concern.

2. Those who plan to teach religion in the schools should complete a major or minor under the degree of Bachelor of Arts or a concentration in Religious Studies under the degree of Bachelor of Education (Primary/Elementary).

3. Religious Studies 1000, 1010, the former 1020, 1021, 1022, the former 1032, and the former 1200 are basic courses which introduce students to the academic study of religion. Religious Studies 1040 and 1041 (Introduction to Chinese), Religious Studies 1050 and 1051 (Introduction to Biblical Hebrew), Religious Studies 1060 and 1061 (Sanskrit Language Study), are courses which fulfill the language requirement in the Faculty of Humanities and Social Sciences.

4. Courses at the 2000 level represent a more focused level of study. Courses are generally of two types: the first introduces specific religious traditions, and the second introduces religious topics or issues. All courses at the 2000 level are introductory and open to any student interested in the subject.

5. Courses at the 3000 and 4000 level in Religious Studies deal with the subject matter in greater depth and assume some previous knowledge.

6. Unless otherwise specified, Religious Studies courses do not have prerequisites. Students who register in a 3000- or 4000-level course are encouraged, however, to make sure that they have adequate preparation for that course, preferably by having completed a first- or second-year course in the field.

7. Students majoring in Religious Studies should plan their program in consultation with a representative of the Department. Religious Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Religious Studies and are designated by RELS.

13.18.4 General Degree

13.18.4.1 Major in Religious Studies

1. A minimum of 36 credit hours in courses in Religious Studies is required. Students must complete at least one course from each of the three following groups:
   a. 2050, 2051, 2130, 2140, 2330, 2340, 3000, 3031, 3060, 3091, 3200, 3210, 3251, the former 3272, 3276, 3305, 3310, 3510, 3535, 3560, 3900, 3901.
   b. 2400, 2410, 2415, 2420, 2425, 2430, 3401, 3411, 3415, 3431, 3432.
   c. 2180, 2610, 2810, 2811, 2812, 2820, 2830, 2850, 3058, 3640, 3650, 3680, 3800, 3810, 3811, 3812, 3820, the former 3830, 3840, 3860, 3880.

2. Students must complete at least 18 credit hours in Religious Studies courses at the 3000 level or above, including at least 3 credit hours at the 4000-level.

3. With the exception of the Language Study (LS) courses (1040, 1041, 1050, 1051, 1060, 1061), no more than two 1000-level courses can be counted as credit towards a major.

4. A student pursuing a Major in Religious Studies is encouraged to complete Language Study (LS) courses offered by the Department in order to fulfill the Bachelor of Arts Language Study requirement and as preparation for advanced studies in Religious Studies.

13.18.4.2 Minor in Religious Studies

1. A minimum of 24 credit hours in courses in Religious Studies is required, including at least 9 credit hours in courses at the 3000 level or above.

2. With the exception of the Language Study (LS) courses (1040, 1041, 1050, 1051, 1060, 1061), no more than two 1000-level courses can be counted as credit towards a minor.

13.18.5 Honours Degree

1. Students planning to complete further work in Religious Studies should bear in mind that an Honours degree is the normal requirement for admission to Graduate Schools.

2. Students planning to complete an Honours Degree of Bachelor of Arts with a Major in Religious Studies must comply with the General Regulations for Honours Degrees, and must complete at least 60 credit hours in Religious Studies courses of which at least 36 of these 60 credit hours must be at the 3000-level or above. In addition, the 60 credit hours must include the 36 credit hours in course requirements to fulfill the Major in Religious Studies and a further 24 credit hours in Religious Studies, including one of Religious Studies 4998 (a comprehensive examination in the area of their specialization) or Religious Studies 4999 (Honours Essay).

3. Students considering Honours should arrange their program at the earliest opportunity, normally before the beginning of their fifth semester at the University.

4. Students will normally be required to have a reading knowledge of a language basic to their area of specialization.

5. In each case the program of studies leading to an Honours degree will be determined in consultation with the Head of the Department of Religious Studies, or delegate, keeping in mind the needs and interests of the individual student.

6. A student pursuing an Honours in Religious Studies is encouraged to complete Language Study (LS) courses offered by the Department in order to fulfill the Bachelor of Arts Language Study (LS) Requirement and as preparation for advanced studies in Religious Studies. Students whose area of specialization requires a knowledge of Greek must complete Classics 1130 and 1131. In such cases these courses may be substituted for 6 of the 60 credit hours required for an Honours degree in Religious Studies.

13.18.6 Joint Honours Degree in Religious Studies and Another Major Subject

The attention of students is drawn to the possibility of doing a Joint Honours program that includes Religious Studies as one of the Major subjects. Such a program may be arranged in consultation with the Head of the Department of Religious Studies and the Head of the other Department concerned. Of the credit hours required in the two subjects selected, not fewer than 42, and not more than 51, must come from each discipline.

13.18.7 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Religious Studies, students may elect to complete requirements for the International Bachelor of Arts (iBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Religious Studies to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2.
Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours), and to consider Religious Studies courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Religious Studies IS courses may be used towards the International Studies (IS) Courses Requirement.

13.19 Sociology
www.mun.ca/soc

13.19.1 Department of Sociology Description
Sociology explores patterns of social life and examines the development, structuring, and organization of societies in all their historical and current diversity. Sociologists seek to understand how people live, think, feel, and believe in the ongoing processes that maintain and shift society and culture. Through understanding the social forces, structures and relationships that shape our world, Sociology allows us to see why and how things are as they are, and how everything could be otherwise. Sociology is therefore central to understanding institutions, organizations, social policy, inequality, privilege, social problems and social change.

13.19.2 Programs in Sociology
The following undergraduate programs are available in the Department:
1. Major in Police Studies
2. Major in Sociology
3. Minor in Sociology
4. Honours in Sociology

Sociology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Sociology and are designated by SOCI.

13.19.3 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

13.19.4 Major in Sociology
Students may wish to follow the pattern for the Major in Sociology listed under Table 1 Suggested Course Pattern for a Major in Sociology (SOCI) below.

Students who undertake Sociology as their Major must complete at least 36 credit hours in Sociology as follows:
1. Core courses: Sociology 1000 (or the former 2000), Sociology 3040, Sociology 3041, Sociology 3150, Sociology 3160;
2. At least 6 credit hours in Sociology at the 4000 level;
3. No more than an additional 6 credit hours in courses below the 3000-level may be counted toward the Major; and
4. The remaining courses, for the minimum of 36 credit hours required for the Major, may be selected from any Sociology course at the 3000 and 4000 levels.

Table 1 Suggested Course Pattern for a Major in Sociology (SOCI)

</tr>
</tbody>
</table>

13.19.5 Minor in Sociology
Students who undertake Sociology as their Minor must complete at least 24 credit hours in Sociology as follows:
1. Sociology 1000 or the former 2000, Sociology 3040, 3041, 3150, at least 3 credit hours from Sociology courses at the 4000 level, and 9 credit hours in other Sociology courses.

13.19.6 Honours in Sociology
Honours students are required to complete at least 60 credit hours in courses in Sociology, of which there must be a minimum of 36 credit hours at the 3000-level or above, including all courses prescribed for the Major in Sociology, and Sociology 4995, and must meet the requirements outlined in the Regulations for the Honours Degree of Bachelor of Arts.

It is possible to complete a Joint Honours program that includes Sociology as one of the Major subjects. Such a program may be
arranged in consultation with the Head of the Department of Sociology and the Head of the other Department concerned.

13.19.6.1 Admission to Honours Program
Admission to the Honours program in the Department of Sociology is competitive and selective. Students who wish to enter this program must submit an “Application for Admission to Honours Program” form to the Department.

To be accepted into the Honours program, a student must not only meet the criteria laid out in the Regulations for the Honours Degree of Bachelor of Arts, but must normally have obtained a cumulative average of at least 75% in 18 credit hours in courses in Sociology which must include Sociology 3040, 3041, 3150, and 3160.

13.19.7 Regulations for the International Bachelor of Arts (IBA)
In addition to completing the normal requirements for a Bachelor of Arts and one of an Honours, Major or Minor in Sociology, students may elect to complete requirements for the International Bachelor of Arts (IBA). As part of the minimum 120 credit hours, a student may use eligible credit hours in Sociology to jointly satisfy other requirements of the IBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider Table 2 Possible Course Sequencing for the International Bachelor of Arts (IBA) (First 60 Credit Hours), and to consider Sociology courses listed in Table 3 International Studies (IS) Designated Courses. Up to 12 credit hours in Sociology IS courses may be used towards the International Studies (IS) Courses Requirement.

13.19.8 Major in Police Studies
The Major in Police Studies is administered by the Department of Sociology. The Major in Police Studies is an interdisciplinary program offered by the Faculty of Humanities and Social Sciences that aims to promote the academic study of different facets of police institutions and practices, including the legal, political and social contexts in which they operate. This program would be beneficial for students with a scholarly interest in policing, corrections or law enforcement, including those who have completed the Diploma in Police Studies; experienced police officers; and others working in a policing environment. The Major in Police Studies does not constitute a qualification in policing.

Police Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under Course Descriptions, Sociology, Police Studies and are designated by PLST.

13.19.8.1 Bachelor of Arts Degree Requirements
The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the Program Regulations – General and Honours Degrees for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the Admission to the Bachelor of Arts General Degree Programs regulations, the Program Regulations - General and Honours Degrees which also includes the Bachelor of Arts General Degree Components, The Major Program, and The Minor Program regulations. Information regarding honours programs is available at Bachelor of Arts (Honours) Degree Regulations as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the Core Requirements, The Major Program, The Minor Program, and the Bachelor of Arts (Honours) Degree Regulations. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors is available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.19.8.2 Advising
Due to the nature of interdisciplinary programming, students must carefully plan their course selection and regularly consult with the Manager of Academic Programs. Questions about the delivery of a course should be directed to the appropriate academic unit. Students should contact the Manager of Academic Programs to discuss the planning of their program by June 1st for Fall admission and by October 1st for Winter admission.

13.19.8.3 Declaring the Interdisciplinary Major in Police Studies
Students wishing to declare a Major in Police Studies shall consult with the Manager of Academic Programs to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php.

13.19.8.4 Regulations for the Interdisciplinary Major in Police Studies
1. A Major in Police Studies consists of all the general requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses selected from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major in Police Studies and Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major in Police Studies below as follows:
   a. courses from a minimum of any three Humanities and Social Sciences disciplines, and no more than 15 credit hours in any one Humanities and Social Sciences discipline other than Police Studies;
   b. a minimum of 15 credit hours in Police Studies courses, including PLST 2000, at least one of 3000 or 3500, and at least one of 4000 or 4001;
   c. a minimum of 9 additional credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major in Police Studies. Sociology 3040 and 3041 are recommended choices; and
   d. a minimum of 12 additional credit hours selected from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major in Police Studies and/or Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major in Police Studies including at least one further 4000-level course.

2. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Major in Police Studies must also choose a single-discipline Minor or a single-discipline Major.

13.19.8.5 Recognition of Qualifications for Experienced Officers
1. Subject to the prior approval of the Program Coordinator, certain programs and courses offered by recognized police or other criminal justice training programs may be eligible for credit hours that are applicable towards the Bachelor of Arts, Police Studies, Graduates of the Atlantic Police Academy (APA) Police Sciences Technology Program, Holland College, Prince Edward Island; the RCMP Depot Division Cadet Training Program; or the pre-APA program offered through the Royal Newfoundland Constabulary.
(RNC) for cadet training may be awarded up to 30 PLAR credit hours at an unspecified level in the Police Studies (PLST) subject area. Qualifications from other recognized police or other criminal justice training programs will be assessed on an individual basis by the Coordinator of Police Studies based on the topics covered and the number of hours involved, and will be subject to the approval of the Committee on Undergraduate Studies. Normally, the Committee will prioritize programs and courses that feature evaluation of student knowledge; workshops and professional development modules that do not involve evaluation are not eligible. Applicants with five or more years of professional criminal justice experience may request credit for PLST 2000 or PLST 2200 as part of their maximum 30 credit hours. An Application for Transfer Credit Evaluation, including official documentation confirming program completion or professional experience, must be submitted to the Office of the Registrar to have training assessed and recognized for transfer credit. The Application may be obtained online or in-person at the Office of the Registrar.

2. Unsolicited Police Studies credit hours may only be used towards the Bachelor of Arts, Major in Police Studies program to meet up to 12 of the 21 elective credit hours required for the Major as outlined below. Any remaining unsolicited credit hours in the Police Studies subject area may be used in part to satisfy the Humanities and Social Sciences Elective requirements for the Bachelor of Arts, Police Studies Major program. In the case of programs where there are established course transfer credits, the student will be awarded transfer credit for the appropriate courses. Any remaining credit hours will be awarded as unsolicited credit hours in the Police Studies subject area.

3. Students applying credit allowances described above must adhere to the following program requirements:
   a. A Major in Police Studies consists of all the general requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses selected from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major in Police Studies and Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major in Police Studies as follows:
      i. courses from a minimum of any three Humanities and Social Sciences disciplines, with no more than 15 credit hours in any one Humanities and Social Sciences discipline other than Police Studies;
      ii. 15 credit hours in Police Studies courses, including PLST 2000, at least one of 3000 or 3500, and at least one of 4000 or 4001;
      iii. a maximum of 12 credit hours of unsolicited Police Studies credit hours;
      iv. a minimum of 6 additional credit hours at the 3000-level or above in two different disciplines other than Police Studies chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major in Police Studies; and
      v. 3 additional credit hours, at the 4000-level, chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses for the Major in Police Studies and/or Table 2 Other Faculty of Humanities and Social Sciences Courses for the Major in Police Studies.
   b. Any remaining unsolicited credit hours in the Police Studies subject area may be used in part to satisfy the Humanities and Social Sciences Elective requirements for the Bachelor of Arts provided students remain enrolled in the Major in Police Studies program.
   c. As per the General Regulations for Interdisciplinary Major and Minor Programs, students completing a Major in Police Studies must also choose a single-discipline Minor or a single-discipline Major.

13.19.8.6 Course List

1. Interdisciplinary programs provide exposure to courses in various disciplines within the Faculty of Humanities and Social Sciences. Table 1 core courses are Faculty of Humanities and Social Sciences courses that are fundamental to the program of study. Subject to the program regulations, they may be supplemented with Table 2 courses whose Calendar entry establishes an emphasis on the scholarly study of specific social, legal, institutional and/or political contexts of policing. Not all courses are necessarily offered each year. Students must be careful not to register for different designations of the same course that is crosslisted with different departments. Normal departmental prerequisites for courses are applicable.

2. As per the General Regulations for Interdisciplinary Major and Minor Programs, up to 6 credit hours obtained in undergraduate courses at Memorial University of Newfoundland that are not listed in the Faculty of Humanities and Social Sciences Course Descriptions may be deemed eligible towards the Major in Police Studies. Undergraduate courses not delivered by the Faculty of Humanities and Social Sciences that have been approved as Table 2 electives include Education 3255, 3620; Psychology 2150, 2440, 2800, 3840; Social Work 1710.

13.19.8.7 Previous Calendar Regulations

In accordance with UNIVERSITY REGULATIONS - Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science, candidates for the Interdisciplinary Major in Police Studies will normally follow regulations in effect in the academic year in which the student first completes a course in that subject at the 2000-level or above which may be applied to the major or minor program respectively. However, the student may elect to follow
subsequent regulations introduced during the student's tenure in a program. These “grandparented” students are encouraged to consult the program's designated academic advisor for assistance with course selection.

13.19.9 Diploma in Police Studies
The Department of Sociology administers the Diploma in Police Studies. Credit hours in Sociology and Police Studies may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see Diploma Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

13.19.10 Certificate in Criminology
The Department of Sociology administers the Certificate in Criminology. Credit hours in Sociology and Police Studies may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see Certificate Programs Offered in the Faculty of Humanities and Social Sciences, or contact the program coordinator.

14 Course Descriptions

14.1 Anthropology
In accordance with Senate’s Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the course listing. For information about any of these inactive courses, contact the Head of the Department.

Students should note that credit may not be obtained for an Anthropology course if, prior to 2007, the student received credit for that course when it was designated as an Anthropology course. Anthropology courses are designated by ANTH.

1031 Introduction to Anthropology provides an overview of the field of social and cultural anthropology. Diverse case studies will be used to illustrate key anthropological concepts and methods.

CR: former ANTH 1000 or 2000

2260 War and Aggression (same as the former Sociology/Anthropology 2260 and the former Sociology 2260) is a critical review of ethnological, psychological and sociological approaches to the understanding of violence and organized aggression.

CR: former Sociology/Anthropology 2260, the former Sociology 2260

UL: not applicable towards the Major or Minor in Anthropology

2280 The City (same as the former Sociology/Anthropology 2280 and the former Sociology 2280) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

CR: former Sociology/Anthropology 2280, the former Sociology 2280

UL: not applicable towards the Major or Minor in Anthropology

2350 Religious Institutions (same as Religious Studies 2350) is a contextual study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.

CR: Religious Studies 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

UL: not applicable towards the Major or Minor in Anthropology

2410 Classics in Anthropology is an examination of selected milestone monographs, ground-breaking studies for subdisciplinary specialties, and major syntheses.

2411 Anthropologists in the Field combines a firsthand introduction to ethnographic research and writing with an exploration of how anthropological understanding develops through the experiences and human relationships of anthropologists in the field.

2412 Threatened Peoples is an examination of key social and cultural factors involved in the global extinction of small-scale societies; the intrusive influences that jeopardize small-scale societies, such as disease; economic and military incursion; the role of international non-governmental agencies in aid of threatened peoples; and the role of the anthropologist in this human crisis. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

2413 Culture, Society and Globalization explores the way in which social, cultural, economic and political interconnections at the global level interact with local social and cultural processes. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

2414 Aboriginal Peoples of North America is a survey course dealing with various indigenous peoples of North America.

CR: the former ANTH 3281

2415 Anthropology of Food explores how cultural identities, social relationships, and inequalities are linked to the production, exchange, and consumption of food.

2416 Cultural Formations explores the symbolic formations that humans create in order to give meaning to their lives. Some of the cultural formations that will be studied include specific examples from the realms of religion, play, sports, art, and commonplace material objects.

3050 Ecology and Culture reviews the co-evolution of the fields of ecology and anthropology since the late 19th century and examines the variety of contemporary perspectives on the interconnection between social and ecological systems.

3052 Anthropology and Directed Social Change - inactive course.

3053 Anthropology of Religion (same as Religious Studies 3053) is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.

CR: Religious Studies 3053

3054 Play, Games and Sport is an examination of the phenomenon of play in a variety of human cultures, and in such forms of activity as religion, politics, festival, speech, performance, and artistic creation. Principal themes are the functional role of play in social relations, and the meaningful role of play in social thought.

3058 Urban Anthropology is an examination of anthropological studies of urban populations and population segments, such as ethnic groups and categories, occupations, neighbourhoods, etc.

3060 The Idea of Culture is the history of ideas, dealing with the emergence of this key anthropological concept, the meanings it has acquired, its broader implications, and major critiques of its use in the social sciences.

3061 Culture and Social Inequality examines the role of culture in mediating different forms of social inequality, exploring the idea that culture is not only a way of life but also a way of managing power among unequals, from individuals to social classes. Readings in the course concentrate on cultural techniques of social control.

3062 Anthropology in Social Policy-making - inactive course.

3063 The Politics of Ethnicity and Multiculturalism examines anthropological approaches and contributions to debates about ethnicity and multiculturalism.

3064 Anthropology and the Study of Social Problems - inactive course.

3070 Aboriginal Self-Governance (same as the former ANTH 4070) examines contemporary Issues on the development of, and barriers to, self-government among Canadian aboriginal peoples. The focus will be on topics such as land claims and claims settlements, self-government agreements and proposed agreements, economic development, environmental and social Impact of Industrial developments, and cultural and religious revival.

CR: the former ANTH 4070

3073 Imaginary Worlds explores the anthropology of imaginary worlds, including those created through pseudo-history, on-line gaming, science fiction and fantasy literature, and film. Particular examples will be examined in terms of the ways that social stratification, gender, ethnicity, race, and cultural beliefs become constructed inside of these imaginary worlds.

3082 Bandity, Rebellion, and Social Revolution examines types of social conflict specific to different kinds of class-based society, including social bandits, primitive rebellions, and peasant revolutions. More generally, social conflict is used to explore the variety of ways that pre-industrial societies have been made part of the modern world economy.

3083 Global Environmental Crises examines the social, cultural, and economic forces that have contributed to rapid resource depletion and other environmental changes from the 20th century to present, and looks at how the impacts of these changes have been experienced around the world. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
3100 Dominion and Power (same as the former Sociology/Anthropology 3100 and the former Sociology 3100) is a study of dominance behaviour in human societies, surveying the range from private to public and from openly exploitative to fully legitimate power systems.
CR: the former Sociology/Anthropology 3100, the former Sociology 3100

3200 Anthropology of the Global Economy explores the way in which anthropologists have studied the inter-linkages among economic, social and cultural processes. Topics covered include key concepts (e.g., gifts and commodities, exchange relationships) and debates (e.g., formation and critical analysis) in economic anthropology, and the way in which different societies and social groups are integrated within global capitalist markets. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: the former ANTH 4200

3240 Regional Studies: Contemporary Native Peoples of Canada - inactive course.

3241 Regional Studies: The Atlantic - inactive course.

3242 European Societies - inactive course.

3249 Peoples of the Pacific - inactive course.

3254-3257 Regional Studies (same as the former Sociology/Anthropology 3254-3257 and the former Sociology 3254-3257) are interdisciplinary approaches to the study of selected regions.
CR: the former Sociology/Anthropology 3254-3257, the former Sociology 3254-3257

3260 International Development (same as Sociology 3260) is an examination of theories of development including a critical analysis of international case studies. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: Sociology 3260, the former Sociology/Anthropology 3260

3280 The Arctic studies cultural, ecologic, economic and social systems in the northern circumpolar regions.

3300 Fieldwork Methods focuses on the process of anthropological fieldwork. Readings, discussions and evaluations will examine a range of issues and concepts that include observation techniques, interviewing, ethical issues, and the interpretation of data. Students will conduct original fieldwork to learn how to apply some of these skills.
CR: the former ANTH 4300

3305 The Anthropology of Gender - inactive course.

3384-3389 Regional Studies in Anthropology

3403 The Anthropology of Travel and Tourism is an exploration of the anthropological study of travel and tourism. Students will learn how to critically evaluate this global industry and consider the role that it plays in the formation of contemporary human identity.

3404 Visual Anthropology explores the use of documentary film, photography, and new digital media in anthropological fieldwork. It also teaches students how anthropologists study visual media such as television, newspapers, popular films, social networking sites, web sites, and photography collections.

3406 The Anthropology of Ritual examines a range of theoretical perspectives, case studies and individual theorists in the study of ritual.

3407 Medical Anthropology focuses on a range of issues including illness, disease and healing, sexuality and reproduction, pandemics and epidemics, medical technology and bioethics.

3408 Engaged Anthropology is a seminar course exploring debates about the potential - and potential pitfalls - of a variety of approaches to publicly engaged anthropology.

3409 War and Globalization examines selected wars of the late 20th and 21st centuries to understand how war, political violence and the repartitioning of the world have become intrinsic features of the current era of globalization. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3410 Classic Theory in Anthropology (same as the former ANTH 4410) follows a historical approach to understanding some of the key theoretical paradigms and individual theorists.
CR: the former ANTH 4410

3411 Anthropology of Foraging deals with societies heavily reliant on hunting, fishing, and gathering wild foods. Industrial and post-industrial settings in which various forms of foraging (including recycling) are the basis for some people's livelihood will also be considered.

3421-3430 Anthropological Specialties will have a topic of current interest and importance announced by the Department for each term.

3451 Ethnography of Gambling - inactive course.

3452 The Fisheries Revolution - inactive course.

3630 New Media Methods in Social Research (same as Sociology 3630) explores the use of online social networks, blogs, micro-blogging, social networking sites, virtual worlds, and other social media in social research. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: Sociology 3630, the former Sociology/Anthropology 3630

3700 Social and Cultural Change - inactive course.

4030 Legal Anthropology - inactive course.

4071 Social and Cultural Aspects of Health and Illness (same as Sociology 4071) will cover topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social, life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine.
CR: Sociology 4071, the former Sociology/Anthropology 4071

4072 Social and Cultural Aspects of Death (same as the former Sociology/Anthropology 4072 and the former Sociology 4072) covers topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g., treatment of the terminally ill, burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviors. Open to those without normal prerequisites by permission of the Instructor.
CR: the former Sociology/Anthropology 4072, the former Sociology 4072

4073 Studies in Underclass Life (same as the former Sociology/Anthropology 4073 and the former Sociology 4073) is a critical inquiry into the social sources of human misery and suffering that characterize life in the underclass.
CR: the former Sociology/Anthropology 4073, the former Sociology 4073

4081 Advanced Seminar in the Anthropology of Gender - inactive course.

4089 Language and Social Change - inactive course.

4201 Current Debates in the Anthropology of Ireland explores selected current debates in the anthropology of Northern Ireland and the Republic of Ireland. Seminars centre on the critical reading of recent ethnographic studies. The course considers Ireland, north and south, as a changing scene, assesses the current state of Irish ethnography and considers how the field might develop.

4202-4209 Special Areas in Anthropology is a series of individual or small group tutorials and reading courses on topics of special or current interest. PR: Departmental permission

4280 Advanced Newfoundland and Labrador Ethnography surveys the ethnographic literature on Newfoundland and Labrador, past and present, with special emphasis on ecological adaptation, interpersonal relations, class formation, patronage, brokerage, clientlship, state formation, and modernization.

4301 The Intensive Study of One Culture - inactive course.

4302 Ethnographic Life Histories - inactive course.

4412 Contemporary Theory in Anthropology is an evaluation of current approaches to the study of selected regions.

4415 Labour and Global Capitalism examines core issues and problems entailed in the anthropological analysis of work and labour in the context of the global economy. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

4416 Anthropology of Slums examines social class forces producing a planet of slums, and details ways that everyday forms of violence, social injustice, and poverty take social shape in the everyday lives of slum dwellers. Among the topics covered are: social class formations, including ghettos, favelas, and shanty towns; surplus populations and disposable peoples resulting from late capitalist globalization; and forms of resistance and struggle that arise within dispossessed populations. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

4417 Anthropology of Sound examines how ethnographers do comparative research on the everyday sounds found in people’s daily environments, including music and new media products.

4418 Marx and Anthropological Inquiry examines the uses of Marx’s later writings, especially Capital, in current American Anthropology. The primary focus is on the agenda-setting works of Eric Wolf and David Harvey. Topics
include: capital accumulation and the making of localities; primitive accumulation and class formation; uneven global development; crises of capitalism and crises of social reproduction; capitalist globalization and disposable surplus populations.

4422 The Craft of Writing Anthropological Narrative is a seminar open to senior students in any discipline, which examines in detail both the mechanics and the sensitivities necessary to produce literate analysis.

4450 Politics of Landscapes is a survey of the variety of past and present systems of land tenure, showing their relevance to development/underdevelopment, conflicts with the state, relationships to social organization, symbolic significance, etc.

4994 Honours Essay I prepares students for the Honours Essay by helping them to select original research topics; providing them with independent research and writing skills; and offering a structured context in which to conduct the preliminary stages of Honour's Essay research and writing. 
P:R: admission to the Honours program in Anthropology

4995 Honours Essay II is required as part of the Honours program.
P:R: ANTH 4994

4996 Comprehensive Examination - inactive course.

14.2 Archaeology

In accordance with Senate's Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Students should note that credit may not be obtained for an Archaeology course if, prior to 2007, the student received credit for that course when it was designated as an Anthropology course.

Archaeology courses are designated by ARCH.

1000 Introduction to Archaeology (same as the former ARCH 1030) is a broad overview of Archaeology and Bioarchaeology introducing the concepts of human biological and cultural evolution and the methods and techniques by which these are investigated. The course is designed to provide the basis for further study in the disciplines.

CR: the former ARCH 1030

1001 Critical Reading and Writing About the Archaeological Past is an introduction to an archaeological literature including essays, monographs, and journal articles and popular media. Emphasis is placed on critical reading and writing, analyzing texts, framing and using questions, constructing essays, organizing paragraphs. Students learn elements of academic assessment of literature and technical skills to refine analytical writing. All sections of this course follow the Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.

CR: the former ARCH 2590

1005 Critical Reading and Writing in Aboriginal and Indigenous Studies (same as History 1005) features the analysis of scholarly literature, media, and other sources of knowledge related to Aboriginal and Indigenous studies. Students will practice analytical reading and writing through class discussion and assignments related to the study of both past and present.

All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.

CR: History 1005, the former ARCH 2590, the former History 1016

2430 Principles of Bioarchaeology investigates the human animal as we exist now and as we developed through time. Students will discover how the study of fossil remains, living and extinct primates, and the applications of the principles of genetics, adaptation and variation of human evolution help to provide a better understanding of how biology and culture have interacted to produce modern humans.

PR: ARCH 1000 or the former 1030

2450 Principles of Archaeological Science introduces the student to a broad range of scientific approaches and quantitative methods used in archaeology. The course provides an overview of the historical development of archaeological science and a survey of the analytical techniques used to investigate materials recovered from archaeological contexts, including biomolecular methods, statistical analysis of data, geophysical prospection, dating methods and quantitative methods of calibration, and remote sensing. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.

PR: ARCH 1000 or the former 1030

2480 Principles of Archaeology is an introduction to archaeological techniques, methodology and theory. Lectures cover the development of the discipline, techniques of survey and excavation, methods of analysis and the interpretation of prehistory.

PR: ARCH 1000 or the former 1030

2481 Ancient Civilizations of the Americas is a survey course introducing the archaeology and ethnohistory of various pre-contact civilizations of North, Central and South America. Archaeological Evidence will be used to explore the rise of civilizations in the Americas and particular civilizations will be examined and compared based on ideology, economy and administration.

PR: ARCH 1000 or the former 1030 or permission of the instructor

2492 Forensic Archaeology is an examination of procedures and techniques used by Biological anthropologists and archaeologists to obtain data pertinent to investigations by law enforcement and medical authorities; evidence concerning the identification of human remains and the cause, time and manner of death.

UL: may not be used for credit toward a major or minor in Archaeology

2493 Archaeology on Film explores the use of archaeology as a popular backdrop to many films and documentaries. Yet, the manner in which archaeology is represented in modern film is hardly realistic, or is it? The portrayal of archaeology in popular film will be discussed in order to determine what movies convey to the public about archaeological method and theory as well as the historical stories that archaeologists investigate.

UL: may not be used for credit toward a major or minor in Archaeology

2494 Game of Genders: Sex and Society in the Medieval North introduces students to considerations and expressions of gender in northern medieval society, with particular reference to Viking and Anglo-Saxon worlds. The course explores the concept of gender and considers gendered identities found in material and textual evidence. Students will reflect on how significant cultural changes, such as the conversion to Christianity and the expansion of the North Atlantic and to L'Anse aux Meadows, laid the foundation for what is considered gender appropriate in Western society.

PR: it is recommended, but not obligatory, that students should have successfully completed ARCH 1000 or the former 1030 or Gender Studies 1000

2495 Archaeological Frauds and Mysteries will explore the sensationalized and ‘unreal’ side of archaeology and delve deeper into popular misconceptions of the past. From unraveling the mysteries of Big Foot to evaluating the evidence for alien life on Earth, students will learn how scientific methodology is used to determine facts from myths in archaeology.

CR: the former ARCH 2491

UL: may not be used for credit toward a major or minor in Archaeology

3001 Art, Architecture and Medieval Life (same as Medieval Studies 2001) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.

CR: the former ARCH 3589, Anthropology 3589, Medieval Studies 3001, History 3020, Folklore 3001

PR: it is recommended but not obligatory, that students should have successfully completed one of the following courses: ARCH 2480, the former ARCH 2582, Folklore 1000 or the former 2000, History 2320, Medieval Studies 2001, History 2330/Medieval Studies 2002, or Medieval Studies 2000.

3020 What is Human? discusses how humans have long considered themselves unique. Through readings, discussions and presentations this seminar will explore exactly how distinctive humans are in their biological, behavioural, and intellectual traits and whether there is, in fact, something which sets us apart from all other creatures.

PR: ARCH 2430

3040 The Human Skeleton reflects genetic, environmental and cultural influence. This course, emphasizing identification of individual bones in the skeleton, techniques for obtaining size and shape differences in individual bones and the entire skeleton, estimation of group numbers and death rates, and diagnosis of disease and other abnormal conditions, provides a means of assessing all of these influences on past human populations.

PR: ARCH 2430

3290 First Peoples of Newfoundland and Labrador is a seminar and reading course on the culture history of Newfoundland and Labrador from the entry of humans into the region until the time of European contact. Emphasis is placed on cultural adaptations to a changing regional environment and the evidence for intercultural contact.

PR: ARCH 1000 or the former 1030 or permission of the instructor

3291 First Peoples of the Maritime Provinces explores cultural developments in the area which today includes the Maritime Provinces and the Labrador Peninsula. It also explores the development of the archaeology and ethnohistory of various pre-contact cultures in North America. Particular attention will be paid to the interactions among the several ethnic and cultural groups upon whose history this course focuses.

PR: ARCH 1000 or the former 1030 or permission of the instructor

3500 Prehistory of Africa, Asia and Europe I examines the early stages of cultural evolution in the Old World. Topics include: earliest human origins in
Africa; the dispersal of humans throughout the Old World: the appearance of modern-type humans during the last ice age.

PR: ARCH 1000 or the former 1030

3505 Prehistory of Africa, Asia and Europe II is a survey of the most recent stages of human cultural evolution in the Old World. Topics include complex behaviour of modern-type hunter-gatherers of the last ice age; the domestication of plants and animals in early farming communities.

PR: ARCH 3500

3510 The Ancient Americas is a survey of cultural development in the Americas from the entry of humans until the time of European contact. Topics include human migration and the dispersal of human groups throughout the New World; the development of complex hunting-gathering societies; the origins of agriculture and sedentism.

PR: ARCH 1000 or the former 1030 or permission of the instructor

3515 Prehistory of Mesoamerica (same as the former History 3515) discusses the Spanish explorers arriving in Mesoamerica i.e. Mexico and Guatemala of today, and how they discovered rich and complex civilizations that had developed independently of European or Asian influence. This course traces the development of Mesoamerican civilizations from their known origins to the point at which growth was terminated by Spanish intervention.

CR: the former History 3515
PR: ARCH 1000 or the former 1030

3520 Aboriginal History to 1763 (same as History 3520 and the former Anthropology 3520) examines Aboriginal history in North America from before European contact to the Royal Proclamation of 1763. Particular attention will be paid to the evolution of Aboriginal societies to European contact; cultural change, trade, disease, religious encounters, conflict and diplomacy, and colonial encroachment.

CR: History 3520, the former Anthropology 3520
UL: not applicable towards the Major or Minor in Anthropology

3525 Aboriginal History from 1763 (same as History 3525 and the former Anthropology 3525) examines the history of Aboriginal peoples in North America from 1763 to the twentieth century. Particular attention will be paid to the evolution of Aboriginal societies to the Royal Proclamation of 1763. Particular attention will be paid to the evolution of Aboriginal societies to European contact; cultural change, trade, disease, religious encounters, conflict and diplomacy, and colonial encroachment.

CR: History 3525, the former Anthropology 3525
UL: not applicable towards the Major or Minor in Anthropology

3536 Object Lessons: Putting Strange Things in Context (same as History 3536) explores the interpretation of unique objects, especially those which have been separated, in some way, from their historical context or archaeological assemblage. Students will take a multi-disciplinary approach to understanding a specific remarkable artifact. Topics include the history of technology, the emergence of art, the invention of tradition and the role of design in industrial societies.

CR: History 3536
PR: It is recommended but not obligatory, that students should have successfully completed one of the following courses: ARCH 1000 or the former 1030, Classics 1100 or 1200, Folklore 1000, History 1010 or 1011

3561 Ethnoarchaeology is a subfield of archaeology that uses recent ethnography as a point of departure to interpret and explain the material remains of past human behaviour. This course compares the goals and methods of ethnoarchaeologists with those of ethnographers and archaeologists. Case studies are used to illustrate the different approaches and concerns of ethnologists and ethnoarchaeologists working in different regions of the world.

PR: ARCH 1000 or the former 1030, or permission of instructor

3580 Bronze Age Archaeology of the Eastern Mediterranean (same as Classics 3580) examines the archaeological evidence that underlies the current reconstruction of the Bronze Age in the eastern Mediterranean. The Bronze Age of the Aegean and the island of Cyprus is essentially prehistoric and inaccessible except through the methods of archaeology; physical and dating techniques, geoaarchaeology, residue studies, palaeoethnobotany, zooarchaeology, forensic anthropology, underwater archaeology and cultural resource management. The Bronze Age of the Aegean and the island of Cyprus is essentially prehistoric and inaccessible except through the methods of archaeology; physical and dating techniques, geoaarchaeology, residue studies, palaeoethnobotany, zooarchaeology, forensic anthropology, underwater archaeology and cultural resource management. A stepped approach to the interpretation of the cultural history, lifeways and the dynamics of cultural change during this important period. Emphasis is placed on the role of Cyprus as a physical and cultural link between peoples of the Aegean and the Near East.

CR: Classics 3580
PR: ARCH 1000 or the former 1030 or permission of instructor

3582 Historical Archaeology (same as the former ARCH 2582, the former History 2582, and History 3582) will introduce students to historical archaeology, with special reference to the North Atlantic, 1000 to 1900 AD. The archaeological sites and contexts will be examined in order to raise issues about theory and method. Students will be introduced to paleography; historic maps; documentary archaeology; the survey, excavation and analysis of sites; material culture and subsistence studies; consumer studies; cultural resource management; archaeological conservation; and nautical archaeology.

CR: History 3582, the former Archaeology 2582, the former History 2582, the former History 3530
PR: ARCH 1000 or the former 1030

3583 Archaeology Field School Orientation is designed to familiarize students with field and laboratory techniques. Students will learn about the latest archaeological scientific methodologies involved in archaeological site survey and mapping. Students will be instructed in the identification of archaeological sites, completion of site inventory forms, the use of surveying instruments, and the creation of accurate site maps, using these instruments as well as the concepts associated with archaeological excavation, mapping, recording and photography. Finally, students will be given basic instruction in artifact identification, processing and cataloguing. This course is intended to be a precursor to Arch 3585 and 3586 (Archaeology Field School).

PR: ARCH 2480

3584 Historical Anthropology (same as the former Anthropology 3584 and History 3535) will explore selected issues in historical anthropology, with special reference to the Mediterranean and North Atlantic worlds. Students will study specific case studies in order to explore the theoretical issues raised by the attempt to understand historically-documented past cultures. In order to give practical examples of methodology classes will analyse primary source material. Students will be introduced to the textual analysis of myth and legal records, to the interpretation of images and to the analysis of patterns in material culture. The course will consider specific current interpretive issues, particularly the rise of individualism, the consumer revolution and the cultural construction of gender.

CR: the former Anthropology 3584, History 3535
UL: not applicable towards the Major or Minor in Anthropology

3585-3586 Archaeology Field School offers students practical introduction to archaeological fieldwork (3585) and laboratory techniques (3586). These courses provide instruction and experience in site mapping, sampling strategies, the recovery and conservation of archaeological materials (i.e., artifacts and ecocasts) and the cleaning, cataloguing and interpretation of artifacts and features. The students will also receive an introduction to archaeological research concerning prehistoric and/or historic cultures of a selected region.

PR: ARCH 3583

3588 Arctic Archaeology is an introduction to the archaeology of the Canadian Arctic, Greenland, and Alaska, from earliest settlement to historic interactions between Inuit and Europeans. Special emphasis is placed on the eastern Canadian Arctic, and the changing social and economic environments. Adjustments arcific peoples have made to a challenging environment.

PR: ARCH 1000 or the former 1030 or permission of the instructor

3590 Hunter-Gatherer Studies (same as the former Anthropology 3590) examines past and present hunting and gathering societies from various areas of the world, both from an ethnographic and an archaeological perspective.

CR: the former Anthropology 3590
PR: ARCH 1000 or the former 1030 or permission of the instructor

3592 Norse Archaeology explores the influence of the Vikings on the medieval world and the place of L’Anse aux Meadows within this cultural milieu. Students will be introduced to Viking-Age archaeology and the use of primary texts to gain knowledge of specific questions and problems concerning multicultural contact within the Viking-Age world, specifically the North Atlantic region. They will also gain an appreciation of the challenges associated with using interdisciplinary evidence as well as migration and multicultural issues in the past and present.

CR: the former ARCH 3685
PR: ARCH 1000 or the former 1030

3593 Archaeology of Children examines emerging archaeological and bioarchaeological research on children and childhood. Topics include: learning work, embodiment, identity, death, narrative approaches to children’s lives, and the paleoanthropology of childhood.

CR: the former ARCH 3684
PR: ARCH 1000 or the former 1030

3594 Archaeology of Sport addresses organized recreation as a social and cultural variety of past social activity. The evolution of athletic physiology, bioarchaeological traces on past bodies, sporting facilities and equipment, animal sports, experimental and ethnoarchaeological approaches, and the varying roles of sport, ritual and agency. As well athletic performance will be examined, with case studies of notably large scale and long-running sporting phenomena such as chariot racing and the Mesoamerican ballgame.

CR: the former ARCH 3681
PR: ARCH 1000 or the former 1030 or permission of the instructor

3595 Artifacts of Colonial North America (same as Folklore 3650) provides students with practical experience in the analytical methods used to identify, date and interpret artifacts from colonial-era sites in North America. Detailed discussions of material culture, technology, form and function provide the necessary background for a better understanding of concepts relating to artifact identification, provenance, dating techniques, and other current issues. Practical, hands-on exercises will help reinforce weekly topics and
teach students the fundamentals required to interpret artifact assemblages from the historical period.
CR: Folklore 3850, the former Anthropology 3683
PR: ARCH 1000 or the former 1030, or permission of the instructor
3651 Archaeology of Colonial North America focuses on the history and archaeology of North American colonization and covers the period of European exploration and settlement from approximately 1500 to 1700. A diverse range of topics will be discussed including: contacts and interaction with native peoples; early colonies and seasonal outposts; established settlements; war, trade and economics; the material record; the built landscape; daily life in colonial society and maritime archaeology.
CR: the former ARCH 3682, or the former Anthropology 3682
PR: ARCH 1000 or the former 1030
3680-3689 (Exclusive to 3687 and 3688) Studies in Archaeology and Prehistory will include the consideration of current developments in methods, techniques and theory as applied to selected areas of the world.
PR: ARCH 1000 or the former 1030
3687 The Archaeology of Death explores archaeological studies of mortuary rituals, human remains and grave goods to provide insight into past social structures, cultural ideals, identity, and community beliefs. This course takes multiple approaches to understand the variability in archaeological mortuary practices cross-culturally over time and space.
3688 Coastal Archaeology studies human adaptations to coastal landscapes with an emphasis on the analysis of shell middens. Shell midden sites can contain millennial-scale records of archaeological and environmental events, and when analyzed the contents can be used to interpret past food procurement strategies, migration, settlement, technology and how people responded to short- and long-term ecological changes.
PR: ARCH 2480
3710 Museums and Historic Sites - inactive course.
3750 Archaeology of Warfare is a broad overview of archaeological research conducted at sites associated with human conflict spanning from ancient times to World War II. Weekly lectures and hands-on exercises will provide students with a solid background on the various means by which archaeologists study and excavate sites relating to war, conflict and captivity. A broad range of topics will be covered including remote sensing and field survey techniques, the changing technology and tactics of war, battlefield sites, POW camps, sunken naval vessels, aviation sites, fortifications and frontier outposts.
PR: ARCH 1000 or the former 1030
3850 Material Culture (same as Folklore 3850) is an introduction to the study of material culture and the question of why objects are important to us. Using folklore and interdisciplinary approaches, we will look at objects as cultural products, question the influence of objects on behaviours, and address the role of objects in historical and ethnographic research.
CR: Folklore 3850
3860 Vernacular Architecture - inactive course.
4015 Cultural Resource Management (same as Folklore 4015 and Geography 4015) is a study of cultural resource management: the definition and nature of cultural resources, the repugnancy of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management. Three hours of lecture and three hours of seminar per week.
CR: Folklore 4015 and Geography 4015
PR: ARCH 2480 or the former ARCH 2582
4041 Palaeopathology looks at disease, diet, genetics, accidents and maternal health factors as contributors to variations in the human skeleton. In this lecture and seminar course students will investigate how these factors are diagnosed, and aspects of the culture, health, economy and environment of the skeletal individuals are examined.
PR: ARCH 2430 and ARCH 3040
4043 Biomolecular Archaeology is a rapidly developing, multidisciplinary subfield of archaeology concerned with unraveling aspects of human behaviour and adaptation from ancient biomolecules preserved in artifacts and skeletal remains. Through lectures, directed readings and seminars this course aims to review and critically assess the many facets of biomolecular archaeology, including how biological and (geo)chemical methods can be used to address questions of diet, migration and ancestry in the past.
PR: one of ARCH 2430, ARCH 2450 or ARCH 2480
4050-4059 Special Projects in Bioarchaeology includes directed reading, seminars and lab analysis of various skeletal collections. Topics to be covered may include primate behaviour, forensic anthropology, stable and radiogenic isotope analysis and various aspects of human evolution.
PR: ARCH 2430 and ARCH 2450
4150 Environmental Change and Quaternary Geography (same as Earth Sciences 4703 and Geography 4150) examines methods of reconstructing Quaternary environments, effects of Quaternary environmental changes on landform, with special reference to North America, development and characteristics of glacial and nonglacial climates.
CR: Earth Sciences 4703, Geography 4150
LH: 3
PR: 6 credit hours in Physical Geograpy or in Archaeology at the 3000-level, or permission of the instructor
4151 Palaeoethnobotany is a combined directed readings/laboratory course on palaeoethnobotany. Palaeoethnobotany concerns the recovery and analysis of archaeological plant remains as a basis for understanding human and plant interactions in the archaeological record. This course focuses on recent palaeobotanical research in northeastern North America.
CR: ARCH 2450, ARCH 2480 or the permission of the instructor
4152 Zooarchaeology aims to introduce the student to the wide range of information that can be gleaned about past human groups from the animal remains they left behind after butchery, meals, toolmaking and other activities. Students will also gain practical experience in the identification and analysis of faunal remains.
CR: the former ARCH 4195 or the former Anthropology 4195
PR: ARCH 2450 or ARCH 2480
4153 Lithic Analysis explores the range of techniques used to study stone tools, including material and provenance identification, morphology and functional analysis, temporal and cultural typology, measurement, experimental manufacture, use wear and breakage patterns, retouch, debitage analysis and spatial distribution.
CR: the former ARCH 4196 or the former Anthropology 4196
PR: ARCH 2450 or ARCH 2480
4160-4169 Special Projects in Archaeology are courses which may be offered from time to time as demand arises. They may involve research seminars and actual analysis of archaeological collections on, for example: The Neolithic of Western Asia; the Rise of Civilization in Western Asia; Scandinavian Prehistory; Palaeoethnobotany; and Technology and Material Culture.
PR: one of ARCH 2450, 2480, 2481, the former 2582, or permission of the instructor
4171 Iroquoian Archaeology is a lecture course examining the culture developments of the Iroquoian peoples of Northeastern Canada and the USA. Using both archaeological and ethnohistoric materials, this course will outline and explain the changing social, political and economic traditions of this culture group from their origins through the early contact period.
CR: the former ARCH 4190
PR: ARCH 2480
4172 Postcolonial Archaeology critically explores the history and contemporary practice of archaeology in light of the political claims of (formerly) subjugated groups. Topics to be discussed include archaeological antecedents of a postcolonial perspective (postprocessualism, critical archaeology), political economy of archaeology, interests of indigenous and other, descendant groups, repatriation, national and transnational archaeologies, and community archaeology.
CR: the former ARCH 4192 or the former Anthropology 4192
PR: ARCH 2480 or the former ARCH 2582
4173 Archaeology of the Body explores the possibility of a more cross-disciplinary archaeology of the body. We will start by looking at the development of archaeological work on gender and recent reconceptualizations of the body in social, cultural and feminist theory. Topics to be discussed include the notion of bodily practice, biopolitics, sexuality, hybridity, violence, identity, sensory experience, disability and aging.
CR: the former ARCH 4191 or the former Anthropology 4191
PR: ARCH 2480
4182 History of Archaeology is an intensive study of the emergence and maturation of archaeology as a discipline within the social sciences, particularly in Western Europe and North America, during the 19th and 20th centuries.
PR: ARCH 2480
4190-4199 Selected Topics in Archaeology and Prehistory is a seminar course focusing on recent theoretical and methodological developments in archaeological research.
CR: the former ARCH 2450, 2480, or the former ARCH 2582
4411 Theory and Method in Archaeology and Prehistory is a seminar course focusing on recent theoretical and methodological developments in archaeological research.
PR: ARCH 2480 and ARCH 4182
4500 Special Topic in Historical Archaeology is a consideration of current developments in methods, techniques, and theory in Historical Archaeology.
PR: ARCH 2480, the former 2582, or permission of instructor
4994 Past Material - Advanced Research and Writing is a directed reading course and is a prerequisite for the Honours Essay in Archaeology (ARCH 4995). Readings will be chosen to complement students
specialization and to prepare them for the honours essay. Assignments will emphasize short essays and will provide students with the opportunity to improve their professional writing skills in the fields of archaeology, material culture and heritage.

PR: ARCH 2480

4995 Honours Essay is required as part of the Honours program.

PR: ARCH 4994

14.2.1 Work Terms

The following! Work Terms are a requirement of the Bachelor of Arts Co-operative Education Major or Honours in Archaeology.

300W Work Term 1 (Co-operative) will be the student’s first work experience in a professional environment. Students are expected to learn, develop and practice the high standards of behaviour normally expected in the workplace. Students may be required to attend seminars on professional development.

CH: 0
PR: admission to the ACE Program; ARCH 3585 and 3586 or previous archaeological experience; a minimum overall average of 65%; and permission of the ACE Coordinator and Head of the Department

400W Work Term 2 (Co-operative) builds on previous work term experiences and academic instruction as students will be assigned to a more challenging position. Students will now possess the necessary academic grounding and work experience to contribute to the problem-solving and management needs of a professional work environment. Students should observe and appreciate the attitudes, responsibilities and ethics normally expected of professionals, and should exercise greater independence and responsibility in their assigned work functions.

CH: 0
PR: admission to the ACE Program; ARCH 300W; a minimum overall average of 65%; and permission of the ACE Coordinator and Head of the Department

14.3 Classics

In accordance with Senate’s Policy Regarding Inactive Courses, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

In special circumstances, prerequisites may be waived with the permission of the Head of the Department.

Classics courses are designated by CLAS.

14.3.1 Greek

All sections of the Greek language courses below, except CLAS 4999, follow the Language Study Course Guidelines available at www.mun.ca/hss/lsc.

1130 Introductory Ancient Greek I familiarizes students with the basics of the Ancient Greek language. Students will master the Ancient Greek alphabet, learn how to read simple narratives in Ancient Greek, and examine the connections between language and culture. Evaluation will focus largely on comprehension of written Ancient Greek. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/lsc.

CR: the former CLAS 130B

1131 Introductory Ancient Greek II continues to familiarize students with the Ancient Greek language. Students will acquire a broad vocabulary, learn to read more complex passages of prose and poetry, and gain insights into key social concepts through study of language. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/lsc.

CR: the former CLAS 130B

PR: CLAS 1130 or its equivalent

2300 Intermediate Ancient Greek provides a deeper knowledge of the Ancient Greek language while offering a window onto the culture and society of Ancient Greece. Students will read selections from works of history, literature, philosophy and oratory in Ancient Greek. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/lsc.

PR: CLAS 1131

2302 Readings in New Testament Greek - inactive course.

3300 Advanced Ancient Greek provides advanced knowledge of the Ancient Greek language while offering a window onto the culture and society of Ancient Greece. Students will begin to apply their knowledge to the close reading and interpretation of major works of Ancient Greek literature. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/lsc.

CR: the former CLAS 2305

PR: CLAS 2300

4300 Greek Tragedy

PR: CLAS 3300

4305 Greek Comedy

PR: CLAS 3300

4310 Greek Epic Poetry

PR: CLAS 3300

4315 Attic Orators

PR: CLAS 3300

4320 Greek Lyric Poetry

PR: CLAS 3300

4325 Greek Historians

PR: CLAS 3300

4340 Greek Philosophical Authors

PR: CLAS 3300

4355-4365 Special Topics in Greek Readings will have authors and readings selected by the Department.

PR: CLAS 3300

4370 Hellenistic Poetry

PR: CLAS 3300

4391 Special Authors

PR: CLAS 3300

4999 Honours Essay is a requirement of the Honours program.

PR: CLAS 3300

14.3.2 Greek and Roman Studies

14.3.2.1 Medieval Studies 3000 may be substituted for a Greek and Roman Studies course in both the Classics degree programs (Honours, Joint Honours and general degree) and the Greek and Roman Studies degree programs (Honours, Joint Honours and general degree).

1051 Gods in Classical Mythology is an introduction to some of the major myths of ancient Greece and Rome, with particular attention to the gods. The myths will be studied with reference to their social and historical contexts, literary and artistic representations, and modern theories of interpretation.

CR: the former CLAS 1050

1052 Heroes in Classical Mythology is an introduction to some of the major myths of ancient Greece and Rome, with particular attention to the heroes. The myths will be studied with reference to their social and historical contexts, literary and artistic representations, and modern theories of interpretation.

CR: the former CLAS 1050

1100 Introduction to Greek Civilization is a general illustrated survey of the origins and evolution of Ancient Greek Civilization. The course introduces the student to Greek social and political institutions, religion and myth, and achievements in art, philosophy, science and literature, as well as the influence of Ancient Greece on the modern world.

1200 Introduction to Roman Civilization is a general illustrated survey of the origins and evolution of Ancient Rome. The course introduces the student to social, political, and legal institutions, the growth of the Roman Empire, Roman art, literature, and religions, as well as Rome's pervasive influence in the modern world.

2010 Greek Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Greece.

2015 Roman Art and Architecture is an introduction, through illustrated lectures, to the study of the art and architecture of Ancient Rome.

2020 History of the Hellenistic World (same as History 2034) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and Non-Greek communities.

CR: History 2034

2025 Ancient Near Eastern History (same as History 2020) is an introduction to the history of ancient city-states, kingdoms and empires in Egypt and/or Mesopotamia, including economic, social, political and cultural developments.

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).
2035 History of Classical Greece (same as History 2035) is a survey of Greek History from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century B.C.

CR: History 2035

2041 History of the Roman Republic (same as History 2041) is a survey of Roman history from the early monarchy to the death of Julius Caesar, with special reference to the society and politics of the late Republican period.

CR: History 2041, the former CLAS 2040, the former History 2040

2042 History of the Roman Empire (same as History 2042) is a survey of Roman history from the death of Julius Caesar to the rise of Constantine, with special reference to the society and politics of the early and Imperial period.

CR: History 2042, the former CLAS 2040, the former History 2040

2055 Women in the Ancient World is an examination of the role of women in ancient Mediterranean civilizations from the perspectives of social and political history and culture. Critical assessments of relevant scholarship and methodologies will be included.

2400 Literature of Ancient Greece introduces students to Greek Literature from the Archaic to the Imperial Periods. Students will study epic poetry, drama and other genres typical of these periods. Students will also be introduced to important themes, methodologies and scholarship.

CR: the former Classics 3110, the former English 3110

2500 Literature of Ancient Rome introduces students to Latin Literature from the Republican to the Late Antique Periods. Students will study epic poetry, drama and other genres typical of these periods. Students will also be introduced to important themes, methodologies and scholarship.

CR: the former English 3111, the former Classics 3111

2701 History of Ancient Philosophy (same as Philosophy 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Philosophy 2701

2900 Science and Technology in the Ancient World is an introduction to significant developments in ancient Greek and Roman science and technology with emphasis on interpreting the primary evidence, including written sources (in translation) and material remains, assessing the historical context, and considering the nature of advancements.

2901 Technology and Culture in the Ancient World is an introduction to the applied technologies of the Greeks and Roman cultures from ancient written sources and archaeological remains. It covers the time from the Late Bronze Age through the Late Roman Empire. Topics include machinery and gadgets, mass production, engineering, nautical technology, and labour.

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Religious Studies 3010, the former CLAS 3121, the former Religious Studies 3121

PR: it is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses

3020 Roman Religion (same as Religious Studies 3020) is a study of the role of religion in the private and public life of the Roman world.

CR: Religious Studies 3020, the former CLAS 3121, the former Religious Studies 3121

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3030 Greece and Persia is a study of relations between Greece and Persia from the foundation of the Persian Empire to the death of Alexander the Great.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3040 Socrates and Athens is an introduction to and examination of Socrates within the context of Athenian political, social, cultural, intellectual, and religious life, and against the background of the fifth-century enlightenment and the sophistic movement.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3050 Augustus and Rome is a course that examines the Age of Augustus (27 B.C. to A.D. 14) which witnessed not only Rome's greatest achievements in the arts and culture but also the replacement of republican government by a monarchy; this course, based on original sources, examines the period through its most powerful and influential figure.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3150 Early Christian Thought: The First Five Centuries - inactive course.

3270 Christianity and the Roman Empire (same as History 3270 and Religious Studies 3270) is a study of the relationship between Christianity and the Roman Empire from the first to the fourth century.

CR: History 3270, Religious Studies 3270

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics to be discussed include the development of ancient tragic poetry, its literary, performative and thematic traditions, its representation of social and historical conditions, and its influence on later tragic drama.

CR: the former Classics 2805

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3410 Comic Drama in Greece and Rome is a detailed examination of the comic dramas of ancient Greece and Rome. A selection of plays by Menander, Plautus and Terence will be read in English translation. Topics to be discussed include the development of ancient comedy, its literary and thematic traditions, its representation of social and historical context, and its influence on later comic drama.

CR: the former Classics 2810

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry of ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society.

CR: the former Classics 2860

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3420 Lyric Poetry in Greece and Rome - inactive course.

3500 Sport and Athletics in Ancient Society will trace the evolution of athletics and other forms of recreation in Greece and Rome, with emphasis on their religious, cultural, and social importance. Topics will include sports in Homer, the concept of arete, the Olympic ideal, gladiatorial contests, Greek athletics and the Roman Empire.

3501-3510 Special Topics in Classics will have topics determined by the Department.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3580 Bronze Age Archaeology of the Eastern Mediterranean - inactive course.

3600 Ancient Myth and Cult (same as Religious Studies 3600) develops the students' knowledge of myth and material culture by examining specific religious sites in the Greek and Roman world as foci of ritual practice. The course will learn to integrate knowledge of the physical remains with the literary and ritual evidence in order to obtain a more integrated understanding of religious life in ancient Greece and Rome.

CR: Religious Studies 3600

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence which informs them. The ancient world’s impact on modern Western society will be considered together with the film industry’s recasting of the ancient world in response to modern social and historical developments.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3710-3729 Special Topics in Classics: Harlow is available only as part of the part of the Harlow Campus semester.
3900 Greek and Roman Medicine examines the medical theories and practices of the ancient Greek and Roman world by taking account of ancient texts (in translation) as well as evidence from material culture, including art and architecture. Topics may include the relationship between science and medicine, concepts of health and illness, the role of the healer and practice of ancient practices.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000-level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course.

4000 Seminar in Greek History and Society - inactive course.

4010 Seminar in Roman History and Society is a seminar in Roman History and Society.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000-level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course.

4020 Seminar in Greek Literature and Culture is a seminar in Greek Literature and Culture.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000-level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course.

4030 Seminar in Roman Literature and Culture is a seminar in Roman Literature and Culture.

PR: there is no prerequisite for this course but students are strongly advised to have completed at least one 1000-level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course.

4100-4109 Special Topics in Greek and Roman Studies will have topics announced by the Department and may include field studies in topography, Greek and Roman art and architecture, archaeology, and related areas, to be held in the Mediterranean and other regions of Graeco-Roman influence.

PR: permission of the instructor and the Head of the Department.

4999 Honours Essay is a requirement of the Honours program.

14.3.3 Latin

All sections of the Latin language courses below, except CLAS 4999, follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

1120 Introductory Latin I familiarizes students with the basics of the Latin language. Students will learn how to read simple narratives and short poems in Latin and examine the connections between language and culture. Evaluation will focus largely on comprehension of written Latin. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

CR: the former CLAS 120A

1121 Introductory Latin II continues to familiarize students with the Latin language and Roman culture and society. Students will acquire a broad vocabulary, learn to read more complex passages of prose and poetry in Latin, and gain insights into key social concepts through study of language. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

CR: the former CLAS 120B

PR: CLAS 1120 or its equivalent

2200 Intermediate Latin provides a deeper knowledge of the Latin language while offering a window onto the culture and society of Ancient Rome. Students will read selections from works of history, literature, philosophy, and oratory in Latin. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

PR: CLAS 1121

3200 Advanced Latin provides advanced knowledge of the Latin language while offering a window onto the culture and society of Ancient Rome. Students will begin to apply their knowledge to the close reading and interpretation of major works of Latin literature. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

CR: the former CLAS 2205

4205 Latin Lyric Poetry

PR: CLAS 3200

4210 Latin Historians

PR: CLAS 3200

4215 Latin Orators

PR: CLAS 3200

4220 Latin Hexameter Poetry

PR: CLAS 3200

4225 Latin Epistolography - inactive course.

4235 Latin Philosophical Authors

PR: CLAS 3200

4240 Latin Drama

PR: CLAS 3200

4245 Latin Elegiac Poetry

PR: CLAS 3200

4250 Latin Satire

PR: CLAS 3200

4265-4275 Special Topics in Latin Readings will have authors and titles selected by the Department.

PR: CLAS 3200

4291 Special Authors

PR: CLAS 3200

4999 Honours Essay is a requirement of the Honours program.

PR: CLAS 3200

14.4 Communication Studies

For Communication Studies course descriptions see under English, Communication Studies.

14.5 Economics

Examinations in Microeconomics (sames as the former ECON 2010) and Macroeconomics (sames as the former ECON 2020) are scheduled for Fall and Spring terms.

CR: the former ECON 2010

1020 Introduction to Macroeconomics (sames as the former ECON 2020) covers national income accounting, aggregate income analysis, money, banking and foreign trade. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.

CR: the former ECON 2020

2550 Economic Statistics and Data Analysis is an analysis of economic statistics and the use of economic data. A course designed to introduce students to the task of economic data collection, description and analysis. Emphasis will be on interpretation and analysis of data using computer software programs. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.

PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020), and Statistics 2500 or equivalent

3000 Intermediate Micro Theory I is the basic microeconomic theory course; consumer demand, indifference curve analysis, theory of production and cost, factor substitution, and the theory of the firm under perfect competition and monopoly.

PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3001 Intermediate Micro Theory II is a continuation of basic microeconomic theory; the theory of imperfect competition, theory of factor pricing under various market structures, general equilibrium and welfare economics.

PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3010 Intermediate Macro Theory I is aggregate analysis including...
consumer, investment, government and international sectors, the role of money, determinants of aggregate supply, and the effects of autonomous behavioural changes and fiscal and monetary policies on unemployment, price levels and the balance of payments. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3011 Intermediate Macro Theory II is a consideration of modern theories of macroeconomics, dynamics, empirical evidence and simulation of the national economy. Emphasis on the availability and effectiveness of government policy instruments. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3030 International Economics is an intermediate course encompassing theories and empirical studies of global trade flows; the effects of trade barriers, and the structure of economic integration such as the North American Free Trade Agreement and the European Union; the Balance of Payments and its links to the foreign exchange markets; the importance of the exchange rate as a macroeconomic variable; and the causes and lessons of exchange rate crises. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3070 The Structure and Problems of the Newfoundland and Labrador Economy is an analysis of the structure of the economy of Newfoundland and Labrador. Basic economic theory will be applied to current economic issues and problems in Newfoundland and Labrador. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3080 Natural Resource and Environmental Economics is application of economic analysis to renewable and nonrenewable natural resource industries such as the fishery, forestry, and mining. Emphasis is given to the criteria for optimal resource use under various market structures and their implications for resource policy. Issues of environmental resource management and pollution control will also be covered. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3140 Economic Analysis in Health Care evaluates the role of economic analysis in health and medical care. Topics in the application of cost-effectiveness analysis [and cost-benefit analysis] to health care programs, as well as comparisons of the Canadian experience with other health care systems will be discussed. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)

3150 Money and Banking examines the operation of the money and banking system. Topics include the core foundations of money and banking, and how they can be applied to the Canadian banking system and also to an international context, such as worldwide financial crises and the interaction of central banks globally. Selected topics and emphasis will vary from year to year so as to reflect the evolution of the Canadian banking system and the global financial system. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS. PR: ECON 1010 (or the former ECON 2010) and/or ECON 1020 (or the former ECON 2020)
