## MEMORIAL UNIVERSITY INVENTORY OF SPONSORED PROJECTS

### INTRODUCTION

The Office of Research has been publishing an annual *Inventory of Sponsored Projects* since 1974 (prior to 1998-1999 published under the title of *Research Inventory*). This volume, the 33rd in the series, lists the sponsored project activity that was carried out at Memorial for the fiscal year April 1, 2006 to March 31, 2007. This and previous versions of the *Inventory* dating back to 1995-1996 are available on the Office of Research Web site at <http://www.mun.ca/research>.

The *Inventory* does not list all research activity being carried out at Memorial. It lists only the research that has received direct funding support. Another publication of the Office of Research, the *Research Directory*, covers the research interests and activity of current members of faculty. The *Research Directory* is maintained as an on-line database on the Office of Research Web site at <http://www.mun.ca/research>.

In 2006-2007 external funding support amounted to just under \$90 million.

Many grants and contracts are awarded for a single fiscal year; however, a substantial number bridge two or more years. For any research funding that spans more than one year, this *Inventory* includes only the portion awarded during the 2006-2007 fiscal year. The details were compiled from Office of Research records. Preliminary reports were sent to individual researchers for verification prior to publication. While every effort has been made to ensure accuracy and completeness, any errors or omissions should be reported to the Office of Research.

The *Inventory* continues to include grants and contracts for developmental and international projects, awards made for the organization of conferences at which research results are disseminated, research infrastructure grants and contracts, and fellowships that facilitate research. A number of grants and contracts providing support for innovative teaching techniques and course development, particularly for delivery by distance and via the Internet, are also included.

### ORGANIZATION OF THE INVENTORY

The listing is organized by campus, faculty or other unit, then by department where applicable, and finally alphabetically by principal investigator within each unit. Projects supported by funds from agencies and organizations outside the university are reported in the first section of the *Inventory*. Grants awarded internally from block funds and from faculty funds are listed in the next section. For both internal and external awards, each research project is individually listed, giving the name of the principal investigator(s), title of the project, funding agency or fund, and the amount awarded for 2006-2007. Some scholars have appointments in more than one faculty or department, or are cross-appointed with an institute; their projects are listed in detail only once but the additional affiliations are noted and cross-referencing is provided so that the details of all awards may be readily located.

### ACKNOWLEDGMENTS

The production of the *Inventory* was, as usual, owing to the efforts of a number of people. Elizabeth Williams was responsible for formatting and editing. Debbie Barnes, Eleanor Butler, Ros Chafe, Jan Hopkins, Jessica McLachlan, and Janice Peach assisted with data verification. Craig Perchard co-ordinated the effort. Outside of the Office of Research, special thanks are extended to Dr. Wade Bowers, Sir Wilfred Grenfell College, Fred Christian-Quinton, and Michael Beson, Marine Institute, Sheila Bartlett, C-CORE, Colleen Clarke, International Centre, Gail Lamkin, School of Graduate Studies, Fran Kirby and David Adams, Professional Development, Faculty of Medicine, and Kelly Aspell, Student Affairs and Services, for assisting with their data. Thanks to Image Services of the Department of Marketing and Communications for the cover design. Finally, special thanks to all researchers and administrative personnel for contributing to the integrity of the data by taking the time to respond during the verification process.

**STATISTICAL TABLES**

**2006-2007**

## NOTES TO THE TABLES

1. **Operating grants** are awarded to individuals or teams to cover part or all of the direct costs of particular research projects. They often include provision for salaries paid to graduate students and other assistants, the university's share of fringe benefit costs, and the expenses of materials, technical services, field travel and computing.
2. **Operating contracts** are similar to operating grants but involve a contractual agreement that is more formal than the terms of a conventional grant. By means of a contract, the sponsor normally acquires an interest in the results of the research and can enforce strict time, scope and reporting requirements; university policy, however, is that investigators retain the right to publish, subject to a reasonable deferral period.
3. **Equipment grants** are awards given for the purchase of items of capital equipment and their maintenance.
4. **In-kind** support is assistance in other ways than cash transfers to the university. Among common types of such support are free supplies of material involved in experiments, use of off-campus computer or other facilities, loan of equipment, donations to the library, dedicated time of other organizations' personnel, ship-time and other logistical support.
5. Awards designated as **general support grants** are either grants to assist with general operating costs, including awards for infrastructure or library resources, or lump sums received from an outside source and then redistributed internally within the university.
6. In Table 3, the amounts reported for the Faculty of Science also include the research unit OSC (Ocean Sciences Centre). The amounts reported for the Faculty of Business Administration also includes the P.J. Gardiner Institute for Small Business Studies and the Centre for International Business Studies.
7. Further analysis of the University's research data can be found in the *Fact Book*, a publication of the Centre for Institutional Analysis and Planning. The *Fact Book* is available at [www.mun.ca/ciap/](http://www.mun.ca/ciap/) or by contacting the Centre for Institutional Analysis and Planning.

\*In-kind is not regarded as a funding category. Instead, it is recorded as a type of funding, like cash. The in-kind counts have already been included in the various funding categories; e.g., if a sponsor provides an in-kind contribution as an operating grant, one operating grant is counted.
