

CFI Funding & Memorial

Processes, Experiences and
Insights

Co-hosted by [Strategic Institutional Research Initiatives](#) and the [Faculty of Engineering and Applied Sciences](#)

Panel members

DR. [YURI MUZYCHKA](#)

DR. [FRANCESCA KERTON](#)

DR. [LISA RANKIN](#)

11am - noon 25 November

Please email elainew@mun.ca by Nov 24 to RSVP

CFI Funding and Memorial Processes, Experiences and Insights

The CFI overview will be provided by Pamela White, Manager, Institutional Research Programs (CFI and CRC), who has over 20 years experience serving as Memorial University's CFI Liaison, and Dr. Adedoyin Odukoya, Grants Facilitator, Faculty of Engineering and Applied Science (FEAS). He has over 5 years experience in managing pre-award for the tri-council agencies, international partnerships, Canada Foundation of Innovation, and Canada Research Chair applications. The panel members will discuss their own personal experiences and insights that they have gained from securing CFI funds.

Dr. Muzychka is professor and department head at the department of mechanical engineering. He graduated from Memorial University (1993) with a bachelor of mechanical engineering. He then attended the University of Waterloo from 1993-1999 and obtained a master of applied science (1995) and PhD (1999) in mechanical engineering.

His research is focused on the modeling of complex fluid dynamics and heat transfer problems in internal flows. These include transport in porous media, compact heat exchangers, two phase flows, slip flows, micro-channel flows, and non-Newtonian flows.

Dr. Kerton is professor of Green Chemistry at Memorial University. She obtained her first class B.Sc. Hons degree (Chemistry Major, Environmental Science Minor, 1995) at the University of Kent in the UK. This is the main university in the area in which she grew up – ‘The Garden of England’. She performed research supervised by Dr. Mike Went in the area of thio-macrocyclic synthesis and coordination chemistry. She then moved to the University of Sussex to obtain her D.Phil. degree (1999) under the supervision of Dr. Gerry Lawless, and co-supervision by Dr. Steve Armes.

Dr Lisa Rankin is professor and Memorial University Research chair in Northern Indigenous Community Archaeology. She graduated from the University of British Columbia with a Bachelors in Arts. She received her Masters from Trent University and a Ph.D. from McMaster University. Her current research focuses on the Inuit occupation of Groswater Bay, Labrador. Her research interests also include Post-medieval cultural encounters in the archaeological record between Labrador Inuit and Europeans, and interactions between Northeastern Indigenous populations over the past several Millennia; hunter-gatherers, ethnicity and identity, landscapes, settlement patterns, eastern Sub-Arctic.
