SCIENCE ON THE ROCK QUIDI VIDI

## DANGEROUS LIAISONS:

### A SPIDER'S GUIDE TO THE ART OF SEDUCTION

When you look at a spider's web, you probably see a clever trap for capturing insects, but spiders use their silk for much more than just predation. In this talk you will get a closer look at the private lives of spiders and their surprisingly sophisticated sexual behaviour and communication, from web-based personal ads to silk-wrapped gifts. Travel with a spider on its quest to find a date without becoming dinner, and along the way learn how a former arachnophobe's fear transformed to fascination while studying the mating rituals of black widows.
